TALITHA CUMI.—The command addressed by our Lord to the daughter of Jairus (Mk 5^{41}), and interpreted by the Evangelist, ‘Maiden, I say unto thee, arise.’ The Aram. words טְלִיתָא קוּם (so Dalman, *Gram. d. Jüd.-Pal. Aramäisch*, p. 118, n. 6; p. 266, n. 1) have been variously transliterated in Greek MSS of NT. Tisch., with אACLNΠ, reads *ταλιθά*; WH, with B, *ταλειθά* (see on the spelling Westcott-Hort, *NT.* ii. Append. p. 155, and Winer-Schmiedel, *Gram.* pp. 43, 44). D has the extraordinary variant *ταβιτά* (found in different forms in Old Latin texts, *e.g.* the curious reading of *e*, *tabea acultha*; cf. Chase, *Syro-Latin Text*, p. 109 ff.). *κοῦμ* (rather than *κοῦμι*) has the best attestation. This is borne out by the occurrence of the same imperative קוּם in the Talmud, used in *Shabb.* 110*b* ‘seven times in one page,’ where a woman is addressed (so Edersheim, *Life and Times of Jesus*, i. p. 631). *ταλιθά* is probably the Aramaic fem. of טְלִי, found in Hebrew only in plur. טְלָאִים. The relating of the actual (Aramaic) words used by Jesus is characteristic of St. Mark's graphic narrative; cf. $7^{11.\,34}$ 14^{36} 15^{34}. It is needless to speak of ‘mysterious Aramaic words’ as Keim does (*Jesus of Nazara*, iv. p. 170) on the assumption that the Gospels clothe our Lord's words of command given in miraculous healings 'in Aramaic . . . as if they were magical formulæ' (iii. p. 183). The Evangelist simply reports the very sounds which fell from Jesus' lips upon the ears of the chosen disciples on a specially solemn and memorable occasion.

H. A. A. KENNEDY.

TALMAI (תַּלְמַי).—**1.** A clan, possibly of Aramaic origin, resident in Hebron at the time of the Hebrew conquest and driven thence by Caleb (Nu 13^{22} [BA Θελαμεὶν, Luc. Θαλαμεὶν], Jos 15^{14} [B Θοαλμεί, A and Luc. Θαλμαί], Jg 1^{10} [B Θολμεὶν, A Θαμεί, Luc. Θολμεί]). See, further, art. AHIMAN, No. 1. **2.** Son of Ammihur (or Ammihud), king of Geshur, and a contemporary of David to whom he gave his daughter Maacah in marriage. He was still living many years after Maacah's marriage, for her son Absalom, when he fled from David after the death of Amnon, found refuge with Talmai at Geshur (2 S 3^{3} [B Θομμεί, A Θολμεί, Luc. Θολμί] 13^{37} [B Θολμαιλήμ, A Θολομαί, Luc. Θολμί], 1 Ch 3^{2} [B Θοαμαί, A Θολμεί, Luc. Θολομί]).

G. B. GRAY.

TALMON (טַלְמֹן, in Neh 12^{25} טַלְמוֹן).—The name of a family of temple gatekeepers, 1 Ch 9^{17}, Ezr 2^{42}, Neh 7^{45} 11^{19} 12^{25} (B Ταμμάμ, Τελμών, Τελαμών, Τελαμεὶν; A Τελμάν, Τελμών, Τολμών; Luc. Σελμών, except in 1 Ch 9^{17} Τελμών). See, also, TELEM.

TAMAR (תָּמָר 'palm-tree').—**1.** (Θαμάρ) A Canaanite woman, married to ER and then to his brother ONAN. When Judah, deterred by the death, successively, of two sons, hesitated to give his surviving son, Shelah, to perform the duty of *levir* (see MARRIAGE, vol. iii. p. 269^{a}), Tamar, who had assumed the disguise of a *ķĕdēshāh* in order to effect her purpose, became by her father-in-law himself the mother of twin sons, PEREZ and ZERAH (Gn 38 [J], Ru 4^{12}, 1 Ch 2^{4}, Mt 1^{3}). **2.** (Θημάρ, Θαμάρ) The beautiful sister of Absalom, who was violated and brutally insulted by her half-brother, Amnon, 2 S 13^{1}. This conduct led to the murder of the latter by Absalom, v.$^{23ff.}$ The significance of v.^{13} ('speak unto the king, for he will not withhold me from thee') is noticed in art. MARRIAGE, vol. iii. p. 267^{b}. **3.** A daughter of Absalom (2 S 14^{27} B Θημάρ, A Θαμάρ). The LXX adds that she became the wife of Rehoboam. She would thus be identical with MAACAH of 1 K 15^{2}, 2 Ch 11$^{20ff.}$. Indeed Lucian reads Μααχά even in 2 S 14^{27}. This question, however, of the identity of Rehoboam's wife is involved in considerable obscurity. See the *Comm. ad loc.*

J. A. SELBIE.

TAMAR (תָּמָר 'palm-tree'; Θαιμάν; *Thamar*).—**1.** In the vision of Ezekiel, the eastern boundary of the land which the twelve tribes were to inherit was to terminate at the East, or Dead Sea; and the S. boundary was to be 'from Tamar as far as the waters of Meriboth-kadesh to the wâdy of Egypt' (Ezk 47^{19}; read also תָּמָרָה 'unto Tamar,' for תָּמֹדּוּ 'ye shall measure' in v.^{18}). The land was to be divided into parallel strips extending from E. to W., and the southern strip was to be assigned to Gad, whose S. boundary was to be that of the twelve tribes (Ezk 48^{28}). A comparison of the boundaries in Ezk 47 with those given in Nu 34, shows that the same limits are intended, and Tamar must therefore be looked for in the vicinity of the ascent of Akrabbim to the S. of the Dead Sea (cf. the boundary of Judah in Jos 15$^{1-4}$). Tamar cannot be 'Hazazon-tamar which is Engedi' (2 Ch 20^{2}), for this place is near the middle of the W. shore of the Dead Sea, and is mentioned under its later name by Ezekiel (47^{10}). It may possibly be the *Asasan Thamar* of Eusebius and Jerome (*Onom.* 85. 3, 210. 86), which they identified with *Thamara*, a village with a fort and Roman garrison, which was a day's journey from Hebron on the road to Elath. This place appears as Thamaro in the Peutinger Tables, on the road from Hebron to Petra; and as a place in Judæa in Ptolemy (V. xvi. 8). But it has not yet been identified.

2. In 1 K 9^{18} the RV, following the *Kĕthîbh*, reads *Tamar* (B om., A Θερμάθ) as the name of one of the places which Solomon built, whilst AV, following the *Ķĕrê*, reads *Tadmor* (cf. 2 Ch 8^{4}). All the other places mentioned in this passage, Gezer, Beth-horon, and Baalath, are in Southern Palestine, and the expression 'Tamar in the wilderness, in the land,' seems to imply that, like Baalath, it was either in the Negeb, or in the wilderness of Judah. It is probably the same place as No. 1 above. 'Tadmor' of the *Ķĕrê* prob. came from 2 Ch 8^{4}, and its place there may have been due to a characteristic desire on the part of the Chronicler to bring Solomon into connexion with the historic Palmyra (see Thenius or Kittel, *ad loc.*).

C. W. WILSON.

TAMARISK (אֶשֶׁל, ἄρουρα).—This name occurs 3 times in OT (RV only; see GROVE, No. 2). Abraham planted a tamarisk tree in Beersheba, Gn 21^{33} (J); Saul sat under the tamarisk בָּרָמָה 1 S 22^{6}; Saul and his sons were buried under the tamarisk in Jabesh, 1 S 31^{13}. There are 8 or perhaps 9 species of tamarisk in Palestine and Syria. Of these the most abundant are *Tamarix Syriaca*, Boiss., *T. tetrandra*, Pall., *T. tetragyna*, Ehr., and *T. Pallasii*, Desv., all of which are found along the coast. There are also *T. Jordanis*, Boiss., *T. mannifera*, Ehr., *T. articulata*, Vahl, and *T. macrocarpa*, Bunge, desert species. They are shrubs or small trees, with a flattened hemispherical comus, and brittle branches and twigs, with minute scale-like leaves, white or pinkish, perfect or diœcious flowers, in dense spike-like racemes. Most of them thrive, especially in sandy soil, or exposures where they receive the sea air laden with salt. They sometimes attain a height of 30 ft., and would easily, in that case, serve as landmarks (1 S 22^{6}). The tamarisk in Jabesh may have marked a shrine.

G. E. POST.

TAMMUZ (תַּמּוּז, Θαμμούζ, *Adonis*).—In the 6th year of Jehoiachin's captivity, and the 5th day of the 6th month, Ezekiel saw women in the north gate of the temple 'weeping for Tammuz' (Ezk 8^{14}). Tammuz was a Bab. deity whose worship had been imported into the west at an early period. The name was originally the Sumerian *Dumu-zi*, 'the son of life,' which became in Semitic Babylonian *Duwu-zu* and *Dûzu*, though in Babylonian contract-tablets of the age of Abraham we also find *Tamuzu* (see *Rec. de trav. relat. à la phil. et arch. égyp. et assyr.* t. xvii. p. 39 note). The form Tâ'ûz given by en-Nedîm, an Arab writer of the 10th century, contains a reminiscence of the abbreviated form, like the Thoas and Theias of Greek mythology.

Tammuz was originally the Sun-god, the son of Ea and the goddess Sirdu, and the bridegroom of the goddess Istar. He seems to have been primarily a god of Eridu, the culture-city of Babylonia on the Persian Gulf. His home was under the shade of the tree of life or world-tree, which grew in the midst of the garden of Eridu, and on either side of which flowed the rivers Tigris and Euphrates. The legendary poems of Babylonia described him as a shepherd, cut off in the beauty of youth, or slain by the boar's tusk of winter (see Macrob. *Saturn.* i. 21), for whom the goddess Istar mourned long and vainly. She even descended into Hades (see BABYLONIA, vol. i. p. 221^{b}) in the hope of restoring him to life, and the hymn which described her descent through the seven gates of the infernal world was recited at the annual commemoration of the death of the god by 'the wailing men and wailing women.' This took place in Babylonia on the 2nd day of the 4th month, which bore, accordingly, the name of Tammuz (our June), the day being called a day of 'weeping.' Istar was believed to have mourned her lover with the words, 'O my brother, the only (son)!' and to these the mourners further added, 'Ah me, ah me!' This mourning for the 'only son' is referred to in Am 8^{10} (cf. Zec 12^{11}), and the words of the refrain are given in Jer 22^{18}. Under the form of *αἴλινον* (*ai-lênû*, 'woe to us') they were carried from Phoenicia to Greece, and gave rise to the belief in the mythical Linos.

In Canaan Tammuz was addressed as Adonai, 'my lord,' the Greek **Adonis**, and the story of Adonis and Aphroditê, the Ashtoreth or Istar of the Semites, made its way to Cyprus, and from thence to Greece. But Tammuz had long since changed his character. He had ceased to be the young and beautiful Sun-god, and had become the representative of the vegetation of spring, growing by the side of the canals of Babylonia, but parched and destroyed by the fierce heats of the summer. Hence in Babylonia his funeral festival came to be observed in the month of June, and in Palestine two months later.

Gebal was the chief seat of the Phœn. observance of the festival. In the red marl brought down in the spring-time by the river Adonis (now *Nahr Ibrahîm*), the women of Gebal saw the blood of the slaughtered god. 'Gardens of Adonis' were planted, pots filled with earth and cut herbs, which soon withered away, and in which a wooden figure of the god had been placed. The wailing women tore their hair and lacerated their breasts during the seven days that the period of lamentation lasted. In the time of the 26th Egyp. dynasty, Adonis of Gebal was identified with Osiris, and the festival of his resurrection was accordingly commemorated as well as that of his death. The announcement of it was made by a head of papyrus which came over the waves from Egypt, while the Alexandrians declared that it was at Gebal that Isis had found the dismembered limbs of Osiris (see Lucian, *de Dea Syr.* 7). How the funeral festival was celebrated in the temple of Aphroditê (Ashtoreth) on the Lebanon is described by Lucian (*de Dea Syr.* 6). In an ancient Bab. hymn Tammuz is called 'the lord of Hades.'

In the *Nabatæan Agriculture* of Kuthâmî, a Mendaite writer of Chaldæa in the 5th cent. A.D., we are told of the temple of the Sun at Babylon, in which the images of the gods from all the countries of the world gathered themselves together to weep for Tammuz, and Ibn Wahshiyyah, the translator of the work into Arabic, adds that he had 'lit upon another Nabatæan book, in which the legend of Tammuz was narrated in full; how he summoned a king to worship the 7 (planets) and the 12 (signs of the Zodiac), and how the king put him to death, and how he still lived after being killed, so that he had to put him to death several times in a cruel manner, Tammuz coming to life again each time, until at last he died.' Abû Sayyid Wahb ibn Ibrahim (quoted by en-Nedîm) states that the festival of weeping women in honour of 'Ta'uz' was on the 15th of Tammuz, and that Ta'uz had been put to death by having his bones ground in a mill. The Græco-Phœnician version of the legend is given by Melito in his *Apology* (Cureton's *Spicileg. Syriacum*, p. 25 of Syr. text): 'The sons of Phœnicia worshipped Balthi (Beltis), the queen of Cyprus. For she loved Tamuzo, the son of Kuthar, the king of the Phœnicians, and she forsook her kingdom and came to dwell in Gebal, a fortress of the Phœnicians. And at that time she made all the villages subject to Kuthar the king. For before Tamuzo she had loved Ares, and committed adultery with him, and Hephæstos her husband caught her, and was jealous of her. And Ares came and slew Tamuzo on Lebanon while he was hunting the wild boars. And from that time Balthi remained in Gebal, and died in the city of Aphaka where Tamuzo was buried.'

LITERATURE.—Sayce, *Rel. of the Ancient Babylonians*, ch. iv.; Frazer, *Golden Bough*, i. 278 [^{2} ii. 115 ff., 253 f.]; W. R. Smith, *RS* (Index *s.* 'Adonis'); Jensen, *Kosmol. der Bab.*, *passim*; Movers, *Phön.* i. 191, 202 ff.; Jastrow, *Rel. of Bab. and Assyr.*, 1898, pp. 482, 564, 574, etc.; Toy in *PB*, 'Ezekiel,' *ad loc.*; and the Comm. on *Ezekiel*, esp. those of A. B. Davidson, Bertholet, and Krætzschmar; also Cheyne on Is 17^{10} and Driver on Dn 11^{37} (where Tammuz is very prob. alluded to).

A. H. SAYCE.

TANHUMETH (תַּנְחֻמֶת).—The father (?) of Seraiah, one of the Heb. captains who joined Gedaliah at Mizpah. He is called in 2 K 25^{23} the NETOPHATHITE, but in Jer 40 [Gr. 47]^8 the words 'and the sons of EPHAI' come between 'Tanhumeth' and 'the Netophathite' both in MT and LXX. The form of the name *Tanḥumeth* (LXX in 2 K 25^{23} B *Θανέμαθ*, A *Θανέμαν*, Luc. *Θανεέμαθ*; in Jer 47^8 B *Θανέμαιθ*, A *Θαναέμεθ*) looks like a feminine (cf. Lagarde, *Bild. d. Nom.* 126 f.).

TANIS (*Τάνις*), Jth 1^{10}.—See ZOAN.

TANNER (*βυρσεύς*) occurs only in Ac 9^{43} $10^{6.32}$ of the Simon at whose house St. Peter lodged in Joppa; but tanning was a trade that the Jews carried on in OT times (Ex 25^5, Lv 13^{48}). It was, however, regarded with aversion (see the citations from Talm. in Farrar, *St. Paul*, i. 264 n.), as it necessitated more or less of ceremonial uncleanness, especially if the skins of unclean animals were dealt with. The fact that St. Peter did not hesitate to lodge in the house of a tanner indicates that he had already become somewhat liberal in his views regarding the ceremonial law. Simon's house was by the seaside, which accords with the custom to-day in towns by the sea. In ancient times tanneries were usually without the walls of towns, because of the unclean character of the trade, and the disagreeable odours caused by the work.

The process of preparing skins for use by the Jews may be inferred from what is known of it among the Egyptians and Arabs. The hair of the skins was removed by lime or the acrid juice of the *Periploca secamine*, a desert plant (Wilkinson, *Anc. Egyp.* ii. 186, ed. 1878); the skins were first treated with flour and salt for three days, and cleansed from fat and other extraneous matter. The stalks of the above plant were pounded and placed in water, and then applied to the inner surface of the skin. This caused the hair to loosen, after which the skin was left to dry for two or three days, and then subjected to the further processes of tanning. In these they used the pods of the *Sunt* or *Acacia Nilotica*, which is common in the desert, or the bark or leaves of certain species of *Sumac*, *Rhus Coriaria* or *R. oxycanthoides*, the former of which is common throughout the country (see Post's *Flora of Syr. and Pal.*).

Though the trade of the tanner in general was disliked by the Jews, the preparation of skins for parchment was regarded as an honourable calling.

H. PORTER.

TAPHATH (טָפַת; B* *Ταβληθεί*, A *Ταφατά*, Luc. *Ταβαάθ*).—Daughter of Solomon and wife of Ben-abinadab, 1 K 4^{11}.

TAPPUAH (תַּפֻּחַ; B *Θαπούς*, A *Θαφφού*, Luc. *Φεθρούθ*).—A 'son' of Hebron, 1 Ch 2^{43}.

TAPPUAH (תַּפּוּחַ 'apple').—**1.** (BA om., Luc. *Θαφφούα*) A town in the Shephēlah mentioned between

En-gannim and Enam, and in the same group with Zanoah, Jarmuth, Adullam, and Socoh (Jos 15^{34}). It was probably to the N. of *Wâdy es-Sunṭ*, but the site has not been recovered. Tristram (*Bible Places*, p. 48) proposes *'Artûf*, near Ẓo'rah; G. A. Smith (*HGHL* 202 n.) places it in *Wâdy el-'Afranj*. **2.** (B Ταφού, Θαφέθ, A Ἐφφουέ, Θαφθώθ) A town on the border of Ephraim (Jos 16^{8}), which lay within the territory of Ephraim, whilst its lands belonged to Manasseh (Jos 17^{8}). It is mentioned in connexion with the brook Ḳanah (*Wâdy Ḳâna*), and is probably the same place as En-tappuah. Tristram (*Bible Places*, p. 195) suggests *'Atûf*, on the N. side of *Wâdy el-Ferrah*. See EN-TAPPUAH. **3.** (B Ἀταφούτ, A Θαφφού) One of the towns W. of Jordan whose kings Joshua smote (Jos 12^{17}). It is mentioned between Bethel and Hepher, and was perhaps the same place as No. 2 above; but this is by no means certain.

C. W. WILSON.

TARALAH (תַּרְאֲלָה; B Θαρεηλά, A Θαραλά; *Tharala*).—A town of Benjamin mentioned between Irpeel and Zelah (Jos 18^{27}). It was unknown to Eusebius and Jerome (*Onom.* Θεραμά, *Therama*), and its site has not yet been recovered.

C. W. WILSON.

TAREA.—See TAHREA.

TARES (ζιζάνια).—There are 4 species of tares in the Holy Land: *Lolium perenne*, L., the Ray Grass, *L. multiflorum*, Gaud., *L. rigidum*, Gaud., and *L. temulentum*, L., the Bearded Darnel. The latter is the most common in the grain fields, and, being as tall as the wheat and barley, is doubtless the plant intended in the parable (Mt 13$^{24-30}$). The other species are lower, and have more slender spikes, and smaller grains. The Gr. and Lat. *zizania* are prob. derived from the Arab. *zû'ân* or *zuwân*, the common name for the tare. The seeds are poisonous to man and the herbivorous animals, producing sleepiness, vertigo, nausea, vomiting, diarrhœa, and convulsions, and sometimes death. They are, however, innocuous to poultry. They are sold in all Oriental grain markets as food for chickens. It is customary to gather out of the grain fields, not only tares, but all the taller plants growing among the grain, which can be easily pulled up without causing the person engaged to bend over in a way to endanger breaking the stalks of grain. This not only cleans the fields of other plants, but furnishes a large amount of forage for cattle. The allusion in the parable is in substantial accord with modern custom in the East, which is to leave the cleaning of the fields until the grain is well advanced towards the harvest, and can be readily distinguished from all other plants. Then the women and children go into the fields and weed them out, so that an Oriental grain farm in harvest-time is a model of cleanness and beauty. The Talmud asserts that tares are degenerate wheat; and Tristram (with Thomson and others) says that the peasants of the Holy Land believe 'that the darnel and the wheat spring from the same seed . . . and that in very wet seasons the wheat itself turns to tares; the fact being that, in such seasons, the wheat perishes, while the rain is favourable to the development of the darnel' (*Nat. Hist.* 487). It is clear, however, that the owner of the field, in the parable, had no such idea, as he attributes the result to the sowing of the seeds of tares by the hand of an enemy. The bearing of this parable upon theories of the Church and of Church government is beyond the scope of the present article, and must be studied in works on the Parables.

G. E. POST.

TARGET.—**1.** = a mark to aim at; see MARK (vol. iii. p. 244). **2.** = a shield; see BUCKLER and SHIELD.

TARGUM (תַּרְגּוּם[*] 'translation,' 'interpretation,' cf. מְתֻרְגָּם Ezr 4^{7}).—The Targums are the translations or paraphrases of the OT books made in the Aram. dialect, which superseded Hebrew as a spoken language among the Jewish population of Palestine and Babylon. The language of the Targums was formerly called *Chaldee*, but, while the incorrectness of this is universally recognized, no quite satisfactory designation has replaced it. The Targums were composed in Palestine; their language is the Aramaic of Judæa, a later representative of the Aramaic already found in Ezra and Daniel.[†] In the features that chiefly distinguish Eastern and Western Aramaic it agrees with the old Pal. forms as against the dialect of the Bab. Talmud. Those Targums that were officially recognized in the Bab. schools probably owe something to the influence of the Aramaic spoken by those who edited and copied them, while the influence of the Hebrew is seen in those translations which exhibit least tendency to free composition and paraphrase.[‡]

Jewish tradition connects the origin of the Targums with the need for an intelligible translation felt by those who no longer spoke or easily understood the Heb. language. The disuse of Heb. as the vernacular of the Jews, before the encroachments of Aramaic on all sides, was a very gradual process, and was probably not general much before the time of Christ. Several books or parts of books in the OT canon stand as proof that Heb. was written and read fully three centuries after the return from Babylon. The bilingual character of the books of Ezra and Daniel (however it is to be explained) presupposes equal familiarity with both languages. Then the Semitic words which occur in the NT are, with few exceptions, Aramaic. Probably the desire to possess explanations of the Heb. text in Aramaic made itself felt in some places earlier than in others. The first translations consisted of the oral explanations given along with the reading of the Sabbath lessons in the synagogue. These were made by a class or guild of interpreters called *mĕthorgĕmānîm* (מתורגמנים), appointed for the purpose, but in no sense was their exposition regarded as official or 'authorized.' How far back the custom extended we cannot be certain. The Mishna (*c.* 200 A.D.) contains some rules made to regulate the practice.[§] Thus the reading of the Law was to proceed verse by verse, first in Heb. by the reader, and then its Aram. equivalent by the *mĕthorgĕmān*. In the reading of the lesson from the Prophets three verses at a time might be read, to be followed by their Aram. rendering. There is no mention here of reading out of written Targums, and elsewhere[‖] the use of such writings was forbidden, at least for the Law, in the Sabbath service, but not the preparation and use of them by individuals for private study or school instruction (see, further, art. SYNAGOGUE, p. 641^{b}). There must therefore have been a time when the caprice of the *mĕthorgĕmān* contributed to the form of the translation, and in fact it is known that certain renderings which have found their way into the Targums were not approved.[¶] Nevertheless, the general phraseology of the oral translations would tend to become fixed by the custom of learning them, and by the recurring use of them in public. Thus we find in NT times traces of Aram. renderings of Heb. verses in books like the Psalms.* The agreement of these with readings still found in Targums, which we know were not reduced to their present form till long after, cannot be purely accidental. The tradition of the confiscation of a Targum on Job in the 1st cent. A.D.† shows that written Targums existed then, though the use of them was not countenanced by the authorities and guardians of the sacred text. Of the character of these earliest attempts at translating the Heb. Scriptures into Aramaic we know nothing, as none of them have come down to us. All those in our hands are the products of a much later time, none perhaps older than the 4th or 5th cent. A.D. Like much else in Jewish literature, these late productions were based upon older exegetic material, the origin of which lies far behind our first means of access to it. But it is no longer possible for us to separate the different strata and assign them to different ages of composition. The examinations of them which have been made in this direction do not yield a sufficient number of cases of distinctly older contents to enable us with confidence to assign them to an early date, embedded as they are in documents admittedly late, of which they share the linguistic and other peculiarities.

[¶] See passages enumerated in Dalman, *Grammatik*, p. 24.

The Targums now known to be extant are as follows:—

i. For the Pent., three Targums: (1) the Targ. of Onḳelos, also called the Bab. Targ. on the Pentateuch; (2) a Targ. of certain parts of the Pent., called the Jerus. Targ. II. or the Fragmentary Targum; (3) a complete Targ. on the Pent. akin to No. (2), called the Targ. of Jonathan [pseudo-Jonathan], or Jerus. Targ. I.

ii. On the Prophets, Earlier and Later: the Targ. of Jonathan bar Uzziel, also called the Bab. Targ. on the Prophets.

iii. On the Hagiographa we have Targums for (1) Psalms, Proverbs, Job; (2) the Megilloth (Cant., Ruth, Lam., Eccles., Est.); (3) Chronicles.

No Targums have been found for Ezra, Nehemiah, Daniel.

In harmony with their character as popular translations of religious books, intended in part to meet the wants of the religious community, the Targums are not always or primarily literal translations. The translations are often mixed up with curious paraphrases and stories such as we meet with in the other Jewish exegetical or homiletic works (*midrāshîm*). They contain, besides, expansions or alterations adapted to secure that the sense of Scripture current among the authorities should find access in an intelligible form to the minds of the people. The theology of the early books of Israel's history and religion took no pains to obviate the appearance of a very distinct anthropomorphic character, but the time came when the main feature of Jewish criticism and exegesis was the anxiety to remove or soften down all references to God that could thus give rise to misunderstanding in the popular mind. The history of the Heb. text itself bears witness to this scrupulous feeling for the Divine majesty: cf. the *tiḳḳûnê Ṣōphĕrîm*; the use of נאץ = ברך or קלל when used directly before the name of God; punctuation like לֵרָאוֹת Is 1^{12}, etc.; and the LXX has sometimes been influenced by the same solicitude (cf. Ex 24^{10}). But the clearest expression of this hermeneutic principle is to be found in the Targums, and every page of them illustrates the practice. In fact the basis for anthropomorphic views of God is taken away by the Jewish notion that man was created, not in the image of God but in the image of the angels (cf. Gn 1^{26} Jerus. Targ.). It will be sufficient here to enumerate the more usual ways by which everything was avoided that could lead to erroneous or undignified conceptions of God in His own nature or in His manner of revealing Himself.

When God is spoken of as coming into relation with man, walking, speaking, swearing, repenting, etc., some periphrasis for the Divine name is used, by which literary device it was felt that God was somewhat removed or raised above the plane of human affairs, and that His action, therefore, was less direct and more fittingly mediated. There is some evidence that דבורא דיהוה, 'word of Jahweh,' found only in the so-called Jerus. Targg. (cf. Lv 1^{1}), was poetically and fantastically personified, and so treated as a mediating factor between God and the world.* In much the same way the מימרא דיי, as God's messenger in nature and in history, unfailingly operative wherever He sends it, is the most usual expression for bridging over the chasm between God and man. But it is so identified with Jehovah Himself as creator, judge, helper, deliverer of His people, that, from the mediating use of it, it has become but another name for Him (*e.g.* Gn 18^{1} 35^{9}, Ex 3^{12} 6^{8} 12^{42}, Am 8^{8}, Is 42^{1}, Ps $2^{4.12}$, Job 1^{21}). How completely מימרא has lost all reference to its own meaning is seen esp. from such a phrase as מיד מימרא דיהוה, Jos 22^{31}.†

God has His dwelling-place in the central division of the highest heavens, and the throne of His glory is there. This glory, resting upon the throne, is conceived of as light, and manifestations of God become manifestations of His glory, veiled doubtless in a cloud so as not to cause blindness (cf. Gn 27^{1} Targ. Jerus.). This 'glory of God' (יקרא דיי) and 'the presence of the glory of God' (שכינת יקרא דיי) are further expressions which may be used for God Himself active in the world: Gn 28^{13}, Ex 3^{1} 20^{20} 34^{5} (pseudo-Jon.), 1 K 22^{19}, Is 64^{3}, Ps 9^{12} 17^{8}; similarly זיו אפך Ps 13^{2}, cf. Ex 33^{11} (pseudo-Jon.); זיו שכינתא דיי Ps 42^{3}. This instance is indicative of the tendency in later times to use a double expression for the earlier simple one, *e.g.* שום מימרא דיי Gn 16^{13} 21^{33} (Frag.), יקר שכינתא דיי Gn 22^{14} 49^{27} (Frag.), Job 14^{18}.‡

As God is and remains infinitely exalted above and distant from men, His actions and theirs become, equally, events that happen in His presence as a spectator. Hence the preposition קדם is in almost exclusive use before the Divine name throughout the Targums. As a variant for it we sometimes find לשמא esp. in the Jerus. Targums (cf. Ex 22^{19}, Lv 23^{12}); or such words as פולחנא, דחלתא are used before the Divine name (Nu 14^{43}, Dt 4^{4}). Of course, unlike מימרא, יקרא, שכינא, these cannot be subjects of verbs.

Another way of removing the Divine name from too immediate a relation to man was found in putting a verb to which the name was subject in the passive voice: Gn 44^{16}, Ex 19^{19}, Nu 9^{8}. In this way ירע, ראה become גלי קדם; שמע = שמיע קדם; ירד, עבר, בוא = אתגלי.

In passages where eyes, arms, hands, fingers, face, mouth, wings, etc., are attributed to God, some other expression (as 'word,' 'might,' 'shekinah') is often (not always) employed: Gn 8^{21}, Ex 7^{4} 8^{15} 15^{16}, Jos 4^{24} 9^{14}, Ps 36^{8}. Expressions in the gen. case before the name of God are paraphrased: Gn 28^{17} 31^{13}, Ex 4^{20}.

The sense of a passage is even altered from motives of reverence or to avoid anthropomorphisms: Gn 4^{14} 20^{13}, Ex 33^{3}, Is 1^{18} 10^{6}, Ps 2^{7}. Interrog. sentences are rendered by the words that expressed the translator's sense of what the answer intended would be: Gn 18^{25}, Dt 32^{4}.

When one and the same expression has for object both God and men, the difference to the translator's mind is obtained by using a different preposition: Gn 32^{29} 50^{20}, Ex 14^{31}, Nu 21^{5}. The word אלהים, when used of heathen deities, is usually rendered טעוא: Jos $23^{7.16}$, Jg 2^{12}. When applied to men it is rendered רב (Ex 4^{16} 7^{1}), דיניא (Ex 21^{6}, in Ps 82^{1} דינין); cf., further, Gn 3^{5} כאלהים = כרברבין, Ps 8^{6} מאלהים = ממלאכיא.

i. TARGUMS ON THE PENTATEUCH.—1. Onḳelos.

—The official Targ. on the Pent. has been handed down under the name of the Targ. of Onḳelos. According to the Bab. Talmud, Onḳelos was a proselyte who lived in the 1st cent. A.D., but only once is any mention made of him as the writer of a Targum;§ and here the corresponding passage in the Jerus. Talmud,‖ which makes no mention of a Targ. of Onḳelos, makes it clear that a confusion with the Gr. translator Aquila is the origin of the tradition which connects Onḳelos with the Targ. called by his name. The author of the Targ. is quite unknown; and it is not at all certain that we have to seek for it a single author. It has certainly a uniformity of style and diction, but this may equally well arise from official revision. The work, or parts of it, may have been first compiled during the 2nd or 3rd cent. A.D. in Judæa, but it never seems to have obtained any great currency or esteem in Palestine. It is first quoted by the name of Onḳelos in a writing of Gaon Sar Shalom in the 9th cent. A.D.[*] In the Bab. Talmud it is referred to as 'our Targum' (תרגום רידן), or by the formula 'as we translate.'[†] The name 'Babylonian Targum' does not therefore refer to its linguistic character, as was formerly supposed, for its language is the Aramaic of Judæa, but has been given to it because in the 4th or 5th cent., after a final revision in Babylon, the centre of literary activity among the Jews at that time, it was sanctioned or recognized as an 'authorized' version. It came, in fact, to enjoy the reputation of being the best of all the Targums, and a special Massorah was prepared for it as for the original text itself. Even after the original purpose of the Targ. had been left behind, when Aramaic had disappeared before the rise of Islam and the spread of the Arabic language, the Targ. of Onḳelos continued to be written, and printed, as an accompaniment of the Heb. text, verse after verse, or in parallel columns. The custom of reading it in the synagogue has gradually died out. Yemen, in South Arabia, is now the only exception to this.

§ Bab. *Meg.* iii. 1.

‖ Pal. *Meg.* i. § 11.

Speaking generally, the translation is good, and faithful to the original. The text from which it was made was in all essentials the Massoretic text, and it is rendered in accordance with the conceptions that prevailed in the Jewish schools of the period. Poetic passages, *e.g.* Gn 49, Dt 32. 33, are not rendered so accurately, probably on account of their greater difficulty; paraphrase occasionally takes the place of translation; *midrāshîm*, both *halākhā* and *haggādā*, though by no means in the same degree as in the other Targg. to the Pent., are not entirely wanting. The removal of anthropomorphic or anthropopathic expressions referring to God is effected by the devices mentioned above; but, apart from this, the characteristic Jewish theological doctrines find scarcely any illustration in this Targum. Figurative language, as a rule, is not translated literally, but is explained: *e.g.* Gn 49^{25}, Ex 15$^{3.8.10}$ 29^{35}. For an instance of cabbalistic interpretation in Onḳelos cf. Nu 12^{1}, where אתתא שפירתא is the Targ. for האשה הכשית. Gn 49^{10} and Nu 24^{17} are 'Messianically' explained. Geographical names are sometimes replaced by those current at a later time; cf. Gn 10^{10} 37^{25}, Dt 3^{17}.

The first edition of this Targum was published at Bologna in 1482.

2. **Fragmentary Jerusalem Targum.**—This Targ. contains only certain parts of the Pent., estimated at about 850 verses in all. Three-fourths of it are on the historical sections of the Pent., and the remaining fourth on the legislative sections in Exod., Lev., Numbers. In about 90 verses the translation refers only to some single word of the text, and in about 14 chapters there is no translation or annotation at all. Where longer sections of it occur it is often extremely paraphrastic, the text being overlaid with *midrashic* stories. Its language is Palestinian Aramaic, but of a degenerate type, foreign words occurring in it to a great extent. It has affinities with the language of Onḳelos, the Pal. Talmud, and *midrāshîm*, and also with the vocabulary of the Bab. Talmud.[‡]

Its fragmentary condition has been accounted for in various ways. (1) Zunz[§] considered it a collection of various readings to the so-called pseudo-Jonathan Targum on the Pentateuch. But the agreements are no less numerous and striking than the differences, and cannot be reasonably explained by the assumed negligence of the compiler of the variants. (2) It has been supposed[*] to be a collection of variants and corrections to the Targ. Onḳ., more suited to the taste of the compiler and his age than the bald and literal version that had gained supremacy in the schools of Babylon. (3) Another form of this view[†] is that the Fragmentary Targ. contains extracts from an earlier Jerus. Targ. which at one time existed complete.

Its present form is not due to chance: the selection of passages was made to be interpolated in the Targ. Onḳ., supplementing or correcting it at certain points. Such an interpolated Onḳ., with the supplements and corrections combined, is actually found for the Song of Moses and for the Decalogue in old Machzor MSS, and has been made known by Hurwitz's publication of the Machzor Vitry.[‡] That there was an earlier complete Jerus. Targ. on the Pent. has been inferred from the fact that in various Jewish works from the 11th to the 14th cent. there have been counted over 300 quotations from a Jerus. Targ. which are not to be found in the Fragmentary Targ., and nearly 300 which do not occur in the Targ. of pseudo-Jonathan. As these quotations often belong to several verses of the same chapter, and many chapters of all the books of the Pent. are represented, the source of them was evidently a continuous and complete work.[§] The Fragmentary Targ. is more akin to this source than the Targ. of pseudo-Jon., for, in passages where both the Frag. Targ. and pseudo-Jon. exist, over 100 quotations are found in the Frag. Targ., while only about 20 are found in pseudo-Jon. which are wanting in the Frag. Targum.[‖] In about 100 passages the older Jerus. Targ. shows itself dependent on late sources: the two Talmuds, Tanchuma, Rabba Gen., and Rabba Leviticus. It cannot be dated earlier than the second half of the 7th cent., and may be later. The Frag. Targ. therefore cannot be earlier than the 8th century.[¶]

First edition of Frag. Targ., Venice, 1517.

3. **The Jerusalem Targ.** (*so-called pseudo-Jonathan*).—The complete Palestinian Targ. on the Pent. has, since the 14th. cent., borne the name of Jonathan bar Uzziel, the reputed author of the Targ. on the Prophets. From the manifest incorrectness of this—תרגום י׳ intended for תרגום ירושלמי being read תרגום יונתן—the name pseudo-Jonathan has gained currency. The name ת׳ ארץ ישראל is found in writers of the 11th cent., and ת׳ ירושלמי is only another, not so accurate, variation of this. It had its origin in Palestine, and its language is the Pal. dialect. It is a complete Targ. on the Pent. (only about a dozen verses are wanting[**]), of the same general character as the Frag. Targ., and based partly upon this latter (or perhaps upon its source, the old Jerus. Targ. mentioned above) and partly upon Onḳelos. Its essential character is its free *haggadistic* handling of the text. The Targumist's purpose, plainly, was to make the translation but a vehicle for all the popular stories and comments that had grown up around the Biblical characters and events. Among the indications of its date may be noted: Ex 26^{9}, the six orders of the Mishna are referred to; Gn 21^{21} ערישא and פטימא, a wife and daughter of Mohammed, are mentioned as wives of Ishmael; Gn 49^{26}, Dt 33^{2}, Edom and Ishmael are spoken of as world-powers in a way possible only in the 7th cent. at the earliest. Like the other Targums, it sets aside figurative speech, and eliminates (though not with the same regularity as Onḳelos) all anthropomorphic expressions re-

ferring to the Deity. The heroes of Israel are idealized and their faults leniently passed by, as in the Jewish *midrashic* literature in general. The angelology and demonology of the earlier period appear in a much more developed form than even in the Frag. Targ.; but it is to be noted that some of the relevant passages do not occur in the latter, which has references of its own to angels that are wanting in pseudo-Jonathan. In general, the additions of the Frag. Targ. are found in pseudo-Jon. in a somewhat more condensed form, all the Scripture quotations being regularly omitted. Early geographical names are replaced by those current in a later age. The Targ. is a mine of information on most of the religious and dogmatic conceptions of the Judaism of the Talmudic age. Weber (*l.c.*) gives illustrations, from the Targums as well as from other Midrashic works, of the later Jewish doctrines of the Being of God, His dwelling-place, His revelation in the Torah, Angels, Creation, Sin, Death, the Messianic Kingdom, the resurrection of the just and the future life, Gehenna and its torments, the second death which the wicked die in the world to come, etc.

First edition of Jerus. Targ., Venice, 1591.

Order and mutual Relation of the Pent. Targums.—The question whether the Frag. Targ. was not a collection of variants and parallels to pseudo-Jon., and therefore later, has been referred to above. A further question was raised by Geiger,[*] when he claimed to prove that the Jerus. Targg. are, in respect both of a great part of their contents and of their general manner of interpretation, older than Onḳ., and that Onḳ was manifestly the result of a complete revision of the Targ. pseudo-Jon. in the fourth century. Bacher[†] holds, somewhat similarly, that the Targ. Onḳ. is an abridged and revised ed. of a Jerus. Targ. which has been only partially preserved, viz. in the Frag. Targ., and that the Targ. pseudo-Jon. is later than both Onḳ. and the Frag. Targ., being in fact a combination of them, with additional *midrāshim*. The Targ. pseudo-Jon. would thus form the third and final stage in the development of the Pent. Targums. Both the Jerus. Targums in their present shape are admittedly much later than the Targ. Onḳ., as they contain additions made to them through successive generations down to the 7th or 8th cent. On the other hand, all the Targg. probably contain material that is much older than the date of their final compilation and redaction. It still remains questionable whether actual proof has been furnished that any given passage is really ancient, or that the Targ. Onḳ. has been made up from an older Jerus. Targ. by curtailment not always successfully effected. As passages for which a very ancient date has been claimed may be mentioned: Gn 15^{19}, Nu 24^{21}, the rendering of קיני by שלמאי, the contemporaries and allies of the Nabatæans (cf. in Proph. Targ. Jg 1^{16} 4^{17} 5^{24}); Gn 43^{2}, where Egyptian animal-worship is spoken of as though it still existed; Dt 33^{11}, the reference in which to Johannes Hyrcanus could (it is claimed) come only from a contemporary.[‡] Further, the absence of polemics against the Christian faith points (it is thought) to an early pre-Christian date; but unless we are prepared to show that all the Targg. were fixed once for all at the early date, if the Jews at a later time had wished to combat Christian tenets, the opportunities for inserting such were not wanting, and there is no evidence of this. As regards the alleged dependence of Onḳelos upon an earlier version of the Jerus. Targums, an examination of the passages adduced by Geiger and Bacher does not produce the conviction that the priority is on the side of the Jerus. Targums. That Onḳelos received some revision in Palestine or Babylon is probable; but it is not probable, if the original Jerus. Targ. were to any great extent similar in character to our Frag. Targ., that a translation like Onḳ. could be reached by pruning it down. The resultant Targ. is too dissimilar to be spoken of as a revision of such a work. Onḳelos, when compared with the MT, is quite as intelligible as any literal translation ever is; and though the same exegetic traditions or principles, drawn from the general mental atmosphere in which the compilers lived, may disclose themselves here or there, it has not been made out that the Targ. Onḳ. shows on the face of it any phenomena which are only reasonably to be explained by the use of the Jerus. Targums.

A few instances may be cited where the reader may judge whether the priority is necessarily on the side of the Jerus. Targums: Gn 4^{7} 40^{13} 49^{22}, Ex 3^{1} $12^{42.43}$ 14^{15} $33^{3.5}$, Lv 26^{43}, Nu 12^{12} 24^{4}, Dt 32^{6} 34^{7}. The decision remains with an examination of such passages, rather than by quoting passages on the other hand which presuppose dependence of the Jerus. Targ. on Onḳ., as no one denies that the Jerus. Targg. in their present form are later than Onḳ. and have drawn from it.

ii. TARGUM ON THE PROPHETS.—The official Targ. on the Prophets bears the name of Jonathan (bar Uzziel), a disciple of Hillel in the 1st cent. B.C.[*] Elsewhere in the Talmud, passages are quoted from it under the name of R. Joseph bar Chija (A.D. 270–333), who was president of the school of Pumbadita. Its origin is at least in part to be sought in Palestine, and it received its final and authoritative form in Babylon in the 5th cent. A.D. Its language largely resembles that of Onḳelos. Whether more than the sections which were read in the synagogue services were included in the first translation of the Prophets we cannot say. Making allowance for the difference between the historical and the prophetic books, our Targ. has a uniformity of style and character, due to a careful revision which aimed at producing this. Gesenius has shown that parallel passages (2 K 18 f.=Jer 36–39, Is 2^{2-4}=Mic 4^{1-3}) are tr. alike in both places of their occurrence, and vary only according to the variation of the originals, and that other features are common to the different books (*e.g.* תרשיש rendered by ימא in Jonah, Jer., Ezekiel).[†] The Targ. on the Prophets is not so literal as the Targ. of Onḳ., yet the method of both translations is alike, and they are clearly meant to be companion works. From certain passages which both have verbally in common, it has been inferred, probably correctly, that Jonathan used Onḳelos: cf. Jg 5^{8}, Dt 32^{17}, 1 S 12^{3}, Nu 16^{15}, 2 K 14^{6}, Dt 24^{16}, Jer $48^{45.46}$, Nu $21^{28f.}$.[‡] The Targ. on the historical books is more literal than that on the *Prophetæ Posteriores*, but poetical or difficult passages are paraphrased: cf. 1 S 2^{1-10}, which is explained verse by verse with references to Sennacherib, Nebuchadnezzar, the Greeks, Hasmonæans, Mordecai, Esther, etc.; 1 S 15^{23} 17^{8}, 2 S 14^{11} 20^{18}. Of the prophetic books we have generally a faithful translation, with explanatory additions. For examples of paraphrase, cf. Is $28^{10.13}$ 49^{15} 50^{11}; for instances of *haggādā*, Is 12^{3} 33^{22} 62^{10}, Mic 6^{4}. With regard to the rendering of anthropomorphic expressions, figurative language, and the like, the usual rules of Targumic interpretation are observed: *e.g.* the whole story (Hos 1^{3}) of the prophet and Gomer gives place to a series of denunciations upon the continued sins of Israel, with promise of pardon on repentance, and the perplexing features of the original never once appear. Geographical names are mostly retained as in the Heb., but are sometimes tr. into more modern forms: שנער=בבל; בשן=מתנן; מנא אמון [or, more prob., נא alone]=אלכסנדריאה; קיר=קירינֵי; תוגרמה=גרממיא. The influence of the religious or dogmatic ideas of the author's time is more noticeable than in Onḳelos. The Targum in this respect is a mean between Onḳ. and the Jerus. Targum on the Pentateuch.

First edition of this Targum, Leiria, 1494.

Reference has been made already to the quotations which Jewish writers make from Jerus. Targg. on the Pent., and which are not now found in either of our recensions (the Frag. Targ. or pseudo-Jon.). Similar fragments of Targg. on the Prophets have been printed from the Reuchlin Codex in Lagarde's ed. of the *Prophetæ Chaldaice*, and Bacher has investigated their character in *ZDMG*, 1874. He finds that the variants may be divided into five classes which come from as many sources, and concludes that they are remains of Jerus. Targg. to the Prophets, as they resemble in certain features of language and style the Jerus. Targg. to the Pentateuch. Some of them he considers older than the official Targ. to the Prophets (cf. his view, mentioned above, of the relation of the Frag. Targ. to Onḳ.); others he considers are the result of a *haggadistic* enlargement of earlier texts at a date later than the Bab. Talmud and the *midrāshim* (cf. his view of the Targ. pseudo-Jon. in relation to the Fragmentary Targ. and Onḳelos).

iii. TARGUMS ON THE HAGIOGRAPHA.—A Targ. on the Bk. of Job is mentioned as in existence in the 1st cent. A.D., but it is certain that no Targ. of that age has come down to us. None of the Targg. to the Hagiog. which we possess is earlier than the close of the Talmudic period, and probably all of them are much later. The first mention of them is in the 11th century. Unlike the translations of the Law and the Prophets, the Targg. on the Hagiog. are entirely the work of individual translators, modelled upon the older Targums. They were never meant for public use in synagogue or school, having, in fact, been composed after the need for Aram. translations had ceased. They may be conveniently divided: 1. Psalms, Job, (Prov.). 2. The Megilloth. 3. Chronicles.

1. It is possible that the Targg. on the Psalms and Job come from a single author; at any rate they exhibit marks of similarity in their general method of handling the Heb. text, and they have some linguistic and other features in common. Unlike the Jerus. Targg. on the Pent., they aim at giving a pretty faithful rendering of the original. *Haggadic* additions are met with occasionally, but they are concise, and can easily be separated from the translation proper. Many verses are provided with double translations, the second being ascribed to a different Targ. (ת״א=תרגום אחר). In such cases one of the translations is generally *haggadic*, while the other is more literal. Between forty and fifty verses in Job have such alternative translations, but there are not so many in the Psalms. Half a dozen verses in Job have even a third rendering. The age of the interpolator has been given as the 8th or 9th cent., but there is really no reason for claiming a higher age for the Targg. themselves. Their language is late and artificial; they are compositions in what is no longer to the translators a living speech. The general exegetic devices of the older Targg. are reproduced. Anthropomorphisms as a rule, and all figures of speech, are set aside; references to the history of Israel, to the Law and its study, are frequently introduced; passages are applied to Edom, Ishmael, or Gog; and the eschatological ideas of the synagogue are all met with. We may note that סלה in the Psalms is rendered לעלמין (cf. Hab $3^{3. 9. 13}$).

The peculiar dialect in which the Targ. to the Proverbs appears has taken up so many features from Syriac that it can only be regarded as an incongruous mixture of the Aramaic of the Targg. and the Syriac of the Peshiṭta. Linguistic elements have been gathered from different quarters and placed side by side, without any regard to the unity of structure which must exist in a spoken or written language.* Many entire verses, estimated as forming a third of the whole book, are identical with the Syriac translation; in a further large number there are close resemblances between the two versions, all the more striking where they agree as against the Heb.; cf. 1^{7} 4^{26} 5^{9} $7^{22. 23}$ 9^{11} 12^{19} $16^{4. 25}$. It has been shown † that the peculiarities of the Targ. are due to the use of the Pesh. by the Targumist. The view that the Pesh. has borrowed from the Targ. does not account for the Syriasms which the latter contains; the analogy of the Jerus. Talm., where most of the peculiarities of the Targ. occur, though in less proportions, does not help us to understand why just in such large proportions these peculiarities are here found together. Apart from the distinctly Syriac forms, the language and style of the Targ. are akin to that of the Targg. on the Psalms and Job, and there is no reason for assigning it an earlier date. The translation is literal, and additions to the text are extremely rare.*

2. The Targg. on the Megilloth are distinguished among the Targg. to the Hagiog. by their extreme paraphrastic treatment of the text. In parts of them we can still find the translation embedded in the paraphrase, but in other parts the legendary and homiletic sections which have been added form the main feature of the work. These are made up in various ways. Historical parallels are cited for the narratives of the text, with what would be anachronisms if the Targ. were regarded as a tr. of an ancient writing; motives and reasons are supplied to explain the occurrence of events; proper names are etymologized and 'explained'; while figurative language is rendered into prose, allegory takes the place of narrative; the Sanhedrin is frequently mentioned, and the study of the Law introduced on every possible occasion; lengthy genealogies are appended to some of the names occurring in the text; general statements are connected with the names of particular individuals, esp. the patriarchs, Nimrod, Pharaoh, Nebuchadnezzar, Titus and Vespasian, Alexander (?=Antiochus), Messiah the king, and Elias the high priest. The books of Ruth and Lam. are less paraphrastic than Eccles., Esth., or Canticles. One text of the Targ. on Esther (that given in the Antwerp Polyglot) is, with few exceptions, a literal translation. Essentially the same text, with many *haggadic* additions, is printed in the London Polyglot, and this forms the usual Targum to Esther. The so-called second Targum (*Sheni*) is much more voluminous than the last named, and is regarded as an amalgam from other Targums and *midrāshîm* which from time to time were made for this favourite book. It is quoted by the commentators as 'haggādā' and as 'midrash.' More than half the work has nothing to do with the story of Esther, but contains legends about Solomon, the queen of Sheba, etc. The Targ. on Canticles is of the same *midrashic* class: on the basis of certain words of the text we have outlined for us the varying fortunes of the Jewish people from the days of Moses down to the Talmud. We may note besides in this Targ. references to the two Messiahs—Messiah son of David, and Messiah son of Ephraim (iv. 5, vii. 3; cf. Jerus. Targ. on Ex 40^{11}; also Jerus. Targ. on Zec 12^{10} in Lagarde, p. xlii).

3. No Targ. to the Books of Chronicles was known to exist until after the great Polyglot Bibles had been published. In 1680–83 a somewhat incomplete Targ. from an Erfurt MS was edited with tr. and notes by M. F. Beck; † and in 1715 a more complete form of the text from a Camb. MS was edited with tr. by D. Wilkins. There are numerous variations in the two recensions. The tr. is in many parts fairly literal, but examples of *midrashic* amplification are not wanting (cf. 1 Ch $1^{20. 21}$ 4^{18} 7^{21} $11^{11. 22}$ 12^{32}, 2 Ch 2^{6} 3^{1} 23^{11}). The author made use of the Jerus. Targg. to the Pent. (cf. Gn 10^{20} and 1 Ch 1^{21}, Gn 36^{39} and 1 Ch 1^{43}). The Targ. on the Books of Samuel and Kings was also largely used, of course with the changes in diction and orthography which characterize the Jerus. Targums. 1 Ch 16 is tr. from the Heb. text of Chronicles, and the variations from the Targ. on the Psalms are quite as noticeable as the agreements. Indications of the age of the Targ. are the translations or modern forms of geographical names. The redaction of the text represented by the Erfurt MS has been assigned to the 8th cent., that of the Camb. text to the 9th.‡

The *text* of the various Targg. has been handed down and edited in a very unsatisfactory condition. The official Targums on the Pent. and Prophets are relatively the best preserved, but an examination of MSS and the printed edd. shows that a critical ed. was never attempted, nor were the materials for it forthcoming. The early disuse of the Targg. accounts for the unskilful and arbitrary treatment of the texts, and of the non-official Targg. it would be correct to say that they never reached a fixed form till such was obtained by the multiplication of printed copies. The vocalization is specially faulty. The South Arabian MSS, with the simpler supralinear system of vowel points first brought to Europe in 1876, provide us with an older and more trustworthy recension of the Targ. on the Law and Prophets than any yet in our hands. MSS on the Pent., Prophets, and Megilloth are now to be found in London, St. Petersburg, and Strassburg, and selections from these have been published.*

‡ Rosenberg und Kohler in Geiger's *Ztsch.* 1870.

Even when critically edited, the Targums are not likely to be of much use for the criticism of the Heb. text of the OT. That text was fixed as we have it before any of our Targg. were compiled, and it is but seldom that they throw any reliable light where it is needed. For a reflexion of the spirit of Judaism, on the other hand, as well as for the Jewish interpretation of the text of their sacred books, they are invaluable. Not that any importance would now be attached to the use formerly made of them by Christian controversialists. The Jewish Messianic ideas run throughout all their Targg.,† but it is now clear that the correct interpretation of particular passages was not exclusively to be found either on the Jewish or on the Christian side (cf. Is $7^{14f.}$ 52^{13}–53^{12}).

T. WALKER.

TARPELITES (טַרְפְּלָיֵא, plur. emph.; B Ταραφαλλαῖοι, A and Luc. Ταρφαλλαῖοι).—One of the peoples settled by Assurbanipal (?) in the cities of Samaria, Ezr 4^9. Their identity is quite uncertain. Rawlinson suggested the *Tuplai* of the Inscriptions, *i.e.* the Τιβαρηνοί on the coast of Pontus; Hitzig conjectured Tripolis in N. Phœnicia.

TARSHISH (תַּרְשִׁישׁ).—**1.** See following article. **2.** The eponym of a Benjamite family, 1 Ch 7^{10} (B 'Ραμεσσαί, A and Luc. Θαρσεὶς). **3.** One of the seven princes of Persia and Media who 'sat first in the kingdom,' and had the right of access to the royal presence, Est 1^{14} (LXX om.). See ADMATHA. **4.** The name of a precious stone (once Ezk 10^9 אֶבֶן תַּרְשִׁישׁ, elsewhere simply תַּרְשִׁישׁ), Ex 28^{20} 39^{13}, Ezk 1^{16} 10^9 28^{13}, Ca 5^{14}, Dn 10^6; identified by AV and RV with the *beryl*, although RVm offers as alternative renderings *chalcedony* or *topaz* or *stone of Tarshish.* The LXX has in Exodus and Ezk 28^{13} (cf. Jos. *Ant.* III. vii. 5) χρυσόλιθος, in Ezk 40^9 ἄνθραξ, elsewhere θαρσεὶς. See, further, artt. STONES (PRECIOUS), p. 620^b, and TOPAZ, p. 797.

J. A. SELBIE.

TARSHISH (תַּרְשִׁישׁ; LXX Θαρσεὶς [on other renderings see below]).—The name of a maritime country, situated far to the W. of Palestine. The biblical passages teach us the following facts about this much discussed name:—

In Gn 10^4=1 Ch 1^7 Tarshish is one of the sons of Javan, under which latter name the Orientals seem to have comprised almost all Western maritime nations. In Gn 10 we find the order: Elishah (*i.e.* Cyprus, after the most modern researches), Tarshish, Kittim (AV Chittim, which was, until recently, usually explained as the Cyprians, but they belong, with all probability, to much more westerly tracts of the Mediterranean; cf. Winckler, *Forschungen*, ii. 442), and Dodanim (or Rodanim, a very obscure name). This arrangement does not allow any certain conclusions.—In Jon 1^3 the prophet embarks at Joppa to flee to Tarshish (cf. 4^2), which seems to represent here the extreme ends of the earth, so far as it was known to the Hebrews, the country farthest away from Jehovah's seat.—In Is 66^{19} it represents, together with Javan, with the isles afar off and several Asiatic (if we except the somewhat doubtful Pul or Put) countries, the most remote quarters of the earth to which the exiled Jews may have fled; cf. below on 60^9.—Somewhat similarly, Ezk 38^{13} places Sheba and Dedan and the merchants of Tarshish parallel with (or, better probably, in contrast to) the mysterious Gog of Magog. It is impossible to draw any inferences about the situation of Tarshish from this parallelism; certainly vicinity to the Arabian countries Sheba and Dedan is not indicated (cf. Gn 10^1).—Ps 72^{10} quite analogously places the kings of Tarshish and of the isles in contrast to the kings of Sheba and Seba.—In Is 23^6 the prophet sarcastically advises the Tyrians to flee from the approaching destruction of their city to Tarshish and the isle (read evidently the plural: isles). V.^{10} works this out more fully: 'Overflow (RVm) thy land as the Nile, O daughter of Tarshish: there is no more girdle' (AVm; text 'strength'), *i.e.* that country will be overcrowded by Phœnician fugitives. Evidently, Tyrian ships were specially familiar with the journey to Tarshish.

---

* See the Literature, mentioned below, under the names Merx, Kautzsch, Prätorius, Dalman, Barnstein.

† Cf. Hühn, *Die Messianischen Weissagungen des israelitisch-jüdischen Volkes*, 1899, p. 111 f.

The remote position of Tarshish led to the use of the expression 'Tarshish ship' for a certain class of specially strong and large ships, destined for longer voyages, exactly as sailors used to mean by an 'East Indiaman' a type of ship, not only one sailing to or from India (thus, correctly, already Gesenius, *Thesaurus*). Ezk 27^{25} (RV) 'the ships of Tarshish were thy caravans for thy merchandise,' need not necessarily point to a prevalence of naval trade with Tarshish. Is 60^9 'the isles shall wait for me, and the ships of Tarshish first to bring thy sons from far,' might, indeed, also be understood literally as a parallel to 66^{19}. The curse on Tyre, however, in 23^1, beginning 'Howl, ye ships of Tarshish,' means, evidently, the Tyrian fleet, or its best ships; or, at any rate, not ships belonging to the inhabitants of Tarshish. Ps 48^7 'with the east wind thou breakest the ships of Tarshish,' intends only a very general illustration of God's power over the most mighty things. Cf., analogously, Is 2^{16} '(the day of the Lord shall be) on all ships of Tarshish.' In 1 K 10^{22} 'the king (Solomon) had at sea a navy (better: a ship) of Tarshish with the navy of Hiram,' and this ship was sent to bring 'gold and silver, ivory, and apes and peacocks'; evidently, the expeditions to Ophir (v.^{11} and 9^{28}) are meant. Wherever that country of Ophir may have been, it is clear that the Tarshish ship was not sailing to or from Tarshish, but along the E. African coast, as already its sailing port Ezion-geber shows. The Chronicler, however, no longer understood that old nautical expression, and interpreted it, literally, of an expedition sent to Tarshish. Thus 2 Ch 9^{21} 'ships that went to Tarshish with the servants of Huram,' etc. (after 1 K 10^{22}), and 20^{36} 'Jehoshaphat of Judah joined himself with Ahaziah, king of Israel, to build ships in Ezion-geber to go to Tarshish.' These ships were broken so that they were not able to go to 'Tarshish,' while the original text, 1 K 22^{48}, spoke merely of 'ships of Tarshish to go to Ophir for gold.' These passages might be understood (together with Ezk 38^{13}, Ps 72^{10}) as pointing to a region of Arabia, Africa, or even India, assumptions which of course would be in direct conflict with Gn 10, etc.*

The products of Tarshish are mentioned Ezk 27^{12}; Tarshish traded with Tyre with a 'multitude of all kinds of riches, with silver, iron, tin, and lead.' According to Jer 10^9 'silver spread (RV 'beaten') into plates' is brought from Tarshish. Finally, the precious stone called *tarshîsh* may be noticed; but this, unfortunately, cannot be identified. See preceding article.

The tradition of the ancient versions on the situation of Tarshish is very unsatisfactory. First, the passages are to be set aside where it was felt, correctly, that Tarshish, translated literally as a geographical name, would be misunderstood, *i.e.* the passages speaking of the Tarshish ships. The Jewish scholars translated, or rather paraphrased there freely, but not inadequately, 'sea ships.' Thus already LXX in Is 2^{16} (*πλοῖα θαλάσσης*).* The Vulg. extends this translation to less suitable passages; cf. Is $23^{1.10}$ (*filia maris*!) 60^{19} 66^{19} (*gentes in mari*), Ezk 27^{25}, 1 K 10^{22} (*per mare*), 2 K $22^{48\,(49)}$, otherwhere, mostly, *Tharsis*. Thus also the *Targum* (ימא), usually, in the Prophets (for exceptions see below). This was followed by Saadia and modern versions (*e.g.* Luther). Jerome (on Is 2^{16}) was told by his Jewish teachers that *Tharsis* was the proper Hebrew word for 'sea'† (in opposition to Aramaic?): a strange artifice!

Another Jewish tradition appears in the LXX of Ezk 27^{12} (also Vulg.) and Is 23, where Tarshish is rendered 'Carthage' or 'Carthaginians'; likewise Targ. in 1 K 22^{49}, Jer 10^9 'Africa' (*i.e.* the Roman province of Africa, the former territory of Carthage). This tradition is evidently founded on the frequent association of Tarshish with Tyre, the apparent mother-city of Carthage,‡ but it does not suit the sense of the other passages.

Josephus (*Ant.* I. vi. 1) read the name apparently *Tarshûsh*, and explained it as Tarsus in Cilicia, an interpretation which formerly seemed very satisfactory. Now, however, we know from coins of Tarsus and from Assyrian inscriptions (Delitzsch, *Paradies*, 103, etc.) of Shalmaneser that the old Cilician city had the name תרז *Tarzi*, not as Josephus presupposed.

The interpretation most widely accepted at present was proposed by Bochart, *Phaleg* (preceded by Eusebius [*Onom.* ed. Lag. 166. 8, cf. 183. 17–18], who already combined Tarshish and the Iberes, *i.e.* Spaniards). Bochart found the Hebrew name Tarshish in the Greek *Tartessos*, explaining the seeming interchange of *t* and *sh* by the analogy of Aram. *th* for Heb. *sh* (which analogy, unfortunately, does not apply here, where no Aramæans come in question). The remote position attributed both to Tarshish and to Spain, the W. end of the world, according to the opinion of the ancients, suits well, and so does the wealth in metals (especially the Spanish silver and tin); finally, some connexion of the Phœnicians with Spain seems to be recognizable before the Carthaginian conquest. Tartessos is supposed to have been the name of a city (?), extended first to the S. of Spain, then to the whole country. The name of the southern coast, *Turdetania*, and of a tribe, somewhat farther north, the *Turdûli*, *Turdali*, seems to allow a comparison (cf. Strabo, below).

A very vigorous attack upon this popular theory has been made by P. le Page Renouf in *PSBA* xvi. (1894) 104. He urges that the whole theory rests only on a deceptive similarity of sound, that Bochart's appeal to Aramaic is unsuitable (see above), that we have no proof for Phœnician settlements in Spain (which were only alleged to have existed in order to suit Is 23^6 etc.).§ He even claims that the city or country Tartessus seems 'to have existed only in the realms of imagination, like the isle of Calypso or the garden of the Hesperides. Its site was certainly unknown at the time of Strabo, though it was then identified on grounds of probability with the neighbourhood of the Bætis or Quadalquivir.[*] Late writers, like Valerius Maximus, Pliny, and Arrian, confounded Tartessus and Gades.' The metallic treasures of Spain, Renouf claims, were developed only by Hamilcar Barcas after the first Punic war, and the tin in the bronze of earliest Greece and Babylonia came rather from Eastern mines (?).[†] Thus the necessity for going to Spain for tin is removed. Renouf's (*l.c.* p. 138) idea is that Tarshish has a Semitic etymology, 'the broken' (??), which might (!) mean 'shore, coast' (??), whence the translation 'sea' in the versions (?).[‡] The passages connecting it with Tyre show then, he claims, that the Phœnician coast itself is meant. This theory is so inconsistent with Ezk 27, etc., and so forced, that it does not deserve a detailed refutation.

---

* To avoid this conflict, Bochart assumed two Tarshishs—one in the W. of the Mediterranean, the other in the Indian Ocean. This desperate effort to avoid the acknowledgment of a small misunderstanding by the Chronicler is now universally abandoned. See, further, W. R. Smith, *OTJC*^{2} 140; A. B. Davidson, *Ezekiel*, p. 200; Sayce, *HCM* 130.

* This might, however, be taken from a Hexaplaric source (Symmachus or Theodotion?).

† 'Hebræi putant lingua propria mare Tarshish appellari.'

‡ More correctly, the mother-city was Sidon.

§ For such colonies, indeed, the tradition (Strabo, p. 157, Arrian, etc.) is very recent. It is questionable if those late writers were able to distinguish between Carthaginian and earlier Phœnician colonies.

Winckler (*Forschungen*, i. 445) modifies the Tartessus theory of Bochart, by referring Tarshish to *Ταρσηΐον*, a place mentioned by Polyb. III. xxiv. 1 as one of the principal cities of Carthaginian Spain.[§] This view, however, he puts forward with great reserve.

Cheyne (*Or. Lit.-Zeitung*, iii. 151; cf. the present writer, *ib.* 294) expresses the opinion that Tarshish is identical with Tiras (better vocalized probably *Tûr(a)s*) of Gn 10^{2}. This latter name might have come in from another source or as a gloss, so that the same nation would be represented in two different forms. Vocalizing *Turshûsh* (cf. Josephus), we should obtain the Tyrsenians, Tyrrenians or Etruscans, bold seafarers, and well known as pirates already to the ancient Egyptians (*c.* 1200 B.C.), by whom they were called *Tursha*. Their name might stand for the whole of Italy, possibly even for all European coasts west of Greece. This comparison with the Tyrsenians (proposed already by Knobel) agrees with the wealth in metals, especially with the tin. The Etruscans might have brought this from Spain, although a more probable assumption would be that they obtained it either in the harbours of Southern Gaul (cf. Diodorus, v. 38, on the trading of English tin through Gaul to Massilia) or more directly in Upper Italy, where it might have been brought from various places in Central Europe.

This last identification seems to the present writer the most plausible. Next to it, the identification with Spain might claim most relative probability. Certainty will hardly be obtained with our present means of knowledge.

W. MAX MÜLLER.

TARSUS (*Ταρσός*; on coins תרז) is mentioned in the Bible only as the city where St. Paul was born, of which he was a citizen (Ac 9^{11} 21^{39} 22^{3}), and in or near which he spent a number of years not long after his conversion (Ac 9^{30} 11^{25}). It has been universally recognized that his birth and his early education in this city were important factors in preparing the Apostle of the Gentiles for his career. No direct evidence is accessible as to the surroundings of St. Paul's early years, which makes it all the more necessary to study the general character of the city and the society in which he grew up. The history of Tarsus is at the same time the history of Cilicia, which affords the opportunity of somewhat fuller treatment of that subject than was given under CILICIA.

i. SITUATION.—Tarsus, the chief city of Cilicia in ancient times, was situated in a rich and fertile plain, only slightly elevated above sea-level, less than 10 miles from the seacoast at its nearest point. The river Cydnus flowed through the middle of the city, and entered the Rhegma,[*] a sort of lake[†] some distance below the city and close to the sea. This lake served as an arsenal and harbour for Tarsus; but ancient ships could ascend the river right up to the city (as Cleopatra did). In modern times the lake has become a large marsh[‡] on the west side of the river, while the bed of the river has become shallow and impassable to anything larger than a small rowing-boat, and its mouth is blocked by a bar. These changes are the result of the ignorance, carelessness, and incapacity of government and inhabitants, neglecting the engineering operations which must have been applied by the ancients to regulate the river-bed. The proximity of the marshes has made Tarsus more unhealthy than it was in ancient times, though from its low situation in the plain under the mountains of Taurus it can never have had an invigorating climate. South-west of Tarsus towards Soli lay the strong walled city Anchialos, which must have been between Mersina and the Cydnus, a little way back from the coast.[§] Mersina, the modern port of Tarsus, stands on or close to the ancient Zephyrion, a small town near a promontory of the same name, 16 miles W.S.W. from the great city. This promontory is a very little way west of Mersina. Anchialos is described by Ritter as the port of Tarsus, and as closely connected with it (like Piræus with Athens), so that the two might be regarded as a single great city, which would suggest that Anchialos was somewhere near the west side of the lake. But Aulai is said to have been the name of the port-town on the lake, and Ritter's view seems a misinterpretation of Arrian, *Anab.* ii. 5.[‖] The statements of the ancients as to the mutual relations of these places are confused.

The Cydnus originally flowed through the heart of Tarsus, as many authorities mention. But, when a flood in the river had done great harm in the city, Justinian (527–563) cut an artificial channel to carry part of the water round the east side of the city. It would appear that gradually the branch of the river that flowed through the city grew smaller as its bed became choked, and in modern times almost the whole of the water passes through Justinian's channel.[¶] In 1432 the inner branch is described as a tiny stream; and in 1473 the eastern branch is spoken of as the only one (see the quotations in Ritter's *Kleinasien*, ii. p. 184 f.). The falls of the Cydnus beside the northern entrance to the city are still very picturesque, though only a few feet high.

Tarsus possessed almost all the qualifications required for a great commercial city. Not merely did it possess a safe and good harbour and a rich territory, it was also placed in front of the southern end of the great trade and war route across Mount Taurus, through the Cilician Gates, to Cappadocia, Lycaonia, and inner Asia Minor generally. Such a situation made it a great city from time immemorial.

---

[*] Cf. Strabo (148 ff.), who, indeed, quotes this only as a hypothesis, does not know with certainty what the ancients meant by Tartessus, and cannot identify an alleged city Tartessus (at the mouth of the Bætis or at Carteia?). The old name Tartessis (!) of Spain seems to him to survive in that of the Τουρδοῦλοι (?) and Τουρδητανια (?). However, le Page Renouf seems to overstate here the shadowy position of Tarshish. Herodotus (*e.g.* iv. 192) uses it clearly for Southern Spain. Eratosthenes (in Strabo, 148) takes it more narrowly as the region around Calpe-Gibraltar.

[†] This belief, for which he quotes O. Schrader, *Prehistoric Ant.* 192, etc. (where the Paropamisus is thought of), has been refuted by Winckler, *Forschungen*, i. 161 (cf. the present writer in *Or. Lit.-Zeitung*, ii. 295, on the Egyptian texts). The tin of the ancient East came from the West, evidently through maritime commerce.

[‡] *Sea* and *coast* are, however, very different ideas.

[§] This was mostly confounded with Tartessus, while, in Polybius, it seems to have been another name of Mastia. The text in Polybius is, besides, very obscure.

[*] Ῥῆγμα, Strabo, p. 672.

[†] *λιμνώδης τόπος*, apparently a broadening of the river so as to look like a lake, Strabo, p. 672.

[‡] A marsh 30 miles in circumference (Barker, *Lares and Penates*, p. 137).

[§] Strabo, p. 671.

[‖] Ritter, *Kleinasien*, ii. 202; Steph. Byz. *s.v.* Αὖλαι.

[¶] Barker says that a canal from the Cydnus passes through Tarsus, and formerly flowed into the marsh, but was recently diverted to rejoin the river. This may be the old channel.

ii. TARSUS THE ORIENTAL CITY.—Its foundation was attributed by legend to Sardanapalus, who was said to have built Tarsus and Anchialos in one day, and whose tomb is said to have been at the latter place. A more Oriental form of the legend, as reported by Eusebius (*Chron.* i. p. 27[*]), named Sennacherib, king of Nineveh, as the founder. When Tarsus became a Greek city, a centre of Greek civilization and seat of a university, it could not be satisfied with such an origin, but invented a Greek foundation. Perseus or Herakles was named by the Tarsians as founder of the city (see Dion Chrysostom's *Oratio* xxxiii. *ad Tars.*; Libanius, *Or.* xxviii. 620); but this is only the Assyrian legend in a slightly Grecized form, for Perseus was a peculiarly Oriental and Assyrian hero (Herod. vi. 54), connected with the mythology and religion of many places in the eastern parts of Asia Minor; and Herakles was the Tyrian god, the founder of colonies. These legends contain a memory of the time when the Assyrian power extended over Syria and Cilicia, and Tarsus was their western capital. Tarsus is mentioned on the Black Obelisk of Shalmaneser among the towns which he captured in the middle of the 9th cent. B.C. Athenodorus, the Tarsian, said that the city was originally called Parthenia, from Parthenius, son of Cydnus, and grandson of Anchiale, daughter of Japetus: here, too, fancy is giving a Greek colour to local Asiatic legend.

Tarsus continued for a long time an essentially Oriental town. Its early coinage was struck, not by a municipal government like that of a Greek city, but by native kings or Persian satraps, who used Tarsus as their capital. It is true that at an early time considerable influence was exerted on the city by Greek trade and civilization. Thus Greek letters were sometimes engraved on the early coins, and the coinage as a whole was modelled after Greek coins, and was probably made by Greek artisans employed by the rulers of Tarsus. Yet even in the Roman period, after Tarsus had for centuries been transformed (at least externally) into a Greek city, marked Oriental characteristics are apparent. A deity standing on a horned lion, thoroughly non-Greek and Asiatic in character, probably the god Sandon, often appears on coins under the empire; and a monument at Anchialos, inscribed with letters believed to be Assyrian, is often mentioned[†] by Greek writers. Tarsus therefore was never so thoroughly Hellenized as to lose or to forget its Asiatic character and origin; even as a Greek city it was far from being wholly Greek. Its population, doubtless, was very mixed (as it is at the present day); and even to a greater degree than Syrian Antioch it may be regarded as a meeting-place of Greeks and Orientals.

In the Assyrian and afterwards in the Persian period hardly anything is known of Tarsus. When the central government was strong, presumably the city was governed by satraps. When the central government was weak, the satraps tended to become more and more independent, and even a dynasty of native kings seems to have held Tarsus during part of the 5th and 4th cents. B.C.

In the *Anabasis* of Xenophon, Tarsus is described about B.C. 400 as a great and wealthy city, containing the palace of Syennesis the Cilician king. But its coinage is much older. Electrum coins of the 6th cent. have been assigned to it, though not with great probability. The kings or satraps of Cilicia struck coins at Tarsus throughout the 5th and 4th cents., with legends mostly Aramaic, but partly Greek, frequently with Baaltars, the Baal or Zeus of Tarsus, enthroned, holding sceptre, grapes, and corn. Coins of Baaltars were struck during the last efforts of the Persians and under the earlier Seleucid kings; but they appear to have been minted at Babylon, and many of the extant specimens have come from India.

iii. TARSUS THE GREEK CITY.—In Seleucid times autonomous coins were first struck at Tarsus, showing its transformation from an Oriental town into a Greek *polis*, a highly important stage in its history. This municipal and strictly Greek coinage began under Antiochus IV. Epiphanes (B.C. 175–164), when the city was styled 'Antioch beside the Cydnus,'[*] and took that name on its coins. The growth of Tarsus is evidently the result of a change in the Seleucid rule; it is connected with their frontier policy, and shows that increasing attention was paid to Cilicia by that Syrian king. Before 190 Cilicia had been a district in the heart of the Seleucid empire; but, at the peace of 189, the whole of Asia Minor up to the Taurus mountains was taken from Antiochus III., and Cilicia became a frontier land. It was necessary now to pay more attention to its organization and defences; and the refoundation of cities like Tarsus-Antiocheia, Epiphaneia, Adana-Antiocheia, Magarsa-Antiocheia, belongs to the same reign.[†] Mopsuestia, guarding the important crossing of the Pyramus, was refounded as Seleuceia by Seleucus III. (187–175). Almost all these cities (along with Alexandria *ad Issum* and Hieropolis-Castabala) began to coin as self-governing municipalities in the reign of Antiochus IV.[‡] It is therefore highly probable that Cilicia had previously been treated more like a subject country or satrapy,[§] and that now its cities began to be allowed greater liberty and to be more thoroughly Grecized in their institutions, when it was important to make them heartily loyal. The incident mentioned in 2 Mac 4^{30} takes us into the midst of this process, and shows that about 171–169 is the probable date of this important transformation. In 171 Antiochus gave the revenues of Tarsus and Mallus to his mistress Antiochis. This provoked riot and even insurrection; and Antiochus had to go in person to quell the disturbances. Apparently he succeeded in this peaceably, by granting freer constitutions to the cities and reorganizing the country generally. The year 170 B.C., therefore, marks an epoch in the history of Tarsus, for it was now refounded as a Greek *polis*, and called by a new name, 'Antiocheia on the Cydnus.'

There is no reason to think[||] that the change of name was a mere act of adulation to the reigning king, implying no real development in the city constitution. It is true that the name Antioch soon fell into disuse, and the name Tarsus revived; but this was due partly to the fact that the town was not thoroughly Grecized, partly to the fact that the name Antioch was already too common, and the three new Antiochs would hardly establish a right to exist beside the many older Antiochs. Rather we must look on the refoundation of Tarsus as a critical epoch in its history.

The refoundation was certainly accompanied by an increase of population, for the regular Seleucid policy in such cases was to introduce a body of settlers whose loyalty might be reckoned on, and to give them special privileges in the city. The colonists whom the Seleucid kings most commonly planted in the cities of Asia Minor were Jews;[¶] and therefore it is highly probable that a Jewish colony was established at Tarsus about B.C. 170.

iv. TARSUS THE ROMAN CITY.—From the decaying Seleucid empire Tarsus passed into the hands of the Romans. From B.C. 103 onwards the name Cilicia became 'the Roman term for a great, ill-defined, half-subdued agglomeration of lands, comprising parts of Cilicia, Pamphylia, and other lands' (Ramsay, *Histor. Comm. on Galatians*, p. 103). In 66 Cilicia Campestris was decisively conquered by Pompey, after having been under the power of king Tigranes more or less since 83; and in 64 it was properly organized (see CILICIA) as a province with Tarsus for its capital, though considerable parts of the country were left for a long time under native kings—Tarcoudimotos I. and II. and Antiochus being the most famous.

Tarsus, while exposed to the oppression generally exercised on subject cities by the Roman republican officials, was favourably treated by Julius Cæsar, Antonius, and Augustus. Cæsar passed through the city on his march from Egypt to Pontus; and the strong partisanship of the Tarsians for him was shown by the name Juliopolis which was granted to, or assumed by, them (Dio C. 47. 26). In punishment for its devotion to Cæsar, Tarsus was harshly treated by Cassius in 43. But Antonius soon after granted it the privilege of enjoying its own laws (as *civitas libera*) and the right of duty-free export and import trade.[*] He also made it his residence for a time; and received here a visit from Cleopatra, who sailed up to Tarsus in B.C. 38 in circumstances of extraordinary magnificence and luxury. It formed part of the large realm which he bestowed on the Egyptian queen (see vol. ii. p. 86). When Augustus triumphed over Antonius he recognized that the Tarsians were partisans, not of Antonius specially, but of the Empire as contrasted with the Republic; and he even increased their privileges. Cilicia was now united in one large province with Syria.

Thus Tarsus, when St. Paul was a child, stood before the world at the entrance to the greatest province of the East as a metropolis, a free city with a free harbour, mistress of a large and fertile territory, a centre of Roman imperial partisanship. It had been a Greek self-governing city since B.C. 170, and the enthusiasm with which it had taken up Greek education and civilization had made it one of the three great university cities of the Mediterranean world. Strabo (14, 5, 13, p. 673) speaks of the Tarsian university as even surpassing in some respects those of Athens and Alexandria; and he observes that all the students were natives,[†] and no strangers came to it; but, on the contrary, many natives of the country went abroad to study and reside, few returning home again: Rome was full of Tarsian and Alexandrian scholars. So strong was the Tarsian love for letters and education! They filled their own university and foreign cities and Rome itself. Demetrius, as Plutarch tells (*de Defect. Orac., ad init.*), went to Britain and Egypt, the Erythræan Sea and the land of the Troglodytes, to satisfy his scientific curiosity. Athenodorus the Stoic was the companion of Cato the younger, and died in his house; another Stoic, Athenodorus Kananites, was the teacher of Augustus; Nestor taught the young Marcellus, his heir (and Tiberius the emperor, according to pseudo-Lucian, *Macr.* 21); Antipater the Stoic was head of the school in Athens and the great opponent of Carneades; and other philosophers and poets of Tarsus are named by Strabo, p. 674 f.

Philosophers governed Tarsus at the important crisis when it was adapting itself to the imperial system. Athenodorus retired to Tarsus in his old age, greatly honoured by his pupil Augustus, and invested by him with extraordinary authority in the city. He found that Tarsus had been seriously misgoverned and plundered by a certain clique, favoured by Antonius, but now greatly weakened since his defeat. After vainly attempting to bring them back by reason to a law-abiding spirit, Athenodorus, in virtue of the powers conferred by Augustus, sent them into exile, and reformed the constitution of Tarsus.[*] It appears from Dion Chrysostom (*Orat.* xxxiii. *ad Tars.* 20) that the constitution in the Roman period was of oligarchic or rather timocratic type, citizenship requiring a certain fortune;[†] and there can be no doubt that this was the kind of reform introduced by Athenodorus, for it was in harmony with the whole tendency of the Roman imperial policy.[‡] After the death of Athenodorus, at the age of 82, another Tarsian philosopher named Nestor, who also had approved himself to Augustus, succeeded to his commanding position in the city, and enjoyed the respect of a series of provincial governors. The rule of these two philosophers probably continued from about B.C. 29 to some time after Christ.[§] It is very probable that St. Paul may have seen and listened to Nestor, who lived 92 years.[‖] The influence of Athenodorus, too, lasted long in Tarsus, where he was worshipped as a hero, for Dion Chrysostom about A.D. 100 quotes his name (in the Oration which he addressed to the Tarsians) as a household word among them. His doctrines may be taken as those which most influenced Tarsus in the time of St. Paul, and which the latter is likely to have been taught in the schools of that city. Being a Stoic, he found the aim and end of life in release from passions; but, if we may judge from the scanty quotations from or allusions to his writings, he estimated the quality of human action greatly by reference to its relation to God. 'Know,' said he, 'that you are set free from all passions, when you have reached such a point that you ask nought of God that you cannot ask openly'; and Seneca, who quotes this,[¶] goes on to state as the rule of life, in his spirit, if not in his words, 'So live with men as if God saw; so speak with God as if men were listening.' The spirit in which he guided the politics of Tarsus is expressed in a longer extract,[**] the gist of which is: 'It would be best to strengthen one's mind by making oneself useful in politics to fellow-citizens and the world; but in the degraded and envenomed state of politics one must be content with the opportunity for free expansion of the mind in benefiting one and all by educating them, by encouraging virtue, by teaching them to comprehend the gods, and to have a good conscience: thus even in private life one fulfils a public duty. The student lives well, not by renouncing humanity and society, but by drawing friends round himself. He who lives and studies for his own sole benefit will from lack of work fall into mere misuse of the time which nature requires us to spend. One must be able to give an account of one's time and prove one's old age by the amount of what one has done for the good of the world, and not simply by the length of time one has lived.'

---

[*] Pseudo-Lucian (*Macr.*) and Dion Chrys. (*ad Tars.*) assign this grant to Augustus, who gave it again when he might have taken it away.

[†] Among the natives (ἐπιχώριοι) Strabo includes, doubtless, persons from the neighbouring parts of Asia Minor. Athenodorus, the most famous of Tarsian philosophers, was called *Kananites*, from the name of his native village. The village probably was *Kanna* in eastern Lycaonia, which afterwards rose to be a city coining money.

[‡] See Kühn, *l.c.*

[§] The exact date of Athenodorus is uncertain. He is commonly conjectured by modern writers to have been a pupil of Posidonius (B.C. 140–60); but Eusebius, *Chron.*, gives the date when he was flourishing as A.D. 7. This tends to show that the common dating of his career is too early; perhaps he may be placed B.C. 72 to A.D. 10; or, more probably, Eusebius made a mistake, taking his death in the height of influence for the date when he flourished: in that case 75 B.C. to 7 A.D. was his period.

[‖] Pseudo-Lucian, *Macr.* 21. [¶] *Ep. Mor.* I. x. 5.

[**] Seneca, *de Tranq. An.* 3 (in *St. Paul the Trav.* p. 394, *Clem.* is mentioned wrongly in place of *Tranq.*).

Such was the environment, on its best side, amidst which St. Paul spent his early years. To estimate its influence on him would be out of place here; but we remember that, when he was rescued from imminent death, bruised doubtless and torn by the hands of the mob in Jerusalem, in answer to the question of the Roman officer, the words that rose to his lips as he recovered breath were: 'I am a Jew, a man of Tarsus in Cilicia, a citizen of no mean city' (Ac 21^{39}). In such circumstances a man does not waste words, or speak what does not lie deep in his nature. St. Paul had to show the officer that he was not an Egyptian, but the tone in which he spoke of Tarsus shows a warm feeling about it as a city and for its own sake.[*]

The timocratic system introduced by Athenodorus into Tarsus has an important bearing on St. Paul's life. In a city where the mass of the inhabitants could be said to be 'outside of the citizenship,' *i.e.* not possessing the full rights of a citizen,[†] he claimed to be a citizen. Citizenship in Tarsus was the certificate of respectability and standing which he mentioned to Claudius Lysias, when it was necessary at once to explain away appearances which were certainly much against him as he was pulled out of the murderous hands of the mob. One may ask why he did not mention his Roman citizenship at that time, for Roman citizenship was a higher honour and a greater proof of respectability; and it seems hardly possible to make any other answer except that, in the excitement of that terrible scene, the feeling that lay deepest in his heart about worldly position rose to his lips. When he was a child he felt himself a 'Jew, a citizen of Tarsus,' and almost unconsciously the words rose to his lips. But the Tarsian citizenship had this value in the eyes of those who possessed it, because it was confined to a select small body.

The history of Tarsus under the empire is a large subject. The following points may be noticed as characteristic of the Asiatic Roman cities generally, and illustrative of their relation to the early Christians and to the Roman State:—

The loyalty of those great cities to the emperors was very strong, and is unusually well illustrated in the case of Tarsus, which assumed titles from the name of the emperors Hadrian, Commodus, Severus, Antoninus (Caracalla), Macrinus, and Alexander Severus,[‡] dropping some when the emperor died, and keeping others for long. It took the title of Temple-Warden (νεωκόρος, δὶς νεωκόρος), indicating that one, or two, temples of the imperial worship were built in the city. It induced governors of the province and even the emperor himself, Alexander Severus, to accept office (of course merely honorary) in the city, and boasted of this on coins and in inscriptions.

Titles like these, however, sprang as much from vanity as from loyalty. The great cities vied with one another in inventing titles and appropriating the titles of rivals. Tarsus and Anazarbus competed with one another in this way. Each claimed such titles as Metropolis, First and Greatest and Fairest, Temple-Warden; but Anazarbus was never Twice Temple-Warden, nor Metropolis of the Three Eparchiai (Cilicia, Lycaonia, Isauria), but only Metropolis of the Nation (ἔθνους, *i.e.* Cilicia). On one occasion, about A.D. 218, Anazarbus induced the emperor Elagabalus to accept the office of Demiourgos[§] in the city, and struck coins to commemorate this honour. Tarsus doubtless was downcast till it could strike similar coins boasting of Alexander Severus as Demiourgos. Both cities boasted that the koinoboulion (Council of the Koinon of Cilicia) met within its walls; but Tarsus alone could boast of the festival and games common to the three united provinces. And so on, title after title was devised to imitate or outshine a rival.

Tarsus was saved by the barrier of Mount Taurus from many of the invasions which swept over Asia Minor. Only an enemy who took the route from Syria over Mt. Amanus through Cilicia would reach Tarsus; but most invasions preferred the route through Eastern Cappadocia, keeping north of Mt. Taurus. Thus, in the long peace of the empire the defences and the defensive powers of the people in Cilicia must have grown weak, and when at last an enemy entered the country they found it a helpless prey.

In the Byzantine ecclesiastical and political system Tarsus became even more important than in the older empire, owing to the steady growth of the Eastern provinces in wealth, education, and weight. Thus Basil of Cæsarea (*Ep.* 34), in A.D. 373 (or 369), emphasizes its importance as 'a city so placed as to be united with Cilicia, Cappadocia, and Assyria' (*i.e.* Syria).

Two churches are mentioned at Tarsus. In A.D. 485 Leontius forced Verina to proclaim him emperor at Tarsus in the Church of St. Peter outside the city. Such an important ceremony is likely to have been held in the principal church of Tarsus, and we may identify this Church of St. Peter as the great church of Tarsus destroyed by the Moslems in A.D. 885.[*] If so, it is remarkable that the principal church was not dedicated to St. Paul; but it is recorded that the Church of St. Paul in Tarsus was built by the emperor Maurice (583–602),[†] while we may be confident that the great church of Tarsus was built as early as the 4th century.

V. TARSUS THE ARAB CITY.—In view of the strongly Syrian associations of Tarsus, it is important to observe the way in which it lost its Western relations, and reverted to a purely Oriental type during the long wars against the Mohammedans. The Arabs first crossed into Cilicia by the Syrian Gates from Antioch in 641.[‡] In 646 the Arabs found all the fortresses between Antioch and Tarsus deserted; presumably the terror of these raids and the neglect of frontier defence by the emperor made the people flee to the mountains.

In 650 the Arabs invaded Isauria (so Theophanes; 649 Ibn Al Athir). This would appear to imply that Tarsus, with Cilicia generally, was in Arab hands, though it must be remembered that the Arab invasions were often only passing raids, in which the forts and cities were left unattacked, or watched by detachments of the invading forces, while the open country was ravaged, and captives swept off into slavery. Cilicia, however, having been so neglected by the central government, was exposed defenceless to the Arabs. Yet the military strength of the empire soon revived, while the Arab raids made little permanent impression. Tarsus was quickly reoccupied by the Christians; but in 673 it was captured (after a defence presumably) by the Arabs. In the following years the Arab attacks were made chiefly by the north road nearer the Euphrates, or by sea; Cappadocia was occupied, and Armenia and Pontus attacked, while Cilicia was not much molested by formal invasions, but its cities seem to have still remained unprotected, and exposed to any small raids. Thus in 692 an Arab army advanced from the Euphrates nearly to Amorion, and returned by Cilicia.

In 699–700 the Christians recovered Cappadocia, and the Arabs henceforth made regular use of the Cilician route in invading the Byzantine empire. Mopsuestia at the important crossing of the Pyramus was fortified in 701, and Tarsus was now permanently occupied as an Arab capital on their north-western frontier. The northern part of Eastern Cilicia, with the town of Sision (now called Sis), was conquered in 703; in 706 the last struggle of the Romans to retain this country is recorded by Al Tabari. The wars of the following years imply that Cilicia was the permanent basis for the Arab operations[§] in Lycaonia, Pisidia, Phrygia, and Bithynia. At the same time Cæsarea, with Eastern Cappadocia, was again taken by the Arabs in 726, but recovered by Constantine in 746. After this the Arab frontier cities on the north were generally Melitene and Germaniceia, and a debateable land lay between them and Cæsareia, though the Christians attacked or even destroyed one or other of the two Arab fortresses in 750–754 and 778, while the Arabs frequently advanced north and north-west into Cappadocia, Paphlagonia, etc. In 806 and 830 the Arabs carried forward the Cilician frontier to Tyana, building a mosque and settling colonists there; but both attempts failed immediately, and Tarsus remained the capital of Orientalism against the West.

---

[*] It must be remembered that such expressions as οὐκ ἀσήμου πόλεως, οὐκ ὀλίγον, often imply a strong assertion of the opposite.

[†] ἔστι πλῆθος οὐκ ὀλίγον ὥσπερ ἔξωθεν τῆς πολιτείας (Dion. Chrys. *ad Tars.* p. 321; see p. 687, col. 2, n. †). On the rights and meaning of πολιτεία see Szanto, *Das griech. Burgerrecht.*

[‡] It calls itself Ἀλεξανδριανὴ Σευηριανὴ Ἀντωνινιανὴ Ἀδριανή in an inscription, and coins often give the last three cumulated.

[§] Title of the chief magistrate in many Cilician cities; the title is Doric, and points to the old Doric relations of Cilicia.

[*] Muralt, *Essai de Chronogr. Byzant.* p. 740.

[†] Sim. viii. 13. There may have been an older Church of St. Paul, of course, in Tarsus, but this was built, not rebuilt, by Maurice.

[‡] Dates from Arab authorities from 641–750 are given according to Mr. E. W. Brooks' papers in *Journal of Hellenic Studies*, 1898, p. 182 f., 1899, p. 19 f.; dates from Byzantine authorities according to Muralt, *Essai de Chronogr. Byzant.*

[§] This appears in incidental expressions, such as Theoph. p. 390, l. 18 f. (de Boor).

In 807 the emperor Nicephorus invaded Cilicia, and defeated the Arabs near Tarsus; but the Caliphs Harun and al-Mamun strengthened the Arab power on this frontier. The latter died at (or near) Tarsus in 833. About the middle of the 9th cent. Byzantine power grew stronger, and Cilicia and Tarsus were the scene of many conflicts, while the Caliphs' vigour waned. In 883 Tarsus is mentioned as a strong fortress, the capital of an independent Mohammedan State. In 891 an Arab fleet is said to have sailed from Tarsus towards the Byzantine coasts; and in 900 the fleet at Tarsus was burned by the Caliph on account of the disloyalty of the city. In 898 the Greek forces landed near Tarsus and gained a victory over the Arabs. About this time Tarsus is mentioned frequently as the centre of Mohammedan opposition to the reviving Christian power. In 904 a Tarsian fleet burned Thessalonica. At length, in 965, after all the rest of Cilicia had been recaptured by the Christians, Tarsus surrendered on favourable terms, the Moslem population were given safe retirement to Antioch, and only Christians were left in the city. The great gates of Tarsus were carried in triumph to Constantinople.

vi. MODERN TARSUS.—The new Christian city of Tarsus had a checkered history. Byzantine Greeks, Latins, Armenians, Turcomans, Turks, Egyptians struggled for it, and alternately held it and lost it. For a century Greek rule in Cilicia was practically unchallenged by the decaying Saracen empire; but even during this time Tarsus must have undoubtedly retained many traces of the three centuries of Arab rule, and become far more Oriental than it had been under the Roman and early Byzantine rule. About 1067 the Seljuk Turks began to ravage Asia Minor, and their terrible armies were seen and felt in Cilicia; and in 1071 the victory of Mauzikert laid the country prostrate and helpless at their feet. Their rule over Phrygia, Lycaonia, Cappadocia, Armenia, Pontus, was recognized by the feeble emperors; but Cilicia still remained, on the whole, in Christian hands, so that the wall of Mt. Taurus once more formed a line of demarcation between the two religions (though now Islam was on the north and Christianity on the south). A new power now appeared in Cilicia: in 1080 Reuben, the first Armenian prince of Cilicia (called often during the next three centuries Lesser Armenia), seized some forts in the eastern Taurus mountains on the north frontier of Cilicia. The history of Lesser Armenia was stormy, and its bounds varied from year to year, sometimes confined to the Taurus forts, sometimes including Tarsus and Cilicia as a whole. In 1097 Baldwin with his Crusading army captured Tarsus, and introduced another factor into the confused history of Cilicia.

The vicissitudes of Tarsian history in this period are so rapid and so numerous that they cannot be traced in detail. Tarsus, the capital, passed from hand to hand. The Turks, who captured it in 1078, did not hold it; the Crusaders were a more permanent power. The emperor John Comnenus took Tarsus in 1137, the Armenian Reuben II. in 1182. The Memluk Sultans of Egypt became a factor in Cilician history in 1260. The terrible Egyptian invasion of 1322 devastated the country. The Armenians suffered from quarrels in the governing family, from religious feuds, and from national inability to unite in a vigorous defensive policy. In 1375 the Armenian kingdom of Cilicia (Lesser Armenia) finally gave place to the Egyptian power, and Tarsus may from this time be said to have relapsed into its original condition of a purely Oriental city. But it was still not subject to Turkey. It was the prey sometimes of Egypt, sometimes of Turcoman chiefs called Ramazanoglu, whose tribes seem to have entered the Taurus fastnesses about 1200, and to have gradually established their hold on the plain, and to have brought the country once more almost into nomadic barbarism. In 1466 the Osmanli or Ottoman Turks entered Cilicia, when the army of Mohammed II. captured Tarsus; but the city was often recaptured, until Selim destroyed the Memluk power in 1516. Again in 1832 the Egyptian forces of Mehemet Ali entered Cilicia, and held Tarsus till 1840, when once more it passed under Ottoman power.

Tarsus remains a wretched town of the Turkish style, little more than a large collection of hovels, with a trying climate, an oppressive atmosphere, retaining not a trace of its former splendour, and few scraps even of ancient marbles. There are few places where the contrast between ancient and modern life is more conspicuous. The unsightly and shapeless mass of concrete, wrongly called the Tomb of Sardanapalus, is the only ancient monument that is displayed to the tourist. It is the substructure of the platform on which stood a temple of the Roman period, and was originally hidden under the marble walls and floors and steps, afterwards utilized to make mediæval buildings, which in their turn have been utterly destroyed.

Wilson in *Murray's Handbook*.

W. M. RAMSAY.

TARTAK (תַּרְתָּק; Θαρθάκ; *Tharthac*).—An idol of the Avvites, introduced by them into Samaria, whither they had been transported by the Assyrian king Sargon (2 K 17^{31}). Tartaḳ is mentioned with another deity called NIBHAZ, and, according to the Bab. Talmud (*Sanhedrin*, 63*b*), was worshipped under the form of an ass.* Various speculations have been made as to the identity of this deity, the religious systems of the Egyptians, Persians, and Carmanians having been laid under contribution to supply points of comparison; but the Typhon of the first, and the sacrificing of an ass by the last to their god (identified with Mars), do not seem to afford satisfactory explanations. In Assyro-Babylonian mythology no god in the form of an ass is at present provable, and the comparison of the name Tartaḳ with the Babylonian god Itaḳ (on account of the second syllable) can no longer be made, the correct reading of the latter being Išum. In all probability no trustworthy identification of the deity, nor satisfactory explanation of his name, will be made until the position of the place (AVVA or IVVAH†) whence his worshippers came, has been determined.

T. G. PINCHES.

TARTAN (תַּרְתָּן; BA Ταναθάν, B^b Ναθάν, $\aleph^{c.a.,d.a.,al.}$ Q^* Θαρθά[ν] in Is 20^1; B Θανθάν, A Θαρθάν in 2 K 18^{17}; *Tharthan*).—The title of an Assyrian military officer, sent by Sargon to Ashdod (Is 20^1), and later (probably another person) despatched by Sennacherib, accompanied by RAB-SARIS and RAB-SHAKEH, 'with a great host,' against Jerusalem. Like the other titles in the latter passage, it was long thought to be a personal name; and it is apparently this (notwithstanding the presence of the article in the Greek) which has given rise to the variant Nathan (an abbreviation of Tanathan) in B^b. In the Assyrian inscriptions and lists of officials, however, it appears as the title of the highest officer of State next to the king, and probably corresponds to the modern military title 'commander-in-chief.' In the list of officials given in *WAI* ii. pl. 31, ll. 26, 27, two grades appear, *turtanu îmni*, 'the *turtan* of the right,' and *tartanu šumēli*, 'the *tartan* of the left,' the former probably corresponding with the *turtanu rabû*, 'great Tartan,' or 'field-marshal' of Shalmaneser II., and the latter with the *tartanu šanû*, 'second Tartan,' mentioned by Johns. That the two forms, *turtanu* and *tartanu*, were interchangeable, is shown by the contract-tablet in which the form *turtanu šumēli* occurs, and the variant spellings *turtannu* and *tartannu* in the inscriptions of Sargon.‡ As one entitled to hold the office of Eponym, the Tartan came next in order to the king (see the titles for the Eponyms for B.C. 809, 780, 770, 752, and 742). Who the Tartans were who are referred to in Is 20^1 and 2 K 18^{17} is not known. In B.C. 720, Ašur-iska(?)-udannin was Eponym, and possibly held the office, and in that case may have been the one sent to Ashdod. For the reign of Sennacherib we have Abda'u, who held the office during the eponymy of Ilu-ittĉa, B.C. 694; and Bêlêmuranni, who was Tartan and Eponym for B.C. 686. Either of these may have been the one sent against Jerusalem.

---

* The companion-deity, Nibhaz (changed to Nibhan by reading ן for ז), is stated to have been in the form of a dog—an explanation which is due to the supposition that the word was connected with *nābaḥ*, 'to bark.' It is therefore not improbable that the statement that Tartaḳ was a deity in the form of an ass may be due to a similar (popular) etymology.

† Sachau (*ZA* 12, 48) identifies it with the modern *Imm*, between Antioch and Aleppo.

‡ The forms with double *n* imply that the second vowel was long (*tartānu*), as in Hebrew.

LITERATURE.—Schrader in Riehm's *HWB*^{2}; Fried. Delitzsch, *Assyr. HWB*; Johns, *Assyrian Deeds*, vol. ii. pp. 68, 69; Driver in *Authority and Archæology* (ed. Hogarth), 140.

T. G. PINCHES.

TATTENAI (תַּתְּנַי).—The name of the governor (*peḥah*) of Cœle-Syria and Phœnicia under Darius Hystaspis, Ezr 5^{3} (B *Θαναναί*, A *Θαθθαναί*, Luc. everywhere *Τανθαναῖος*) ^{6} (B *Θανθανᾶς*, A *Θαθθαναίς*) 6^{6} (LXX om.) ^{13} (B *Ταυθαναί*, A *Θαθθαναί*). He is called in 1 Es 6$^{3.\ 7.\ 27\ (26)}$ 7^{1} SISINNES (*Σισίννης*), which is simply a reproduction in Greek (cf. *Σισίνης* in Arr. i. 25. 3, vii. 6. 4) of a Persian name *Thithinaia* (orig. *Thathanaia* ?), with aspirated *t*. See Ed. Meyer, *Entstehung des Judenthums*, 32.

TAVERNS, THE THREE, is the rendering in Ac 28^{15} of *Τρεῖς Ταβέρναι*, the Greek form which represents the Latin *Tres Tabernæ*, as the name of one of the two stations on the Appian highway whither Christian brethren from Rome, who had heard of St. Paul's arrival at Puteoli on his way to the capital, went forth to meet him. The first group of the brethren met him at a point earlier on his journey—the Market of Appius—(see APPIUS, MARKET OF) 43 (Roman) miles from Rome; the second awaited him at the stage called *Tres Tabernæ*, which was 10 miles nearer to the capital, being, according to the Itinerary of Antoninus, 33 miles distant from it. The Latin *taberna*, which is by no means to be identified with or restricted to our modern sense of *tavern*, but was applied to structures of boards, booths, huts, and shops of various kinds, probably denotes here an inn for travellers. Three such inns might fitly give name to a halting-place, which doubtless was the seat of local traffic, and from which a road branched off to Antium on the seacoast. Cicero mentions it in writing to Atticus (*Ep.* ii. 10, 12, 13). Its precise site has hardly been identified, but is generally referred to the vicinity of the modern *Cisterna*.

WILLIAM P. DICKSON.

TAW (ת).—The twenty-second letter of the Heb. alphabet, and as such employed in the 119th Psalm to designate the 22nd part, each verse of which begins with this letter. It is transliterated in this Dictionary by *t* or *th*.

For the use of *taw* (תָּו) in Ezk 9^{4} and Job 31^{35} see FOREHEAD, and MARK No. 6 (vol. iii. p. 244^{b}).

TAXES, TAXING.—See PUBLICAN and QUIRINIUS.

TEACHER, TEACHING.—In the OT various Heb. words are used for teachers and their work (chiefly verbal forms, לִמֵּד, הוֹרָה, הֵבִין); and several other words are employed more indefinitely for teaching generally (הִשְׂכִּיל, יָרָה, יִסַּר, הוֹדִיעַ, הִזְהִיר, אִלֵּף). This is one indication that in early times there was no recognized office of teacher with a technical title. Nevertheless the duty of teaching, especially in the education of the young, is much insisted on. In Deut. this is repeatedly urged as an obligation resting on parents (*e.g.* 4^{10} 6^{7} 11^{19}). The head of the family is to be diligent in teaching his children the great precepts of the Law, and in talking of them habitually in the house and in the street. The prophets were recognized to be divinely-inspired teachers, commissioned to instruct the people in the knowledge of Jehovah and His will. The word *tôrāh* (תּוֹרָה), which was applied to Deut. in the days of Josiah (*e.g.* 2 K 22^{8}), and from the time of Ezra to the Pent. (*e.g.* Neh 8^{2}), means 'teaching' (lit. 'direction'), and was used in earlier times for the instruction given by the prophets. It is used in this sense by Hosea (4^{6} 8^{1} 8^{12}), by Amos (2^{4}), by Micah (4^{2}), by Isaiah (1^{10} 2^{3} etc.), by Zephaniah (3^{4}). It is to be observed that in all these instances of the occurrence of the word in the prophets we never read of 'the *tôrāh* of Moses' as in Ezra and later, but of 'Jehovah's *tôrāh*,' or 'the *tôrāh*' indefinitely. The clear distinction, now resulting from OT criticism on the date of the Pent., accentuates the importance of teaching under the prophets by demonstrating that what formerly appeared to be a reference to the Mosaic law is, in fact, an allusion to the prophets' teaching. In early times the priests also undertook the religious instruction of the people. Thus Micah, rebuking the mercenary leaders in Jerusalem, declares, 'the priests thereof teach (יוֹרוּ) for hire' (Mic 3^{11}). After the return from the Captivity an immense impulse was given to religious teaching. Religion had now passed into a literary phase. The public reading of the Law by Ezra was an indication that the new Judaism was to restore popular knowledge (Neh 8$^{1\text{-}8}$). It is a significant fact that the high priest took no part in this effort to popularize what had hitherto been cherished as a mystery in the sacerdotal clan. The scribe who not only copies the Law, but teaches it, now becomes the leader of the Jewish religion among the people, gradually taking the place of the prophet, but with an inferior rôle, since he cannot pretend to come with an original message from Jehovah, and must content himself with interpreting, commenting on, and 'fencing' a fixed written *tôrāh*. Thus he in turn comes into antagonism with the priest who performs official functions, administers the Law, and enjoys an aristocratic rank; because the scribe's work in popularizing the Law lessens the power of the priesthood by opening the eyes of the people and by making religion more an affair of ideas than of ritual, or if of ritual still of observances within the reach of the laity. Accordingly, the growth of the synagogue goes on side by side with the development of teaching by the scribes. See RABBI.

In NT times teaching was most highly valued among the Jews, and the teacher held in great respect.* Josephus, writing the history of his people from the standpoint of his own day, relates how Moses commanded that 'boys should learn the primary laws (*πρώτους τοὺς νόμους*) as the best knowledge and the cause of prosperity' (*Ant.* IV. viii. 12); and affirms for his own time, 'We take most pains of all with the instruction of children' (*c. Apion.* i. 12). Similarly Philo writes: 'Since the Jews esteem their laws as divine revelations, and are instructed in the knowledge of them from their earliest youth, they bear the image of the law in their souls' (*Legat. ad Gai.* 31); and, 'They are taught, so to speak, from their swaddling-clothes, by their parents, teachers, and those who bring them up, even before instruction in the sacred laws and unwritten customs, to recognize one God as the Father and Creator of the world' (*ib.*). The Talmud abounds in traditional sayings on the importance of teaching. This is much insisted on in the *Pirḳê Aboth*, where we read how Joshua ben Perachia said, 'Get thyself a teacher' (i. 6); Rabban Gamaliel, 'Appoint for thyself a teacher, so wilt thou avoid what is doubtful' (i. 16); Hillel, 'An ignorant man cannot be truly pious' (ii. 5). Certainly elementary schools existed in the time of the Mishna, and the way in which they are referred to implies that they were then established institutions. It is most probable that they were in existence in the time of Christ. The name of these schools was *beth-sepher* (בֵּית הַסֵּפֶר)—'the house of the book'—*i.e.* of the *tôrāh*. Thus we read (Jerus. *Megill.* iii. 1), 'R. Pinchas said in the name of R. Hoshaiah that there were 480 synagogues in Jerusalem, and each had a *beth-sepher* and a *beth-Talmud*, the former for the *mikra* (text of Scripture), the latter for the *mishna* (oral tradition).' A frequently quoted sentence about the order of a child's education—of late date, being found in an appendix to the *Aboth* of the post-Talmudic period—states that 'at 5 years old (he comes) to the reading of Scripture, at 10 to the Mishna, at 13 to the practice of the commandments, at 15 to the Talmud, at 18 to marriage,' etc. (*Pirkê Aboth*, v. 21). For further particulars on this point see Schürer (*HJP* II. ii. § 27, and artt. EDUCATION and SYNAGOGUE).

---

* In 2 Mac 1^{10} we read of a Jew named Aristobulus who had been Ptolemy's 'teacher' (*διδάσκαλος*).

In the NT, teaching is mentioned chiefly with reference to the exposition of specifically Christian ideas. Nicodemus acknowledges Jesus to be 'a teacher (διδάσκαλος) come from God,' and addresses Him with the recognized Jewish name of a teacher, 'Rabbi' (ῥαββεί, Jn 3^{2}). In all four Gospels the usual name for our Lord is 'Teacher' (διδάσκαλος, tr. 'Master' in AV and RV, but 'Teacher' in RVm and in *Twentieth Cent. NT*). This word is not only used by the disciples; it is also employed by others in addressing our Lord, *e.g.* the Pharisees and Herodians (Mk 12^{14}). No doubt it is the evangelist's rendering of the Aramaic title, 'Rabbi,' which occasionally appears in its original form in Jn ($1^{38.\ 49}$ $3^{2.\ 26}$ 6^{25}, and once *Rabboni*, ῥαββουνεί, 20^{16}). It is important to observe that a clear distinction between 'teaching' (διδάσκω) and 'preaching' (κηρύσσω) is maintained throughout the NT. This is manifest in our Lord's public ministry. He commenced with preaching, as John had done before Him (Mk 1^{4}). This preaching was the call to repentance in connexion with the announcement that the kingdom of God was at hand, and was called 'preaching the gospel of God' (Mk 1^{14}). Then, having gathered some disciples about Him, our Lord proceeded to instruct them in the mysteries of the kingdom, its nature, laws, and principles. This instruction is called 'teaching,' and it was with such teaching rather than with preaching that the later part of His ministry was occupied.

A similar distinction was observed in the apostolic ministry and in the life and organization of the early Churches. Among the various functions in the Church mentioned by St. Paul in Romans occurs that of 'teaching' (Ro 12^{7}). It there takes the third place in a series, being preceded by prophecy and ministry, and followed by exhorting, giving, ruling, and showing mercy. The last of these functions being of a general character, and such as any one might be called on to exercise, suggests that the list as a whole may not point to definite offices. But, in a nearly contemporary and probably earlier epistle, teaching is assigned to specific persons. In 1 Co 12^{28} this also comes third in a list; but the list as a whole is different from that in Romans, containing titles of persons, not merely functions; so that we have 'teachers,' not merely 'teaching.' They are preceded by 'first apostles, secondly prophets'; then we come to 'thirdly teachers.' The form changes after this to gifts and functions—'miracles,' 'gifts of healing,' etc. That the teaching is ascribed in an especial way to some people, to the exclusion of others, is shown by St. Paul's questions, 'Are all apostles? Are all prophets? *Are all teachers?*' (v.^{29}). Nevertheless, the following questions, 'Are all workers of miracles? have all gifts of healing?' etc., show that the personal differences rest on differences of gift. At Corinth they who have gifts of teaching are teachers, as they who have gifts of healing are healers. Another arrangement appears in Ephesians: 'and he gave some to be apostles; and some, prophets; and some, evangelists; and some, pastors and teachers' (Eph 4^{11}). Here we have four offices, and that of teacher set last, an office not mentioned in the earlier lists—the evangelist's—coming between it and the offices of apostles and prophets. Further, it is also known by the name of 'pastor'; for the arrangement of the clauses ('and some' introducing each class) shows that the 'teachers' and the 'pastors' are the same persons. The distinction of the teacher from the evangelist is significant, suggesting the differentiation of function in which the evangelist preaches, declaring the gospel, and the teacher instructs the converts. The companion title 'pastor' points to a settled ministry within the Church as distinct from the travelling missionary activity of apostles and evangelists; but it is to be observed that the apostles gathered up in themselves the several functions that were afterwards distributed among various members of the Churches. Thus St. Paul describes himself as appointed 'a preacher and an apostle . . . a teacher,' etc. (1 Ti 2^{7}—assuming these to be St. Paul's words). When we turn to Acts we meet with yet another arrangement. Here teachers seem to be identified with prophets (Ac 13^{1}); but St. Luke may mean that the prominent men whose names he gives consisted of prophets and teachers, as two classes. In course of time the teacher melts into the bishop, his function is absorbed in the episcopate; as a separate officer he is discredited by comparison with the higher official, and ere long he disappears entirely. These stages may be noted thus: (1) At the first appearance of the teacher there is no reference to the bishop: thus there is no indication of bishops in 1 Cor. or Romans. (2) At the time of the Epp. of the Captivity the teachers seem to have practical oversight, like that of the early bishops, even if the name is not given to them, since they are called 'pastors' (Eph 4^{11}). It seems reasonable to suppose that these were equivalent to the 'bishops' of Ph 1^{1}, especially since the word 'bishop' in the latter case may be functional rather than official, as Dr. Hort suggested. (3) In the Pastoral Epistles teaching is joined to the episcopal office. The bishop must be 'apt to teach' (1 Ti 3^{2}; compare Tit 1^{9}). Especial honour is to be given to the elders who 'labour in the word and in teaching' (1 Ti 5^{17}): this suggests that teaching was not carried on by all the elders. St. Paul will not allow women to teach publicly in the Church (1 Ti 2^{12}), and yet he had written of aged women being 'teachers of that which is good' (Tit 2^{3}), when he must have meant home teaching, or perhaps teaching by example, unless we are to suppose that he changed his views on the subject between Titus and 2 Tim., which is improbable. Already the teacher's office is falling into unworthy hands; and the apostle writes of the time when people will not endure 'healthful teaching' (RVm ὑγιαινούσης διδασκαλίας, not 'sound doctrine' AV and RV), but, having itching ears, will heap to themselves teachers after their own lusts (2 Ti 4^{3}). (4) In the sub-Apostolic age we still meet with the teacher as distinct from the bishop, though teaching now is more and more appropriated by the latter officer, and the teacher is sinking in importance. In the *Didaché* there are 'teachers' as well as 'apostles' and 'prophets.' All three of these functionaries appear as itinerant ministers visiting the Churches. The teacher is to be tested by what he teaches, and received or rejected according as his instruction agrees with what is laid down in this treatise or differs from it (see *Didaché* xi.). These travelling teachers are quite distinct from the 'bishops and deacons' whom the writer bids his readers 'appoint for yourselves' (xv.). Still later we meet with 'teachers' in the *Shepherd of Hermas*, and here they appear among the officers of the Church, coming between the bishop and the deacon. The stones in the mystical building 'are the apostles and bishops and teachers and deacons' (*Vis.* iii. 5). Hermas writes disparagingly of 'self-appointed teachers,' who 'praise themselves as having understanding,' 'senseless though they are' (*Sim.* ix. 22). We have no definite account of the manner in which the teachers performed their work, or of the substance of their instructions. We are tempted to think of the catechetical teaching of later times; but there is no clear indication of a catechumenate in NT. Still something of the kind must have arisen early from the necessity of the case. The *Didaché* seems to have been a text-book for some such teaching. It has been suggested that the *Logia* recently discovered in Egypt might be a list of sayings of Jesus drawn up for use in teaching. Possibly St. Matthew's *Logia* was compiled with that end in view; and the same may be suggested of the canonical Gospels (cf. A. Wright, *NT Problems*, p. 91 ff.). With reference to teachers and teaching in the NT see Allen, *Christian Institutions*, pp. 28, 29, 40, 42; McGiffert, *Apostolic Age*, 528 ff., 640 ff., 654 ff.; Weizsäcker, *Das Apostolische Zeitalter*, pp. 621, 622. W. F. ADENEY.

TEBAH (טֶבַח; A Τάβεκ, Luc. Τάβεχ).—A 'son' of Nahor by his concubine Reumah, Gn 22^{24} [J]. The name stands for an Aramæan town, prob. the same as is named in 2 S 8^{8} [where read, after LXX, Pesh., and 1 Ch 18^{8}, טבח for בטח. See TIBHATH].

TEBALIAH (טְבַלְיָהוּ 'J" hath dipped, *i.e.* purified'; B Ταβλαί, A Ταβελίας, Luc. Ταβεήλ).—A Merarite gatekeeper, 1 Ch 26^{11}.

TEBETH (טֵבֵת, Τηβήθ).—The 10th (Bab.-) Jewish month. See TIME.

TEHAPHNEHES, Ezk 30^{18}.—See TAHPANHES.

TEHINNAH (תְּחִנָּה; B Θαιμάν, A Θανά, Luc. Θεεννά).—The 'father' of Ir-nahash, 1 Ch 4^{12}.

TEIL TREE.—A mistranslation (AV Is 6^{13}) of אֵלָה (RV 'terebinth'). For the various tr^{s} of *'ēlāh* see OAK and TEREBINTH.

TEKEL.—See MENE, MENE, TEKEL, UPHARSIN.

TEKOA (תְּקוֹעַ; LXX Θεκῶε, Θεκοῦε, Θεκώμ, Θεκώς).—A town in the tribe of Judah, about 10 miles S. of Jerusalem and 5 S. of Bethlehem, situated on a detached hill about 2700 ft. high which is girt with other lower hills. From the summit there is a broad prospect. In the W. and S. the view is closed by hills, cultivated or clothed with low vegetation. On the N. is the ravine of Urtâs and its continuation Khureitûn, cutting deeply through the hills down to the Dead Sea. The Frank mountain and Bethlehem are visible: Jerusalem is hidden behind intervening hills, but the Mount of Olives can be seen and, still farther to the N., Nebi Samwîl. To the S.E. is another deep and wild valley, Wady Jehâr, running towards the Dead Sea, glimpses of which can be obtained through the distant cliffs. Eastwards the hill slopes down to the Wilderness of Judah. Canon Tristram describes the approach from the Wady Bereikeh: 'In front of us is a long hill, with a copious spring at its foot. . . . The district in its natural features seems to have been always what it is now—bare, treeless, open pasturage. We here lose all traces of the ancient terraces which gird the undulations of every hill farther west with their swathing bands. Here and there are still patches of cultivation in the hollows of the valleys, but the soil is dry and stony, and we begin here to lose the rich vegetable mould which, however scanty, still covers more or less the whole of the central hills, and have, in its stead, only a thirsty, chalky marl. That vegetable soil is doubtless due, in the first instance, to the primæval forest, which certainly once covered the whole of the Judæan, as of the Gilead, range, but has left no trace of its existence on the Western slopes towards the Dead Sea.'

The town is not mentioned very frequently in Scripture. The Heb. of Jos 15^{59} does not include it in the list of places belonging to Judah: the LXX gives it and ten other towns, one of them being Bethlehem. 1 Ch 2^{24} 4^{5} ascribe to Tekoa an antiquity coeval with the Conquest. According to these passages, Ashhur, Caleb's half-brother, was the father, *i.e.* the founder, of Tekoa. In 2 S 14 the wise woman of Tekoa is spoken of in such a manner as to convey the impression that her shrewdness had brought her dwelling-place into notoriety. David spent much time in this part of the country during his *Wanderjahre*: afterwards it was a recruiting ground for the ranks of his mighty men (2 S 23^{26}, 1 Ch 11^{28}). From 2 Ch 11^{6} we learn that it was one of the towns fortified by Rehoboam. Its commanding position and its situation on the utmost frontier of the cultivated land would ensure its being made a military post. Jer 6^{1} shows that its defences continued to be kept up. The prophet bids the children of Benjamin raise up a signal on Beth-haccherem (Jebel Fureidis, the Frank mountain), and blow the trumpet in Tekoa. This is not said merely for the sake of the play on words, *tiḳʿû*, *Tĕḳōaʿ* [note also *taḳĕʿû* in v.^{3}], but also because this was a garrison town. The Wilderness of Tekoa is named at 2 Ch 20^{20} as the battle-field where Jehoshaphat defeated the Ammonites and their allies. In the Bk. of Nehemiah ($3^{5.\,27}$) the public-spiritedness of the commonalty is sharply contrasted with the contemptuous refusal of their chiefs to bend the neck to the Tirshatha's yoke. 1 Mac 9^{33} relates that Simon and Jonathan fled to the Wilderness of Tekoa from before Bacchides. The crowning glory of Tekoa was its connexion with the prophet Amos (Am 1^{1}).

Josephus, who mentions Tekoa as one of the 'strong and large cities' built by Rehoboam (*Ant.* VIII. x. 1), speaks of it as a village in the Maccabæan period (*BJ* IV. ix. 5) and in his own day (*Vita*, 75). Jerome (*Comm. in Jerem.* vi. 1) calls it a village, 12 (Roman) miles from Jerusalem, visible to him from Bethlehem every day. In the Pref. to Amos he adds: 'There is no village beyond Tekoa, not even [a probable conjectural emendation is 'except'] rustic huts, of the appearance of ovens, which the Africans call *mapalia*: such is the desolateness of the desert which extends as far as the Red Sea and the boundaries of the Persians, Ethiopians, and Jews. And because no kind of crop whatever grows on the dry and sandy soil, the whole neighbourhood is occupied by shepherds, to compensate for the barrenness of the soil by the multitude of sheep.' The same Father asserts that the tomb of Amos was shown at this place. The Talmud speaks of the oil of Tekoa as the best in the country; and one of the Arab geographers says that its honey was so excellent as to have become proverbial. In the early part of the 6th cent. Saba founded a new monastery here, which, in contradistinction to Laura (Mâr Sâba), was called Laura Nova, 'New Monastery.' Soon after his death it became the scene of fierce conflicts between the Monophysites and the orthodox. In Crusading times it was inhabited by a large population of Christians, who afforded considerable help to the Franks during the first siege of Jerusalem. The village was sacked by a party of Turks from beyond the Jordan in A.D. 1138, but the majority of the inhabitants had taken refuge in the great cave of Khureitûn. There is a somewhat puzzling reference in Bahaoddinus, *Vita Salad.*, ed. Schultens, p. 237. He writes of 'the river of Tekoa (نهر تقوع), one parasang [=about 3 Eng. miles] from Jerusalem, which furnished a sufficient supply of water to Richard of England and his army' of Crusaders. It is obvious that the distance here given does not agree with the facts. The suggestion has been made that the water in question was that of the lake mentioned 1 Mac 9^{33} *τὸ ὕδωρ λάκκου* 'Ασφάρ (א, Ven.), or 'Ασφάλ (A), which Josephus (*Ant.* XIII. i. 2) calls *τὸ ὕδωρ τὸ καλούμενον λάκκου* 'Ασφάρ, and which Mühlau identifies with *ez-Za'ferâne* S. of Tekoa, Robinson (*BRP*^{2} ii. 202) with *Bir Selhub* S.W. of En-gedi.

The Palestine pilgrims of the Middle Ages do not enlighten us greatly as to the condition or history of Tekoa. In the account of St. Willibald's pilgrimage (8th cent.) it is said that he came hither, and 'there is now a church, and there rests one of the prophets.' The anonymous itinerary of this journey asserts that Nathanael was one of the infants at Bethlehem when Herod slew the children, that his mother hid him under a fig tree (Jn 1^{48}), and that he escaped to Tekoa. In the 12th cent. John of Würzburg and Fetellus state that the tomb of Amos was shown there, the latter adding, 'From its confines Habakkuk was borne by the angel to Babylon. In Thecua many of the prophets used to meet together to discuss divine things.' Isaac Chelo (A.D. 1134) speaks of the tomb of Amos as being in a cave at this place. From William of Tyre we learn that in A.D. 1144 queen Melesinda gave the spot to the canons of the Holy Sepulchre in exchange for property at Bethany.

The ancient name *Tekûa* still clings to the site (Robinson, *Pal.* ii. 406 ff.; Guérin, *Judée*, iii. 141 ff.). In the neighbourhood large flocks of sheep and goats, together with a few oxen, are pastured by Arabs, genuine representatives of the nomads who dwelt there in ancient days. On the level ground immediately near the hill corn is grown. The shepherds use for sheep-cotes the numerous caves with which the mountains are honeycombed. On the broad summit of the hill of Tekoa there are ruins which cover a space of four or five acres. They 'consist chiefly of the foundations of houses constructed of large hewn stones, some of them bevelled. At the N.E are the remains of a square tower, occupying a very commanding position; and near the middle of the site are the ruins of a Greek church, with several broken columns and an octagonal baptismal font of rose-coloured limestone, 5 ft. diam. on the outside, 4 on the inside, and 3 ft. 9 in. deep. There are also many cisterns excavated in the rock.' The view of the font in Wilson's *Picturesque Palestine*, iii. 184, is well worth seeing.

Cyril of Alexandria asserts that the Tekoa of Amos was an Ephraimite, not a Judæan city. The author of the *Lives of the Prophets* says that it was in the tribe of Zebulun—probably a mistake for Simeon, since Simeon bordered closely on Judah. Abarbanel and Kimchi place it in the tribe of Asher. But there is not a particle of real evidence in favour of a second Tekoa.

Tekoite.—A native or inhabitant of Tekoa. The adjective is used three times in the singular number (2 S 23^{26}, 1 Ch 11^{28} 27^{9}) of one of David's mighty men, Ira, the son of Ikkesh the Tekoite. In 2 S $14^{4.9}$ the Heb. has the fem. form, but our versions render the expression, *'ishshâh hat-tĕḳō'îth*, by 'woman of Tekoa.' In Neh $3^{5.27}$ the plural is employed for one of the bands of volunteers who rebuilt the wall of Jerusalem under Nehemiah. It is a little doubtful whether these men actually occupied Tekoa at the time. Tekoa does not figure in the list of repeopled towns given in Ezr 2; they may have been simply 'a clan of fellow-townsmen who had held together during the Exile, and were known by this name after they had settled in Jerusalem.' In any case their public-spirited zeal (v.^{27}) sheds lustre on the name.

J. TAYLOR.

TEKOAH.—This is the AV form in 2 S $14^{2.4.9}$ for Tekoa, and is retained by RV in 1 Mac 9^{33} in the expression 'wilderness of Tekoah.'

TEL-ABIB (תֵּל אָבִיב, perh. 'hill of corn,' but see Del. *Heb. Lang.* 16; *μετέωρος*; *ad acervum novarum frugum*).—A place on the Chebar (Ezk 3^{15}), —one of the rivers or canals in Babylonia. The site is unknown. The LXX and Vulgate have translated the term as if it were not a proper name.

C. W. WILSON.

TELAH (תֶּלַח; B Θάλεες, A Θάλε, Luc. Θάλα).—An Ephraimite, 1 Ch 7^{25}.

TELAIM (הַטְּלָאִים 'the lambs'; ἐν Γαλγάλοις; *quasi agnos*).—The place at which Saul concentrated his forces, and numbered his fighting men before his campaign against the Amalekites (1 S 15^{4}). The LXX reads Gilgal for Telaim, and Josephus (*Ant.* VI. vii. 2) also makes Gilgal the place of assembly. Gilgal, however, though so frequently mentioned in connexion with the history of Saul, would be an inconvenient mustering-place for a force about to operate against the Amalekites in the desert S. of Palestine. Still it is possible that Saul may have started from the sanctuary to which he returned with his prisoner and booty. A more suitable locality for the place of assembly would, however, be in the Negeb, or South; and here lay **Telem** (Jos 15^{24}), with which Telaim is probably identical. So Wellhausen, Driver, and Budde, who prefer to point טֶלָאִם. Wellhausen reads טֶלֶם also in 1 S 15^{7} for חֲוִילָה. The same reading should also probably be found in 1 S 27^{8} (see Wellh. and Driver, *ad loc.*, and Hommel, *AHT* 243).

C. W. WILSON.

TELASSAR (תְּלַאשָּׂר 2 K 19^{12}, תְּלַשָּׂר Is 37^{12} 'hill of Asshur'; B Θαεσθέν, A Θαλασσάρ; *Thelassar*, *Thalassar*).—A town, inhabited by 'the children of Eden' (see EDEN), which had been conquered by Sennacherib's forefathers, and was in the possession of the Assyrians during that monarch's reign (2 K 19^{12}, Is 37^{12}). It is mentioned with Gozan, Haran, and Rezeph—places in Western Mesopotamia. In this direction lay Beth-Eden, or *Bit-'Adini* (see art. EDEN, vol. i. p. 642^{b}), a district between the Euphrates and the Belik. It probably stretched along both banks of the Euphrates, between *Balis* and *Birejik*. In the inscriptions, Gozan, Haran, Rezeph, and Bît-'Adini are stated to have been destroyed by Sennacherib's forefathers—a fact which harmonizes well with what is said in 2 Kings and Isaiah (Schrader, *KAT*^{2} 327). A place of this name (*Til-Aššuri*) is mentioned by Tiglath-pileser III. (Ann. 176, ed. Rost, cf. Nimr. ii. *a* 23); but this seems to have been in Babylonia. The name is, however, as Schrader remarks, one that might have been given to any place at which a temple had been built to Asshur; and the *Til-Aššuri*, which Esarhaddon speaks of having conquered (*KIB* ii. 219), near the land of the Mitanni, as Del. (*Parad.* 364) remarks, suits better.

C. W. WILSON.

TELEM (טֶלֶם; B Τέλημ, Aא Τέλλημ).—A gatekeeper who had married a foreign wife, Ezr 10^{24}; called in 1 Es 9^{25} **Tolbanes**; perhaps the same as **Talmon** of Neh 12^{25}.

TELEM (טֶלֶם 'oppression'; B Μαινάμ, A Τέλεμ; *Telem*).—One of the uttermost cities of Judah towards the border of Edom in the South, or Negeb (Jos 15^{24}). It is mentioned between Ziph and Bealoth, and may be the same place as **Telaim** (1 S 15^{4}). In the LXX reading of 2 S 3^{12}, Abner is said to have sent messengers to Thelam (*Θαιλάμ*), where David was; and, if this reading be correct, Telem or Telaim was probably intended. The site has not been recovered, but a trace of the name seems to linger in that of the Dhallâm Arabs who occupy the country S. of Moladah (*Tell Milh*). According to Schwarz (*HL* 71), who places Telem N. of Moladah, the whole district is called *Toulam*. Telem is probably the Talmia of the Talmud (Neubauer, *Géog. du Talm.* 121). A position to the S. of *Tell Milh* would meet the requirements of all the above passages. See, further, TELAIM.

C. W. WILSON.

TEL-HARSHA (תֵּל חַרְשָׁא 'hill of the wood'; B *Θααρησά*, *Ἀρησά*, A *Θελαρησά*, *Θελαρσά*; *Thelharsa*).—A Babylonian town, of unknown site, from which some of the Jews, who 'could not show their fathers' houses, and their seed, whether they were of Israel,' returned to Judæa after the Captivity (Ezr 2^{59}, Neh 7^{61}). In 1 Es 5^{36} the name is written **Thelersas**.

C. W. WILSON.

TELL.—See TALE.

TELMELAH (תֵּל מֶלַח 'hill of salt'; B *Θερμέλεθ*, *Θελμέλεθ*, A *Θελμέχελ*, *Θελμέλεχ*; *Thelmala*).—A Babylonian town, of unknown site, which is mentioned with Tel-harsha and Cherub (Ezr 2^{59}, Neh 7^{61}). In 1 Es 5^{36} it is written **Thermeleth**.

C. W. WILSON.

TEMA (תֵּימָא 'on the right,' 'south'; *Θαιμάν*, *Θημάν*; *Thema*).—A tribe of Ishmaelite Arabs, and a place or district in Arabia, which took their name from Tema, one of the twelve sons of Ishmael (Gn 25^{15}, 1 Ch 1^{30}, Is 21^{14}). The people were leaders of caravans, or camel-men, and their encampments were apparently on a caravan-route which would be followed by fugitives from Dedan (Job 6^{19}, Is 21$^{13.14}$). According to some authorities, the passage in Job refers to 'caravans crossing the desert in the dry season; pressing forward to look for water in the winter torrents, and finding none. Their disappointment is a lively image of the experience of Job when he looked for sympathy from his brethren' (Smith, *DB*, Amer. ed., note to TEMA). In Jer 25^{23} Tema is mentioned with Dedan and Buz, and it may be inferred from Is 21$^{13.14}$ that it was E. of the former place. Ptolemy (v. xix. 6) mentions a town called *Themma* (*Θέμμη*) in the Arabian desert; and, according to Schrader (*KAT*^{2} 149), Tema is the *Timai* of Tiglath-pileser II., mentioned in conjunction with the *Mas'ai* (the Massa of Gn 25^{14}).

Tema is now *Teimâ*, a well-known place in N. Arabia, about 40 miles S. of *Dumat el-Jendel* (Dumah), and on an old route from the Gulf of 'Akabah to the Persian Gulf. The ancient city was enclosed by a stone wall about 3 miles in circuit, and there are still remains of this, and of some great rude stone buildings. *Teimâ* is described as 'a tall island of palms enclosed by long clay orchard walls, fortified with high towers.' The houses are low buildings of mud or clay (Doughty, *Travels*, i. 285). The Aramaic inscriptions discovered by Euting at Teima prove it to have been the seat of an ancient civilization (see *Sitzungsber. der Berl. Akad. der Wissensch.*, 1884, p. 813 ff.; and cf. *Studia Bibl.* i.). The LXX reading, followed by Eusebius and Jerome (*Onom.*), apparently connects Tema with Teman.

LITERATURE.—Dillmann on the passages above cited in *Genesis*, *Isaiah*, and *Job*; *Sitzungsber. d. Berl. Akad.*, 1884, p. 813 ff.; Euting, *Nabat. Inschr.* 9 ff.; Buhl's *Gesenius*, *s.v.*

C. W. WILSON.

TEMAH (תֶּמַח: AV Tamah is due to the occurrence of the word in pausal form תָּמַח).—The eponym of a family of Nethinim, Ezr 2^{53} (BA *Θέμα*, Luc. *Θεμαά*) = Neh 7^{55} (B *Ἡμαθ*, A *Θήμα*, Luc. *Θεμαά*).

TEMAN (תֵּימָן 'on the right,' 'south'; *Θαιμάν*; *Theman*).—A district, and perhaps also a town, which received its name from, or gave it to, a grandson of Esau, who was one of the 'dukes' of Edom (Gn 36$^{11.15.42}$, 1 Ch 1$^{36.53}$). Teman was one of the most important districts in Edom. From it ('the land of the **Temanites**,' Gn 36$^{34.35}$) came one of the early kings of Edom; and it is sometimes used poetically for Edom. The name is apparently used in its wider sense for Edom in Am 1^{12} (cf. Am 2$^{2.5}$, where the country and its chief town are connected); in Ob^{9} (cf. 'the mighty men of Edom' in Jer 49^{22}); in the poetical parallel (Jer 49^{20}), where the inhabitants of Teman are those of Edom; in Hab 3^{3}, where Teman stands for Edom, as Seir does in Dt 33^{2}; and in Bar 3$^{22.23}$. In its narrower sense the name occurs in Gn 36$^{34.35}$, Job 2^{11} 4^{1} 15^{1} 22^{1} 42^{9}, Ezk 25^{13}, and perhaps also in Jer 49^{7}. The Temanites were pre-eminent for their wisdom (Jer., Ob., Bar., as quoted above); and it was fitting that ELIPHAZ, one of the wise men of Teman, should be the chief of the three friends of Job.

The name of Teman has not been recovered, and its position is uncertain. A district in the N. of Edom seems to be implied in Ezk 25^{13} 'from Teman even unto Dedan,' and in Am 1^{12} it is mentioned with Bozrah (*el-Buseireh*); but, on the other hand, it is connected with the Red Sea in Jer 49$^{20.21}$. Eusebius states (*Onom.*) that, in his day, Teman was a town 15 (Jerome 5) Roman miles from Petra, and a Roman post; but he does not give the direction. No trace of this place has been found, but it was probably on the road from Elath to Bozrah.

LITERATURE.—Dillmann on Gn 36^{11} and Job 2^{11}; Driver on Am 1^{12}; Wetzstein, *Ztschr. f. allgem. Erdkunde*, xviii. 52 f.

C. W. WILSON.

TEMENI (תֵּימְנִי, Baer תֵּימָנִי [cf. Kittel, *SBOT*, 'Chronicles,' p. 52]; BA *Θαιμάν*, Luc. *Θαιμανεί*).—The 'son' of Ashhur, 1 Ch 4^{6}.

TEMPERANCE.—The Eng. word 'temperance' occurs in Scripture only in the NT; but the idea of temperance, *i.e.* **self-control**, pervades the OT as well as the Scriptures of the Christian period, and the duty of realizing it is strongly insisted on throughout the Bible. The legal regulations about clean and unclean foods required self-restraint in the matter of diet. The Wisdom literature dealing especially with practical conduct is explicit and urgent on the duty of self-control. This is prominent in the Bk. of Proverbs, as in the sayings concerning *eating*—'When thou sittest to eat with a ruler, consider diligently what (or who) is before thee; and put a knife to thy throat, if thou be a man given to appetite' (Pr 23$^{1.2}$); *wine-drinking*—'Look not upon the wine when it is red,' etc. (v.^{31}); *licentiousness*—the laws against adultery, the frequent warnings in Prov. against 'the strange woman'; *anger*—'He that is slow to anger is better than the mighty; and he that ruleth his spirit than he that taketh a city' (16^{32}); *revenge*—'Rejoice not when thine enemy falleth' (Pr 24^{17}); and elsewhere *greed of wealth*—'Thou shalt not covet' (Ex 20^{17}); 'Woe unto them that join house to house,' etc. (Is 5^{8}). A specific self-restraint was put upon the Nazirites (see NAZIRITE), and a similar self-restraint was practised by the Rechabites (see RECHABITES); and certain forms of abstinence were required by the Law in all the Jews, as at fasts (see FASTING), and previous to solemn religious services (Ex 19^{15}). The religious life of the OT saint was not ascetic, but it was simple and free from the excesses of paganism. While the Israelite was encouraged to receive the gifts of God with thankfulness, and to use them without fear of any Nemesis on his prosperity, he was not to plunge into reckless self-indulgence. Solomon's luxurious living is not Israelite, but a result of the importation of foreign manners. Baal-worship was denounced for its licentiousness as well as for its idolatry, and the unfaithfulness to Jehovah it involved on the part of the Israelites. The prophets repeatedly denounce the luxurious living of the wealthy, and the growth of self-indulgence generally, as foreign to the rigour of righteousness, and certain to bring ruin on a nation (*e.g.* Am 4^1 6^{1-6}, Is 3^{17-24} $5^{11.12}$).

When we come to the NT treatment of this subject, we have the description of John the Baptist in his rough dress and simple fare, feeding on the native products of the wilderness (Mk 1^6), whom our Lord contrasts with those who 'wear soft raiment,' and 'are in kings' houses' (Mt 11^8). But the supreme example of temperance is afforded by the life of Jesus Christ. That was not ascetic; the charge of gluttony and wine-bibbing was brought against our Lord by malignant slanderers because He did not practise asceticism. And yet the extreme simplicity of His living, the many hardships He voluntarily endured, and His complete unconcern with regard to His own comforts, as well as His perfect freedom from all forms of sin and selfishness, show Him to us as one who lived the ideal life of temperance, avoiding excess and extravagance in all directions. This was the method of life He inculcated on His disciples. There is no passage in His teaching requiring asceticism, and no direct commendation of fasting (the word 'fasting' is omitted in RV of Mk 9^{29} and the parallel Mt 17^{21} in accordance with best MSS); but there is much urgent dissuasion from the life of ease and self-indulgence. The disciple of Christ is required to hold his thoughts as well as his words and actions under control (*e.g.* Mt $5^{21.22.27.28}$). In the parable of the Rich Man and Lazarus the self-indulgence of the former, while he ignores the sufferer at his gate, aggravates his guilt. The Gr. word for 'temperance,' ἐγκράτεια, and its verbal form, ἐγκρατεύομαι, are found in the NT only in Acts (there ascribed to St. Paul), St. Paul's Epistles, and 2 Peter. Derived from κράτος, 'strong,' they indicate the strength a man uses towards himself in self-control. St. Paul makes temperance one of the subjects of his very personal address to Felix (Ac 24^{25}); and elsewhere brings it forward as one of the fruits of the spirit (Gal 5^{23}). Using the verbal form of the same word, he appeals to the analogy of the athlete whose training involves universal self-restraint (1 Co 9^{25}). The virtue is one of the requisites for a bishop (Tit 1^8). In 2 P 1^6 it appears in an ascending series of commended attainments, following knowledge and preceding godliness.

See also art. SOBER. W. F. ADENEY.

TEMPLE (A.S. *tempel*, from Lat. *templum*, a space marked out; a sanctuary: cf. τέμενος [from τέμνω, 'to cut'], a piece of land cut off from the rest and dedicated to a god).—In the EV 'temple' renders the Hebrew words:—הֵיכָל (*hêkāl*, in a narrower sense the Holy Place) and בַּיִת ('house,' including *hêkāl* and *dĕbîr* דְּבִיר, or Most Holy Place). Three Gr. words are tr. 'temple' in the NT: ἱερόν (more correctly the whole of the sacred enclosure), ναός (strictly the sanctuary or sacred edifice alone, embracing *hêkāl* and *dĕbîr*), οἶκος.

i. *SOLOMON'S BUILDINGS.*—The pile or series of edifices of which the Temple formed one part,[α] embraced in addition the king's house,[β] the porch of pillars,[γ] the throne porch,[δ] the house for Pharaoh's daughter now married to Solomon,[ε] the king's dwelling, and the *ḥaram*. The following is

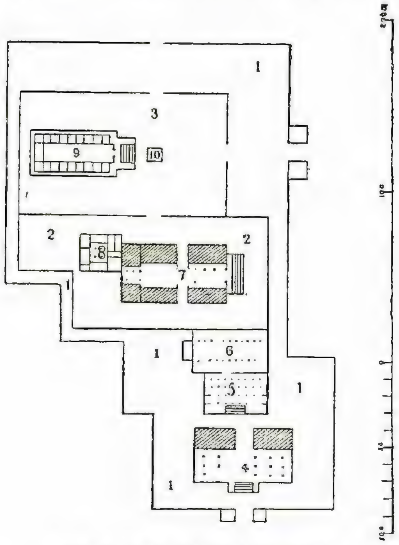

FIG. 1.—PLAN OF ROYAL BUILDINGS.

1. The great court. 2. The 'other' or middle court. 3. The inner (or temple) court. 4. House of Lebanon. 5. Porch of pillars. 6. Throne porch. 7. Royal palace. 8. Ḥaram. 9. Temple. 10. Altar.

Stade's[ζ] plan of the royal buildings as slightly simplified by Benzinger in his *Heb. Arch.*[η] and in his Com. on *Kings*.[θ]

The above plan takes for granted that the pile of buildings formed a complete whole. There was one 'great court' (1) which surrounded the whole. The 'other court' (2) encompassed the king's palace[ι] and *ḥaram*;[κ] in 2 K 20^4 it is called the 'middle court,' because it lay between the inner or temple court and the southernmost buildings (Lebanon house, etc.). The 'inner court'[λ] (3) was that which contained the temple and its belongings: 'inner' not in contrast with an outer court of the temple (of such a court Solomon's temple knows nothing), but as distinguished from the 'greater court,' which contained within it all the royal buildings. Apart from the description in 1 K 5-7, Ezk 43^8[μ] makes it exceedingly likely that the whole of these buildings were together, making one whole.

On the other hand, Thenius,[ν] Furrer,[ξ] and others place the temple on the east hill, but the other royal buildings on the modern Mount Zion and the *ḥaram* hill, between which two

---

[α] But to the author, or at all events the editor, of even Kings the temple was the principal building of the group, if not the final cause of the whole.

[β] 1 K 7^2 'House of the forest of Lebanon,' so called on account of the cedar wood used in its construction and the piles upon which it rested. J. D. Michaelis, Dathe, Iken (*Dissert. Philolog.* i. diss.), and Hamelsfeld (*Bibl. Geog.* i. p. 338) hold that the house in question was a summer residence for king Solomon built on Lebanon or at the foot of it. Dathe refers for support to 1 K 9^{19}, 2 Ch 8^6. But the fact that Solomon deposited the golden shields in the house (see 9^{19}) shows that the house was close to Jerusalem. Besides, we never read of Solomon's having more than one palace.

[γ] 1 K 7^6.

[δ] 1 K 7^7.

[ε] 1 K 7^8.

[ζ] *Gesch.* i. 315.

[θ] p. 26.

[ι] 1 K $7^{10.12}$.

[κ] 1 K 7^8.

[λ] 1 K 6^{36}.

[μ] 'They (the children of Israel) shall no more defile my name . . . in their setting of their thresholds by my thresholds, and their posts by my posts, and the walls between me and them.'

[ν] On *Kings*; see his plan, Tafel i.

[ξ] Schenkel, iii. p. 222 ff.

hills the Tyropœon valley is situated. But the references we have are wholly opposed to this, as is also the probability that the king would have his palace erected in closer proximity to the royal sanctuary.

In 1 K $6^{2\text{ff.}}$ we read of the building of the temple. V.^{36} tells us of an inner court, meaning clearly the court which enclosed the temple area and was itself included in the great court,[α] which had in it the whole complex of royal buildings, sacred and secular. The passage in Ezekiel[β] already noted makes this arrangement still more likely.

The eastern hill on which the royal buildings were erected is that which is known in the OT as ZION and also as MORIAH. The modern fiction, which fixes Zion on the hill west of the Cheesemongers' (=Tyropœon) valley, has nothing to support it except tradition. It has against it topographical and historical considerations which are overwhelming.[γ] Had the buildings been extended to a west hill, substructions of a deeper and more expensive character would have been necessary.

Relative positions of the Royal Buildings at Jerusalem.—Assuming that the royal buildings were all of them on the eastern hill, how were they relatively situated? The temple must have been either north or south of the other buildings, as the distance between the Tyropœon and the eastern declivities was too small to allow of its being on the east or west. It is exceedingly likely that it was on the north, and therefore on higher ground. From 2 K 11^{19}, Jer 22^{1} it follows that the way from the temple to the palace was a descent. On the other hand, in 1 K 8^{1} 9^{24}, Jer 26^{10} it is equally implied that it was an ascent from the palace to the temple. In these passages it is taken for granted that the temple was in proximity to the other royal buildings. When Jeremiah was arrested for foretelling the destruction of the temple, the princes were *at once* upon the scene and constituted themselves into a body of magistrates to deal with the matter[δ]—an incident illustrating the closeness of their residences to the sanctuary. Probably the southern wall of the temple was also the northern wall of the 'other' or 'middle' court, a gate leading from one into the other.[ε]

If we can fix the position of the altar of burnt-offering, we can locate at once the main parts of the temple and also the other royal buildings. There is good reason for believing that the *sakhra* or rock under the dome of the mosque of Omar is the spot where the altar in question stood. A very old tradition connects with this spot the incident in which Abraham prepared to offer Isaac, as also the threshing-floor of Araunah the Jebusite. It was on this threshing-floor that the destroying angel stood when Jehovah stopped him in his work of destroying the people.[ζ] Even if these associations with the place are imaginary, yet they show that it was a sacred spot from very primitive times, and in the conservative East there is but little change in roads or towns or sanctuaries. Solomon would be very likely to erect his chapel close to some spot where a Divine manifestation had been made or some altar had been raised.

The form of the stone gives good reason for concluding that it was that on which the sacrifices were offered. It is a huge limestone rock, measuring some 60 by 50 ft., standing above the marble pavement about 5 ft. On its top there is an opening, through which the blood of the victims sacrificed could pass. Lower down there is an open cave in the same rock, at the bottom of which the stones make a hollow sound when struck. This, with other indications, makes it very probable that there was an opening at the bottom through which the blood passed, this opening leading into a subterranean passage which continued its way to the Kidron Valley. This agrees with what the Mishna says,[η] that under the altar of burnt-offering there was a conduit by means of which the blood of the victim flowed into the valley of the Kidron.

Close to the *sakhra* or rock there were formerly two fountains, one of them still sending up fresh and beautiful water. The natives say the water of this last is very putrid, but Pierotti tasted it and found they were wrong. He was of opinion that the water had the name of being filthy on account of its long-time association with the sacrificial blood which mingled with it.[θ]

Nowack[ι] thinks that, probably, the sacrificial blood after passing into the aperture at the bottom of the cave joined the waters of that 'fountain which flowed fast by the oracle of God,'[κ] and fell with them into the eastern valley, joining ultimately the Kidron.[λ]

The altar was rough and in its natural stone, which meets the requirement of Ex $20^{24\text{f.}}$,[μ] that the altar should be either of earth or of unhewn stone. Moreover, there were to be no steps going up to the altar,[ν]—a condition also satisfied by this rock, supposing it to be the altar of Solomon's temple. This last is, however, but twice named in Kings[α] and only once in Chronicles;[β] in all these three instances the altar is described as brazen; besides the size which the Chronicler gives,[γ] that is all we are told of the altar of burnt-offering of Solomon's temple. Nowack, indeed, completes the picture from the fuller description of Ezekiel's temple,[δ] but with questionable justification. It is likely enough that the adjective 'brazen' is a later addition, and that the altar of the first temple was one of unhewn stone. If this stone had not all along occupied a very important place in popular esteem, it could not have been tolerated, but it would many centuries before have been levelled to the ground.

Since the temple and its courts were arranged in terraces, the house itself, together with the altar, must have stood on the highest platform: this is true of the ground on which the rock rests.

Among leading authorities who have held that the altar was at the present *sakhra*, the following may be named:—Williams,[ε] Tobler, Furrer, Pierotti,[ζ] Stade,[η] Benzinger,[θ] and Nowack.[ι] Sir Charles Warren puts the altar just a little to the south of the rock, but quite close to it.[κ] If the *sakhra* marks the site of the altar,[λ] the house must have been to the west,[μ] the inner or temple court[ν] east, west, south, and north, while the remaining structures built on the hill would lie towards the south.

In order to make the rock-crowned Moriah fit for building upon, the rocky surface would have to be levelled—the *sakhra* being left as it was—and the parts lower down raised to be as high as the rest. Subterranean passages and rooms were erected, 'hewn stones,' 'costly stones,' 'great stones' being used, large quantities of earth being thrown in to fill up the intervening spaces.[ξ] There are to be seen at the present time remains of these underground buildings.[ο]

All agree that somewhere on the modern *Ḥaram esh-Sherif* the temple was built; but this area is a quadrangle of unequal sides. Its west side measures 1590 ft., its east 1525 ft. The north and south sides are 1036 and 921 ft. respectively. It is impossible that the temple enclosure included the whole of this space, though de Vogüé, de Saulcy, Sir Henry James, and Sepp maintain that Herod's temple, with its courts and enclosures, did cover the Ḥaram surface. German and French writers almost to a man, and the majority of English and American authorities, unite in holding that the temple building proper stood west of the rock as advocated above, and that with its adjuncts it covered about 600 ft. east to west and 400 ft. north to south.

A number of English writers have followed Fergusson[π] in maintaining that the temple occupied a square of some 600 ft. at the S.W. angle of the Ḥaram (so Thrupp, Lewin,[ρ] and W. R. Smith[ϛ]). Fergusson was led to this view by architectural considerations, and especially by his acceptance of the Mosque of Omar site for the Church of the Holy Sepulchre. W. R. Smith states succinctly what is to be said for this opinion, but there does not seem much inclination on the part of students of the subject to accept it. Indeed, but for the necessity to support a foregone conclusion, Fergusson would hardly have hit upon this site for the temple at all.

Sources.—Our original sources for the history and description of Solomon's temple are threefold. (1) We have what is said in 1 K 6. 7, which leaves out much that is absolutely necessary to make a complete picture. Many technical terms are used, the meaning of which it is beyond our power to elucidate with any feeling of confidence. Moreover, the text is exceedingly corrupt and defective, so that conjectural emendation and addition have to be constantly employed. Böttcher in his *Aehrenlese*, Thenius in his Commentary, and especially Stade in his *ZATW* iii., have made praiseworthy attempts to supply the student with a correct text. (2) We have, further, the parallel history in 2 Ch 2^{1}–5^{5}; but that the history in this book, however sincere and pious, is constructed from the point of

view of a Jerusalem Levite of the time after the Exile, and represents events as they were *regarded* and not as they *were*, any one who compares Kings and Chronicles, and considers the history of religious thought and institutions among the Israelites, may see. Chronicles aims at glorifying David as the founder of the kingdom and of the religious society, especially of the priesthood and the psalmody. According to the Chronicler, David received from God a detailed plan of the temple,[α] and gathered together materials, especially gold, silver, copper, and iron,[β] for the building. Kings gives a fuller account, but leaves out this and similar things. (3) The temple of Ezekiel's vision[γ] must have been more or less suggested by the temple which he actually saw; and from its elaborate description one may, to a certain extent, fill in the omissions in the shorter description of Solomon's temple; only, it is to be considered that the temple which the prophet saw on the banks of the Chebar is as symmetrical as imagination unhampered by fact could make it. The text of Ezekiel is also corrupt; but Böttcher in his *Proben Alttest. Schrifterklärung*, Smend, Bertholet, and especially Cornill, in their Commentaries, have done much to obviate this difficulty.—We have secondary sources in Josephus[δ] and the Mishnic tract *Middoth*, but these are valuable chiefly for Herod's temple; for, even when describing the temples of Solomon, Ezekiel, and Zerubbabel, it is Herod's which they have in mind. Josephus has also a strong passion for exaggeration, especially when the glory of the temple is concerned. In matters of size and measurement his imagination seems almost as free as was Ezekiel's.[ε]

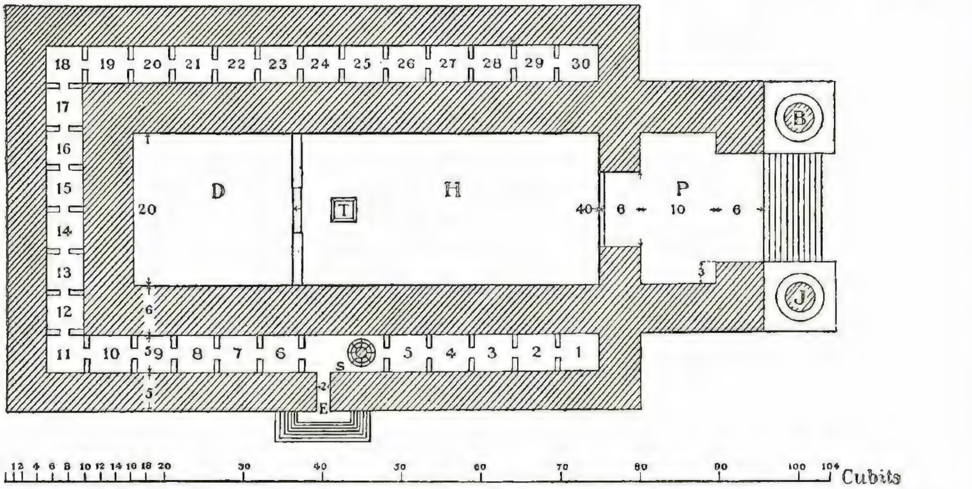

FIG. 2.—GROUND PLAN OF SOLOMON'S TEMPLE.

B and J=Boaz and Jachin—the pillars. P=the porch. H=the *hêkāl* or Holy Place. D=the *dĕbîr* or Most Holy Place. T=the table of shewbread. S=the stairway to the upper chambers. E=entrance to the chambers. 1, 2, etc., the chambers after Ezekiel's temple.

1. PLAN AND DIMENSIONS OF SOLOMON'S TEMPLE.—Fergusson[ζ] says that the temple of Solomon was a copy of the tabernacle, the dimensions of the latter being doubled, and such other changes made as were necessary in a fixed as compared with a portable structure. But the resemblances so often, especially in former times, pointed out, are accompanied by differences of an important character—as in the porch, the two pillars Boaz and Jachin, the altar, the chambers, etc. This supposed connexion has led to many wrong results as to the dimensions of the first temple; as in the height of the building, which, because stated to be 30 cubits, *i.e.* thrice, not twice, that of the tabernacle, is made to refer to the exterior, not to the interior, though the other measurements are admitted to be internal. But the assumption of Fergusson, based on the oldest authorities, falls to the ground when it is remembered that the tabernacle in question had no actual existence at any time, and no existence in thought until about the time of the Exile. It would be far nearer the truth to say that the tabernacle is itself modelled upon the second temple, than to say that the first temple was modelled on the tabernacle. See TABERNACLE.

The temple of Solomon included the house and the court which surrounded and enclosed house, altar, and other belongings.

The 'house' was a rectangular building 60 cubits long (east to west), 20 cubits broad, and 30 cubits high.[α] These are inside measurements, as the account of the *dĕbîr*, or Holy of Holies, in 1 K 6^{16a} (cf. v.^{20}) shows, and as the temple of Ezekiel suggests. But no allowance is made for the wall separating the *hêkāl*, or Holy Place, from the *dĕbîr*, which in Ezekiel's temple was 6 cubits thick.[β] The building looked towards the east. It is of course quite possible that this arrangement may have been due to the form of the hill, which made it much more suitable to build west to east than north to south.

The sanctuary structure.—The temple building had three parts, or rather two and a porch which is not reckoned as a portion of the house. The arrangement and number of the chambers is conjectural, being based on what we know of Ezekiel's temple.

The larger of the two parts of the house is the *hêkāl*,[γ] the *dĕbîr*[δ] being the smaller. The *hêkāl*

[α] 1 Ch 28^{11-19}. [β] 1 Ch 22^{14}.

[γ] Ezk 40–42 and in part 43 and 46.

[δ] *Ant.* VIII. iii., XV. xi. 3 ff.; *BJ* V. v. 1–6.

[ε] See Robinson's *BRP*^{2} i. 277 f.

[ζ] *Early Temples of the Jews*, p. 26 ff.

[α] 1 K 6^2 ‖ 2 Ch 3^3. The latter passage does not give the height.

[β] Ezk 41^5.

[γ] *Hêkāl* (הֵיכָל) is probably the same as the Accadian *e-gal*, 'great house,' as Schrader, Haupt, and most Assyriologists hold. It may mean properly a *hall* (*AJSL*, July 1901, p. 244 ff.). See the *Oxf. Heb. Lex.* on the word. Though used in other senses, its commonest meaning is that of the Holy Place (קֹדֶשׁ), which is the later term. In this article *hêkāl* has always this meaning.

[δ] *Dĕbîr* (דְּבִיר) is the term employed in Kings for what in the parallel parts of Chron. is often called 'Holy of Holies' (קֹדֶשׁ

was an oblong rectangle 40 cubits from west to east, and 20 cubits from north to south. The *dĕbîr* was a cube measuring 20 cubits in all three directions. Since the whole house was 30 cubits high—the house (הַבַּיִת) including *hêkāl* and *dĕbîr*—there must have been 10 cubits of space-room on the top of the *dĕbîr*, this being used probably for storing purposes, though Ewald says it was inaccessible and empty.

Stieglitz and Grüneisen view the *dĕbîr* as externally lower than the *hêkāl* by 10 cubits, but 1 K 6^{2} says the whole house had a height of 30 cubits. Kurtz and Merx held that the *hêkāl* had an inside height of 20 cubits only, and that on the top of the whole house there was an upper room, 60 cubits in length, for keeping the relics of the tabernacle.[α] They say further that the Chronicler means this upper space by his הָעֲלִיּוֹת (LXX τὸ ὑπερῷον). But how could such an upper chamber be reached, and why do we never read about it or about the means of getting at it? The chambers about the house[β] reached, taking the three storeys together, to 15 cubits. Above these were the windows;[γ] but there would be scant room for the windows between the roofs of the chambers and the ceiling of the house if the latter were but 20 cubits above the floor. The Chronicler does not say where his עֲלִיּוֹת were placed, and it is most probable that by them we are to understand the צְלָעִים, or the chambers ranged along the three sides of the house.

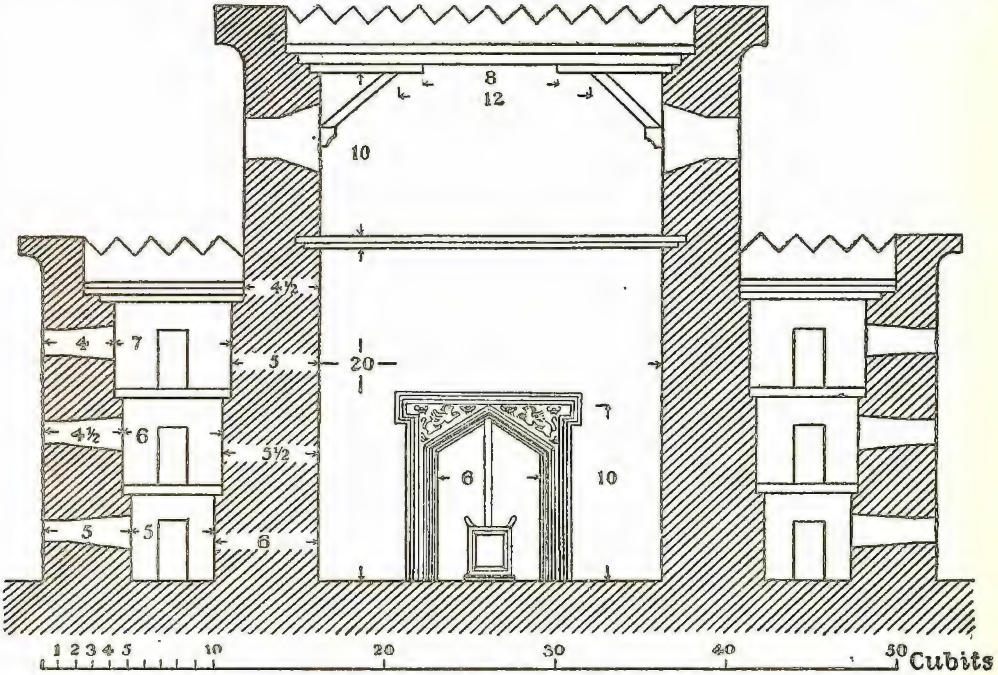

FIG. 3.—SECTION OF THE TEMPLE, NORTH TO SOUTH.

The porch.—In front of the house and continuous with it—the two, indeed, forming one building—was the porch,[δ] which was not considered a part of the house. Its length,[ε] east to west, was 10 cubits; its breadth, north to south, being the same as the breadth[ε] of the house, viz. 20 cubits. Not a word is said in Kings about the height of the porch, but in 2 Ch 3^{4} it is said to be 120 cubits. But such a structure would have been called a מִגְדָּל (tower) and not a אוּלָם (porch). The proportions, 20, 10, 120, are impossible on both æsthetic and statical grounds. There is certainly a corruption of the text, or we have another example—a gross one here—of the love of exaggeration to which the Chronicler is prone when describing the sanctuary and its worship. It is most natural to think of the porch as having the same height as the house; and it is not stated in 1 K 6, because that would be inferred by the reader.

Walls.—There is no information given as to the thickness of the walls, but it must have been substantial, because they had rebatements of a cubit, or at least of half a cubit, at each successive storey of chambers.[α] It could be diminished therefore by 2 cubits, or at least by one, without any material change in the appearance. Ezekiel gives the thickness of the walls of his temple as 6 cubits.[β]

In 1 K 6^{18} the cedar-covered walls are said to have figures carved on them of knops and open flowers; but this verse is not in the LXX, and it breaks in upon the account of the *hêkāl* in v.^{17} and of the *dĕbîr* in v.^{19}, besides repeating what has been said in v.^{15}. Probably this carving was the work of a later king, a later editor, by mistake, ascribing it to Solomon. Yet in v.^{35} the doors of both *hêkāl* and *dĕbîr* are said to have been adorned with figures of cherubim, palm trees, and open flowers; and the verse is above suspicion.

Roofing.—Very little is told us concerning the roof of the house. 1 K 6^{9b}[γ] is made by Bähr, Keil, Thenius, in their Comm. and Treatises, as also by the Targ., Pesh., Vulg., and Arabic versions, to refer to the covering of the roof. But Benzinger and the LXX take it to mean the covering or wainscotting of the walls; and 1 K 7^{7}[δ] shows that the same verb certainly can be used of the walls,

---

הַקֳּדָשִׁים). Jerome connected the word with the Hebrew דִּבֵּר (*dibber*) 'to speak,' and followed the LXX χρηματιστήριον in rendering it *oraculum* (*oraculi sedes*). It is really derived from the root still used in Arab., دبر (V) 'to be behind.' So *dĕbîr* דְּבִיר=what is behind; that is, what lies to the west, the east being called קֶדֶם, or what lies to the front, just as the south is the right-hand side (יְמִינִי) and the north the left-handed (שְׂמֹאל). *Dĕbîr* is the older term, and in the LXX of 1 Kings and in 2 Ch 3^{15} 4^{20} $5^{6.8}$ it is simply transliterated δαβείρ and δαβίρ. *Dĕbîr* occurs also in Ps 28^{2}, prob. also 2 K 10^{25} (for עִיר).

[α] 2 Ch 3^{9}.

[β] See below.

[γ] 1 K 6^{4}.

[δ] אוּלָם (*'ûlām*).

[ε] In the OT, length and breadth, when used of a surface of two dimensions, mean the greater and smaller measurement respectively.

[α] 1 K 6^{6}.

[β] Ezk 41^{5}.

[γ] 'He covered the house with beams and planks of cedar.'

[δ] 'And it (the throne porch) was covered with cedar from floor to floor.'

—which Thenius is inclined to deny,—and that it probably is so used in this passage. Yet, as Thenius objects, the wainscotting of the walls is described in 6^{15}. V.^{9} is otherwise awkward in its present position; and it is hard to make out the exact meaning of the technical terms translated 'beams and planks.'[α] Probably the verse is an interpolation.

1 K 6^{15}[β] in the EV has the word 'ceiling' in it. Instead of 'walls' we must read 'beams':[γ] 'from the floor of the house unto the beams of the ceiling.' We thus learn that the ceiling had cedar beams, but that is all we learn about it.

But these beams must have been covered with stone, probably the hard limestone of which the walls were built, to protect the house from the rain. In the three most rainy months there descends as much rain in Jerusalem and its neighbourhood as the average rainfall upon any similar area in Great Britain throughout the year.

Was the roof *flat* or *gable-formed*? Most certainly it was flat, as all ancient temples and houses were, and as, with hardly an exception, Eastern houses continue to be up to the present time. The custom with regard to private houses is to have a parapet all around the roof to prevent persons who are on the much-frequented roofs from falling.[δ] Certainly no other kind of roof than the flat one is hinted at anywhere in the Bible, nor is any other known in the primitive East. It is remarkable to find leading Rabbinical writers, followed by Lund,[ε] Hirt, Schnaase, Winer, and Thenius, plead that the roof was gabled. Hirt argues that there were spikes on the roof to keep off the birds, and that the roof was overlaid with gold. But he gets these, as perhaps also his gable roof, from the temple of Herod.[ζ]

Inner supports or not?—It is uncertain whether inside the house there were pillars to bear up the roof. In the *hêkāl*, at all events, it is very likely there were such supports, as the walls were 30 cubits high, and a roof of wood and of stone would be in great danger of tumbling unless there were something besides the walls to keep it up.

Fergusson[η] argues for such pillars, and he thinks there would be eight in all, four on each side of the house, one between each couple of tables and lampstands.[θ] Such an arrangement would, he thinks, promote at once architectural effect and the stability of the structure. He refers to 1 K 10^{12},[ι] but the word rendered pillars[κ] means 'support,' and the parallel word in Chron.[λ] means 'highways,' though it is rendered in EV 'terraces.' There is so much doubt as to what is meant that the passage cannot be made to carry what is put upon it.

The *material* of which the house and its appendages were built was the white hard limestone which abounds in the country, and which can be polished like marble; indeed it is a kind of marble. The slabs used were prepared at the quarry before they were brought to the temple, so that there was neither hammer nor axe nor any tool of iron heard in the house while it was in building.[μ]

The inside walls of the house were, as seen before, overlaid with cedar planks,[ν] on which were carved 'knops' and 'open flowers.' As to the gold said to cover the inside of the house,[α] see below under 'The gold covering of Solomon's temple' (p. 700^{b}).

The floor of the house was probably made of hewn stone of the same material as that of the walls. But this stone floor was covered with cypress[β] wood, as the walls were with cedar; so that nowhere inside could the stone be seen.

Chambers surrounding the house.[γ]—In every side of the house except the east there were chambers[δ] arranged in three storeys. They did not go around the porch, as Grüneisen said, for the house only is mentioned; nor were there any on the east. We are not told how thick the walls of these chambers were, how many in number the chambers were, nor is anything said of their arrangement. For such details and others see *EZEKIEL'S TEMPLE*, below. Similar side rooms have been discovered at Birs Nimroud.[ε] The beams on which the upper storeys were constructed—made, no doubt, of cedar wood—rested upon rebatements in the temple wall, so as to prevent the wall from being built into—the house being too sacred for that.[ζ] The temple wall so built would therefore, at the roof of the first chambers, according to most writers, recede half a cubit, and at the roof of the next row of chambers it would recede another half cubit. The opposite wall—that built specially for the chambers—had a corresponding rebatement. So Keil, Stade, Now., Benz., and most; and at least symmetry is secured by this arrangement. Thenius[η] and others think the whole rebatement of one cubit at each storey took place in the house wall, and it seems to the present writer that this is likeliest, as not a word is written about rebatements in the chamber wall.

The chambers on the ground were 5 cubits broad, those on the middle storey being 6, while those on the top storey were 7 cubits broad. The chambers were entered from the court on the south side through a door[θ] (Fig. 2, E). In Ezekiel's temple there were entrances on the north as well as on the south. From the lowest storey one ascended to the others by means of a ladder and trap-door, and not, as used to be thought, by means of a winding stair: of such winding stairs the ancient East was quite ignorant.[ι] The history is silent as to whether or not there were windows in these chambers. Probably, however, there were, and they would be of the same kind as those of the house. See below concerning these. The chambers seem to have been used for the storing of the furniture, vessels, and other things belonging to the temple.[κ] In them, too, were placed some relics of the wilderness worship.[λ] 1 K 8^{4}, however, has many signs of having been tampered with. Of 'Levites' as distinct from 'priests,' Kings knows nothing. Nor does Kings show acquaintance with any tent besides that built by David for the ark.[μ] 'Tent of meeting,'[ν] if genuine, must have the sense it bears in JE (Ex 33^{7}, Nu 11^{16} 12^{4}) and not in P.

Windows.—There were no windows in the

[ν] אֹהֶל מוֹעֵד.

temple as the term 'windows' is now understood. In Bible times glass was not used for what are called windows; nor is it so used at the present time in Eastern countries. Indeed the main purpose of the apertures translated 'windows' is to let impure air out and pure in, rather than to give light to the house.[α] Considering the thickness of the walls—6 cubits, or say 9 ft., in Ezekiel's temple—it would have been difficult for the light to enter. In most Eastern houses the lamps are kept burning night and day; it is by them that the house is lighted. This was true probably of the temple as well.

In 1 K 6^{4} the windows are described as *latticed*[β]—most Eastern windows are—and *beamed*:[γ] *i.e.*, besides the latticed covering, there were beams used to protect the opening and to form the framework of the window. Various other reconstructions of the windows have been suggested. The Targ., Pesh., several Rabbinical writers, Luther, and others have rendered 'windows broad within[δ] and narrow[ε] without.' Keil explains as 'windows with closed beams'; *i.e.* whose lattices cannot be opened or closed at pleasure, as the lattices of ordinary windows could.[ζ] For a statement and examination of other views see the Comm. of Thenius and Keil, and especially Keil's valuable treatise on Solomon's temple.

We know nothing about the size of the windows, nor is it stated in what part of the walls they were made. The chambers surrounding the house reached a height of 15 cubits—5 cubits being the height of each, if we are to infer from Ezekiel's temple. If, therefore, the windows of the house looked directly to the outside, they must have been some 20 cubits from the ground. It is probable that the chambers had windows as well; and in that case the house windows might have looked immediately opposite to those of the chambers, and have been put in three parallel rows. This is quite possible, as we are not told the number or the position of the windows. There was perhaps a row of windows above the chambers as well.

It is generally thought that there were no windows in the *dĕbîr*, and 1 K 8^{12}[η] has been advanced to prove this. The difficulty of having windows between the uppermost roof of the chambers and the ceiling of the *dĕbîr* is pointed out. But this difficulty is not insuperable, for, assuming the chambers, between them, to reach a height of 15 cubits, there would still be a space above of several cubits for the windows. If, however, the windows of the house looked immediately upon those of the chambers, the difficulty in question disappears.

Doors.—Both *hêkāl* and *dĕbîr* had doors.[θ] We are not told what size they were, but in Ezekiel's temple they were 10 and 6 cubits broad respectively.[ι] How high they were is not said. The *hêkāl* door was square,[κ] while that of the *dĕbîr* was pentagonal.[λ] The door of the *hêkāl* was made of cypress wood, its posts being of olive wood. The door of the *dĕbîr* was of olive wood. Both doors were divided into two horizontal halves; but the two leaves thus formed were in the case of the *hêkāl* door further divided vertically, each into two folds, which were joined by hinges. It was not therefore needful to open the whole leaf in order to enter the *hêkāl.*

The *dĕbîr* door had two leaves only without the subdivisions, because it was not opened and shut as was the outer door, but was always kept open according to Keil,[α] though he says the veil kept the interior hidden. See, however, below, and also VEIL.

Ezekiel's temple had the same construction for the *hêkāl* and *dĕbîr* doors, viz. that which seems to have obtained for the *hêkāl* door alone in Solomon's temple.[β] This is the more striking, as the idea of sanctity is more strictly recognized in Ezekiel's temple. Not at all improbably the inner door of Solomon's temple was constructed exactly like the other, though this is not stated owing to an oversight of the writer. Upon both doors were carved cherubim, palm trees, and open flowers;[δ] but there is no reliable evidence that the walls had such figures on them (see 'Walls').

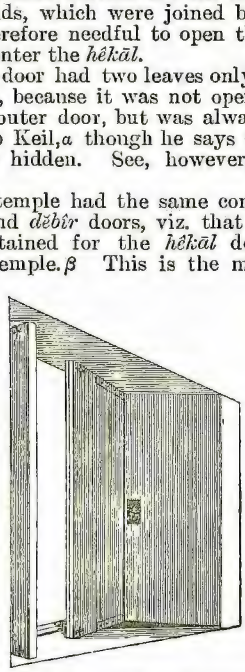

FIG. 4.—AN EGYPTIAN FOLDING DOOR, SHOWING VERTICAL DIVISION.[γ]

In 2 Ch 3^{14} it is said there was a veil before the door of the *dĕbîr*, corresponding to that of the tabernacle.[ε] In Zerubbabel's temple there was such a veil,[ζ] and it was this which gave rise to the veil of the tabernacle, and caused the Chronicler to transfer it to the first temple; but Kings says nothing about it, though Thenius, approved by Riehm,[η] brings the word into 1 K 6^{21} by arbitrarily altering a very difficult text; the text is, however, probably an interpolation, as Stade,[θ] Now.,[ι] and others hold. The veil was an invention of the time when the sacred had to be more rigidly separated from the profane. It was quite possibly introduced into the pre-exilic temple after Solomon's time, though of that we know nothing definitely.[κ]

The gold covering of Solomon's temple.—The following parts of the temple are said to have been overlaid with gold: (1) the walls of the *dĕbîr*;[λ] (2) the walls of the *hêkāl*;[μ] (3) the floor of the whole house;[ν] (4) the altar before the *dĕbîr* [but the support for this—1 K 6^{22b}—is not to be found in the LXX, and it shows otherwise strong marks of being an interpolation. Far better with Stade[ξ] and Benzinger omit the clause. With it goes the puzzle of knowing what is meant by the 'altar belonging to the *dĕbîr*.' He 9^{4} speaks of an

---

[α] חַלּוֹן, lit. 'a perforated space,' 'a hole,' from חָלַל = 'to pierce *or* perforate.'

[β] אֲטֻמִים, lit. 'shut.' The Arabic word for such windows is *shubbāk*.

[γ] שְׁקֻפִים—prob. pass. ptcp. of denom. verb. There is no need to alter the vowels as Benzinger does, reading שְׁקָפִים 'beams.'

[δ] שְׁקֻפִים—such as could be seen through; cf. הִשְׁקִיף 'to look at from an eminence.'

[ε] אֲטֻמִים, lit. 'shut.'

[ζ] 2 K 13^{17}, Dn 6^{10}.

[η] 'Jehovah has said that he would dwell in the thick darkness.' Cf. Ps 18^{11} 'He made darkness his hiding-place, his pavilion round about him; darkness of waters, thick clouds of the skies.'

[θ] 1 K $6^{31.34}$.

[ι] Ezk $41^{2f.}$.

[κ] 1 K 6^{33}, reading, as LXX, Vulg., Then., and Benz., מְזוּזוֹת רְבָעוֹת 'beams made into a square.'

[λ] It is better so to understand חֲמִשִׁית in 1 K 6^{31}. Ges. (*Thes.* i. 42 ff.), Keil, Bähr, Then., and Bött. take the numerals in 1 K $6^{31.33}$ to denote some fraction of either the width of the wall—Ges., Keil, and Bähr—or of the entrance wall (jambs, posts), as Then. and Böttcher. But no writer would choose this way of expressing this idea. It is far better, with the Rabbis, Stade (*ZATW* iii. p. 148), and Benzinger, to understand the words as above.

[α] *Der Tempel*, 75.

[β] Ezk 41^{24}.

[γ] Merx and Ewald have held that the two leaves of the *hêkāl* door were divided horizontally only. But the epithet גְּלִילִים—'going around each other'—supports the first view; which is that defended by Thenius, Keil (Comm.), and Benzinger.

altar[α] belonging to the *dĕbîr*, but this error arises from the above interpolated clause rightly rejected by Stade and Benzinger]; (5) the cherubim;[β] (6) the leaves of the door.[γ]

It is probable that the statement about gilding is a late addition in all the above instances, and that, in Solomon's temple, it had no place. It is significant that in every one of the passages in question there are other indications which awaken suspicion (for details consult Stade, *ZATW* iii. 140 ff.). When Shishak, king of Egypt, attacked and conquered Jerusalem, he took away the treasures of both temple and palace: the golden shields are distinctly named, but not a word occurs about the gold of the walls, etc.[δ] Jehoash, king of Israel, overcame the king of Judah, and took from Jerusalem the gold and silver and the temple vessels, but nothing is said about his stripping walls, etc., of the gold that covered them.[ε] Similarly, Ahaz in his extremity took the oxen on which the brazen sea rested, and also other things (2 K $16^{8.17}$). One would expect to read of his purloining the gold that was so conspicuous if it covered walls, doors, inner altar, cherubim, and even floors. When Hezekiah stripped the doors and pillars of the temple, in order to make a present to the king of Assyria (2 K $18^{15f.}$), nothing is written about there being any gold given, though of course this is not denied either. 'Gold' in the EV, as the italics indicate, is not in the Hebrew.—Ezekiel's temple does not appear to have had any of this gold-overlaying. In short, apart from the suspicious reference named, we have no allusion in the subsequent history to this gold covering. In post-exilic times the wealth of Solomon was greatly exaggerated, just as his wisdom and power were, among Arabs as well as Hebrews, in yet later days. It was felt by those who made the additions *re* gold that Solomon's exalted character demanded them. Besides, the P tabernacle was pictured as plentifully supplied with gold: this would afford a strong motive for making gold more conspicuous in Solomon's temple.

2. THE PATTERN OR STYLE OF ARCHITECTURE IN WHICH THE TEMPLE OF SOLOMON WAS BUILT.—Those who claim to speak with authority on this point have held opinions widely apart, showing that the data are inadequate for a clear and reliable decision.

Some (*e.g.* Williams, etc.) have found the model of Solomon's temple among the Greeks. Thrupp,[ζ] de Vogüé,[η] Thenius,[θ] and Benzinger[ι] pronounce the architecture of the temple to be Egyptian. Benzinger gives a detailed account of the temple of Amon Râ at Karnak, together with a plan, in order to show how much Solomon's temple resembled this. He calls special attention to the threefold division of porch, *hêkāl*, and *dĕbîr* which obtained in both temples. Nowack, on the other hand, points out that this same feature characterizes the ancient temples of Sicily.[κ] Thenius' diagrams at the end of his valuable Commentary on Kings are all based on Egyptian originals, and he is controlled throughout his Commentary and treatise by the idea that the first Jerusalem temple was a copy of the Egyptian temples. Puchstein[λ] and Nowack[μ] argue for a Syrian origin. W. B. Cobb[ν] makes the Syrian factor the principal one, as indeed Puchstein does, only the latter contends that Assyrian art was originally Syrian.

Fergusson[ξ] pronounces the problem insoluble, only that he says Egypt is out of the question. He thinks that either the valley of the Euphrates or Phœnicia was the most likely home of the temple architecture. But he does not give any arguments of weight to support his opinion.

Friedrich,[ο] Perrot and Chipiez,[π] and W. R. Smith[ρ] trace the style to Phœnicia. The fact that HIRAM, the artificer (1 K $7^{13f.}$, 2 Ch $2^{13f.}$), was a Phœnician, though connected with Israel, lends strong support to the last view, and Fergusson is not against it.

The natural conclusion to come to is that either Phœnician or Syrian art—it is hardly possible to distinguish these two—was that followed in the construction of Solomon's temple; but the arguments and illustrations adduced by Benzinger, Cobb, and others go to prove that there was a close resemblance between the sacred architecture of the Semitic world and of Egypt.

Contents of the hêkāl.—In front of the *dĕbîr* was an altar-shaped table on which the SHEWBREAD was set as an offering to God.[α] This is not the altar of incense, as Keil,[β] Bähr,[γ] and most of the older authorities contend, for we do not find such an altar named or implied in any pre-exilic document.[δ] There was no such altar in Ezekiel's temple, nor for a long time afterwards. See Benzinger, *Heb. Arch.* p. 401 n. On the other hand, there was in the latter temple a table-like altar of shewbread,[ε] which is more fully described than that of the first temple. See art. INCENSE, vol. ii. p. 467^b.

According to 1 K 7^{48-50} the following were also made and set in the *hêkāl*: (1) a golden altar, the altar of incense; (2) a table for the shewbread: (3) ten golden lampstands,[ζ] five on the right side and five on the left; (4) lamps for these; (5) many other smaller things.

But these verses have all the appearance of being by a later hand, for the purpose of heightening the impression. In 1 K 6^{20} the *hêkāl* is said to contain the altar-like table, but there is no hint of anything besides being in this part of the house. Chronicles[η] has, however, a parallel account to 1 K 7^{48-50}. Jer 52^{19} refers to 'lampstands'[θ] as taken by the Chaldæans, but in the parallel account of 2 K 25 nothing is said of lampstands. If, however, the writers of Jer 52^{19}, 1 K 7^{48-50}, and 2 Ch 4^{19-22} were under the influence of P, they would have spoken of one lampstand, such as obtains in P's tabernacle, and not of ten. There must have been some ground for the tradition of the ten lampstands. Probably these did exist—but brazen, not golden ones—in Solomon's temple, or they were added soon after, for there must have been some way of lighting the interior of the house. They would be kept burning day and night, as house lamps in the East are at the present day.[ι] They might have been fixed upon pedestals,—the Eastern fashion,—but most likely they were set on the ten tables about which we read in 2 Ch 4^8.[κ] Keil, however, maintains that these tables were for the shewbread; but 2 Ch 13^{11} 29^{18} seem to show that there was but one such table.

Contents of the dĕbîr.—After the building of the temple was completed, the ark[λ] was brought from the city of David at the south-east of the temple hill, and placed in the *dĕbîr*, which, using the later name, is explained as the Holy of Holies.[μ] It was carried by the priests, though, according to the older history of 2 S 6^{13}, priests were not considered the only proper bearers of the ark.

The ark is said to have contained nothing except the two tables of the Law.[ν] In David's time and Solomon's the ark seems to have been looked upon as involving in some way the Divine presence,—as a kind of *numen præsens*. Stade, Benz., Nowack, and many others think that the ark held originally a stone which was considered to represent Jehovah, and that it was at a time later than Solomon's that it contained or was believed to contain the two tables of stone.

In He 9^4 the pot of manna and Aaron's rod are said to have been in the ark.[ξ] Nowhere else in the Bible is this said, though these articles are spoken of[ο] as being laid up before the ark of the tabernacle. The writer of Hebrews has on his side the common belief of the later Rabbis.[π]

Overshadowing the ark were two huge cherubim,[ρ] each being 10 cubits high, *i.e.* exactly half as high as the ceiling of the *dĕbîr*. These had two wings apiece, each being 5 cubits broad. These wings were outstretched, the outer ones touching the walls, the inner ones reaching to each other. The four wings of 5 cubits each were stretched from wall to wall, extending along the whole width of 20 (=4×5) cubits. The ark had its place under the two inner wings. On the form and significance of these cherubim see CHERUBIM.

[α] θυμιατήριον is certainly 'altar' not 'censer.' So Bleek, Lünemann, Kurtz, Westcott, Delitzsch. *Per contra*, cf. Biesenthal and EV.

In 2 K 18^{4} it is recorded that Hezekiah 'removed the high places, and brake the pillars, and cut down the Asherah; and he brake in pieces the brazen serpent that Moses had made; for unto those days the children of Israel did burn incense to it.' Where in the temple—if in it at all—this symbol of deity was kept we have no intimation. The brief notice is interesting, however, as showing to how late a time the Israelites worshipped Jehovah in the form of some material object. See art. NEHUSHTAN.

The court.[α]—Keil and the older authorities generally hold that there was an outer temple court[β] as well as an inner one.[γ] What can be said for this view is well said by Keil in *Der Tempel Salomos*, p. 114 ff. So far, however, as the history and description of Solomon's temple are concerned, we know of but one temple court, the other courts mentioned not being temple courts at all. The epithet 'inner,' when employed to designate the temple court, gets its meaning from the fact that it was surrounded by the greater court, and formed, indeed, a part of the latter.[δ] This one court is called by the Chronicler the 'court of the priests,'[ε] but under the influence of later ideas and usages Ezekiel was the first to think of reserving a court for the priests, and in the later temples his conception was carried out. It was owing to stricter notions of holiness, and the belief in a more urgent need for Jehovah to be approached through His appointed ministers, that God's house—the place where He dwelt—came to be safeguarded by a walled space into which priests alone could enter. But in Solomon's day and for a long time afterward such conceptions were unknown. No need was therefore thought to exist for more than one temple court.

The greater court—of which the temple court formed a part—was surrounded by a wall made of three layers of hewn stone, and on the top of them a layer of cedar planks, the latter probably gable-shaped, so that the water might fall to the ground.[ζ] Keil[η] and others think the cedar planks stood upright, making a kind of railing. There was the same sort of wall around the temple court, as well as around the court below, in which the royal palace stood.

No information is supplied about the *extent* of the court. Ezekiel's inner court was 100 cubits square;[θ] and Keil thinks the court in question had the same size. But it must be remembered that the court about which Keil is thinking was, like Ezekiel's, for the *priests alone*; the one and only court of Solomon's temple was for the *people* as well as for the *priests*.[ι] The Rabbis say that the temple court was 187 cubits from east to west, and 135 cubits from north to south. They get these figures, however, from the second temple, and moreover they, too, believed that the first temple, like the others, had an outer court.

We are left equally in the dark as to the *form* of the court. Judging, however, from other temples, we should expect it to be rectangular, if not a square. Hirt and Grüneisen say the front or east side of it formed a semicircle; but this is simply a guess. The fact that so little is said concerning the court shows how small was the importance attached to it at this early time.

Gates of the court.—No court gates are named in the history of the building of the temple. It is natural to think that there was a gate on the south side, for it was on that side that the royal palace lay,[κ] and the king would enter by that gate. It is possible that the people also had to enter the sacred enclosure through this southern gate. But it is probable that there were gates on the north and east also, as there were in Ezekiel's temple.[λ] We have evidence that for some time before the Exile there were gates. In Jer 38^{14} we read of a 'third entry into the house of Jehovah,' and three keepers of the threshold are referred to in Jer 52^{24}, 2 K 25^{18}. But these references are not conclusive as to the court of Solomon's temple. Moreover, we read of a northern gate,[α] which is probably identical with the 'upper gate of the house of Jehovah,'[β] the 'upper gate of Benjamin,'[γ] and 'the altar gate,'[δ]—so called because to this the people brought their offerings. Assuming that the same gate is meant in all these passages, we gather from 2 K 15^{35} that it was built by Jotham (B.C. 740–736); moreover, it is called a 'new gate.'[ε] It could not therefore have been made in Solomon's time, though it might have taken the place of a much older gate. In 1 Ch 9^{18} an eastern gate is named, and it is called 'the king's gate,' probably because the king used it either principally or exclusively.[ζ] We have supposed that Solomon would be more likely to enter through a south gate, about which, however, we know nothing certain.

The *floor* of the court was paved; at least it was so in Ahaz' day (B.C. 736–728), for it was upon the pavement that he set the brazen sea after he had taken away its proper support.[η] The Chronicler[θ] says it was paved from the very first. Ezekiel's outer court was paved for 50 cubits all round the outer wall, except on the west;[ι] and it is likely that his inner court was paved, for the other is called the lower pavement, implying the existence of a higher. According to Smend,[κ] the whole of Ezekiel's inner court was paved.

Contents of the court.—**The Altar of Burnt-offering.**—We have in Kings no account of the making of this altar, though its existence is implied in 1 K 8^{64}, where it is called a 'brazen altar,' and in 2 K $16^{10ff.}$, where we read that king Ahaz ordered Urijah the priest to set aside the brazen altar that was in the 'forefront of the house'[λ] in favour of a new altar, built according to an Assyrian model which the king saw at Damascus. In 2 Ch 4^{1} it is said that Huram Abi, the temple artist, made an altar of brass, 20 cubits in both length and width, and 10 cubits high. Beyond the instructions thus given we know nothing authentic of this altar. Its being made of brass was contrary to the directions laid down in the Book of the Covenant,[μ] and is probably due to contact with surrounding peoples. Keil[ν] tries to save the character of Solomon by maintaining that the inside of the altar was made up of earth and unhewn stone, and that its outside was alone of brass,—brass plates, he says. But such an altar could hardly be called one of brass.

Keil[ξ] reconstructs the altar according to what we know of the altar of the tabernacle. Most modern authorities reconstruct it in accordance with what we know of Ezekiel's altar.[ο] But neither procedure is a safe one; certainly not the former, since the whole account of the tabernacle is conceived under the influence of late ideas and practices. Nor is it safe to argue from Ezekiel's to Solomon's altar of burnt-offering; for, assuming that the prophet's conception was governed by what he had seen of the pre-exilic temple at Jerusalem, yet many changes are likely to have been made between Solomon's time and that of the prophet. Some of these are known to us, and have already come under our notice.[π]

The altar of the first temple stood probably at the spot where David erected an altar after the plague was stayed.[ρ] Indeed this altar might have been the very one that David raised, though 2 Ch 4^{1} is against this supposition, as is also the fact that the rest of the temple was new.

The Brazen Sea.[ς]—Between the house and the altar, but towards the south, was the Brazen Sea (called also 'the Molten Sea' and simply 'the Sea'). See SEA (BRAZEN).

The Lavers.[τ]—On each side of the altar, at

the right and left wings of the temple, there were ten brazen stands on wheels, with brass basins set upon them (see the very elaborate article, with illustrations, entitled 'Die Kesselwagen des salom. Tempel,' by Stade, in *ZATW*, 1901, p. 145 ff.). They were filled with water, which was used for the purpose of washing the flesh that was to be offered in sacrifice. Perhaps the water in them was obtained from the brazen sea. Or it may be that both the brazen sea and also the lavers were supplied direct from the stream mentioned in Ezk 47^{1}.

In 1 K 7^{40} (‖ 2 Ch 4^{11}) we are told that Huram made also pots,[α] shovels,[β] and basins,[γ] but it is not stated where these were kept.

Of any additional chambers in the court besides those around the house the Biblical accounts say nothing. There is no mention, for example, of chambers for sacrificing, for washing the sacrificial flesh, for storing the instruments used in sacrificing, etc.

Rabbinical writers say there were eight stone tables on the north of the altar of burnt-offering, fastened to the pavement by twenty-four iron rings. Lund,[δ] who follows Jewish authorities far too slavishly, gives details of these tables, depending upon his Jewish guides. If, however, these tables obtained at all, it was in the temple of Herod alone, with which Jewish writers were familiar, and from which far too freely and uncritically they drew conclusions concerning the temple of Solomon.

Subsequent history of Solomon's temple.—Solomon did not intend the temple he built to be a rival to the already existing high places of the land, much less did he intend by his sanctuary to supplant the many others. For long after his time, as the genuine Books of Kings show, the *bāmôth* or high places had the stamp of approval as much as the Jerusalem sanctuary. The writings of the early prophets make this very clear. From Amos and Hosea we see that the people of the Northern kingdom made pilgrimages to Beersheba in the south (Am 5^{5}, cf. 8^{14}, Hos 4^{15} (text as amended by Wellh., Now., etc.)), and that they worshipped there and at Dan, Bethel, and other places (Am 4^{4} 5^{5} 8^{14}, Hos 10^{15}) without incurring blame, so far as concerned the locality of the sanctuaries. On the other hand, the inhabitants of Judah sacrificed at Gilgal as well as Jerusalem (Hos 4^{15}; but text dub., see Wellh. *ad loc.*). The opposition to the *bāmôth* arose from the superstition and immorality associated with them, and the danger of worshipping the Canaanite deities to which they were originally consecrated.[ε] It should be noted that the temple-worship of Jerusalem is as strongly reprobated by Isaiah as worship at the *bāmôth* is by Amos and Hosea, and for a similar reason; see Is 1, etc. Elijah was one of the first to set his face against these local cults; but the first to make any attempt to suppress them was Hezekiah (B.C. 729–629).[ζ] But the high places continued to be recognized until about B.C. 621, when Josiah (B.C. 640–609) employed vigorous measures, and for the most part succeeded in stamping them out.[η] More and more the temple became the centre of the nation's life, religious and political, especially after the return from exile (see Smend, *Alttest. Religionsgesch.* 216 f., 230 f., 315 f., 438 ff., and especially his article in *SK*, 1884, p. 689 f.).

In 2 Ch 20^{5} mention is made of a 'new court' belonging to the house of Jehovah before which Jehoshaphat stood; an outer court could hardly have existed at this time; probably the Chronicler is influenced by the temple of his own day.

We have already spoken of the following incidents connected with the temple: (1) the new gate made by Jotham;[θ] (2) the supplanting by king Ahaz of the altar of burnt-offering,[ι] and the removal by him of the brazen oxen on which the brazen sea rested;[α] (3) the taking away by Hezekiah of the gold, etc., of the house.[β] But worse than that of Ahaz or Hezekiah was the conduct of Manasseh, for he caused altars to be raised in the court to all the host of heaven, and an image to be put in the house of Jehovah.[γ] Moreover, he erected abodes for hierodules, in which women wove tents for the Asherah, these tents to be put up in the sanctuary.[δ] He had also horses, consecrated to the sun, kept in a part of the inner court.[ε] Josiah purged the temple of these abominations,[ζ] but unfortunately his life was cut short at Megiddo in the war with Egypt, about B.C. 609.[η] Twelve years later Jerusalem was attacked by the Chaldæans under their king, Nebuchadrezzar.[θ] In B.C. 586 Jerusalem and its temple were burned to the ground, and whatever of value remained in the temple was carried to Babylon.[ι] Thus ended the first temple after an existence of over four centuries.

ii. *EZEKIEL'S TEMPLE.*—Ezekiel's programme for the new State and temple was suggested to him by the sights he had seen in the Holy City, and the events amidst which he moved. Hence the picture he drew of the temple that was to be is helpful in understanding what the temple was immediately before its destruction. In a less degree, less than is generally supposed, it is an aid, too, in reconstructing the temple of Solomon.

But Ezekiel's temple obtains its chief significance from its relation to the future. The legislation set forth in the last 9 chapters of Ezekiel represents an intervening stage in ritual and theological conceptions between the Deuteronomic legislation and the Priestly. In Ezekiel's ideal picture the temple and its priesthood stand in the very foreground. Some items in his programme could not be realized. For instance, the territory in which each of the 12 tribes was to dwell is marked out, but the 12 tribes did not return. Again, the temple buildings did not, and could not, occupy exactly a square of 500 cubits each way.

The description of Ezekiel's temple is to be found in 40^{1}–43^{27} and parts of the following chapters.

The text is often very corrupt, and has to be conjecturally emended. Böttcher's *Proben alttest. Schrifterklärung* (1833) and Thenius' Com. on *Kings* are very serviceable in reconstructing the text. The Commentaries of Smend and of Cornill are of the utmost value in the same direction: especially Cornill's monumental work, which deals mainly with the text. One cannot but wish, however, that Cornill were less wedded to the text implied in the LXX. We ought not to omit noticing the Commentaries of Keil, Bertholet, and Kraetzschmar, all of which the present writer has found helpful, more particularly that of Bertholet.

Hävernick in his Commentary on *Ezekiel* has called attention to the fact that in the account of Solomon's temple it is the house—including *hêkāl* and *dĕbîr*—which receives most attention; but in the description of Ezekiel's temple it is the external circumstances that stand out most prominently, such as the courts with cells and doors, the guard-rooms, chambers, ornaments, dresses, and the like. The house is but slightly touched upon. This may be owing to the fact that in both temples the house was in all essentials identical: the differences and additions were in the external parts.

1. GENERAL ARRANGEMENT.—Solomon's temple was but one part of the complex of royal buildings on the eastern hill. It was enclosed in the great court, as were the royal palace, the house inhabited by his Egyptian wife, and other erections. In this temple court the people were in the habit of gathering to offer sacrifices. Priests and people mingled around the altar and in the immediate precincts of the house. In Ezekiel's time no palace and no State

buildings were needed. The space on which these had been built was now devoted, accordingly, to that outer court which is the grand feature of this new temple. Israel had suffered for want of proper reverence. God had not been worshipped with becoming respect. His house had been desecrated, the sacrifices profaned. Now the house was to be shut off from secular buildings. In close proximity to it the priests alone were to be allowed; it was only in the large outer court, which stood where previously the royal buildings were, that the common people could gather. There was to be a new land separated to Jehovah, and cut off on the west by the sea, and on the east by the rapid Jordan and its seas, or rather lakes. But of that all-holy land the temple hill was to be first secured as a kind of *tĕrûmāh*[α] or first-fruits. An enclosed land was to have its sanctuary enclosed—nay, doubly enclosed, the inner enclosure for the priests alone. It is no doubt this idea of the holiness of Jehovah and His house that prompted the prophet, in the spirit of his time and people, to appropriate the whole of the upper hill for his temple, and to substitute the outer court for Solomon's all-encompassing great court.

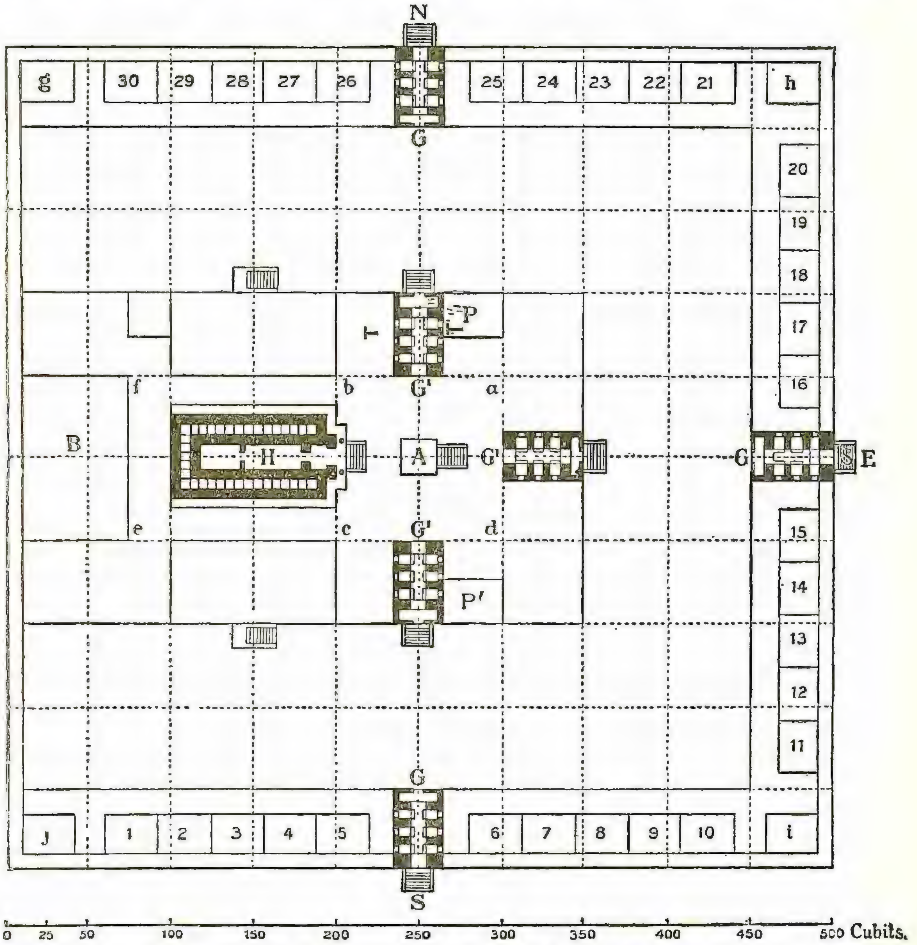

FIG. 5.—GROUND PLAN OF EZEKIEL'S TEMPLE.[δ]

g h i j = the encompassing walls. G G G = the 3 outer gates. G^1 G^1 G^1 = the 3 inner gates. P P′ = priests' cells. H = the house (*hêkāl* and *dĕbîr*). A = altar of burnt-offerings. The numbers around the outer walls mark the cells.

A leading feature in Ezekiel's temple is its *symmetry*: this is due to its ideal character, and its consequent freedom from practical restraints. The area it covered was a square 500 cubits[α] on each side. The proportion 2 : 1 obtains largely. The gateways are 50 cubits long and 25 broad. The house with walls and chambers had a length of 100 cubits and a breadth of 50. Between the house and the 3 inner gates was a square of 100 cubits each side. A glance at the plan below will show the thoroughly symmetrical character of the whole. From square to square is 50 cubits.

The temple area was encompassed by a wall (g h i j) 6 cubits high and of the same thickness.[β] In the centre of the N., E. and S. walls there were gateways[γ] (G G G). Just opposite to them, towards the inside and exactly 100 cubits distant, there were three gates of the same construction leading into the inner court[γ] (G^1 G^1 G^1). Within the precincts of the inner court was the house, embracing both *hêkāl* or Holy Place and *dĕbîr* or Most Holy Place (H). In our more detailed description we shall follow the order in which the angel showed the temple to the prophet in the vision. We

[α] Ezk 42^{16} not 'reeds' as MT. The LXX has simply 500, but in v.^{17} it has 'cubits,' which should be understood in v.^{16}, as the general measurements and other passages show.

[β] Ezk 40^{5}.

[γ] See below for full description.

[δ] The plan is adapted from Benzinger's *Heb. Arch.* 394. Benzinger takes his from Stade, *Gesch.* ii. 51. The squares are due to Benzinger.

begin, therefore, at the eastern gate of the outer court.

The first thing we encounter as we approach the eastern gateway is the ascent by 7 steps α to the level of the outer court, which was higher than the ground outside. At the inner gate there was a corresponding flight of steps which conducted to the inner court, but here there were 8 steps β not 7. In a similar way an ascent of 10 steps had to be made before the house could be entered.γ The whole constituted thus three terraces, all which would yield a commanding view from the mountains and high ground around, and from the lowest court.

Height of steps.—According to Ezk 41⁸ the 10 steps leading immediately to the house were equal to an elevation of 6 cubits, *i.e.* each step was $\frac{3}{5}$ of a cubit high. The other steps were probably of the same height.

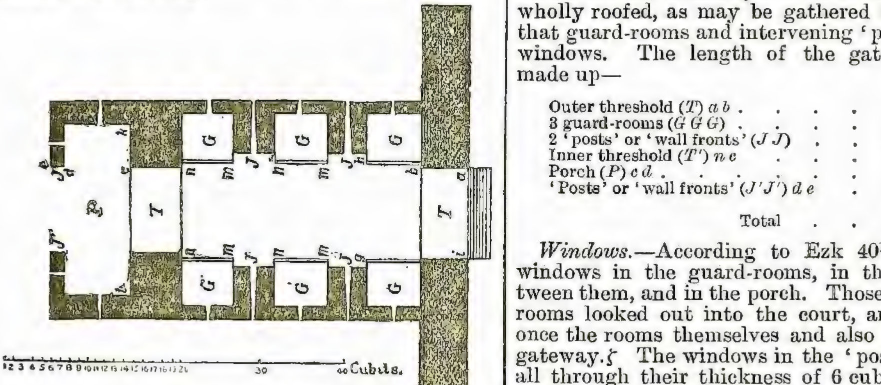

FIG. 6.—AN OUTER GATE.

Having reached the topmost of the steps in front of the outer gateway, we enter the gateway itself, which, as is common in the East, has rooms on both sides,δ though it has none above, such as are often found in Eastern countries, and, indeed, not seldom in Europe. First of all we enter the threshold ε (*T*), an open space with a length ζ (E. to W.) of 6 cubits η and a breadth ζ of 10 cubits.θ

Passing beyond the threshold, we find right and left of us guard-rooms ι in which the temple officers were stationed to keep order and to watch the house.κ These were four-square, the side being 6 cubits. Five cubits farther on there were two identical guard-rooms, and the same distance yet farther to the west there were two more. There were thus six guard-rooms in all (Fig. 6, *GGGGGG*).

No *doors* are mentioned as belonging to the guard-rooms, but it is probable that on the sides towards the outer court there were doors. On the inner side of each guard-room there was a 'border' (RV) or 'barrier' λ (Cornill, Bertholet, A. B. Davidson) (see Fig. 6, *mn*), of one cubit thickness. The purpose of this barrier was to enable the sentry to see along the whole length of the gateway without being jostled by the crowd that passed in and out. Of its form we are told nothing, but it was probably simply a straight stone wall, a cubit in thickness and 6 cubits across. Between the guard-rooms there were 'posts' (EV) or 'wall fronts' α (A. B. Davidson) (Fig. 6, *J J J J*), which from guard-room to guard-room were 5 cubits. There were four in all—two on each side. Their use was purely architectural. At the west end of the guard-rooms there was a second threshold β (*T'*), the same in all respects as the other, but acting as threshold to one entering from the outer court, as the other did to one entering from the outside.

We now enter the porch (*P*), an empty space 8 cubits long (E. to W.), *c d*, and 20 broad (N. to S.),γ *k i*. The breadth of the gateway all along its length was 10 cubits,δ except where the barriers occur: these occupying a cubit each side would reduce the distance between the guard-rooms from barrier to barrier (*m m n n*) to 8 cubits. The length of the gateway, leaving out the steps, which are not counted, was 50 cubits,ε and it was wholly roofed, as may be gathered from the fact that guard-rooms and intervening 'posts' required windows. The length of the gateway is thus made up—

Outer threshold (*T*) *a b*	6 cubits.
3 guard-rooms (*G G G*)	18 ,,
2 'posts' or 'wall fronts' (*J J*) . . .	10 ,,
Inner threshold (*T'*) *n c*	6 ,,
Porch (*P*) *c d*	8 ,,
'Posts' or 'wall fronts' (*J'J'*) *d e* . .	2 ,,
Total . . .	50 cubits.

Windows.—According to Ezk 40¹⁶ there were windows in the guard-rooms, in the 'posts' between them, and in the porch. Those of the guard-rooms looked out into the court, and lighted at once the rooms themselves and also the adjoining gateway.ζ The windows in the 'posts' extended all through their thickness of 6 cubits. If these posts were solid walls, it must have been so, and not, as Davidson's diagram η represents, a mere opening on the outside wall. On the nature and function of the windows see above. There must have been windows on the north and south of the porch, and probably the 'post' walls had them too. See Fig. 6. The end 'posts' (*d e*) had palm trees engraved on them.θ

The north and south gates are said to have been exactly like the eastern gate, and so did not need separate description.

Outer court.—For remarks on the function and significance of the outer court sec above. And

α Ezk 40⁶, cf. 40²²·²⁶. β 40³¹. γ 40⁴⁹ 41⁸.

δ 2 S 18²⁴; cf. Layard, *Nin. and Bab.* 57, and note.

ε סַף 40⁶.

ζ Length in Ezekiel is greater dimension, breadth the smaller dimension.

η *i.e.* the breadth of the outer wall, with which it ran parallel.

θ Bertholet (see on 40¹¹·¹²) gives no good reason for making the breadth (Ezekiel's length) other than 10 cubits. His misapplied ingenuity arises from his acceptance of 40¹¹ᵇ, which Smend and Cornill rightly reject.

ι תָּא 40⁷, AV 'little chamber'; RV 'lodge,' 'guard chamber.'

κ 1 K 14²⁸, cf. 2 K 11⁶. λ גְּבוּל Ezk 40¹².

α 40¹⁰ אֵילִים; LXX αἰλάμ. β 40⁷.

γ The width of the porch (N. to S.) is not given in the MT. In Ezk 40¹⁴, bowever, we read, 'He made also posts of 60 cubits.' Kliefoth, followed by Heng., Keil, Schröder (Lange), Perrot and Chipiez—[see their restorations]—and others defend the text as it stands. The two 'posts' at the end of the porch were like church steeples—so says Kliefoth; and it was such gate pillars that suggested our church steeples. But the 'posts' in question formed no part of the sanctuary, as church steeples usually do: unless, indeed, Kl. was thinking of the *campanile* or bell-tower churches, such as is to be seen at Chichester, etc. It is far more sensible to emend the text with the aid of the LXX, and to read, 'And he measured the porch (changing אֵילִים *'ēlîm* to אֵילָם *'ēlām*) 20 cubits'; *i.e.* in breadth—the other measurements have been given: thus Smend, Cornill, Davidson, and Bertholet. Tbis would leave 5 cubits for the two side walls, *i.e.* 2½ cubits apiece. The 'jambs' or posts towards the outside (*d e*) are said to have had a thickness of 2 cubits.

δ 40¹¹ᵃ.

ε Ezk 40¹⁵. The statement in v.¹³ that the gateway was 25 cubits, though supported by the Versions, is in direct collision with v.¹⁵, and must, with Smend and Cornill, be rejected as an interpolation. Bött., Hitz., Häv., and Keil retain, however, and explain thus: the whole gateway (שַׁעַר) consisted of a covered portion at each end, with an unroofed space in the middle. It is, they hold, the covered part that is meant in v.¹³. But if so, wby is this not stated? Bertholet's defence of the words requires a non-natural interpretation of the verse.

ζ The 'barrier' was probably a wall sufficiently low for the light to pass over it. There is nothing in the text opposed to this. There might have been windows in the barrier itself; this is likely if the barrier walls were high.

η *Com.* p. 294. θ Ezk 40¹⁶·²⁶·³¹.

for considerations showing that the first temple had but one court, see '*Court*' under *SOLOMON'S TEMPLE*. The outer court was comparatively free from buildings. Besides the north, east, and south gates, it had 30 cells[α] ranged along its outer walls.

The 30 cells (Fig. 5, 1. 2. 3, etc.) which went around the court were used for keeping utensils and provisions, and served also as residences for the priests.[β] They were also used for sacrificial feasts. The ancient high places had connected with them a festive chamber, where sacrificial meals were partaken of.[γ]

We are not told the size of these cells, nor how they were distributed. A stone pavement extended from the outer wall to a distance corresponding to the gateways, *i.e.* 44 cubits, which with the width of the wall (6 cubits) made 50 cubits. The cells are said to have been 'upon the pavement,' which seems to mean that they had the pavement for floor. But the preposition rendered 'upon' means prevailingly 'to,'[δ] and the Hebrew permits the translation: 'the cells were attached to the pavement,' *i.e.* they were placed at the termination of the pavement without being on it. But the analogy of other cells makes it practically certain that these were attached to the boundary wall. Taking this for granted, the prophet is quite silent as to how they were arranged.

Most authorities—Stade,[ε] Benzinger,[ζ] Nowack[η] (both the latter follow Stade closely), Davidson, Perrot and Chipiez, Keil, etc.—place 10 cells on the north, east, and south sides, leaving the west side for the *binyān*[θ] (Fig. 5, B). Five are supposed to be on each side of the respective outer gates. This answers well to the symmetry so characteristic of Ezekiel's temple. Orelli and Bertholet—the latter treads closely in the footsteps of his Basel colleague—allocate six of these cells to the west side, 3 on each side of the *binyān* (*B*). There are then 8 on each of the remaining 3 sides, 4 on one side of each gate and 4 on the other. The *binyān* occupying but a small part of the western wall, leaves room enough for 3 cells on each side of it. The words 'chambers and a pavement' made for the court *round about*,[ι] support the plan of putting cells on each of the 4 sides, unless, indeed, with Kliefoth and Cornill, we limit the words 'round about' to the pavement.

Opinions are divided also as to the way in which the cells stood in relation to one another. Keil[κ] maintains that the cells on each side of the north, east, and south gates were but rooms in one building, like the rooms of a house. He has therefore on his plan but 6 buildings for the 30 cells, 5 cells in each. But in that case we should have expected to read of 6 buildings, and not merely of 30 cells. Davidson separates the cells by an intervening space.[λ] Stade, Benz., Now., Orelli, Berth., and Perrot and Chipiez join the cells, putting a mere wall between them; and this is the likeliest view, for on Davidson's conception there would be a considerable waste of labour and materials in the extra walls required.

Pavement.—The pavement already spoken of is called the 'lower pavement,'[μ] from which one would infer that the inner and upper court[ν] was also paved. Smend concludes from 2 Ch 7^3 and Aristeas' letter that the whole of the inner court was paved. Cornill rejects the words as an interpolation, though on purely subjective grounds.

Kitchens.—In each of the four corners of the outer court there was a kitchen in which the sacrificial meals were got ready,[ξ] the size of each being 40 cubits long by 30 broad. The 'ministers of the house'[ο] boiled in them what the people brought to be sacrificed.

The Inner Court.—The inner court was for the priests alone; and its being thus exclusively used, and there being more than one court at all, marks a new step in the religion of Israel. As compared with the outer and larger court, the inner was crowded with buildings having to do with the temple service, particulars of which will be found below. From the external margin of the outer walls to the walls of the inner court there was a distance of 150 cubits. The entrance to the inner court was by means of 3 gates opposite to the 3 outer gates and of the same construction, only that the parts—threshold to porch—occurred in reverse order; the porch of the inner gate being next the steps, and not farthest away, as in the outer gate, etc. There were 8, not 7 steps between the two courts—a sign perhaps of the increased progress in holiness as compared with the passage from the outside to the first court.

Sacrificial cell and tables about the porch of the inner Northern (*or Eastern?*) *Gate.*—On one side of the inner northern gateway, joining the porch, and with a passage into the porch, there was a cell, not further described as to structure, size, or position. Smend[α] represents it as on the south side of the porch, having the same length and a third of its breadth. This cell was used for washing the burnt-offerings.[β]

Kliefoth, Keil, and Schröder (Lange) maintain that the sacrifices were washed—the last process they were put through before they were laid upon the altar—at each of the 3 inner gates. Indeed Kliefoth goes so far as to say that there were two washing cells attached to each porch of the inner gates, one on each side. But the slaughtering took place at one gate only,[γ] and it is practically certain that the washing did too. 'Gates' in v.^{38} should be read 'gate' with the LXX and most authorities.

Another debated and debateable question is—Which gate is meant at which this washing cell was situated? Ew., Hitz., Smend, Corn., and Berth. hold that it is the eastern, their principal grounds being, that (1) the eastern gate was the most sacred, that (2) the stream that supplied water for washing the sacrifices passed by the east end of the temple,[δ] and that (3) at the N. and S. gates there were other buildings[ε] (Fig. 5, P P′). On the other hand, Böttcher,[ζ] Hävernick, and Davidson hold that the northern gate is meant,[η] and for reasons which, to the present writer, appear conclusive. Here are some of them:—(1) The prophet is already at the N. gate. Cornill gets rid of this difficulty by his usual and often successful way of emending the text. In the beginning of v.^{38} he introduces a clause answering to the beginning of v.^{35} 'And he brought me to the door of the porch of the *eastern* gate.' But he has absolutely no external support for the change thus made. (2) According to the regulations in Leviticus,[θ] the slaughtering of animals for sacrifice was to take place at the N. side of the altar in the case of burnt-, sin-, and trespass-offerings. No directions are given as to peace-offerings.[ι] It is to be expected beforehand that Ezekiel's legislation and that of the Priestly Code would tally. (3) The N. gate is called in 8^5 the 'gate of the altar.' Since it was to this gate that the people brought their offerings, it was the most frequented. The two E. gates were kept shut except on Sabbaths and new moons,[κ] or on other special occasions when the prince desired to present freewill-offerings.[λ] The western gate was closed by buildings connected with the temple. In the pre-exilic temple the S. gate was joined to the palace court, which is partly true of the eastern gate as well.

Passing into the inner N. gate, on both sides of the porch—which is first reached—we see 4 tables, 2 on each side (T′), on which the burnt-, sin-, and trespass-offerings were slain;[μ] or at least they were used *in connexion with the* slaying of these sacrifices, as Keil and Davidson understand the words. The actual slaughtering took place probably on 4 tables outside, the 4 inside tables being used in that case for preparing the sacrifices for the altar. According to Lv 1^{11} 6^{25} 7^2 the above-named sacrifices had to be killed on the N. side of the altar.[ν] If these tables were placed near the N. gate, this requirement of P would be met.

There were without the porch two tables on each side—4 in all (T); on these, as stated above, the actual slaughtering took place.[ξ] In addition to the 8 tables noticed above there were 4 of hewn stone, each with a length and breadth of one cubit and a half, having a height of one cubit. They had ledges running round the 4 top edges a hand-

---

[α] For the sake of distinctness we use 'cell' for לִשְׁכָּה, 'guard-room' for תָּא, and 'chamber' for צֵלָע. Indian, Egyptian, etc., temples, as is well known, contained also, within their courts, dwellings for priests, besides kitchens, refectories, etc. See Beale's *Guide to Architecture*, p. 34.

FIG. 7.

ST=steps before the porch. *P*=porch. *H*=*hêkāl*. *D*=*dĕbîr*. *E E′*=N and S. entrances to chambers. *S S′*=stairs connecting the storeys. *B*=Boaz. *J*=Jachin. *M*=the *munnāḥ*. *T*=the altar-shaped table of shewbread.

Between the house and the inner ends of the inner gates there was a square, having 100 cubits to the side (a b c d). The altar (A) was probably in the centre, and therefore equally visible from all the inner gates.[α] The space between the altar and the house was deemed specially sacred.[β]

2. THE HOUSE AND ITS MEASUREMENTS.[γ]—The house and its appurtenances formed a square of 100 cubits each way. The manner in which this is made up will be shown in summary after the several details have been considered.

[α] 40^{42}.

[β] 40^{44-46}.

[γ] In 44^{15-31} the Levites are said to have charge of the house.

[α] Cf. $43^{13ff.}$.

[β] Ezk 8^{16}, Jl 2^{17}, Mt 23^{35}.

[γ] Ezk 40^{48}–41^{4}.

The porch[α] (*P*).—The porch (Fig. 7) was 20 cubits from N. to S. (*d c*), and 11 cubits, or rather 12,[β] from E. to W. (*d f*). The platform of the house was 6 cubits higher than the ordinary level of the inner court: this was reached by 10 steps.[γ] Close to the 'posts' or 'wall fronts' of the porch were two pillars,[δ] the Boaz and Jachin of 1 K 7^{21} (*B J*).

The hêkāl or Holy Place[ε] (*H*).—The *hêkāl* was 40 cubits long (E. to W.) and 20 broad (N. to S.)—inside measurements. The posts of the entrance wall (*i h*) were 6 cubits thick. The door or entrance way into the *hêkāl* was 10 cubits (*h h*, *i i*).

The dĕbîr or Most Holy Place[ζ] (*D*, Fig. 7).—The *dĕbîr* was a cube of 20 cubits each way. Its posts (*o p*) were 2 cubits in thickness, this being the thickness of the wall (*n o*) which extended from the N. and S. walls of the house to the door. This wall[η] (*n o*) was 7 cubits wide, leaving 6 cubits for the door.[θ]

Doors of hêkāl and dĕbîr.[ι]—Both *hêkāl* and *dĕbîr* had folding doors of the kind already described.[κ] It is not said that the *dĕbîr* of Solomon's temple had such doors. The doors of the *hêkāl* were carved with cherubim and palm trees,[λ] as the *hêkāl* walls were.[μ] The porch entrance (*a–a*: *b–b*)—we read of no door—was 14 cubits wide.[μ] The door or entrance to the *hêkāl* was 10 cubits wide,[ν] that of the *dĕbîr* being 6.[ξ] The entrances were therefore in the proportion 7 : 5 : 3 (14 : 10 : 6). It is singular, though probably only a coincidence, that the wall projections (= 'sidepieces')[ο] had exactly opposite ratios, viz. 3 (*z a*) : 5 (*f h*) : 7 (*n o*).

The side chambers.[π]—On every side of the house except the east, Ezekiel's temple, like Solomon's, had side chambers. The MT gives the number of them as 33, and Smend displays much ingenuity in justifying the text, which in this connexion is by universal confession very corrupt. In favour of there being 30 are the LXX, Josephus,[ρ] Böttcher, Cornill, and most recent authorities, as also is the fact that there were 30 cells along the outer wall, not to add the greater symmetry of the round number. In Kings the number is not given. The chambers, arranged as in Solomon's temple in 3 storeys, were on the 1st, 2nd, and 3rd storeys respectively, 4, 5, and 6 cubits broad: in the first temple the figures were 5, 6, and 7. The 2nd and 3rd storeys rested upon rebatements, on which see p. 699^b. Concerning the rebates in the temple wall, the ladders by which the upper storeys were reached, and the uses of the chambers, see above, p. 699^b.

Ezekiel's temple had doors (*E E'*), one N., one S., by which admission to the chambers could be obtained. There was but one for the first temple, and it was situated at the south[ς] (see Fig. 2, E). There was probably a ladder at each entrance: Ezekiel's temple would thus have two ladders (*S S'*), Solomon's temple one (Fig. 2, S).

The munnāh,[τ] *or 'what was left'* (EV).—On the outside of the chambers N. and S. there was an empty margin of 5 cubits (*M*). It was out of this *munnāh* that entrance was had to the chambers through the two doors (*E E'*).

The gizrāh,[α] *or 'separate place'* (EV).—On every side except the E. there was a space of 20 cubits, called the *gizrāh* (Fig. 5, b c e f). This court ran round the whole house buildings, including the *munnāh*, on N. and S.; or it went round the raised platform on which these stood. Reckoning together *gizrāh*, *munnāh*, chambers, and house, there was a breadth (N. to S.) of 100 cubits, which makes it highly probable that the *gizrāh* formed *part* of the upper platform, instead of merely enclosing it. The text[β] is silent as to any use to which the *gizrāh* was put. Perhaps, like our cloisters, it was for the priests to exercise themselves in, and take fresh air when unable to get farther afield.

The binyān[γ] *or 'building'* (EV).—On the W. side of the house and adjoining the *gizrāh* there was a rectangular structure called, apparently, technically *binyān* (Fig. 5, B), the inside measurements of which were 70 cubits from E. to W. and 90 from N. to S. Its encompassing wall was 5 cubits in thickness. Its W. limit reached to the western wall and joined it, as may be seen from the dimensions below:—

Length of *binyān* (E. to W.)	70 cubits.
2 walls of do. (E. and W.) 2×5	10 ,,
Gizrāh	20 ,,
Total	100 cubits.

We know that the western side of the house was 100 cubits from the outer wall, so that there could be no space between the latter and the *binyān*.

Thenius[δ] contends strongly that there was such an intervening space, and that behind the *binyān* there were gates through which wood and animals to be sacrificed were brought into the temple area, and through which refuse of every kind was carried away. Klief. and Keil hold that the *binyān* was made for the purpose of receiving the offal of the sacrifices and the sweepings of the gates. Curry[ε] says the carcase of the sin-offering was burnt at this building.[ζ]

It is very probable that by the *binyān* we are to understand the same as the הַפַּרְוָרִים[η] of 2 K 23^{11} (places in which horses and chariots were kept) and the פַּרְבָּר of 1 Ch 26^{18} (a part of the temple west of the house, of which the priests had charge).

In Ezk 41^{15a} we read of the *binyān* and its 'galleries': for the last word we should certainly read, with Corn. and others, 'walls.'[θ] This is confirmed by calculation. Adding 90 cubits, the N. to S. dimension, to the widths of the two enclosing walls (5+5=10), we get 100 cubits. Besides, in no other place do we read of there being galleries in the *binyān*.

General measurements of the house.—The house and its belongings formed a square of 100 cubits a side,[ι] as shown below—

From E. to W. we have these details (see Fig. 7)—

ab	Porch wall, Ezk 40^{48}	5 cubits.
df	Porch, 40^{49}	12 ,,
fk	Wall of *hêkāl*, 41^{1}	6 ,,
kn	Length of *hêkāl*, 41^{2}	40 ,,
nr	Wall of *dĕbîr*, 41^{3}	2 ,,
rs	Length of *dĕbîr*, 41^{4}	20 ,,
	Walls of house (W.), 41^{5}	6 ,,
1, 2, etc.,	Side chambers, 41^{5}	4 ,,
	Wall of side chambers, 41^{9}	5 ,,
	Total	100 cubits.

This calculation proves that the *munnāh* (*M*) did not extend to the W. side.

These are the dimensions from N. to S.—

Breadth of house, Ezk 41^{2}	20 cubits.
Side walls, 41^{5}, 6+6	12 ,,
Side chambers, 41^{4}, 4+4	8 ,,
Walls of side chambers, 41^{9}, 5+5	10 ,,
Munnāh, E. and W., 41^{9}, 5+5	10 ,,
Gizrāh, E. and W., 41^{10}, 20+20	40 ,,
Total	100 cubits.

[α] אוּלָם.

[β] Thus the LXX; and the other measurements require 12. See Summary at p. 708^b.

[γ] Ezk 41^{8}.

[δ] 40^{49}. See Boaz.

[ε] $41^{1f.}$.

[ζ] $41^{3f.}$.

[η] 41^{3}. LXX correctly τὰς ἐπωμίδας τοῦ θυρώματος, reading וּכְתֵפוֹת instead of וְרֹחַב ('and the width').

[θ] 41^{3}.

[ι] $41^{23\cdot 25}$.

[κ] Above, p. 700^b, Fig. 4.

[λ] 41^{26} $41^{17ff.}$.

[μ] Though the Hebrew does not give the width, it is supplied by the LXX of 41^{48}. Adding to this 14 cubits the two projecting walls (*d b*, *b c*) we get 6 (=2×3)+14=20, the width of the porch (N. to S.), which is a confirmation of the LXX.

[ε] *Speaker's Comm.*

[ζ] Ezk 43^{21}.

[η] AV 'suburbs,' RV 'precincts.' Both פַּרְוָר and פַּרְבָּר are derived by Gesen. (*Thes.*) from Pers. *farwar*, a summer-house, open on all sides to admit air. He considers the 'parbar' of 1 Ch 26^{18} to have been an open porch adjoining the temple. In Rabbinical Hebrew (Mishna, etc.) *parbar* means temple court, and also suburbs of a city. See, further, art. Parbar.

[θ] קִירוֹת for אַתִּיקִים.

[ι] $41^{15a\text{-}20}$.

Decoration of the inside of the house.—The walls[α] of *hêkāl*, *dĕbîr*, and porch were wainscotted, as were also the closed windows.[β] The wall decoration was arranged in compartments or fields,[γ] in each of which a cherub and palm tree were engraved, the cherub having faces of man and lion, one face looking upon the other.[δ] On the side walls of the porch, palm trees alone were carved.

Windows.—Little is said about the windows of Ezekiel's temple. Those of the gateway,[ε] the porch,[ζ] and the house[η] are characterized as 'closed,'[θ] *i.e.* 'latticed.' In 1 K 6⁴ the windows of Solomon's temple are further characterized as 'beamed.' This second feature is probably understood of Ezekiel's temple too. See more fully above (p. 700ᵃ) on windows of Solomon's temple.

Priests' cells in the Inner Court.[ι]—N. and S. of the *gizrāh* there were 4 rows of cells in which the priests ate the holy food and deposited their garments, two rows being on the N. and two on the S. First there was one abutting upon the *gizrāh* and lying along its whole length of 100 cubits. Then came a parade or walk 10 cubits broad of the same length. Next to this, parallel to the *gizrāh* and the first row of cells, was a half row, starting at the west, the remaining space being taken up by a wall. The chambers had 3 storeys, but no pillars supporting them, as the 30 cells of the outer court had. The cells on the upper storey were narrower than the two below, so that in the direction of the house there was a balcony, or rather corridor. The entrance to the cells was at the E. end, and was apparently on lower ground than that on which the cells were.[κ] Bertholet concludes from this that the entrance was thus on the outer court level.

The MT does not say anything as to the number of cells there were, but the LXX gives the number as 30 in its best copies (A, etc.): *i.e.* 15 N. and the same number S., 10 in each full row and 5 in each half row. The total would, according to this, be identical with the cells along the outer wall.

Contents of the house—In the *hêkāl* of Ezekiel's temple there was nothing except the cedar wood altar,[α] which was 2 cubits in both length and breadth[β] and 3 cubits high. It had raised corners,[γ] wrongly called horns[δ] by the LXX, and is described as a 'table (set) before Jehovah.'[ε] The altar of burnt-offering is also called the table of Jehovah.[ζ] It cannot be the altar of incense that is meant, for we find no such table mentioned earlier than P. No doubt we are to understand the altar-shaped table of shewbread (Fig. 7, *T*), as in Solomon's temple, this table occupying the same position in both temples. Of other tables or of lampstands not a word is written. Nor is anything said about what the *dĕbîr* contained. This may, of course, be due to the brevity with which the house is treated; but as a matter of fact we do not read of the ark after the destruction of Solomon's temple.[η]

Ezekiel's altar is much more elaborate than that of Solomon's temple, and owing to the large number of technical terms[θ] and other difficulties it is harder to reconstruct.

The altar was in form as if made up of four square blocks of stone, the lowest being the largest, the next being smaller to the extent of one cubit each side, the third and fourth having a superficial area less than the block below also of one cubit each side. There was thus a ledge or margin[κ] of one cubit in width at the basis of the three upper blocks (Fig. 8 *d d′*, *e e′*, *g g′*). On the outer half of the lowest margin there was an upright parapet[λ] (*g h*, *g′ h′*), forming a kind of channel into which, according to tradition, the sacrificial blood flowed, whence it was conducted by a subterranean passage to the Wādy Kidron.[μ] The altar was not made of solid stone; its interior was of earth,[ν] but this was covered with stones, just as the altar of Solomon's temple had a covering of brass. The

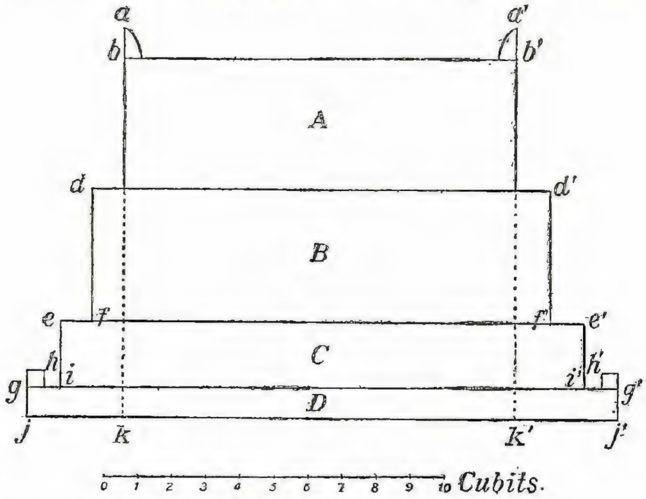

FIG. 8.—ALTAR OF BURNT-OFFERING IN EZEKIEL'S TEMPLE.ι

[α] *i.e.* the walls enclosing the openings rendered 'openings.' These walls were themselves covered with beams; cf. שְׁקֻפִים 1 K 6⁴: it was on these beams that the wood-carving was done. Berth., on account of the difficulty of understanding how windows could be covered with wood, rejects this clause; yet it is found in all the MSS and versions.

[β] 'Galleries' of MT must go—so LXX, Cornill, Davidson. Other changes are necessary in 41¹⁶.

[γ] מְחוֹת; cf. Neh 3¹¹· ¹⁹· ²¹. The LXX omits the word.

[δ] Not four faces, like the cherubim of ch. 1. More than two faces could not be represented on a flat surface.

[ε] Ezk 40¹⁶. [ζ] 41²⁶. [η] 41¹⁶.

[θ] אֲטֻמִים. [ι] 41¹⁰ 42¹⁻¹². [κ] Ezk 42⁹.

[α] 41²².

[β] The breadth is not given in MT, but it is supplied by the LXX.

[γ] מִקְצֹעוֹת. [δ] *κέρατα*. [ε] 41²².

[ζ] Ezk 41²². [η] See ARK. [θ] עֲזָרָה, חֵיק, גְּבוּל, גַּב.

[ι] Ezk 43¹³ᶠᶠ·.

[κ] חֵיק. The majority of commentators follow the Targum, and make this word stand for 'basement,' גַּב being really the word used for this. Thus Gesen. (*Thes.*), Häv., Keil, Corn., Orelli, Bertholet, and Kraetzschmar. The view favoured in the text above is defended by Villalpando (†1608) and other older commentators, and by Smend (see his *Ezechiel*, where the arguments are given).

[λ] גְּבוּל. [μ] *Yoma* iii. 1. [ν] Ex 20²⁴ᶠ·.

altar had, however, the appearance of three blocks of solid stone, with three successive terraces, the lowest of them being bound by a parapet half a cubit wide. The uppermost surface was a square of 12 cubits each way; and as on this the sacrifices were offered, it is called, by way of pre-eminence, *the altar.*[α]

Keil and Cornill maintain that the altar proper was a cube of 12 cubits a side, the rest of the structure (all except *b b′ k k′*) being added for use or ornament, but forming no part of the altar; but in the text the word 'altar' is used of the entire structure;[β] and this larger sense is defended by Kliefoth, Ewald, Smend, A. B. Davidson, and Bertholet.

The *'ărî'ēl*[γ] or altar-hearth had four horns (*ba*, *b′a′*), each a cubit high, rising out of its four corners.[δ] The uppermost surface was, as stated, a square of 12 cubits on each side. The highest block (*A*) had a thickness of 4 cubits. The area of the next block (*B*) was a square of 2 cubits more on each side; that is, it was 14 cubits a side, and it had a thickness of 4 cubits. The third block from the top (*C*) had for its surface a square of 16 cubits on each side, and a thickness of 2 cubits. The lowest block, the back or base,[ε] had for its upper surface a square of 18 cubits a side, and a thickness of one cubit. The height of the upper surface of the whole was 12 cubits, as is seen from the following details:—

Basement (גַּב)	1 cubit.
Lower block (עֲזָרָה)[ζ]	2 cubits.
Higher block (עֲזָרָה)[ζ]	4 ,,
Block of altar hearth (אריאל)	4 ,,
Horns	1 cubit.
Total . . .	12 cubits.

The proportion of height and (assumed) basement is $\frac{2}{3}$ $(=\frac{12}{18})$,[η] a favourite ratio with Ezekiel. Note further that the height is identical with the altar surface: thus we get a cube (*a k* : *a′ k′*). In the calculation of height the horns are included. In fact the horns seem to have been an essential part, nay the most sacred part, of the altar.[θ] On them the blood was sprinkled; and to them fugitives came, feeling safe if they had hold of them. In early times the altar possessed no horns.[ι] Stade,[κ] Nowack,[κ] and others regard the horns as a survival of the bull image of Jehovah worshipped in the N. kingdom, which was also a representation of deities worshipped by the Egyptians, Canaanites, and Phœnicians. The holy stone or altar, it has been said, was in early times covered by the skin of the animal sacrificed, the skin of the bull having the horns attached. But why, in that case, was not the altar constructed with *two* horns, the number on one skin, instead of *double that number*? Villalpando[λ] thought the horns trophies of the animals sacrificed to God. Spencer[μ] inclines to the opinion that the horns were expressive of dignity, the horn being a decoration worn by distinguished persons.

iii. *ZERUBBABEL'S TEMPLE.*—The temple erected by the Jews who returned from exile is called Zerubbabel's, because he was the leader in promoting its erection, supporting Haggai and Zechariah in their endeavours to urge the people to build when the latter were inclined to relax. He was grandson of Jehoiachin and probably nephew of Sheshbazzar.[ν] In the spring of B.C. 537, forty-nine years after the temple had been destroyed, Sheshbazzar[α] was sent by Cyrus, king of Persia, to be governor of Judæa. He received permission to take with him his leading fellow-countrymen from Babylon, to restore their Jewish religion and rebuild the temple.[β] Sheshbazzar was accompanied by his nephew Zerubbabel and Joshua the high priest, representing respectively the royal and priestly lines. Cyrus not only gave orders that the temple should be re-erected, but he gave Sheshbazzar power to carry with him the sacred vessels taken by Nebuchadnezzar from the temple, and imposed a tax upon the provinces west of the Euphrates to meet the expenses of the return of the Jews to their own country.[γ] Phœnicia and Tyre were to supply the wood from Lebanon, and to send it on rafts to Joppa.[δ] Whether all the instructions given by the Persian king were carried out we have no means of knowing.

Seven months after the Return, the altar of burnt-offering was erected,[ε] probably upon the same site as the old one. The building of the house was slower work, but a collection was made to meet the needful outlay.[ζ] In the 2nd month of the 2nd year after the Return, the foundation-stone was laid.[η] Then there was a pause in the work owing to the opposition of the mixed population of Samaria,[θ] who, as not being pure Israelites, were not allowed to share in the rebuilding of the temple.[ι]

There is no confirmation of the statement[κ] that the people of Samaria intrigued with the Persian king to authoritatively stop the work. According to Haggai and Zechariah, it was the indifference of the people that was at the root of the delay. See especially Zec 1–8, where the various difficulties are met in the successive visions.

Nothing further was done until B.C. 520, the 2nd year of the reign of Darius Hystaspis. Sheshbazzar was probably dead now, and the lead was taken up by his nephew and successor Zerubbabel, aided by the high priest Joshua. Much of the new zeal was owing to the earnest pleadings of the new prophets named. Recommenced in B.C. 520,[λ] the temple was completed in B.C. 516.[μ]

Sources of information as to Zerubbabel's Temple.—These are very meagre: indeed we have hardly anything which for certain applies to the temple as it was at or soon after the Exile. There are scattered notices in Ezra and Nehemiah. Hecatæus of Abdera, contemporary and friend of Alexander the Great, is said by Josephus[ν] to have written a book concerning the Jews, and he quotes parts of it referring to the temple. It is by no means certain that Hecatæus wrote the book in question; nevertheless, the quotations made by Josephus are interesting and of value. The OT Apocrypha also has important allusions; especially is this true of the Books of Maccabees. But it is hard to say how far the statements are true of the temple completed in B.C. 516. Josephus is too much controlled by the temple as he saw it, to be a reliable guide concerning the earlier temples.

It is probable that the temple building occupied the same site as the earlier temple. Hecatæus says it was a 'great house.' Cyrus gave instructions that it was to be 60 cubits high and 60 cubits broad.[ξ] Probably this means that they were to build it as large as they liked—as large, if they

---

[α] הָאֲרִיאֵל : הַהַרְאֵל : for the proper writing of the word see *SBOT*, notes on Isaiah 29¹ (Cheyne), and on Ezekiel 43¹⁵ (Toy). It is probable that the word is not compound, the ending being a mere noun suffix as in בַּרְזֶל, כַּרְמֶל, and עֲרָפֶל. So Cheyne and Kraetzschmar, following Ewald (see *Comm.* and *Gram.* § 163*g*). The word simply means in that case 'burning place,' from אָרָה 'to burn.'

[β] See Ezk 43¹³ᶠᶠ·.

[γ] So Cheyne would read it.

[δ] V.¹⁵.

[ε] גַּב.

[ζ] EV 'settle'; the Heb. word means elsewhere *court* or *enclosure*, from a Semitic root meaning to press in, to enclose. Perhaps the word stands in Ezk 43¹⁴ strictly for the surrounding ledge of one cubit width; then for the square block above it.

[η] Ezk 40⁴² 41²².

would, as, say, some well-known temple in Babylon. We are not told that it was actually built of these dimensions, nor is it likely that Solomon's, which was 60 cubits long, 20 broad, and 30 high, should be so far exceeded by Zerubbabel's. It is not needful to consider the 60 cubits' length as meaning height of porch,[α] and the breadth as applying to the chambers as well.

It is inferred from Ezr 3^{12} and Hag 2^{3} that the second temple was greatly inferior to the first. But when these words were uttered, the temple was not finished: and the inferiority may refer to the absence of the ark and other sacred vessels which were for ever lost after the destruction of the first temple. According to Bab. Talmud (*Yoma* 22*b*), the second temple wanted five things which were in that of Solomon: (1) the ark, (2) the sacred fire, (3) the shekinah, (4) the Holy Spirit, (5) the Urim and Thummim.

Hêkāl or Holy Place.—The *hêkāl* had within it one holy lampstand, one table of shewbread, one golden altar of incense, together with pouring vessels and spices.[β] There would seem to have been the two *veils* of which we read as being before the *hêkāl* (*māsākh*) and *dĕbîr* (*pārôkheth*) doors of the tabernacle.[γ] The fact that Antiochus Epiphanes is represented as plundering the gold, silver, etc., of the temple,[δ] is no proof that the walls, doors, etc., were covered with gold, as the MT declares to have been the case with Solomon's temple (see above, p. 700 f.), though Schürer seems to think it is.[ε]

Dĕbîr or Most Holy Place.—The *dĕbîr* had a veil in front of it, as the *hêkāl* also had. There was nothing in the *dĕbîr* according to Jos. (*BJ* V. v. 5), except that according to the Mishna[ζ] the stone of foundation[η] stood where the ark used to be. Upon the Day of Atonement the priests used to put their censers on this stone.[θ] Prideaux, without a tittle of evidence, held that the ark was in the second temple. Tacitus applies the words 'inania arcana' to the *adytum* or *dĕbîr* of the temple.[ι]

Courts.—This temple had two courts,[κ] but the separation between them was not perhaps rigidly enforced, for when Alexander Jannæus was sacrificing on the altar during the Feast of Tabernacles the people pelted him with citrons, etc. To stop such conduct, he ran a wooden wall around the priests' court. According to Ezr 6^{4}, three rows of hewn stone and a top row of new wood were to go about the temple, viz. the inner court.[λ]

The inner court had in it an altar of burnt-offering made of unhewn stone[μ]—so conforming to the ancient law of Ex 20^{24}, which Solomon's did not.

According to Hecatæus[ν] it had the same dimensions as the first temple, viz. 20 cubits long by 20 cubits broad by 10 cubits high. The Mishna[ξ] speaks of a כִּיּוֹר or laver as being in this court; and Sir 50^{3} speaks of a 'cistern' as having been made by Simon the high priest. The Syriac leaves out 'cistern' altogether, and renders 'he dug a well.' The allusions are far too uncertain to infer from them that there was a molten sea in the inner court of the second temple.[ο]

There were cells in the outer court for storing furniture and for other purposes. In 1 Mac $4^{38.57}$ priests' cells are named.[π] Josephus makes mention of corridors with pillars.[ρ] The 'Miphḳad gate' of Neh 3^{31} was probably one leading into the outer court on the western side (see JERUSALEM, vol. ii. p. 593^{b}). The 'prison gate' of Neh 12^{39} was most likely on the north side (*ib.*). In later times there was a bridge crossing the Tyropœon or Cheesemongers' Valley from the modern Mount Zion to the temple hill. When Pompey besieged Jerusalem, many Jews took refuge on the temple area and broke this bridge, that the Roman soldiers might be hindered from coming to them. This was probably where the remains of Wilson's arch are now seen, though Rosen.[α] thinks the bridge was of Herod's making.

Later history of this temple.—Simon the high priest, son of Onias, repaired and fortified the temple; but the passage in which we have the information[β] is very obscure.

In B.C. 168 Antiochus Epiphanes plundered, laid waste, and desecrated the temple.[γ] He placed an altar to Jupiter Olympius on the altar of burnt-offering. The brazen vessels taken away by him were given by him to sympathizing Jews at Antioch, and they were transferred to the local synagogue.[δ] Three years[ε] later JUDAS MACCABÆUS recovered Jerusalem, cleansed and repaired the house, made a new altar, and also fresh vessels.[ζ] The Feast of Dedication, still observed among Jews, commemorates the opening ceremony of the restored and cleansed temple. At this time Judas also adorned the front of the temple by hanging up[η] gilded crowns and shields,[θ] and he also fortified the enclosure by putting high walls around it.[ι] These were razed to the ground by Antiochus Eupator,[κ] but restored by Jonathan Maccabæus;[λ] they were strengthened by Simon his brother.[μ] Reference has already been made to the wall put around the inner court by Alexander Jannæus. In B.C. 63 Pompey conquered Jerusalem, and after a long siege took the well-fortified temple hill. He entered the house, and even, in the face of loud protests, the *dĕbîr* itself; but he did not touch the sacred vessels.[ν] Nine years later (B.C. 54) Crassus plundered the temple of its valuable things most mercilessly, taking away what was worth two millions of pounds in English money.[ξ] Herod, afterwards called the Great, a descendant of the Maccabees, was made king of the Jews by decree of the Roman Senate. In B.C. 37 he stormed Jerusalem,[ο] and burned some of the temple walls, causing a goodly amount of blood to be shed. From other injury, however, he protected the temple.

iv. *HEROD'S TEMPLE.—The sources.*—The principal sources of information in regard to Herod's temple are: (1) Josephus, who in *Ant.* XV. xi. gives a full account of the outer court with its gates and rooms, and in *BJ* V. v. describes the inner court and also the house. Josephus was a priest, and was therefore familiar with the temple and its services from personal experience. He writes his history, however, from memory, and he is so full of admiration for the sacred enclosure that he falls into obvious exaggeration when giving measurements. (2) The Mishnic tract *Middoth* preserves valuable Jewish traditions (see Eng. tr. in Barclay's *Talmud*, reproduced in Fergusson's *Temples of the Jews*, Appendix i. In Surenhusius' *Mishna* [vol. vi.] there is a Lat. tr. of the text, as also the text and translation of Bartinora's Com-

mentary). The *Middoth* is more modest in its dimensions than Josephus, and nearer the truth; but it is also often inaccurate. Rabbi Hildesheim's *Die Beschreibung des Herod. Tempel im Tractate Middot und bei Fl. Joseph.* states and examines the divergences between these authorities. (3) Maimonides in יד חזקה (part vi.) collects many passages about the temple which are scattered through the Talmud. These relate especially to the priests, temple furniture, etc., and have been put into Latin by Ludwig Compiègne. This tr. is to be met with in Ugolinus' *Thesaurus*, vol. viii. (4) Dr. John Lightfoot's work on *The Temple*, etc. (London, 1823), rests mainly upon Rabbinical sources, and is for that reason valuable.

Was Herod's temple the second or the third?—It is usual to speak of Herod's temple as the third Jerusalem temple. Modern Jews, however, followed by many Christian writers, regard it as simply the second temple rebuilt and improved, and so call it the second temple. Christians are led to this conclusion, or at least confirmed in it, by a consideration of Hag 2^{6-9}. Messianically interpreted, the temple erected by Zerubbabel was, they say, to see the Messiah. But the passage is not Messianic, and, if it were, the prediction contained in it is made from the writer's point of view.

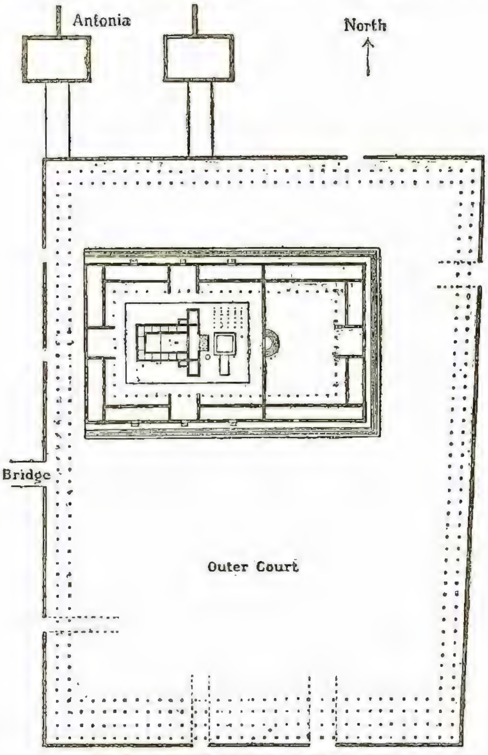

FIG. 9.—HEROD'S TEMPLE: GENERAL VIEW.

It was in the 18th[a] year of his reign (B.C. 20–19) that Herod the Great set about the rebuilding of the temple. In his day there was among the Romans a great rage for restoring Greek cities and their temples, and Herod probably caught the prevailing spirit. Josephus reports (*Ant.* XV. xi.) the speech in which Herod announces his intention, and gives as his reason a desire to promote the religious welfare of the nation; but the historian says the king's real purpose was to raise for himself an everlasting memorial. The Jews were at first afraid that, if the king pulled down their temple, no other might be for a long time put up in its place. To allay this fear, Herod got together all the material before the work of rebuilding was begun, and then pulled down and put up as gradually as could be done. Since only priests could enter the house and the inner court, he engaged a thousand of them to act as masons and carpenters in these parts. The building of the house was hastened on with great vigour, and was finished in a year and a half. Surrounding buildings took eight years, but the work went on, and was not ended until the time of the procurator Albinus (A.D. 62–64). The Jews (see Jn 2^{20}) said the temple had been forty-six years *in building*, and in fact it was still in building then, and was to be for over thirty years more (but see E. A. Abbott in *Class. Rev.* 1894, p. 89 ff.). The building is spoken of as exceedingly impressive in its grandeur. Its eastern front was covered with plates of gold, which threw back the rays of the rising sun, and formed an object of rare beauty for miles around. The stone of which it was built was white marble, and a large part of the side walls was covered with gold.

The area of Herod's temple is essentially that of the modern *Ḥaram esh-Sherif*, with the exception of the north end, at which, in Herod's day, the fortress Antonia was situated, the temple court being to the south of it. The excavations made beneath the Ḥaram and its surrounding walls show that the lie of the ancient walls on the west, south, and east agrees with those of the walls to be seen to-day (see Rosen. *Das Haram*, 4 ff.; Robinson's *BRP* iii. 222 ff.). The house itself would be sure to be erected on the site of the one preceding it.

For his temple Herod used double the space that was covered by Zerubbabel's temple,[a] and in order to obtain it he erected subterranean vaults in the south of the temple hill, and filled intervening spaces with stones and earth. The bounding line was raised from 4 stadia[β] to 6, the breadth remain ing 1 stadium, the length (N. to S.) being doubled.[α] The whole was surrounded by a high wall, covered with spikes,[β] the better to protect the place. The temple, including its courts, occupied an area of 1 stadium according to Josephus, or 500 cubits according to the Talmud. Assuming the stadium to be about 600 English feet, and the cubit to be about 18 inches, there is a difference of over 100 feet; but the numbers are round in each case, and the truth lies probably between them. Perhaps, as Fergusson suggests, the Talmud copies the dimensions of Ezekiel's temple: Fergusson's own dimensions, got by careful calculations, agree well with what Josephus says, viz. 585 ft. E. to W., and 610 ft. N. to S.; see *Temples of the Jews*, p. 77 ff.

---

[a] Jos. *BJ* I. xxi. 1.

[β] Jos. *Ant.* XV. xi. 3.

Gates.—The principal entrance to the enclosure was on the western side. *Middoth*[γ] names one only on that side called 'Kiponos,' but Josephus has four.[δ] Probably that named in *Midd.* is the principal one, as it led to the king's palace and to the city. Two more to the south led to suburbs of the city, one coinciding probably with 'Barclay's' gate, the other with 'Warren's.' Remains of the fourth are to be seen perhaps to the south of 'Wilson's arch.' Josephus[ε] speaks of gates on the south, but he does not say how many there were. *Midd.* mentions the two Huldah gates, which are to be identified with the two gates buried in the existing south wall of the Ḥaram—one west of the double gate, the other east of the treble gate. Both these show Herodian workmanship. Through both these gates it was possible to ascend from the vaults below to the temple area. On the east, *Middoth* refers to one gate on which the palace of Shushan was carved. It has been commonly thought to have been the same as the modern Golden Gate, but the latter is undoubtedly a Byzantine structure. Josephus does not say anything of any east gate. He speaks quite incidentally of one gate on the north;[ζ] *Midd.*[η] calls it Ṭadi[θ] (or Ṭari?).

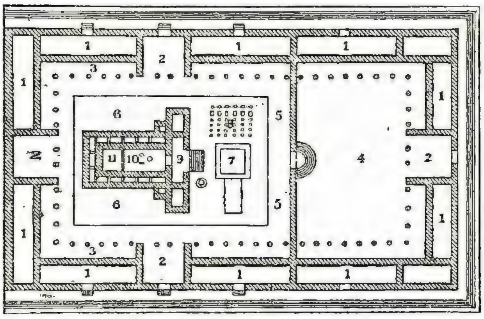

FIG. 10.—THE INNER COURT.

The Outer Court.—This is commonly called the Court of the Gentiles, because Gentiles were allowed to enter it; but in neither Josephus nor in *Midd.* does it get that name.

The walls of this court were surrounded on the inside by porticoes or cloisters. The north, west, and east sides had double porticoes, with two rows of white marble monolithic columns. The roofs were of carved cedar. On the south were the royal porticoes, the *στοὰ βασιλική*, which had 162 columns, with Corinthian capitals. These columns formed three aisles. The outermost row of columns were fastened into the wall of the enclosure. The middle of the three aisles was 45 ft. wide, the two side ones having a width of 30 ft. The inner portico was on higher ground than the two nearer the wall. The columns were so thick that three men with their hands stretched out could hardly clasp around one. On the east was what is called **Solomon's Porch** in the NT,[α] and is said by Josephus to have survived from the time of Solomon.[β] The east porticoes were, however, the work of Herod, according to the best judges; but it is singular that Josephus should have believed any part of these porticoes to have been the work of Solomon, unless it was much older than Herod's time. During the feasts the Roman soldiers used to walk on the roof of the porticoes in order to see that order was kept. The whole of the outer court was paved with stones. There were for the lower officials *pastophoria*[γ] or chambers ranged along the outer walls, probably between the walls and the porticoes, unless, indeed, they were between the double porticoes themselves. In close proximity to the west gate and the chambers was the *Beth Din*,[δ] where the SANHEDRIN met.

In the older sources (Josephus and *Middoth*) the Holy Place is not the *hêkāl*, as in the case of the previous Jerusalem temples, but the whole of the inner court, including the women's court, as contrasted with the outer court, which was open to heathen, and could be used for buying, selling, etc.[ε] The inner court was a rectangle, which included in it the women's court (4), the men's court or court of the Israelites (5),[ζ] the priests' court (6), and the house which stood in the last (10, 11). The inner court was on higher ground than the outer, there being five steps from the one to the other. Between the wall of the inner court and the porticoes of the outer court there was a free space of 10 cubits, higher than the rest of the outer court, and reached by a flight of fourteen steps. This formed a terrace all round the inner court except the east, and was called the *ḥêl* (חֵיל). At the inner edge of this *ḥêl* there was a stone parapet called *ṣôrēg* (סוֹרֵג).[η] On this tablets were put with inscriptions warning non-Jews against passing beyond this boundary. One such was found in recent years by the French consul, Clermont-Ganneau, on which, in Greek, the following words occur: *μηθένα ἀλλογενῆ εἰσπορεύεσθαι ἐντὸς τοῦ περὶ τὸ ἱερὸν τρυφάκτου καὶ περιβόλου. ὃς δ' ἂν λήφθη ἑαυτῷ αἴτιος ἔσται διὰ τὸ ἐξακολουθεῖν θάνατον*, i.e. '*No stranger is to enter within the balustrade*

[ζ] Keil (*Bib. Arch.* i. p. 190) excludes the women's court from the inner court. Now. (ii. p. 78) includes it, and rightly, because it stood on the higher platform of the courts of Israelites and priests and of the house.
[η] Jos. *BJ* v. v. 2; *Midd.* ii. 3.

and embankment round the sacred place. Whoever is caught will be answerable for his death, which will ensue.' This illustrates Ac $21^{26ff.}$, when St. Paul almost lost his life. The inner court was surrounded by a wall 40 cubits high on the outside, and on the inside but 25, owing to the raised ground inside. From the lower ground to the higher there were five steps.

Gates.—This wall had nine gates—four on the north, four on the south, and one on the east. The west had no gate at all. They had all of them folding doors, covered with gold and silver.[α] Of the four on the north side three were in the men's court (5), and one in the women's (4). Three of the north gates were called Nitzius, the Gate of Offering, and the Makad. On the south we read of the Flaming Gate, the Gate of Offering, and the Water Gate. The last opened upon the altar, and appears to have been a continuation of the Huldah Gate. The gate on the east was much more costly than the rest, and it is probably the 'Gate Beautiful' of Ac 3^2, and 'Nicanor's gate' of the Mishna.[β] It was made of Corinthian brass. Between the women's court and the men's there was a gate larger than the others, led to by fifteen steps, at the top of which was the level of the men's court. It was thickly overlaid with silver and gold.

Büchler[γ] argues ably that this is the Nicanor gate of the Mishna. *Midd.* i. 4, as all admit, states that; but it is argued by Schürer,[δ] Grätz,[ε] Spiess,[ζ] Nowack,[η] and most, that it is the gate on the east of the women's court that is meant by the above name. Büchler admits that Josephus is against him; but he charges the Jewish historian with inaccuracy, and calls the Talmud to his aid in proving this. Büchler's view is bound up with another position, which he also defends with ability,[θ] viz., that the wall of the inner court shut out the women's court altogether, as being part of the court of the Gentiles; the Nicanor gate being, then, that one at the east of the men's court through which one passed into the inner gate. Keil also speaks of the inner court as being reached by a gate at the western end of the women's court.[ι] But this is, as Büchler admits, against the common view, which is supported by Schürer,[κ] and Nowack,[λ] and the received text of Josephus.

Nicanor's gate—assuming the usual view—was 56 cubits high and 40 broad, the others that led out of the lower court being 30 high and 40 broad. Round the walls of the court there ran porticoes with a single piazza, the roof of which rested on lofty and highly-finished pillars. These porticoes were less indeed, but not less beautiful, than the porticoes of the outer court. Between the gates there were cells for storing the various properties belonging to the temple: these are called by Josephus[μ] γαζοφυλάκια.[ν] Concerning the special purposes of these rooms see Now. *op. cit.* ii. 79 n. 2. There were upper rooms over the gateways, hence justifying Josephus' description of them as tower-shaped. The cells between the gates had also upper rooms; hence we read of the upper room of Bet-Abtinas.[ξ] Somewhere within the women's court would be placed the thirteen boxes for receiving contributions to the temple. At least one must have been in the women's court, else the widow (Lk $21^{1f.}$) could not have put in her mite. See TREASURY. According to *Midd.* ii. 5, there were four cells in the women's court, but both Schürer and Now. think this unlikely.

The inner court was divided into an eastern part, into which women were admitted as well as men, and a larger western portion, which included the men's court and the priests' court. The house and the altar were in the latter, and were surrounded by its rampart. Just as the whole inner court was separated from the outer, and within the inner the men's was shut off from the women's, so the remainder was subdivided into a larger part for priests only. The men's court was 11 cubits wide, and surrounded the priests' court on all four sides.[α] The Mishna, however, appears to reduce the space for men to 11 cubits on the east alone. The altar and all the arrangements for sacrificing, as well, of course, as the house itself, were in the priests' court.

The house.—The higher ground of the house was attained by means of twelve steps. The inside area was 60 cubits high and the same in length, by 20 cubits in breadth. There were, as in the other temples, two divisions—the *hêkāl* or Holy Place,[β] which was 40 cubits long, and the *dĕbîr* or Most Holy Place, which was 20 cubits long. This last was empty, and was entered by the high priest once a year, viz. on the Day of Atonement. The *hêkāl* or larger room had in it the following:—Table of shewbread,[γ] altar of incense, the seven-armed lampstand.[δ] The altar stood in the middle, between the temple walls: to its north was the table, and the lampstand was on its south.[ε] Only the officiating priests were permitted to enter the *hêkāl*, to bring in the incense morning and evening, to trim the lamp, which was done once a day, and to supply the table with fresh shewbread, which was done every Sabbath.

The porch was 100 cubits in both height and breadth, and 11 cubits deep. It stood, therefore, like a high wall in front of the house. The breadth of the house, including its surrounding chambers, being 70 cubits,[ζ] the porch projected 15 cubits on each side.[η] There was an entrance to the porch 40 cubits high and 20 broad. There was, however, no door. Above the entrance Herod placed a golden eagle, which as a Roman emblem was very distasteful to the Jews; and during a turmoil, some time before the king's death, it was destroyed. From the entrance of the porch the *hêkāl* door, gilded like the court gates, could be easily seen. It was adorned with carvings of golden vines, with grapes, according to Josephus, as large as a man.[θ] Tacitus also speaks of this vine.[ι]

Veil.—In front of the *hêkāl* door there hung a beautifully coloured Babylonian veil. The *hêkāl* was shut off by a veil or veils, but there was no wall, nor therefore any door, leading into the *dĕbîr*. According to the Mishna,[κ] there were two veils between the *hêkāl* and the *dĕbîr*, with a cubit's free space between them. The outer was loose on the south side, the inner being loose on the north. On the Day of Atonement the high priest entered the *dĕbîr* with his censer by passing to the south side and getting behind the outer veil, until he reached the north of the inner veil, where he was able to enter the *dĕbîr*. In the NT this veil is spoken of in the singular, the two perhaps being looked upon as one.[λ] The veil outside the door of the *hêkāl* is never referred to in the NT. See VEIL.

Light.—No natural light came into the house from roof or side wall: it depended, for what light it had, upon the lampstand.

Chambers.—On all sides except the east, where

[α] They were the gift of a Jew from Alexandria.

[λ] See Mt 27^{51} ‖ Mk 15^{38} ‖ Lk 23^{45}.

the porch was, there were small chambers in which temple utensils were kept and priests resided. They were thirty-eight in number, and arranged in three storeys, in such a way that on the north there were five on each storey, making fifteen on that side: on the south there were also five on each storey. On the west there were three on the lowest and three on the middle storey, two being on the top. The three storeys reached, together, the same height as the house. The main entrance was on the N.E. of the house, where a small door communicated directly from the porch with the nearest chamber. From this chamber there was a stairway leading to the upper and middle storeys. This stairway was erected at the N.E. corner; just opposite, on the S.E. corner, there was an arrangement for carrying off the water. Above the house proper there was an upper room 40 cubits high, and of the same ground area as the house itself. The entire building, including the intervening wall and the ceiling, attained a height of 100 cubits, *i.e.* exactly that of the porch. The upper room had on the south a door leading upon the roof of the upper chambers on that side. By means of the stairs on the N.E. the top chambers could be reached. Passing round from N.W. to S. one came to the door leading into the top room of the house. In the floor of this upper room there were trap-doors, through which workmen were let down in boxes, that they might not be able to see any part of the house except where they were repairing.

Including the side chambers, the house had a width of 70 cubits, which is thus made up—

1.	Wall of stairway	5 cubits.
2.	Stairway	3 „
3.	Wall of chamber	5 „
4.	Chamber itself	6 „
5.	Wall of house	6 „
6.	Space within the house	20 „
7.	Wall of house	6 „
8.	Chamber	6 „
9.	Its wall	5 „
10.	Room for letting off water	3 „
11.	Wall behind	5 „
	Total	70 cubits.

Altar of burnt-offering.—In the east of the priests' court, immediately in front of the porch, was the altar of burnt-offering made of unhewn stone. It was larger than Solomon's altar, it being, according to the Rabbis, 32 cubits in length and breadth, and 10 cubits high. Josephus, however, gives 15 cubits as length and as breadth. The length and breadth given above are for the base, for it rose in three sections, so that at the top it formed a square of 24 cubits. According to Lv 6^{9}, fire was to be always burning on the altar. On the east of the altar there was a stairway of unhewn stone leading up to the altar: it was 32 cubits long and 16 broad. Altar and steps were whitewashed twice in the year, viz. at Passover and Tabernacles.[α] In the S.W. corner of the altar there were two holes for receiving the sacrificial blood, which passed thence to a passage in the ground, by which it was conveyed to the Kidron. Close by there was a marbled opening, down which men went to cleanse the channel along which the blood ran to the Kidron.

Between the altar and the house there was a space of 22 cubits, taken up largely by the twelve steps which led up to the porch. South of these steps there was a laver or wash-basin, in which priests washed their hands and feet. It was supplied through two pipes from the temple spring: these two pipes were increased to twelve at a later time by a certain ben Katin, who also made arrangements by which the water could be regularly renewed.[β]

North (8) of the altar the sacrificial animals were slain, and to aid in this there were six rows of rings, four in each row, all fixed in the ground. The animals that had to be killed were attached first of all to these rings, and then despatched. Still farther north there were eight low pillars with boards on them, each board having three rows apiece of iron hooks from which the animals after death were suspended. The spot would look much like a butcher's shop. By the side of these pillars there were eight marble tables on which the slain animals were flayed, washed, etc., ready for the altar.[α]

Priests' Court.—No one except a priest was usually permitted to enter the priests' court, which was regarded as more sacred than the men's court. Yet lay Israelites were allowed admission when they had sacrifices to offer, that they might, according to the ritual, lay their hands on the victim.[β] As before stated, this court was bounded all round, and not merely on the east by the men's court, which was 11 cubits broad.

The temple police.—The charge of the sacred enclosure was in the hands of the priests and Levites. The head of police—the captain of the temple[γ]—held so dignified a position that he was ranked with the chief priests. The entire external arrangements of the temple were under his authority. We read in Mark[δ] and Luke[ε] of 'rulers of the temple,' who were subordinates of 'the captain.' The guardianship of the temple was entrusted mainly to Levites, but partly also to priests. By day they were to see that no one overstepped the boundary beyond which he had no right to go, *e.g.* Gentiles had to be kept out of the inner court, women out of the men's, laymen out of the priests', and non-officiating priests out of the house; the *dĕbîr* to be entered but once a year, and even then by the high priest only. By night the gates were all shut, and none were allowed within except priests and Levites, who were stationed at different points. Three places of the inner court were guarded by priests; at twenty-one positions Levites kept watch, especially at the various gates. During the whole night the captain walked around to see that each was at his post. If the guard did not immediately arise on the captain's approach, the captain exclaimed, 'Peace to you.' If the guard were asleep the captain would strike him with a stick, and he had the right even to set fire to his clothes. Each day the guards were changed, those who followed receiving the keys from their predecessors at mid-day.[ζ] The senior of the men in charge kept the key of the court, in which the men were sentry, in a hole covered by a marble slab, to the under side of which was fastened a chain: the key was attached to this chain.

When the time came to close the gates, the marble slab was lifted and the key taken: the priests locked the inner court, replacing the key in the usual place. On the slab under which the key was, the guard in charge laid his clothes, and on them lay down to sleep.[η] How many were at one time in charge of the enclosure we do not know, but according to Josephus 200 men were appointed for the gates alone.

For the fate which befell the temple in the last years of its existence, reference must be made to the histories of Josephus, Grätz, and others. See, especially, short but striking accounts in Cornill, *History of the People of Israel*,[θ] and Cheyne, *JRL*.[ι] Already, in the days of Archelaus, the courts of the temple became the scene of revolt and

bloody massacres.[a] During the last Jewish revolt the most horrid scenes were witnessed. In A.D. 70 Roman soldiers were in possession of the fortress of Antonia, close to the enclosure. One of them, though contrary to the wish of Titus the emperor, threw a firebrand into the house itself, which took fire and burned to the ground. Thus perished the last of the Jerusalem temples. All of them were built by a people feeble politically, in art and in literature (except religious) despised; yet these temples are better known, and their records more fully preserved, than is the case with any other ancient temple, Egyptian, Assyrian, or Indian.

LITERATURE.—(A) *JEWISH WRITINGS.*—Josephus, *Ant.* xv. xi., *BJ* v. v.; cf. Spiess, *Der Tempel zu Jerusalem nach Josephus*, 1880; the Mishnic tract. *Middoth*; cf. Rabbi Hildersheim, *Die Beschreibung des Herod's Tempel im Tractat Middot und bei Flavius Josephus* ('Jahresbericht des Rabbiner-Seminars für das Orthodox Judenthum,' Berlin, 1876-77). There is a good edition of *Middoth* (no Gemara has been handed down) with Latin tr. and Com. by L'Empereur (Lugd. Bat. . . . 1630, small 4to). See also Surenhusius' *Mishna.* Maimonides, in part vi. of his י׳ חוקה, gives the Rabbinical traditions regarding the temple, its furniture, priests, etc. This was put into Latin by Ludwig Compiègne, and is found in vol. viii. of Ugolinus' *Antiquitates Hebraicæ.* Monographs on the temple have been written in Hebrew by O. Altschul (Amst. 1724) and others, but none of them are of much importance.

(B) *CHRISTIAN WRITINGS.*—Of the older treatises by Christian writers the following are noteworthy:—Villalpando and Prado, *In Ezech.* 3 vols. 1605; Capellus, *Τρισάγιον Sive Triplex Templi Delinatio* (Amst. 1643; also included in the Introd. to the London Polyglot); Lamy, *de Tabernaculo Fœderis, de Sancta Civitate Jerusalem et de Templo ejus* (Paris, 1720); Lightfoot (Dr. John), *Descr. Templi Hieros.* (Eng. in vol. ix. of Pitman's edition of his works in English; also published separately, Lond. 1825),—Lightfoot uses the Rabbinical material, but deals mainly with the temple of Herod; Lund, *Die alten Jüd. Heiligthümer*, Hamb. 1695, bk. ii. (several other editions). For a detailed recital of the older literature see Winer, *RWB*³, s. 'Tempel,' and Bähr, *Der Tempel Salomo's.* The following are the most important modern treatises:—Hirt, *Der Tempel Salomo's*, Berlin, 1809 (strong on the architectural side, but deficient in Biblical scholarship); J. Fr. von Meyer, *Der Temp. Salom.*, Berlin, 1830; Stieglitz, *Gesch. der Baukunst*, Nürn. 1827, p. 127 ff., *Beiträge zur Ausbildung der Baukunst*, Leipz. 1834; Bähr, *Der Temp. Sal.* 1848; Keil, *Der Temp. Sal.*, Dorpat, 1839 (critical and constructive, valuable), *Biblical Archæology*, T. and T. Clark, i. 162 ff.; Robinson, *BRP* (1841) i. 415 ff.; G. Williams, *The Holy City* (1849), ii. 296 ff.; Fergusson, *Essay on the Ancient Topography of Jerusalem*, 1847, *The Holy Sepulchre and the Tomb*, 1865, *The Temples of the Jews*, 1875, art. 'Temple' in Smith's *DB* (Fergusson's fanciful views as to the site of the temple, etc., have failed to win conviction except to a very limited extent); Warren, *The Temple and the Tomb*, 1880, *TSBA* vii. 309 ff. (in both he answers the arguments of Fergusson); T. H. Lewis, *The Holy Places of Jerusalem*, 1880; Th. Friedrich, *Tempel u. Palast Salom.* etc., Innsb. 1887; O. Wolff, *Der Tempel von Jerusalem und seine Maase*, 1887; Stade, *Gesch.* i. 311 ff. (the author, an acknowledged Biblical scholar, was aided by his colleague von Ritgen, professor of architecture); Perrot et Chipiez, *Le Temple de Sol.*, Paris, 1889, large folio, with fine diagrams; *History of Art in Sardinia, Judæa*, etc., London, 1890, i. 142 ff.; Conrad Schick, *Die Stiftshütte der Tempel in Jerus. und der Tempelplatz der jetz. Zeit*, Ber. 1896 (by an architect; the scholarship is weak, and proof references almost wholly wanting, though the constructions and plans are good). In addition to the older treatises on *Biblical Archæology* by Jahn (in English also), de Wette (4th and last edition improved by Räbiger, 1864), Allioli, and Keil (cf. also Spencer, *de Legibus, Dissertatio Sexta*), note particularly the works by Benzinger and Nowack, both issued in 1894, and based on the latest results. Nowack's work is the fuller, but Benzinger's the more compact and interesting. See also the Commentaries and other works referred to in the course of this article.

T. W. DAVIES.

TEMPT, TEMPTATION.—The Heb. and Gr. words which are translated 'tempt' and 'temptation' in EV have a range of meaning which covers every form of testing or putting to the proof, whether of man by God or of God by man.

The Heb. words rendered 'tempt' in AV are—

1. *Nissāh*, which signifies (1) to attempt to do a thing, as Dt 4^{34} (EV 'assay'); (2) to test or prove a thing, such as a weapon, 1 S 17^{39} (EV 'prove'); but chiefly (3) to test a person: in AV translated 'tempt' of God's testing Abraham, Gn 22^{1}; elsewhere of men faithlessly and provokingly putting God to the proof, Ex $17^{2.\,7}$, Nu 14^{22}, Dt 6^{16}, Ps $78^{18.\,41.\,56}$ 95^{9} 106^{14}, Is 7^{12}.

2. *Bāḥan*, synonymous in meaning with *niṣṣāh*, but translated 'tempt' in AV only Mal 3^{15}, of tempting God. In Mal 3^{10} and a few other places it is translated 'prove' in AV and RV; but most frequently the Eng. rendering is 'try.'

The only Heb. word translated 'temptation' is *maṣṣāh* (formed from *niṣṣāh* above), used of the *testing* by Jehovah, through signs and wonders, of the heart of Pharaoh and the Egyptians, Dt 4^{34} 7^{19} 29^{3}; and of the *trial* or *testing* of an innocent person, Job 9^{23} (EV 'trial')—unless the word here comes from *māṣaṣ* and means despair, RVm 'calamity.' The word is translated 'temptation' also in Ps 95^{8}, but there the place Massah (so RV) seems to be intended, as in Ex 17^{7}, Dt 6^{16} 9^{22} 33^{8}. See art. MASSAH.

The Greek words translated 'tempt' are—

1. πειράζω, which means (1) to attempt something, as Ac 9^{26} 16^{7} (EV 'assay'); (2) to test a person, without evil intent, as Jn 6^{6}, Rev 2^{2}; (3) to tempt to evil, as Mt 4^{1}, 1 Co 10^{13}, Ja $1^{13.\,14}$. On this verb see Cremer, *s.v.*; Hatch, *Essays in Biblical Greek*, 71 f.; Kennedy, *Sources of NT Greek*, 106 f. For the distinction between π. and δοκιμάζω see Trench, *NT Syn.* 267 ff.; also Cremer, s. πειράζω, and Berry, s. δοκιμάζω.

The devil is called 'the tempter' (ὁ πειράζων) in Mt 4^{3}, 1 Th 3^{5}.

2. ἐκπειράζω, to put to the proof, or test. (*a*) God, Mt 4^{7}, Lk 4^{12}; (*b*) Christ, Lk 10^{25}, 1 Co 10^{9}—all translated 'tempt' in EV, Amer. RV always 'try.'

3. In Ja 1^{13} ἀπείραστος (only occurrence) is translated by the verb 'tempt'—'God cannot be tempted (literally, 'is untemptable') with evil,' RVm 'is untried in evil.'

The only Greek word translated 'temptation' is πειρασμός, which is the translation in the LXX of *maṣṣāh* everywhere except Dt 33^{8} (Πεῖρα) and Job 9^{23} (where a different reading is followed). This word is used in NT for (1) a *testing* or *proving*, as 1 P 4^{12} (EV 'trial'), He 3^{8}, or that which tests or proves a person, as Gal 4^{14}; (2) *enticement to sin*, as Mt 6^{13}, Lk 4^{13} 8^{13}, Ja 1^{12}, 1 Co 10^{13}; and (3) of *affliction* or *calamity*, due to persecution or other trial from without, as Lk 22^{28}, Ac 20^{19}, Ja 1^{2}, 1 P 1^{6}. On this word see Hatch, *Essays*, 71 f.; Mayor on Ja 1^{2}, and his *Com.* 183 ff.; Hort on 1 P 1^{6}; Swete on Mk 14^{38}.

About 1611 the Eng. words 'tempt' and 'temptation' were used almost as widely as those Heb. and Gr. words, the only difference being that the verb had ceased to mean 'to attempt.' Examples (outside AV) of 'tempt' in the sense of 'test,' 'put to the proof,' without evil intent, are Jn 6^{6}, Wyc. 'But he said this thing, temptynge hym; for he wiste what he was to do'; Dt 13^{3} Tind. 'For the Lorde thy God tempteth you, to wete whether ye love the Lord youre God with all youre hertes and with al youre soules'; Dt 8^{2}, in Wilson's *Christian Dictionary* (1611), 'tempting thee that hee might know what is in thy heart.' In the same sense is 'temptation' used in 1 P 4^{12} Rhem. 'My deerest, thinke it not strange in the fervour which is to you for a tentation, as though some new thing happened to you.' And in the allied sense of trial, affliction, we find 'temptation' employed by Tymme in *Calvin's Genesis*, p. 717, 'But this also was a moste greevous temptation, to be banished from the promised lande, even unto death'; and p. 815, 'This was a verie sore temptation, that holie Jacob, of whome the Lorde had taken care, shoulde almoste he and his perish with hunger.' See also Driver on Dt 6^{16} and in *Par. Psalt.*, Gloss. i. under 'Prove.'

J. HASTINGS.

TEN COMMANDMENTS.—See DECALOGUE.

TENDER.—The adj. 'tender' is somewhat more restricted in use now than formerly. Probably under the influence of the Biblical 'tender mercies,' it has become mostly figurative, and is chiefly used in a good sense. We might still speak of diamonds as 'tender' with Maundeville (*Travels*, 106, 'Other diamonds men find in Arabia that be not so good, and they be more brown and more tender'); but we should not speak of wax so, as Wyclif does (*Select Works*, iii. 103, 'The tendre wex maketh no preynte in the seel, bot the seel maketh a preynt in tendere wex'). The meaning in AV is usually 'soft,' 'delicate,' used of children (Gn 33^{13}); gently nurtured youths (1 Ch 22^{5} 29^{1}, Pr 4^{3}), men (Dt 28^{54}, Is 47^{1}), and women (Dt 28^{56}); also of herbs (Dt 32^{2}, Job 38^{27}), plants (Is 53^{2}), grass (2 S 23^{4}, Pr 27^{25}, Dn $4^{15.\,23}$), grapes (Ca $2^{13.\,15}$ 7^{12}), branches (Mt 24^{32}, Mk 13^{28}) in spring. In 2 Ch 13^{7} Rehoboam is called 'tender hearted'

---

[a] Jos. *Ant.* XVII. ix. 3, x. 2.

(רַךְ־לֵבָב, LXX *δειλὸς τῇ καρδίᾳ*, Vulg. *corde pavido*), a phrase which has now quite a different meaning. The modern meaning is found in Eph 4^{32} (*εὔσπλαγχνος*). In Gn 29^{17} we read that 'Leah was tender eyed' (וְעֵינֵי לֵאָה רַכּוֹת; LXX *οἱ δὲ ὀφθαλμοὶ Λείας ἀσθενεῖς*, Vulg. *sed Lia lippis erat occulis*), where the Heb. as well as the Eng. probably means that Leah's eyes were weak (not 'bleared' as Vulg.), and so, as Dillmann and others suggest, 'without brightness or brilliancy of lustre.' See LEAH. The Heb. word רַחֲמִים *raḥămîm* (in this sense always plu.) is translated occasionally in AV 'tender mercies' (Ps 25^{6} 40^{11} 51^{1} 69^{16} 77^{9} 79^{8} 103^{4} $119^{77.\ 156}$ 145^{9}, Pr 12^{10}). The sing. 'tender mercy' occurs in NT, Lk 1^{78} (*σπλάγχνα*), Ja 5^{11} 'The Lord is very pitiful, and of tender mercy' (*οἰκτίρμων*, RV 'merciful').

The verb 'to tender' in the sense of 'care for' occurs in 2 Mac 4^{2} 'Thus was he bold to call him a traitor, that had deserved well of the city, and tendered his own nation' (*τὸν κηδεμόνα τῶν ὁμοεθνῶν*). Cf. Cranmer, *Works*, i. 136, 'But to be plain what I think of the Bishop of Winchester, I cannot persuade with my self that he so much tendereth the king's cause as he doth his own'; Latimer, *Sermons*, 96, 'How God tendreth and regardes the cause of the widdow and the poore.' The verb in this sense is a direct derivative from the adj. (which is from Lat. *tener*, through Fr. *tendre*), not the same as the verb to tender (fr. Lat. *tendere*, through Fr. *tendre*), meaning to proffer, show. J. HASTINGS.

TENT.—אֹהֶל (*οἶκος, σκηνή*) is the word commonly used for 'tent'; AV often 'tabernacle,' RV always 'tent' except Ps 61^{4}. מִשְׁכָּן (*σκηνή*) 'habitation,' is usually rendered 'tabernacle,' only once (Ca 1^{8}) 'tent.' For distinction between אֹהֶל and מִשְׁכָּן see art. TABERNACLE. סֻכָּה = 'booth' made by interweaving leaves and branches; once (2 S 11^{11}) AV 'tent' (RV 'booth,' LXX *σκηνή*) and AVm (1 K $20^{12.\ 16}$ RVm 'hut'). According to the Rabbis, a booth becomes a tent if a bit of cloth is spread over it to protect it from the sun, or stretched under the roof to prevent leaves and twigs from falling on the table (*Succah* i. 3). קֻבָּה (*κάμινος*) from [קָבַב] 'to hollow out,' is once in AV tr. 'tent' (Nu 25^{8} RV 'pavilion,' marg. 'alcove'; cf. Arab. *ḳubbah* 'a large vaulted tent,' also 'dome,' 'vault,' whence, with the art., through the Spanish, 'alcove,' orig. *a vaulted recess*). From חָנָה (*παρεμβάλλω*) 'to encamp,' AV 'to abide in tents' (Nu $9^{20.\ 22}$, Ezr 8^{15}), comes מַחֲנֶה 'camp' (LXX *ἀτείχιστος*), tr. by AV 'tents' in Nu 13^{19} etc.; in each case RV corrects.

We may safely take the modern tent as closely resembling that of ancient times. No simpler dwelling can well be imagined. The tent-cover is rough, strong cloth of dark goats' hair. It is commonly supported by nine poles arranged in rows of three; the middle row lengthwise, is somewhat higher, measuring from 6 to 7 ft.: the roof therefore slopes to front and back. The cover is stretched, and the tent held in position by means of long cords fastened to the cloth, and attached to pins firmly driven into the ground. A curtain of the same material, but rather lighter, is hung round the more exposed side of the tent, to shelter from sun and wind. A similar curtain, drawn across the middle, fixed on the tent-poles, divides the tent, the one end forming the men's apartment, the other that of the women (חֶדֶר, cf. Arab. *khidr*). Very seldom, and that only in cases of considerable wealth, the women have a tent to themselves.

The making, pitching, striking, packing, and unpacking of the tents is all women's work. They spin the hair yarn, twist the cords, and weave the cloth in long narrow strips, with very primitive appliances. To form roof or curtain, these strips are sewn together to the required breadth. The greatest care is taken with the roof. When it has been used for a little, and is somewhat shrunken, it becomes quite waterproof, and will turn the heaviest rain. Sometimes cloth for the roof is bought by way of barter, from such villages as Khabab, in el-Lejâ, or Judeideh, overlooking Merj A'yûn, which are famous for their hair manufactures. To excel in skilful driving home of the tent-pegs is an immemorial ambition among Arab women.

The furniture of this 'house' or 'house of hair' (*bait*, *bait sha'r*, or, less frequently, *bait wabar*) is extremely simple. In a few tents of the rich may be found cushions and mattresses covered with coloured silk; but for the most part a couple of coarse straw mats serve the purposes of chairs and table by day, and bed by night. A circle of thin leather, about 2 ft. in diameter, drawn into a sort of bag by means of a thong passed through holes round the edge, contains the thin loaves baked in the desert, and is spread flat on the ground at meal-time. The lamp (anciently of clay) or lantern is now generally of tin, made by Jewish travelling tinkers, from empty petroleum cans. Clay ware is too brittle to be of much use. Usually each tent has a metal plate, flat or convex, for baking; a few pots or pans for cooking, the food being eaten from the dish in which it is cooked; perhaps a hand-mill; and if the owner make any pretensions to dignity, mortar and pestle; and the necessary utensils for roasting the beans and making coffee. The fireplace may be a few stones set loosely together, or a hole in the ground just at the edge of the tent. Goat-skins, half tanned, with the hair outward, are made into bags, which hold grain, water, butter-milk, and other liquids; and when swung on a tripod serve to churn butter. The butter is always melted at once, and is carried about in these skins. The saddles of horse and camel, with corresponding saddle-bags of rough hair cloth, complete the tent furniture. Most things are crowded together in the women's apartment; that of the men is always free for the reception and entertainment of guests.

When the tents are few in number, belonging to some small family or division, they are set in a circle; the sheikh's tent is that to the right of the entrance. In larger camps the order varies. One visited by the present writer contained upwards of 150 tents, and from a distance resembled a town of black-roofed houses, arranged in irregular streets. The sheikh's tent is distinguished from the others only by its greater size. It always faces the direction from which strangers are most likely to arrive.

The black tents of the nomads have flitted shadow-like over Syrian field and Arabian steppe from the dawn of human history. The ancient fathers of the Hebrew race dwelt in tents (He 11^{9} etc.). Their wealth consisted mainly in cattle. The tent, so easily portable, is by far the most convenient 'house' for the flock-master, who is ever on the move in search of fresh pasture. After the settlement in Palestine, those portions of the people who followed the herdsman's life continued to dwell in tents, *e.g.* those east of the Jordan who held the grazing lands towards the desert. This old form of life left its impress in the language of later times, *e.g.* נָסַע, where the root-idea is the pulling out of the tent-pegs. When the tent-life was long past, men still spoke of going home as going 'to their tents' (Jos 22^{4}, 2 S 20^{1}, 1 K 12^{16}). The tent and its appurtenances play a considerable part in sacred imagery. Fleeting life is like the shepherd's tent, here to-day, gone to-morrow (Is 38^{12}). When the cord gives way the tent collapses; hence the tent-cord as a figure of the thread of life (Job 4^{21}). The secure city is a tent whose pegs cannot be plucked up, nor its cords broken (Is 33^{20}). Prosperous growth is pictured as a lengthening of the cords and a strengthening of the stakes (Is 54^{2}). See also in NT 2 Co 5$^{1.4}$, 2 P 1$^{13.14}$, Lk 16^{9}.

On tent-making see, further, art. HAIR, vol. ii. p. 285^{a}, and PAUL, vol. iii. p. 699^{a}.

W. EWING.

TEPHON (ἡ Τεφών; *Thopo*; Syr. *Tephus*).—One of the towns in Judæa fortified by Bacchides (1 Mac 9^{50}). Josephus gives the name as Tochoa (Τοχοά, *Ant.* XIII. i. 3), which is suggestive of Tekoa; but he always writes this place Θεκώα, or Θεκωέ. Tephon was probably an old Tappuah; but whether it was Tappuah **1** or **2**, or Beth-tappuah, is uncertain. The occurrence of the name with Timnath and Pharathon suggests Tappuah **2**. See TIMNATH.

C. W. WILSON.

TERAH (תֶּרַח, Θάρρα and Θάρα).—The father of Abraham, Naḥor, and Haran, Gn 11$^{24-32}$, 1 Ch 1^{26}, Lk 3^{34}. Along with his three sons he is said to have migrated from Ur of the Chaldees to Ḥarran, where he died. In Jos 24^{2} it is said that he 'served (עָבַד) other gods,' a statement which gave rise to some fanciful Jewish *haggādôth* about Teraḥ as a *maker* of idols (see, *e.g.*, *Bereshith rabba*, § 17, and cf. Bk. of Jubilees, chs. 11. 12). The question whether Teraḥ is to be taken as a *personal* name is involved in the same uncertainty as arises in connexion with the names of all the patriarchs (see art. ABRAHAM, and esp. art. JACOB, vol. ii. p. 533 ff.). Knobel compares the name with *Tharrana*, south of Edessa. W. R. Smith makes *Teraḥ* = 'wild goat' as totem, comparing Syriac ܬܪܚܐ, to which Frd. Delitzsch (*Prolegom.* 80) adds Assyr. *turâhu* with same meaning [but see *ZDMG* xl. [1886] 167 f. (where Nöld. points out not only that ܬܪܚܐ in the passage quoted is an error for the correct ܬܪܘܚܐ, but also that the root is ארח, of which in Heb. the א would not be readily elided); cf. Gray, *HPN* 110]. Jensen (*ZA* vi. 70, cf. *Hittiter*, 150 ff.) thinks it may be the name of a god, comparing the first syllable of N. Syrian or Hittite personal names, such as *Tarḥular*, *Tarḥumazi*, etc. (cf. Mez, *Gesch. d. Stadt Ḥarran*, 23). Any of these explanations appears preferable to that suggested in Riehm, *HWB*^{2} 1478^{b}, that the name is to be accounted for because Teraḥ *remained behind* (late Heb. *tāraḥ*, Aram. *tĕraḥ*) in Ḥarran, while Abraham journeyed farther.

J. A. SELBIE.

TERAH (תֶּרַח; B Τάραθ, A Θάραθ).—One of the stations of the Israelites in the desert (Nu 33$^{27.28}$). It comes between Tahath and Mithkah, and has not yet been identified.

TERAPHIM (תְּרָפִים).—The word is plural according to its form. But its derivation, the purpose of that which it denoted, and the method of its use, still present many obscurities. Several of the older Jewish commentators derive the word from תּוֹרֶף *tōreph*, which means 'foulness,' and especially *pudendum*; but, if this is correct, it is plausible to suppose that this word, expressive of contempt, was substituted for and finally supplanted the original name, in which case that name is entirely lost (cf. בֹּשֶׁת for בַּעַל). Among the numerous later derivations the one which most deserves consideration is that suggested by Schwally (*Leben nach dem Tode*, p. 36 n.), who connects the word with רָפָה *rāphāh*, a derivation which would bring it into contact with the *rĕphā'îm* or 'shades' of Is 14.

Teraphim are generally supposed to have been household deities (cf. Gn 31^{19}, 1 S 19$^{13.16}$, but see Ezk 21^{21}). Hence it has for long been the habit to compare the reverence paid to them with that which was offered to the *Lares* and *Penates* in Roman times. Further, almost every passage in which the word occurs in OT shows that their use was bound up with the practices of magic and soothsaying (cf. especially Ezk 21^{21}). The above passage in Samuel makes it also certain that the figures sometimes represented the human form. It is unknown whether these were always full life-size. Thus, on the one hand, the fact that Michal could deceive the messengers from her father by leading them to believe that the muffled teraphim which she had laid on the bed was the figure of her husband, makes it probable that some were so. And, on the other hand, the fact that Rachel (Gn 31^{34}) could hide those which she had stolen from Laban beneath her in the camel-litter, while her father searched the baggage for his lost property, is sufficient to prove that others were considerably smaller. Again, there is nothing in the incident with Michal to show conclusively whether such a figure represented the entire human form, or whether it was simply a head or at most a bust. Thus the suggestion of some among the Jewish commentators (see Moore, *Comm. on Judges*, p. 382) is not devoid of probability, viz. that the teraphim, at least in the early period, were mummied human heads, for which the refinement of later centuries substituted more or less rude representations in wood or in the precious metals. One might then bring their use (of which among the Hebrews we hear very little) into comparison with the customs of divination by means of such heads among the Hauranians (cf. Chwolsohn, *Die Ssabier u. der Ssabismus*, ii. pp. 19 ff., 150 ff.). With great likelihood then do Stade (*GVI* i. p. 467) and Nowack (*Heb. Archäol.* ii. 23) consider that the teraphim came to represent the figures of ancestors, and make the consulting of them a kind of Manes oracle. This would further make it easy to understand how their use was common to the Israelites and the Aramæans (cf. Gn 35$^{2.4}$), and how Nebuchadnezzar is represented as resorting to this method of divination (Ezk 21^{21}). And it would serve to explain, since they were used for oracular purposes, why in 2 K 23^{24} they are set alongside 'those who consult familiar spirits' and 'wizards.' The reverence paid them as household deities, and the fact that their use was common to all the nations of the region, make it more natural that, though the teraphim were abolished by Josiah, they reappear during the years of the Exile (Zec 10^{2}). And if we recognize that they were used for such oracular purposes, and were not honoured with supreme worship, we can find it easier to understand how men who sincerely worshipped J″ might not note the inconsistency of their presence in their homes. See, further, art. SOOTHSAYING.

It may be added that in Hos 3^{4} and Jg 17^{5} teraphim are mentioned along with the ephod, as though they were in some way connected with that. It was an old suggestion by Spencer (*De legibus Hebr. ritualibus*, I. iii. diss. 7, sec. 2), that the Urim were of the same nature as, and eventually took the place of, the teraphim. The LXX at Hos 3^{4} reads δῆλα for תְּרָפִים, and this may imply that the translator found in the Heb. text אוּרִים.

A. C. WELCH.

TEREBINTH does not occur at all in AV, and only thrice in RV, being substituted in Is 6^{13} for 'teil tree,' in Hos 4^{13} for 'elm,' and in Sir 24^{16} for 'turpentine tree.' Strong reasons, however, can be urged (see the very full discussion in Ges. *Thes. s.v.*) for rendering by 'terebinth' whenever the Heb. is איל [only in constr. אֵיל and plur. אֵילִים] or אֵלָה or אַלּוֹן, and for reserving the tr. 'oak' (by which these words are commonly rendered in AV and RV)* for אַלּוֹן [in Jos 24^{26} אַלָּה, unless, as is probable, we should read here אֵלָה]. See esp. Del. and Dillm. on Gn 12^{6}, cf. *Oxf. Heb. Lex. s.vv.*, and note that in Hos 4^{13} and Is 6^{13} אֵלָה and אַלּוֹן are clearly distinct. The references to the terebinth in Scripture would thus be the following :†—

(1) איל : Is 1^{29} 'They shall be ashamed of the terebinths which ye have desired,' 57^{5} 'ye that inflame yourselves among the terebinths,' 61^{3} 'that they might be called terebinths ‡ [prob. the figure is derived from the strength and durability of this tree] of righteousness,' Ezk 31^{14} 'nor that their terebinths § [perh. fig. of pride] stand up in their might.' ELIM, the second station of Israel after passing the Red Sea (Ex 15^{27} 16^{1}, Nu 33$^{9.10}$), may have derived its name originally from the presence of terebinths, although latterly associated more with *palms*.

(2) אֵלָה : Gn 35^{4} 'the terebinth which was by Shechem,' Jos 24^{26} [reading אֵלָה for אַלָּה] 'the terebinth that was in the sanctuary of the LORD,' Jg 6$^{11.19}$ 'the terebinth which was in Ophrah,' 2 S 18$^{9.10.14}$ the terebinth in which Absalom was entangled, 1 K 13^{14} the terebinth under which the 'man of God' sat, 1 Ch 10^{12} the terebinth in Jabesh under which the ashes of Saul and his sons were buried [this tree is called in 1 S 31^{13} a tamarisk ‖], Hos 4^{13} (‖ אַלּוֹן and לִבְנֶה) 'they burn incense . . . under oaks and poplars and terebinths,' Ezk 6^{13} 'their idols . . . under every thick terebinth,' Is 1^{30} Judah is to be 'as a terebinth that withereth,' 6^{13} (‖ אַלּוֹן) 'as a terebinth and as an oak whose stock remaineth when they are felled.' This tree gives its name to the Vale of ELAH (עֵמֶק הָאֵלָה) 1 S 17$^{2.19}$ 21$^{9\,(10)}$, and to ELAH Gn 36^{41} (=EL-PARAN Gn 14^{6}, ELATH Dt 2^{8}, 2 K 14^{22} 16^{6}, and ELOTH 1 K 9^{26}, 2 K 16^{6}).

In Gn 49^{21} we should probably tr. 'Naphtali is a slender terebinth [reading אֵלָה for אַיָּלָה], the one who sends out beautiful tops' [referring to the heroes and national leaders sprung from this tribe]; so Dillm. and many modern commentators. For other suggested renderings, with their justification and the necessary textual emendations, see Gunkel ('Naphtali is a nimble hind, which drops fine lambs,' as an alternative to Dillm.'s rendering), Ball ('Naphtali is a branching vine that yieldeth comely fruit'), Hommel ('Naphtali is a hind let loose, which drops he-goat lambs,' *i.e.* which has a numerous male progeny [*Expos. Times*, Oct. 1900, p. 46^{b}]).

(3) אַלּוֹן : Gn 12^{6} (so Dt 11^{30}) 'the terebinth of MOREH' ('director's terebinth'), 13^{18} 14^{13} 18^{1} 'the terebinths of MAMRE,' Jg 4^{11} 'the terebinth in ZAANANNIM' (cf. Jos 19^{33} [reading אֵלוֹן not אַלּוֹן] 'the terebinth of BEZAANANNIM'), 9^{6} 'the terebinth of the pillar that was in Shechem' (see art. PILLAR [PLAIN OF THE]), 9^{37} 'the terebinth of MEONENIM' ('soothsayers' terebinth'), 1 S 10^{3} 'the terebinth of Tabor' [where it is possible that we should read דְּבוֹרָה 'of Deborah'].

The terebinth is repeatedly (see, amongst above passages, esp. Gn 12^{6} 35^{4}, Jos 24^{26}, Jg 6$^{11.19}$, Is 1^{29} 57^{5}, Hos 4^{13}, Ezk 6^{13}) mentioned in connexion with Canaanitish or Israelitish religious rites (see art. SANCTUARY, p. 395^{b}). The tr. 'terebinth' we have contended for is supported by the circumstance that this tree was less common in Palestine than the oak and would thus be better suited to mark a locality, while the higher age it attains would cause it to be esteemed as more sacred.

The terebinth (*Pistachia terebinthus*, L.) grows in Palestine to the height of 15–17, rarely 20, feet. It has a thick gnarled trunk, numerous long branches with slender twigs, feathery leaves with 7 oval lanceolate leaflets, which are at first of a reddish, but afterwards of a glossy dark-green colour. In Palestine the tree is deciduous, being an evergreen only in more southern latitudes. The male and female flowers grow upon different trees, the fruit consists of small oval berries which are produced in grape-like clusters. **Turpentine** of a very pure quality may be obtained by making incisions in the stem and branches, and collecting the resin which exudes. In modern Palestine this practice appears to be unknown (Rob. *BRP*^{2} ii. 222 f.). J. A. SELBIE.

TERESH (תֶּרֶשׁ).—A chamberlain of Ahasuerus, who along with BIGTHAN formed a plot against the king, which was foiled by Mordecai, Est 2^{21} (BAא om., א$^{\text{c.a. mg sup}}$ Θάρας) 6^{2} (BAא om., א$^{\text{c.a. mg}}$ Θάρρας). It is possible that the name should be read תדש, *i.e.* Theudas (see Willrich, *Judaica*, p. 19). He is called in Ad. Est 12^{1} THARRA.

TERTIUS (Τέρτιος). — The amanuensis through whose agency St. Paul wrote the Epistle to the Romans. In Ro 16^{22} he joins personally in sending his greetings. St. Paul seems to have generally written by means of an amanuensis, adding just a few words at the end (1 Co 16^{21}, Col 4^{18}, 2 Th 3^{17}) in his own hand, by way of authentication, perhaps written in large and bold characters (Gal 6^{11}). In the case of the Epistle to the Romans he probably added the concluding doxology (16$^{25-27}$). It is an interesting subject of speculation how far the employment of different amanuenses who wrote out their shorthand notes may have influenced the style of different epistles or groups of epistles (see Sanday - Headlam, *Romans*, Introduction, p. lx). A. C. HEADLAM.

TERTULLUS.—The name is a diminutive from Tertius, as Lucullus from Lucius, etc. It is thoroughly Latin, and occurs in the 2nd cent. as *agnomen* of Pliny's colleague Cornutus, and as a *cognomen* borne by Flavii and by Sulpitii. In Ac 24 Ananias arrives at Cæsarea to accuse Paul before Felix, accompanied by certain elders, 'and, as pleader (ῥήτωρ), one Tertullus.' Tertullus was doubtless one of the Italian *causidici* who abounded in the provinces. The proceedings, even in the inferior court of a mere *procurator* like Felix, would probably be in Latin (Smith's *Dict. Gr. and Rom. Antiq.*, *s.* 'Conventus'; yet see Schürer, *HJP* II. i. 50; Lewin, ii. 684) and conducted under Roman forms, requiring the services of a professional advocate. Tertullus was not a Jew, as Blass needlessly infers from his use of the first person plural. The advocate naturally identifies himself with his clients. Tertullus' speech begins with a characteristic *captatio benevolentiæ*. He gives to Felix the coveted praise of *Pacator provinciæ* (v.^{2}), and welcomes the reforming hand of the governor, present at every place and in every matter (v.^{3a}); whereas Tacitus remarks of Felix (*Ann.* xii. 54), 'intempestiuis remediis delicta accendebat' (cf. *Hist.* v. 9). These singularly gross compliments, evidently condensed by Luke, culminate in a subtler turn : Tertullus hints (v.^{4}) that they must be distasteful to so modest a man. The body of the speech is evidently, in its uninterpolated form, a mere jotting by Luke, who may have been present (20^{17} 27^{1}), of the heads of the accusation. But these are carefully preserved: Paul is (1) a stirrer up of *στάσεις*, (2) the ringleader of a sect, and (3) guilty of an attempt to profane the temple. The charges are most skilfully chosen. Felix, with his experience (v.^{10}) of Jewish affairs, would realize how dangerous such a prisoner was to the peace of his province. Tertullus is a competent counsel, and knows his man.

---

* The distinction between the Heb. terms is no more maintained in the LXX than in the EV. Cf. the conspectus of renderings in art. OAK.

† In many of these passages RVm gives 'terebinth.'

‡ AV and RV poorly 'trees of righteousness,' LXX γενεαὶ δικαιοσύνης, Vulg. [taking from a different איל] *fortes justitiæ*.

§ AV 'trees,' RV [taking from a different איל] 'mighty ones.' The text is very doubtful ; Cornill strikes out אליהם ; for conjectural emendations see Bertholet and Kraetzschmar, *ad loc.*

‖ It is possible that the Chronicler may have substituted אֵלָה for אֵשֶׁל as being a less distinctively sacred tree marking a shrine.

The grammar of the speech is dislocated, the participle of v.^{15} has no proper principal verb; the interpolated passage only partially supplies this defect. Cases of broken construction are somewhat frequent in the speeches of the latter part of Acts: see 24$^{18f.}$ 26$^{2. 16. 23.}$ (an obvious condensation)^{28}. The author had not worked up his drafts into their final form, or at any rate the finishing touches were not given. A more remarkable example of this may be found in the eighth book of Thucydides, where all the speeches are left in the form of rough abstracts.

On fanciful etymologies suggested for the name (*τερατολόγος*, Ter-Tullius) see Basil Jones in Smith's *DB*, *s.v.* A. ROBERTSON.

TESTAMENT.—This word does not occur in the EV of the OT; and, whereas in the AV of the NT it occurs 13 times, this number is reduced to 2 in the RV by the substitution of '**covenant**' in 11 places. In the NT the Gr. equivalent both of 'testament' and of 'covenant' is invariably *διαθήκη*. In the LXX the same Gr. word is the equivalent of *bĕrîth* ('covenant') except in two passages, Dt 9^{15} (*μαρτύριον*, pl.) and 3 (1) K 11^{11} (*ἐντολή*, pl.), while it represents no other Heb. word, according to the best authorities, except about 8 times: Ex 27^{21} 31^{7} 32^{15} (*'ēdûth*, 'testimony'), Dt 9^{5} (*dābār*, 'word'), 2 Ch 25^{4} (*kāthûb*, 'what is written'), Jer 41 (34)^{18} (*dibrê habbĕrîth*, 'words of the covenant'), Dn 9^{13} (*tôrah*, 'law'), and Zec 11^{14} (*'aḥăvāh*, 'brotherhood'). This double exclusiveness is a peculiarity of the LXX version, for *bĕrîth* is often represented in the later versions of Aquila, Symmachus, and Theodotion by *συνθήκη*, the common Gr. word for 'covenant' in its more exact sense of *compact between parties*. Apparently, then, the choice of *διαθήκη* was deliberate, and has severely ruled out *συνθήκη*, even where the latter would have been more strictly correct, as Ps 82 (83)^{5} the compact made with one another by Edom, Moab, etc.; 1 K (S) 23^{18} the covenant between David and Jonathan. Why this deliberate determination, extending even to solecism? The idea mainly associated with *bĕrîth* was religious, that of an independent, voluntary engagement or settlement on the part of God, and the 'least unsuitable' Gr. equivalent for this was *διαθήκη*, an arrangement by one, not *συνθήκη*, an agreement between two; for though *διαθήκη* meant, in ordinary Greek, a disposition *by will*, the verb *διατίθεσθαι* covered authoritative arrangements generally. This 'one-sided' sense of *διαθήκη* (the acceptance of which is in harmony with Dr. Davidson's interpretation of *bĕrîth* in art. COVENANT) comes out very clearly in such uses of it as in Sir 14$^{12. 17}$ 'the covenant of the grave' (the imposition of death), 'the covenant . . . "Thou shalt die the death."' In Sir 24^{23} *διαθήκη* is made equivalent to the *Law*, and in 3 (1) K 11^{11} *bĕrîth* is *ἐντολαί* (commandments), which Solomon had not kept. But the Divine 'arrangement' was a gracious one: 'the Divine *διαθήκη* is a promise' (Vaughan on Ro 9^{4}, cf. Eph 2^{12}); hence St. Paul, while he uses *διαθήκη* only 9 times, uses *ἐπαγγελία* 25 times, because it lays stress on God's free grace; cf. Gn 15^{18} ('the Lord made a covenant with Abraham . . . I will give,' etc.), Ex 34^{10} ('I will make a covenant . . . I will do marvels'), Is 59^{21} ('This is my covenant . . . my spirit shall not depart'). It is true that there are conditions to be fulfilled; but the idea is that God imposes these as part of His beneficent arrangement; just as a will imposes conditions, but is not a *covenant* in the strict sense of the term. (Cremer asserts that Philo uses *διαθήκη* in no other sense than that of 'one-sided' disposition).

The LXX translators made their choice of *διαθήκη* before its older signification was seriously affected by the extensive spread of will-making among the Greeks, and the assimilation by them of 'Roman ideas on wills' (Ramsay, *Galatians*, p. 360). Thus they had still at their disposal in the word the connotation of the solemnity and publicity of an irrevocable disposition by which, as a religious act, the maker of the disposition voluntarily, and by his own authority, bound his heir and, concurrently, himself in the presence of the community and its gods, assigning to the heir primarily the religious duties and rights of the family, and imposing arrangements which the heir had to carry out, and which he could at once undertake, and into the advantages of which he could at once enter, while he who made the disposition was still living. A word with such a connotation suited the idea of an irrevocable promise made by God to His chosen people, freely and on His own absolute authority, a promise of a religious inheritance into which they could at once enter by fulfilling the conditions which God, on the same absolute authority, imposed (Ramsay, *Galatians*, p. 361 ff.).

Διαθήκη is of course often used in the NT in the OT sense, Lk 1^{72}, Ac 3^{25}, Ro 9^{4}, Eph 2^{12}. In some passages engagement and testamentary disposition seem to be combined (He 9^{16}, 1 Co 11^{25}), the *διαθήκη* being a testament in the light of the death, an engagement in the light of the blood shed as a pledge (Evans). The sense of 'will,' the ordinary Gr. sense, is an exclusively NT usage; and this usage varies in its aspect according to the conceptions of the readers for whom the Epistles in which it occurs were designed. Thus the Epistle to the Hebrews—even if it was intended for a Church in Jerusalem and not in Rome—was written to a people who knew only the Roman will, out of which the rabbinical will in Palestine arose, and on which it was modelled. Hence the will there spoken of is regarded as in force only after the maker's death (9$^{15-17}$), and consequently the writer is led to argue that a death is connected with every Divine *διαθήκη*, specially with the last will, that of Christ; and according to Roman law the last will was alone valid. In Gal 3^{15}, on the other hand, where again a human will, a will dealing with an inheritance (3^{18}), furnishes the parallel, the writer conceives of a will known to his readers as irrevocable and unalterable, even by the maker, when once it has been made by him and ratified by public authority, and argues from this analogy that the Law could not, as a hostile codicil, abrogate the Promise. Further, the devolution under this will was a devolution of religious responsibilities and rights, and those who inherited these under the will became there and then *sons* as inheriting and continuing the faith of Abraham (3^{7}). Such a will was not Roman but Greek, or rather Græco-Syrian, and its regulations are found in the Roman-Syrian law-book, which recognized Græco-Syrian law as still largely in force in the Eastern provinces. This law regarded will-making as *per se* son-making; and where sons were thus made by adoption (Gal 4^{5}), which was not a Jewish practice of any importance, they could not be put away; they were even in a better position than sons by birth. Thus the line of thought is that the believing Gentiles inheriting and continuing the faith of Abraham became thereby adopted sons, with a title more secure than the 'Jews by nature.' But at Ro 8^{17}, 'If sons, then heirs,' the idea is reversed. Here we are in the atmosphere of Roman law; and the idea in Roman law was that children must inherit.

It is noticeable that the Latin word *fœdus*, signifying a covenant between parties, is also applied to an independent, 'one-sided' disposition, arrangement, imposition. When Lucretius (ii. 254) writes of *fœdera fati* he means nothing else than the arrangements imposed by fate; and Vergil (*Georg.* i. 60) and Ovid (*Met.* x. 353), as well as Lucretius (v. 924), speak of the *fœdera* imposed by nature. But the classical usage of διαθήκη as 'will,' and the close connexion of the word in the OT with the idea of κλῆρος (inheritance), together with the intensification in the NT of the idea of sonship, combined to bring *testamentum* into greater favour than *fœdus* as the rendering of διαθήκη, especially as *fœdus* suggested equality and *testamentum* superiority. Finally, as a consequence, *testamentum* became the title of the documents containing the attested promises of blessings willed by God and bequeathed to us in the death of Christ.

Wörterbuch*; the publications by Grenfell and Hunt on the Egyptian papyri; and the various Commentaries and Bible Dictionaries. J. MASSIE.

TESTAMENTS OF THE XII PATRIARCHS.—i. TITLE AND CONTENTS.—This most valuable pseudepigraph has never received the attention it deserves, but the next few years will witness a full atonement for past neglect. This writing consists, as the title indicates, of the dying commands of the twelve sons of Jacob to their children. The idea is in part derived from the Testament of Jacob in Gn 49. Each Testament treats of some virtue or vice which finds special illustration in the life of this or that patriarch. In some cases the virtue or vice in question appears in the title. This holds true of the Greek MS C throughout. But in this respect C is late; for in O* and R all mention of the virtues and vices is omitted, and where they appear in P (as they do in a few cases) they differ in all but two instances from C. In the Armenian Version the titles of Simeon, Benjamin, Issachar, and Zebulun contain no reference to ethical characteristics, and those of Levi and Gad differ from their forms in CP. It is probable, therefore, that the name of each Testament was originally merely Διαθήκη in the Greek Version, followed by the name of the particular patriarch to whom it was ascribed, and צואת in the original with a similar sequence. (Compare the Hebrew title of the Testament of Naphtali צואת נפתלי, published by Gaster, and observe that צוה is used technically of a man's last will and testament, 2 S 17[23], 2 K 20[1], Is 38[1]). According to R, it is true that the title of each Testament is merely the name of the patriarch. The title of the entire work was probably 'The Twelve Patriarchs'; for it is mentioned simply as Πατριάρχαι in the Stichometry of Nicephorus, the Synopsis Athanasii, and other lists.

In the next place it is to be observed that in each of the Testaments three elements can be distinguished. (1) The patriarch gives a brief history of his life, in which he emphasizes his particular virtue or vice. This history is generally a midrashic expansion of certain biblical statements, but in some cases it contains materials that are in direct conflict with them. (2) The patriarch next proceeds to 'improve' on the incidents just set forth in his own career, and exhorts his children to imitate the virtues or to shun the vices that were conspicuous in it. (3) Finally, the patriarch deals prophetically with the destinies of his descendants, emphasizes the premier rank and authority of Levi and Judah, and foretells the evils of overthrow and captivity that they will bring upon themselves should they fall into sin and disown the hegemony of Levi and Judah. These predictions are for the most part of purely Jewish authorship, but not a few are distinctively Christian.

ii. CRITICISM.—To account for the conflicting Jewish and Christian elements which appear side by side in the work, Grabe (*Spicileg. Patrum*², 1714, i. 129–144, 335–374) suggested that the book was written by a Jew and subsequently interpolated by a Christian. This hypothesis, however, failed till recently to gain the suffrages of scholars, mainly owing to the opposition of Corrodi (*Krit. Gesch. des Chiliasmus*, ii. 101–110). For nearly two centuries after Grabe little progress was made. Nitzsch (*de Test. XII Patriarch. libro VT pseud.*, Wittenberg, 1810) described the author as a Jewish Christian of Alexandria, who had imbibed many Essene doctrines; whereas Ritschl (*Entstehung der altkathol. Kirche*¹, 322 ff.) assigned the book to a Gentile Christian, mainly on the ground of Benjamin 11, a chapter which, we now know, is a Christian interpolation; but in the second edition of the work abandoned this view and advocated a Nazarene authorship.

It is needless here to enter on a discussion of the views of Kayser (*Die Test. der Zwölf Patr.*, in Reuss and Cunitz's *Beiträge zu den theolog. Wissenschaften*, 1851, pp. 107–140), who, falling back on Grabe's theory of interpolation, traced the book to Ebionitic circles; or on those of Vorstman (*Disquisitio de Test. XII Patriarcharum origine et pretio*, 1857), who submitted Kayser's theory to a severe criticism, and concluded that the Testaments showed no trace of Ebionism, but were the product of Gentile Christianity. This conclusion, which upholds Ritschl's first view, was subsequently upheld by Hilgenfeld (*ZWT*, 1858, pp. 395 ff.; 1871, 302 ff.), while the view of Nitzsch was adopted by Langen (*Das Judenthum*, 1866, pp. 140–157 and Sinker (*Test. XII Patr.* 1869, pp. 16–34; Appendix with collation of R and P, 1879; art. 'Test. XII Patr.' in Smith's *Dictionary of Christian Biography*, iv. 865–874).

It must be confessed that, so far, few results of permanent value were arrived at, but in 1884 a great advance was made through Schnapp (*Die Test. der XII Patr. untersucht*, Halle, 1884), who revived in an improved form Grabe's hypothesis of Christian interpolation of an originally Jewish work. Schnapp's theory is that in its original form the book consisted of biographical details respecting each of the patriarchs, and of appropriate exhortations founded on these details. Thus the work embraced only two of the three elements mentioned above. At a later date this book was worked over by a Jewish writer, who enriched all the Testaments with sections dealing with the coming destinies of the various tribes and with other details of an apocalyptic character. Finally, the book was re-edited by a Christian, who in some cases made large additions, and in others merely modified the text in order to adapt its predictions to Christianity.

Subsequent research has notably confirmed part of the above theory. Thus Conybeare's collation of the Armenian Version in the *JQR* [1893], 375–398; [1896], 260–268, 471–485, proved that very many of the passages marked by Schnapp as Christian interpolations were absent from that version.

Since Schnapp's work the Testaments have been rehandled from various sides, by Kohler (*JQR*, 1893, pp. 400–406), Gaster (*PSBA*, 1893, 1894), Marshall (*PSBA*, 1894), Charles (*Encyclopædia Biblica*, 1899, i. 237–241), and Bousset (*ZNTW*, 1900, 142–175, 187–209). Bousset's articles are of great value, and will call for frequent reference.

Since many of the above articles were published before Kautzsch's *Apokryphen und Pseudepigraphen des Alten Testaments*, 1900, it must be confessed that it is with disappointment that scholars have turned to Schnapp's introduction to and translation of the Testaments in that volume. Both are quite inadequate from the standpoint of our present knowledge.

---

* COPR denote Greek MSS. See below, § v. (*a*).

1. *Christian Interpolations.*—These were, as we have seen, rejected by Schnapp merely on internal grounds in 1884, though he could occasionally have justified his conclusions from R. But even in his translation[*] of 1900 he has repeatedly failed to call attention to the fact that his conjecture is confirmed by MS evidence, and in many passages he has attributed too much to the interpolator, where a study of his textual authorities would have enabled him to make much smaller and neater excisions. But not only can the student summon rich textual materials to his aid, he can also in not a few cases detect the interpolator's hand in certain poetical passages where the foreign element destroys the rhythm and parallelism. Thus Levi 18, Judah 25, Simeon 6, Dan 5 are either wholly or in part Hebrew poetry. Only the first of these has been recognized by Schnapp as being such. We quote a few lines as an illustration—

Τότε ἐκλείψει ἡ γῆ Χάμ,
Καὶ πᾶς λαὸς ἀπολεῖται.
Τότε καταπαύσει ἡ γῆ πᾶσα ἀπὸ ταραχῆς,
Καὶ πᾶσα ἡ ὑπὸ οὐρανὸν ἀπὸ πολέμου.
Τότε Σὴμ ἐνδοξασθήσεται,
Ὅτι Κύριος ὁ Θεὸς μέγας τοῦ Ἰσραήλ, φαινόμενος ἐπὶ γῆς
ὡς ἄνθρωπος καὶ σώζων ἐν αὐτῷ τὸν Ἀδάμ.
Τότε δοθήσονται πάντα τὰ πνεύματα τῆς πλάνης εἰς καταπάτησιν,
Καὶ ἄνθρωποι βασιλεύσουσι τῶν πονηρῶν πνευμάτων.

It will be seen that v.^{6} destroys the parallelism. We must reject as interpolations μέγας τοῦ Ἰσραήλ and σώζων ἐν αὐτῷ τὸν Ἀδάμ from a comparison of the two Armenian recensions (see Bousset, *ZNTW* [1900], 147). The ὡς ἄνθρωπος is against the parallelism. The verse probably read—

Ὅτι Κύριος ὁ Θεὸς φανήσεται ἐπὶ γῆς.

By means of textual authorities the Christian interpolations can be removed from Reuben, Issachar, Judah, and Zebulun. Those in Simeon can be reduced to one or two phrases in 6. 7, and likewise those in chapter 8. Dan 5. 6. 7 cannot be wholly purged by means of textual authorities, nor yet Naphtali 4. 8.—In Joseph 19 the Greek is defective and the Armenian corrupt; but Schnapp is wrong in branding the bulk of it as a Christian interpolation, it is probably a fragment of an early Maccabæan Apocalypse.—As regards Benjamin, though the distinctively Christian phrases are omitted by the Armenian at the close of 3, yet the promise of redemption through Joseph is suspicious. Though ἄμωμος ὑπὲρ ἀνόμων παραδοθήσεται could be said of him, yet the next phrase ἀναμάρτητος ὑπὲρ ἀσεβῶν ἀποθανεῖται cannot be justly referred to him. In 9 the Christian interpolations in the Gr. are wanting in the Arm., save the words ὑβρισθήσεται (cf. Lk 18^{32}) and ἐξουθενωθήσεται (Lk 23^{11}), which appear Christian. In Levi 2. 3 the text of COP is very corrupt, but by means of recension *a* of the Armenian and R it is possible to recover the primitive Jewish text. This latter text described the three heavens, but this account was intended by the interpolator to be an account of the seven heavens. To this question we shall return presently. In Levi 4 and 10 and in 14^5[†] Christian interpolations are present alike in Gr. and Arm., and one or two phrases at the close of 16. The famous passage in Levi 8, which claims for the descendant of Levi the triple honours of prophet, priest, and king, becomes intelligible through the aid of R and the Arm., and is of Jewish origin. It refers to John Hyrcanus. To this section we shall return later.

The Christian interpolations, therefore, which cannot be eliminated by textual authorities, do not extend beyond certain phrases or sentences in Sim. 6. 7, Levi 4. 10. 14. 17, Dan 5. 6. 7, Napht. 4. 8, Asher 7, Joseph 19, Benj. 3 (?). 9.[*] Thus by means of recent research about three-fourths of the Christian interpolations have been removed from the text.

2. *The Source and Character of the Christian Interpolations.*—Schnapp was of opinion that all the Christian passages were inserted in the text by a single Christian interpolator. The present writer in 1899 (*Encyc. Biblica*, i. 239) contended that the evidence pointed rather to a succession of interpolators. Bousset, however (*ZNTW* [1900], 174), has since maintained Schnapp's view, on the ground of the unusual affinities subsisting between the interpolated passages. Assuming, then, that all the interpolations were from one hand, Bousset has not much difficulty in determining the probable period of the interpolator to be between A.D. 150 and 200. But his assumption cannot be maintained, as we hope to show presently. In the meantime, excluding the conflicting statements, we have the following theological doctrines in the Christian additions:—

Thus 'the Lamb of God,' Benj. 3^{18}, 'the Only-begotten,' Benj. 9^8, should be born of a virgin of Judah, Jos. $19^{3\text{f.}}$, a man, indeed, Napht. 4^{11}, a man from the seed of Judah, Jud. 24^2, yet at once God and man, Sim. 7^4. 'God' should 'take a body,' Sim. 6^{15}, and appear as 'God in the flesh,' Benj. $10^{18\text{f.}}$, and dwell with men on earth, Napht. $8^{3\text{ff.}}$. He should be 'sinless,' Jud. 24^4, Benj. 3^{19}, 'the Light of the world,' having come 'to lighten every man,' Levi 14^9, 'the Branch of the Most High and Fount of life for all flesh,' Jud. 24^8. He should be a High Priest, Reub. $6^{13\text{f.}}$, and 'the Saviour of Israel,' Napht. 8^3, 'the Saviour of the Gentiles,' Dan 6^{16}, the Saviour of the world, Levi 4^{11} 17^5, Benj. 3^{18}, and 'save Israel and all the Gentiles,' Asher 7^8 (Benj. 3^{20}), yea, all mankind, Levi 2^{19} (Sim. $6^{11\text{f.}\,16}$). On earth He should be baptized, Levi 18^{14}, and acknowledged by the voice of the Father from heaven, Levi 18^{12}, should afterwards be seized by the high priests, Levi $14^{5.\,6}$, 'insulted, set at nought and lifted up on a tree,' Benj. $9^{9\text{f.}}$, crucified, Levi 4^{13}, 'die for the godless,' Benj. 3^{19}. The veil of the temple should be rent, Benj. 9^{10}, Hades robbed through His sufferings, Levi 4^5: He should redeem His sons from Beliar, Zeb. $9^{16\text{ff.}}$, take the captives from Beliar, even the souls of the saints, Dan $5^{25\text{f.}}$, ascend from Hades, Benj. $9^{11\text{f.}}$, rise from the dead, Levi 16^7 $17^{5\text{f.}}$, ascend into heaven, Levi 18^6, Benj. 9^{12}.[†]

The above is a fairly full Christology to be worked into a Jewish book. We have now to draw attention to conflicting statements on the doctrine of the Incarnation.

In accordance with the account just given, it is said in Benj. $10^{14\text{f.}}$ that 'the King of heaven will appear on earth in the form of a man' (ἐν μορφῇ ἀνθρώπου). On the other hand, the doctrine is probably Docetic in Zeb. 9^{19} 'ye will see God in the fashion of a man' (ἐν σχήματι ἀνθρώπου), and undoubtedly so in Asher 7^9 'God in the semblance of man' (θεὸς εἰς ἄνδρα ὑποκρινόμενος). Again, there is a third view represented, the Patripassian, in Sim. $6^{10\text{f.}}$, where we read of 'the Lord, the great God of Israel,' appearing on earth as man. In Asher $7^{6\text{f.}}$ the language betrays the same standpoint: 'The Highest (ὁ Ὕψιστος) will visit the earth—as man, eating and drinking with men'; and in Levi 4^5 'the sufferings of the Highest.' The contrast is brought into fuller relief by such a declaration as that in Levi 4^{11} 'Till the Lord visit all the nations through the mercy of his Son.' Again there is a want of uniformity as regards the descent of Christ. Thus He is said to be from Judah only, Napht. 8^3, from Judah and Levi, Gad $8^{1\text{-}3}$, Dan 5^{23}, from Levi and Judah, Sim. 7^4, Lev. $2^{18.\,19}$.

Together with the above phenomena, we should observe that the Christian additions are very differently attested by the Gr. MSS COPR. R has the fewest of these, and in many cases attests single-handed the non-interpolated text against COP and the two Arm. recensions; OP attest it in a few cases, and C in at least one (Levi 18^{17}). Of the two Armenian recensions, *a* agrees most with R, and *β* with COP. Finally, each Gr. MS has Christian additions peculiar to itself, and similarly the Armenian Version (cf. Sim. $7^{1f.}$) and apparently each of its recensions.

---

[*] Schnapp has printed in his translation all the passages he considers Christian interpolations, in spaced type. This is a very convenient arrangement. We shall touch upon most of these in the sequel.

[†] Where a form such as 14^5 is used in reference to the Testaments, it means ch. 14, line 5, in Sinker's edition.

[*] Bousset (*op. cit.* p. 173) makes the list slightly shorter.

[†] In addition to the above, observe the important passage (Benj. 11) regarding St. Paul, which mentions his writings and achievements; also the expansion of the account of the three heavens into one of the seven heavens in Levi 2. 3; but this expansion may be due to a Jewish hand.

From the above facts, therefore, we conclude that the Christian additions are due to several hands, and were made at different periods, probably from the middle of the 2nd cent. onwards.

3. *Integrity of original Jewish Testaments.*—We have seen how thoroughly critical research has confirmed Schnapp's theory that the Christian references in the text are the result of interpolation. We have now to consider his second hypothesis, that the apocalyptic sections do not belong to the original work, which confined itself to biographical details and practical exhortations founded on these. Thus two different sources are postulated. But Schnapp has not succeeded in establishing this hypothesis as he did the former. He has tried to show, indeed, that in the Testament of Joseph we have two partially conflicting accounts of Joseph's history, derived from different authors—*i.e.* 1–10^{a} and 10^{b}–18. But, even if we agreed with him that these sections sprang from two distinct sources, this concession would not support his hypothesis. On the other hand, his analysis of this Testament may be quite wrong. We may have here merely a transposition of the text such as is found in the Ethiopic Enoch, chs. 91–94. Nearly every difficulty disappears if we read it in the following order—1. 10–16. 2–9. 17–20. In the Testament of Levi the section ch. 2, *ὡς δὲ ἐποιμαίνομεν . . .* 6, *ἐν τῇ καρδίᾳ μου*, certainly conflicts with its present context. This vision does not refer to the events before and after, except in 5^{5-8}, but has a general fitness, in that its object is the glorification of Levi. The writer of the Testament may have embodied this section from already existing materials, or it may have been added subsequently by an interpolator. But, neglecting further consideration of Schnapp's hypothesis of two Jewish sources, we may observe that the evidence points rather to a groundwork, written, as we shall presently see, in the 2nd cent. B.C., in praise of the earlier Maccabæans, and enlarged with certain interpolations of a conflicting character in the 1st cent. B.C. These interpolated sections, which constitute an attack on the later Maccabæans, are Levi 10. 14–16, Judah 21–23, Dan 5 (certain paragraphs), Zebulun 9, Sim. 7^{4}.[*] With these sections we shall deal presently when establishing the dates of their origin and that of the groundwork.

iii. DATE.—The earliest reference to our book by name is not earlier than Origen (*Hom. in Josuam*, 15^{6} [ed. Lommatzsch, xi. 143]: 'In aliquo quodam libello qui appellatur testamentum duodecim patriarcharum, quamvis non habeatur in canone, talem tamen quendam sensum invenimus quod per singulos peccantes singuli satanæ intelligi debeant'). An earlier reference may exist in *Fragment* 17, Irenæus (ed. Stirren, i. 836, 837). External evidence, therefore, is of slight service for our present purpose. The internal evidence, however, is happily clear and decisive.

The groundwork of the Testaments constituted an apology on behalf of the Maccabæan high priests. Thus in Reub. $6^{19.20}$ the words ἀποθανεῖται ἐν πολέμοις ὁρατοῖς καὶ ἀοράτοις can only be interpreted of a high priest who is also a warrior.[†] Such a description would suit John Hyrcanus. Earlier in the same chapter this double function is referred to more clearly, διαστελεῖ εἰς κρίσιν καὶ θυσίας ὑπὲρ παντὸς Ἰσραήλ. And a few lines later, εὐλογήσεται τὸν Ἰσραὴλ . . . ὅτι ἐν αὐτῷ ἐξελέξατο Κύριος βασιλεύειν παντὸς τοῦ λαοῦ (R). But the reference becomes still clearer in Levi 8^{19-21} ὁ τρίτος ἐπικληθήσεται αὐτῷ ὄνομα καινόν, ὅτι βασιλεὺς ἐν τῷ (Arm. Gr. MSS give ἐκ τοῦ wrongly) Ἰούδα ἀναστήσεται, καὶ ποιήσει ἱερατείαν νέαν, κατὰ τὸν τύπον τῶν ἐθνῶν, εἰς πάντα τὰ ἔθνη.[*] These clauses point clearly to the civil and priestly functions of the Maccabees subsequent to B.C. 153, and a few lines further on the attribution of prophetic powers to this family (ἡ δὲ παρουσία αὐτοῦ ἀγαπητή, ὡς προφήτης ὑψίστου [O]) enables us to identify the very member of this dynasty to whom our author alludes. This was John Hyrcanus,[†] who, according to Josephus (*BJ* I. ii. 4; *Ant.* XIII. x. 7), combined in his own person the threefold offices of prophet, priest, and king (τρία γοῦν τὰ κρατιστεύοντα μόνος εἶχεν τήν τε ἀρχὴν τοῦ ἔθνους καὶ τὴν ἀρχιερωσύνην καὶ προφητείαν). This limits the date of the work to B.C. 135–105. To the above period belongs the eschatology of the Messianic hymn in Dan 5^{23-33}, according to the best textual authorities, with the exception of such an expression as τὰς ψυχὰς τῶν ἁγίων καλέσει εἰς ἑαυτόν (so Arm.) in Dan 5^{26}, and of one or two phrases.[‡] The same is true of the Messianic hymn in Jud. 24 and the account of the resurrection in Jud. 25.

Unhappily, the second Apocalypse in Jos. 19 is too hopelessly corrupt, even in the Armenian,[§] to arrive at any definite chronology. Finally, in Napht. 5^{14-16} the successive nations are mentioned that brought Israel into bondage; the last of these is the Syrians: Ἀσσύριοι, Μῆδοι, Πέρσαι, Ἐλιμαῖοι, Γελαχαῖοι, Χαλδαῖοι, Σύροι, κληρονομήσουσιν ἐν αἰχμαλωσίᾳ τὰ δώδεκα σκῆπτρα τοῦ Ἰσραήλ. Thus the passage was written prior to the domination of Rome, *i.e.* before B.C. 63.

The book, therefore, so far as we have considered it, was written between B.C. 135 and 63. Since, however, no reason has appeared for bringing the *terminus ad quem* later than B.C. 103, the work may safely be assigned to the years B.C. 135–103.[‖] It would thus form a sequel to Eth. Enoch 83–90, which was written before B.C. 161. It reproduces some of its phraseology in Jos. 19.

But certain passages, to which we have already referred, belong, like Eth. Enoch 91–104, and the Psalms of Solomon, to a later date. In these the Maccabæan king-priests are the object of the fiercest invective. These attacks are made in Levi $10^{14.15}$, where, as in Ps-Sol 2. 4. 8, the priests are charged with destroying the Law and teaching false doctrine (cf. Eth. En. 94^{2}), with seducing Israel (cf. Eth. En 94^{5} 104^{10}), with profaning the temple, with committing fornication, and marrying the daughters of the Gentiles. Again, in Jud. 23, Judah is charged with every kind of abomination and idolatry (cf. Eth. En 99^{7-9}). But the notes of time are still more manifest in Jud. 22^{1-3}, which speaks of internal divisions and civil wars and the overthrow of the Maccabæan dynasty by aliens (ἐπάξει δὲ αὐτοῖς διαιρέσεις κατ' ἀλλήλων καὶ πόλεμοι συνεχεῖς ἔσονται ἐν Ἰσραήλ, καὶ ἐν ἀλλοφύλοις συντελεσθήσεται ἡ βασιλεία αὐτῶν [Arm. Gr. μου]). The aliens may be taken to be the Romans or the Herodian dynasty (which was of Idumæan origin). In Zeb. $9^{4.7f.}$ the civil strife between Aristobulus II. and Hyrcanus II. is clearly depicted: Μὴ σχισθῆτε εἰς δύο κεφάλας . . . Ἐν ἐσχάταις ἡμέραις . . . διαιρεθήσεσθε ἐν Ἰσραήλ, καὶ δύο βασιλεῦσιν ἐξακολουθήσετε. Since the writer in the last passage says that this civil war will be ἐν ἐσχάταις ἡμέραις (cf. Levi 10, ἐπὶ συντελείᾳ τῶν αἰώνων; also Levi 14), it follows that the composition of Levi 10. 14–16, Jud. 22. 23, Dan 5^{13-23}, Zeb. 9, cannot be of a much later date, and may be reasonably assigned to the years B.C. 60–40. It is more difficult to determine the date of Jud. 21. This chapter stands by itself in attacking the monarchy and in upholding the priesthood. Bousset (*op. cit.* 192) assigns it to the time of Hyrcanus II.

iv. LANGUAGE.—The time of composition in itself determines this question in the main. The various writers of the work belonged in all cases to the ranks of the HASIDÆANS, who maintained the doctrines afterwards upheld by the Pharisees. The original, we therefore presume, was written in Semitic, and, in all probability, in Hebrew. The present writer has elsewhere pointed out (*Encyc. Biblica*, i. 239–241) that (1) Hebrew constructions and expressions are frequent, (2) that paronomasiæ which are lost in the Greek can frequently be restored by retranslation into Hebrew, and (3) that certain passages which are obscure or unintelligible in the Greek become clear on retranslation into Hebrew. We shall content ourselves with one or two examples of the above statements.

---

[*] So also Bousset on the whole (*op. cit.* 189 ff.) in 1900. The present writer had drawn attention to this fact in his *Eschatology, Hebrew, Jewish, and Christian*, 1899, and to the early elements in the Testaments in *Encyc. Biblica*, i. 237–241.

[†] Another reference to the warrior priests occurs in Sim. $5^{9f.}$ καὶ ἐν Λευὶ ἀδικήσουσιν ἐν ῥομφαίᾳ ἀλλ' οὐ δυνήσονται πρὸς Λευί, ὅτι πόλεμον Κυρίου πολεμήσει.

[*] This kingly high priest is the theme also of Levi 18^{2}—

Τότε ἐγερεῖ Κύριος ἱερέα καινόν,
Ὧ πάντες οἱ λόγοι Κυρίου ἀποκαλυφθήσονται.
Καὶ αὐτὸς ποιήσει κρίσιν ἀληθείας ἐπὶ τῆς γῆς ἐν πλήθει ἡμερῶν,
Καὶ ἀνατελεῖ ἄστρον αὐτοῦ ἐν οὐρανῷ ὡς βασιλέως (P Arm.).

[†] So already Kohler, *JQR* v. 402; and subsequently Bousset.

[‡] The Messianic hope here appears as in Eth. En. 83–90. The Messiah is said to proceed from 'Judah and Levi.' This is certainly wrong for 'Judah' or 'Levi' or 'Levi and Judah'; cf. Dan 5^{9}, Reub. 6, Sim. 5. 7, Levi 2, Iss. 5. The order 'Judah and Levi' is found in Christian interpolations, as Bousset has already recognized; cf. Gad 8, Jos. 19. According to Jud. 24, the Messiah is to be descended from Judah. This no doubt is what is meant in Eth. En. $90^{37.38}$; for the Messiah is there distinguished from Judas Maccabæus, who is represented as fighting till the advent of the Messianic kingdom. Bousset assigns both these hymns to the latter half of the 1st cent. B.C.; but the character of the eschatology is wholly against this assumption.

[§] See Preuschen's translation in *ZNTW* [1900], 138.

[‖] This date holds good of the narrative portions also. See Bousset, *op. cit.* 197–205.

Thus in Reub. 3 ἐν αὐτῷ ἐξελέξατο = בחר בו ; Levi 8^{19} ἐπικληθήσεται αὐτῷ ὄνομα καινόν=יקרא לו שם חדש. Napht. 1^{9} ἐν πανουργίᾳ ἐποίησε Ῥαχὴλ . . . διὰ τοῦτο ἐκλήθην Νεφθαλείμ=נפתלה רחל . . . לכן נקראתי נפתלי. Finally, in Napht. $6^{3f.}$ ἰδοὺ πλοῖον ἤρχετο . . . μεστὸν ταρίχων, ἐκτὸς ναυτῶν καὶ κυβερνήτου, the phrase μεστὸν ταρίχων, which=מלא מֶלַח, has arisen from a corrupt dittography of בלא מַלָּח=ἐκτὸς ναυτῶν. This last fact was pointed out by Gaster (*PSBA*, Dec. 1893, Feb. 1894) in his edition of the Hebrew text of a Testament of Naphtali, and may be regarded as conclusive; for the above phrase is found in this Hebrew Testament—והנה אנייה הולכת . . . בלא מלח.

v. VERSIONS (Greek, Aramaic, Syriac, Armenian, Slavonic, Latin).—The earliest versions were the Greek, the Armenian, and probably the Syriac. (*a*) Of *the Greek Version* six MSS are known. Of these, the Cambridge MS (C) of the 10th and the Oxford MS (O) of the 14th cent. have already been made known through Sinker's edition of the Greek text (*The Testaments of the Twelve Patriarchs*, 1869); the Vatican MS (R) of the 13th and the Patmos MS (P) of the 16th cent., through the Appendix he published in 1879. The two remaining MSS are still unpublished, but are being used by Sinker in forming a new Greek text. It is to be presumed that in the new text R will be mainly followed and not C as in the old edition.

(*b*) *The Aramaic Version.*—This version was not brought to light till quite recently. Only one complete leaf and a half of the entire MS have been preserved. The MS was brought by Schechter from the Cairo Genizah in 1896, and its contents recognized in 1900 by H. L. Pass, who, together with J. Arendzen, published the text in the *JQR* [1900], 651–661. The fragmentary folio contains a passage somewhat similar to Jud. 5. The complete folio has portions of Levi 11–13. Although at times the Greek and Aramaic agree word for word, they more often diverge both as to contents and to order. The Aramaic is much fuller. It is noteworthy that it agrees in this respect with the Syriac fragment against the Greek. To this point we shall return in dealing with that version.

(*c*) *The Syriac Version.*—Of this version only a fragment remains, preserved in a Syr. MS [Brit. Mus., Add. 17,193—*Cat.* ii. 997], dated A.D. 874. This MS consists of a series of 125 extracts from different sources, No. 80 of which is derived from Levi 12. This extract contains three sentences which are unattested by the Greek, and it was probably on this ground that Preuschen (*ZNTW* [1900], 108) declared that its evidence was valueless as regards the existence of a Syriac Version. Now, it is worthy of remark that these additional three sentences are present word for word in the newly discovered Aramaic; and yet, so far as all three versions have a common text, the Syriac and Greek agree against the Aramaic. Thus, Gr. and Syr. give ὀκτώ where Aram. = ὀκτωκαίδεκα, and where the former give ὀκτωκαίδεκα the latter = ἐννεακαίδεκα.

(*d*) *The Armenian Version.*—It is to F. C. Conybeare that we owe our first knowledge of the value of the Armenian Version, through his collation of the Armenian with Sinker's Greek text of the Testaments of Reuben, Simeon, Judah, Dan, Joseph, Benjamin (*JQR* [1895], 375–398; [1896], 260–268, 471–485). In 1896 the first Armenian edition of the text was published by the Mechitarist Fathers at Venice in a small volume, including many other non-canonical writings of the OT. This edition is based on five MSS.* Subsequently Preuschen wrote a learned article (*ZNTW* [1900], 106–140), in which he shows, in dependence on the Venice edition, that there were two recensions of the Armenian text α and β, of which the former is much the briefer and earlier, and contains likewise fewer Christian interpolations. In this article he gives a German translation of the Testament of Levi. For further details see *op. cit.* 130–140.

(*e*) *The Slavonic Version.*—This version exists in two recensions, which are published by Tichonrawow in his *Monuments of Old Russian Apocryphal Literature* [1863], i. 96–145 and 146–232. With the help of Bonwetsch, Bousset tested this version and found it worthless for textual purposes. It is most nearly related to the Greek text of O (P).

(*f*) No earlier *Latin* Version is known than that of Robert Grosseteste. This was made from C, and is valueless, therefore, from a critical standpoint.

vi. VALUE OF THE TESTAMENTS.—This work has been simply a sealed book till the present, owing to the difficulty of discriminating the various elements in the text. Now that we have achieved this task in its main outlines, we discover that we have in the groundwork of the Testaments a unique work of the 2nd cent. B.C.; for, with the exception of Jubilees, it constitutes the only Apology in Jewish literature for the religious and civil hegemony of the Maccabees from the Pharisaic standpoint. To the few Jewish interpolations which belong to the next cent. a large interest attaches; for these, like Eth. Enoch 91–104 and the Psalms of Solomon, constitute an unmeasured attack on every office — prophetic, priestly, or kingly—administered by the Maccabees. But, turning aside from the historical to the religious bearings of the book, we may notice shortly its eschatology, its teaching on the various heavens, and its peculiar view as to the twelve tribes of Israel.

(*a*) *The Eschatology.*—We shall confine our attention to three Messianic passages, Levi 18, Jud. 24. 25, and Dan $5^{23ff.}$. According to Levi 18, the Messiah is to spring from Levi and be the eternal High Priest and civil ruler of the nation, Levi 18^{16}. During his rule sin should gradually cease, Levi 18^{17}; Beliar be bound, Levi $18^{20.\ 21}$; the gates of Paradise be opened and the saints eat of the tree of life, Levi $18^{19\text{-}21}$. We have here an eternal Messianic kingdom on earth as in Eth. Enoch 83–90. In Jud. 24. 25 and Dan $5^{23\text{-}33}$ the forecast is on the whole the same, save that the Messiah is to spring not from Levi but from Judah (Jud. 24^{9}, Dan 5^{23} †), as no doubt also in Eth. Enoch $90^{37.\ 38}$. These hymns would be earlier, if we are right, than that in Levi 18, and would thus be written before enthusiasm for John Hyrcanus had reached its height. According to these hymns, the resurrection (of the righteous?) is to take place during the Messiah's reign (Jud. 25), the evil spirits are to be cast into eternal fire (Jud. 25^{10}), the saints to live in Eden (Dn 5^{28}), and all the nations to rejoice (Jud. 25^{16}), and God to abide with men (Dan 5^{31}). Here also we have an eternal Messianic kingdom on earth, in which the Gentiles participate.

---

* There are seven other MSS known to scholars. Two of these have been collated by Conybeare, belonging respectively to the London Bible Society and to Lord Zouche; see *ZNTW* [1900], 108–110.

† In Dan the text says 'Judah and Levi.' Since this is the order of these names in the Christian interpolations, we must emend the phrase into 'Levi and Judah,' or simply 'Levi' or 'Judah.' But, since the Messiah is nowhere else in the Testaments said to be sprung from 'Levi and Judah' (though it is declared that by means of Levi and Judah God will deliver Israel), we must fall back simply on 'Levi' or 'Judah' as the original text. We take it that 'and Levi' is an intrusion here. See p. 723^{b} note ‡.

(*b*) *The three heavens and the seven heavens.*—From R and the Armenian Version of Levi 2. 3 it is now clear that these chapters contained originally a description of only three heavens. R* alone preserves the true text here; for the two recensions of the Arm. α and β are both confused and corrupt, the former mentioning only two heavens, and the latter four. It was Lueken (*Michael* [1898], 92) who first recognized this fact. Its further elucidation we owe to Bousset (*ZNTW* 159–163). Thus it appears that a belief in the three heavens prevailed early in the 2nd cent. B.C. It has thus an older attestation in Judaism than that of the seven heavens, but which is in reality the earlier we cannot at present say.

(*c*) *The Twelve Tribes.*—The Twelve Tribes are supposed to be in existence at the date of the composition of this work, and in Palestine. Thus in Napht. 5^{16} the Syrians are said to hold sway over them. In Reub. 6^{13} the high priestly ruler (*i.e.* John Hyrcanus) is 'to judge and offer sacrifice for all Israel till the consummation of the times'; and 'to bless Israel and Judah' (Reub. 6^{17}). The very fact that the book is addressed to the Twelve Tribes, although it speaks of the ultimate dispersion or destruction of Reuben (6^9), Dan, Gad, and Asher (Asher 7^{13}), points in the same direction. Bousset calls attention to the fact that the Letter of Aristeas states that Eleazar the high priest sent six men of each of the Twelve Tribes to Ptolemy. This naturally presupposes the presence of the Twelve in Palestine or its neighbourhood. The idea that the Jewish kingdom embraced once again the entire nation, could easily arise when the Maccabees extended their sway northwards over Samaria and Galilee and eastwards beyond the Jordan. This displaced the older belief that nine tribes were still in captivity (see Eth. Enoch 89^{72}, written 20 to 30 years before the Testaments). But with the growing degradation of the later Maccabees the older idea revives. According to the Psalms of Solomon ($17^{28. 34. 50}$), the dispersed tribes are to be brought back. This thought reappears frequently in the 1st cent. A.D., and then in new forms. The nine or ten tribes were in the far East enjoying great prosperity (Philo, *Leg. ad Gaium*, 31; Jos. *Ant.* XI. v. 2; *Sib. Or.* ii. 170–173), or, according to a later view, they were lost, and their place of abode was unknown to men, but God was keeping them safely till the Messianic times (4 Ezr 13^{39-47}). This form of the idea, which is now the current one, is not attested till after the fall of Jerusalem, A.D. 70.

LITERATURE.—The principal authorities have been cited in the body of the above article. See, further, Schürer, *GJV* ³ iii. 262 [*HJP* II. iii. 124]. Since the above article was written, an English translation of the Armenian Version has been published (*Uncanonical Writings of the OT found in the Armenian MSS of St. Lazarus*, Issaverdens, Venice, 1901, pp. 351–478). As the translator has made no attempt to distinguish between the two recensions, this translation is worthless from a critical standpoint.

R. H. CHARLES.

TESTIMONY.—In the OT this word is scarcely, if at all, used in the ordinary sense of 'witness' or 'evidence,' although it has this meaning frequently in the NT. We will reserve the treatment of this sense of the term and partly of the OT 'testify' for art. WITNESS, and devote the present art. to the special OT usage.

The Heb. terms are [עֵדָה] and עֵדוּת or עֵדֻת. The existence of the first of these has been postulated to account for the plur. עֵדֹת, which is found (alone or with suffixes) in Dt 4^{45} $6^{17. 20}$, Ps 25^{10} 78^{56} 93^5 99^7 $119^{2. 22. 24. 46. 59. 79. 95. 119. 125. 138. 146. 152. 167. 168}$. Such a course appears, however, to be unnecessary, for in every instance עדת might be vocalized עֵדֻת, or עֵדֹת might be taken as a contraction of עֵדְוֹת (*'ēdwôth*), the plur. of עֵדוּת (so Stade, § 320*b*; Siegfried-Stade, Buhl). The form עֵדְוֹת is found in 1 K 2^3, 2 K 17^{15} 23^3, Jer 44^{23}, 1 Ch 29^{19}, 2 Ch 34^{31}, Neh 9^{33}, Ps $119^{14. 31. 36. 99. 111. 129. 144. 157}$. In both these sets of passages the name 'testimonies' is applied to God's laws as being a *solemn declaration* of His will or a *protest against* deviation from its performance (see Driver, *Deut.* p. 81, who compares הֵעִיד בְּ = 'testify or protest *against*' [not 'unto'], 2 K 17^{15}, Jer 11^7, Ps 50^7 81^5, Neh $9^{26. 29. 30}$).* '*The* testimony' (הָעֵדוּת) is a technical term, esp. in P, for the Decalogue (LXX *τὰ μαρτύρια*, Ex $25^{16. 21}$ 40^{20}) as being *par excellence* the declaration of the Divine will. Hence the expressions 'tables of the testimony' (LXX *αἱ πλάκες τοῦ μαρτυρίου*, Ex 31^{18} 32^{15} 34^{29}); 'ark of the testimony,' which contained these tables (LXX *ἡ κιβωτὸς τοῦ μαρτυρίου*, Ex 25^{22} $26^{33. 34}$ $30^{6. 26}$ 31^7 39^{35} $40^{3. 5. 21}$, Nu 4^5 7^{89}, Jos 4^{16} [Dillm.; but Bennett, Steuernagel, *et al.*, הַבְּרִית 'ark of the covenant']);† 'tabernacle of the testimony *or* witness' (LXX *ἡ σκηνὴ τοῦ μαρτυρίου* [so in Ac 7^{44}, Rev 15^5]), Ex 38^{21}, Nu $1^{50. 53\ bis}$ 10^{11} [all *mishkan hā'ēdûth*], Nu 9^{15} $17^{7. 8}$ 18^2, 2 Ch 24^6 [all *'ōhel hā-'ēdûth*]. See art. TABERNACLE, p. 655. 'The testimony' is an abbreviation for 'the ark of the testimony' in Ex 16^{34} (LXX *ἐναντίον τοῦ θεοῦ*) 27^{21} (*ἐπὶ τῆς διαθήκης*) $30^{6.}$ (*ἐπὶ τῆς κιβωτοῦ τῶν μαρτυρίων*) ^{36} (*ἀπέναντι τῶν μαρτυρίων*), Lv 16^{13} (*ἐπὶ τῶν μαρτυρίων*) 24^3 (*ἐν τῇ σκηνῇ τοῦ μαρτυρίου*), Nu $17^{10.}$ (*κατέναντι τοῦ μαρτυρίου*) ^{25} (*ἐνώπιον τῶν μαρτυρίων*). A later usage extended the term *hā-'ēdûth* from the Decalogue to the Law in general: Ps 19^8 78^5 (‖ תּוֹרָה) 81^6 (‖ חֹק 'statute') 119^{88} 122^4.

For הָעֵדוּת ('the *testimony*') of 2 K 11^{12} = 2 Ch 23^{11} we should prob. read הַצְּעָדוֹת ('the *bracelets*,' see Wellh.-Bleek, p. 258 n.), although LXX has *τὸ μαρτύριον* and *τὰ μαρτύρια* in the respective passages.

In Sir 45^{17}, where the LXX has 'to teach Jacob the testimonies' (B *τὰ μαρτύρια*, A *μαρτυρίαν*), the Heb. text has 'so he taught his people statute' (חֹק).

J. A. SELBIE.

TETH (ט).—The ninth letter of the Heb. alphabet, and as such employed in the 119th Psalm to designate the 9th part, each verse of which begins with this letter. It is transliterated in this Dictionary by *ṭ*.

TETRARCH (*τετράρχης*, WH *τετραάρχης*).—A ruler of a fourth part of a country or province, or at Sparta a commander of four companies of soldiers. The compound occurs first in Eur. *Alc.* 1154 in reference to Thessaly, which in early times and again in the constitution given by Philip of Macedon was divided for civil administration into four districts (Demos. *Philipp.* iii. 26). In Galatia, too, each of the three tribes had its four tetrarchs (Strabo, 566 f.), until Pompey reduced the number (App. *Mithrid.* 46, *Syr.* 50; Livy, *Ep.* 94), retaining the name. Thenceforward little attention was paid to the original signification of the title, which was freely applied to dependent princelings in possession of some of the rights of sovereignty. They were of subordinate rank to kings or ethnarchs, and were especially numerous in Syria (Pliny, *Hist. Nat.* v. 74 *et al.*; Cicero, *Milo*, xxviii. 36 *et al.*; Horace, *Sat.* I. iii. 12; Tacitus, *Ann.* xv. 25; Cæsar, *Bell. Civ.* iii. 3; Plutarch, *Anton.* 36; Jos. *Ant.* XVII. x. 9; *et al.*). The title as used in NT retains in part its etymological meaning in two cases. For both Antipas (Mt 14^1, Lk $3^{1. 19}$ 9^7, Ac 13^1) and Herod Philip (Lk 3^1) inherited each a fourth part of his father's dominions (Jos. *Ant.*

---

* COP agree in giving the corrupt text which contains an account of the Seven heavens. For an account of the latter see Charles, *Book of the Secrets of Enoch* (1895).

* Cf. תְּעוּדָה, used of prophetical testimony or *injunction*, in Is $8^{16. 20}$.

† BA *ἡ κιβωτὸς τῆς διαθήκης*; om. *τῆς διαθήκης*, F* (habet F¹ mg); *μαρτυρίου* in mg et sup ras A^a ?.

XVII. xi. 4; *Wars*, II. vi. 3). At the same time, since their father had himself received the same title without geographical significance from Antony (Jos. *Ant.* XIV. xiii. 1; *Wars*, I. xii. 5), and as Antipas is styled king (Mt 14[9], Mk 6[14ff.]) almost as often as tetrarch, it is not unlikely that the latter title was applied to him without any designed allusion to its strict meaning. In a similar sense Lysanias [which see] is called tetrarch of Abilene in Lk 3[1], the district of Abila in the Lebanon having been severed from the Ituræan kingdom subsequently to the death of Lysanias I. and placed under the rule of a younger man of the same name. In support of St. Luke's accuracy may be cited two inscriptions in *CIG*, Nos. 4521, 4523. See, for further details and for the literature of the subject, Schürer, *HJP* I. ii. 7 f. R. W. MOSS.

TEXT OF THE OLD TESTAMENT.—A history of the text of the OT, in the proper sense of the word 'history,' it is not possible to write, even if one were content to start from the period in which the OT was closed. For in the first place we do not know the date when, or the way in which, this closing was effected. Further, we have no MSS of the Heb. OT from the first eight centuries of the Christian era, at least none whose date is certain. Unfortunately, moreover, we are as yet without critical editions either of the most important early Versions (LXX, Pesh., Targg.), or of the ancient Jewish literary works (Talmuds, Midrashim) in which a great number of Bible passages are cited and explained. And, finally, the history of the text is much older than the close of the Canon. Even during the period when the writings which are now gathered into one in the OT had still a more or less separate circulation, the text underwent a variety of changes, due partly to the carelessness of copyists, and partly to intention, what was considered objectionable being dropped out, and additions being made. The proper course of procedure, then, appears to us to be to work *backwards* from a fixed point, viz. the printed text. We will discuss—

i. The printed editions.
ii. The manuscripts.
iii. The work of the Mas(s)oretes (and the punctuation).
iv. Earlier traces of the Heb. text of the OT.
v. The importance of the ancient Versions.
vi. Observations on the history of the growth of the OT.

i. PRINTED EDITIONS OF THE HEB. OT.—A. *FIFTEENTH CENTURY.*—The first portion of the Heb. Bible ever printed was the Psalter, 1477 (small folio, prob. Bologna), with D. Ḳimḥi's commentary. Only the first psalms have the vowel points, in a very rude form (Ginsburg, *Introd.* 780–794). ‖ The first ed. of the Pent. appeared in 1482 (Bologna folio, pointed), with Targ. Onḳ. and Rashi. ‖ Ed. *princeps* of the Prophets, 1485 (Soncino, folio, 2 vols. [the 2nd has no date]), with D. Ḳimḥi's com., neither vowel points nor accents. ‖ Ed. *princeps* of the Hagiographa, 1487, 86 (Naples, folio, 3 parts). The vowel points are most unreliable, the printers having done their work very carelessly. There are no accents. The accompanying comm. are Ḳimḥi on the *Psalter*, and Immanuel on *Proverbs*. ‖ The first ed. of the whole OT appeared at Soncino in 1488, folio; it had vowel points and accents, like almost all the following editions; ‖ 2nd ed., Naples, *c.* 1491–93 [neither date nor place is given]; ‖ 3rd ed., Brescia, 1494. Luther used this ed. in translating the OT into German; ‖ Pesaro, 1494 (?, see Wolf, *Bibliotheca Heb.* ii. 364, iv. 109; B. Riggenbach, *Das Chronikon des Konrad Pellikan*, Basel, 1877, p. 20).

B. *SIXTEENTH CENTURY.*—Heb. OT, Pesaro, 1511–1517, folio, 2 vols. ‖ The Complutensian Polyglot, Alcala, 1514–1517, *Vetus testamentū multiplici lingua nūc primo impressum*, folio, 4 vols. (Heb., LXX, Vulg., Targ. Onḳ.). No accents; the vowel points cannot be relied upon. The editors used, for the compilation of their Heb. text, the Lisbon Pent. (1491), the Naples OT (1491–1493), and the MS of the OT in the Madrid University Library No. 1. The consonantal text is, according to Ginsburg (p. 917), remarkably accurate and of great importance. ‖ First Rabbinical Bible, folio, 4 vols., Venice, 1516–1517. The editor, Felix Pratensis, was the first to indicate, in a purely Hebrew Bible, the Christian chapters* on the margin of the Heb. OT, and to divide Samuel, Kings, Ezra, and Chronicles each into two books. He was likewise the first to give, though not consistently, the consonants of the *Ḳĕrê* in the margin. ‖ The first Venice quarto Bible (1516–1517) is only a re-issue of the folio, without the Targums and the commentaries. ‖ The second Rabbinical Bible, folio, 4 vols., Venice, 1524–1525, with the Mas(s)ora collected and arranged by Jacob ben Chayim ibn Adonijah. 'No textual redactor,' says Ginsburg (p. 964), 'of modern days, who professes to edit the Heb. text according to the Mas(s)ora, can deviate from it without giving conclusive justification for so doing.' ‖ Third Rabbinical Bible, 1547–1548; fourth, 1568, Venice, folio, 4 vols.; ‖ *Biblia Sacra, Hebraice, Græce et Latine*, Antwerp, 1569–1572, folio [OT vols. i.–iv.]; printed at the expense of Philip II. (hence surnamed *Biblia Regia*), ed. Arias Montanus. ‖ Of the great number of other editions we will mention here but two: מקרש '' *Hebraica Biblia Latina planeque nova S. Munsteri tralatione . . . adiectis insuper è Rabinorum cōmentarijs annotationibus*, Basel, 1534–1535, folio, 2 vols. [2nd ed. 1546]; and דרך הקדש *Biblia Sacra eleganti et majuscula characterum forma, qua . . . literæ radicales [plenæ et nigræ] & serviles, deficientes & quiescentes &c. [vacuæ] situ et colore discernuntur.* Authore Elia Huttero, Hamburg, 1587, folio.

C. *SEVENTEENTH CENTURY.*—Fifth Rabbinical Bible, Venice, 1617–1619; sixth, Basel, 1618–1619, revised and edited by J. Buxtorf the elder; unfortunately, he altered the vowel points in the Targums according to the Aram. portions of Daniel and Ezra. ‖ The Paris Polyglot, printed at the expense of the Paris barrister, Guy Michel le Jay, 1629–1645, folio [OT vols. i.–iv.]. ‖ Much better, and indeed the best of all the Polyglot Bibles, are the *Biblia sacra polyglotta*, ed. Brian Walton, London, 1657, folio [OT vols. i.–iv.]. ‖ The basis of nearly all the newer editions are the *Biblia Hebraica . . . lemmatibus Latinis illustrata* à J. Leusden, Amsterdam, 1667, publisher Athias. ‖ *Biblia Hebraica* . . . ex recensione D. E. Jablonski, Berlin, 1699. The latter follows Leusden's edition, but has collated also other edd. and some MSS. In the Preface he states that he has found and corrected more than 2000 *errata* in the Bible of 1667.

D. *EIGHTEENTH CENTURY.*—*Biblia Hebraica* . . . recensita . . . ab Everardo van der Hooght, Amstelædami et Ultrajecti, 1705. This OT is very often extolled as the best octavo ed. of the Bible, but without sufficient reason. The ed. of the *Biblia Hebraica*, Amstelædami, 1725, pub. by Salomo ben Joseph Props, is far superior. ‖ Seventh Rabbinical Bible: ספר קהלות משה, pub. by Moses of Frankfort, Amsterdam, 1724–1727, folio, 4 vols. ‖ J. H. Michaelis, *Biblia Hebraica, ex aliquot manuscriptis et compluribus impressis codicibus, item masora . . . diligenter recensita. Accedunt loca scripturæ parallela . . . brevesque adnotationes*, Halle, 1720. This is the first printed attempt at a critical edition. The Erfurt MSS collated by Michaelis are now in Berlin. ‖ The Mantua Bible, 1742–1744,

---

* The division of the books of the Bible into chapters was the device of Stephen Langton of Canterbury (1205 A.D.), who introduced it in the Vulgate.

4°, pub. by Raphael Chayim Basila, contains Salomo Norzi's mas(s)oretical commentary on the OT. ‖ B. Kennicott, *Vetus Test. Heb. cum variis lectionibus*, Oxford, 1776, 1780, folio, 2 vols., gives the text of van der Hooght, without the vowel points and accents. The MSS are for the most part very perfunctorily collated (cf. Bruns' ed. of the *Dissertatio Generalis*, and see below, ii. J).

E. *NINETEENTH CENTURY.—Biblia Hebraica* . . . recensita ab E. van der Hooght. Editio nova emendata a J. D'Allemand, London, 1822, and often. ‖ *Bibl. Heb.* . . . recensuit Aug. Hahn, Leipzig, 1831, and often. ‖ *Bibl. Heb.* . . . curavit C. G. G. Theile, Leipzig, 1849, and often. ‖ [Christian] David Ginsburg, עשרים וארבעה ספרי הקדש מדויקים היטב . . . עם חלופים והגהות, London, 1894, 2 vols.

F. *EDITIONS WITHOUT VOWEL POINTS AND ACCENTS.—Bibl. Heb. non punctata* . . . accurantibus Joh. Leusdeno & Joh. Andr. Eisenmengero, Francofurti, 1694, 16^{mo}. ‖ *Bibl. Heb. sine punctis*, Amstelædami et Ultrajecti, 1701, 16^{mo}. ‖ תקון הסופר והקורא, *Pent.* ed. S. Baer, Roedelheim, 1866, and often. ‖ *Bibl. Sac. Heb.: Pent., Jos., Jud., Sam., Psalmi . . . sine punctis* ediderunt R. Sinker et E. T. Leeke, Cambridge, 1870. ‖ *The Psalms in Heb., without points*, Oxford [Clarendon Press].

G. *S. BAER'S EDD. OF SEPARATE BOOKS* (those issued down to 1890 have prefaces by F. Delitzsch), Leipzig: Genesis, 1869; Jos., Jud., 1891; Sam., 1892; Kings, 1895; Isaiah, 1872; Jer., 1890; Ezekiel, 1884; Minor Proph., 1878; Psalms, 1880; Prov., 1880; Job, 1875; Megilloth, 1885; Dan., Ezr., Neh., 1882; Chron., 1888. Cf. H. Strack in *Theol. Litztg.* 1879, No. 8, and Ginsburg's criticisms in his *Introduction*.

H. *CRITICAL EDITIONS.—The Sacred Books of the OT: a critical ed. of the Heb. text, printed in colours* . . . under the editorial direction of Paul Haupt: Leipzig, Baltimore, and London, 4°. The following have appeared at the date of this article: Genesis by C. J. Ball, 1896; Leviticus by Driver and White, 1894; Numbers by J. A. Paterson, 1900; Joshua by W. H. Bennett, 1895; Judges by G. F. Moore, 1900; Samuel by Budde, 1894; Isaiah by Cheyne, 1899; Jeremiah by Cornill, 1895; Ezekiel by Toy, 1900; Psalms by J. Wellhausen, 1895; Proverbs by A. Müller and E. Kautzsch, 1901; Job by C. Siegfried, 1893; Daniel by A. Kamphausen, 1896; Ezra-Nehemiah by H. Guthe and L. W. Batten, 1901; Chronicles by R. Kittel, 1895.

A critical edition of the Aramaic portions of the OT is given by the present writer in his *Grammatik des Biblisch-Aramäischen*^{3}, Leipzig, 1901 (Dn $3^{12-15.\ 20-24}$ 4^{21}–7^7 also with supralinear punctuation).

LITERATURE.—Joh. Chr. Wolf, *Bibliotheca Hebræa*, Hamburg, ii. (1721) pp. 364–385 (on whole Bible), 385–413 (on parts), iv. (1733) pp. 108–123 (Bible), 123–154 (parts); ‖ Jac. le Long, *Bibliotheca sacra* . . continuata ab A. G. Masch, Halle, i. (1778) pp. 1–186; ‖ J. B. de Rossi, *Annales hebræo-typographici sec. XV.*, Parma, 1795, *Annales hebræo-typogr. ab anno MDI ad MDXL digesti*, Parma, 1799, *De ignotis nonnullis antiquissimis hebraici textus editionibus ac critico earum usu*, Erlangen, 1782; B. W. D. Schulze, *Vollständigere Kritik über die gewöhnlichen Ausgaben der heb. Bibel, nebst. . . . Nachricht von der Heb. Bibel, welche der sel. D. Luther bey seiner Übersetzung gebraucht*, Berlin, 1766; ‖ M. Steinschneider, *Catalogus librorum hebræorum in bibliotheca Bodleiana*, Berlin, 1852 ff., cols. 1–164; ‖ B. Pick, 'History of the printed editions of the OT' in *Hebraica*, ix. (1892–1893), pp. 47–116; ‖ Ch. D. Ginsburg, *Introd. to the massoretico-critical ed. of the Heb. Bible*, London, 1897, pp. 779–976 (describes 24 early printed edd. of the whole OT or of parts of it).

On the Polyglot Bibles: Wolf, ii. 332–364, iv. 99–107; le Long-Masch, i. 331–408; Ed. Reuss in *PRE*^{2} xii. 95–103; Franz Delitzsch, *Zur Entstehungsgesch. der Polyglottenbibel des Kardinals Ximenes*, Leipzig, 1871, 1878, 1886 (44, 38, and 60 pp.), 4°.

ii. THE MANUSCRIPTS.—A. *Rolls.*—The oldest form of book is the roll (מְגִלָּה, *volumen*). Even at the present day the books which are read aloud in the principal part of the synagogue service are written in the roll form: namely, the Pentateuch (סֵפֶר הַתּוֹרָה), from which a *pārāsha* is read every Sabbath, and the five Megillôth (*quinque volumina*), namely, the Song of Songs (read at the Passover), Ruth (at Feast of Weeks), Lamentations (on anniversary of Destruction of Jerusalem by the Chaldæans), Ecclesiastes (at Feast of Tabernacles), Esther (at Feast of Purim).

The material of the rolls is usually parchment; in the East, leather was also employed. At the beginning and the end there is a wooden roller (עֵץ הַחַיִּים 'the tree of life'), and the columns that have been read are rolled up on the first of these. Neither vowel signs nor accents are present. In seven parchment rolls at Tzufutkale the present writer noticed a point at the end of each verse, in two of them two points. The letters ש ע ט נ ז ג ץ have generally small ornamental strokes (תגין *coronulæ*). Between each book of the Torah four lines are left blank. The whole Pent. is divided into 669 sections (*pārāshas* פָּרָשִׁיּוֹת), which are called, according to the character of the spaces which separate them, open (*apertæ* פְּתוּחוֹת, marked פ) or closed (*clausæ*, סְתוּמוֹת, marked ס). The 54 Sabbath *pericopes* are marked פפפ and ססס respectively (with the exception of the 12th, Gn 47^{28}, at whose commencement the intervening space is only that of one letter). Six words, whose initial letters are ביה שמו (Ps 68^5), stand, particularly in Spanish (Sephardic) MSS, at the beginning of a column: בראשית Gn 1^1, יהודה Gn 49^8, הבאים Ex 14^{28}, שני Lv 16^8, מה Nu 24^5, and ואעידה Dt 31^{28}; in others, particularly the German (Ashkenazite) MSS, the ש and מ are represented by Dt 16^{18} שפטים (or 12^{28} שמר) and 23^{24} מוצא. Instead of יהודה some MSS have יששכר of Gn 49^{14} at the commencement of a column. Many copyists begin each column with a new verse, some begin each with the letter *waw*, ווי הָעַמּוּדִים. The poetical passages Ex 15 and Dt 32 are written (and even printed) in artistically constructed divisions. On these and other rules to be observed by the writers of rolls, see the Literature. Epigraphs are rare. The rules that have to be observed by a modern copyist of a Torah roll may be learned very conveniently from S. Baer's ed. of the Pentateuch, תקון הסופר והקורא, Rœdelheim, 1866 and often.

B. MSS in *book* form. These may contain the whole Bible, or one or two of its four principal parts (Pent., Prophetæ priores, Prophetæ posteriores, Hagiographa). The material is either parchment or paper (on the employment of the latter see Steinschneider, *Handschriftenkunde*, p. 18 f., and cf. art. WRITING). The size is very frequently quarto; in ancient times folio is commoner than octavo. Almost all codices have vowels and accents. The omission of the double point *soph paṣuḳ* at the end of the verse is rare (four codd. at Tzufutkale, and cod. Brit. Mus. Orient. 4445; see Ginsburg, *Introd.* p. 473); still rarer is the placing of only a single point (cod. Tzufut. 102).—Most MSS contain also *mas(s)ora*, *i.e.* observations on the number of times that particular words and word-forms occur: *mas(s)ora parva* (*Ḳĕrê* and *Kĕthîbh*; the indication of the number of occurrences of a word or word-form, *e.g.* ב=twice, קלד=134 times) on the side margins; *mas(s)ora magna* (detailed lists with citation of passages) on the top and bottom margins; *mas(s)ora finalis*; some MSS have Mas(s)oretic material also at the beginning. The extent of these observations was regulated by the space available, the inclination of the copyist, and the remuneration offered by the man who ordered the copy. Some copyists wrote part of the *mas(s)ora magna* in figures (animals, leaves, etc.) formed by elaborate flourishes, so that the reading is at times a matter of no little difficulty. Such embellishments have also proved not infrequently detrimental to the accuracy of the copy

Highly valuable, but unfortunately found only in a portion of the MSS, are the epigraphs, especially when these give the date, the country, and the name of the scribe.—The punctuation and the *mas*(*s*)*ora* are frequently not from the hand of the writer of the consonantal text, but have been added by one or two other scribes. The punctuator is called נַקְדָן.

C. A scientific examination and collating of all ancient or otherwise important MSS of the OT has not as yet been undertaken. Collections of various readings are given by Sal. Norzi, J. H. Michaelis, and B. Kennicott (see above, i. D), J. B. de Rossi (below, J), S. Baer (i. G), and Ch. D. Ginsburg (i. E). Some of the most important MSS are—

(*a*) Codex of the Former and the Latter Prophets, written by Moses ben Asher 827 years after the destruction of the temple, *i.e.* A.D. 895, now in the Karaite synagogue at Cairo. See M. Weissmann in the Heb. weekly *Hamaggid* i. (1857), Nos. 47, 48, 50, ii. 16; Jacob Sappir, אבן ספיר, Lyck, 1866, fol. 14; on the other side Ad. Neubauer in *Studia Biblica*, iii. (Oxford, 1891) pp. 25–27.—(*b*) Bible written by שלמה בן בויאעא; the vowel points, the accents, and the *mas*(*s*)*ora* are added, according to an epigraph, by Aaron ben Asher. It is now in the possession of the Jewish community at Aleppo. See Sappir, fol. 12, 13, 17–20; Strack, *Prolegomena*, pp. 44–46, and in Baer-Strack, *Die Dikduke ha-ṭᵉamim des Ahron ben Moscheh ben Ascher*, Leipzig, 1879, pp. ix–xiv. W. Wickes (*Treatise on the accentuation of the twenty-one so-called prose-books of the OT*, Oxford, 1887, p. ix) contends that this epigraph 'is a fabrication, merely introduced to enhance the value' of the codex. The present writer is still doubtful whether Wickes is right. Ginsburg (*Introd.* p. 242) does not call in question the credibility of the epigraph. — (*c*) St. Petersburg Bible written at Cairo in the year 1009 by Samuel ben Jacob, who declares that he copied the codex of Aaron ben Asher. See Harkavy-Strack, *Catalogue*, pp. 263–274. Wickes (*l.c.*) says, indeed, that the codex 'is much younger,' but the present writer feels certain that he is wrong. Ginsburg, too, believes in the trustworthiness of the epigraphs.—(*d*) *Prophetarum posteriorum codex Babylonicus Petropolitanus* [B3], edidit H. L. Strack, Leipzig, 1876 (449 and 37 pp.), fol. max., written A.D. 916. Regarding the readings of this MS see Ginsburg, *Introd.* pp. 215–230, 439–441, 475 f.

D. The *age* of many MSS is much controverted. Cod. Brit. Mus. Add. 4708 (Latter Prophets) was assigned by the late Dr. M. Margoliouth to the 6th cent.; Mor. Heidenheim judged that it might have been written between the 6th and the 8th cent.; B. Kennicott (cod. 126) ascribed it to the beginning of the 15th century. Ginsburg says: 'The writing is such as we meet with in the Sephardic codices of the 12th and 13th centuries,' and, so far as the present writer can judge without having examined the MS for himself, Ginsburg is right. ‖ The Bible Cambridge 12 bears the date '7 Adar, 616,' *i.e.* 18th Feb. 856 A.D. We wonder that so sagacious and learned a scholar as the late S. M. Schiller-Szinessy accepted this date as correct (see his *Catalogue*, p. 13). Cf. L. Zunz, *Zur Gesch. u. Literatur*, Berlin, 1845, p. 214 f.; Ad. Neubauer in *Studia Biblica*, iii. pp. 27–36.

The number of unquestionably genuine ancient epigraphs in Bible MS is not large. At Tzufutkale the present writer in 1874 noted the following, which emanate from the writers of the MSS themselves: 922 A.D. = 1234 Seleuc., cod. 34, Moses ben Naphtali, known as a contemporary of Aaron ben Asher; 930 A.D. = 1241 Seleuc., cod. 35/36, Salomo ben בויאעא, *mas*(*s*)*ora* written by Ephraim ben בויאעא; 943 A.D. = 4703 of the Creation, cod. 39, Isaak ben Jochai; 952 A.D. = 4712 of the Creation, cod. 40, Joseph ben Daniel; 961 A.D. = 4721 of the Creation, cod. 41; 989 A.D. = 1300 Seleuc., cod. 43, Joseph ben Jacob; 994 A.D. = 4754 of the Creation, cod. 44, Moses ben Hillel; 1051 A.D. = 4811 of the Creation, cod. 11, Moses (?) ben Anan.—Unfortunately, the Karaite Abraham Firkowitsch (both in his first collections and in the latest just mentioned, which since 1875 has likewise been in St. Petersburg) either himself wrote entirely a great many epigraphs, or falsified them by altering dates and names. For instance, in cod. Tzufut. 11 he changed 4811 of the Creation into 4411 = 651 A.D.!

Much fresh information is to be hoped for from the treasures of the Genizah of Old Cairo brought by S. Schechter to Cambridge; see the description of the Genizah by E. N. Adler in the *JQR*, 1897, p. 669 ff.

E. Why is the number of ancient MSS of the Heb. OT so small? Why have we no MSS as old as those of the NT, the LXX, and the Peshiṭta? The reasons are: (1) Not a few Bible MSS, especially Pentateuch rolls, were destroyed by fanatical Christians during the persecutions of the Jews in the Middle Ages, particularly in the time of the Crusades. (2) A much larger number, however, of MSS were destroyed by the Jews themselves by means of the *genizah* (גְּנִיזָה). Already the Talmud (*Megilla*, 26*b*) tells of how a worm-eaten Pentateuch roll is buried beside the corpse of a sage; cf. *Shulḥan 'Arukh, Joreh De'ah*, 282, § 10. This custom was later extended to all Heb. MSS of Biblical and non-Biblical texts, frequently, indeed, with the modification that a room, generally a cellar, in the synagogue was devoted to their concealment. To the dryness of the Egyptian climate we owe the abundance of the material which, as was mentioned above, has been found in the synagogue of Old Cairo. But it was not only such MSS as had been damaged by the tooth of time, by fire, by water, or by constant use, that were deposited in the *genizah*; further, all Torah rolls that contained more than three mistakes in a column had to be concealed (see Talm. *Menaḥoth*, 29*b*; *Shulḥan 'Arukh, Joreh De'ah*, 279). This rule partly explains how the MSS that have come down to us represent in the main one and the same text. Codices which deviated from the text of the recognized *naḳdānîm* and the mas(s)oretic principles were considered 'incorrect,' and were consigned to the *genizah*. A very notable instance of this is the codex of 916 A.D. found by Abr. Firkowitsch (cf. A. Firk., אבני זכרון, Wilna, 1872, p. 12, No. 29). Hence the present writer is unable to adopt the view of J. Olshausen, P. de Lagarde, and most moderns, that all Heb. MSS go back to a single standard copy (cf. also his discussion in G. A. Kohut's *Semitic Studies*, Berlin, 1897, pp. 563–571).

F. LITERATURE.—In general: Wolf, *Biblioth. Heb.* ii. 281–332, iv. 78–98; ‖ O. G. Tychsen, *Tentamen de variis codicum Heb. generibus*, Rostock, 1772; *Befreyetes Tentamen*, 1774; ‖ J. G. iii. THE WORK OF THE MA(S)SORETES.—Whence comes the text of our extant MSS? In all essentials, of course, from older MSS. But there is no doubt that *all* copyists meant to work עַל־פִּי הַמָּסֹרֶת, *i.e.* according to the traditions which had been handed down to them as to the writing and reading of the sacred texts.

A. First of all, as to the word מסרת. It is the custom now in many quarters to write מַסֹּרֶת (cf. כַּפֹּרֶת, בַּצֹּרֶת), and to derive from the post-Biblical verb מסר 'hand down.' The older form of writing it, however, is מָסֹרֶת. This word is taken from Ezk 20^{37} (where it signifies 'binding', from the root אסר), but in post-Biblical usage it assumed quite a different sense (as אותיות of Is 41^{23} 45^{11} means in New Heb. not 'coming things' but 'letters'). מסרת in New Heb. means primarily 'tradition,' *e.g.* Mishna, *Sheḳalim*, vi. 1; hence the derivation from מָסַר (*Aboth*, i. 1) might be *per se* admissible, and even the pronunciation מַסֹּרֶת, but the oldest witnesses, as has been said, are in favour of מָסֹרֶת. In the next place, מסרת stands for the tradition relating to the interpretation of Scripture. R. 'Aḳiba says (*Aboth*, iii. 13), 'Masoreth is a fence to Torah,' *i.e.* the prescriptions of the oral Law make transgression of the written Law difficult. Further, however, the word *Māsōreth* was applied to the tradition relating to the Bible text, and those who busied themselves with this tradition were called בַּעֲלֵי המסרת, or *Ma(s)soretes.*

B. The 24 books of the OT were considered, at all events as early as the 1st cent. of the Christian era, as holy (see Jos. *c. Apion.* i. 8 [cf. *PRE*^{2} vii. 427 f. = ^{3} ix. 751 f.]). It was an object to preserve the text of these books, in particular and above all that of the Pentateuch, and its traditional understanding for coming generations. This was accomplished first by *attention to the consonantal text.*

(*a*) Conscientious care on the part of the copyists was ensured by numerous rules about the writing out of Bible codices, especially of synagogue rolls (cf. above, ii. G).

(*b*) They *counted* the verses and the words of each of the 24 books and of many sections; they reckoned which was the middle verse and the middle word of each book; nay, they counted the letters both of particular sections and even of whole books. The Talmud, *Kiddushin*, 30*a*, says: 'The ancients were called Sopherim because they counted [ספר 'to count'] all the letters in the Torah. They said: Waw in גחון Lv 11^{42} is the middle letter in the Torah; דרש דרש Lv 10^{16} is the middle word; והתגלח Lv 13^{33} is the middle verse; 'Ayin in מיער Ps 80^{14} is the middle letter in the Psalms, and והוא רחום Ps 78^{38} is the middle verse.' R. Joseph asked: 'To which side does *waw* in 'gaḥôn' belong? Answer: Let us bring a Torah, and I will count. Surely, Rabba bar bar Ḥanna has said that they did not go away until they had brought a Torah and counted' (cf. Morinus, *Exercitationes biblicæ*, Paris, 1669, p. 442). They counted also the frequency of the occurrence of words, phrases, or forms, both in the whole Bible and in parts of it. *Shabbath*, 49*b*: 'As the sages sat together, the question was raised, To what do the 39 principal works that are forbidden on the Sabbath day correspond? Ḥanina b. Ḥama said: To the [39] works at the building of the tabernacle; Jonathan b. Eleazar said in name of Simeon b. Jose: They correspond to the 39 occurrences of the word מלאכה in the Torah. Then Rab Joseph asked, Does Gn 39^{11} belong to the number or not? Abaji replied, Let him bring a Lawbook and count.'

(*c*) They collected *notabilia* into groups, and thus not only helped the recollection of these, but also facilitated the control of the MSS. For instance, 8 words written with final *waw* are read with *he* (cod. 916 A.D., Jer 2^{24}); 14 words written with final *he* are read with *waw* (cod. 916 A.D., Ezk 37^{22}). There is a great fondness for anything alphabetical; *e.g.* we have an alphabetical list of words which occur only twice in the OT—once with and once without *waw* at the beginning: אָכְלָה 1 S 1^{9} and וְאָכְלָה Gn 27^{19} etc. (cod. 916 A.D., Jer 10^{19}).

(*d*) The *scriptio plena* and *scriptio defectiva* and other peculiarities of the traditional text were very often noted in the Haggādā (esp. in the Midrashim), and not seldom also in the Halākhā. These notes serve on the one hand as a proof that the form of writing remarked on was actually received from tradition; and on the other hand they helped to ensure that this particular form was retained in the Bible codices. For instance, in Gn 23^{16} the name *Ephron* is written the first time עפרון (*plene*) and the second time עפרן (*defective*). On this the midrash Gen. rabba 58 remarks: 'Pr 28^{22} "He that hath an evil eye hasteth to be rich, and considereth not that poverty shall come upon him"; that is Ephron who wished to get possession of the riches of the just one, but afterwards he came into poverty.' In Hag 1^{8} *Kĕthîbh* has אכבר, *Ḳĕrê* אכבדה. Talmud, *Yoma*, 21*b* asks: 'Why is ה not written? Answer: Because five [ה as numerical sign=5] things which were present in the first temple were wanting in the second, the ark of the covenant with *kappôreth* and cherubim, the holy fire, the Divine gracious presence (Shekinah), the Holy Spirit, and the Urim and Thummim.'

C. By means of the invention of *punctuation* (vowel signs and accents) between the 6th and 8th cent. it was sought to ensure the preservation of the traditional pronunciation; perhaps there was also the intention of lightening the task of learners of the language. Unfortunately, we are without precise details as to the history of this invention; the only point that is practically certain is that Syriac influence must be assumed. (In Syr. a point above the letter indicates the fuller, stronger pronunciation; a point under it the finer, weaker vocalization or even the absence of a vowel). Attention to these signs involved a large addition to the studies of the later Ma(s)soretes. For instance, 18 words beginning with *lamed* occur twice—in the one instance with *shĕwa* (or *ḥireḳ* with following *shĕwa*), in the other with *pathaḥ* (cod. 916 A.D., Is 8^{20}); alphabet of words ending in הָ which occur once (cod. 916 A.D., Is 34^{12}).

D. Two systems of punctuation are completely known to us: (*a*) that employed in most MSS and in all printed editions, the so-called Tiberian, named from the city of Tiberias, where the study of the Ma(s)sora flourished for centuries. This system has special accents for the three books, Psalms, Proverbs, and Job.—(*b*) the supralinear punctuation, so named because all the vowel signs are placed over the consonants; it was in use, alongside of the Tiberian system, among a portion of the Jews of Babylonia (hence its usual designation, 'Babylonian punctuation') and Yemen (in Yemen till the 18th cent.). The signs for the principal vowels *a*, *u*, *i* are formed from the *matres lectionis* א, ו, י; the disjunctive accents have mostly the form of the letter with which their name begins: *e.g.* ז=זקף *zaḳeph*, ט=טרחא *ṭarḥa*. The accentual system is certainly dependent upon the Tiberian; the vowel system, too, gives the impression, at least to the present writer, of less originality. The most important MS in which this system is employed is cod. Proph. post. Bab.-Petropol. 916 A.D. — The simple supralinear punctuation system adopted in many later Yemen codices is derived from the complicated system of cod. Petropol. 916 A.D. (G. Margoliouth, it is true, is of the opposite opinion). —(*c*) M. Friedländer describes 'A third system of symbols for the Heb. vowels and accents' in *JQR*, 1895, pp. 564–567. (In two fragments of Bible text found lately in Egypt and acquired by the Bodleian Library; see Neubauer's *Catalogue*, No. 2604, xi., and 2608, i.). Cf. C. Levias in *AJSL* xv. 157–164, and P. Kahle in *ZATW* xxi. (1901) pp. 273–317.

E. As the very name indicates, it was not the aim of the Ma(s)soretes to give anything new, but to preserve for future generations the Bible text exactly as it had come down to them, and this in regard not only to the consonantal text but also to its pronunciation. 'Tendency' of any kind was foreign to them. Instead of הֵילֵל in Is 14^{12} we should certainly read הֵילָל, but the former pronunciation is proved by Aquila and the Peshiṭta to have been in use *before* the punctuation. The name of the well-known Canaanite god can hardly have been *Molekh*, but *Melekh*; but already LXX, Aq., Symm., Theod. have Μόλοχ=MT מֹלֶךְ.

F. The distinction between Ma(s)soretes and punctuators is no absolute one. The Ma(s)sora, as is shown by cod. 916 A.D., was complete before the end of the 9th century. Aaron b. Moses b. Asher, 'the great teacher' (המלמד הגדול), whose activity fell within the first third of the 10th cent., enjoyed already in his lifetime a great reputation, and as early as the year 989 the Bible codex supplied by him with punctuation and Ma(s)sora was regarded as the model codex and as authoritative. This is the judgment, too, of the writer of the St. Petersburg Bible MS B19*a* (1009 A.D.), Moses Maimonides, of David Ḳimḥi and of the later Jews. Aaron ben Asher himself had a rival in Moses b. David b. Naphtali, whose views were different not only regarding many *minutiæ* of punctuation (*daghesh*, *metheg*, accents), but even, at least in some passages, regarding the consonantal text (see Ginsburg, *Introd.* pp. 241–286). In like manner there were not a few differences amongst the older Ma(s)soretes. The tradition about the text was not a uniform one, and it must be acknowledged that there were different schools of Ma(s)soretes. According to the readings of the codices employed as standards must have been the different indications in the Mas(s)oretic rubrics; and S. Baer is not justified when, in the case of two statements that differ, he simply as a rule pronounces one to be wrong and corrects it from the other.

G. The content of the Mas(s)ora was collected into special books or reproduced in Bible MSS. Of those collections the best known is the book which is named from its opening words אָכְלָה וְאָכְלָה (ed. Frensdorff, Hanover, 1864); cf. Ginsburg, *Introd.* p. 464. In the MSS the detailed statements of the *Mas(s)ora magna*, varying indeed greatly in extent, according to the inclination or the ability of the scribe, are found on the top and bottom margins, some at the end of a codex or a book, only a few at the beginning. For the fullest collection of such material we are indebted to Ch. D. Ginsburg.

Bacher, 'A contribution to the history of the term Massorah' in *JQR*, 1891, pp. 785–790; 'Die Massora' in Winter und Wünsche, *Die jüd. Litteratur seit Abschluss des Kanons*, ii. (Trier, 1894) pp. 121–132; ‖ Is. Harris, 'The rise and development of the Massora' in *JQR*, 1889, pp. 128–142, 223–257; ‖ Ginsburg, *Introd.* (above, i. J) *passim*, esp. p. 421 ff.; ‖ Elias Levita, ספר מסורת המסורת, Venice, 1538, 4°; Ch. D. Ginsburg, *The Massoreth ha-massoreth of E. L., with an Eng. tr. and . . . notes*, London, 1867; J. Buxtorf, *Tiberias sive commentarius masorethicus triplex*, Basel, 1665 (1st ed. 1620); ‖ S. Frensdorff, *Massoretisches Wörterbuch*, Hannover, 1876 (20 and 387 pp.), 4°; ‖ Ch. D. Ginsburg, *The Massorah compiled from MSS, alphabetically and lexically arranged*, London, 1880–85, 3 vols. fol. (758, 838, and 383 pp.); ‖ S. Baer und H. L. Strack, *Die Dikduke ha-teamim des Ahron ben Moscheh ben Ascher, und andere alte grammatisch- massorethische Lehrstücke*, Leipzig, 1879 (42 and 95 pp.).

iv. EARLIER TRACES OF THE HEB. TEXT OF THE OT.—The work of the Ma(s)soretes was ended (see above, iii. F) at the latest in the 9th cent., and lies before us in this form in the St. Petersburg codex of the Latter Prophets, 916 A.D., and in other MSS. What other means have we now of ascertaining what was the form of text in earlier times?

A. On the margins of many codices, sometimes also at the end, there are notices of differences between various authorities, and of readings found in MSS that are now lost. From these notices we gather, for instance, that the Jews of the West (מַעֲרָב), *i.e.* Palestine, differed from those of the East (מִזְרָח, מַדְנַח), *i.e.* Babylonia, even in regard to their Bible text. This difference, moreover, concerned not only the Prophets and the Hagiographa, but also the Pentateuch, not only the consonants, but also the punctuation; cf. Ginsburg, *Introd.* pp. 197–240. The Eastern *Madnᵉḥa'ê* were not always at one among themselves; the views of the scholars of Ṣura differed on not a few questions from those of the scholars of Neharde'a. Cf. Strack, 'Ueber verloren gegangene Handschriften des AT' in Geo. Al. Kohut, *Semitic Studies*, Berlin, 1897, pp. 560–572.

B. The quotations in the Talmuds and the oldest Midrashim. The present writer has called attention to the importance of these quotations in his *Prolegomena critica in VT Heb.*, Leipzig, 1873, pp. 59–111, esp. p. 94 ff. A prerequisite, which has not yet been supplied, for such investigations is critical editions of the Jewish literature just named.

C. As to the activity of the *Ṣopherim* (*γραμματεῖς*), *i.e.* those students of the Law who preceded the Ma(s)soretes, and laboured during the last centuries B.C. and at the beginning of the Christian era, we have, unfortunately, only very scanty information. The principal passage is Talmud, *Nedarim*, 37*b*, 38*a*: 'A law given to Moses on Sinai (*i.e.* a very ancient tradition) is the following: מקרא סופרים, the pronunciation fixed by the *Ṣopherim*, *e.g.* שָׁמַ֫יִם *shamáyim*, accented on the penult; עִטּוּר ס׳, the cancelling [of *waw*] by the *Ṣopherim* before אַחַר Gn 18^{5} 24^{55}, Nu 31^{2}, Ps 68^{26}, and before משפטיך Ps 36^{7}; קְרָיָן וְלָא כְּתִיבָן, words read which are not written in the text, *e.g.* פְּרָת 2 S 8^{3}, אִישׁ after יִשְׁאַל 2 S 16^{23}, בָּאִים Jer 31^{38}, לָהּ after יהי Jer 50^{29}, אֵת before כָּל־ Ru 2^{11}, אֵלַי Ru $3^{5.17}$; כְּתִיבָן וְלָא קְרָיָן, words written but cancelled in reading, *e.g.* נָא after the second יִסְלַח 2 K 5^{18}, ואת before המצוה Jer 32^{11}, the second ידרך Jer 51^{3}, the second חֲמֵשׁ Ezk 48^{16}, אִם Ru 3^{12}.'* This record does not give all the instances: there were many differences as to the presence or the absence of the *waw* conjunctive. There were more words read but not written, and written but not read; see Frensdorff, *Okhlah we'okhlah*, Nos. 97, 98; and Ginsburg, *Massor.* ii. p. 54 f. We learn from the above extract that the *Ṣopherim* were not simply copyists but revisers of the text.—A large part of their work consisted in removing everything which could give offence in any way to pious souls when the sacred texts were used in the course of public worship. Further, the Divine names, especially the Tetragrammaton, had to be protected against irreverent, and above all against frequent, utterance (see §§ v., vi., and Ginsburg, *Introd.* pp. 345–404).

It may be assumed as certain that the results of the common labours of the *Ṣopherim* in Jerusalem were utilized in the Bible codices that were prepared under their superintendence. These codices would then serve as the basis of future copies. When differences were remarked between MSS, especially those kept in the sanctuary, it was the custom to follow the majority; cf. Pal. Talm. *Ta'anith*, iv. fol. 68*a* [according to *Ṣopherim*, vi. 4, Resh Laḳish is the author of the record]: 'Three codices of the Pent. were in the court of the temple. In Dt 33^{27} one read מעון, two מעונה; they accepted the text of the two, and rejected that of the one. In Ex 24^{5} one read ועטוטי, two נערי; they accepted the text of the two, and rejected that of the one. In one codex היא was written nine times, in two eleven times; they accepted the text of the two, and rejected that of the one.' (ועטוטי was, according to Talm. *Meg.* 9*a*, one of the alterations made by the seventy-two elders in translating the Pentateuch into Greek. הוא, as is well known, is written in the Pentateuch for both masculine and feminine gender; היא occurs in MT of the Pentateuch only eleven times).

v. THE IMPORTANCE OF THE OLD VERSIONS.—As really old MSS of the Heb. OT are not available (ii. C–E), the ancient Versions have been examined in order to discover the character of the text at a period earlier than that for which the MSS and the Mas(s)ora give their evidence. On these Versions see the separate articles in the present work. Here it may be generally remarked that an exhaustive use of these aids is impossible so long as we are without critical editions. Such editions we do not as yet possess, whether of the LXX, the Targums, the Peshiṭta, or the work of Jerome.

Of all the Versions the most important for our purpose is the Alexandrian, *i.e.* the LXX (see the Literature in Strack's *Einleit. in das AT*, § 87, and art. SEPTUAGINT above). Although, as has been just remarked, a critical edition is not yet in existence (for Dr. Swete gives only the text of cod. B with the variants of the oldest uncials), this much can be affirmed with certainty that the Heb. text which was the basis of the Alex. translation frequently differed from the MT. But from the circumstance of this difference it by no means follows that the Heb. text used for the LXX was a better one than the MT. (This assumption is a capital error in the painstaking work of A. W. Streane on Jeremiah). Owing to the variety of translators, a special examination is required for every part of the OT. The LXX is of most use for the recovery of the Heb. text in the books of Samuel, Ezekiel, and partially Kings. For instance, in 1 S 8^{16}, where MT has בחוריכם, LXX has rightly *τὰ βουκόλια ὑμῶν*, *i.e.* בקריכם. But in many passages the text was corrupt even prior to the LXX: for example, 1 S 6^{19} '50070' and 2 S 15^{7} '40.'

The Hebrew exemplars from which the Alexandrian translators worked had, at least in most of the books, the *scriptio continua*, that is, there was no separation of the words: for example, 1 Ch 17^{10} וָאַגִּד לָךְ appears in LXX as *καὶ αὐξήσω σε* = וַאֲגַדֶּלְךָ; Pr 2^{7} הלכי תם, LXX *τὴν πορείαν αὐτῶν*; 18^{3} בָּא גַם, LXX *εἰς βάθος αὐτῶν* (cf. Driver, *Notes on Heb. text of Sam.* p. xxx f.; Ginsburg, *Introd.* 158–162).—The *matres lectionis* were less frequently employed than is now the case in the MT (cf. Driver, *l.c.* pp. xxxii–xxxiv; Ginsburg, *l.c.* pp. 137–157.—It is uncertain whether any, or how many, MSS with the old Heb. (Canaanite) script were used by the Alex. translators, and hence whether deviations from the present MT may be explained by interchange of letters which resemble each other in the old form of writing (cf. Ginsburg, *Introd.* pp. 291–296; A. J. Baumgartner, *L'état du texte du livre des Proverbes*, Leipzig, 1890, pp. 272–282).

Of the revising activity of the *Ṣopherim* many traces are to be discovered from the LXX, a circumstance which shows that this activity had commenced long before. Ish-baal the son of Saul is called in the LXX Ἰεσβόσθε, as in MT אִישׁ־בֹּשֶׁת (see vol. ii. 501 f.). The most of the emendations of the *Ṣopherim* (תקון סופרים) are found also in the LXX, *e.g.* Jer 2^{11} כבודו *τὴν δόξαν αὐτοῦ* for כבודי; but in two passages at least the ancient text is preserved: 1 S 3^{13} מקללים להם, LXX *κακολογοῦντες θεόν*, *i.e.* מ׳ אלהים, and Job 7^{20} עָלַי, LXX *ἐπὶ σοί*, *i.e.* עָלֶיךָ.

vi. OBSERVATIONS ON THE HISTORY OF THE TEXT OF THE OT.—What means have we of getting back to still earlier times?

A. Comparison of parallel passages. *Historical.*

---

* It is worth while to remark that at least two of these examples give the Eastern readings, namely, Ru 2^{11} את before כל read but not written, and Jer 32^{11} ואת before המצות written but not read.

Gn 5, etc. and 1 Ch 1; 2 S $23^{8ff.}$ and 1 Ch 11; Sam., Kings *passim*, and Chron.; 2 K 18^{13}–20^{19} and Is 36–39; 2 K 24^{18}–25^{30} and Jer 52. *Legislative:* Ex 20 and Dt 5 (the Decalogue); Lv $11^{2ff.}$ =Dt $14^{4ff.}$. *Poetical:* 2 S 22=Ps 18; Ps 105. 96. 106 and 1 Ch $16^{8ff.}$; Ps 14 and 53; Ps $40^{13ff.}$ and $70^{1ff.}$; Ps $57^{7ff.}$ and $108^{1ff.}$; Ps $60^{5ff.}$ and $108^{6ff.}$. *Prophetical:* Is 2^{2-4} and Mic 4^{1-3}; Ob $^{1-9}$ and Jer $49^{7ff.}$. Some of the differences which show themselves between parallel passages may be explained by the assumption that they are due to an intention on the part of a later author or redactor (even if this intention was based on nothing more than the principle of *variatio delectat*). To intention, for instance, must be ascribed the deviations of the Deuteronomic Decalogue from Ex 20. Intention, too, explains the diversity of construction of the word אֱלֹהִים 'God,' which is plur. in Ex $32^{4.8}$ (הָלְכוּ) but sing. in Neh 9^{18} (הֶעֶלְךָ), and so 2 S 7^{23} הָלְכוּ, but 1 Ch 17^{21} הָלַךְ. It is very remarkable that the revising activity of the *Ṣopherim* is less manifest in Chronicles than in the books that were earlier accepted as canonical. One of David's sons is called in 2 S 5^{16} אֶלְיָדָע, LXX Ἐλιαδέ, but in 1 Ch 14^{7} בְּעֶלְיָדָע the original form of the name has been preserved (cf. אִישׁ־בֹּשֶׁת of 2 S 2^{8} *al.* with אֶשְׁבַּעַל of 1 Ch 8^{33} *al.*).—In many instances, however, we must assume an error in the tradition: Gn $10^{3.4}$ *R*iphath and *D*odanim, 1 Ch 1 *D*iphath and *R*odanim; 1 K 5^{6} [Eng. 4^{26}] '40,000,' but 2 Ch 9^{25} '4000'; 1 K 7^{26} '2000,' but 2 Ch 4^{5} '3000'; 1 K 7^{24} 'knops' (*pĕḳāʽîm*), but 2 Ch 4^{3} 'oxen' (*bĕḳārîm*). Both texts cannot be correct; the one or the other rests upon a mistake. Possible sources of error are: freaks of the eye or (in cases of dictation) the ear, wandering of the memory (*e.g.* the putting down of a synonymous word, cf. 2 S 22^{7} אקרא and Ps 18 אשוע), false interpretation of abbreviations, or, conversely, failure to recognize the abbreviated form of words. All these sources of change and of error were of course at work also in those passages where, on account of the non-existence of a parallel passage, we cannot so readily recognize them.

B. Carrying the Heb. text, as it presently exists in the so-called square script, back to the ancient Heb. form of writing. It is natural to assume that, in connexion with the change of written characters, errors must have slipped in, whose discovery may be facilitated by restoring the old script. The art. ALPHABET (vol. i. p. 70 ff.) can now be supplemented and improved with the help of the admirable work of M. Lidzbarski, *Handbuch des nordsemitischen Epigraphik*, Weimar, 1898 (pp. 173–203, 'Die Schrift der nordsem. Inschriften').

C. We have seen that the text of the OT books has undergone not a few changes since their composition. We must be careful, however, not to exaggerate the importance of these changes. The circumstance that we are still in a position to analyze, in the main with perfect confidence, most sections of the Pentateuch, *i.e.* to separate from one another the sources from which these sections have been composed, is a convincing proof that even the sum of all the changes in question has been far smaller than one might be disposed to think, and far smaller than critics like Aug. Klostermann have held it to be.

vii. LITERATURE.—F. Buhl, *Kanon und Text des AT*, Leipzig, 1881 [Eng. tr. Edinburgh, T. & T. Clark], §§ 23–99; F. G. Kenyon, *Our Bible and the ancient MSS, being a history of the text and its translations*², London, 1896; T. H. Weir, *A short history of the Heb. text of the OT*, London, 1899 [both the last two works are of a popular character]; A. Loisy, *Hist. critique du texte et des versions de la Bible*, 2 vols., Paris, 1892. 95; A. Dillmann and F. Buhl, 'Bibeltext des AT' in *PRE*³ ii. 713-728; the OT *Introductions* of Eichhorn, Ed. König, H. L. Strack.

i. INTRODUCTION: UNCERTAINTY ABOUT THE TEXT OF THE GREEK TESTAMENT.—For the general reader, as a rule, no question exists about the text of the book which he is reading. The copy in his hand is for him the work of the author. It is only under special circumstances that the question arises how far we may rely upon the text in our hands. Especially since the invention of the printing-press such circumstances have become much more rare, but they are far from having disappeared altogether. It may suffice to recall the obscurity in which the works of Shakespeare and the early editions of them are enveloped, or questions like that as to the origin of some Rubrics in the Prayer-Book.* But in the case of works composed at a time when their multiplication was possible only by means of copying, it requires little thought and experience to bring home this point with full force. It presses upon the mind with increased weight in the case of the NT, which was or is no 'book' at all, properly speaking, but a collection of writings, a great many of which were at the outset not destined for publication and multiplication. When St. Paul wrote his first letter to the Thessalonians he did not write it with the intention that it should or might be published afterwards, and consequently did not give it the form appropriate to such an object. Neither had he—or she, perhaps a poor slave or an old woman—who first copied it the intention of copying it for publication. Hence parts may have already been omitted which did not appear of importance, *e.g.* the address, or the date and subscription; sentences may have been abbreviated or expressions changed. It is similar with the Gospels. When the first collection of sayings of Jesus or the first narrative of His deeds was set down in writing, the next who copied it might feel inclined to enlarge it or to change any detail according to the form in which he had heard it, without any bad intention.

In spite of this situation of things, not only readers but even editors of the Greek Testament rested for a long time satisfied in the naïve belief that the next best, *i.e.* worst, text in their hands was *the* text of the NT. When Erasmus finished, on the 1st March 1516, the first edition of the Greek Testament sold in print, he put at the end: *Finis Testamenti totius* AD GRÆCAM VERITATEM *vetustissimorumque Codicum Latinorum fidem ad probatissimorum authorum citationem et*

---

* A most significant example in German literature has been investigated lately by Prof. Tschackert of Göttingen. What is the original text of the *Confessio Augustana*? It was handed to the emperor Charles v. on the afternoon of the 25th June 1530, in two copies, German and Latin. Both copies have disappeared. The Confession appeared in print as early as Sept. 1530, and two months later there was a semi-official publication of it by its author, Melanchthon; but neither of these gave the original. Therefore Prof. Tschackert examined 35 manuscript copies, all dating from the year 1530, and nine of which once belonged to men who had subscribed the Confession. In an official document like this we expect now that all duplicates shall agree to the very letter. Yet, besides orthographical differences, Prof. Tschackert had to collect hundreds of variants, and the writer of the present article is convinced that the true text has not been restored by him in every case. In one case it concerns a quotation from the NT (Gal 1^{8}), where Prof. Tschackert, following his MS N, prints '*der* sei verflucht,' 'let *him* be accursed,' while the present writer believes that the other MSS ARZ give the true reading, '*das* sei verflucht,' *i.e.* 'let *it* be cursed.'

interpretationem ACCURATE *recogniti, opera studioque D. Erasmi Roterodami.* This *ad Græcam veritatem* does not mean only 'the Greek Original' or 'the original Greek' in contradistinction to the Latin translation, but was meant to include the idea of original correctness and integrity. Erasmus was convinced that he had (on the whole) edited *the* original Greek Testament. In like manner, it was no empty boast, but an expression of their full persuasion, when the Elzevir printers put in the preface of their edition of 1633 the words: *textum ergo habes nunc ab omnibus receptum* IN QUO NIHIL IMMUTATUM AUT CORRUPTUM DAMUS. For the following comparison with the faithful representation of ancient monuments and inscriptions shows that they were really persuaded that they had given *the* original text to their readers (*qui, cum lapides ac monumenta antiquorum quidam venerentur ac religiose repræsentent, multo magis chartas has ab origine θεοπνεύστους vindicandas a mutatione ac corruptela iudicamus*). And yet the difference is clear. In the case of an ancient monument and inscription, the original is before our eyes, in our hands; in the case of literary works, we are removed from the original by thousands of years, and are brought into connexion with it only through a series of repeated copyings; and every fresh copy—perhaps even the first—was a source of errors, *even when the copyists took all possible pains to be correct.* We have already pointed out and accounted for the fact that in the case of the NT there was at first a *period of textual laxity* (cf. Westcott-Hort, §§ 6–14, 'Transmission by writing,' where it is shown how, even when the copyist has the intention of transcribing language (not *sense*), he, by mental action, passing from unconscious to conscious, may come to introduce free modification of language and even rearrangement of materials). A few examples may show to what differences copying gave rise—

What is the name of the tenth apostle in Mt 10^3?

(*a*) One set of our witnesses gives	Θαδδαῖος.
(*b*) Another,	Λεββαῖος.
(*c*) A third, combining (*a*+*b*),	Θαδδαῖος ὁ ἐπικληθεὶς Λεββαῖος.
(*d*) A fourth (*b*+*a*),	Λεββαῖος ὁ ἐ. Θαδδαῖος.
(*e*) A fifth,	*Judas Zelotes.*
(*f*) A sixth,	*Judas the son of James.*
(*g*) A seventh (=*e*+*b*+*a*),	Ἰοῦδας ὁ καλούμενος Λεββαῖος ὁ ἐπικληθεὶς Θαδδαῖος.
(*h*) An eighth,	*Thatheus Zelotis.**

Or, what was the clothing of John the Baptist? According to Mk 1^6 'Camel's hair and a leathern girdle about his loins'? or only 'the skin of a camel' without a girdle (δέρριν καμήλου)? The latter is the reading of D, while the girdle is missing also in several Old Latin MSS.

How does the Apocalypse and the NT conclude? We have—leaving out such minor variations as the addition of 'Amen' or 'Amen, Amen,' or the grace 'of the Lord Jesus,' or 'our Lord Jesus,' or 'the Lord Jesus Christ,' or 'Christ' alone—the variations—

(1) 'With the saints' (RV).
(2) 'With all' (RVm).
(3) 'With *you* all' (AV).
(4) 'With *us* all.'
(5) 'With all the saints.'
(6) 'With all men.' †

On *internal* grounds it would be quite impossible to decide which is the true reading; how difficult a decision is on the basis of all arguments (witnesses and internal grounds) is shown by the difference between the latest editors.

For more examples it is sufficient to refer to the margins of the AV (Mt 1^{11} 'Some read'; 26^{26} 'Many Greek copies have'; Lk 10^{22} 'Many ancient copies add these words'; 17^{36} 'This 36th verse is wanting in most of the Greek copies'; Jn 18^{13}, Ac 25^6 'as some copies read'; 1 Co 15^{31}, Eph 6^{12}, Ja 2^{18}, 2 P $2^{2.\,11}$, 2 Jn ^{8}); but especially to those of the RV which are crowded with such remarks as 'Some (many) ancient authorities read (insert, omit, etc.)' from Mt 1^{18} down to Rev 22^{21}. Cases like the Doxology of the Lord's Prayer, the close of the Second Gospel, the *comma Johanneum* (1 Jn 5^7), will readily occur to the mind of the reader.

It is not possible here to count up all the ways in which errors may originate; every one who has to do with copying and printing has some testimony to bear regarding it. One of the commonest is, for instance, the so-called *homoioteleuton*, by which arise what our printers call 'match' or 'funeral,' whereby a passage is either written twice or totally omitted; the latter being, of course, the more dangerous case. By such an omission in the editions of Erasmus the words χαριν^1—χαριν^2 (Ja 4^6) were wanting in the Bibles of Luther till 1568 or even longer. Another equally frequent source of error is the *transposition* of *letters* (especially where *liquidæ* are concerned) or of *words.* In Jn 8^{12} six possibilities are represented in the position of the words: 'Jesus spake unto them'—

(1) αὐτοῖς ἐλάλησεν ὁ Ἰησοῦς, ℵB,
(2) αὐτοῖς ὁ Ἰησοῦς ἐλάλησεν, EF,
(3) ἐλάλησεν αὐτοῖς ὁ Ἰησοῦς, D 1, 33,
(4) ἐλάλησεν ὁ Ἰησοῦς αὐτοῖς, Cyril, iv. 484,
(5) ὁ Ἰησοῦς αὐτοῖς ἐλάλησεν, TR,
(6) ὁ Ἰησοῦς ἐλάλησεν αὐτοῖς, N^2;

and a seventh, the combination of (1) and (4), is given by N* αὐτοῖς ἐλάλησεν ὁ Ἰησοῦς αὐτοῖς.

A third source is the *addition* of words which the copyist found missing; the subject, for instance, as 'God,' 'the Lord,' 'Jesus.' By such a (wrong) supposition, *e.g.*, the text is explained which ascribes the *Magnificat*, Lk 1, to Mary instead of Elisabeth (see *Introd. ad loc.*).

In view of all the perils to which literary works like the NT have been exposed, it is really astonishing to find how much has been preserved, and, on the whole, how faithfully. And we willingly subscribe to the words of Bengel, placed at the end of *the editio minor* of the 'NT in the original Greek,' which is at present the nearest approach to the goal, that of WH: *Ipsa summa in libris omnibus salva est, ex Dei providentia: sed tamen illam ipsam providentiam non debemus eo allegare, ut a lima quam accuratissima deterreamur.* But also the sequel will still hold good: *Eorum, qui præcessere, neque defectum exagitabimus, neque ad eum nos adstringemus: eorum, qui sequentur, profectum neque postulabimus in præsenti, neque præcludemus in posterum: quælibet ætas pro sua facultate veritatem investigare et amplecti, fidelitatemque in minimis et maximis præstare debet.*

ii. MATERIALS FOR RESTORATION OF THE TEXT.—The means of arriving at the original text, and the rules for the application of these means, are of course the same for the NT as for other literary works of antiquity; only that for the NT we are in a much better situation than for most other works, as, for instance, the Greek and Latin classics, or the OT, owing to the abundance, variety, and comparative excellence of the documents at our disposal. These documents are: *Manuscripts, Versions, Quotations.* The colophon of the first edition of Erasmus, quoted above, mentions these three classes of documents.

---

* WH adopted (*a*) on the authority of ℵB 17, 124 *c corb* vg me the Hier. *loc.* (apparently), and adduced § 304 among the examples of important or interesting readings, attested by ℵB, but lost from the rest of all extant uncials; Tischendorf, on the contrary, preferred (*b*) on the strength of D 122 *k* Orig. Aug.—and so does Blass now—a reading which is by WH here and in Mk 3^{18} declared 'a Western corruption,' these being the only two places where either name occurs. (*e*) is a well-supported 'Old Latin' reading (*a*, *b*, *h*, found also in the Roman Chronography of 354, see art. THADDÆUS); (*g*) is found in 243 and the *Apostolic Constitutions*; (*h*) in the Rushworth Gospels, on which see *JThSt*, iii. p. 96.

† The third reading, 'with *you* all,' has no Gr. MS authority at all, but was retranslated by Erasmus from the Latin Vulgate because the only Gr. MS of Revelation which was at his disposal was defective at the end; it has been retained in the Lutheran Version even after its revision, while the RV replaced it by the first (and second). Also the fourth does not seem to have any MS authority, but to be, as Ed. Reuss styled it, *pium correctoris aut typothetæ suspirium* in a Basle edition of 1545, from which it passed over into the edition published in the same year and place by Melanchthon, who mentions, however, ὑμῶν in his Appendix (*Introd.* p. 159 is to be supplemented). With (5) compare the reading of D* (for 3) in He 13^{25}.

1. *Manuscripts* (cf. WH, §§ 98–106).—The first place in the class of MSS would be held by those of the authors themselves if they were extant—the *autographs*. The possibility of their existence cannot be denied, seeing that we have documents written on papyrus, *i.e.* on the same writing material which was used in NT times, and from regions not far removed from the birthplace of the NT, of twice, almost three times the age which the autographs of the NT would have to-day (see art. WRITING, p. 950^{b}). But, as a matter of fact, the NT autographs have been lost. Already Irenæus appeals only to careful and old copies (*ἐν πᾶσι τοῖς σπουδαίοις καὶ ἀρχαίοις ἀντιγράφοις*), and the testimony of those who have themselves seen the author (*καὶ μαρτυρούντων αὐτῶν ἐκείνων τῶν κατ' ὄψιν τὸν Ἰωάννην ἑωρακότων*), and to internal evidence (*καὶ τοῦ λόγου διδάσκοντος ἡμᾶς*).

On the style in which the autographs of the NT may have been written, and the whole question how we have to conceive of them, see *Introd.* p. 29 ff., and art. WRITING, p. 951. Of expressions referring to books and writing we have in the NT: *βίβλος, βιβλίον, βιβλαρίδιον* (only in NT [Rev.], with the variant *βιβλιδάριον*), *μεμβρᾶναι, χάρτη, κάλαμος, μέλαν, γράφειν*, etc.

The hope which Bengel expressed with reference to the much disputed passage 1 Jn 5^{7} *etiam atque etiam sperare licet, si non autographum Johanneum at alios vetustissimos græcos . . . in occultis divinæ providentiæ forulis latentes suo tempore productum iri*, has been fulfilled lately in a way that could not have been expected at his time.

Erasmus (1516) had at his disposal for his first edition only one or two MSS, the oldest being of the 10th cent.: Stephen used for his *Regia* (1550), besides the printed edition of Ximenes, two uncials (DL) and 13 cursives. The London Polyglot (1657) was for the first time able to make use of the Codex Alexandrinus. More additions to the stock of witnesses were made by Mill (1707), Bengel (1734), especially Wetstein (1751); but of the two MSS which are now reckoned best, the *Vaticanus* was not yet accessible in a trustworthy form, and the *Sinaiticus* was not yet discovered.

Tischendorf knew in his 7th edition (the last which he fully completed) for the Gospel 52 uncial MSS or fragments of such, at the head of them the codex Sinaiticus, ascribed by him to the middle of the 4th cent.* When Gregory completed the Prolegomena to Tischendorf's *editio octava*, he counted for the Gospels alone about 25 uncials more; and in the most recent work on the subject, Gregory's German revision of the said Prolegomena (*Textkritik des Neuen Testamentes:* Erster Band, 1900), he describes 97, promising the description of 4 more for the appendix. It is similar with the other parts of the NT. And while hitherto very few MSS had been known on *papyrus* (the writing material of Apostolic times), and none earlier than the age of Constantine, now several fragments on papyrus have been found recently, and two at least are assigned to the 3rd cent. (see WRITING, p. 952^{a}).

Of *cursive* or *minuscle* MSS (see on them art. WRITING, p. 954^{a}) about 3000 are now known, if we include the Lectionaries; and 2000, so it is estimated by Gregory, wait for description and classification. As a whole the cursive MSS are less valuable than the uncials, but several of them are very important, even more than uncials, because the text of a cursive MS, in spite of the recent date of the MS, may be much older than that of an uncial. It is impossible to give here a list either of the uncials or, still less, of the cursives; some of the former have been treated in separate articles, see A, ALEPH, B, C, D, L; we must refer to Tregelles' revision of Horne's *Introduction* (vol. i. 1856), Tischendorf-Gregory, Scrivener-Miller^{4}, Gregory, i. (see Literature).

Special attention is due, though they have not received it hitherto, to the *Lectionaries, i.e.* the manuscripts of ecclesiastical lessons taken from the NT (WH, §§ 103, 104; Scrivener, i. 74 ff., 327 ff.; Gregory, *Textkritik*, i. 327 ff.). 'Comparatively few of them have as yet been collated. Some of these have been found to contain readings of sufficient value and interest to encourage further inquiry *in what is as yet an almost unexplored region of textual history*, but not to promise considerable assistance in the recovery of the apostolic text' (WH, *l.c.*). Liturgical books are always conservative, are official books, and can be localized with much more certainty than other MSS of the NT. Gregory is inclined to believe that the order of lessons read on Sundays originated perhaps as early as the first half of the 2nd cent., that for the Saturdays towards the end of the third quarter of this century, and that for the week-days towards the end of the same century (p. 337). In the *Apostolic Constitutions*, ii. 57, it is prescribed that, after the Lessons from the OT, are to be read the Acts of the Apostles and the Epistles of Paul, and after this, by the deacon or presbyter, the Gospels of Matthew and John, Luke and Mark. No mention is here made at all of the Catholic Epistles and the Apocalypse. This is exactly the old Canon of the Syriac Church (see SYRIAC VERSIONS, p. 647). The redactor of the *Constitutions* knows, apparently, the First and Second Epistle of Peter, but he does not make use of James, 1–3 John, Jude, and Rev.; for the references to Ja $1^{6.7}$ and Rev $22^{18.19}$ (ed. Lag. p. 203, 10. 204, 9) must be changed into *Didache*, ch. 4, Dt 4^{2} (see Zahn, *Geschichte des Kanons*, ii. 182 f.). Up to the present day no lessons from Rev. are found in the system of the Greek Church; and there seem to be preserved Lectionaries which even do not contain lessons from the Catholic Epistles either; see *Apost.* 65 (Scriv. = 68 Greg.), a MS in the possession of the Baroness Burdett-Coutts, iii. 25, though it may be only of the 14th cent. (according to Gregory; 12–13th acc. to Scrivener). A MS like this, which has preserved such an old system of lessons, is likely to contain also a text of ancient character. Up to the present, however, these MSS have not been examined on this point.

2. Similarly the second class of our documents has been enriched, namely, the ancient *Versions*.

See WH, §§ 107–122; art. VERSIONS, and the separate artt. ARABIC, vol. i. p. 136; ARMENIAN, *ib.* 153; EGYPTIAN, *ib.* 668; ETHIOPIC, *ib.* 741; LATIN, vol. iii. p. 47; SYRIAC, p. 645; VULGATE, p. 873.

The very first edition of the Gr. Test., the Complutensian Polyglot of Cardinal Ximenes (1514–17), placed side by side with the Greek Text the Latin Vulgate,* and even remodelled the former after the latter in various places (especially 1 Jn 5^{7}; see art. SEPTUAGINT, p. 440^{a}). On Erasmus see above (p. 732^{b}). Beza (1519–1605) made a modest beginning with the use of Oriental Versions, publishing a triglot edition of the NT, 1569 fol., Greek, Latin, and Syriac, the latter edited by Immanuel Tremellius, and using for Acts and 1 and 2 Cor. an Arabic Version, put at his disposal by Franciscus Junius. These versions were presented in a convenient combination by the '*Polyglots*', especially that of Walton, 1657 (Syriac, Ethiopic, Arabic, and, for the Gospels only, Persian). J. Fell (1675) took care to insert in his apparatus the Gothic and the Coptic, as *versiones antiquissimas et a regionibus qua patet orbis maxime distantibus orientes.* But the older of the Egyptian Versions, the Sahidic, was first mentioned in 1778, and edited in 1799;

---

* Compare also the table in WH, § 19, showing the late date at which primary MSS have become available.

* On the Gr. MSS used by St. Jerome, see, besides the *Epilogus* of Wordsworth-White (pp. 653–671); E. Mangenot, *Rev. des Sciences Ecclésiastiques* (Jan. 1900); J. H. Bernard, *Hermathena* (xi. No. xxvii. 1901, 335–342).

and of an older Syriac Version, only one, and this a mutilated MS, had been made known by Cureton as late as 1858, till the Syriac-Sinai palimpsest was discovered by Mrs. Lewis and Mrs. Gibson in 1892. F. C. Burkitt is inclined to ascribe the latter MS to the end of the 4th cent.; and there is no doubt that the version contained in it is in some way or other connected with the Diatessaron of Tatian, the pupil of Justin Martyr, *i.e.* a work of the third quarter of the 2nd century.

3. The mention of Justin may lead to our third class of documents, the *Quotations* (cf. WH, §§ 123-126, 'Fathers'). The finds of the last century have greatly enriched this source (cf. Clem. *ad Corinthios*, Barnabas, Hermas, Aristides, *Didache*, etc.); and for those Fathers whose works had been previously known, but only in inadequate editions, trustworthy editions are now everywhere in the course of preparation or publication; cf. the *Corpus Scriptorum Ecclesiasticorum Latinorum*, edited by the Academy of Vienna (now more than 40 vols.), and *Die Griechischen Christlichen Schriftsteller der ersten drei Jahrhunderte*, to be published by the Academy of Berlin (up till now 7 volumes, including 3 of Origen).

For illustrations of how untrustworthy the printed editions have hitherto been, partly owing to the fault of the editors, see *Introd.* p. 145 ff., from Origen, Cyril, Cyprian; on Ephraem Syrus see F. C. Burkitt in *Texts and Studies*, vii. 2.

And yet the importance of the quotations is very great. Some of the Christian writings belong to the 1st cent.,* of most of which the date and birthplace are exactly known: thus they help us as landmarks for the fixing of texts handed down in MSS of unknown origin. Especially valuable are those passages in which the Fathers refer to the *manuscripts* in their hands (*ἀντίγραφα*, *exemplaria*, *libri*) and their variants, from Irenæus downwards (see above, p. 734^a), and it is strange that these passages are not yet collected and sifted.

Most welcome will be *Sancti Irenæi Novum Testamentum*, edited by W. Sanday, advertised as in preparation by the Oxford University Press; on Clement of Alexandria see P. M. Barnard (*T. and St.* v. 5, but only for Gospels and Acts); on Tertullian, Rönsch, *Das Neue Testament Tertullians*; see also *Introd.* p. 144 ff. From Augustine alone P. de Lagarde collected 29,540 quotations from the NT, together with 13,276 from the OT (now in the Library of Göttingen [MS Lagarde, 34]); Dean Burgon, with the help of several ladies, filled 16 thick volumes of quotations, which were acquired after his death by the Trustees of the British Museum. See Ed. Miller, *Textual Commentary upon the Holy Gospels*, I. i. pp. xii f., xx ff.

On the other hand, it is clear that all depends on the exactness with which the author has quoted his text. Amongst the earliest quotations we may reckon the use made in the NT itself by one writer of an earlier writing, for instance by Luke and Matthew of Mark, by Jude of 2 Peter, or *vice versa*.

4. *Number of Variations increased by new materials.* — Bewildering as this cloud of witnesses is, still more bewildering is the mass of variants presented by them. Already in the time of Mill the number of variations in the NT was estimated as 30,000. Scrivener reckoned in 1874 at least four times that quantity, Schaff (*Companion*, 1892) stated that now it cannot fall much short of 150,000, *i.e.* more variants than words, or, as the NT consists of 7959 verses, about 20 variants for every single verse. And yet every new document that comes to light increases them. Take so short a letter as that of Jude. The discovery of the codex Sinaiticus alone brought to light 9 readings not recorded before in Tischendorf's 7th ed., among them the addition of *καὶ ζωῆς* after *σωτηρίας* in v.^{3}, and the substitution of *πᾶσαν ψυχήν* for *πάντας τοὺς ἀσεβεῖς* in v.^{15}.

The first part of the *Amherst Papyri*, published by Grenfell and Hunt, 1900, supplied the single verse He 1^1 written (along with Gn 1^1) in a small uncial hand of the late 3rd, or more probably early 4th cent., at the top of a papyrus leaf containing a letter from Rome. It furnishes the reading τοῖς πατράσιν ἡμῶν not recorded before. In the same volume was published a single vellum leaf, dating apparently from about the 5th or 6th cent., containing Ac 2^{11-22} with lacunæ; it furnished as singular readings v.^{12} πρὸς τὸν ἄλλον; v.^{13} ἐχλεύαζον λέγοντες, the latter reading being practically that of D (διεχλεύαζον λέγοντες), with which D had stood hitherto alone, instead of χλευάζοντες (or διαχλευάζοντες) ἔλεγον.* Even in the case of documents known from early times a fresh revision will enrich (or correct) the critical apparatus of our present editions. Cf., for instance, the notes of the present writer on cod. D in *ZWTh*, 1895, 157 ff., and the collation of this codex in *NT Gr. Suppl.* p. 66. The reading παρακαλοῦμεν (*præs. hist.*) in Ac 21^{12}, not mentioned by Blass in 1895 (Gött.), has been received by him into his text in 1896 (Lips.). On certain readings of B see *Introd.* p. 289. On 1 P 1^{16} Tischendorf states that ℵC have ὅτι γέγραπται, in reality they have διὸ γέγρ. etc. F. C. Burkitt was the first to make out, in 1899 (*JThSt*, i. 278), that the Old Latin MS *k* read in Mk 15^{34} by its first hand *maledixisti*, corroborating thus ὠνείδισας of D. In regard to the Gothic translation of Ulfilas, Tischendorf does not mention the very curious reading *managaini*, Jn 7^{15}=*turbæ*, for Ἰουδαῖοι (see cod. *f*), and the fact that there are various readings on the margins, as καυχήσωμαι 1 Co 13^3, ἀναγινώσκετε Gal 4^{21}, ὑμᾶς Eph 1^{15}.

The same holds good of the *Versions* and of the *Fathers*, that a new revision will greatly enlarge or rectify the critical apparatus of our present editions. Cf. Mk 7^7 τιμα : αγαπα D a b c; yet cf. Clem. of Alexandria, who is older than any of our MSS: ὁ μὲν γὰρ τοῖς χείλεσιν ἀγαπῶν λαός (583); ἔστι γὰρ καὶ ὁ λαὸς ὁ τοῖς χείλεσιν ἀγαπῶν (614). The use of ἀγαπᾶν is of course a reminiscence of Ps 78^{36}; see Clem. *Strom.* iv. 32 (Dind. ii. 334, l. 2, compared with 333, l. 27, where Ps 58^{11} is a misprint for '78') ἀπέχει : ἄπεστιν L 2$^{\text{pe}}$ Clem. Rom.; but in Clem. *ad Cor.* i. 15 only cod. A has ἄπεστιν, cod. H ἀπέχει. The reading ῥακάν or ῥακκάν (cod. O) Mt 5^{22}, in the *Apostolic Constitutions*, ii. 22; ἀρχαίαν for πρώτην in Lk 15^{22}, *ib.* ii. 41 (cf. קרמיתא in the Syriac translation of I Clem. *ad Cor.* 47 for ἀρχαίαν).

We leave out—for want of space—all variations concerned with the later additions to the text, as headings, summaries, numbering of sections, *stichi*, quotations, miracles, Eusebian sections, notes on the voyages of Paul, noting of church lessons, etc.; though some of these particulars are of great importance for the history of the text, especially for the classification of MSS. Only by way of example we may mention that Tischendorf gives, for the inscription of the Epistle of Jude, eleven, and for its subscription twelve different forms; *for the heading of the Apocalypse their number actually rises to eighteen.* We confine ourselves strictly to the text.

If any of our readers is startled by this mass of variations, though it will no longer cause him dogmatical anxieties and heart-burnings as it did to J. A. Bengel in former times, he may console himself, in the first place, by observing that the variety is not nearly so great as it might have been, and as it actually is in a closely allied department, —that of the *Apocryphal* literature (Gospels, Acts, etc.).

Let us compare the statement of A. C. Headlam, on the Clementine literature (*JThSt*, iii. 48), and simply cast a glance at the very first item in Tischendorf's 2nd ed. of the *Evangelia Apocrypha*, the so-called 'Protevangelium Jacobi.' Take as an example Tisch. 24, where the original text said that 'the chapiters of the temple wailed and *were rent from the top to the bottom*' at the murder of the father of John the Baptist by Herod. One manuscript writes that the priests rent *τὰ ἱμάτια αὐτῶν*, another changes this into *καὶ ἐθρήνησαν θρῆνον μέγαν*.

We have nothing like this in the canonical NT. Even the greatest variations offered by D

---

* 'There are perhaps as many as a hundred ecclesiastical writers older than the oldest extant codex of the NT; while between A.D. 500 and A.D. 600 (within which limits our five oldest MSS may be considered certainly to fall) there exist about two hundred Fathers more' (Dean Burgon, *Last Twelve Verses of Mark*, p. 21).

* How common such variations are may be seen from Wis 11^{14}, where the very same example occurs: ἀπεῖπον χλευάζοντες ℵAB, ἀπειπόντες ἐχλεύαζον C.

(in Luke and Acts, which have been called '*monstra* potius quam variæ lectiones') are tame compared with these. Nevertheless, we should be only too glad to have a thread of Ariadne to guide us through the labyrinth of NT criticism.

5. *Rules of Textual Criticism.*—To meet this want, the *rules* drawn up for literary criticism in general have been applied to the NT in particular. We can only touch on some of them. First of all, that of Bengel: *proclivi scriptioni præstat ardua*, which is commonly quoted in the shorter but less balanced form: *difficilior lectio placet* or *difficilior lectio principatum tenet*. Under this rule falls that of Griesbach: *Brevior lectio præferenda est verbosiori*; also that which Wordsworth-White formulated (in the *Oxford Latin NT*): *Vera lectio ad finem victoriam reportat* [*i.e.* where a phrase occurs several times with variations, that reading is the true one which is attested at the later places: 'sæpe enim scribæ quod primo loco pro mendo habent, secundo pro vero agnoscunt'].* But it is clear that these rules have a very limited application. *Internal* judgment is liable to much error, even if the textual critic has a special gift—and has developed it by practice—of divining what the author is likely to have written (*intrinsic* probability), and what a copyist is likely to have made him seem to have written (*transcriptional* probability).

Of greater importance is the *external* evidence, the MSS, Versions, Quotations. But here again some warnings are necessary. For instance, the rule of Sauppe: '*Do not overrate your Codex*,' that which you may have discovered (as Tischendorf did with ℵ), or in which you are for some reason or other specially interested. Or the rule from the *Ten Commandments for a philologist*—we think they are by the late Professor A. Lehrs of Königsberg—'Thou shalt worship no Codices.' Or the saying: 'Common sense is older than any Codex'; or in Latin: 'Ratio et iudicium centum codicibus potiora.'

How are we to sift and judge the evidence? That it is not allowable to *count* the witnesses is now generally acknowledged; in theory, too, it is acknowledged that we have to distinguish between the *age* of the MS and that of its text; but in practice too great weight is still allowed to the oldest of our MSS. Neither is it sufficient to follow an *eclectic course*,† to decide each case by itself, to stop at the comparison of single readings. This is only the first step; and for this it is sufficient to take the most *significant* variations, *i.e.* (*a*) such as offer a considerable divergence of meaning with a small variation of form, whether it be brought about (α) accidentally or (β) by purpose; or (*b*) such as offer identity of meaning with great variation of form; or, finally (*c*), additions, omissions, and transpositions.

Such passages are, for instance, for (*a*) from Revelation‡—

1^5 λύσαντι, ℵAC . . .
λούσαντι, QP . . .
8^{13} ἀετοῦ, ℵAQ . . .
ἀγγέλου, P . . .
13^{18} '666,' almost all.
'616,' C 11 (MSS quoted by Irenæus).
22^{14} πλύνοντες τὰς στολὰς αὐτῶν, ℵA . . .
ποιοῦντες τὰς ἐντολὰς αὐτοῦ, Q . . .

But as in Rev. the documents are rare, it is of greater importance to quote from other books—

Mk 6^{20} ἠπόρει, ℵBL.
ἐποίει, almost all.
Lk 3^{32} Ἰωβήλ, ℵ*BD*(ωβηλ).
Ἰωβήδ, the rest.
1 Co 13^3 καυχήσωμαι, ℵAB 17.*
καυθήσομαι (-ω-), the rest.
He 2^9 χάριτι, almost all.
χωρίς, M 67^b, mentioned by Origen.
1 Ti 4^{10} ἀγωνιζόμεθα, ℵ*AC.
ὀνειδιζόμεθα, $ℵ^3$DL.
1 P 1^{23} σπορᾶς, BKL.
φθορᾶς, ℵAC.
2 P 2^{13} ἀδικούμενοι, ℵ*BP.
κομιούμενοι, $ℵ^3$AC . . .
" ἀπάταις, ℵA*C.
ἀγάπαις, A^3B.
Jude ^{12} ἀγάπαις, ℵBKL.
ἀπάταις AC.†
" $^{22.\,23}$ οὓς μὲν ἐλεᾶτε . . . οὓς δὲ ἐλεᾶτε, ℵB (with minor variations).
οὓς δὲ ἐλέγχετε . . . οὓς δὲ ἐλεατε͂, A.‡

(*b*) Of the second class compare—

Mk 3^5 πωρώσει, almost all.
νεκρώσει, D, old lat. syr^{sin}.

---

* Cf. further: '*id verius, quod prius*,' called by Dean Burgon an axiom which holds every bit as true in Textual Criticism as in Dogmatic Truth (*Last Verses*, 76).

† How dangerous an eclectic course is may be seen from the latest recension of the NT, that of B. Weiss, who reads in Lk 5^2 πλοιάρια δύο (diminutive, and δύο as second word), a reading which none of our witnesses offers—

ℵD . . . δύο πλοῖα.
B . . . πλοῖα δύο.
AC* . . . δύο πλοιάρια.

‡ In the first line is put the reading adopted in the text by WH. Only a selection of the witnesses is given, chiefly uncial MSS.

* WH adduce for this reading also Clement of Alexandria, 614: ἔστι γὰρ καὶ ὁ λαὸς ὁ τοῖς χείλεσιν ἀγαπῶν (see above, p. 735), ἔστι καὶ ἄλλος παραδιδοὺς τὸ σῶμα, ἵνα καυχήσηται, '*for so the parallelism to* τοῖς χείλεσιν *makes it necessary to read; the only extant MS has* καυθήσεται.' As the passage is of primary importance, the present writer consulted the future editor of the works of Clement (for the Berlin edition), Dr. Stählin, who does not think this change justified, pointing to the preceding φόβῳ δέ, which refers to a violent martyrdom. We may refer further to Clement, 588 ff., where Clement, after several references to 1 Co 13, mentions examples of heathen who endured the fire (Postumus, Anaxarches), and goes on to say: μένει δὲ ἐλευθέρα κἂν . . . τῷ παμφάγῳ ὑποπέσῃ πυρὶ . . . ταῖς θείαις ἀπαρτωμένη φιλίαις ἀδούλωτος ἄνω περιπολεῖ τὸ σῶμα παραδοῦσα τοῖς τούτου μόνου ἔχεσθαι δυναμένοις. Here there seems to be a reference to 1 Co 13^3 as well as to Mt 10^{28}.

† Here, as in Lk 3^{32}, 1 Co 13^3, the decision of WH seems influenced by their predilection for ℵB. To what is remarked (*Introd.* p. 324 ff.) on these two passages add the following: Whatever view may be taken of the relation of 2 Peter to Jude, it seems clear (1) that the reading must be *the same* in both Epistles, either ἀπάταις or ἀγάπαις; the one Epistle quoting from the other—Peter from Jude, or Jude from Peter. (2) To the present writer, at least, it is clear that ἀπάταις is the true reading. The apparatus of Tischendorf is very misleading, as the translation of Jerome (*convivia* in Peter, *epulæ* in Jude) testifies in both cases for ἀπάται = diversions, pastimes. Cf. in Jude the reading εὐωχίαις in cod. 66^b; Protev. Jacobi, 6. 1: διεπλάνων αὐτήν; 7. 2 (cod. L): εἰς πλάνην αὐτῆς = pseudo-Matthias 8. 4 *ad solatium*; Sir 14^{16} ἀπάτησον τὴν ψυχήν σου = 'let thy soul fare delicately' (Taylor, Heb. פנק); Syriac פרני (lit. = τέρπειν) for διαπλανᾶν in the Protevangelium. Bigg (*Commentary*, 1901, pp. 212, 282, 333) declares ἀγάπαις in both places to be the right reading.

‡ Here WH remark: 'The smooth reading of A, etc., has every appearance of being a correction of the difficult double ἐλεᾶτε of ℵ and B. . . . Some primitive error evidently affects the passage. Perhaps the first ἐλεᾶτε . . . is intrusive.' Cf., on this verse, the elaborate paper by R. A. Falconer in the *Expositor*, Sept. 1901; but note that the *Didache*, or, rather, the still older writing which forms the basis of the first part of the *Didache*, clearly testifies for ἐλέγχετε. In the only extant MS of the *Didache*, it is true, οὓς μὲν ἐλεήσεις has fallen out, in its Latin text also ἀλλὰ οὓς μὲν ἐλέγξεις before it and περὶ δὲ ὧν προσεύξῃ after it; but after the *Apostolic Canons* (Greek and Syriac) we must read in the *Didache* οὐ μισήσεις πάντα ἄνθρωπον, ἀλλὰ οὓς μὲν ἐλέγξεις <οὓς δὲ ἐλεήσεις>, περὶ δὲ ὧν προσεύξῃ, οὓς δὲ ἀγαπήσεις ὑπὲρ τὴν ψυχήν σου. The passage seems one of the best examples of the value of quotations, and yet the latest commentator does not even quote it (Bigg), and Falconer declared that nothing can be made of the supposed reference in the *Didache* on the question whether there are three or two clauses in the verse.

Mt 17^{20} ὀλιγοπιστίαν, ℵB curs. syr^{cu} . . .
ἀπιστίαν, CDEF . . . it vg . . .

(*c*) Of the third for additions, omissions, and transpositions—

Mt 5^{22} ὁ ὀργιζόμενος τῷ ἀδελφῷ αὐτοῦ, ℵB.
+ εἰκῆ, most.*
25^{1} τοῦ νυμφίου, ℵBC . . .
+ καὶ τῆς νύμφης, DX*Σ . . . latt syr^{sin} vg hl, with the remark of Thomas that 'the bride' is not found in all copies, especially not in the 'Alexandrian'; see on the importance of this difference for the explanation of the parable a paper of A. Hilgenfeld in *ZWTh*, xliv. (1901) pp. 545–553.

It is sufficient to recall the doxology in the Lord's Prayer, the end of Mark, 1 Jn 5^{7}.

Transpositions—

Jn 7^{53}–8^{11} stands after Lk 21^{38} in the closely-related MSS 13–69–124–346, the principal members of the so-called Ferrar group.

In Romans 'the great doxology' (16^{25-27}) is found also after 14^{23} in AP 5, 17, here alone in the 'Syrian' text (Greek, Gothic, and Syriac). On the inferences which may be drawn from this fact, see WH, Appendix, Lightfoot, *Bibl. Ess.* 287 ff., and Zahn, *Einleitung*, on the one hand, and on the other Fr. Spitta, *Untersuch. über den Brief des Paulus an die Römer* (*Zur Gesch. und Litt. des Urchristentums*, iii. 1, 1901). Textual criticism here passes over into higher criticism. Cf., further, B. W. Bacon, 'The Doxology at the end of Romans' (*JBL* xviii. 167–176).†

These examples show that, according to WH at least, ℵ and B, and especially the combination ℵB, have preserved in most cases the true reading. But WH came to this decision not on the basis of the intrinsic merits of these readings, but led by their important principle: *Knowledge of documents should precede final judgment of readings* (§ 38); and: *All trustworthy restoration of corrupted texts is founded on the study of their history*, that is, of the relations of descent or affinity which connect the several documents (§ 49). This is undoubtedly the true principle, and may be called the historical or genealogical method of textual criticism. It consists in the attempt to retrace the history of the text in the opposite direction from that which it has taken, *i.e.* from recent times backwards, step by step, if possible to the very original. In many cases (compare the Heb. OT and the Greek and Latin Classics) the *scantiness* of our materials does not allow of such a method; in the case of the NT it is, on the contrary, made difficult by the wealth of materials and the complicated character which this history must have had. And the great question of the textual criticism of the NT at present is, whether the study of its history led WH to correct conclusions. Only the principal results can be mentioned here: for all particulars see vol. ii. of their great edition, or the Appendix of their manual edition.

This study led them to recognize (1) that the text of Chrysostom and other Syrian Fathers of the 4th cent. is substantially identical with the common late text (§ 130). This text must be due to a '*recension*' in the strict sense, with an elaborateness which implies deliberate criticism (§ 185). This part of their theory is very generally accepted, except by the defenders of the traditional text, like Burgon and Ed. Miller. But, further, WH believed themselves able to distinguish (2) an *Alexandrian* text, the chief characteristics of which are said to be temperate forms of incipient paraphrase and of skilful assimilation, with careful attention to language, and without bold paraphrase or interpolation from extraneous sources (§§ 181–184); (3) a *Western* text, not limited to the West, but widely used; not single and created at once, but various and progressive, with its two chief characteristics, boldness of paraphrase and readiness to adopt extraneous matter; represented, especially by codex D, Old Latin MSS, but also the Old Syriac (§§ 170–176); finally (4) the *neutral* and comparatively pure text, to be discovered, especially by comparison of ℵ and B, the ancestries of which WH believe to have been separate from a remote antiquity, so that an exceptional purity of text would be found in readings common to ℵB.*

§ 297: one of three alternatives must be true; either the respective ancestries of ℵ and B must have diverged from a common parent extremely near the apostolic autographs;

Or, if their concordant readings were really derived from a single not remote MS, that MS must itself have been of the very highest antiquity;

Or, lastly, such single not remote MS must have inherited its text from an ancestry which, at each of its stages, had enjoyed a singular immunity from corruption.

This is the most elaborate theory about the text of the NT put forward in the 19th cent. as the result of its study during thirty years. Fifteen years after its first publication the then surviving editor brought out a new edition with some Supplementary Notes, required by the discovery of fresh documents, especially the Syriac palimpsest from Sinai; at the same time declaring that *no arguments* had been advanced against their general principles which were not fully considered by themselves in the long course of their work, and, in their judgment, dealt with accurately. And in their Introduction itself it is declared (§ 105): 'Nothing can well be less probable than the discovery of cursive evidence sufficiently important to affect present conclusions in more than a handful of passages, much less to alter present interpretations of relations between the existing documents.' Again, in the concluding paragraphs on the 'Conditions of further improvement of the text' (371–374) they wrote: 'It would be an illusion to anticipate important changes of text from any acquisition of new documents,' and did not hesitate to express the conviction that no trustworthy improvement can be effected except in accordance with the leading principles of their method; further, 'that the general course of future criticism must be shaped by the happy circumstance that the fourth century has bequeathed to us two MSS, of which even the less incorrupt must have been of exceptional purity among its own contemporaries, and which rise into greater prominence of character the better the early history of that text becomes known.'

---

* To the witnesses for the omission of εἰκῆ is to be added the *Didascalia* as edited by Lagarde (p. 53^{26}); the *Constitutions*, ii. 53 (p. 79^{21}, ed. Lagarde, not mentioned in his Index), and the MS of the *Didascalia* published by Mrs. Gibson in the *Studia Sinaitica*, add εἰκῆ, איקי.

† In a note at least we may touch on the question of *Conjectural Emendation*. There has been so much misuse of this art, that of late it has fallen somewhat into contempt; and, on the other hand, there are so many good documents for the NT at our disposal, that its place is very inconsiderable (WH, §§ 93–95); but to say that Conjectural Emendation must *never* be resorted to, even in passages of acknowledged difficulty (Scrivener^{4}, ii. 244), or to say that it is not allowed 'prêter de l'esprit à l'Esprit saint' (Lagrange, *Revue Biblique*, 1900, 206), is to go too far. The reading φθονεῖτε of the TR in Ja 4^{2} seems to be a conjecture of Erasmus put forward in his second edition; ἀκούσμασιν, mentioned by WH among the suspected readings, is a conjecture of Nösselt, approved by J. C. Vollgraff (*de tribus locis interpolatis in Evangelio secundum Marcum*, Mnemosyne, 1901, 148–161). When the present writer hit upon the reading ἐπὶ πόντον instead of ἐπὶ τόπον or ἐπὶ πλοίων (Rev 18^{17}), received into the text by Baljon, it was by mere conjecture, though it was confirmed afterwards by the reading *super mare* of Primasius (the confusion of πόντον and τόπον is very common, see Eus. *HE* iv. 15, v. 15, 23). Baljon's edition gives a convenient collection of the conjectures of his countrymen. Fr. Blass received into the text of his *Evangelium secundum Matthæum cum variæ lectionis delectu* (Lipsiæ, 1901) 7 conjectural emendations, marking them with a star (*): 7^{25} προσέταισαν, 16^{23} ὀπίσω σου, 17^{27} εὑρήσει, 22^{31} ζωῆς (for ἀναστάσεως), 25^{1} ἔλαβον . . . . ἐξελθεῖν, 26^{50} αἶρε for ἕταιρε, 27^{46} ἀζαφθανί. Of remarkable readings of this edition note συνορίαν for Συρίαν 4^{24} (a complete collation of it at the end of the 3rd ed. of Nestle's *Gr. Test.*).

* As examples of important or interesting readings attested by ℵB, but lost from the texts of all other extant uncials, WH quote (§ 304), *e.g.*, Mt 5^{22} omission of εἰκῆ, 10^{3} Θαδδαῖος (see art. THADDÆUS), 11^{19} ἔργων for τέκνων, Mk 9^{29} omission of καὶ νηστείᾳ, 16^{9-20} omission, Eph 1^{1} omission of ἐν Ἐφέσῳ.

WH do not, of course, deny the presence of wrong readings in ℵB (see § 303), still less in ℵ or B, but they are slow to acknowledge them. Cf. their note on Mt 27^{49}, which is, to all appearance, an intrusion from the Gospel of John. 'Two suppositions alone are compatible with the whole evidence. First, the words may belong to the genuine text of the extant form of Mt. . . . Or, secondly, they may be a very early interpolation.' They are extant in ℵBCL, etc. WH included them within double brackets, but did not feel justified in removing them from the text altogether, and were not prepared to reject altogether the alternative supposition. Dean Burgon, on the other hand, *Last Verses*, p. 80: 'There does not exist in the whole compass of the NT a more monstrous instance of interpolation . . . in defiance of reason as well as of authority,' cf. pp. 313–318. Though the verse is not attested by Ephraem's Commentary on the Diatessaron or the Arabic revision of it, we see no reason why we should doubt the statement of the scholion that the sentence was present εἰς τὸ καθ' ἱστορίαν εὐαγγέλιον Διαδώρου, καὶ Τατιανοῦ καὶ ἄλλων διαφόρων ἁγίων πατέρων (cod. 72, where Διαδώρου may have arisen from διὰ δ', *i.e.* διατεσσάρων). Comp., further, Mk 4^{21} ὑπὸ τὴν λυχνίαν, attested by ℵB* 13–69–346 33: 'the concurrence of four such documentary authorities, all independent, implies the highest antiquity, the number rendering accidental coincidence very unlikely.' To the four authorities quoted by WH is to be added a fifth, Σ, and just on that account it becomes more likely that the coincidence is accidental; comp. He 7^{1} ὅς, rejected in spite of ℵABC^{2}D; 9^{2} the addition of καὶ τὸ χρυσοῦν θυμιατήριον in B and its omission in v.^{4}.

The present writer is not prepared to contradict these statements. Yet, on the other hand, it cannot be denied that there is a growing doubt whether the importance of the so-called *Western* variations has not been underrated and the purity of the text of ℵB overrated.[*] See, besides the contributions of Fr. Blass of Halle, the latest statement by C. H. Turner in *JThSt*, iii. 3, p. 111 f.: 'If the authority for the words of the Evangelists is to be sought primarily or even partially from the "Western" text, it must be admitted that a problem lies before us which, if it may well call forth all the energies of Christian scholars, will make heavy calls alike on their patience, their caution, and their courage.'[†]

The other question is whether WH estimated the testimony of ℵB correctly. What if ℵB or their ancestors were not separated from a remote antiquity, but one codex was influenced by the other? WH were inclined to believe that B was written at Rome, and that all its ancestors may have been there, while to ℵ they ascribed an Egyptian origin. Tischendorf, on the other hand, believed he could demonstrate that one and the same copyist worked at both MSS. Quite recently the suggestion has been thrown out that B originated under the influence of Athanasius (Rahlfs, Nestle, Zahn), and is perhaps the very copy which was procured by Athanasius for Constans. If so, it is a question how an exceptional purity can have been handed down till that time. On the other hand, this fact would explain how B seems to have left no children; the private copy of an emperor would not be given out that other MSS might be copied from it; certainly not at first. It is at all events strange that no MS seems to have been found as yet which might be pronounced with certainty to have been copied from B.[*] In some books of the OT ℵ and B have an almost identical text; in others they present us with quite different recensions; in the Book of Judges B contains a version not quoted by the Alexandrian Fathers from the 2nd to the 4th cent. (Clement, Origen, Didymus), but for the first time by Cyril, which therefore some scholars have been inclined to ascribe to Hesychius. In the NT it is easier, as Burgon stated, 'to find two consecutive verses in which the two MSS differ the one from the other, than two consecutive verses in which they entirely agree.' But this, instead of sensibly detracting from our opinion of the value of their evidence, as Burgon believed, on the contrary enhances it where they agree. It is intelligible that, as long as cod. B stood alone among extant MSS in the omission of Mk 16^{9-20}, scholars were slow to follow it; even after ℵ had come to its support, Burgon was not justified, but might be excused for coming, after an investigation of more than 250 pages, to the conclusion 'that cod. B and cod. ℵ must be henceforth allowed to be *in one more serious* particular untrustworthy and erring witnesses. They have been convicted, in fact, of bearing false witness in respect of St. Mark 16^{9-20}, where their evidence had been hitherto reckoned upon with the most undoubting confidence.'[†] But now, since F. C. Conybeare found in 1893 the Armenian manuscript which between v.^{8} and v.^{9} has the words 'Ariston eritzou,' *i.e.* of the 'Presbyter Arist[i]on' (see the facsimile in Swete's *Commentary* and in *Introd.* pl. ix), and has preserved even the name of the man to whom (directly or indirectly) we owe the longer conclusion of the Second Gospel, no reasonable doubt is any longer possible. Therefore in this important case ℵB turn out to be our best witnesses among extant MSS. This awakens, of course, a strong prejudice in their favour. But what, on the other hand, about the 'Western non-interpolations'? and the other places where D alone seems to have preserved the original reading? See WH, §§ 240–242, 283. Certain apparently Western 'omissions' are shown by their internal character to be original, *i.e.* non-interpolations; that is to say, only those Western documents remained free from interpolations which found their way into all other documents. Their presence in even the best of these documents appeared to WH such an extraordinary phenomenon that they were led to the thought—worked out later by Blass—that 'the Western and the non-Western texts started respectively from *a first and a second edition* of the Gospels, both conceivably apostolic.' WH decided finally to leave them in the text, but to mark them by double brackets ⟦ ⟧. Apart from the singular addition to Mt 27^{49} (see above, p. 737^b n.), these Western non-interpolations are all found in the last three chapters of Luke ($22^{19f.}$ $24^{3.\ 6.\ 12.\ 36.\ 40.\ 51.\ 52}$).

---

[*] Even Burgon speaks favourably of D, despite of its many 'monstra potius quam variæ lectiones' (*Last Twelve Verses of Mark*, p. 20).

[†] There has just appeared the Prospectus of the great undertaking of Prof. H. von Soden of Berlin: *Die Schriften des Neuen Testamentes in ihrer ältesten erreichbaren Textgestalt hergestellt auf Grund ihrer Textgeschichte*; Berlin, A. Duncker, 2 vols.—2328 Codices have been examined, 454 more than are mentioned by Gregory, with the result that the text of ℵB is held to be decidedly that of a recension, not the neutral or original, as WH believed. This forthcoming edition will henceforward form a new starting-point [24th March 1902].

[*] The reading φανερῶν (He 1^3 for φέρων), which is attested by Tischendorf only from B*,—a second hand changed it into φέρων, a third restored it, and wrote on the margin ἀμαθέστατε καὶ κακέ, ἄφες τὸ παλαιόν, μὴ μεταποίει,—has now been found in an Egyptian treatise (see J. A. Robinson, *Texts and Studies*, v. 5, p. x).

It is a great drawback that our critical editions do not permit of an easy glance over the differences of these principal MSS; there is Hansell's edition (*NT græce: Antiquissimorum codicum textus in ordinem parallelum dispos.; notas crit. et collationem Cod. Sinaitici adjecit Ed. H. Hansell*, Oxonii, 3 vols., 1864, 52½ sh.), and now that of Schjott (*NT græce ad fidem testium vetustissimorum recognovit necnon variantes lectiones ex editionibus Elzeviriana et Tischendorfiana subjunxit*, Hauniæ, 1897).

[†] This conviction as regards B arose from the fact, first pointed out in its importance by Burgon, that the scribe of B, after ending the Gospel with v.^{8} in the second column of a page, has, contrary to his custom, left the third or remaining column blank, evidently because one or other of the two subsequent endings, and apparently the longer of the Textus Receptus, was known to him personally, while he did not find it in the exemplar which he was copying. That the same scribe, by retaining on the margin the sectional figures in the Epistles of Paul, has preserved for us the knowledge that the Epistle to the Hebrews had formerly a different position from what it has now in B, may be mentioned here with due thanks to him, and as proof how the smallest particulars may be of importance in textual criticism. That in the OT part one of the scribes was in the habit of using for the name Iσραηλ the abbreviation $\overline{\mathrm{I}\eta\lambda}$, the other $\overline{\mathrm{I}\sigma\lambda}$, enabled E. Abbott to recognize their different hands without even seeing the codex, while the Roman editors were not able to discern it from the handwriting which lay before them.

Of other places where D alone (or nearly alone) seems to have preserved the original reading, B. Weiss mentions (*Die vier Evangelien*, pp. 48, 180) Mk 13^{22} the omission of *ψευδόχριστοι καί*, and the reading *ποιήσουσιν* for *δώσουσιν*; Lk 12^{27} *πῶς οὔτε νήθει οὔτε ὑφαίνει*, Mk 3^{14} etc.

In his *Philologica sacra* (1896) the present writer pointed out other passages of this kind, *e.g.* Mt 6^8 πρὶν ὑμᾶς ἀνοῖξαι τὸ στόμα instead of *αἰτῆσαι αὐτόν*; 26^{73} *ὁμοιάζει* for *δῆλόν σε ποιεῖ*; Lk 18^{30} ἑπταπλασίονα, etc. Blass has received a great deal into his edition of St. Matthew (1901). And the great question of the day is the weight to be allowed to D. But it seems that new materials must come to light before a decision can be reached. In the meantime the task will be (1) to collate as many MSS, Versions, and Fathers as possible; (2) to collect all statements of the Fathers about what may be called editions or recensions of the NT; (3) to compare these statements with the results of our collations.

That Marcion edited a NT (Gospel of Luke and Epistles of Paul) is well known. Are traces of his work to be found in any existing MS or MSS? and, if so, in which? Of Tatian we know not only that he composed his *Diatessaron*, but also that he tampered with the text of Paul: *τοῦ δὲ Ἀποστόλου, φασί, τολμῆσαί τινας αὐτὸν* μεταφράσαι *φωνὰς ὡς* ἐπιδιορθούμενον *αὐτῶν τὴν τῆς φράσεως σύνταξιν* (Eus. *HE* iv. 29). Has the *Diatessaron* left its traces in D or anywhere else? and what is the relation of the so-called Western text of the Pauline Epistles to Tatian? When the Epistle to the Philippians begins in D_2 etc.: Ἐγὼ *μὲν εὐχαριστῶ τῷ* κυρίῳ ἡμῶν (v.^{3}) instead of *Εὐχαριστῷ τῷ θεῷ μου*; when FG will not allow a *πορθεῖν* but only a *πολεμεῖν* of the Church through Saul (Gal $1^{13.\ 23}$), not a *ζυμοῦν* but a *δολοῦν* as the result of the leaven (1 Co 5^6, Gal 5^9), on which side is the 'metaphrasis,' and from whom did it proceed? Who were the *ὀρθόδοξοι* who took away (*ἀφείλαντο*) a passage from the Gospel of Luke, so that it is found only *ἐν τοῖς ἀδιορθώτοις ἀντιγράφοις*, in the 'uncensured copies' according to Epiphanius (*Ancor.* 31)? See on Lk 19^{41}.

What about the 'Codices quos a *Luciano* et *Hesychio* nuncupatos paucorum hominum adserit perversa sententia, quibus utique nec in veteri testamento . . . nec in novo profuit emendasse, cum multarum gentium linguis scriptura ante translata doceat falsa esse quæ addita (cod. E edita) sunt,' according to Jerome's preface to his Latin Gospels? What about the 'Evangelia quæ falsavit Hesychius apocrypha' in the so-called *Decretum Gelasii*? to which some MSS add a similar statement about Lucian.

What about the 50 copies of the Bible which Eusebius procured by order of Constantine for the Churches (not of his 'empire,' correct *Introd.* p. 54, but) of his capital, which Eusebius sent off *ἐν πολυτελῶς ἠσκημένοις τεύχεσι τρισσὰ καὶ τετρασσά*? Does this mean that they were written in three or four columns or bound in three or four volumes? and still more, did they leave no traces at all? or is the Sinaiticus really one of them? What about the recension of the Pauline Epistles which was undertaken according to the subscription in cod. H,—its fragments are now dispersed in Athos, Kiew, Moscow (at two places), St. Petersburg,* Paris, and Turin,—and other testimonies by a certain Euthalius (or Euagrius) of Sulke? Basil the Great († 379) corrected a copy with his own hand: may it not be traced? His younger brother, Gregory of Nyssa, is the sole authority besides Marcion for that peculiar form of the second petition in the Lord's Prayer: *ἐλθέτω τὸ ἅγιον πνεῦμά σου ἐφ' ἡμᾶς καὶ καθαρισάτω ἡμᾶς*. How did this creep into the codex 604 (of the 12th cent., in the British Museum), which exhibits 2724 variations from the Textus Receptus and 270 readings peculiar to itself? Has the last word been spoken about the origin of the *Ferrar* group? Where are the *accurate* copies (*ἐσπουδασμένα*) or the *ancient* in Jerusalem to be sought for, deposited on the Holy Mount (*ἐκ τῶν ἐν Ἱεροσολύμοις παλαιῶν ἀντιγράφων τῶν ἐν τῷ ἁγίῳ ὄρει ἀποκειμένων*), with which, according to their subscription, cod. Λ and some cursives have been collated?

We might go on asking such questions,—and that these questions do not belong to those which a fool asks, and which no wise man answers, may be exemplified by the reading of the Ferrar group in Mt 1^{16} which WH, in their (first) edition did not find worth mentioning; and now there appears suddenly an old *Syriac* fragment from the far East, containing that reading, which was hitherto known only in some *Latin* witnesses from the far West, and in those four solitary *Greek* MSS written probably in Calabria towards the end of the Middle Ages,—a reading which seems to have some connexion with the very composition of the First Gospel.

'Criticism,' said Ph. Schaff, in his excellent *Companion to the Greek Testament and the English Version* (at the opening of the fifth chapter, which treats of the Nature and Object of Textual Criticism),—'Criticism is a dry study.' Dry? Surely we do not know a study of more interest. It requires, it is true, as the same writer said, 'an unusual amount of patience and attention to the minutest details.' Yes, but then it will be rewarded. 'The smallest particle of gold,' said Bengel, in the connexion from which Westcott-Hort took the word with which they closed their task, 'is gold, but we must not allow that to pass as gold which has not been proved.'

'Codicibus emendandis primitus debet invigilare sollertia eorum qui scripturas nosse desiderant, ut emendatis non emendati cedant,' said Augustine (*de Doctrina Christiana*, ii. 14, 21). It is a satisfaction that in the same country in which and from which the British and Foreign Bible Society circulated, for almost a century, more than a hundred thousand copies of the Textus Receptus of Elzevir-Stephen-Erasmus, the most decided attempt has been made to fulfil the task imposed by these words of Augustine, to fulfil the command of one greater than Augustine,—the word of St. Paul, *πάντα δοκιμάζετε, τὸ καλὸν κατέχετε* (1 Th 5^{21}), or of the Master Himself, though it is not recorded within the compass of our present New Testament: *γίνεσθε δόκιμοι τραπεζῖται.*

LITERATURE AND ADDENDA.—(1) On the history of the Printed Text, which seemed unnecessary here, see WH, §§ 15-18, 244-255 (Mill, Bentley, Bengel, Semler, Griesbach, Hug, Lachmann, Tischendorf, Tregelles); Scrivener-Miller^4, ii. 177-243; P. Schaff, *Companion to the Greek Testament and the English Version*^{4}, 1892; S. P. Tregelles, *Account of the Printed Text of the Greek NT*, 1854; Nestle, *Introduction*, i. pp. 1-27; E. Reuss, *Bibliotheca Novi Testamenti Græci, cuius editiones omnes . . . quotquot reperiri potuerunt collegit digessit illustravit*, Brunsvigæ, 1872.†

The mechanical and literary processes involved in their writing and preservation.* With table of MSS and thirteen facsimile plates, New York [1898].—On the Autographs add the statement that according to the *Acta Joannis* (ed. Zahn) the Apostle dictated his Gospel to Prochorus in two days and six hours, to be written on parchment.—K. Lake, *Text of the New Testament* (Oxford Church Text-Books), 1900; M. Lundberg, *Nya Testamentets text*, Lund, 1899.—*Facsimiles of Biblical Manuscripts in the British Museum*, edited by F. G. Kenyon, London, 1901, fol., cf. the same author's *Handbook to the Textual Criticism of the NT*, London, 1901; John W. Burgon, *The Last Twelve Verses of the Gospel according to St. Mark, vindicated against recent critical objectors and established.* With facsimiles of codex ℵ and codex L, Oxf. and Lond. 1871.

On cod. D. See on the Italian origin of codex Bezæ, K. Lake and F. E. Brightman (*JThSt*, i. 441, 445, 454); J. R. Harris, *The Annotators of the Codex Bezæ*, London, 1901. The reasons which make against the theory of Blass, that D preserved for Acts a first recension, are said (*Expos. Times*, xiii. 96) to be best summed up in an appendix to the new edition (1900) of Mr. Page's *Acts* (Macmillan).

On the new Purple MS from Sinope see H. Omont, 'Notice sur un très ancien manuscrit grec de l'Évangile de saint Matthieu en onciales d'or sur parchemin pourpré et orné de miniatures' . . . Paris, 1900 (*Notices et Extraits*, xxxvi.; and *JThSt*, ii. 590 ff.). On the leaf found in Russia see *Acad. des Inscr.*, 8 fév. and 29 mars 1901.—Conti-Rossini, 'L'evangilo d'oro di Dabra Libānos' (*Rendiconti dei Lincei*, vol. x. 5, 6, pp. 177–219 [not seen]). A fragment of Jn 7^{6-10} 9^{17-23} has been published by F. C. Burkitt and Mrs. Gibson in *Studia Sinaitica*, ix. p. 45 f.

Cursives: J. R. Harris, *Further Researches into the History of the Ferrar Group*, London, 1900. On ev. 47 and 67^{mg}, 565, see F. C. Burkitt in *JThSt*, i. 626 f.

As to the *age of Church Lessons*, Job was read in the 'Great Week' as early as the time of Origen.

Versions: On the use of two languages in the Service see the Itinerary of Sylvia Aquitana (in Jerusalem); the Sacramentary of Serapion of Thmuis (*JThSt*, i. 254).—*Latin:* F. C. Burkitt, on the age of codex Bobbiensis *k* (*Cambridge Univ. Reporter*, 5th March 1901; rather of the 4th than 5th or 6th cent.); the same author doubts more and more whether there was a Latin Version in the time before Cyprian (*JThSt*, i. 627), and finds an early Latin text of the *Diatessaron* as one of the constituent elements of the mixed and curious text of *g* (*TSt*, vii. 2, p. 46). On the influence of the Gothic Version on *f* (brixiensis) see F. C. Burkitt (*JThSt*, i. 129 ff.) and Fr. Kauffmann (*Zeitschrift für deutsche Philologie*, vol. xxxiv.); see also J. Heidenreich, *Der neutestamentliche Text bei Cyprian verglichen mit dem Vulgatatext*, Bamberg, 1900. *Egyptian:* H. Hyvernat, 'Un fragment inédit de la version sahidique du NT' (Eph 1^6–2^{8b}) in *RB*, April 1900, 248–253. On middle-Egyptian see W. E. Crum in *JThSt*, i. 416 ff., and Egyp. Exploration Fund Report for 1899–1900, 1900–1901.

Quotations: On the liberties taken by copyists and editors. In a quotation from Mt 21^{21} Hippolytus (ed. Lagarde = Nicephorus), 138, 16, has πρῶτος; ed. Achelis, 1, 2, pp. 68, 4, ἔσχατος. In the Chronicon of Georgios Hamartolos a report of Papias on the end of John the Evangelist is preserved; '26 MSS write ἐν εἰρήνῃ ἀνεπαύσατο, one μαρτυρίου κατηξίωται.'

The *dictum agraphum* of Ac 20^{35} reads in the *Apostolic Constitutions*, in one class of witnesses: ἐπεὶ καὶ ὁ κύριος μακάριον εἶπεν εἶναι τὸν διδόντα ἤπερ (cod. O ὑπὲρ) τὸν λαμβάνοντα. καὶ γὰρ εἴρηται πάλιν ὑπ' αὐτοῦ· Οὐαὶ τοῖς ἔχουσιν; in the other: μακάριόν ἐστι διδόναι μᾶλλον εἶπεν ἢ λαμβάνειν. καὶ πάλιν ἀλλαχοῦ εἴρηται· οὐαί, etc.

On the falsification of MSS by heretics see, besides the notices in *Introd.* p. 197 ff., Bartholomæus Germon, Jesuita non indoctus in *Opusculo de veteribus hæreticis Ecclesiasticorum Codicum corruptoribus*, part 2, cc. 8 and 9, 'ubi de codicibus MSS Colbertino, Carnutensi, et Vaticano disserit' (known to the present writer only from Cas. Oudin, *Trias dissertationum criticarum: Prima de codice MS Alexandrino*, Lugd. Bat. 1717, ch. 5).

(3) Theory of Textual Criticism: Ed. Miller, *The Present State of the Textual Controversy respecting the Holy Gospels*, [1899]; *The Textual Controversy and the Twentieth Century*, 1901; *The Oxford Debate on the Textual Criticism of the NT, held at New College on May 6, 1897, with a Preface explanatory of the Rival Systems*, London, 1897; F. C. Burkitt, *Two Lectures on the Gospels*, Macmillan, 1901; Fr. Blass, *Philology of the Gospels*, Macmillan, 1898; G. Salmon, *Some Thoughts on the Textual Criticism of the NT*, London, Murray, 1897; Nicol. 'The Lower Criticism of the NT' (*Lond. Quart. Rev.* April 1901); Fr. Blass, *Notwendigkeit und Wert der Textkritik des Neuen Testaments*, Vortrag, Barmen, 1901 (popular); G. L. Cary, *The Synoptic Gospels, with a chapter on the text. criticism of the NT*, New York, 1900; Marvin Vincent, *History of Textual Criticism of the NT*, Macmillan, 1900. According to *Studia biblica*, iii. 235, Prof. Sanday has had an *Introduction to the Textual Criticism of the NT* for some time in preparation. Its publication will be welcomed by all students of the NT. C. Tischendorf, *Haben wir den ächten Schrifttext der Evangelisten und Apostel?* Leipzig, 1873 (popular), 1st and 2nd ed., tr. by H. W. A. Smith in *Presbyterian Quarterly and Princeton Review*, Oct. 1874; A. N. Jannaris, 'Misreadings and Misrenderings in the NT' (*Expositor*, Dec. 1898, April and Aug. 1899); Aug. Pott, *Der abendländische Text der Apostelgeschichte und die Wir-Quelle*, Leipzig, 1900; F. Blass, 'Textkritische Bemerkungen zu Matthäus,' Gütersloh, 1900 (in Schlatter-Cremer, *Beiträge zur Förderung christlicher Theologie*, iv. 4); G. Delors, *Essai de critique du texte Jean $18^{12.28}$*, Thèse, Cahors, 1900. A work is announced by C. F. Gregory on *Canon and Text of the New Testament*, in the 'International Theological Library series,' published by T. & T. Clark, Edinburgh.

Postscript.—The article SYRIAC VERSIONS was already in type when two publications came to hand, which are of primary importance not only for the Syriac Versions, but also for the Text of the Greek Testament; therefore this is the fit place to add a word on them. The one is a short study, the other a bulky edition. They are *S. Ephraim's Quotations from the Gospel*, collected and arranged by F. Crawford Burkitt (Cambridge, 1901, *Texts and Studies*, vii. 2); and *Tetraeuangelium sanctum* juxta Simplicem Syrorum Versionem ad fidem Codicum, Massoræ, Editionum denuo recognitum. Lectionum supellectilem quam conquisiverat Philippus Edwardus Pusey, A.M., olim ex æde Christi, auxit, digessit, edidit Georgius Henricus Gwilliam, S.T.B., Collegii Hertfordiensis socius. Accedunt Capitulorum Notatio, Concordiarum Tabulæ, Translatio Latina, Annotationes (Oxonii, 1901, xvi. 608 pp. 4^o).

By a minute examination of St. Ephraem's quotations from the Gospel—note the *singular*—Burkitt not only proves his statement quoted above (p. 647), that we can never trust a biblical quotation (in the Roman edition of Ephraem's works) where it agrees with the Peshitta, but shows positively that his quotations from the Gospel 'afford *no proof of the use of the Peshitta*, the Syriac Vulgate.' On the other hand, there are marked differences between his quotations and the text contained in the Curetonian MS and Sinaitic palimpsest: 'these differences suggest that it was not the Old Syriac Version of the Four Gospels, the *Evangelion da-Mepharrĕshe*, that St. Ephraem was using, but the *Diatessaron*.' This suggestion the present writer also is inclined to accept, and there is no longer any hindrance to our accepting the third suggestion, that the great event, the production and introduction of the Peshitta, 'took place soon after 411 A.D. under the auspices of Rabbula, who had been in that year appointed bishop of Edessa,' and that the words of his biographer quoted above (p. 646) contain 'a description of the making and production of the Syriac Vulgate.'

It is clear that in this case the Peshitta ceases to be the queen of the NT versions, and loses especially the importance which it had for the upholders of the *Textus Receptus*, whose 'sheet-anchor' it was (see above, p. 646^b). One of their fundamental arguments used to be: the theory of WH cannot be right; for what WH declare to be a late Syrian recension is attested already by the Peshito; and the Peshito was in use already by Ephraem, nay, is a work of the 2nd cent. Nevertheless, all biblical scholars, and not the Syriacists only, will be thankful to have at last, through the labours of the late Ph. E. Pusey and his successor in the work, for the Gospels at least, in the edition mentioned above, the most solid ground they can wish for. *Forty* MSS of the highest age, mostly from the 5th or 6th cent., have been collated—MS 4 was written between 530 and 540, No. 40 is *dated* from 548, No. 26 from 586, No. 32 from 615, No. 39 from 634; neither for the Greek nor for the

---

London, 1776 (Reuss, pp. 185–190). It is the first edition which omitted εἰκῆ Mt 5^{22}, the first which made a more decided use of the codex Bezæ Cantabrigiensis and Claromontanus.

Of modern editions a convenient survey is given by the *Resultant Greek Testament*, ed. by R. Fr. Weymouth, London, Stock [1886] (with new title 'cheap edition,' 1892, again 1896); and, on a smaller scale, by the *NT cum apparatu critico ex editionibus et libris manu scriptis collecto*, prepared by the present writer for the Württemberg Bible Society (3rd ed. 1901).

Latin MSS have we a similar exactness in date. The result is, on the whole, a very thorough corroboration of the printed text; but this does not diminish our thankfulness for the new edition. For while hitherto we were not sure about the basis of the texts in our hands, we have now the firmest foundation. And there are not wanting passages where the printed text finds no witness in any of the MSS collated by Pusey-Gwilliam. They do not affect, so far as the present writer is yet aware, the Greek text, but only the Syriac wording; cf. Mt 5^{17} 6^{27} 7^{14}. But we must first be sure of the Syriac text before we can proceed, and this end is reached by the edition of Pusey-Gwilliam, which, it is to be hoped, will give a new stimulus to studies concerning the text of the four Gospels.

If one word may be added about the best method to be pursued in these studies, it would seem best first to single out those sections which were contained in Tatian's *Diatessaron*, and to study their language, in all extant Syriac texts; then to compare their language with that of the rest of the Gospels. In this way it ought to be possible to get an answer to the fundamental question, whether Tatian made use of a pre-existing Syriac Version of the Gospels, or whether our Syriac Gospels are based on Tatian. To quote one example: all our Syriac texts (sin, cur, pesh, together with the Ethiopic Version and the Arabic Tatian) arrange the gifts of the Magi (Mt 2^{11}) in the order 'gold and myrrh and frankincense'; so also the Syriac translation of the *Protevangelium Jacobi* (21^3). Epiphanius (p. 1085 D, where he reads ἤνοιξαν τὰς πήρας αὐτῶν, adding the strange statement ἢ τοὺς θησαυρούς, ὡς ἔχει ἔνια τῶν ἀντιγράφων), has the order 'myrrh and frankincense and gold.' Is the agreement in the Syriac (Arabic, Ethiopic) texts accidental, or does it go back ultimately to Tatian? EB. NESTLE.

THADDÆUS.—The name in Mt 10^3 (AV 'Lebbæus, whose surname was Thaddæus'; RV only 'Thaddæus') and Mk 3^{18} of the apostle who is called by Luke (6^{16}, Ac 1^{13}) 'Judas of James.' In Matt. most critics now read only Θαδδαῖος (Lachmann, Tregelles, WH [who quote this reading, § 304, as proof for the unique excellence of ℵB], Revisers, Weiss, with ℵB sah vg; Evang. Ebionit.), others only Λεββαῖος (Alford, Tischendorf, Blass, with D 122 *k* Origen; 'Western' reading); the TR (AV) combined both readings, Λεββαῖος ὁ ἐπικληθεὶς Θαδδαῖος (cf. *e.g. Constit. Apost.* vi. 14, viii. 25, where in a marginal note the names are reversed: Θαδδαῖος ὁ καὶ Λεββαῖος ὁ ἐπικαλούμενος Ἰούδας Ζηλωτής); some Old Latin MSS, finally, have *Judas Zelotes*, a reading which found its way into the *Chronicon* of the year 354 and the Roman *Canon* of 382 ('Judæ Zelotis apostoli epistula una').

See on the latter reading Zahn, *Grundriss der Geschichte des neutestamentlichen Kanons*, 1901, p. 60; *Neue Kirchliche Zeitschrift*, xii. (1901) p. 743; R. A. Lipsius, *Die apokryphen Apostelgeschichten*, Ergänzungsheft (1890), p. 209; and the passage of the *Apostolic Constitutions* quoted above (ed. Lagarde, p. 282; ed. Pitra, p. 59, note).

In Mark all editors agree in reading Θαδδαῖος, Λεββαῖος being again the 'Western' reading; in Luke one of the MSS collated by Wordsworth-White adds to *Judam Jacobi* on the margin '*i.e.* Tadeus,' just as Luther added in Matt. to the Received Text the marginal note 'ist der fromme Judas.' This identification (Thaddæus = Lebbæus = Judas of James*) is indeed the most natural result of a comparison of the Gospels; cf. vol. ii. p. 799, artt. JUDAS, and JUDE (THE LORD'S BROTHER), and vol. iii. p. 92, art. LEBBÆUS. But whence this twofold or threefold name?*

The solution has been sought in the linguistic identity of the name *Lebbæus*, from Heb. לֵב 'heart,' with *Thaddæus*, from Aram. תַּד = Heb. שַׁד 'female *breast*'; so still, *e.g.*, Sieffert (*PRE*² vii. 277); Resch, *Paralleltexte*, iii. 827. But this is more than doubtful. There is more probability in the view adopted by WH, that Λεββαῖος or Λεβαῖος is some form for Levi,† caused by Mk 2^{14} 'Levi the son of Alphæus.' This is denied by Bengel ('Λεββαῖος *non est idem, quod* Λευί'), but accepted by Nilles, *Calendarium ecclesiæ utriusque*², i. 184 (on 19th June): Ἰούδα ἀποστόλου. 'S. Judas, qui et Thaddæus et *Levi* et Zelotes,' etc. A similar view had been proposed already by Grotius on the ground of Origen, *contra Celsum*, i. 62 (ed. Koetschau, i. 113).‡ Grotius quoted further from Theodoret (*Quæstiones ad* Nu 16): Θαδδαῖος ὁ καὶ Λεβί. Dalman (*Grammatik*, p. 142) denies that Λεββαῖος has anything to do with Levi, and is more inclined to see in it an abbreviation from חלב or חלבו, or to combine it (*Worte Jesu*, p. 40) with a Nabatæan name לבאי. The other name תדי (תראי, *Erubin*, 23c) he connects with the Gr. Θευδᾶς as an abbreviation from Theodotos, Theodosios, or Theodoros.§ The etymology of both names, *Lebbæus* and *Thaddæus*, is at present quite doubtful. The Jacobite Syrians vocalized *Labbī* and *Thaddī*, the Nestorians *Labbaj* and *Thaddaj*, Pusey-Gwilliam spell *Labbi* and *Taddai*.

Matters became even more complicated in the post-canonical literature. Eusebius (*HE* i. 12) states that Θαδδαῖος was one of the Seventy, and then tells the story of his mission to Abgar of Edessa. But already Jerome (on Mt 10^4, ed. Vallarsi, 1769, vii. 57 = Migne, xxvi. 61) understands this of the *Apostle*, writing: '*Thaddæum* apostolum ecclesiastica tradit historia missum Edessam ad Abgarum regem, qui ab Evangelista Luca *Judas Jacobi* dicitur et alibi appellatur *Lebæus* quod interpretatur *corculum*,‖ credendumque est eum fuisse *trinomium*.' How great the confusion became may be shown by the *Acta Thaddæi* (first published by Tischendorf, *Acta Apostolorum apocrypha*, 1851, p. 261 ff.). This piece begins: Λεββαῖος ὁ καὶ Θαδδαῖος ἦν μὲν ἀπὸ Ἐδέσσης τῆς πόλεως . . . ἦλθεν εἰς Ἱερουσαλὴμ ἐν ταῖς ἡμέραις Ἰωάννου τοῦ βαπτιστοῦ . . . ἐβαπτίσθη καὶ ἐπεκλήθη τὸ ὄνομα αὐτοῦ Θαδδαῖος . . . καὶ ἐξελέξατο αὐτὸν [Ἰησοῦς] εἰς τοὺς δώδεκα, κατὰ μὲν Ματθαῖον καὶ Μάρκον δέκατος ἀπόστολος. Nevertheless, the piece is headed in one of the MSS used by Tischendorf: πρᾶξις καὶ κοίμησις τοῦ . . . ἀποστόλου Θαδδαίου ἑνὸς τῶν ἑβδομήκοντα, in the other as ἑνὸς τῶν ιβ'. Zahn (*Forschungen*, i. 366, 382) believes that the whole confusion is due to Eusebius, who substituted for the name *Addai* ארי of the Syriac legends the Gr. name *Thaddæus.* It is very strange that the Syriac translation of Eusebius' *HE*, in one of its MSS (A), substitutes in 10 cases out of 15 the spelling הדי (with ה, not א), which has not been found hitherto anywhere else, for חדי for the name Θαδδαῖος; see the edition of Wright-McLean, p. 49_{18} 53_{10} $54_{3\ 4}$ 55_{4}. (The same version gives everywhere ארא for *Agabus*). When in the *Book of the Bee* (ed. Budge, p. 124) Aggai (אגי), the disciple of the Syriac Addai, is followed by *Thaddai* ('his father' as is added in the recension published by I. H. Hall in the *Journal of the Amer. Or. Soc. Proc.*, Oct. 1888, pp. lxxv, lxxxi), giving the series Addai—Aggai—Thaddai, the question arises whether this is the result of contamination of Greek and Syriac legends. The names themselves recall Ἀδ[δ]αῖ διδάσκαλος καὶ Ἀγγαῖος Λευίτης in the *Acta Pilati*, ch. 14, etc.

---

* The same Judas is apparently meant in Jn 14^{22}, though the Syrians identify this Judas with Thomas.

* In the 'Preaching of Simon son of Cleophas' (*Studia Sinaitica*, v. 62, 65, ed. Gibson) we even read: 'Simon son of Cleophas, who was called *Jude*, which is, being interpreted, *Nathanael*, who was called the *Zealot*, and was bishop in Jerusalem after James the brother of the Lord'; see Zahn, *Forschungen*, vi. 293.

† Cf. Jastrow, *Dictionary of the Targumim*, p. 689, where לְבְיָא *Labya* is quoted as the various reading for *Levi*.

‡ ἔστω δὲ καὶ ὁ Λευής—this is the true reading, not Λεβής—τελώνης ἀκολουθήσας τῷ Ἰησοῦ· ἀλλ' οὔτι γε τοῦ ἀριθμοῦ τῶν ἀποστόλων αὐτοῦ ἦν, εἰ μὴ κατά τινα τῶν ἀντιγράφων τοῦ κατὰ Μάρκον εὐαγγελίου. From the same combination between Mk 2^{14} and 3^{18} WH explain the 'Western' reading Ἰάκωβον for Λευείν in 2^{14}. Interesting, in this connexion, is the article of Hesychius (rec. M. Schmidt, ii. 338): Ἰάκωβος Ἀλφαίου, ὁ καὶ Θαδδαῖος καὶ Λευὶ παρὰ τῷ Μάρκῳ, παρὰ δὲ τῷ Ματθαίῳ Λεβαῖος, παρὰ δὲ Λουκᾷ Ἰούδας Ἰακώβου. Schmidt wishes to read Ἰάκωβος Ἀλφαίου καὶ Θαδδαῖος ὁ καί, etc.

§ Instead of תֶּרֶשׁ Est 2^{21} 6^2 Θευδᾶς (תדש) may perhaps be read; see Willrich, *Judaica*, p. 19.

‖ The same interpretation (surname of Scipio Nasica) is found in Jerome's *Liber interpretationis* (Lagarde, *Onomastica sacra*, p. 62), where the name Thaddæus is entirely omitted. It is curious that also in the list of the names of the apostles (*l.c.* p. 174) Thaddæus, Lebbæus, and Judas are missing.

According to some statements, Thaddæus was from Jerusalem and of the tribe of Judah (*Book of the Bee*, Barhebræus), and preached the gospel in the African language (*Gospels of the XII Apostles*, ed. J. R. Harris, pp. 26, 29); while the Syriac Addai is said to have been from Paneas. Bar Bahlul (p. 939) refers *Labbi* to the tribe of Simeon.

The apocryphal 'Gospel of Thaddæus' (*Evangelium Thaddæi*), mentioned in some MSS and editions of the *Decretum Gelasii*, seems to be due to a clerical error (PRE^3 i. 663).

For the extra-canonical statements on Thaddæus see Lipsius, *Die apokryphen Apostelgeschichten*, ii. 142–200, and his art. 'Thaddæus' in Smith and Wace's *Dictionary of Christian Biography*, iv. 875–881. As a Christian name Thaddæus never seems to have been very frequent.* EB. NESTLE.

THANK-OFFERING.—See SACRIFICE, under 'Peace-offering.'

THARRA (BA Θαρρά, Luc. Θεδεύτης).—Ad. Est 12^1 = TERESH of Est 2^{21} 6^2.

THASSI (A Θασσίς, ℵV Θασσ(ε)ί).—The surname of Simon the Maccabee, 1 Mac 2^3. The meaning of the word is quite uncertain. As likely an interpretation as any is 'the zealous,' obtained by connecting with Aram. and New Heb. תסס 'to bubble up *or* ferment' (used of new wine). For the history of Simon see art. MACCABEES, vol. iii. p. 185.

THEATRE (θέατρον).—At the disturbance recorded in Ac $19^{21\text{ff.}}$ we are told that the crowd rushed to the theatre, and that it was there that the somewhat tumultuous meeting, afterwards described, took place. We also learn from Josephus (*Ant.* XIX. viii. 2) that it was in the theatre at Cæsarea that the events described in Ac 12^{20-23} took place.

For general descriptions of the Greek and Roman theatre, reference must be made to the ordinary Dictionaries of Antiquities. The theatre at Ephesus was on the slope of Mt. Coressus, and was famous as being one of the largest, if not the largest, in the ancient world. A description of the remains with a plan may be found in Woods, *Discoveries at Ephesus*, ch. iv. p. 68. A large number of inscriptions also were found on the site, which have been published in full in Hicks' *Greek Inscriptions in the British Museum.* These are specially important as illustrating the very varied part the Greek theatre played in public life, as the place not only of amusement, but of every form of large assembly. The results are well summed up by Lightfoot, *Essays on Supernatural Religion*, p. 299—

> 'The theatre appears as the recognized place of public assembly. Here edicts are proclaimed, and decrees recorded, and benefactors crowned. When the mob, under the leadership of Demetrius, gathered here for their demonstration against St. Paul and his companions, they would find themselves surrounded by memorials which might stimulate their zeal for the goddess. If the "town clerk" had desired to make good his assertion, "What man is there that knoweth not that the city of the Ephesians is sacristan of the great goddess Artemis?" he had only to point to the inscriptions which lined the walls for confirmation. The very stones would have cried out from the walls in response to his appeal.'

The same Greek word is also used in 1 Co 4^9 'for we are made a *spectacle* unto the world, and to angels, and to men,' where the meaning is the scene or spectacle in the theatre.

A. C. HEADLAM.

THEBAIC VERSION.—Now generally called the Sahidic Version. See EGYPTIAN VERSIONS, vol. i. p. 669^b.

THEBES.—See NO-AMON, vol. iii. p. 555.

THEBEZ (תֵּבֵץ 'brightness' (?); B Θηβής, Θαμασί, A Θαιβαίς, Θαμασεί; *Thebes*).—The place at which Abimelech was killed by a millstone which a woman threw down upon him from a tower that was holding out after the city had been taken (Jg 9^{50}, 2 S 11^{21}; Jos. *Ant.* v. vii. 5). Eusebius and Jerome (*Onom.*) say that in their day there was a village called Thebes, about 13 Rom. miles from Neapolis, on the road to Scythopolis. The Roman road from N. to S. can still be traced, and on it, about 10 miles from *Nâblus*, is *Tûbâs*, which Robinson was the first to identify with Thebez (BRP^2 ii. 317, iii. 305). *Tûbâs* is a large village, surrounded by olive groves and cornfields, on the western slope of a broad fertile valley. Its oil and corn are held in high estimation; and the villagers, who are divided into three factions, own large flocks of sheep and goats. There are numerous rock-hewn cisterns, on which the people depend for their water-supply; and rock-hewn dwelling-places, of which many are still occupied. There is a tomb of *Neby Toba* in the village, which the Samaritans believe to be that of Asher, son of Jacob. The village suffered greatly from the earthquake of 1837 (*PEF Mem.* ii. 247; Guérin, *Samarie*, i. 357; Baedeker-Socin, *Pal.*^{3} 224). C. W. WILSON.

THEFT.—See artt. CRIMES AND PUNISHMENTS in vol. i. p. 522^b, and MAN-STEALING in vol. iii. p. 239.

THELERSAS (B Θελερσάς, A Θελσάς), 1 Es 5^{36} = Tel-harsha, Ezr 2^{59}, a Bab. town.

THEODOTION.—See SEPTUAGINT, p. 453^a, and VERSIONS (Greek other than LXX), p. 866^a.

THEODOTUS (Θεόδοτος).—1. One of the messengers said to have been sent by Nicanor to Judas Maccabæus, 2 Mac 14^{19}. 2. The author of a plot to assassinate king Ptolemy Philopator, which was frustrated by Dositheus, a renegade Jew, 3 Mac 1^2.

THEOPHILUS (Θεόφιλος).—The name of the person to whom the Third Gospel and the Acts of the Apostles were addressed (Lk 1^3, Ac 1^1). It has been supposed by some (and the supposition is an early one*) that the name is, after all, only a general name applicable to any Christian, as meaning 'beloved by God' or 'the friend of God.' Others (*e.g.* Ramsay, *St. Paul the Traveller and*

---

* The Church days for Thaddæus (Judas of James) are in the Greek Church 19 June and 21 Aug., in the Latin 28 Oct. (together with Simon); on the Armenian see Nilles^2, ii. 589, 627; on the Coptic 702, 721 f. (2 and 28 Epip=July); on the Syriac, i: 480 (20 Aug.), 485 (18 Oct.) 489. The Calendar in McLean's *East Syrian Daily Offices* mentions Mar Adai for the Sixth Sunday of the Resurrection.

* It is certainly as old as Epiphanius (*Hær* 51, p. 429).

the Roman Citizen, p. 388) hold that the use of this name puts forward the Acts, as a complete work at least to the time of Domitian, and supports the idea that the book is a composite one, consisting of the original notes of St. Luke ('called the 'Travel-Document'), added to and increased by a later editor. The name is certainly that of an individual; and this statement is confirmed by the title *κράτιστος* prefixed to the name in Lk 1^{3}, as it is prefixed to the names Felix and Festus in the Acts (23^{26} 24^{3} 26^{25}). The title implies that the person to whom it was ascribed belonged to the equestrian order—he must certainly have been a Gentile. Attempts have been made to fix the place of his residence at Antioch, Alexandria, in Achaia, or at Rome, but there are not sufficient data to go upon to establish any of these theories. Other theorists have gone so far as to deny that he was a Christian, or to say that, at any rate, he knew very little about Christianity.* A step still further has been taken in an attempt to identify him with a high priest of his name (Joseph. *Ant.* XVIII. iv. 3) who held office for about five years, and was perhaps the high priest to whom Saul, afterwards Paul, went to ask for 'letters to Damascus unto the synagogues,' that he might take any Christians who were there prisoners to Jerusalem. Whether Theophilus was a learned and cultivated man or not we do not know, but the dedication to him of the Third Gospel is in style the most elegant piece of writing in the NT. Tradition has not been busy with him as it has with most of the early Christians.

H. A. REDPATH.

THERAS, 1 Es 8^{41} (A Θέρα, B om.) ^{60} (BA Θερά).—The name of the place and river where Ezra's caravan halted, called AHAVA in Ezr $8^{21.31}$, and now usually identified with the modern Hit on the Euphrates. The origin of the form of the name in 1 Es. is uncertain. Jos. (*Ant.* XI. v. 2, *εἰς τὸ πέραν τοῦ Εὐφράτου*) possibly read *πέραν* for Θέραν.

THERMELETH (Θερμέλεθ), 1 Es 5^{36}.—The equivalent of TELMELAH, a Bab. town in Ezr 2^{59}, where Cod. B gives the same Gr. form of the name.

THESSALONIANS, FIRST EPISTLE TO THE.—

i. Date.
ii. Circumstances.
iii. Analysis.
iv. Value.
v. Authenticity.
vi. Integrity.
Literature.

i. DATE.—The date of this Epistle in relation to St. Paul's life is fixed within the limits of a few months. It was written during the eighteen months which he spent at Corinth at the end of his Second Missionary Journey (Ac 18^{11}). For it was written after he had left Thessalonica, and while the memories of his first visit there were still fresh (chs. 1. 2 *passim*, esp. 2^{1} *γέγονεν*); after he had gone on to Athens and had left it (3^{1}); after he had been rejoined by Silvanus and Timothy (1^{1}, Ac 18^{5}); while Silvanus and Timothy, of whom Silvanus is not mentioned in any subsequent journey, are still his companions (1^{1}); and, lastly, while he is in some central place where he hears news readily from Macedonia and Achaia, and even from wider sources (1^{8} *ἐν παντὶ τόπῳ*, *i.e.* perhaps the Asiatic and Syrian Churches [so Zahn, *Einleitung*, p. 147]; but may it be that Aquila and Priscilla had told him that they had heard even at Rome of the conversion of the Thessalonians? and might Jason have been the channel of communication? Ac 17^{8} 18^{2}, Ro 16^{21}). It was, then, at Corinth—but not very early or very late in that stay; not very early, as time must be allowed for the mission and return of Timothy (3^{6}), for the occurrence of some deaths at Thessalonica (4^{13}), for the active brotherliness of the Thessalonians to manifest itself to other Christians in Macedonia (4^{10}), and the news of their faith to have spread widely even beyond Macedonia and Achaia ($1^{7.8}$). Nor again very late, if 2 Thess. is genuine, for room must be left for the circumstances which led to the writing of that Epistle. The exact date will depend on the system of chronology adopted. It must lie between 49 and 53 (see CHRONOLOGY OF NT).

ii. CIRCUMSTANCES.—St. Paul and his companions, full of hope owing to the Divine call which had led them to preach in Europe, and encouraged by the spiritual success which, in spite of the insults to their Roman citizenship (2^{2}), they had gained at Philippi, reached Thessalonica. This was a larger and more important centre than Philippi. It was the capital of one of the four divisions of Macedonia; it was a great commercial centre (? cf. 4^{10} *ἐν τῷ πράγματι*, *im Handel* [Luther], *in Geschäften* [Weizsäcker]), holding easy communication with East and West both by sea and by land (cf. 1^{8} 4^{10}); it was a free town with its public assembly and its local magistrates (Ac 17^{5} *εἰς τὸν δῆμον*; v.^{6} *ἐπὶ τοὺς πολιτάρχας*, cf. *CIG* 1967), and a mixed population of native Greeks, Roman colonists, and Orientals, the Jewish settlement being large enough to have a synagogue. St. Paul began as usual with the synagogue, preaching there for three weeks, appealing to the Jewish Scriptures, proving that Jesus was the Messiah, and that His sufferings and Resurrection were in accord with the Scriptures. The result was that some Jews threw in their lot with Paul and Silas, and so did a larger number of Greek proselytes and of leading ladies. The Acts thus bears witness to the fact that a majority of the Church were of Gentile origin, but speaks only of Gentile proselytes, whereas the Epistle implies converts from heathenism (1^{9} 2^{14}). The Epistle, though it implies that St. Paul's stay was prematurely cut short, yet seems to require more than three weeks, and Ph 4^{15} shows that St. Paul twice received supplies from Philippi during the time, even though he was supporting himself by his own work (2^{9}). It is therefore probable that the three weeks of Ac 17^{2} were confined to exclusive work in the synagogue; that after that St. Paul, as at Corinth and Ephesus, made some new place, perhaps the house of Jason (Ac 17^{5}), his abode and place of teaching for Gentiles; and the chronological data would admit of a stay of six months (Ramsay, *St. Paul the Traveller*, p. 228). It was a time of hard work: St. Paul and his companions rose early, working before daylight to support themselves (2^{9}, II 3^{8}); they preached with effectiveness and conviction (1^{5}); they laid stress on the worthlessness of idols, on the reality of the living God (1^{9}); they told of the wrath that was coming on the world, when God would punish the heathen world for its impurity (1^{10} 4^{6}) and the Jews who refused to accept the gospel (2^{16}, II 1^{8}); of the death of Jesus, of His Resurrection, of His power to deliver from this wrath (1^{10} 4^{14} $5^{9.10}$). They added that God had now established His kingdom and called heathen into it (2^{12}); that such a call required a holy life, a separation from impurity (4^{2}), an active life of work (4^{11}, II 3^{10}); that Christianity would lay them open to persecution (3^{4}); but that after certain signs had appeared (II 2^{5}) Jesus would return suddenly, like a thief in the night (5^{2}), and they would be with Him for ever. Their preaching met with great success (1^{8} 2^{13}) in spite of much conflict (2^{2}); the gifts of the Spirit, especially that of prophecy, were manifested ($5^{19.\,20}$); the Divine word made the converts strong to bear persecution (2^{13-15}). There is no indication of the size of the Church; but some of the chief men, perhaps Jason (Ac 17^{5}), Aristarchus, and Secundus (Ac 20^{4}), took the lead in active work and preaching (5^{12-14}), and probably St. Paul, as elsewhere, officially appointed them to this position; apparently, also, some form of almsgiving was organized (II 3^{10}).

---

* This theory is based mainly on the ground that Theophilus from his title 'most excellent' was an official, and that it is not likely that any of the early Christians would hold high office under the Roman authorities.

These results roused the jealousy of the Jews. They misrepresented the teaching of Christ's kingdom as treason to the emperor: working on the heathen populace, they attempted to bring St. Paul before a hastily called meeting of the assembly; but, failing to find him, they took Jason, his host, and other Christians before the native magistrates (cf. *ὑπὸ τῶν ἰδίων συμφυλετῶν*, 2^{14}). These were bound over to keep the peace, *i.e.* probably to send Paul and Silas away; and the same night they withdrew to Berœa. Probably, even while there, they planned a return to Thessalonica, but were unable to carry it out (2^{18} *ἅπαξ*: there would scarcely be time for two such proposals at Athens). From Berœa St. Paul passed on to Athens, leaving Silas and Timothy there, but sending back word that they should join him as quickly as possible (Ac 17^{15}). The writer of the Acts gives the impression that they did not do so until after he had reached Corinth (18^{5}); but this impression must be supplemented from this Epistle. They came at once to him while at Athens, perhaps bringing news of some fresh persecutions at Thessalonica (3^{3} *ταύταις* and ^{4}). Paul, Silas, and Timothy were anxious to return; the tie between them and their converts had been very close; their stay had been interrupted before their work was done; they had only meant to be absent a short time; their converts were young, and might be tempted by persecution or cajolery (3^{2}) to renounce their faith (2^{17} 3^{5}); their opponents, whether Jews or, more probably, heathen, knew well how to misrepresent their motives; their very taunts (*πλάνη, ἀκαθαρσία, δόλος, κολακεία, πλεονεξία, ζητοῦντες δόξαν*, perhaps *ἐν βάρει ὄντες*) are echoed in this letter (2^{3-6}). But there were obstacles; perhaps the guarantee which Jason had given to the magistrates was still enforced (Ramsay, *l.c.*). So Paul and Silas (*ἐπέμψαμεν*, 3^{2}) decided to send Timothy to Thessalonica, and Silas probably returned to visit some other Church in Macedonia. Possibly St. Paul in his growing anxiety sent yet another messenger (*κἀγὼ . . . ἔπεμψα*, 3^{5}).* While they were absent, St. Paul moved on to Corinth, and Silas and Timothy both rejoined him there.

The news that Timothy brought was in the main good: the faith of the Thessalonians had stood the test of persecution (1^{3} 3^{6}); their love showed itself in hospitality and charity, even to other Macedonian Christians (1^{3} 3^{6} $4^{9.\,10}$); they strove to edify each other (5^{11}); they tried to walk obedient to Christ's commands (4^{1}); they were loyal to their teachers, and wished to see them once more ($3^{6.\,7}$). At the same time the calumnies against the new Christian teachers were still prevalent, and the converts were still persecuted; they were also exposed to the ordinary perils of a new Church in a heathen town; they were tempted to fall back into impurity (4^{1-8}); some of the poorer members, perhaps abusing the charity of the richer, were living a life of idleness and dependence (4^{9-12}), others were careless and forgetful of the coming of Christ (5^{1-11}). There was a tendency, perhaps due to 'the old Macedonian spirit of independence' (Lightfoot, *Bibl. Ess.* p. 248), to disorder and contempt of those in authority ($5^{12.\,15}$; *ἄτακτος, ἀτάκτως, ἀτακτεῖν* only in these two Epp.; *στηρίζειν* 4 times, 2 elsewhere). There was a danger of a misuse of spiritual gifts at the meetings of the Church (5^{19-22}); while some had lost friends by death and were afraid that these would not share in the blessings of Christ's Advent (4^{13-18}). On receipt of this news St. Paul writes this Epistle; he writes in the name of Silas and Timothy as well as himself, so that, with a few exceptions (2^{18} 3^{5} 5^{27}), he uses the plural number and speaks for them all; probably he dictated it to Timothy and added the conclusion (5^{25-28}) in his own handwriting (cf. II 3^{17}). Their hope is still to return to Thessalonica, but meanwhile they write to express their delight at the good news, to defend their own conduct as teachers, and to complete what was left wanting in the faith and life of their converts. The words of 4^{1} *καθὼς καὶ περιπατεῖτε, ἵνα περισσεύητε* form the connecting link between the two parts. He aims at 'binding closer the link between the community and himself, and at more effectually severing the link between it and heathenism' (Jülicher). [For the circumstances cf. Lightfoot, *Biblical Essays*, vi., vii.; Ramsay, *St. Paul the Traveller*, ix–xi; Spitta, *Zur Gesch. und Litt. des Urchristenthums*, i. pp. 111–154; Zahn, *Einleitung*, pp. 145–160.]

iii. ANALYSIS.—After a salutation, entirely free from all official titles or allusions to controversy, written as from friends to friends, as by men who are still anxious not *ἐν βάρει εἶναι ὡς Χριστοῦ ἀπόστολοι* (cf. 2^{6}), the writers give thanks for the spiritual state of the Thessalonians, reviewing their personal relations with them in the past, both at Thessalonica (1^{4}–2^{16}) and at Athens (2^{17}–3^{5}), their feelings in the present on the receipt of the news from Timothy (3^{6-9}), and their hopes for the future (3^{10-13}).

The didactic part deals with questions of personal morality (4^{1-12}), with teaching about the dead (vv.$^{13-18}$), and the need of watchfulness (5^{1-11}); ending with regulations for the community-life (vv.$^{12-22}$).

A. *Personal* (1^{2}–3^{13}).

Gratitude for their spiritual virtues is based upon the conviction which the writers felt (*εἰδότες*) of the election of their converts by God ($1^{3.\,4}$); and this is proved (i.) by the effectiveness and assurance of their first preaching, and by the results in the lives of the Thessalonians (vv.$^{5-7}$); (ii.) by the reports of others, who bear witness both to the success of their preaching (*περὶ ἡμῶν*) and the reality of the conversion of the Thessalonians (vv.$^{8-10}$); (iii.) by the knowledge of the Thessalonians themselves (*αὐτοὶ γὰρ οἴδατε*), who can bear witness to the boldness of their preaching, to the purity of their motives, to their tenderness, and the absence of all self-assertion, to the example of self-sacrifice, to their fatherly entreaties (2^{1-12}). This preaching produced the true results in the lives of the converts; they had been bold to endure persecution—as the Churches in Judæa had from the Jews, the determined opponents of the gospel (vv.$^{13-16}$). Consequently, when obliged to leave Thessalonica, they had longed to return; Paul himself had twice planned a visit, but had been prevented; and so at last Paul and Silas had sent Timothy. Paul himself had sent yet a second messenger to comfort and strengthen them and to reassure himself (3^{1-5}). The news that Timothy has brought is like a new gospel, a new life to them, making them thank God and desire to revisit and to complete such faith (vv.$^{6-10}$). So they pray that God will make a visit possible, and meanwhile increase the love of the Thessalonians (vv.$^{11-13}$).

B. *Ethical.* Guidance for the future (4^{1}–5^{22}).

They must press forward in the spiritual life; they must be specially on their guard against all forms of impurity, for God specially punishes that sin, and it is inconsistent with the Christian calling and the gift of the Spirit (4^{1-8}). They must increase their brotherly love, active as it already is (vv.$^{9.\,10}$); they must live an orderly, industrious life, that they may gain the respect of the heathen and be independent (vv.$^{11.\,12}$). They need not be anxious about their dead friends: the union of Christians with the Risen Christ ensures their resurrection (vv.$^{13.\,14}$), and a special word of the Lord has revealed that the dead will meet the Lord, even before the living (vv.$^{15-18}$). But they must not relax their vigilance, for the Lord comes as a thief in the night, and they must watch and be sober, ready to gain the salvation which He will bring (5^{1-11}).

Finally, the community-life is regulated; the members of the

---

* It is possible that St. Paul sent a short letter with Timothy, and that the Thessalonians also replied by a written answer (cf. *Expositor*, Sept. 1898, pp. 167–177, where J. Rendel Harris ingeniously reconstructs the Thessalonian letter).

Church (ὑμᾶς, v.^{12}) are to pay due honour to those in authority, and *they* (ὑμᾶς, v.^{14}) are to keep discipline and be long-suffering. Joy, prayers, and thanksgiving are to be constant; and spiritual utterances are not to be discouraged but tested (vv.$^{12-22}$).

The Epistle ends with a prayer to the God of peace for their complete preservation; with a request for their prayers; a command to greet one another with the holy kiss; a solemn charge by Paul himself that the Epistle be read to all the members of the Church, and a simple benediction (vv.$^{23-28}$).

iv. VALUE.—The value of the Epistle is twofold: it represents most closely St. Paul's preaching to the heathen world, and therefore is to be compared with the speeches at Lystra and at Athens (cf. Sabatier, *L'Apôtre Paul*^{3}, pp. 86–101); St. Paul's antagonists were Jews defending national prejudices; Judaizing Christians are perhaps alluded to in 2^{6}, but quite incidentally: and also it is not only the earliest of St. Paul's Epistles, but possibly the earliest extant specimen of Christian literature.

It shows us St. Paul as the *missionary*, in the absence of any special controversy; as the *consoler* and the *prophet*. We see his self-denial for the sake of others (2^{6-9}; cf. 1 Co 9-11); his intense sympathy with his converts and dependence on their sympathy ($2^{7.11.17}$ 3^{5-10}); his power of self-adaptation (2^{7} νήπιοι ἐγενήθημεν; cf. 1 Co 9^{20}); his sensitiveness to the opinions of others; his assertion of the purity of his own motives (2^{1-6}); his appeal to his own conduct as an example (1^{6}); his insistence on spiritual progress, based upon a hearty recognition of the good already achieved (1^{2} $4^{1.10}$ 5^{11}); his indignation with those who thwart God's work (2^{16} 4^{6}); his sense of union with Christ (4^{1}); his prayerfulness (1^{3} 3^{11-13} 5^{23}); his gratefulness (1^{2} 3^{9}). This is exactly the character which reappears, intensified by controversy, in 2 Corinthians.

The witness to the *organization* and *faith* of the Church is equally interesting. The local Church forms one congregation (1^{1}). The only official title that occurs is ἀπόστολοι, which is apparently used to include Silvanus and Timothy as well as St. Paul; these apostles hold a position of superiority (ἐν βάρει (?) 2^{6}), including the right to be maintained there as in other Churches (2^{9}); they speak generally in a tone of entreaty ($4^{1.11}$ $5^{12.14}$); once St. Paul, separating himself from the others, uses the language of solemn authority (5^{27}). But, under the apostles, there are already officers who preside—probably both for discipline and for worship (5^{12-22}). There are meetings with the holy kiss, the symbol of brotherhood (5^{26}), and with prophetic utterances ($5^{19.20}$); probably at such a meeting the letter would be read (5^{27}). There is a link of sympathy and charity between them and other Churches (1^{8} 2^{14} 4^{10}).

The faith of the Church is directed to God (1^{8}), a God of life and truth (1^{9}) and judgment; a Father, who has called them and marked them out for salvation (4^{7} 5^{9}). Christ is thought of mainly in His future capacity as Judge. Christian life is a waiting for Him (1^{10}). Christians have to be always watchful (5^{1-12}); He may come at any moment, and will come to inflict punishment on sin, as well as to give joy to His followers (4^{6} 2^{19}; ἡ παρουσία of Christ's coming, four times in 1 Thess., twice in 2 Thess., once only elsewhere in St. Paul). But Christ is more than this: His death was the means of salvation in the past (5^{9}); He is now ὁ κύριος, ὁ κύριος ἡμῶν, the OT language about Jehovah being applied to Him (5^{2}); He is God's Son (1^{10}); He is united with the Father as the mystic source of life both for the living and the dead (1^{1} 2^{14} 4^{16}). He is the object of prayer, working with the Father in bestowing earthly as well as spiritual blessings (3^{11} κατευθύναι, ^{12} $5^{18.23}$). The Holy Spirit is given to all Christians to enable them to conquer evil (4^{8}); it gives them joy under persecution ($1^{5.6}$), and inspires the utterances of the prophets (5^{19}). This Epistle gives us the fullest division of human nature into spirit, soul, and body (5^{23}). The picture of the Christian life has all the freshness and glow of early days. It is true that it needs steadying and disciplining, but it is strong and radiant. The converts welcome the good news; they put it to active proof; the message is handed on, as by a trumpet note, to others; they imitate their teachers and become objects of imitation to others; they are taught of God; there is mutual affection and confidence between teachers and taught; there is an atmosphere of love, of joy, of life; they live 'en plein jour.' [For the theology cf. Weiss, *Biblical Theology*, pt. iii. § 1, cap. i.; Lechler, *Apostolic and Post-Apostolic Times*, pt. ii. § 2, cap. i.; *The Speaker's Commentary*, iii. pp. 691–701].

RELATION TO THE OT AND TO CHRISTIAN LITERATURE.—The OT is never appealed to as authority or directly quoted; but its history is referred to (2^{15}) and its language perhaps consciously adapted (2^{16} $4^{5.6.8.9}$ $5^{8.22(?)}$). There is a certain similarity of language between 4^{15-17} and 2 Es 5^{42}, but the thought there is different, the writer considering the justice of God's dealing with different generations of men, and the language is not sufficiently similar to suggest literary dependence on either side; if there is any, probably 2 Esdras is the later work.

There is no reference to Christian *literature*, but it is possible that $1^{9.10}$ point to the germ of some profession of faith in the Father and the Son made at Baptism (ἀληθινός here only in St. Paul); it is possible again that 4^{2} (παραγγελίαι διὰ τοῦ Κ. Ἰησοῦ) refers to the definite enactments of Ac 15^{29}, and that 4^{14} is a semi-quotation from a creed. There seems a reminiscence of St. Stephen's speech (Ac 7^{51}) in 2^{15}; and of our Lord's eschatological discourse in 2^{16} (Mt $23^{32.36}$) 4^{15-17} (Mt $24^{31.37.39}$) $5^{2.5}$ (Mt 24^{43}) 5^{3} (Lk 21^{34}, Mt 24^{8}); but the majority of these are too much the common language of all Apocalypses to allow us to build on them with certainty.

A comparison of 3^{4} with Ac 14^{22} 2 Ti 3^{12} suggests a semi-quotation of our Lord's words, *e.g.* Mt 24^{9}, Jn 16^{33}, but a suggestion that there is a reminiscence of our Lord's sayings recorded in Jn 6^{29} in 1^{3} and of Jn 17^{3} in 1^{9} (P. Ewald, *Das Hauptproblem der Evangelien-Frage*, pp. 85, 93) is more doubtful.

In 4^{15} ἐν λόγῳ Κυρίου is a possible quotation of some saying unrecorded in the Gospel (cf. Zahn, p. 159); and 5^{19}, which is often found combined with the *agraphon* γίνεσθε δόκιμοι τραπεζῖται, is perhaps another (cf. Resch, *Agrapha*, p. 116). All these cases point rather to an oral tradition than to written documents.

v. AUTHENTICITY.—The authenticity is now generally admitted, though there are still opponents (cf. Holtzmann, *Einl.*^{2} p. 237). The external evidence outside the NT is less strong than for some Epistles, as this Epistle did not lend itself readily to quotation; but it was included in Marcion's canon (*circ.* 140), and that implied some previous Catholic collection. The language of 2^{16b} (ἔφθασε . . . τέλος) is found in exactly the same form in the *Test. XII Patr.* (Levi, ch. 6; but see below). There are possible reminiscences of 4^{15-17} in *Didaché* xvi. 6; and of 1^{5} and 4^{2} in Clem. Rom. ch. 42 (but not of 5^{23} in Clem. 38, where the thought is different). But the strongest support is given by 2 Thess., which, whatever its date, implies the existence and the recognition of the Pauline authorship of our Epistle. No doubt of its authenticity was raised before the 19th century.

The internal evidence equally supports the genuineness, in spite of a few difficulties. The objection that the Epistle implies a longer lapse of time than a few weeks is met by the consideration that the Acts will permit of an interval of nearly a year between the foundation of the Church and the writing of the letter. The difficulties of reconciliation with the Acts about the movements of Silas and Timothy and the persecution by heathen have been discussed above. As far as they are difficulties, they affect the historical character of the Acts rather than of 1 Thessalonians.

A few other objections deserve notice. It is urged that St. Paul's eager defence of his motives (2^{1-5}), and incidentally of his apostolic rights (2^{6}), implies a later stage in his life, when Jewish Christians had attacked his apostleship. But such depreciation of his motives would be natural to Jews longing to thwart him (cf. 2^{16}), or to heathen, indignant at the conversion of their friends. The incidents of Ac 15, and probably of Gal 2^{11}, lay behind him, and would account for the incidental allusion in 2^{6}; while, even apart from any attack of opponents, he might think it well to contrast his motives with those of other teachers with whom he might be confused—such as Jewish impostors like Elymas (Ac 13^{10} πλήρης παντος δόλου), heathen rhetoricians or sophists, taking pay for their teaching (πλεονεξία); or, again, he may have desired to dissociate himself from the impure teaching (ἐξ ἀκαθαρσίας) of the priests of the Cabeiri (Lightfoot, *Biblical Essays*, p. 257).

Again, 2^{16b} has been interpreted as implying the previous destruction of Jerusalem. If this were so, it would be more rational to strike out the last sentence as the interpolation of a scribe pointing out the fulfilment of St. Paul's words; but the words do not necessarily mean more than that 'sentence has been pronounced upon them; the wrath of God is gone forth; the kingdom of God passed from them when they rejected the Messiah'; they are parallel to the thought of 1 Co 2^{6-8}, Ro $11^{19.25}$, and Ac 13^{46} 18^{6}; and the use of the phrase in the *Test. XII Patr.* perhaps shows that it was a half-stereotyped Rabbinical formula for declaring God's judgment. Moreover, the present participles ἀρεσκοντων, κωλυόντων, and the phrase εἰς τὸ ἀναπληρῶσαι are inconsistent with the destruction of Jerusalem.

Once more, 4^{17} offers an apparent inconsistency with 2 Co 5^{8}; but a change of expectation on such a point would not be unnatural, and a careful comparison of 5^{10} with 2 Co 5^{10} will show that there is no real antithesis.

Lastly, the solemn command of 5^{27} may have been due to the presence of disorderliness and dissension ($5^{14.15}$), and would be natural, even without such a supposition (cf. Col 4^{16}).

The objections, then, can be fairly met, while on the other hand the style, the character of the writer, the many points of contact with 2 Cor., the simplicity and directness of the thought, the primitive stage of Church organization, the state of the spiritual gifts, the question about the dead which must have arisen very early in any Church, the absence of any motive for forgery, the apparent discrepancies with the Acts, the improbability that a later forger would put language in St. Paul's mouth which at least seems to imply that he expected the Parousia in his lifetime, — all these carry conviction of its genuineness. The arguments on both sides are well stated in Holtzmann (*l.c.*), and the genuineness well defended by Jowett, Weizsäcker (*Das Apostol. Zeitalter*, p. 250), Jülicher (*Einl.*^{3} pp. 41–45), and most fully by von Soden (*SK*, 1885), and Bornemann, § 5.

vi. INTEGRITY. — The integrity of the Epistle has been questioned both on a large and on a small scale.

(1) Pierson and Naber (*Verisimilia*, Amsterdam, 1886) treat it as a composition of two authors. The first was a pre-Christian Jewish writer, writing a hortatory address to Gentiles before the first coming of the Messiah to foretell His advent, and to exhort them to live a life of Jewish morality. The second was a Christian bishop, whose date is not given, named Paul, who inserted into the Jewish treatise a few Christian phrases and a justification of his own motives and preaching. This analysis is based upon the variety of tone,—now that of an authoritative prophet, now that of a humble pastor—the want of close sequence of thought between the paragraphs, and the difference in the usage of particular words (ἡμέρα, γρηγορεῖν), and the scantiness of specially Christian teaching. But the criticism is pedantic, and often inconsistent with itself in details: it requires from a letter the exact structure of a scientific treatise, and allows no play to varieties of mood and thought within one writer's mind.

(2) A list of suggestions of interpolations on a smaller scale will be found in Clemen, *Die Einheitlichkeit der Paul. Briefe* (Göttingen, 1894). The most important affect $2^{15.16}$ and 5^{27}. The objection to $2^{15.16}$ as a whole is groundless, the attack on the Jews being as natural to St. Paul as it had been to St. Peter or St. Stephen (Ac 2^{23} 3^{14} 7^{52}); but v.^{16c} ἔφθασε . . . τέλος might be an editorial comment added after the destruction of Jerusalem, to point out the fulfilment of St. Paul's words (εἰς τὸ ἀναπληρῶσαι); yet, as we have seen, they are quite natural in St. Paul's own mouth at the time. 5^{27} might also be a later addition, emphasizing the importance of the Epistle; but there, too, a natural reason for the words is to be found in the circumstances of the moment (cf. Schmiedel, *Hdcom. ad loc.*; Moffatt, *Histor. NT*, p. 625).

The chief questions of textual criticism affect the reading in 2^{7} (see Westcott-Hort, *NT*, ii. App. p. 128) $^{8.12}$ 3^{3} $4^{1.8}$ 5^{3}. (*ib.* p. 144) ^{4}.

LITERATURE.—Of ancient commentators, Chrysostom, though discursive, is excellent in entering into the writer's point of view; and the moral homilies—*e.g.* those on friendship (1 Th 2^{8}), on the fear of hell (1 Th 4^{18}, 2 Th 1^{8}), on intercession (2 Th 3^{2})—are very spiritual and pointed. Theodore of Mopsuestia (*circ.* 415 A.D.) has more of the modern exegetical instinct, and explains the exact meaning and the historical and practical references well, but at times forces the language to suit his own views. Theodoret, while dependent on these two, shows independence of judgment. His notes are clear and sensible, and he is especially careful to draw out the dogmatic inferences of the Epistle.

Of modern writers, Jowett, A. J. Mason (Ellicott's *Comm. for English Readers*), Bishop Alexander (*Speaker's Comm.*), and J. Denney (*Expositor's Bible*) are most interesting on Introduction and doctrinal teaching. More careful exegesis will be found in Ellicott, Alford, Findlay (*Cambr. Bible for Schools*), Lightfoot (*Notes on Epistles of St. Paul*, 1895), P. W. Schmiedel in the *Hdcom. z. NT*, and, most completely of all, in Börnemann-Meyer^{6}. Useful notes on 2^{6} and 5^{4} will be found in Field, *Notes on Trans. of NT* (*ON*^{2}); and on 2^{3-8} by F. Zimmer in 'Theologische Studien D. B. Weiss dargebracht' (Göttingen, 1897); Askwith, *Introd. to Thess. Epp.* (1902).

W. LOCK.

THESSALONIANS, SECOND EPISTLE TO THE.—

i. Date and Circumstances.
ii. Analysis.
iii. Literary Dependence.
iv. Authorship.
v. Integrity.
vi. Value.
Literature.

i. DATE AND CIRCUMSTANCES. — The genuineness of this Epistle is more contested than that of any other attributed to St. Paul, except the Pastorals. If it is not genuine, the exact date and circumstances are merely a literary setting, of little historical value. Yet, even so, a definite situation was in the writer's mind and must be examined.

The following points fix that situation. Apparently the temple is still standing (2^{4}), *i.e.* the date is before A.D. 70. Further, Paul, Silvanus, and Timothy, after having founded the Church at Thessalonica (2^{5} 3^{1-10}) and written a letter, probably 1 Thess., to it (2^{15} and perh. 2^{2} 3^{14}), are still working together (1^{1}) in some place where they are thwarted by perverse and malicious men (3^{2}), and where there are other churches in the neighbourhood (1^{4}). This will suit exactly the time of Ac 18^{5-11} (cf. 2 Co 1^{1} with 1^{4}); late in the stay at Corinth, but probably before the appeal to Gallio had stopped the Jewish persecution. At this time news about the Thessalonian Church reached them at Corinth (3^{11} ἀκούομεν); perhaps brought by the messenger implied in 1 Th 3^{5}, perhaps by the bearer of 1 Thess. on his return, perhaps by some chance passer-by. They were still exposed to persecution, and were still bravely enduring it; but there were tendencies to disorder and insubordination; idlers were presuming on the charity of their neighbours; and there was a tendency to excitement caused by an expectation of the speedy setting-in of 'the day of the Lord'; spiritual utterances, not duly tested (1 Th 5^{20-22}), increased the expectation; sayings of Paul, Silvanus, and Timothy were exaggerated to countenance it; possibly a forged letter in their name was circulated, or (more likely) the language of 1 Th 4. 5 was distorted in the same interest (2^{2}). The three teachers feel that their converts must be praised and comforted, yet stimulated and steadied. They write a common letter—always in the plural, except that once one of them, probably Paul, intervenes with a special appeal to his own teaching

(2^{5}), and Paul confirms the whole with his autograph at the end (3^{17}).

ii. ANALYSIS.—

$1^{1.2}$ Greeting.

A. *Gratitude for their spiritual state*, especially for their loyal endurance under persecution ($^{3.4}$).
  Strengthening of them by the thought of
    (1) the justice of God (^{5});
    (2) the special manifestation of that justice, which will accompany the Appearance of the Lord Jesus ($^{6-10}$).
  Prayer to God to complete their Christian life, that Christ may be glorified in them on 'that day' ($^{11.12}$).

B. *Fuller teaching about that day.*
  Warning against being misled into thinking it immediately at hand ($2^{1.2}$), and a reminder of Paul's past teaching (^{5}), which implied (*a*) a mystery of lawlessness and of error already at work; (*b*) a restraining power or person; (*c*) a removal of that restraint at some future date; (*d*) a great apostasy; (*e*) the appearance of the man of sin; (*f*) the appearance of the Lord destroying the man of sin and all who have been deceived by him ($^{3.4.6-12}$).
  Thanksgiving to God that He saved them from this doom ($^{13.14}$).
  Exhortation to abide loyally by their past teaching (^{15}).
  Prayer to God to comfort and to steady them ($^{16.17}$).

C. *Request for their intercession* ($3^{1.2}$). Assurance of God's faithfulness (^{3}), and of their teacher's faith in them (^{4}).
  Prayer to God to give them love and patience (^{5}).

D. *Regulation of their community-life.*
  They are to shun all disorderly brethren (^{6}); for such disorder is contrary to the example which their teachers had set ($^{7-9}$), and their repeated command (^{10}). Such brethren must earn their own bread ($^{11.12}$). The rest must be forbearing, but yet break off intercourse with any one who persists in disobeying this written command ($^{13-15}$).
  Prayer to the God of peace to give peace to them *all* (^{16}).
  Autograph salutation in Paul's own handwriting (^{17}).
  Benediction (^{18}).

iii. LITERARY DEPENDENCE.—(1) The Epistle presupposes the existence of 1 Thessalonians. For II 2^{15} explains itself readily by reference to I 4^{1-8} 5^{1-10}; II 3^{6} to I 4^{11}; II 3^{14}, perhaps, but less probably, to I 4^{10-12}; and II 2^{2} may imply a misunderstanding of I 4^{17} $5^{2.3}$. Further, there is a remarkable similarity of structure, *e.g.*, in the form of greeting (I 1^{1}, II $1^{1.2}$), of thanksgiving (I 1^{2}, II 1^{3}), of prayers (I 3^{11} 5^{23}, II 2^{16} 3^{16}), of transition (I 4^{1}, II 3^{1}). And this extends to many verbal points, as will be seen by a comparison of the following places:—

I 1^{3} with II 1^{3}.
I 1^{4} with II 2^{13}.
I 1^{6} with II 1^{4}.
I $1^{8.9}$ with II 1^{4}.
I 2^{6-9} with II 3^{9}.
I 2^{12} with II 1^{5}.
I 3^{2} with II 2^{17}.
I $4^{1.10}$ 5^{11} with II 3^{4}.
I 5^{9} with II 2^{14}.
I $5^{14.15}$ with II 3^{13}.

The writer of 2 Thess. must have lately written 1 Thess., or have known it as a piece of literature.

(2) *Previous apocalyptic teaching* is also presupposed. No one passage of the OT is appealed to, but the apocalyptic descriptions 1^{6-10} 2^{3-12} weave together phrases from Is $2^{10.19.21}$ 11^{4} [found in a similar context in Ps-Sol $17^{27.39}$] 49^{3} $66^{5.14}$, Jer 10^{25}, Ezk 28^{2}, and Dn 11^{36}. There are also striking resemblances between the language here and that of our Lord's eschatological discourse; cf. 1^{9} with Mt $25^{31.46}$; 2^{1} with Mt 24^{31} (*ἐπισυνάξουσιν*); 2^{2} with Mt 24^{6} (*θροεῖσθαι*, here and Mk 13^{7} only in NT); 2^{3} with Mt 24^{5}; 2^{4} with Mt 24^{15} (*ἐν τόπῳ ἁγίῳ*), Mk 13^{14} (*ἑστηκότα ὅπου οὐ δεῖ*); 2^{7} with Mt 24^{12} (*ἀνομία*); 2^{9} with Mt 24^{24}. Such similarities may be due to the fact that each draws independently from the common stock of apocalyptic imagery, and they do not prove a literary dependence on any written Gospel, but they make probable a knowledge of some oral tradition of that discourse.

(3) A knowledge of other Gospel sayings may lie behind 1^{5}=Mt 5^{10}, 3^{3}=Mt 6^{13}. The command in 3^{10} is a quotation of a Rabbinical saying, but possibly it had been already used by our Lord Himself, and may have been taken by St. Paul from Him (cf. Resch, *Agrapha*, pp. 128 and 240).

iv. AUTHORSHIP.—Church tradition universally ascribed the Epistle to St. Paul. It is directly attributed to him by Polycarp (c. xi.), who quotes 1^{4}, though by mistake he quotes it as addressed to the Philippians. Reminiscences of the apocalyptic language may underlie Justin Martyr, *Dial.* xxxii. cx.; *Didache*, c. 16; and more prob. *Ep. Vienne and Lyons*, *ap.* Eus. v. 1 (ἐνέσκηψεν ὁ ἀντικείμενος, *προοιμιαζόμενος ἤδη τὴν μέλλουσαν ἔσεσθαι* παρουσίαν *αὐτοῦ . . . Χριστὸς . . .* καταργῶν *τὸν ἀντικείμενον* . . . οἱ υἱοὶ τῆς ἀπωλείας), but in no case can the reference be called undoubted. Marcion included the Epistle in his Canon as Pauline, and so did the Latin and Syriac translators.

The internal evidence on the whole supports this view. The general structure of the Epistle, the style and phraseology, the affectionate tone, the frequent intercession for the readers, the request for their prayers, the appeal to his own teaching and example, the sharp insistence on his own authority in a matter of discipline, are all characteristic of St. Paul. But two main objections are raised.

(*a*) The relation of the style to that of 1 Thessalonians. In spite of the points of likeness (see above), there is a difference; the tone is more official (*εὐχ. ὀφείλομεν*), the feeling less vivid, the sentences more involved, the same things are being said, but said with less point and directness; they suggest a second person adapting Pauline thought (Spitta, pp. 116–119). But the variety seems equally explicable as that of one writer writing after a short lapse of time, and in a different mood. A comparison of the style of 2 Timothy with 1 Timothy, of Colossians with Ephesians, of 2 Co 11 with 1 Co 9, will show very similar variety.

(*b*) The eschatology is said to be un-Pauline. It is true that no such detailed anticipations are to be found elsewhere in St. Paul (but 2 Co 6^{15} *τίς συμφώνησις Χριστοῦ πρὸς Βελίαρ* may refer to the Antichrist tradition). But such teaching was naturally esoteric; and, even here, the writer seems intentionally to avoid being explicit, through fear, perhaps, of giving the Roman authorities a handle against himself or his converts (cf. the reticence of Jos. *Ant.* x. x. 4, about the interpretation of Daniel's prophecies). Further, some such teaching was common among the Jews, so that St. Paul would have inherited it; and, lastly, it is almost universal in Christian writers (Synoptists, John [5^{43}], James, 1. 2 John, Apoc.), so that the probability is in favour of St. Paul having shared the expectation in some form.

But is the form implied here Pauline? This again is difficult to answer, because of the difficulty of deciding what the writer was pointing to. There lay behind him in the history of the doctrine the following stages. (1) A common Oriental myth of a struggle between the power of evil, represented by a dragon (Bab. Tiāmat) and the Creator of the world (Marduk), in which the dragon had been bound, but would revive for another conflict with God before the end of the world (see articles RAHAB, SEA MONSTER, and REVELATION). The connexion of this with the following is only a conjecture, but a very possible conjecture. (2) A Jewish expectation, springing up during the Exile, of an attack upon Israel by foes led by some human leader or (later) by Satan or Beliar, which would be frustrated either by J″ or the Messiah. Such a victory is described in Ezk 38. Something similar recurs in the prophecies of Daniel (7. 8 and 11) about the conflict with Antiochus Epiphanes. The expectation did not cease with the death of Antiochus; it was applied to the thought of deliverance from the Roman empire in 2 Es 5^{1}, Ps-Sol 17, Orac. Sib. iii. 60, Apoc. Baruch, c. 40, Asc. Is. c. 4 (cf. MAN

OF SIN). (3) This anticipation had become Christian. Our Lord had contemplated a leader 'coming in his own name' (Jn 5^{43}) and demanding allegiance; some person, 'the abomination of desolation, standing in the holy place (ἑστηκότα)'; many false prophets, a growth of lawlessness, a destruction of Jerusalem, and a coming of the Son of Man (Mt 24, Mk 13, Lk 21). Similar teaching had been given at Thessalonica by the writer frequently (ἔλεγον, 2^{5}), but it was shared by his fellow-teachers (ἐρωτῶμεν . . . ὡς δι' ἡμῶν, $2^{1.2}$), and the phrases ἡ ἀποστασία, ὁ ἄνθρωπος, ὁ ἀντικείμενος, ὁ κατέχων are quoted without explanation as from a well-known body of teaching. (4) A new point had probably been given to the expectation among the Jews in A.D. 39 or 40, by the attempt of Caligula, frustrated only by his death, to erect his own statue in the temple of Jerusalem (Jos. *Ant.* XVIII. viii.; Tac. *Hist.* v. 9). This would help to explain the language of 2^{4}, and Spitta suggests that St. Paul and his colleagues had adapted a Jewish form of the apocalyptic teaching written in view of Caligula's attempt; but there is no necessity for such a suggestion, interesting and possible as it is.

This history of the doctrine helps us to define the probable application which is implied in this teaching. It is not indeed necessary to suppose in St. Paul's mind any clear identification with a definite person or a definite time; yet the language is more natural on such a supposition, and the interpretation will come in one of two directions.

(α) Probably the opposition comes from Jewish soil. τὸ μυστήριον τῆς ἀνομίας is the opposition of the Jews to the spread of Christianity (cf. $3^{1.2}$, 1 Th 2^{16}, Ac 18^{6} and *passim*); the ἐνέργεια πλάνης is the blinding of the eyes of the Jews to the gospel (Ac 13^{41-46}, 1 Co 2^{6}, 2 Co 3^{14}, Ro 11^{25}); τὸ κατέχον is the Roman empire controlling the Jews 'assidue tumultuantes' (cf. Ac 18^{2}) and preventing their illegal attacks on the Christians; ὁ κατέχων, the Roman emperor, or perhaps on the analogy of Dn $10^{13.20}$ some archangel who presides over the order of the empire (so Goebel, *ad loc.*); ἡ ἀποστασία is the final rejection by the Jews of their Messiah, or possibly some Christian apostasy such as is contemplated in He $10^{35\text{ff.}}$; ὁ ἄνθρωπος τῆς ἁμαρτίας is some false Messiah, expected to lead the Jews in a final rising against the Roman empire; and his destruction lies in the overthrow of the Jewish polity and the salvation and establishment of the Christian Church. This interpretation is most in accord with the Synoptists and with the subsequent Church tradition, as well as with St. Paul's own circumstances at the moment.

(β) The opposite view has been frequently maintained of late, which sees the explanation in heathen opposition and especially in the worship of the Cæsars. The lawlessness and deceit will then be that of heathen wickedness and error; the restraining power, the antagonism of the Jewish State (Warfield), or the imperial authority (Jülicher); the man of sin, the emperor or some heathen personification of evil proclaiming himself as God; the apostasy, that of the Jews, or, as on the former theory, of some Christians; and the coming of the Son of Man will be the ultimate annihilation of Cæsarism and the establishment of Christianity as the religion of the world. This view would be more in accordance with the past history of the application to Antiochus Epiphanes, with the attempt of Caligula, and with the reference to Nero in the Apocalypse; but it seems less in accord with St. Paul's own circumstances at the time.

Either of these views gives a setting possibly Pauline; the language, no doubt, is indefinite; it is capable of being applied to the theory of a Nero *redivivus* (*c.* 69 A.D.), or to some Gnostic opposition to Christianity in the 2nd cent.; but none of the language requires such an interpretation. Nor, again, is this view fatally inconsistent with St. Paul's expectation elsewhere. 1 Th 5^{1-3} certainly foretells a sudden surprising appearance of the day of the Lord; but that is consistent with a previous preparation of events, the length of which is left, as here, wholly indefinite. Ro 11^{26} also implies a hope that 'all Israel will be saved,' which seems scarcely consistent with a great Jewish antagonism; but the language cannot be rigidly pressed; the failure of a Jewish false Messiah might be a stage in the conversion of the Jewish nation; and it is possible that St. Paul's expectation on this point may have changed. Again, 1 Ti 4^{1}, 2 Ti 3^{1} point to an expectation of an apostasy within the Christian Church; but that would not be inconsistent with the view maintained here.

Recent investigations have emphasized the strength of the tradition both Jewish and Christian; but they have also shown the versatility of its application; it is applied to the danger which threatens the truth at any moment. Daniel gives it a heathen application to Antiochus Epiphanes; the writer of the Psalms of Solomon to Pompey; St. Paul, thwarted by Jews, applies it to them; St. John sees many Antichrists in teachers untrue to Christianity; the writer of the Apocalypse, when the Roman empire had become a persecuting power, applies it to the Roman emperor; the writers of the Ep. of the Churches of Vienne and Lyons see in the persecution there an anticipation of the final conflict: 'he that opposeth' swoops down upon the Christians; Christ in the martyrs 'brings to naught' him who opposeth; the apostate Christians are 'the sons of perdition.' This application is all the more interesting that it is incidental, and the passage is not quoted. Consequently there may be many applications and many fulfilments yet in the future, as long as the cleavage between faith and unfaith, error and truth, remain. [Cf. MAN OF SIN, vol. iii. p. 226; PAUL, vol. iii. p. 709; Bousset, *Der Antichrist* (Göttingen, 1895, Eng. tr. 1896); in *Encyc. Bibl. s.v.*; Thackeray, *The Relation of St. Paul to Contemporary Jewish Thought*, pp. 136–141; Stanton, *Jewish and Christian Messiah*, iii. c. 2; R. H. Charles, *Eschatology*, p. 380 ff., and art. 'Apocalyptic Literature' in *Encyc. Bibl.*; Schürer, *HJP* II. ii. 154 f.; B. B. Warfield in *Expositor*, 1886, ii. pp. 30–44; G. G. Findlay, *ib.* 1900, ii. pp. 251–261].

There is, then, no reason for denying the authorship to St. Paul. Spitta in a valuable examination of the Ep. (*Zur Gesch. und Litt. des Urchristentums*, i. pp. 111–154) suggests Timothy as the real author, supposing that St. Paul, instead of dictating as usual, left Timothy to compose it, and that Timothy is referring in 2^{5} to his own separate teaching at his last visit to them; St. Paul then adds a general authentication in 3^{17}. In this way he attempts to explain the difference of style between 1 Thess. and this Ep., and the difference of the eschatological view. But these differences are not so great as to call for such an explanation; further, St. Paul would not authenticate a letter which contained any substantial difference from his own teaching; the Thessalonians would naturally refer ἔλεγον of 2^{5} to the leading apostle whose name stands first (1^{1}) and who is named in 3^{17}, the only other use of the singular; and $2^{1.2}$ imply that the teaching of the one teacher (2^{5}) was shared by all. If another author were needed, Silvanus seems a more natural suggestion, for he, as a prophet, might be the source of the prophetic passage; but the theory creates more difficulties than it solves.

Those who reject the Pauline authorship altogether suppose that at some later date an expectation of the immediate coming of Christ arose and produced excitement and neglect of daily duties; that some one in authority tried to meet the peril implied in the excitement by writing a letter which described the stages that would precede that coming, and in order to gain weight for it composed it in the name of Paul, deliberately modelling it upon 1 Thess., the Pauline Epistle which was most cognate in subject. Of the many suggested situations, that of Schmiedel seems the best, who would connect it with the expectation of a return of Nero, and so place it after Nero's death (June 68), and before the destruction of the temple (August 70). It would then deal with the same circumstances as the Apocalypse (ch. 13). But there is no detail here, which connects 'him that opposeth' clearly with Nero *redivivus*, and the very elaborateness of the theory is against its truth.

v. INTEGRITY.—The difficulties of 2^{1-12} have naturally led to suggestions of interpolation. Pierson and Naber (*Verisimilia*, pp. 21–25) treat 1^{5-10} 2^{1-12} 3 (except $^{7-13.\ 16-18}$) as parts of a pre-Christian Jewish apocalypse, worked up into a Christian form by some unknown bishop of the name of Paul (cf. preceding art.). Schmidt, S. Davidson, and others treat the main body as Pauline, with 2^{1-12} as a late insertion of about 69; Hausrath treats 2^{1-12} as the only Pauline fragment worked up into an Epistle at a later date. But there is no MS support for any of these theories, and 2^{1-12} cannot be separated from 1^{5-10}, which latter section shows striking similarities with the Jewish expectations; cf. esp. 1^8 and 2^9 with Sib. Orac. iii. 67 f. of the coming of Beliar—

> ἀλλ οὐχὶ τελεσφόρα ἔσσετ᾽ ἐν αὐτῷ
> ἀλλὰ πλάνα, καὶ δὴ μέροπας πολλοὺς τε πλανήσει
> πιστοὺς τ᾽ ἐκλεκτοὺς θ᾽ Ἑβραίους ἀνόμους τε καὶ ἄλλους
> ἀνέρας, οἵτινες οὔπω θεοῦ λόγον εἰσήκουσαν·

(cf. Clemen, *Die Einheitlichkeit der Paul. Briefe*, pp. 17, 18; Moffatt, *Historical NT*, p. 626).

vi. VALUE.—Short as the Epistle is, it is of great value, both doctrinal and historical. It marks the high position attributed from the first to Christ, the language of the OT about Jehovah being applied to Him (1^7), and He being ranked with the Father as the one source of comfort and strength (2^{17} παρακαλέσαι . . . στηρίξαι, each in the singular). It shows us the strength of the expectation of the Second Advent in the Early Church; the deep sense of the struggle between good and evil, between truth and falsehood, its consummation in definite persons, and the final triumph of the good and true; the faith in the ultimate justice of God to right the injustice of this world. It shows the method in which the apostle met the feverish impatience that would antedate the end: (*a*) laying stress on those elements in the traditional expectation which implied lapse of time and an overruling Providence which fixed the right moment for the coming (ἐν τῷ αὐτοῦ καιρῷ, cf. Ps-Sol 17^{23} εἰς τὸν καιρὸν ὃν οἶδας σύ, ὁ θεός); (*b*) insisting on the duty of each man earning his own livelihood and discouraging all cringing dependence on Church charity; (*c*) strengthening the bonds of discipline, pressing the authority of his own commands, and calling upon the Church to rise to the duty of keeping its ranks free of unworthy members; 3^{14} marks the commencement of Church discipline. It sanctions the tendency to read the signs of the times and to see the great struggle between good and evil working itself out in contemporary events; and even if we cannot for certain identify St. Paul's application, or even if it was not fulfilled exactly as he expected, yet as the great expectation had grown with centuries and was rooted in principles, so it remains still, claiming a more adequate fulfilment. For applications made in subsequent Christian times see Smith's *DB*, *s.v.* 'Anti-Christ.'

Historically, the section 2^{1-12} was of great importance; for the identification of the Roman empire with ὁ κατέχων led to its being treated as the great protecting power, and so gave special point to the prayers for it and for the emperor (cf. Tertullian, *Apol.* 32: 'est et alia major necessitas nobis orandi pro imperatoribus, etiam pro omni statu imperii rebusque Romanis, qui vim maximam universo orbi imminentem ipsamque clausulam sæculi acerbitates horrendas comminantem Romani imperii commeatu scimus retardari'). The language of 3^{17} is also valuable, as indicating that St. Paul had a larger correspondence than we now possess, and probably hints at a danger of forged letters even at this early date.

LITERATURE.—See at end of preceding article, and add Goebel, *Die Thessalonischen Briefe*, a crisp, terse, sensible commentary. The authorship is best discussed, as against St. Paul, by Spitta (see above), Schmiedel, *Hdcom.* pp. 7–11: as for St. Paul, by Jülicher, *Einl.*^{4} pp. 45–51; Zahn, pp. 160–182; Moffatt, *Historical NT*, pp. 142–148; Börnemann in Meyer's *Commentar zum NT*. Interesting suggestions for the emendation of the text (in 1^{10} ἐπιστώθη, 2^2 ὡς δὴ ἡμῶν) will be found in Westcott-Hort, ii. App. p. 128; Field, *Notes on Trans. of NT*, p. 202.

W. LOCK.

THESSALONICA (Θεσσαλονίκη), a city of Macedonia, still known by that name under the but slightly altered form of *Saloniki*, has long held a prominent place in history, and still ranks, after Constantinople, as the most important town in European Turkey. It is situated on the innermost bay, or north-eastern recess, of the larger gulf, which now takes its name from the modern town, but was known to the ancients as the Thermaic Gulf, after an earlier town on the same site, called Therme. It is built in the form of an amphitheatre on the slopes at the head of the bay; and it is seen from a great distance, crowned by its citadel above, and conspicuous by whitewashed walls several miles in circuit. 'The situation,' says Tozer, 'recalls the appearance of Genoa from the way in which the houses rise from the water edge, and gradually ascend the hillsides towards the north. It is admirably placed for purposes of communication and trade, as it lies in the innermost bay of the winding gulf, and forms the natural point of transit for exports and imports; besides which it commands the resources of the immense plain, which reaches in a vast arc as far as the foot of Olympus, and receives the waters of three important rivers, the Axius, the Lydias, and the Haliacmon' (*Geog. of Greece*, 1873, p. 204). It is said to have borne earlier the names of Emathia and Halia: certainly it bore that of Therme, by which it is known to Herod. (as a halting-place of Xerxes on his way to Greece, vii. 121, 123, 124, 127, 128, 183) and Thucyd. (i. 61, ii. 29), and which it probably owed to hot mineral springs (*thermæ*), still existing in its vicinity. The name Thessalonica (as to the origin of which various conjectures are brought together by Tzetzes, *Chil.* xiii. 305 ff.), which is first employed by Polybius (xxiii. 4, 4; 11, 2; xxix. 3, 7), would appear to commemorate a victory over the Thessalians, of which nothing definite is known as to time, place, or victor (Philip?). It was most probably given to the city by Cassander (who rebuilt it about B.C. 315, and transferred to it the inhabitants of several small townships in the vicinity; Strabo, vii. fr. 21) in honour of his wife of that name, who was daughter of Philip, and step-sister of Alexander. The place soon gained importance, becoming, on the conquest of Macedonia by the Romans, the capital of the second of its four divisions (Liv. xlv. 29), and, on the conversion of the country a few years later into a province, practically the capital of the whole, and residence of the Roman governor; called 'the mother of all Macedonia' (*Anthol. Gr.* ed. Jacobs, ii. p. 98, *Epig.* 14), although the name 'metropolis,' occurring on coins of the city, is of later date. The Romans had docks (*navalia*) there (Liv. xliv. 10); the great Egnatian highway traversed the city from west to east, the remains of arches at either end of a long street still marking the site of its gates; Cicero during his exile found friendly shelter there for seven months with Plancius the quæstor (*Orat. pro Planc.* 41; *Ep. ad Att.* iii. 8 ff.). In the first Civil war it supplied a basis of operations for Pompeius and the Senate (Dio Cass. xli. 20); in the second it espoused the cause of Antonius and Octavianus (Plut. *Brut.* 46; Appian, *Bell. Civ.* iv. 118), which brought to it apparently the privilege of becoming a free city (*liberæ conditionis*, Pliny, *HN* iv. 36), for there are several coins inscribed with the words ΘΕΣΣΑΛΟΝΙΚΕΩΝ · ΕΛΕΥΘΕΡΙΑΣ, probably to be associated with the victory at Philippi, from the reverse bearing the joint names of Antonius and Augustus. This privilege implied autonomy (hence the mention of *τὸν δῆμον* in Ac 17^{5}), and the appointment of their own magistrates, who were in this instance designated *πολιτάρχαι*, as is apparent from Ac $17^{6.8}$, where the term is rendered RULERS OF THE CITY (which see). Tafel, in his comprehensive monograph (*De Thessal. eiusque agro dissertatio geographica*, Berol. 1839), follows out the fortunes of the city as under the later Empire a main bulwark against the Gothic and Slavonic invasions (of which he enumerates six); and, during the Middle Ages, thrice captured,—by the Saracens in 904, by the Normans under Tancred in 1185, and by the Turks in 1430. It has still a population of about 70,000, whereof 20,000 are Jews.

When St. Paul, along with Silas, visited Thessalonica on his mission to Macedonia and Greece, the Jews there, who were numerous and influential enough to have founded a synagogue, were his most active opponents. The discussions with them on three Sabbaths persuaded few Jewish hearers, but a much larger number ('a great multitude') of 'the devout Greeks'—*i.e.* proselytes—'and of the chief women not a few' (Ac 17^{4}). But the Jews, who were not won over, called to their aid some worthless idlers of the market-place (*ἀγοραῖοι*), excited a tumult, beset the house of Jason, and, not finding there those whom they sought, dragged Jason and others before the politarchs, accusing them of having received disturbers of the world's peace, and of contravening the imperial decrees by owning another king in Jesus. Upon this alarm, the politarchs took securities from the accused and dismissed them; but the brethren at once sent away Paul and Silas by night to Berœa. The subsequent fortunes of the Church which their brief ministry had formed called forth from the apostle (courteously associating with himself Timothy as well as Silvanus=Silas) the two Epistles to the Thessalonians. See preceding two articles.

WILLIAM P. DICKSON.

THEUDAS (Θευδᾶς; the name is supposed to be a contraction of Θεόδωρος).—In the speech of Gamaliel contained in Ac $5^{34\text{ff.}}$ the speaker is represented as referring to the rebellion of a certain Theudas, who professed to be some one great: 400 men followed him; but he was killed, and his following came to nothing. At a later date, Gamaliel goes on to say, Judas of Galilee arose at the time of the taxing, and his following too were scattered. In Josephus (*Ant.* XX. v. 1) we have an account of one Theudas. While Fadus was procurator, he tells us, a certain magician whose name was Theudas persuaded a great part of the people to take their effects and follow him across the Jordan. He pretended he could divide the river by his power as a prophet. Fadus attacked him suddenly, cut off his head, and dispersed his followers. It is perfectly clear that if this Theudas be the same person as is mentioned in the Acts, the author of that book has been guilty of an anachronism. For he puts into the mouth of Gamaliel, who must have spoken before A.D. 37, a reference to a revolt which occurred about A.D. 45 or 46. This discrepancy is one of the chief difficulties in the Acts of the Apostles, and various suggestions have been made to account for it.

1. Reference has already been made to the suggestion that the mistake arose through the blundering use of Josephus (vol. i. p. 30). It is not necessary to add anything to what is said there, except that a careful reperusal of the passages does not tend to make the hypothesis more credible.

2. Bishop Lightfoot (Smith's *DB*^{1} i. 40) points out that Theudas (=Theodorus, Theodotus, or Theodorius) would be quite natural among the Jews as the Gr. equivalent to several Heb. names; and that Josephus (*Ant.* XVII. x. 8; *BJ* II. iv. 1) tells us of many disturbances which took place at this time without giving names. He also quotes an opinion of Wieseler's that Theudas may be the Gr. form of the name of Matthias, son of Margalothus, mentioned by Josephus (*Ant.* XVII. vi. 2). But the identification is hardly probable.

3. Blass (*ad loc.*) seems to suggest that the name Theudas has been interpolated in the passage of Josephus from the Acts, because the Christians thought that the two passages illustrated one another. We have some reason for thinking that Josephus was interpolated by the Christians; but in this instance it is hardly probable that anything of the sort was done.

We do not know enough to explain the difficulty. It is perfectly possible that the explanation of Lightfoot may be correct; it is quite possible that the mistake of St. Luke may only be one of name, and it is very bad criticism to condemn an author for an apparent discrepancy when our knowledge of the circumstances is so limited. But, assuming that the Acts are incorrect, we may ask what this implies. It implies that, to a certain extent at any rate, the speech of Gamaliel was the author's composition. This may mean only that he supplied one of the incidents which Gamaliel referred to, having from some source a general knowledge of the attitude of the speaker; or it may mean that he took this manner of putting before his readers what he had reason to believe was a tendency of a section of the Jews.

A. C. HEADLAM.

THICKET.—See FOREST.

THIGH (יָרֵךְ, *μηρός*).—The girding of the sword *upon the thigh* is referred to in Ex 32^{27}, Jg 3^{16} (Ehud girded his sword upon his *right* thigh, whence, being left-handed, he could most conveniently draw it, v.^{21}), Ps 45^{3}, Ca 3^{8}. Jacob's thigh was dislocated by his opponent in wrestling, so that next day he limped upon it, Gn $32^{25\,(26)}$ [J]. In an editorial note this circumstance is assigned as the basis of the Jewish custom of declining to eat of 'the sinew that shrank,' v.$^{32\,(33)}$. See art. FOOD, vol. ii. p. 39^{a}. In the jealousy ordeal one of the effects looked for in the event of a wife's guilt was the falling away (נפל) of her thigh, Nu $5^{21.22.27}$ [P]; see Dillm. *ad loc.* In the *waṣf* in praise of the Shulammite it is said, 'the roundings of thy thighs (חַמּוּקֵי יְרֵכַיִךְ) are like jewels,' Ca 7^{1}. Smiting upon the thigh appears in Jer 31^{19} and Ezk 21^{12} as a token of consternation. For the phrase 'smite them hip upon thigh' (הִכָּה אוֹתָם שׁוֹק עַל־יָרֵךְ), see art. HIP.

Special attention is due to a set of passages in which the thigh appears as the seat of procreative power. In Gn 46^{26}, Ex 1^{5} [both P], Jg 8^{30} a man's descendants are spoken of as proceeding from his thigh (יֹצְאֵי יָרֵךְ). Cf. W. R. Smith, *Kinship*, 34, *RS*^{2} 380. This throws light upon the placing of the hand under the thigh [=the genital organ] in taking an oath, Gn $24^{2.9}$ 47^{29} [all J]. The *sacredness* attributed to this organ in primitive times (see Holzinger or Gunkel on Gn 24^2) would give special solemnity to an oath of this kind. Moreover, seeing that 'it is from the thigh that one's descendants come, to take an oath with one's hand upon the thigh could be equivalent to calling upon these descendants to maintain an oath which has been taken, and to revenge one which has been broken' (Dillmann).

It is not clear how we should understand Rev 19^{16} 'He hath on his mantle and on his thigh (*ἐπὶ τὸ ἱμάτιον καὶ ἐπὶ τὸν μηρὸν αὐτοῦ*) a name written, King of kings and Lord of lords.' The *καί* may be epexegetical, when the meaning would be that the name is written on His mantle where this falls upon His thigh (so Düsterdieck, B. Weiss, Holtzmann). Spitta suggests that *μηρός* [this is its only occurrence in NT] may be the name of an article of uniform, perhaps the sword-belt.

J. A. SELBIE.

THINK.—This verb is frequently used in AV in the sense of 'devise,' 'intend,' as Gn 50^{20} 'But as for you, ye thought evil against me' (חֲשַׁבְתֶּם רָעָה, LXX *ἐβουλεύσασθε εἰς πονηρά*, RV 'ye meant evil'); Ex 32^{14} 'And the Lord repented of the evil which he thought to do unto his people' (אֲשֶׁר דִּבֶּר לַעֲשׂוֹת, RV 'which he said he would do'); Nu 24^{11} 'I thought to promote thee unto great honour' (אָמַרְתִּי, LXX *εἶπα τιμήσω σε*); Neh 6^6 'It is reported . . . that thou and the Jews think to rebel' (חֹשְׁבִים לִמְרוֹד, LXX *λογίζεσθε ἀποστατῆσαι*). So Jn 11^{53} Wyc. 'Fro that day thei thoughten [1688 soughten] for to sle him'; Mandeville, *Travels*, 87, 'This Tartary is holden of the great Caan of Cathay, of whom I think to speak afterward.'

To think on or upon is to remember, as Gn 40^{14} 'But think on me when it shall be well with thee' (כִּי אִם־זְכַרְתַּנִי אִתְּךָ, LXX *ἀλλὰ μνήσθητί μου διὰ σεαυτοῦ*, RV 'But have me in thy remembrance'); Neh 5^{19} 'Think upon me, my God, for good, according to all that I have done' (זָכְרָה־לִּי, RV 'Remember unto me, O my God, for good, all that I have done'); 6^{14} 'My God, think thou upon Tobiah and Sanballat according to these their works' (זָכְרָה, LXX *μνήσθητι*, RV 'Remember'); Jon 1^6, Sir 18^{25} 51^8. So He 10^{17} Wyc. 'I schal no more thenke on the synnes and wickednessis of hem' (*οὐ μὴ μνησθήσομαι*, Vulg. *non recordabor*).

In Anglo-Saxon there were two distinct verbs, *thencan* to think, and *thyncan* to seem, the latter used impersonally. These verbs began to be confused very early, and in course of time were always spelt alike. In poetry we still use 'methinks,' where the pron. is in the dative, and the word means 'it seems to me.' In *Rich. III.* III. i. 63, the Quartos have 'Where it thinks best unto your royal self,' but the Folio reads 'Where it think'st best,' probably from confusion between 'it thinks' (=it seems) and 'thinkst thou.' Knox in his *History*, p. 315, says, 'But to this houre I have thought, and yet thinks my selfe alone more able to sustaine the things affirmed in that my Work, than any ten in Europe shall be able to refute it,' where the ungrammatical 'I thinks' may be due to familiarity with the form 'methinks.'

In AV we find the verb 'think' = *seem* in 'me thinketh,' 2 S 18^{27} 'Me thinketh the running of the foremost is like the running of Ahimaaz.' Cf. Gn 41^3 Tind. 'And him thought that vii other kyne came up after them out of the ryver'; Lv 14^{35} 'Me thinke that there is as it were a leprosy in the house'; Mandeville, *Travels*, 117, 'And them thinketh that the more pain, and the more tribulation that they suffer for love of their god, the more joy they shall have in another world.' This is the verb that is used in the phrase 'think good,' Dn 4^2 'I thought it good to shew the signs' (RV 'It hath seemed good unto me'); Zec 11^{12} 'If ye think good, give me my price'; 1 Th 3^1 'We thought it good to be left at Athens alone' (*εὐδοκήσαμεν*).

J. HASTINGS.

THISBE (B*א* *Θίσβη*, A *Θίβη*).—The place from which Tobit was carried away captive by the Assyrians (To 1^2). Its position is described as being on the right hand (south) of Kedesh-naphtali in Galilee above Asher. No trace of the name has yet been found. Some commentators maintain that Thisbe was the home of Elijah the Tishbite, but this is very doubtful. The LXX reading of 1 K 17^1, which makes the prophet come from 'Tishbeh (or perh. Thisbon) of Gilead,' seems more likely to be correct. See ELIJAH in vol. i. p. 687^a.

C. W. WILSON.

THISTLES, THORNS.—There is probably no country on earth of the same extent which has so many plants with prickles and thorns as the Holy Land. One would be tempted to believe that this is a providential provision to protect them from the ravages of goats, asses, and camels, were it not that the mouths of these creatures are provided with a mucous membrane so tough that it seems impervious to thorns. One of the spectacles most striking to a stranger in this land of surprises is that of a flock of goats, browsing in a patch of *Eryngiums*, or *Cirsiums*, or prickly Centaureas, and crunching down the heads, a couple of inches in diameter, composed of stiff thorns, and then masticating them with evident relish. The camel deals even with the *noli-me-tangere* spheres of the *Echinops*, the huge heads of the *Onopordon*, *Carlina*, and *Cynara*, and the thorny plates of the Indian fig. *Zilla myagroides*, Forsk., a most impracticable crucifer, with a juice as pungent as its long stiff thorns, is the favourite desert food of the camel. He tears off and devours the twigs of the thorny *Astragali*. Only a few thorny plants, with little succulence to tempt, and with extraordinary defensive armour, such as the acacia trees, the buckthorn, and some of the more erinaceous *Astragali* of the alpine regions, and *Calycotome villosa*, escape the devourers. Notwithstanding this, the thorns flourish and multiply, and, in many places, take possession of the land. Thistles grow to a height of 10–15 ft. Thorny *Astragali* cover acres of ground on the high mountains. *Poterium spinosum*, *Rhamnus punctata*, and *Calycotome villosa* are everywhere. So abundant is the first of these, the thorny burnet, in one region of Hermon, as to give its name to the district, which is called *Muḳâta'at el-Billân*, *i.e.* District of the Thorny Burnet. A large part of the lime produced in the country is burned with this shrub, which is 'cut up' (Is 33^{12}) with pruning-hooks. It is then bound in huge bundles, and transported on the backs of men or animals to the kilns. Often an acre or more around a lime-kiln is seen covered with these large heaps of most combustible fuel. It produces a high heat, and makes excellent lime. These and other thorns are also used in ovens, and for culinary purposes (Ec 7^6). Owners of asses thresh out various species of thistles and thorns, and use them for feeding their beasts. It is probably in allusion to this custom that Gideon is said to have 'taught [*threshed*] the men of Succoth (*along*) with thorns of the wilderness and briers' (Jg 8^{16}).* It is not strange that, with such a number of prickly plants as exist in Palestine, there should have been many names in Heb. to express them. Few or none of these denote species, and the VSS have not attempted to tr. them with any uniformity. We subjoin an analysis of these terms.

1. אָטָד *'āṭād*, *ῥάμνος*, *rhamnus*, occurs twice as the name of a plant (Jg $9^{14.15}$ AV 'bramble,' m. 'thistle,' RV 'bramble,' m. 'thorn,' Ps 58^9 AV and RV 'thorns'). It occurs once as a proper name in the expression 'the threshing-floor of Atad' (Gn $50^{10.11}$). The Arab. *'ăṭăd* is defined as the branches of the *'ausaj*. The *'ausaj* is 'a species of thorn, having a round red fruit, like the carnelian bead, which is sweet, and is eaten,' or 'a

---

* On the text of this verse and on its interpretation and its relation to v.^{7}, see, above all, Moore's note, *ad loc.*

species of thorn trees, having a bitter red fruit, in which is acidity . . . when it grows large it is called *gharkad* . . . some regard it as the *'ulleiḳ.'* It is clear that the term *'ausaj*, and therefore *'āṭād*, must have been applied to a number of plants. *'Ulleiḳ* most commonly signifies the bramble or blackberry, but also the *smilax*, and other prickly climbers. The *gharkad* is *Nitraria tridentata*, Desf., a plant confined to salt marshes, of which the fruit is called in Arab. *'enab-edh-dhîb*, *i.e.* 'wolf's grapes.' Dioscorides (*Avicenna*, ii. 232) seems to include a number of plants in his vague description of *'ausaj*. The other descriptions would apply to the boxthorn, of which there are 3 species in the Holy Land, *Lycium Europæum*, L., *L. Arabicum*, Schw., and *L. Barbarum*, L., all of which have thorns and red berries. Or they would, in part at least, apply to the jujube, of which there are also several species, *Zizyphus vulgaris*, L., the *'ennâb*, *Z. Lotus*, L., and *Z. Spina Christi*, L., the *nebḳ* or *sidr*. All of these would have been included under the term *Rhamnus*, the buckthorn, a genus from which *Zizyphus* has been set off in modern botany. This genus contains one thorny species, *R. punctata*, Boiss., with its variety *Palestina*, which is found everywhere in Palestine and Syria. This species would admirably suit the needs of the passages. It is a thorny shrub, 2–6 ft. high, with obovate-oblong to elliptical leaves less than an in. long and about $\frac{1}{3}$ in. wide, insignificant flowers, and small fruits. It is well known under the Arab. name *'ajram*, is used for light fuel, and suits exactly the contrast intended in Abimelech's speech between the *'āṭād* and the lordly cedar. To speak of sitting under the shadow of this contemptible straggling bush is the acme of irony. Being far more general than the boxthorn, especially in the hill-country where Abimelech spoke, it is more likely to have been in his mind. The boxthorn would never have been spoken of by the Greeks as ῥάμνος, which is the classical name of the *buckthorn*. The writer has never met with the former in the hill-country. It is a plant of the coast and Jordan Valley and the interior plateaus.

2. בַּרְקָנִים *barḳānîm* (Jg $8^{7.\,16}$). According to Moore (*Judges, ad loc.*), 'in the Egyp. dialect of Arabic *berqan* is the name of *Phaceopappus scoparius*, Boiss. = *Centaurea scop.*, Sieber, a composite plant, with thorny heads.'

3. דַּרְדַּר *dardar* (Gn 3^{18}, Hos 10^{8}, each time coupled with קוֹץ). The Arab. *dardâr* signifies the elm or the ash, but *shaukat ed-dardâr* is generic for the thorny Centaureas, star thistles or knapweeds, which are not proper thistles, *i.e.* of the genus *Cirsium*. In both the passages cited the LXX has τρίβολος, Vulg. *tribulus*. At least 2, perhaps 3, plants were known to the Greeks by this name: *Trapa natans*, L., the water chestnut, and *Tribulus terrestris*, L., a prostrate herb of the order *Zygophyllaceæ*, with pinnate leaves, resembling those of the milk vetch, and a fruit composed of bony cells, with a prickly back. These are liable to get into the shoe or between the sandal and the foot, and produce a veritable *tribulation*. The caltrop, an instrument suggested by them, was used in war to impede the charge of cavalry. Some have identified the *tribulus* with the thorny Centaureas.

4. חֵדֶק *ḥēdeḳ* (Pr 15^{19}, LXX ἄκανθα, AV and RV 'thorn'; Mic 7^{4} [LXX text differs] AV and RV 'brier') refers to some unknown kind of thorn, certainly in the first passage one of those used for hedges. The most common of these in Palestine and Syria is *Eleagnus hortensis*, M.B., the silver berry or oleaster, known in Arab. as *zaizafûn*. It has stiff, sharp thorns, and grows in a dense fashion which well fits it for this purpose. The ordinary brambles, species of *Rubus*, are also much used for hedges, especially along the coast. Also *Paliurus aculeatus*, Lam., one of the so-called Christ thorns, a plant of the order *Rhamnaceæ*, growing in the interior tablelands. Also *Cactus Ficus-Indica*, L., the prickly pear, *Smilax aspera*, L., the green brier, which makes a most efficient hedge, and the boxthorn, which is common in hedges about Jaffa, Lattakia, and elsewhere. The hawthorn, Cratægus, of which there are several species, is not used in this way.

5. חוֹחַ *ḥôaḥ*. This is variously tr. (2 K 14^{9} 'thistle,' RVm 'thorn'; 2 Ch 25^{18} 'thistle,' AVm 'furze bush' [*Calycotome villosa*] or 'thorn,' RVm 'thorn'; Hos 9^{6} 'thorns'; Is 34^{13} AV 'brambles,' RV 'thistles'; Job 31^{40} 'thistles,' RVm 'thorns'; Pr 26^{9} 'thorn'; Ca 2^{2} 'thorns'; 1 S 13^{6} חֲוָחִים 'thickets' [better *thorn brakes*, unless we read with Ew., Wellh., Driver, *et al.* חוֹרִים 'holes']; Job 41^{2} AV 'thorn,' RV 'hook,' m. 'spike'; 2 Ch 33^{11} AV 'thorns,' RV 'in chains,' m. 'with hooks'). From the above inconsistencies, which are quite parallel to those of the LXX and Vulg., it is clear that no specific meaning can be attached to *ḥôaḥ*. It would seem, however, rather to designate thorns and thorny shrubs and trees than prickles and prickly herbs like thistles.

6. מְסוּכָה *mĕṣûkāh* (Mic 7^{4}) is a 'thorn hedge.' Of what kind we have no means of determining (see 4).

7. נַעֲצוּץ *na'ăẓûẓ*. The Arab. *nu'ḍ* corresponds with this, and signifies *a thorn tree growing in Arabia*. It may be one of the thorny acacias. In the two passages in which it occurs (Is 7^{19} 55^{13}) it is tr. 'thorns.' In the latter (LXX στοιβή) it is said that it will be replaced by the *bĕrôsh*. See FIR.

8. סִירִים *ṣîrîm*. This seems to refer to the lighter thorns, like the thorny burnet, which often grows in ruins (Is 34^{13}), and many of the star thistles, etc. The burning of these produces a crackling (Ec 7^{6} AVm 'sound,' where there is a word-play between סִיר 'pot' and סִירִים 'thorns'). 'Folden together as thorns' (AV Nah 1^{10}, RV 'like tangled thorns') would well suit such as the *burnet*, and many others in Palestine. As *ḥôaḥ* came to mean 'hook,' from the resemblance to a thorn, so *sîrôth* is once used in this way for 'fish-hook' (Am 4^{2}).

9. סִלּוֹן *ṣillôn*, AV and RV 'brier' (Ezk 28^{24}); סַלּוֹנִים *ṣallônîm*, AV and RV 'thorns' (Ezk 2^{6}, but text dub.), are stout thorns, such as are found on the midrib of the palm leaf, corresponding exactly to the Arab. *sulâ*.

10. סָרָבִים *ṣārābîm* is from an obsolete root signifying perh. *to be refractory* or *rebellious*. In the single passage where it is used (Ezk 2^{6}), the context points to some stiff, refractory thorn, of which *ṣārābîm* was prob. the ancient name. It is associated with the stout thorn of the palm, *ṣillôn* (9); but we have no Arab. clue, as in the other case, to help us to a knowledge of what it was. AVm tr. it 'rebels'; but this is forced. Instead of 'briers and thorns' (סָרָבִים וְסַלּוֹנִים), Cornill, Bertholet, *et al.*, would read 'resisting and despising' (סֹרְבִים וְסֹלִים).

11. סִרְפַּד* *ṣirpad*.—A plant of neglected and desert places, mentioned with נַעֲצוּץ (Is 55^{13}), to be replaced by the myrtle as *na'ăẓûẓ* will be by the fir. The LXX has κόνυζα = *Inula viscosa*, L., the elecampane, a plant which grows on all the hillsides of Palestine and Syria. It is a perennial of the order *Compositæ*, growing from 2–3 ft. high, with lanceolate to linear-lanceolate leaves, and yellow heads, about $\frac{1}{3}$ in. long. It is very glutinous, and has a strong, disagreeable smell. It is a plant worthless either as forage or fuel. It possesses only two merits. The first is that brooms made of the green stems with their leaves on are used to

---

* So Baer; MT סַרְפָּד *ṣirpād*.

sweep the floors of the native houses, and help to rid them of the fleas, which adhere to the slime which covers the plant. The other is that it grows on dry, rocky hillsides, and mitigates by its greenness the otherwise deserted and barren aspect of the landscape. Now it happens that the myrtle grows on similar hillsides, often side by side with the elecampane. The contrast between this worthless plant and the myrtle, with its delicious fragrance, its beautiful foliage, exquisite flowers, and edible fruit, is quite sufficient for the requirements of the passage. 'Brier' of AV and RV, and *urtica*='nettle' of Vulg., besides lacking the authority of the LXX, would not convey a meaning so forcible as the elecampane. The Arab. name for the plant is *'irḳ et-ṭayyûn*.

12. צִנִּים *ẓinnîm* is used twice: Job 5^5 (LXX κακῶν), where both MT and meaning are doubtful [Bevan, *Journ. of Philol.* xxvi. 303 ff. reads plausibly וְאוֹנָם צִנִּים יְקָחֵהוּ, and renders 'and their wealth barbs lay hold of it']; and Pr 22^5 (LXX τρίβολοι), where the froward wander into desert places, where they are sure to meet with thorns. Another form of the same, צְנִינִים *ẓĕnînîm* (Nu 33^{55}, where it is associated with שִׂכִּים [see **15**], Jos 23^{13}), simply refers to thorns as piercing the flesh, not to any particular plant.

13. קוֹץ *ḳôẓ* is a generic term for thorny and prickly plants, tr. indifferently 'thorn' (Ezk 28^{24} where it refers to an individual thorn, Hos 10^8), or 'thorns' (Gn 3^{18}, Is 32^{13}), pl. קוֹצִים or קֹצִים *ḳôẓîm* (Jg 8^7, Jer 4^3 etc.).

14. קִמְּשֹׁנִים *ḳimmĕshônîm* is once (Pr 24^{31}) tr. 'thorns,' but the sing. form קִמּוֹשׁ (Is 34^{13}) and קִימוֹשׁ (Hos 9^6) 'nettles.' See NETTLES.

15. שִׂכִּים *sikkîm*, the pl. of שֵׂךְ=Arab. *shauk*, generic for thorns (Nu 33^{55}), tr. 'pricks.'

16. שַׁיִת *shayith* occurs only in Isaiah, and always associated with שָׁמִיר *shāmîr* (5^6 7$^{23-25}$ 9^{18} 10^{17} 27^4); always tr. 'thorns,' as *shāmîr* is tr. 'briers.'

17. שָׁמִיר *shāmîr* means both 'thorn' and 'adamant.' In the former signification it occurs only in Isaiah, and each time but one (32^{13}, where it is associated with *ḳôẓ*) in company with *shayith*. It is uniformly tr. 'briers.' Its Arab. equivalent, *samûr*, is the desert *Acacia Seyyal*, or *A. tortilis*.

Most of the above names were probably specific and well understood in the days when they were used; but, as has been seen, few, if any, can certainly be identified. The NT words for 'thorns and thistles,' ἄκανθαι and τρίβολοι (Mt 7^{16}, Lk 6^{44}), and 'thorns,' ἄκανθαι (Mt 13^7), and 'thorn' (rather 'stake'), σκόλοψ (2 Co 12^7), are indefinite. There are not less than 50 genera and 200 species of plants in Syria and Palestine furnished with thorns and prickles, besides a multitude clothed with scabrous, strigose, or stinging hairs, and another multitude with prickly fruits.

Crown of Thorns.—It is impossible to tell of what species our Saviour's crown (στέφανος ἐξ ἀκανθῶν, ἀκάνθινος στέφανος) was composed. It is certain, however, that it must have been made from a plant growing near to Jerusalem. It is often identified with *Zizyphus Spina-Christi* (see Tristram, *Nat. Hist. of Bible*, 429). It might well have been *Calycotome villosa*, Vahl, the *ḳundaul* of the Arabs. Crowns of this are plaited and sold in Jerusalem, as representatives of our Saviour's crown. The facility with which the branches of this shrub are wrought into the required shape, and the evident adaptation of the resulting crown to the torture intended, make it highly probable that this was the material used. *Poterium spinosum*, L., is also wrought into such crowns, but makes a much softer and less efficient instrument of torture than the last. A cruel one could be made of *Rhamnus punctata*, Boiss., also of *Ononis antiquorum*, L., the *shibruḳ* of the Arabs.

G. E. POST.

THOCANUS (B Θόκανος, A Θώκανος, AV Theocanus), 1 Es 9^{14}=Tikvah, Ezr 10^{15}. Probably תקוה was read as תקנה.

THOMAS (Θωμᾶς=תאמא).—One of the Twelve, always placed in the second of the three groups of four in which the names of the apostles are arranged in the NT lists. In the oldest extant list (Mk 3$^{16f.}$) the names are not distributed in *pairs*, and he is No. 8, as also in Lk 6$^{14f.}$; but in the later lists he is coupled with Matthew and assigned the seventh place (Mt 10$^{2f.}$), or given the sixth place, coupled with Philip (Ac 1$^{13f.}$). No incident is recorded of him by the Synoptists, but from John we learn that he played a conspicuous part in the anxieties and questionings which followed the Resurrection, which perhaps accounts for the higher position assigned to him in the lists as soon as the names began to be arranged or classified; cf. Jn 21^2, where he is placed after Peter and before the sons of Zebedee. John thrice describes him as Θωμᾶς ὁ λεγόμενος Δίδυμος (11^{16} 20^{24} 21^2). תְּאוֹם is a 'twin' [only Gn 25^{24} 38^{27}, Ca 4^5 7^3, always in plur.], and of this Θωμᾶς is a transliteration, ὁ δίδυμος being the Gr. translation. This last would be the form of the title most natural among the Greek-speaking Christians of Asia Minor, for whom the Fourth Gospel was written. His personal name is not given in the NT, but he is called 'Judas Thomas' in the apocryphal *Acta Thomæ*, in the Syr. *Doctrina Apostolorum*, and also in the Abgar legend (Eus. *HE* i. 13), which represents him as sending THADDÆUS to Abgar with Christ's letter. The name 'Judas' was a common one, and it may well have been his; at any rate the ascription of it to him led in time to his identification with Judas 'of James,' and Judas the 'brother' of the Lord (Mk 6^3), and so to the widespread tradition that the Apostle Thomas was the twin brother of Jesus (*Acta Thomæ*, § 31). The identification of Thaddæus (Mt 10^3, Mk 3^{18}) with Luke's Judas 'of James' (Lk 6^{16}, Ac 1^{13}) accounts for a later Syrian tradition which makes Thomas and Thaddæus the same person. Another story makes one Lysia the twin sister of Thomas.

The three notices of Thomas in John reveal a personality of singular charm and interest. When the other apostles would have dissuaded Jesus from the risk of going to Bethany where Lazarus lay dead, and Jesus had said that He would nevertheless go, Thomas at once declared his intention of sharing the danger: 'Let us also go that we may die with him' (Jn 11^{16}). His eager devotion could not endure the thought of separation, and so the announcement at the Last Supper that the Master was about to depart filled him with perplexity: 'We know not whither thou goest; how know we the way?' (Jn 14^5). Like the other disciples, he could not but suppose that the Crucifixion had put an end to his hopes, although it does not appear from the narratives (as has sometimes been assumed) that Thomas had severed his connexion with the other companions of Christ, for 'the eleven' are mentioned as still a coherent body (Lk 24$^{9.33}$ [Mk] 16^{14}), and Thomas is found in their company on 'the first day of the week,' presumably for worship and conference, even after he had expressed his doubts as to the Resurrection (Jn 20^{26}). When, however, the Christ appeared to the other apostles at Jerusalem, Thomas was not with them, although the reason of his absence is not recorded (Jn 20^{24}). They were invited to assure themselves by the test of touch that the vision was not that of a phantom but of the Risen Jesus (Lk 24^{39}), and even this did not convince them until He 'did eat before them' (Lk 24$^{41.43}$). Thomas, on being informed of the vision of the Lord, refused to believe until he too had satisfied himself by sight and touch that there was no misapprehension (Jn 20^{25}); but when this test was offered to (and applied by?) him, his recognition of his Master was immediate and adoring: 'My Lord and my God' (Jn 20^{28}). No greater confession of faith is recorded in the NT. These three incidental notices of Thomas depend entirely, as has already been pointed out, on the authority of the Fourth Gospel; but there is nothing in any of them which is either incredible in itself, or inconsistent with the Synoptic accounts, and the psychological truth and naturalness of the resulting picture of the man confirm belief in the trustworthiness of the Johannine narratives.

The *Acta Thomæ* or Περίοδοι Θωμᾶ* is a Gnostic work probably going back to the 2nd cent., and written by one Leucius the author of several apocryphal *Acts*. It begins by telling that, at the division of the field of the world among the apostles, India was allocated to Thomas; that he was at first unwilling to go there, but was persuaded by a vision of Christ, who sold him as a slave to an Indian merchant. After some adventures by the way (which display the Gnostic tendencies of the writer; see Salmon, *Introd. to NT*^{7} p. 334 f.), he arrived in India, and there (being a carpenter) was entrusted by his master with the building of a palace, but expended the money on the relief of the poor. His missionary efforts were at last crowned with success. The connexion of his name with India, for which these *Acta* are the earliest authority, was widely accepted after the 4th cent. in both East and West. The Malabar 'Christians of St. Thomas' still count him as the first martyr and evangelist of their country. It is probable, however, that these Christians were evangelized from Edessa, and that the traditional account of their origin is due to a confused memory of one of the pioneer missionaries from that place, who was called Thomas after its patron saint. For there is a quite distinct (and seemingly earlier) account of the missionary activity of the apostle which makes Parthia the scene of his labours (Eus. *HE* iii. 1; see also Clem. *Recogn.* ix. 29, and Socrates, *HE* i. 19), and Edessa his burial-place (Rufinus, *HE* ii. 5, and Socrates, *HE* iv. 18). According to the Roman Martyrology his remains were brought from India to Edessa, and thence, it was said, to Ortona in Italy during the Crusades. The oldest extant tradition as to the manner of his death is that it was from natural causes (Clem. Alex. *Strom.* iv. 9. 73).

J. H. BERNARD.

THOMEI (B Θόμθει, A Θόμει, AV Thomoi), 1 Es 5^{32}=Temah, Ezr 2^{53}, Neh 7^{55}.

THORNS.—See THISTLES.

THOUGHT.—In 1 S 9^5 'Come, and let us return; lest my father leave caring for the asses, and take thought for us,' the phrase 'take thought' means 'be anxious,' 'grieve.' The same verb (דָּאַג) is translated 'sorrow' in 10^2 'Thy father hath left the care of the asses, and sorroweth for you.' RV has 'take thought' in both passages, but Amer. RV gives 'be anxious' in both. In Ps 38^{18} both versions render the Hebrew word 'I will be sorry.' 'Thought' was once freely used in English in the sense of 'anxiety' or 'grief.' Thus Cranmer, *Works*, i. 162, 'Alas, Master Secretary, you forget Master Smyth of the Exchequer, who is near consumed with thought and pensiveness'; *Somers Tracts*, 'In five hundred years only two queens have died in childbirth. Queen Catherine Parr died rather of thought'; Shaks. *Hamlet*, III. i. 85—

> 'And thus the native hue of resolution
> Is sicklied o'er with the pale cast of thought';

and IV. v. 177—'And there is pansies, that's for thoughts.' Cf. Wyclif's use of the verb, *Select Works*, iii. 9, 'As a bird of a swalowe, so I schal crie, I schal thinke as a dowve.' In AV 'thought' occurs in this sense only in the phrase 'take thought.' Besides 1 S 9^5 (above) the examples are Mt $6^{25.\,27.\,28.\,31.\,34\ \textit{bis}}$ 10^{19}, Lk $12^{11.\,22.\,25.\,26}$ (all *μεριμνάω*), and Mk 13^{11} 'take no thought beforehand' (*μὴ προμεριμνᾶτε*); RV always 'be anxious.' Cf. Coverdale's tr. of 1 S 10^2 (see above), 'Thy father hath put the asses out of his mynde, and taketh thoughte for the, and sayeth: What shall I do for my sonne?' and Shaks. *Jul. Cæsar*, II. i. 187—

> 'If he love Cæsar, all that he can do,
> Is to himself take thought and die for Cæsar.'

J. HASTINGS.

THRACIA (Θρᾴκη) was the country lying east of Macedonia, bounded on the north by the Danube and on the south by the Ægean Sea, the Dardanelles, the Sea of Marmora, and the territory of Byzantium (a 'free city,' connected with the Roman province of Bithynia from B.C. 74). Thrace is never mentioned in the NT, nor did any action alluded to in the NT take place in that country. Philippi and Neapolis, indeed, had originally been in Thrace; but the boundaries of Macedonia were extended far towards the east by the conquests of the Macedonian kings, and included both cities. Before the Roman period the boundary between Macedonia and Thrace was the boundary between civilization and barbarism, and this varied as civilization enlarged its limits. Originally the name Thracia was used in a very loose and vague fashion, and the Macedonians were even sometimes spoken of as a tribe of Thrace, which in that case practically meant the land north and north-east of Greece. The Macedonians were akin to the Thracians, but came under the influence of Greek civilization earlier.* It was not until A.D. 46 that Thrace was incorporated as a province in the Roman empire.

In 2 Mac 12^{35} a Thracian soldier is mentioned as saving the life of Gorgias, governor of Idumæa† under Antiochus Epiphanes, in a battle against Judas Maccabæus, about B.C. 163. The Thracian tribesmen, barbarous, hardy, and inured to war, were much used as mercenaries by the Greek kings of Syria, Pergamum, Bithynia, etc. This is several times mentioned by Polybius (V. lxv. 10, lxxix. 6); and inscriptions along with other evidence entirely corroborate him. Thracian mercenaries were settled as colonists in many of the garrison cities founded by those kings, *e.g.* in Apollonia of Pisidia (where they are often mentioned on coins, etc., in the full title of the city) and in other places: the Thracian mercenaries were sometimes called *Traleis* or 'warriors'; see Ramsay, *Histor. Geogr. of Asia Minor*, p. 112, *Cities and Bish. of Phrygia*, i. p. 34; Fränkel, *Inschr. Pergam.* i., No. 13, p. 16.

W. M. RAMSAY.

THRASÆUS (A Θρασαῖος, $\mathrm{V}^{*\mathrm{vid}}$ Θαρσίας, V^{a} Θαρσέας).—The father of Apollonius, 2 Mac 3^5; but see APOLLONIUS, No. 1, and cf. RVm.

THREE CHILDREN, SONG OF THE (or, more accurately, as in Codex B: 'The Prayer of Azarias' and 'the Hymn of the Three'), is one of the additions to the book of Daniel, extant only in the Greek Bible and in versions taken from the Greek. It contains 67 verses, and is inserted between v.^{23} and v.^{24} of Dn 3 in the canonical text. In Codex A our 'addition' forms also two of fourteen canticles appended to the Book of Psalms. The ninth and tenth of these canticles are called respectively *προσευχὴ Ἀζαρίου* (Prayer of Azarias) and *ὕμνος τῶν πατέρων ἡμῶν* (Hymn of our Fathers).

i. CONTENTS.—The apocryphon contains three sections: (1) the Prayer of Azarias; (2) descriptive narrative; (3) thanksgiving of the Three for their deliverance from the fiery furnace.

---

* The best edition of the Gr. and Lat. texts of these *Acta* is that of Bonnet (1883); for the Syriac *Acts* see Wright, *Apocryphal Acts of the Apostles* (1871); and, for the Æthiopic version of the story, Malan, *Conflicts of the Holy Apostles* (1871). For all legends about Thomas the best and fullest account will be found in Lipsius' *Die Apokryphen Apostelgeschichten* (1883–1890), vol. i. pp. 225–347.

* It is maintained by some scholars that Thrace, in that early wide extension, is alluded to in Gn 10^2. In that verse the sons of Japheth are said to be Gomer, Magog, Madai, Javan, Tubal, Meshech, and Tiras; but see TIRAS.

† *Idumæa* is suspicious: it has been thought to be an error for *Jamnia*.

(1) *The Prayer of Azarias*, vv.$^{1-22}$ (Gr. $^{24-45}$).—In Dn 3^{23} it has been narrated that the three men, Shadrach, Meshach, and Abednego, fell down bound into the midst of the burning fiery furnace. After 3^{23} Theodotion (whose text is followed in Vulg. and the English Apocr.) proceeds: 'And they walked ['in their chains,' Syr W] in the midst of the fire, praising God.' The connexion is, in LXX, effected thus: 'Thus then prayed Hananias and Azarias and Mishael and sang praises to the Lord, when the king commanded them to be cast into the furnace.' Both then say that 'Azarias stood and prayed in the midst of the fire'; LXX adding 'together with his companions,' which Theod. omits, as he does also the statement of LXX that 'the furnace had been heated exceedingly by the Chaldæans.' The Prayer opens with praise to God for His righteous acts to the nation, acknowledging His justice even in the disasters which He has brought upon Jerusalem. National ruin was completely justified, because of national sins. He complains, however, that the nation by which God had chastised His people was a very lawless one, and that their king was the most wicked king on earth, treating Israel scornfully and tyrannically. He then pleads the covenants with the fathers and the promises of the vast expansion of the nation as the ground of God's intervention to the very small remnant. They had been brought very low: the State was dissolved: State functionaries had ceased to be: State religion was no longer possible; but with the sacrifice of a contrite heart, rather than of myriads of rams, they would seek the LORD and implore Him to remove their shame and transfer it to their foes; that all may know that J″ is God alone.

(2) In vv.$^{23-27}$ of EV (Gr. $^{46-51}$) we have *a continuation of the narrative* of Dn 3^{23}, describing how the king's servants kept on heating the furnace with naphtha and pitch till it was seven times as hot as usual, and the flame reached 49 cubits above the furnace. Then an angel came down, called in Syr. 'the angel of dew,' and by means of a dewy whistling wind made the centre of the furnace cool, forming an inner zone which the flames could not touch. After this 'the three' unitedly began to praise God.

(3) *The Hymn of Thanksgiving*, vv.$^{28-68}$ (Gr. $^{52-90}$). This Hymn, like Ps 136, contains, as the second line of each verse, a refrain. As the Psalm repeats throughout the words, 'For his mercy endureth for ever'; so our Hymn, in every verse, ascribes praise to God. For the first six verses the ascription is verbally varied, though identical in meaning. After that, the second line of each verse is ὑμνεῖτε καὶ ὑπερυψοῦτε αὐτὸν εἰς τοὺς αἰῶνας, 'Praise and superexalt him for ever.' In the first place the Psalmist (for such he really is) exults in the fact that J″ is worthy to be praised in the heavenly temple, sitting on the throne of His glory: from the loftiest heights looking down on the deepest depths. Then he apostrophizes all the works of God and calls on them to praise the Lord: angels, the heavens, the celestial waters, sun, moon, and stars. From things celestial he passes to what *we* call meteorological phenomena, but which, to the Jewish mind, were changes presided over by an angel,—if not indeed themselves actual entities,—rain and dew, winds, frost and snow, light and darkness, lightnings and clouds. Then the terrestrial creation is addressed, mountains, vegetation, showers, fountains, monsters, fowls, and beasts. After that, men of various ranks and conditions in life: Israel, priests, slaves, the righteous, the humble, and last of all, as Ps 103 terminates with the words 'Bless the LORD, *O my soul*,' we have in v.^{88} 'O Hananias, Azarias, and Mishael, bless ye the Lord.' The last two verses are from Ps 136, and were probably appended by some later hand.

ii. LITERARY ESTIMATE.—The judgment of Eichhorn (*Einleitung*, 419, ed. 1795), that the Prayer of Azarias is unsuitable to the circumstances, and that it betrays a lack of literary art to suppose that in a fiery furnace any man could pray as he does, is endorsed by most later scholars (Fritzsche, 115). There are 'no groans,' 'no personal petitions,' 'no cries for help.' The author makes Azarias review the history of the Jewish nation as calmly as an aged saint might do under the fig-tree of solitude at the time of evening prayer. On one supposition, however, the Prayer becomes thoroughly relevant. If we might assume that the author of the Prayer regarded the narrative of Dn 3 as a Haggada, a symbolical, but not historical, account of the Babylonian captivity: as in Zec 3^{2} the angel says concerning Joshua the high priest, 'Is not this a brand plucked out of *the fire*?'—then the Prayer would be quite suitable. As to the *poetical* character of the Hymn, critics differ. Fritzsche considered the accumulation of doxologies devoid of all literary skill, and the enumeration of the powers of creation, frigid. Ball, however, replies (*Speaker's Com.* 307) that the very monotony is effective. 'It is like the monotony of the winds or the waves, and powerfully suggests to the imagination the amplitude and splendour of God's world, and the sublimity of the universal chorus of praise. The instinct of the Church which early adopted the *Benedicite* for liturgical use was right.' Zöckler sympathizes so strongly with Ball against Fritzsche that he quotes the above in English. The Hymn is modelled after Ps 136, and has equal claim to be considered poetical.

iii. AUTHORSHIP.—The name and date of the composer of the Prayer and Hymn are quite unknown. It is even disputed whether they come from the same author. The chief argument for duality is that v.$^{15\ (38)}$ implies the cessation of Temple worship. 'There is no . . . sacrifice nor place to offer sacrifice before thee': whereas in v.$^{31\ (54)}$ there is reference to a Temple, and in v.$^{62\ (85)}$ to priests. The argument is not valid. The Temple in v.^{31} is the heavenly Temple, where the Lord is enthroned on the cherubim. Further, the priesthood was hereditary. A man did not cease to be a priest when the Temple was destroyed; and hence we note that v.^{15} does *not* say, 'There is no priest.'—It is even more eagerly disputed whether the Gr. text is the original, or a translation from Heb. or Aramaic. Eichhorn in his first edition favoured Gr. authorship. In his second edition he adduced reasons for regarding it as a translation, but held the evidence to be indecisive. This uncertainty still remains. Fritzsche, Keil, Bissell, and Schürer are against a Semitic authorship. Ball attaches more importance than they do to Eichhorn's indications of translation. The difficulty is this: every extant version is clearly based on the LXX. Where Theod. differs from LXX, it is usually in very small matters of addition or omission. There are no synonymous, but verbally variant, phrases, indicating that both are translated from the same original. There are no marks that Theod. or any version used a Semitic copy in order to correct LXX. In such cases the only evidence of translation work is to be sought in the awkward, barely intelligible phrases. We have to retranslate these into the hypothetical original, and see if by some slight modification of this we can secure a better rendering. In the case before us the results are disappointing. We may premise, however, that if there ever was a Semitic original, it would be Heb. and not Aramaic. The orthodox Palestinian Jew considered Heb. the language of heaven, and always used it in prayer and praise.—The evidence in favour of Heb. stands thus: (1) The style is intensely Hebraistic, perhaps more so than an Alexandrian Jew would use in original composition. (2) The names of the three men are their original Hebrew names (Dn 1^{7}), not the Aramaic names found in Dn 3$^{16.\ 19.\ 23.\ 26}$ etc. (3) V.$^{17\ (40)}$ is very obscure. In LXX it reads literally, 'Let our sacrifice be before thee, and may it *make atonement* behind thee' (ἐξιλάσαι ὄπισθέν σου). Theod. reads ἐκτελέσαι ὄπισθέν σου, 'May it *make requital* behind thee.' At the end of the verse in LXX there occurs an incorporated marginal gloss: τελειῶσαι ὄπισθέν σου, 'let it *be perfect* behind thee.' These three Gr. verbs seem very diverse, but, if we might assume a Heb. original from which they are a tr., the matter is simplified. These Gr. verbs may represent different forms of the Heb. root שלם. The Hiphil הִשְׁלִים 'to make peace' may account for ἐξιλάσαι. The Piel שִׁלֵּם and the Gr. τελείω both mean to 'pay,' 'requite'; and the Qal שָׁלֵם means to 'be perfect.' We do not attempt to explain ὄπισθεν. (4) It might seem that the phrase 'to *scatter* a covenant' in v.^{11}, instead of '*violate*,' was a confusion of פרר and פרר: but the same thing occurs in LXX of Gn 17^{14} and Lv 26$^{15.\ 44}$. So also the use of ἀπό with καταισχύνεσθαι, 'to be ashamed,' might arise from translating the Heb. מִן (Eichh. 428); but both ἐκ and ἀπό are used in LXX with verbs of 'shame,' and thus this also may be a Hebraism, and due to familiarity with the LXX. The evidence of a Heb. original is not irresistible, but probable.

iv. VERSIONS.—The LXX presents the earliest extant text. Theod. edited the LXX with sundry emendations of little significance: none of them so important as in 'Bel and the Dragon' (vol. i. 267). A collation of the two versions is given by Eichhorn (422 ff.), and also in Field's *Hexapla* (ii. 914 ff.). The Vulg. is in the main an accurate tr. of Theodotion. The Syriac as given by Lagarde is the same text as Walton's, the differences being merely such as occur in transcription. Worthy of note are the readings: $^{15\ (38)}$, 'a place where we may offer *spices* and a sacrifice': $^{17\ (40)}$, 'let not thy servant be ashamed' for ἐξιλάσαι ὄπισθέν σου: $^{49\ (72)}$, 'The angel *of dew* went down into the furnace.' The Syro-Hexaplar text is a tr. of the LXX.

v. CANONICITY.—Ball gives several citations from Jewish writings of the incidents narrated in the Biblical portions of Dn 3; but it is difficult to find Rabbinic quotations of our apocryphon. *Pesachim* 118*a* tells how R. Hiskiah describes the three martyrs as reciting Ps 115, clause by clause, in rotation; and how R. Samuel the Shilonite used to say that Yorkemi, the prince *of hail*, begged to go down to cool the furnace; but Gabriel offered not only to make the furnace cool within (as the hail would do), but also to make it hot without (*Speaker's Apocr.* 306 f.).

In the Christian Church, Hippolytus gives a few notes explanatory of the Song. Julius Africanus disputed the canonicity of the additions to Daniel. Origen wrote in reply defending their genuineness, and on several occasions quotes 'the Prayer'; *e.g.* in *Com. on Matt.* bk. xiii. 2 he quotes v.$^{64\ (86)}$ 'as it stands in the book of Daniel according to the LXX' as representing the difference between the soul and the body. Cyprian, *de Lapsis*, c. 31, quotes v.$^{2\ (25)}$ as 'scriptura divina'; and he adduces the Prayer of the 'tres pueri in camino inclusi' as a model of public prayer (*de Orat. Dominica*, c. 8).

LITERATURE.—Ball in *Speaker's Apocr.* ii. 305 ff.; Fritzsche, *Handbuch zu den Apokr.* i. 123 ff.; Schürer, *HJP* II. iii. 183 ff.; Zöckler, *Apokr. des AT* 230 ff.; Bissell in Lange's *Apokr.*; Eichhorn, *Einleitung in die Apokr. Schriften*, 419 ff.; Rothstein in Kautzsch's *Apokr. u. Pseudepigr. d. AT* i. 172 ff. J. T. MARSHALL.

THRESHING.—See AGRICULTURE, vol. i. p. 50.

THRESHOLD.—1. In Neh 12^{25} אֲסֻפֵּי הַשְּׁעָרִים (AV 'thresholds of the gates') undoubtedly means 'storehouses of the gates' (so RV; cf. RV 'storehouse' as tr. of בֵּית הָאֲסֻפִּים [AV 'house of Asuppim'] in 1 Ch 26^{15}, and of אֲסֻפִּים alone [AV 'Asuppim'] in v.^{17}). The text of the LXX is in this verse defective, but the words ἐν τῷ συναγαγεῖν με τοὺς πυλωρούς obviously represent בְּאֲסֻפֵּי הַשְּׁעָרִים. 2. סַף: Jg 19^{27} the Levite's concubine was found in the morning dead, with her hands upon the threshold; 1 K 14^{17} Jeroboam's wife had just reached the threshold of the palace at Tirzah when her son died; Am 9^{1} 'Smite the chapiters [of the columns supporting the temple roof] till the thresholds shake'; Is 6^{4} 'the foundations of the thresholds were moved at the voice of him that cried'; Ezk 43^{8}, referring to the circumstance that the royal palace and Solomon's temple were within the same enclosure and formed one set of buildings, God makes it a matter of reproach that they have set 'their threshold by my threshold, and their door post beside my door post'; Zeph 2^{14} 'desolation [חֹרֶב; but Wellh., Now., *et al.*, after LXX κόρακες, read עֹרֵב 'raven(s)'] shall be on the thresholds (of ruined Nineveh).' A class of temple officials were 'keepers of the threshold' (שֹׁמְרֵי הַסַּף): Jer 35^{4} [in sing.], 2 K 12^{10} 22^{4} (=2 Ch 34^{9})* 23^{4} 25^{18} [=Jer 52^{24}]; 2 Ch 23^{4} [שֹׁעֲרֵי הַסִּפִּים]; in 1 Ch $9^{19.\ 22}$ [in the latter verse שֹׁעֲרִים בַּסִּף] similar officials are provided for the tabernacle; the office is a secular one in Est 2^{21} 6^{2}, answering more to that of bodyguard (cf. the LXX ἀρχισωματοφύλακες in 2^{21}). In Ps 84^{11} the pilgrim declares that he prefers *being at the threshold* (B παραριπτεῖσθαι) in the house of God to *dwelling* in the tents of wickedness. The other occurrences of סַף are: Ezk $40^{6\ bis.\ 7}$ $41^{16\ bis}$, 2 Ch 3^{7}.

The principal LXX renderings of סַף not noticed above are: τὸ πρόθυρον, Jg 19^{27}, 1 K 14^{17}, Ezk 43^{8}; τὸ ὑπέρθυρον, Is 6^{4}; τὰ πρόπυλα, Am 9^{1}; οἱ πυλῶνες, Zeph 2^{14}, 2 Ch 3^{7}; (ὁ φυλάσσων or οἱ φυλάσσοντες) τὴν αὐλήν, Jer 35 $(42)^{4}$, or τὸν σταθμόν, 2 K $12^{10\ (9)}$ 22^{4} 25^{18}, or τὴν πύλην, 2 Ch 34^{9}, or τὴν ὁδόν, Jer 52^{24}, or τὴν εἴσοδον, 1 Ch 9^{19}; (εἰς τὰς πύλας) τῶν εἰσόδων, 2 Ch 23^{4}; θυρίδες, Ezk 41^{16}.

3. מִפְתָּן: 1 S $5^{4.\ 5}$ Dagon was found prostrate before the ark, with his head and hands cut off upon the threshold; hence, it is said, the worshippers of Dagon leap over the threshold, to avoid contact with a spot rendered sacred by having been the resting-place of these members of the god. It is impossible to decide whether it is this (Philistine) custom that is referred to in Zeph 1^{9} 'every one who leaps over [or 'upon,' עַל] the threshold.' See art. CHERETHITES, vol. i. p. 377^{a}. The threshold of the temple is referred to in Ezk 9^{3} $10^{4.\ 18}$ 46^{2} 47^{1} (in the last named passage as the source of the stream which is seen in vision to flow forth to fertilize the 'Arabah).

The usual LXX equivalent for מִפְתָּן is αἴθριον: Ezk 9^{3} $10^{4.\ 18}$ 47^{1}; in 46^{2} and 1 S 5^{4} πρόθυρον; in 1 S 5^{5} βαθμός; in Zeph 1^{9} πρόπυλα.

For Trumbull's view (*The Threshold Covenant*, 303 ff.) of the Passover as a *threshold cross-over sacrifice*, see art. PASSOVER, vol. iii. p. 689. Cf. also art. FOUNDATION. J. A. SELBIE.

THRONE is OT rendering of the Heb. כִּסֵּא [in 1 K $10^{19\ bis}$, Job 26^{9} כִּסֵּה; in Dn 5^{20} $7^{9\ bis}$ Aram. כָּרְסֵא], which is used for any seat of honour or state, *e.g.* of the high priest, 1 S 1^{9} $4^{13.\ 18}$; of an honoured guest, 2 K 4^{10}; of the *peḥah* beyond the River, Neh 3^{7}; of a judge, Ps 94^{20}; of a military officer, Jer 1^{15}; but far more usually of a king, Gn 41^{40} [E], Ex 11^{5} 12^{29} [both J], 1 K 2^{19}, Is 47^{1}, Ezk 26^{16}, Est 5^{1}. Solomon's throne is described in 1 K 10^{18-20} [=2 Ch 9^{17-19}]. It was overlaid with ivory and the finest gold (see Kittel, *Könige*, *ad loc.*), and was ascended by six steps, with twelve lions standing upon them. For figures of Assyrian and Egyptian thrones see Riehm, *HWB*^{2} ii. 1106, 1684. God as the heavenly King has His throne: Is 6^{1}, Ezk 1^{26} 10^{1}, 1 K 22^{19} [=2 Ch 18^{18}], Job 26^{9}, Ps 11^{4}; heaven is called His throne in Is 66^{1} (cf. Mt 5^{34}), Jerus. in Jer 3^{17}, the sanctuary in 17^{12} and Ezk 43^{7}. 'Throne' is frequently used as = *royal dignity*, *authority*, *power*, *e.g.* 1 K 2^{45} ('the throne of David shall be established,' cf. 2 S 7^{16} [=1 Ch 17^{14}]), Is 16^{5}, Pr 16^{12}; of God, La 5^{19}, Ps 47^{9} 89^{15} 93^{2} 97^{2} 103^{19}, Jer 14^{21}. For the cult of 'empty thrones' see Reichel, *Ueber vorhellenische Götterkulte* (Wien, 1897), and Budde's art. 'Imageless Worship in Antiquity' in *Expos. Times*, ix. (1898) 396 ff.

Similar is the use of 'throne' (θρόνος; once Ac 12^{21} βῆμα, lit. 'judgment-seat,' of Herod) in NT; almost always [the exceptions are Mt 19^{28} ‖ Lk 22^{30} 'ye shall sit upon twelve thrones,' etc., Col 1^{16} 'thrones' as a rank of angels (?; see art. DOMINION), Rev 20^{4} 'I saw thrones, and they (the assessors of the heavenly Judge) sat upon them'] of the throne of God or of Christ: Mt 5^{34} (‖ Lk 23^{22}) 19^{28} (‖ Lk 22^{30}), Lk 1^{32}, Ac 2^{30} 7^{49}, He 1^{8} 4^{16} 8^{1} 12^{2}, Rev 1^{4} 3^{21} and very often.

In Ps 45^{7} the Heb. text כִּסְאֲךָ אֱלֹהִים וג׳ ('thy throne, O God, is for ever and ever'; LXX ὁ θρόνος σου, ὁ θεός, followed in He 1^{8}) is probably corrupt. In addition to the tr. of EV the following renderings have been proposed: (1) 'Thy throne is God' (Döderlein, supported most recently by Westcott [on He 1^{8}] and Hort); (2) 'thy throne of God' ['thy God's throne'] (Ges. *Jes.* i.

---

* These keepers of the door are in 2 K 12^{10} 'priests'; in 2 Ch 34^{9} they characteristically become 'Levites.'

p. 365); (3) 'thy throne is (a throne) of God' (Aben Ezra, Hitzig, Ewald, Baethgen). To all these renderings there are either grammatical or exegetical objections. Bickell and Cheyne would insert נכונה יסודתו הקימו 'thy throne [its foundation is firmly fixed], God [hath established it].' Perhaps the simplest solution is to substitute יִהְיֶה for אֱלֹהִים ('thy throne shall be for ever'). This original יִהְיֶה might easily be misread יהוה (Jahweh), which in turn would be intentionally changed into אֱלֹהִים. So Giesebrecht, Wellh. ('Psalms' in *SBOT*, following Bruston, *Du texte primitif des Psaumes*, Paris, 1873), Duhm (in *Kurzer Hdcom.*). See, further, Driver, *Heb. Tenses*^{3}, § 194, Obs.; Cheyne, *OP* 182. J. A. SELBIE.

THUMB (בֹּהֶן [in Jg $1^{6.7}$ plur. בְּהֹנוֹת, as if from sing. בְּהוֹן, the form used throughout the Sam. Pent.] joined with יָד 'hand' means 'thumb,' while with רֶגֶל 'foot' it means 'great toe').—In all the Scripture passages where 'thumb' occurs, it is coupled with 'great toe.' In the consecration of Aaron and his sons, blood was sprinkled upon the tip of the right ear, upon the thumb of the right hand, and upon the great toe of the right foot (Ex 29^{20}, Lv $8^{23.24}$). It has been generally held (Dillm., Baentsch, *et al.*, *ad loc.*, Nowack, *Heb. Arch.* ii. 123) that this procedure symbolized the consecration of the organs of hearing, handling, and walking, the priests becoming thus fitted to hear God's voice, to handle holy things, and to tread holy ground. This explanation fails, however, to account for the selection of these three organs alone, and it does not harmonize well with the circumstance that the cleansed leper was similarly sprinkled (Lv $14^{14.17.25.28}$). There is more probability in the view of Holzinger (*Exodus, ad loc.*) that, like the horns of the altar, the *extremities* of the human body, with inclusive sense, are chosen for consecration.—The cutting off of Adonibezek's thumbs and great toes (Jg 1^{6}), a mutilation which he declares he had himself practised on seventy kings (v.^{7}), disabled him from fighting, and possibly disqualified him from reigning (see Moore, *ad loc.*, where parallels from classical writers are cited; cf. also art. ADONIBEZEK).

J. A. SELBIE.

THUMMIM.—See URIM AND THUMMIM.

THUNDER (רַעַם, βροντή) is the loud sound which accompanies the discharge through the atmosphere of electricity from the clouds. It seems to follow the lightning flash after an interval proportioned to the observer's distance from the place of disturbance. Thunderstorms are frequent in Palestine during the winter season, but very rarely occur at any other time of the year (Schwarz, *Palestine*, 327). They are always accompanied by rain or hail. In the OT thunder is both poetically described and popularly regarded as the voice of God. It is spoken of as a voice in Ps 77^{18} 104^{7}, Sir 43^{17} (cf. 1 S 7^{10}). In several passages (Ex $9^{23ff.}$ 19^{16} 20^{18}, 1 S $12^{17.18}$, Job 28^{26} 38^{25}) 'thunder' or 'thundering' is simply the tr. of קוֹלוֹת ('voices'), and even where קוֹל is rendered 'voice' the verb רָעַם ('to thunder') in the context sometimes shows that thunder is meant (2 S 22^{14}, Job $37^{4.5}$ 40^{9}, Ps 18^{13} 29^{3}; cf. the use of *φωναί* in Rev 4^{5} 8^{5} 11^{19} 16^{18}). Ps 29 is throughout a sublime poetic description of a thunderstorm and its effects, though the noun רַעַם does not once occur in it, but only the often repeated phrase קוֹל־יהוה. The sequence of thunder after lightning is referred to in Job 37^{4}, Sir 32^{10}, and the general connexion of the two phenomena in Job 28^{26} 38^{25}. In Ps 104^{7} the creative voice of God which bade the waters go to their appointed place (Gn 1^{9}) is identified with thunder. Thunder accompanied by hail is enumerated in Ex $9^{23ff.}$ as the seventh of the PLAGUES OF EGYPT (see vol. iii. p. 891). From Ps 77^{18} it would appear that it was a thundercloud which came between the Israelites and the Egyptians at the crossing of the Red Sea, and this is probably alluded to in Ps 81^{7}. Thunder was one of the impressive phenomena amidst which the Law was given at Sinai (Ex 19^{16} 20^{18}). A thunderstorm decided the issue of a battle between Israel and the Philistines (1 S 7^{10}, Sir 46^{17}), and another served to deepen the impression made by Samuel's warning to Israel when they desired a king (1 S $12^{17.18}$). This latter event was all the more significant because it occurred at a most unusual season,—that of wheat harvest.

In Job 39^{25} thunder is used figuratively for the noise of battle; and in Job 26^{14} the difference between a whisper and thunder is used to illustrate the contrast between what man sees of God's ways, and the reality of God's power. In Sir 40^{13} the goods of the unjust are said to go off in a noise like thunder; and in Mk 3^{17} 'sons of thunder' is the interpretation of the title *βοανηργές* given by Jesus to the sons of Zebedee (see BOANERGES). In Is 29^{6} thunder is among the metaphors describing the disasters impending on Ariel, and it appears in a similar connexion in Rev 8^{5} 16^{18}. Like other convulsions of nature, it enters largely into the imagery of the Apocalypse (4^{5} 11^{19}). Voices like thunder are mentioned in 6^{1} 14^{2} 19^{6}, and in $10^{3.4}$ actual thunders are conceived to have an articulate meaning. In view of this last fact, and of the close OT association between thunder and the voice of God, it seems probable that the 'voice out of heaven' (Jn $12^{28.29}$) was a thunder-peal, as indeed most of those present thought, and that its significance was recognized and interpreted by Jesus alone. A similar construction may be put on the voices in the narratives of the Baptism and Transfiguration of Jesus, and the whole subject is illustrated by the Jewish doctrine of the בַּת־קוֹל, which was always supposed to be preceded by a thunderclap (Barclay, *Talmud*, p. 16, note).

The Greek word *κεραυνός*, like Lat. *fulmen*, denotes thunder and lightning together. It is used in Wis 19^{13} of the punishment of the Egyptians at the Exodus (EV 'thunders'), and in 2 Mac 10^{30} of certain human missiles of destruction (AV 'lightnings,' RV 'thunderbolts'). *κεραύνωσις* is the LXX tr. of נֶפֶץ in Is 30^{30}, where all the phenomena of a thunderstorm occur in the context as metaphors for the disasters awaiting Assyria. AV renders נֶפֶץ 'scattering,' RV 'blast,' RVm 'crash,' Delitzsch 'cloud-burst.'

In Ps 78^{48} 'thunderbolt' is the tr. of רֶשֶׁף (mg. 'hailstone'). For the meaning of this word see under COAL, 4. vol. i. p. 451^{b}. In Job 39^{19} AV has 'thunder' as a mistranslation of רַעְמָה (RV 'quivering mane'). JAMES PATRICK.

THYATIRA (*Θυάτειρα*) was an important and wealthy city in the northern part of Lydia, in a district which was in early times sometimes assigned to Mysia; and it was sometimes called 'the last city of the Mysians,'* owing to the uncertainty about national boundaries in Asia Minor. In its situation in the open fertile valley of the Lycus, a stream that flows south-west from the Mysian frontier to join the Hermus, it must have been a settlement (doubtless a large village beside a temple, after the Anatolian fashion) from the earliest time; and according to Pliny and Stephanus it was then called Pelopia Euippa Semiramis; but these seem to be mere epithets, and the name Thyateira is probably an old Lydian word, meaning 'the town or citadel of Thya': Teira occurs as a Lydian city name. But the importance of Thyatira began when it was refounded with a colony of Macedonians by Seleucus Nikator between B.C. 301 and 281.† Its history as a Greek city dates from that time; and it continued to be a rich and busy commercial city throughout ancient times. The peacefulness and prosperity of its development afford little for the historian to record. Antiochus the Great lay encamped there for a time in B.C. 190, until he was forced to retire on Magnesia; and the decisive battle against the Romans under Scipio was fought between the two cities. Thyatira derived its importance strictly from the valley in which it was situated, and not from lying on a great trade route. Hence it was limited in its development by the restriction of its range, and it never became a metropolis or leading city of Asia, nor was it honoured with the Neokorate in the State cultus of the emperors. Ptolemy, indeed, styles it metropolis of Lydia (V. ii. 16); but the title never occurs in inscriptions or on coins, and is probably erroneously given. The epithets by which Thyatira sought to glorify itself are therefore rather vague in character, *λαμπροτάτη*, *διασημοτάτη*, *μεγίστη*, etc. But in A.D. 215 Caracalla passed through the city, and issued an edict (which came before, and was probably addressed to the *Koinon* of Asia, and was of course carried into effect by vote of the *Koinon*), ordering that it should be one of the seats of *conventus* of the Province (*ἐδωρήσατο τῇ πατρίδι ἡμῶν τὴν ἀγορὰν τῶν δικῶν*).

---

* Steph. Byz. *s.v.* So Iconium was 'the last city of Phrygia.'

† So Stephanus; but Schuchhardt (*Athen. Mitth.* 1888, p. 1 ff.) attributes the new foundation to a later date in the 3rd cent.,

In regard to religion, Thyatira also rejoiced in the title 'the holy city of the *προπάτωρ θεὸς* Ἥλιος Πύθιος Τυριμναῖος Ἀπόλλων' (just as Ephesus boasted itself the city of Artemis); and the inscriptions often mention the patron god. The coins often show the horseman-god Tyrimnos, with double-axe on shoulder (a figure common under various names in Lydian and Phrygian cities), and a goddess of the Greek Artemis type, called Boreitene. But Boreitene is simply a surname of the goddess who was worshipped along with the patron god, probably derived from some locality in the territory of the city with which the goddess was specially associated. The Boreitene Artemis was, undoubtedly, closely related to the Ephesian Artemis on the one hand, and to the East Lydian and Pontic Anaitis (Persian in origin, called Persike on the coins of the neighbouring Hierocæsareia) on the other. Apollo Tyrimnaios is known only from the inscriptions, which show that there was a sacred *temenos*, with a *propylæum*, containing doubtless a temple: games called Tyrimnaia, in honour of the god, are also mentioned. The priest of Apollo and the priestess of Artemis were husband and wife (*Bull. Corresp. Hellén.* xi. p. 478, No. 57), showing how intimate was the relation between the two deities in the Thyatiran cult. This deity was Πρόπολις (with his temple in front of, not inside, the city) and Προπάτωρ (patron of the city, and ancestor of some leading family or families, doubtless priestly families, in it). Tyrimnos was evidently the ancient Lydian sun-god,[*] identified with the Greek Apollo Pythius. Under the Roman empire the worship of Apollo Tyrimnaios was united with the cult of the emperors, as we see in the ceremony of the Sebasto-Tyrimnæan festival (*τῆς Σεβαστείου καὶ Τυριμνήου πανηγύρεως*). The worship of Artemis and Apollo was conjoined with mysteries, which were under the direction of the priestess (*CIG* 3507).

Further, there was outside of the city (*πρὸ τῆς πόλεως*) a shrine of the Oriental (Chaldæan, or Persian, or Hebrew) Sibyl Sambethe, or Sambathe, in the sacred precinct of the Chaldæan (*πρὸς τῷ Σαμβαθείῳ ἐν τῷ Χαλδαίου περιβόλῳ*,[*] *CIG* 3509). It may be taken as certain that this shrine was a seat of soothsaying, and that a prophetess was the recipient of inspiration and uttered the oracles at the shrine. It is also highly probable that this foundation arose from an eclectic religious system, combining some Hebrew conceptions with pagan forms and customs. So much may be taken as generally admitted; but to this Schürer (*Die Prophetin Isabel in Thyatira* [†]) has added the, at first sight, attractive theory that the woman Jezebel of Rev 2[20] was the prophetess at the shrine, who perhaps played the part of the Sibyl herself, and whose character was perhaps not purely heathen but contained a mixture of Jewish elements. We cannot, however, consider this probable. While we must agree with Schürer and many older scholars that 'Jezebel' here denotes a definite woman, the context seems to require a woman of great influence within the Thyatiran Church (like Jezebel within the kingdom of Israel), in all probability an official, active, prominent in religious observances, claiming to be and accepted in the Church (*ἀφεῖς*) as one of those prophetesses who were so important in the early Church, using her position to disseminate her own views, maintaining and teaching the doctrine (against which the letter inveighs so bitterly) that it was possible to be a Christian and yet remain a member of ordinary pagan society and belong to the social clubs, which were so characteristic of pagan life, and fulfilled many useful purposes of a charitable or beneficial kind, but were (according to St. John and St. Paul alike) inextricably implicated in idolatrous observances, and conducive to luxury and sensual enjoyment.[‡] The person who was condemned so strenuously by the author was not a pagan prophetess, but a danger within the Church, and the Church itself is censured for treating her with allowance and respect instead of casting her out with abhorrence. Yet a time for repentance is granted even to her, before her punishment shall come upon her.

The passage of Rev. places us amid the difficulties besetting the Thyatiran Christians in the early period of the Church. The population of the city was divided into trade-guilds, many of which are mentioned in inscriptions. To belong to the guild was a most important matter for every tradesman or artisan; it aided his business, and brought him many advantages socially. Each guild was a corporate body, possessing considerable powers, directed by elected officers, passing decrees in honour of Roman officials or other persons who had aided it, possessing property or revenues under its own direction, constructing works for the public; many of them, if not all, were benefit societies for mutual aid, and showed vigorous life, and were on the whole healthy and praiseworthy associations.

The objection to the guilds from the Christian point of view was twofold. In the first place, the bond which held a guild together lay always in the common religion in which all united, and in the common sacrificial meal of which all partook; the members ate and drank fellowship and brotherhood in virtue of the pagan deity whom they served. In the existing state of society it was impossible to dissociate membership of a guild from idolatry, and the idolatry was of a kind that by its symbolism and its efficacy exerted

---

and regards Thyatira as a Seleucid garrison founded to resist the growing Pergamenian power.

[*] We cannot adopt the view of Blakesley in Smith's *DB* and others, that Tyrimnas (as they wrongly call him) was a Macedonian deity brought by the colonists from their own country. They may have brought the name (Tyrimmas was a mythical Macedonian king), but not the religious institution.

[*] From a single reference it is impossible to determine whether a Chaldæan deity, or a Chaldæan who instituted and regulated the cultus, is meant. M. Clerc (*de Rebus Thyatir.* pp. 23, 79) puts the shrine of the Sibyl near the Chaldæan's precinct; but the inscription defines the position of the grave as by the Sibyl's shrine in the Chaldæan's precinct.

[†] In *Theolog. Abhandl. Weizsäcker gewidmet*, 1892, p. 39 ff.

[‡] On this see *Expositor*, Dec. 1900, p. 429 ff.; Feb. 1901, p. 93 ff.

great influence on its adherents, making them members of a unity which was essentially non-Christian and anti-Christian. In the second place, the common banquets were celebrated amid circumstances of revelry and enjoyment that were far from conducive to strict morality, as is evident from representations of the feasts in such clubs; see *Bulletin de Corresp. Hellén.* 1900, p. 592 ff., and authorities there quoted.

But, considering the many good characteristics in these guilds, it was a serious question whether the Christian converts were bound to cut themselves off absolutely from them. In Rev 2$^{20\text{ff.}}$ we see that the question had not yet been decisively answered in the Thyatiran Church, but was still under discussion: one influential female member, who was generally believed to be inspired, taught that Christians might continue in their guilds and share in the duties and privileges thereof. On the other hand there was a section of that Church (Rev 2^{24}) which opposed the teaching of the prophetess in this respect; we should probably gather from the whole passage that this section was the minority in the Church. This minority shares in the general condemnation of 2^{20} for suffering the woman Jezebel: they had not condemned her absolutely, but treated her teaching as mistaken in this one point, while otherwise regarding her as worthy of respect. The minority, however, is not threatened with any further penalty, provided they continue to reject the teaching of the prophetess. Thus the letter to Thyatira reveals to us a very early stage in Christian history. The very first problems, which must have faced the Christians in the Ægean cities, connected with their relation to the pagan society and institutions, are still unsettled. No final decision had yet been come to in Thyatira on the subject; and contrary opinions were maintained by members of the same community. The decision had indeed been pronounced by St. Paul as regards Corinth,* but in somewhat veiled and general terms, and had not as yet become the current and definite principle of all the Churches. As regards date, it might appear that this points to an earlier period than the reign of Domitian, and favours the earlier date for Rev. which many scholars have advocated; but a single detail is not conclusive, and exceptional circumstances must be admitted as possible in outlying communities like Thyatira and Pergamum (Rev 2^{14}). In Ephesus, the administrative centre of the Asian Churches, the decision of the Church was already fixed (Rev 2^{6}). Here it is implied that the error of the prophetess had already been denounced, 'and I gave her time that she should repent' (2^{21}). It is only after that previous formal warning that her punishment is now denounced as immediate: her followers have still an opportunity of escaping the punishment, if they repent, but otherwise it will affect them and her together.

The punishment denounced is illustrated by the nature of such guild-feasts, as shown in ancient reliefs. The members and worshippers reclined on couches at the banquet; and it is probable that the κλίνη of Rev 2^{22} should be understood, not as a bed (AV and RV), but as a couch: 'I set her on a couch, and her associates alongside of her (no longer for the revelry of their idolatrous celebrations, but) for tribulation' (see *Expositor*, Feb. 1901, p. 99 ff.).

Apart from this serious fault, the Church of Thyatira is praised highly for its energetic and truly Christian conduct, and for its steady progress: 'thy last works are more than the first.'

The guild of coppersmiths (χαλκεῖς) seems to have been influential in Thyatira (see inscription in *Bull. Corr. Hell.* x. p. 407, belonging to the early imperial times). The type on coins, Hephaistos forging a helmet, probably refers to the bronze trade; and perhaps the enigmatic allusion to the unknown χαλκολίβανος would be understood, if more could be learned about the Thyatiran bronze or copper work. Mr. Blakesley has suggested that the description of the Son of God, whose feet were like *chalcolibanos* (Rev 2^{18}), may have been suggested by the way in which the tutelary deity of the city was represented in Thyatira.

The guild of dyers is mentioned in several inscriptions. M. Clerc's view, that the dyeing in Thyatira was performed in ancient times with madder-root, *rubia* (as in the mediæval and modern trade), not with the juice of the shell-fish (as in Tyre and Laconia), nor with the worm *Coccus ilicis* (κόκκος), may be regarded as practically certain; and in that case the purple stuffs which the Thyatiran Lydia sold in Philippi (Ac 16^{14}) were dyed with what is, in modern times, called 'Turkey red' (as the purple proper, the scarlet of the *coccus*, and the red of *rubia* seem to have been all included under the generic title purple).

Thyatira lay close to the road connecting Pergamum with Sardis, and hence is placed between the two in the list of the Seven Churches of Asia (Rev 1^{11}). No evidence remains as to how and when Christianity reached the city, except that, if we press the words of Ac 19^{10}, the new religion was preached there by some of St. Paul's coadjutors and helpers during his first residence in Ephesus.

The modern town of Ak-Hissar occupies the site, approximately, of the ancient Thyatira. It is a busy commercial town, possessing a railway station and a considerable industry in carpet-making, etc. The population is about 20,000, of whom 7000 are Christians.

THYINE WOOD (ξύλον θύϊνον, *lignum thyinum*).—The product of *Thuja articulata*, Desf., a tree of the order *Coniferæ*, growing in the Atlas. It is of the same genus as the *lignum vitæ*, and was specially valued by the Greeks and Romans for tables. It formed part of the precious merchandise of Babylon [Rome] (Rev 18^{12} AVm 'sweet wood'). It is dark brown, very hard and durable, and withal fragrant.

G. E. POST.

TIBERIAS (Τιβεριάς) is unlike most cities in Palestine in that we have a definite account of its origin, and can fix pretty accurately the date when it was built. Herod Antipas, the ruler of Galilee, was its founder, and it was named in honour of the emperor Tiberius. In the very beginning of his reign Antipas had already honoured Julia the mother of Tiberius, by rebuilding Betharamatha or Betharamptha (the Beth-haram of Jos 13^{27}), and calling it Julias or Livias. This was on the Shittim Plain east of Jericho. At a later period, some time between A.D. 20 and A.D. 30, Tiberias was built on the west shore of the Sea of Galilee. We are able to fix its site, because Josephus (*Ant.* XVIII. ii. 3) says that there were warm baths at no great distance from it in a place called Emmaus (the Hammath of Jos 19^{35}).

To secure sufficient room for the new city, an old cemetery had to be removed; and this fact, on account of the law of defilement by dead bodies, created a prejudice against it in the minds of the stricter Jews, which took a long time to overcome. Hammath was an ancient fortified town, and, as was customary, the dead were buried without the walls. These graves may have been a part of the cemetery of that old city, since the site of Antipas' new city was nearly a mile to the north of it. It is a curious historical fact that, while at the beginning the Jews thought Tiberias unclean, so that they could hardly be forced to settle there, at last in the course of time they chose it as one of their sacred cities (see below).

---

* 1 Co 10$^{15-22}$.

People from various quarters helped to make up the first inhabitants of Tiberias. Some foreigners came, some poor people were compelled to make it their residence, and many persons who were 'not quite freemen' were brought thither and given certain privileges in the way of houses and lands. Some of those who settled there, however, are described as persons of wealth and position. The place grew rapidly, gates, colonnades, and marble statues made the streets attractive. Soon Tiberias could boast of 'the finest synagogue in Galilee,' a device of Herod to conciliate the Jews. From all accounts at our command, the city, touching the water of the lake, must have been beautiful, and its social and political importance were assured when Antipas removed thither from Sepphoris, till then the capital of Galilee, the seat of his government. His palace was a building of elegance, with costly furnishings, and in it was a large amount of the royal treasure (Jos. *Life*, xii. 13).

The Gr. character of the town may be the reason why, although Christ was so thoroughly identified for long with the Sea of Galilee, there is no evidence that He ever visited Tiberias, the new capital of the civil ruler to whom He was subject. The NT has little to say about this city; once the fact is mentioned that 'boats came from Tiberias' near to the spot where the Feeding of the Five Thousand took place (Jn 6^{23}); further than this the Gospels are silent.

At the time of the war with Rome, A.D. 66–70, Tiberias was one of the chief cities of Galilee. It had a council of 600 members. Its citizens were loyal to the national cause. When Gaius wanted to set up his statue in the temple at Jerusalem these people made such a desperate resistance, showing that they were ready to die rather than have their laws transgressed (*Ant.* XVIII. viii. 3), that the foolish project was at last abandoned. The strength of the place is shown by the fact that Vespasian led against it three legions before its inhabitants would open their gates to him. Another change awaited Tiberias, this time one of humiliation, when Herod Agrippa II. degraded it from being the chief city, and restored that honour to Sepphoris, where he kept the public archives and had stored a magazine of arms.

If in this way Tiberias lost political prestige, it gained in another direction, for after the destruction of Jerusalem it became the chief centre of Jewish schools and learning, so that it has a large place in the history of Palestine, and indeed of the world, while its rival Sepphoris is practically forgotten. At one time during this flourishing period its synagogues numbered no fewer than thirteen. Here the Mishna and the Palestinian Talmud were compiled and published, *c.* A.D. 220 and A.D. 420 respectively. The beautiful situation of the city, some of the noted scholars who either lived or were buried there, the hot springs which helped to make the place famous, and the earthquakes from which it has occasionally suffered, have been mentioned under GALILEE, and GALILEE (SEA OF).

The founder of this city is remembered as the murderer of John the Baptist, and as being present in Jerusalem at the passover when Jesus was arrested and put to death (Lk 23^{7}). What was once attractive is now a place of filth and misery. On the shore S. of the town are some interesting ruins, which, could they be properly excavated, might reveal remains and possibly treasures of this royal city of Herod Antipas. *Tabarîyeh* (the modern name of the town) has a population of 5000 or 6000 souls, made up of a few Christians, some Mohammedans, and a large number of Jews. It has a Protestant mission with a school and a resident physician.

SELAH MERRILL.

TIBERIAS, SEA OF (Jn 21^{1}).—See GALILEE (SEA OF).

TIBERIUS (*Τιβέριος*).—The second Roman emperor, A.D. 14–37. The former is the date of Tiberius' accession on the death of Augustus. But there is good reason to suppose that St. Luke (3^{1}) in his reference to the 15th year of the reign of Tiberius Cæsar, as the beginning of John the Baptist's ministry, is reckoning from the date of Tiberius' association with Augustus in the empire some two years before the death of the latter. For the argument see art. CHRONOLOGY OF NT in vol. i. p. 405 f. The exact year of Tiberius' adoption by his stepfather in the government is not known. Mommsen puts it A.D. 11, other authorities A.D. 13. Perhaps the use of the word *ἡγεμονία* (AV and RV 'reign') implies that Tiberius was only acting as regent before the death of Augustus. From the evidence of coins struck at this date it is shown that it was customary to regard Tiberius' reign as beginning A.D. 12 or A.U.C. 765. This reign spread over the most momentous period in Christian chronology. In it occurred our Lord's ministry and death (A.D. 29); the Resurrection; the pouring out of the Holy Ghost; the martyrdom of St. Stephen, and the general persecution that immediately followed. All allusions to Cæsar during our Lord's life, *e.g.* in the case of the tribute money and the taunt levelled against Pilate, 'Thou art not Cæsar's friend,' refer to Tiberius. The last years of his reign witnessed the conversion of St. Paul and the beginning of his preaching.

Tiberius at his accession retained Valerius Gratus as procurator of Judæa, in order to lessen the frequent changes, and thus diminish the extortion in the provinces. Each new governor, expecting only a short lease of power, exacted as much as possible in the shortest time. Gratus deposed Annas and made his son Eleazar, and afterwards Caiaphas, his son-in-law, high priest. Pontius Pilate, the successor of Gratus, was also appointed by Tiberius, and was the nominee of Sejanus, the emperor's unprincipled favourite.

The name *Tiberias*, given to the city and lake, was intended by Herod Antipas as a compliment to the reigning emperor. See art. TIBERIAS.

C. H. PRICHARD.

TIBHATH (טִבְחַת 'extensive,' 'level'; B *Μεταβήχας*, A *Ματεβέθ*; *Thebath*).—A city of Hadarezer, king of Zobah, from which David took much brass (1 Ch 18^{8}). In 2 S 8^{8} the name of the town is Betah, but the original reading was probably **Tebah**, as in the Syriac version, and as a tribal name in Gn 22^{24}. The site of Tibhath is unknown, but it was possibly on the eastern slopes of Anti-Lebanon, between which range and the Euphrates Aram-zobah is supposed to have been situated.

C. W. WILSON.

TIBNI (תִּבְנִי; B *Θαμνεί*, A *Θαμνί*, Luc. *Θαβεννεί*).—After the seven days' reign of ZIMRI had ended in his death in the flames of his palace, Tibni disputed the throne for four years (compare 1 K 16^{15} with v.^{23}) with OMRI, whose sway was acknowledged only after the death of Tibni and his brother Joram. Our knowledge of Joram we owe to the

LXX, whose addition (in 1 K 16^{22}) *καὶ Ἰωρὰμ ὁ ἀδελφὸς αὐτοῦ ἐν τῷ καιρῷ ἐκείνῳ* no doubt preserves an original ויורם אחיו בעת ההיא which has dropped out of the Heb. text.

TIDAL (תִּדְעָל; A Θαλγά, Θαλγάλ, Luc. Θαργάλ; *Thadal*).—King of GOIIM, who, along with Arioch of Ellasar and Amraphel of Shinar, followed his suzerain, Chedorlaomer of Elam, in his campaigns in Palestine (Gn $14^{1.9}$). His name has recently been found * by Mr. Pinches in a cuneiform tablet (*Sp.* iii. 2. 13) under the form of Tudghula in connexion with Eri-Aku of Larsa, Khammu[rabi] of Babylon, and Kudur-Laghghamar of Elam. Tudghula is here called the son of Gazza[ni]. In another tablet relating to the same historical events we read: 'Who is Kudur-Laghghamar, the worker of evil? He has assembled the Umman Manda, he has laid waste the people of Bel (*i.e.* the Babylonians), and [has marched] at their side.' The Umman Manda, or 'Barbarian Hordes,' were the mountaineers who lived to the north of Elam, and the name given to them is the Bab. equivalent of the Heb. Goiim. It seems probable, therefore, that Tudghula or Tidʿal came from the mountains N.E. of Babylonia. A. H. SAYCE.

TIGLATH-PILESER (תִּגְלַת־פִּלְאֶסֶר; B Ἀλγαθφελλάσαρ,, Θαλγαθφελλάσαρ, Θαλγαλφελλάσαρ, A Ἀγλαθφαλλάσαρ, Luc. Θεγλαφαλάσαρ; Assyr. *Tukulti-Pal-Esarra*, '(my) trust is (Ninip) the son of E-Sarra,' E-Sarra signifying 'the House of Hosts.' The Heb. spelling of the first part of the name is peculiar, but precisely the same spelling is found in the Aram. inscriptions of Zinjerli, which are contemporaneous with the reign of Tiglath-pileser. In 1 Ch $5^{6.26}$ and 2 Ch 28^{20} we find the corrupt form Tilgath-pilneser [תִּלְגַּת־פִּלְנֶסֶר; B Θαλγαβανάσαρ, Θαγναφαμάσαρ, Θαλγαφελλάδαρ; A Θαγλαθφαλνάσαρ; Luc. Θεγλαθφαλάσαρ]).

The Tiglath-pileser of OT is Tiglath-pileser III. of the native monuments, whose original name was Pulu (the Pul of 2 K 15^{19}). He usurped the Assyr. crown, the 13th day of Iyyar, B.C. 745, after the fall of the older Assyr. dynasty, and assumed the name of Tiglath-pileser from that of a famous Assyr. king and conqueror who had reigned four centuries previously. In Babylonia, however, he continued to be known by his original name Pulu.

Tiglath-pileser III., the founder of the second Assyr. empire, was a man of great ability, both military and administrative. He introduced a new system of policy, the object of which was to weld the whole of W. Asia into a single empire, bound together by a bureaucratic organization. It was the first experiment in political centralization. He also established a standing army, which he made, by careful training and equipment, an irresistible engine of war. And it was he who first devised the system of satrapies and finance which prevailed in the Persian empire of later days.

Immediately after his accession he marched into Babylonia, where he subdued the Aramæan tribes and united the northern portion of the country to Assyria. In B.C. 744 he chastised the wild tribes on the eastern frontiers of his kingdom, penetrating into the remotest parts of Media. Next he had to defend himself against Sarduris II. of Ararat and his allies from Asia Minor. These he defeated in a pitched battle, capturing no fewer than 72,950 soldiers of the enemy as well as the city of Arpad in N. Syria. Here he received tribute from various princes, including Rezin of Damascus and Hiram of Tyre. Arpad, however, revolted immediately afterwards. In B.C. 742, accordingly, he began the siege of it; but it did not fall till B.C. 740. In B.C. 739 the Assyrians came into conflict with Azariah of Judah (not Yadi in N. Syria, as has recently been suggested; but see art. UZZIAH, and ASSYRIA, vol. i. p. 185^{b}), whose allies from Hamath were overthrown, and the 19 districts of Hamath placed under Assyr. governors. Meanwhile the Assyr. generals had suppressed a revolt among the Aramæan tribes in Babylonia. Transportations of the conquered populations now took place on a large scale. This was the beginning of a policy which was afterwards more fully developed by the Assyr. and Bab. kings. Tribute was again brought to Tiglath-pileser by the kings of Asia Minor, Syria, and Palestine, among them being Menaḥem of Samaria (2 K 15^{19}).

In B.C. 737 there was another campaign in the east, the Medes and other neighbouring tribes being overrun, and in 736 war again broke out with Ararat. In B.C. 735 Ararat itself was invaded, and, though the capital Dhuspas (now *Van*) resisted capture, the country round it was ravaged to the extent of 450 miles. Next year (B.C. 734) Tiglath-pileser was summoned to the help of Ahaz of Judah, called Jehoahaz in the cuneiform texts, who had been attacked by Pekah of Israel and Rezin of Damascus. Rezin was defeated in a decisive battle, and fled to his capital, which was thereupon closely invested by the Assyrians. With another portion of his army T. now ravaged 16 districts of Syria, captured Samahla (the modern *Zinjerli*), and descended on the kingdom of Samaria. Gilead and Abel-[Beth-Maacah] were annexed to Assyria (2 K 15^{29}); tribute was received from Ammon and Moab; the Philistine cities, Ekron, Ashdod, and Ashkelon, were conquered, and Gaza was plundered. Edom was also compelled to submit as well as Samsi, queen of the Arabs of Saba or Sheba. Various cities of N. Arabia, including Tema (now *Teima*), were taken at the same time. In B.C. 732 Damascus fell at last, Rezin was put to death, and an Assyr. satrap appointed in his place. After the capture of Damascus, T. held a court there, which was attended by the subject princes, Kustaspi of Comagênê, Urikki of Ḳuê, Sibittibaal of Gebal, Eniel of Hamath, Panammû of Samahla, Tarkhu-lara of Gurgum, Suluval of Milid (*Malatiyeh*), Uas-survi of Tubal, Uskhitti of Tuna, Urpalla of Tukhana, Tukhammu of Istunda, Matan-baal of Arvad, Sanibu of Ammon, Solomon (Salamanu) of Moab, Metinti of Ashkelon, Jehoahaz (Yahu-khazi) of Judah, Ḳausmalaka of Edom, and Khanun (Hanno) of Gaza. It was while he was at Damascus that Ahaz saw the altar of which he sent the pattern to Jerusalem (2 K $16^{10ff.}$). Soon afterwards Uas-survi of Tubal revolted: for this the people were fined, and a new king established over them. Metenna of Tyre was also forced to become tributary to Assyria, and to pay 150 talents of gold to the Assyrian exchequer.

About B.C. 730 (or perhaps 733) Pekah of Samaria was murdered by Hoshea, whom T. claims to have appointed to the throne. In B.C. 731 the Assyr. king marched into Babylonia, and received an embassy from Merodach-baladan, the Kaldâ prince who ruled in the marshes at the mouths of the Tigris and Euphrates. But it was not until B.C. 728 that he succeeded in occupying Babylon and receiving the crown from the hands of Bel, thereby making his title to the throne legitimate, and becoming king of Western Asia *de jure*. In the following year, B.C. 727, in the early part of the month Tebet, he died. He had built two palaces—one at Nineveh, the other at Calah (now *Nimrûd*). A. H. SAYCE.

TIGRIS.—See HIDDEKEL. The Tigris rises a little south of Lake Göljik, and flows southward to Diarbekr. After passing Diarbekr, it receives the eastern Tigris (which rises in the Niphates mountains) at Osman Kieui. Then it flows through narrow gorges into the plateau of Mesopotamia, where it receives from the east the Greater and Lesser Zab, the Adhem or Radanu, and the Diyaleh or Tornadotus. On the E. bank, opposite Mosul, were Nineveh and Calah, a little N. of the junction of the Tigris and Greater Zab; and on the W. bank, N. of the Lesser Zab, was Assur (now Kalah Sherghat), the primitive capital of Assyria. The Tigris is about 1150 miles in length, and rises rapidly in March and April owing to the melting of the snows, falling again after the middle of May. A. H. SAYCE.

---

* King, *Letters of Hammurabi*, i. (1898) p. liii, and Ball, *Light from the East*, p. 70, however, question these identifications.

TIKVAH (תִּקְוָה).—1. The father-in-law of HULDAH the prophetess, 2 K 22^{14} (B Θεκκουαύ, A Θεκκουέ, Luc. Θεκουέ), called in 2 Ch 34^{22} **Tokhath** (*Ḳĕrê* תָּקְהַת, *Kĕth.* תוקהת; B Καθουάλ, A Θακουάθ, Luc. Θεκωέ). 2. The father of JAHZEIAH, a contemporary of Ezra, Ezr 10^{15} (B Ἑλκειά, A Θεκουέ), called in 1 Es 9^{14} **Thocanus**.

TILE, TILING (לְבֵנָה, κέραμος).—In Ezk 4^1 'tile' is the rendering of לְבֵנָה, which is elsewhere tr. 'brick' (LXX πλίνθος). See BRICK.

In Lk 5^{19}, in the account of the healing of the paralytic at Capernaum, the sufferer is said to have been let down *διὰ τῶν κεράμων* (AV 'through the tiling,' RV 'through the tiles'). The parallel passage (Mk 2^4) is more detailed in its expressions (*ἀπεστέγασαν τὴν στέγην . . . καὶ ἐξορύξαντες*), and a difficulty has been felt in reconciling these with Luke's phrase. The roofs of Oriental houses are usually formed by laying tree trunks with the branches and twigs from wall to wall. Above these is a layer of earth about a foot thick, and over this is spread a paste of clay and straw, which hardens in the sun and renders the roof impervious to rain. This upper layer needs to be renewed at the beginning of the winter season (Nowack, *Heb. Arch.* i. 140; Benzinger, *Heb. Arch.* 116). Mark's account seems to suggest the breaking-up of such a roof as this, while Luke's expression does not, and various explanations of the latter have been attempted. The idea of a door or trap in the roof does not fit either narrative. It has been suggested that *διὰ τῶν κεράμων* is to be understood in the general sense of 'through the roof,' though, if taken literally, the words would be more applicable to Greek and Roman houses than to those of Palestine. Another explanation is that the court of the house was partly roofed over but had an opening above the centre, which was covered in wet weather by tiles, which could be easily removed (so Godet, following Delitzsch, *Ein Tag in Capernaum*, 44–46). The best view, however, is that of Tristram (*Eastern Customs in Bible Lands*, 34, 35), who states that ordinary Galilæan houses of the present day have a court separated from the street by a wall on one side, while on the other three sides it is surrounded by apartments opening into it. The roofs of these apartments are always of earth and lime, firmly pressed down and whitewashed. The roof may be supported by pillars on the side next the court, from which the rooms may be separated only by movable curtains. From the roof proper, however, eaves stretch over the court for six feet or more. These are supported on light rafters, and are covered with matting or with shingles (wooden tiles) lightly tacked together. The principal apartment is on the side of the court away from the street. In the case before us both this and the court itself would be full of people, and Jesus, in order to be heard by all, would be standing at the outer margin of the room. Access could be gained to the roof by an outside stairway, and if the covering of the eaves were removed, as it could easily be, the paralytic could be let down from the edge of the roof proper to the very spot where Jesus was. The expressions in Mark, though applicable to the breaking through of an earthen roof, describe this proceeding equally well. JAMES PATRICK.

TILGATH-PILNESER.—See TIGLATH-PILESER.

TILON (*Ḳĕrê* תִּילוֹן, *Kĕth.* תולון; B Ἰνών, A Θιλών, Luc. Θωλείμ).—A son of Shimon, 1 Ch 4^{20}.

TIMÆUS, only Mk 10^{46}.—Father of the blind beggar BARTIMÆUS (vol. i. p. 248). If the name be Greek, it must be written Τίμαιος, and thus WH write even the second name Βαρτίμαιος; if it be Semitic, like most names in *-αιος* in the NT, it must be Τιμαῖος, like Ζακχαῖος, Βαρθολομαῖος, etc. Both suppositions have their difficulties. Again, 'the son of Timæus' (*υἱὸς Τιμαίου*) seems a mere translation of Βαρτιμαῖος. Ecclesiastical tradition gives to the name the meaning 'blind' (see *Onomastica sacra*, ed. Lagarde, 176, 35, Βαρτιμαῖος υἱὸς τυφλός; 66, 10 (Jerome): *Barsemia* filius cæcus, quod et ipsum quidam corrupte Bartimæum legunt).* סַמְיָא, סַמֵּא means 'blind'; but how are we to get from *sĕmē* to *timai*? Jastrow (*Dictionary*, p. 532; similarly, Krauss, *Lehnwörter*) mentions from *Ḳoh. rabba* to Ec 9^7 ר׳ יהושע בריה דר׳ טימי, but Yalk. Koh. 979 has only ר׳ שמלאי, and with Dalman, *Aramäisch-neuhebräisches Wörterbuch*, p. 162, we must perhaps read שִׁימַי=Simeon. The *Thesaurus Syriacus* (486, 1462) mentions a place בֵּית טִימַי. The Syriac Versions, including the Arabic Tatian, Syrus Sinaiticus, and the Palestinian Syriac (Land, *Anecdota Syriaca*, iv. 141), read *Timai bar Timai*, the Egyptian *Catenæ* as published by Lagarde (1886, p. 101), ΒΑΡΤΙΜΕΝΟϹ ΠϢΗΡΙ ṄΤΙΜΕΝΟϹ. Origen connected the name with *τιμή* (*ὁ τῆς τιμῆς ἐπώνυμος*); Strauss thought of *ἐπετίμων* in v.^{48}; others of √טמא 'unclean'; Neubauer (*Studia Biblica*, i. 57) would spell it תִּיסָא, against the general rule that *τ*=ט. The etymology is still obscure, and so is the relation of the account of Mark to that of Luke and Matthew. See Schmiedel, *Enc. Bibl.* i. 489–491; Nestle, *Marginalien*, 1893, pp. 83–92; art. BARTIMÆUS in vol. i. p. 248. EB. NESTLE.

TIMBREL.—See TABRET.

TIME.—i. ERAS.—The Bible offers insufficient data for confident generalizations regarding the methods employed at various periods for measuring and indicating the passage of time. We should naturally expect considerable changes in these methods as the Israelites passed through various phases of civilization and modes of living. The literary records, however, do not completely reflect all these modified conditions, and just as Josephus translates the current Jewish dates of his age into their Macedonian equivalents, so earlier writers would probably date past events in accordance with their own rather than with the ancient systems of the calendar. Until the 2nd cent. B.C. we know of no fixed *era* from which events were dated by the Israelites. The books of the Maccabees show us the Seleucidean era (beginning B.C. 312) in full force. This era (*minyan Yevanim* 'numbering of the Greeks,' or *minyan shetaroth* 'numbering of documents') was the first to be adopted and the last to be rejected by the Jews; it survived among the Egyptian Jews till the 16th cent. A.D. The ordinary Seleucid era began with the autumn of the year B.C. 312; but Schürer (*HJP* I. i. p. 37) maintains that the authors of the books of the Maccabees reckon the year from the spring season, though later Jews counted from the autumn (Tishri). Wellhausen rejects Schürer's theory (*IJG*^{4} 258). Several of the Hellenistic cities founded along the seacoast of Judæa and in the north had eras of their own in the Greek period (after Alexander the Great), but the only exact Jewish parallel is found in the time of Simon the Maccabee (143–2 B.C.). 'In the hundred and seventieth year (of the Seleucidean era) was the yoke of the heathen taken away from Israel. And the people began to write in their instruments and contracts, "In the first year of Simon the great high priest and captain and leader of the Jews"' (1 Mac 13^{41}). No documents so dated are extant, but it has been doubtfully conjectured [but see art. MONEY in vol. iii. p. 424 ff.] that some silver coins bearing the year numbers 1, 2, 3, 4, and 5, and the inscription ירושלים קדשה, etc., refer to this era. That the era of Simon was of short duration is certain; even in 1 Mac. (14^{27}) it is only employed side by side with the more permanently used Selucidean epoch.

---

* On the Syriac lexicographers (Bar Ali, Bar Bahlul) see Nestle, *Marginalien*, p. 87.

The prevalent method of dating events both in OT and NT is by regnal years of monarchs, or by synchronism with other events [see CHRONOLOGY]. The Exodus from Egypt was sometimes taken as an era (1 K 6^1, cf. Ex 19^1, Nu 33^{38}); and Ezekiel (1^1) perhaps turns the reformation of Josiah (B.C. 622–1) to this purpose. It is unlikely that the 'thirtieth year' refers to Ezekiel's own age [but see Budde in *Expos. Times*, Oct. 1900, p. 39 ff., and Aug. 1901, p. 525 f.], though the patriarchal dates are often collated with the ages of various characters. At the beginning of the Christian era, the Jews were compelled to adopt the year of the Roman emperors as their norm (Graetz, *History of the Jews*, Eng. tr. ii. 134). The erection of Solomon's temple (1 K 9^{10}), the commencement of the Egyptian entanglement (Gn 15^{13}), the Babylonian Exile (Ezk 33^{21} 40^1), and such natural phenomena as a remarkable earthquake ('two years before the earthquake,' Am 1^1), were also in a minor degree used as eras. Soon after the time of Christ, the Jews must have devised a method of counting by *anno mundi*, for the Talmud assumes that something like 4000 years separated the destruction of the temple from the Creation. The dating by A.M. first occurs in the *Seder Hadoroth*, a work attributed to Jose ben Chalafta. The Jewish system differs from the Dionysian era (6th cent. A.D.), and, while Ussher dates the Christian era as 4004 A.M., the current Jewish numbering assigns the year 3760 A.M. to the beginning of that era. Thus the Jewish year beginning September 1901 is 5662 A.M. Jews in later times occasionally used the Mohammedan era, and dated from the Hegira. There is no indication whatever that the Jews ever turned the jubilee period to calendar use in the same manner in which the Olympiads were employed. They may, however, have made use of the idea of the *dor* or 'generation.'

ii. THE YEAR.—In the main, the Jewish *year* was lunar, with corrections designed to bring about a more or less exact correspondence with the solar seasons. It seems to have been the view of the writer of the first report of the Flood (P) that the oldest Hebrew year was a *pure* lunar year, containing 12 lunar months and 354 days. In Gn 7^{11} (cf. 8^{14}) the Flood is said to have lasted from the 17th of the 2nd month in one year to the 27th of the 2nd month in the next year, or 1 year and 11 days. This reckoning, as Benzinger suggests (*Heb. Arch.* p. 198), arose through the translation of a solar year into its lunar equivalent. The actual duration of the Flood was in the general Semitic tradition a year, meaning a solar year of 365 days. 'In the presupposition that the oldest ages had a pure moon year, P, when dating the Flood, uses such a year as the basis, and shows his archæological knowledge and his pretended historical exactitude by not giving the round figure a year, but he gives the right total in an inferential manner.' It may, however, well be that we have here a genuine tradition of an ancient pure lunar year; moreover, even when solar corrections were made, *some* Jewish years were more or less purely lunar. From another factor in the Flood narrative, the 150 days, which amounted to 5 months, a year of $12 \times 30 = 360$ days has been inferred (Schwarz, *Der Jüdische Kalender*, p. 7). So much is certain, that in the historical time the Hebrew year was solar, though the months were lunar. The Calendar must have been roughly congruous with the cycle of natural life. The old Arabs had a sun-year of 365 days before Mohammed converted it into the pure lunar year of 354 days, which still prevails.

The fact that solar considerations must early have affected the Hebrew Calendar is obvious from the cycle of feasts which on the one hand fell in definitely fixed lunar months, and on the other hand coincided with equally definite seasons of the solar year. In the pure lunar year, Passover would, in a period of about 34 years, make the round of all the four seasons (Schwarz, p. 9). This was an impossibility in the Jewish Calendar. How the correction was effected we have no means of discovering. The lunar character of the Calendar must have prevented the intercalation of an odd 10 or 11 days annually (as Lewisohn suggests, *Gesch. und Syst. d. K.* p. 6), yet we are nowhere told of an intercalary *month*, unless the law as to the deferred Passover (Nu 9^{10}) be held to be some indication of it. The Talmud (*Sanhed.* 12*a*) proves the biblical knowledge of the intercalary month from 1 K 4^7, but the argument is ineffective. On the other hand, 1 Ch 27, where arrangements for the succession of royal officers are only made for 12 months, cannot be held to prove the total ignorance of intercalation of a thirteenth month. The knowledge of this method was very ancient in Babylon, an intercalated Elul being older than the intercalated Adar. The latter, being sacred to Ashur, must have been the work of astronomers standing under Assyrian authority (Jastrow, *Rel. of Babylonia and Assyria*, p. 463).

The Babylonian year seems to have consisted of 12 lunar months of 30 days each, intercalary months being added by the priests when necessary (W. Muss-Arnolt, 'The Names of the Assyro-Babylonian Months and their Regents,' in *JBL* vol. xi. p. 72 f.). In later times, according to Strassmaier and Epping (*Astronomisches aus Babylon*), months of 30 days alternated with months of 29 days (Nisan, Tammuz, Elul, Tishri, Kislev, Shebat, and Adar had 30 days, while the others had only 29). Muss-Arnolt expresses himself as uncertain whether the intercalary months were fixed, or were added whenever the priestly directors of the Calendar discovered that the disagreement between it and the true year had become serious. We may fairly assume that the latter was the method in ancient Israel, at all events till well into the post-exilic period. Without any definite rules a month was probably intercalated on occasion, when the discrepancy was sufficiently marked (Schwarz, p. 14) to render correction imperative. Some have sought to find the key to the ancient intercalations in the jubilee periods (Zuckermann, *Ueber Sabbatjahrcyklus und Jobelperiode*; Schwarz, pp. 10–12), with 18 or 19 intercalary months inserted in every 49 or 50 years. All such exact calculations, including those based on eras of 8 or 84 years, and more particularly on the Metonic cycle of 19 years, certainly belong to the post-Christian period. Jewish tradition is very consistent in its evidence that the old method of empiric intercalation both of a monthly day and a yearly month prevailed for many centuries after Christ (see NEW MOON). Schürer (Appendix iii. to Division i. vol. ii.) expounds the generally accepted view of Jewish scholars as against Wieseler (see, however, CHRONOLOGY). Throughout the Middle Ages the empiric method partially held its ground. Nevertheless, calculation (of which we have early indications in Enoch 72 ff.) must have much aided observation, and we read of family traditions in the case of Gamaliel (*Rosh Hashana* 25*a*), and the mean duration of the lunar month (about 29½ days) must have been known long before the destruction of the temple (see the evidence for this in Schwarz, p. 19). By the middle of the 2nd cent. A.D. the calculated calendar was on the way to acceptance (*Sanhed.* 12*a*), but it was not fully adopted till the 4th cent. under Hillel II. In the intervening period the proclamation of New Moon and of the intercalary months was still dependent on the evidence of eye-witnesses as to the reappearance of the moon on the one hand, and the relation of the lunar months to the solar seasons on the other. But astronomical calculation was certainly utilized as well, and, by observing 2 days' new moon in places distant from the Patriarchate, some of the difficulties of the Diaspora were removed. (See on this and on other points of the Rabbinic calendar, Zuckermann, *Material. zur Ent. der altjüd. Zeitrechnung*). The fixing of the Day of Atonement was, however, a perennial difficulty until a calculated calendar was finally adopted, based on the Metonic cycle with variations which do not belong to the scope of the present article.

Beginning of the Year.—'The Hebrew year had begun in the autumn with the month of September; but side by side with this West-Semitic calendar there had also been in use in Palestine another calendar, that of Babylonia, according to which the year began with Nisan or March. It was the Babylonian Calendar which was now introduced for ritual purposes. While the civil year still began in the autumn, it was ordained that the sacred year should begin in the spring. The sacred year was determined by the annual festivals, and the first of these festivals was henceforth to be the Passover. The beginning of the new year was henceforth fixed by the Passover moon' (Sayce, *EHH* p. 178). According to Dillmann (*Monatsberichte*, Societas Regia Scientiarum, Berlin, 1881) both the autumn and the spring new years are pre-exilic. The autumn era was, he holds, an economic rather than a calendar year; but, as Nowack well remarks, to an agricultural people the economic year must have coincided with the calendar year. That at all events an economic year began in the autumn is clear from such phrases as בְּצֵאת הַשָּׁנָה, תְּקוּפַת הַשָּׁנָה ('the end of the year,' Ex 23[16] 34[22], cf. 1 S 20) used in describing the autumn harvest festival. The narrative of the Flood places the commencement on the 17th of the 2nd month, which on an autumn reckoning would correspond with the rainy season. The sabbatical year began in autumn (Lv 25[9]), though it was not at the beginning of a calendar year (being on the 10th of the month). The royal years also at one time began in the autumn, and the synchronism of the Jewish events with the regnal year of Nebuchadnezzar in Jeremiah (46[2]) seems to support the same conclusion. Dillmann at all events infers that the second half of the Jewish royal year corresponded with the first half of the Babylonian royal year (the fourth year of Jehoiakim corresponds both to the first year of Nebuchadnezzar, Jer 25[1], and to the twenty-first of his predecessor Nabopolasar, in which the battle of Carchemish was fought).

But besides the autumn year a spring era seems also to have been pre-exilic. The use of the term תְּשׁוּבַת הַשָּׁנָה for the resumption of royal campaigns (2 S 11[1], 1 K 20[22. 26], 2 Ch 36[10]) points to a spring era. So also does the order of the feasts. In the oldest form (Ex 23[14-16]), as well as in J (Ex 34[18-22]), and Deut. (16[1-17]), the cycle begins with Passover and ends with Tabernacles. A Babylonian influence, to which was, however, due the introduction of the new names for the months, need not therefore be sought for this fixing of the beginning of the year in the spring (Ex 12[2], and in Priestly Code throughout), but the period of the Exile no doubt did mark the completion of the change from the autumnal to the vernal equinox. By this arrangement the order of the months began in Nisan, but the succession of years began in Tishri. Josephus is clearly accurate when he says (*Ant.* I. iii. 3): 'Moses appointed that Nisan, which is the same with Xanthicus, should be the first month for their festivals, because he brought them out of Egypt in that month: so that this month began the year, as to all the solemnities they observed to the honour of God—although he preserved the original order of the months as to selling and buying and other ordinary affairs.' The Mishna (*Rosh Hashana* i. 1) enumerates four new years—Nisan (for kings and the cycle of feasts), Elul (for the tithes of cattle), Tishri (for years, as at present in the Jewish Calendar, sabbatical years and jubilees, and other agricultural purposes), Shebat (for trees). 'During the Exile,' says Benzinger, 'the new year seems to have been calculated not on the first but on the 10th of the 7th month (Lv 25[9], Ezk 40), only later was the great Atonement festival fixed on this day.' But it may be doubted whether the 10th of the 7th month was ever the beginning of a calendar year. But the 1st of Tishri with its rite of blowing the *shōphār* (see TRUMPET), and its later spiritual associations as a day of penitence, acquired great importance in the Jewish Calendar. (On the history of the New Year Liturgy see Friedmann in *JQR*, vol. i. p. 62 f.).

Divisions of the Year.—The regular Hebrew word for 'year' is שָׁנָה (Assyr. *sanu* 'to change,' whence *sattu* 'year'). In Daniel עִדָּן means both an indefinite period of time (like the Heb. עֵת), and more definitely a *year* (Dn 4 and 7[25]). Buhl compares a similar definition of meaning in the case of the word χρόνος, which in new Greek signifies 'year.' In Daniel, again (12[7]), we meet with a use of מוֹעֵד for 'year,' though elsewhere the word more generally denotes an appointed or recurrent period such as the feast (exclusive of the Sabbath and New Moon). Another word זְמָן, which occurs only in late Hebrew (Ec 3[1], Neh 2[6]) as a generic term for 'time,' had already acquired in canonical Hebrew (Est 9[27. 31]) the sense of season or festival, which it conveyed in Rabbinic Hebrew.* The ordinary seasons of the year were also distinguished in Hebrew as קַיִץ 'summer' and חֹרֶף 'autumn and winter.' August is usually the warmest month, February the coldest in Judæa. The חֹרֶף was further divided into two parts (Dt 11[14]) by the יוֹרֶה 'earlier rain' (October) and מַלְקוֹשׁ 'the later rain' (spring equinox). Generic terms for the differences of temperature were קֹר 'cold' (Gn 8[22]) and חֹם 'heat' (*ib.*). The sowing period was known as זֶרַע (*ib.*), the harvest-time as קָצִיר (mid-April till mid-June, the barley and wheat-harvest being meant).

---

* The Babylonian year was divided into *reš satti* 'beginning of the year,' *misil satti* 'the middle of the year,' and *kit satti* 'end of the year.' Two of the terms are paralleled in Hebrew.

iii. MONTHS.—The Hebrew months have always been lunar, and extended from one new moon to another. The oldest Semitic word for month was *archu* (יֶרַח), which properly signifies the 'beginning of the month' (Muss-Arnolt, p. 73. Much of the following information is derived from this excellent authority). The same word appears in Aramæan (Ezr 6^{15}, Dn 4^{26}), Phœnician, and Ethiopic. In Hebrew the word is common in the pre-exilic passages, but it became entirely superseded by חֹדֶשׁ. This last word, properly 'new-moon' (which see), is employed (like the Assyrian *iddisu*) only for the beginning of the month, by other Semitic peoples; its use for 'month' was an innovation of the Israelites.

There are three sets of terms to distinguish the biblical months—(*a*) old (Canaanite) names, (*b*) numbers, and (*c*) the Babylonian names.

(*a*) Of the first class only four have survived: these names are all derived from climatic and economic conditions. Similarly, the earliest epithets of the months among the Babylonians are connected with agriculture and the pastoral life.

Abib (אָבִיב month of the ripening ears, Ex 13^4 etc.), subsequently the 1st month.
Ziv (זִו month of flowers, 1 K 6^1), subsequently the 2nd month.
Ethanim (אֵתָנִים month of perennial streams, 1 K 8^2), subsequently the 7th month.
Bul (בּוּל rain month, 1 K 6^{38}), subsequently the 8th month.

The last two names also occur in Phœnician inscriptions; *Ethanim* having been found in Cyprus (middle of 4th cent. B.C.) and *Bul* in Sidon (4th cent. B.C.; see Driver in Hogarth's *Authority and Archæology*, pp. 137, 138, and Buhl-Gesenius, *s.v.*).

(*b*) In the time of the Exile these old Canaanite names were dropped, and the months were distinguished by numerals, as in parts of Jeremiah, Ezekiel, and Kings (in the latter the old names are explained by numbers, 1 K $6^{1.\,38}$ 8^2), lastly in Haggai (1^1 2^1) and Zechariah (1^7 7^1). See Nowack, *Heb. Archäologie*, i. p. 217.

(*c*) From the Exile the new Babylonian names begin to find a definite place in the Hebrew Calendar. The proofs for the Babylonian origin of these names may be found in Muss-Arnolt, in Schrader, *COT* (ii. 69). Cf. Schürer, Appendix iii. Of the twelve names only seven occur in Scripture, but the whole twelve appear in the *Megillath Ta'anith*, which in its original form dates before the Christian era.

(1) **Nisan** נִיסָן, Ξανθικός, **Xanthicus**, March–April.

The English equivalents are inexact: Nisan mostly corresponds to part of March and part of April. Nisan occurs in Neh 2^1, Est 3^7. The Gr. form Νισάν (Νεισά[ν]) occurs in 1 Es 5^6, Ad. Est 1^1, and often in Josephus. The Macedonian *Xanthicus* is found in 2 Mac $11^{30.\,33.\,38}$. The first month in the Babylonian year is *ni-sa-a(n)-nu*, from *nesu* (Heb. נסע) to 'move,' or 'start.' It is the opening month of the ecclesiastical year. That the vernal equinox occurred in Nisan is attested by Josephus (*Ant.* I. x. 5) and also in cuneiform literature (Muss-Arnolt, p. 77). Nisan corresponded to the first zodiacal sign (Aries) in which the vernal equinox fell. That Josephus frequently uses the Macedonian names as equivalent to the Heb.-Bab. does not imply that he thought that the two series of months began on identical days.*

(2) **Iyyar** אִיָּר, 'Αρτεμίσιος, April–May.

Not named in Scripture, but found in Mishna, *Rosh Hashana* i. 3; Jos. *Ant.* VIII. iii. 1 ('Ιάρ), *Hypomnest.* 27 (Εἴαρ); Bab. *a-a-ru*. Derivation uncertain; perhaps connected with אור 'to be bright' (so Delitzsch), or איר 'to send forth, open, germinate,' whence ARU 'flower' (so Muss-Arnolt). This would make the meaning equivalent to *Ziv* and April (*aperire*). The *Megillath Ta'anith* identifies Iyyar with the 2nd month mentioned in 1 Mac 13^{51}.

(3) **Sivan** סִיוָן, Δαίσιος, May–June.

Est 8^9; Mishna, *Sheḳalim* iii. 1, etc. Gr. Σιουάν (Bar 1^8), also Σειούαλ; Bab. *si-ma(n)-nu*, pronounced later *si-vanu*. Delitzsch (*Hebrew and Assyrian*, p. 16) derives from *samu* 'to appoint' (שׂים), Haupt from *asamu* 'to mark.'

(4) **Tammuz** תַּמּוּז, Πάνεμος, June–July.

The word but not the month mentioned in Bible (Ezk 8^{14}). Mishna, *Ta'anith* iv. 5; Bab. *du-uzu*. LXX has Θαμμούζ.

(5) **Ab** אָב, Λῷος, July–August.

Not mentioned in Bible. Mishna, *Pesachim* iv. 5, etc.; Bab. *a-bu*; Jos. *Ant.* IV. iv. 7, 'Αβά [Niese reads Σαβά]. Delitzsch derives from Assyr. *abu* 'hostile' (from excessive heat of month), Haupt from *abe* 'bulrushes' (cf. Job 9^{26} אבה), the season in which bulrushes were cut for building purposes. This, with two other months, was consecrated by the Babylonians to building.

(6) **Elul** אֱלוּל, Γορπιαῖος, August–September.

Neh 6^{15}; Mishna, *Sheḳalim* iii. 1, etc.; 'Ελούλ, 1 Mac 14^{27}; Bab. *ululu*. Perhaps from ילל (*alalu*) 'to shout for joy,' inasmuch as the month represented the resurrection of Tammuz-Adonis (Muss-Arnolt).

(7) **Tishri** תִּשְׁרִי, 'Υπερβερεταῖος, September–October.

Not named in Scripture. Mishna, *Sheḳalim* iii. 1, etc.; Gr. Θισρί; Jos. *Ant.* VIII. iv. 1 [as amended by Hudson; Niese reads 'Αθύρει]; Bab. *tish-ri-tum*. From *surru* 'begin,' 'dedicate.' The Assyrians, like the Jews, had two new year days—Nisan for the sacred year, Tishri for the civil. The Seleucidean year began in Nisan, the Arsacidan with Tishri (Epping and Strassmaier, *Astronomisches aus Babylon*, p. 177). The month was dedicated to the sun-god, and Halévy (*Mélanges de critique et d'histoire*, p. 178) conjectures that this originated the later Jewish association of Tishri with the Creation and the Day of Judgment.

(8) **Marcheshvan** מַרְחֶשְׁוָן, Δῖος, October–November.

Not named in Scripture. Mishna, *Ta'anith* i. 3, etc.; Jos. Μαρσουάνης; Bab. *arachsamna* ('eighth month')=יֶרַח שְׁמִינִי. Original form probably ורחשמן, whence מרחשון (ו and מ being often interchanged in later Babylonian). Modern Hebrew regarded Heshvan as the name of the month (*mar* being taken to mean 'drop,' 'rainy season'). Dillmann and Stade see in the Bab. name of this month a relic of the oldest method of counting the months by numbers and not by names. See Siegfried-Stade, *Dict. s.v.* ירח.

(9) **Kislev** כִּסְלֵו, 'Απελλαῖος, November–December.

Zec 7^1, Neh 1^1; Mishna, *Rosh Hashana* i. 3, etc.; Gr. Χασελεῦ (1 Mac 1^{54} etc.; Jos. *Ant.* XII. v. 4, χασλευ); in Palmyrene Inscriptions כסלול; Bab. *kislimu*. Derivation uncertain.

(10) **Tebeth** טֵבֵת, Αὐδυναῖος, December–January.

Est 2^{16}; Mishna, *Ta'anith* iv. 5, etc.; Jos. Τέβεθος (*Ant.* XI. v. 4, but see Niese); Bab. *tebetum*. *Tebu* (Heb. טבע)='to sink,' 'dip.' The rainy season begins in 10th month.

(11) **Shebat** שְׁבָט, Περίτιος, January–February.

Zec 1^7; Mishna, *Rosh Hashana* i. 1; Gr. Σαβάτ (1 Mac 16^{14}); Bab. *sha-ba-tu*.

(12) **Adar** אֲדָר, Δύστρος, February–March.

Freq. in Esth., Ezr 6^{15}; Mishna, *Sheḳalim* i.1, etc.; 'Αδάρ, 1 Mac 7^{43}; Jos. *Ant.* IV. viii. 49, etc.; Bab. *addaru*. Delitzsch derives from a root 'to be dark' in contrast to *aru*. It was, says Muss-Arnolt, the name of this month that induced former investigators to derive the Heb. names from Persian, for Adar is also a Persian month name. (See Benfey, *Monatsnamen einiger alter Völker*). The intercalated month was a second Adar (Heb. אֲדָר שֵׁנִי, *Megilla* i. 4, or וַאֲדָר).

iv. WEEKS AND DAYS.—The week of seven days (שָׁבוּעַ) is an obvious derivative of the lunar month, for the week corresponds roughly to the phases of the moon. The discrepancy would not affect the Hebrew week, for there is no indication that the new moon in historical times coincided with the beginning of the week. The Assyrians and Babylonians knew the seven-day week, and the week began with the moon, whereas the Hebrew week ran regularly through the whole year, especially when the weekly Sabbath replaced the new moon in importance as a sacred day. Nowack (ii. 215) unnecessarily assumes that the Israelites probably borrowed the week from the Babylonians. He, with others (see Holzinger on Ex 12^3), detects traces of an older Hebrew week of *ten* days (Gn 24^{55}, Ex 12^{3}), but this is very doubtful. It would perhaps fit in with the idea of a year of 360 days (traces of a thirty-day month being detected by Nowack in Nu 20^{29}, Dt 34^{8}, cf. 21^{13}, as well as in the Flood narrative). Driver holds that 'it is difficult not to agree with Schrader, Sayce, and other Assyriologists in regarding the week of seven days, ended by a Sabbath, as an institution of Babylonian origin' (*op. cit.* p. 18). The week thus is presupposed by the Creation narrative, and is not derived from it. 'In other words, the week determined the "days" of Creation, not the days of Creation the week' (*ib.*). This may well be, and yet the Hebrew week not necessarily a derivative from Babylon. (Jastrow has shown that the Hebrew Creation narrative is more independent of Babylonian parallels than has usually been supposed. *JQR* xiii. p. 620 ff.). See, further, on this subject, Jensen in *Ztschr. f. deutsche Wortforschung*, Sept. 1900, p. 153 ff.; and art. SABBATH above, p. 319.

---

* The **Dioscorinthius** of 2 Mac 11^{21} is quite obscure (cf. note in RVm). It is barely probable that the author wrote *Dioscurus* (the reading of O.L.), the name of the third Cretan month (see Kamphausen's note in Kautzsch's *Apokr. ad loc.*).

In the NT (as in neo-Hebrew) the week is termed *σάββατον*, and the days of the week were numbered, not named. The eve of the Sabbath (Friday) was called *παρασκευή* (Mt 27^{62}, Lk 23^{54}, Jn $19^{31.42}$; *πρόσαββατον* Mk 15^{42}, Jth 8^{6}). Mondays and Thursdays acquired special importance in the later Jewish life, for the public reading of the Law and the holding of law-courts occurred on those days (see Schürer, ii. 1–83, 190). Schwarz (*Jüdische Kalender*, p. 7) suggests that the numbering of the Christian *Feriæ* was derived from the Heb. usage רִאשׁוֹן שֵׁנִי שְׁלִישִׁי בַּשַּׁבָּת. See, however, Ideler, *Handbuch*, ii. 180.

The Babylonians divided the day (יוֹם) into equal parts by sun-watches, and were also acquainted with the 60 system (minutes and seconds). The Syrian peoples may have acquired similar knowledge from the Babylonians, but there is no trace of this among the Israelites in the pre-exilic period. There was an important difference between the Israelites and Babylonians, for, while the former began the day at sunset, the latter began the day with the morning. There are, according to most modern commentators, indications of the Babylonian reckoning in the first chapter of Genesis and, according to Dillmann, in Ex $12^{6.18}$, Lv 23^{32}. The chaotic darkness (Gn 1^{5}) lies behind the reckoning; with the creation of light began the first morning, and the first day extended till the next morning (so Dillmann). The reckoning from evening to evening became the exclusive Jewish method 'with the triumph of the Law.' The system is also met with among the Arabs, Athenians, and Gauls (cf. Pliny, *HN* ii. 79). The evening-morning day was the עֶרֶב בֹּקֶר of Dn 8^{14} (though Driver and others explain the phrase in Daniel to mean half-days). Cf. the *νυχθήμερον* of 2 Co 11^{25}. There was no exact division of the day into parts before the Exile, the natural order being followed: עֶרֶב 'evening,' בֹּקֶר 'morning,' and צָהֳרַיִם 'mid-day.' The day *declined* (Jg 19^{8}), perhaps with reference to shadows on a sun-dial (so Moore, but cf. Jer 6^{4}; see DIAL), the evening *turned in* פְּנוֹת עֶרֶב (Gn 24^{63}); there were also terms for the evening twilight when the cool sea-breeze blew (נֶשֶׁף Job 24^{15}, cf. לְרוּחַ הַיּוֹם Gn 3^{8}); the dawn ascended (עָלָה הַשַּׁחַר Gn 19^{15} 32^{24}); compare such expressions as 'when the day was hot' (חֹם הַיּוֹם Gn 18^{1}, cf. 1 S 11^{9}). In neo-Hebrew there were other phrases of a similar nature (Mishna, *Berakhoth* i.). We meet in the Bible with parts of the day described as the time when certain occupations were usual; as the time when girls were accustomed to fetch the water required for domestic use (Gn 24^{11}); 'while the day was still great' (Gn 29^{7}) is another similar phrase, but it indicates an earlier point in the afternoon; the time of bringing the meal-offering (1 K 18^{29}) and of the evening sacrifice (Ezr 9^{4}, Dn 9^{21}). These last two refer to the same point of time. יוֹם sometimes means 'day' in contradistinction to 'night' (לַיְלָה) Gn 29^{7}, sometimes it represents the civil day of 24 hours, including night (Gn 1^{5} etc.). The phrase בֵּין הָעַרְבַּיִם 'between the two evenings' (Ex 16^{12} etc.), the time at which the paschal lamb and (Ex 29^{39} etc.) the daily evening offering were brought, represents some period in the late afternoon.

The Hebrews also had terms for the days in relation to one another—אֶמֶשׁ 'the previous evening,' תְּמוֹל or אֶתְמוֹל 'yesterday,' מָחָר 'to-morrow,' שִׁלְשׁוֹם 'the day before yesterday.' But they did not divide the days into hours until late; in fact, the custom long persisted of counting by portions of the day. The term רֶגַע (in derivation = 'moment,' *movimentum*) meant an 'instant,' or a longer, but still very brief, interval of time, the chief idea being suddenness or rapid passage. שָׁעָה 'hour' is Aramaic (Dn 3^{6}), and is common in Syr. and in later Hebrew. 'Originally it denoted any small interval of time, and was only gradually fixed to what we call an "hour"' (Driver). The hours of the Mishna differed in duration, as they were reckoned as $\frac{1}{12}$th of the actual day. Earlier than the division of the day into hours was the division of the night into three **watches** (אַשְׁמֹרֶת, אַשְׁמוּרָה), La 2^{19}, Jg 7^{19}, Ex 14^{24}, 1 S 11^{11}. The threefold division continued into post-Roman times, 1st cent. (*Berakhoth* 3*b*); but the Roman division into four watches was also known (*ib.*; cf. Mk 13^{35}, where all four watches are referred to: 'in the evening' *ὀψέ*, 'at midnight' *μεσονύκτιον*, 'at cock-crowing' *ἀλεκτροφωνίας*, or 'in the morning' *πρωΐ*), and these extended from six to six o'clock. **Cock-crow** is an interesting note of time (Lk 22^{60}), to which considerable importance was attached by Rabbinical Jews. There is still a morning benediction in the Jewish liturgy to be recited at cock-crow.

I. ABRAHAMS.

TIMNA (תִּמְנַע, Θαμνά).—Concubine of Eliphaz, Esau's son, and mother of Amaleḳ, Gn 36^{12}. The branch of the Amaleḳites in question was closely associated with the Ḥorites, Gn $36^{22.40}$, 1 Ch $1^{39.51}$. In all these passages the spelling should be Timna, the Heb. being everywhere תִּמְנַע. RV has inadvertently followed AV spelling **Timnah** in Gn 36^{40}. See TIMNAH, No. **3.**

TIMNAH (תִּמְנָה 'lot,' 'portion').—**1.** A place on the N. boundary of Judah, situated between Beth-shemesh and 'the side of Ekron' (Jos 15^{10} B λίβα, A νότον, *Thamna*). It was a Philistine town (Jg 14^{1} Θαμναθά, *Thamnatha*), within the territory of Dan (Jos 19^{43} B Θαμναθά, A Θαμνά, *Themnatha*), to which Samson went down from Zorah to take his wife (Jg $14^{1.2.5}$; Jos. *Ant.* V. viii. 5, 6), whose father is called the **Timnite** in Jg 15^{6}. There Samson slew the young lion, and propounded his well-known riddle at the marriage-feast. Timnah was taken by the Philistines during the reign of Ahaz, not long after they had been completely subdued by Uzziah (2 Ch 28^{18} Θαμνά, *Thamna*); and later it was occupied by Sennacherib after he had defeated the Egyptians at Elteke (*Altaku*). It is called in the inscriptions *Tamnâ*, and is mentioned as lying between Elteke and Ekron (Schrader, *KAT*² 170).

Timnah retains its old name almost unchanged, and is now *Tibneh*, on the S. side of the valley of Sorek (*Wâdy es-Surar*) and to the W. of Beth-shemesh (*'Ain Shems*). The site is deserted, but is marked by ruined walls and rock-hewn caves, cisterns, and wine-presses. On the N. side of the ruins is a spring. Vineyards and olive groves still cover the hill-slopes between *Tibneh* and *Wâdy es-Surar* (*PEF Mem.* ii. 417, 441).

2. (B Θαμναθά, A Θαμνά; *Thamna*) A town in the hill-country of Judah, mentioned with Cain and Gibeah (Jos 15[57]). It is now *Tibna* near *Jebʿa* (Gibeah), and about 8 miles west of Bethlehem. The site is marked by a few foundations only, and is reached by a path from *Beit Nettif*, about $2\frac{3}{4}$ miles to the west (*PEF Mem.* iii. 53). This is probably the Timnah (Gn 38[12. 13. 14], Θαμνά, *Thamnatha*), to which Judah 'went up' to visit his sheep-shearers. The narrative gives no other indication of position.

3. (תִּמְנָע; Θαμνά; *Thamna*) The name of one of the 'dukes' of Edom, and probably also of a town or district (Gn 36[40], 1 Ch 1[51]; cf. Gn 36[12. 22], 1 Ch 1[39]). See also art. TIMNA. Eusebius and Jerome (*Onom.*) identify it with *Thamna*, a town of Edom in their day. C. W. WILSON.

TIMNATH (AV Thamnatha; Θαμνάθα; *Thamnata*).—One of the strong cities in Judæa built by Bacchides (1 Mac 9[50]). The name occurs between Bethel and Pharathon. Pharathon may perhaps be a corruption of Ephraim (*et-Taiyibeh*), and in this case Timnath would be Thamna, now *Tibneh*, on the Roman road from Antipatris to Jerusalem, which Josephus says was the chief town of a toparchy (*BJ* III. iii. 5). G. A. Smith (*HGHL* 355 n.) considers that the two names Timnath and Pharathon should not be separated, and that they represent one place,—Pharathon being *Wâdy Farʿah*, and Timnath being recognized in the name *Tammûn*, so common now at the head of *Wâdy Farʿah*. But this position is too far N. to have been in Judæa. C. W. WILSON.

TIMNATH-HERES (תִּמְנַת חֶרֶס 'portion of the sun'; B Θαμναθάρες, A Θαμναθάρ· εως; *Thamnath Sare*).—The name of Joshua's inheritance and burial-place (Jg 2[9]), which is called **Timnath-serah** in Jos 19[50] and 24[30]. *Ḥereṣ* is supposed by some commentators (Ewald, Bertheau, Mühlau, etc.) to be a very early copyist's error for *Ṣeraḥ*. On the other hand, it is held to be the correct form of the name by the Jews and Samaritans, who identify the place with *Kefr Ḥâris.** But see TIMNATH-SERAH.

C. W. WILSON.

TIMNATH-SERAH (תִּמְנַת סֶרַח; B Θαμαρχάρης, Θαμναθασαχαρά, A Θαμναθσαρά, Θαμνασαχάρ; *Thamnath Seraa, Thamnath Sare*).—The place given by the children of Israel to Joshua as an inheritance, and in the border of which he was buried. It was in the hill-country of Ephraim, and on the north side of the mountain of Gaash (Jos 19[50] 24[30]). In Jg 2[9] the name is written **Timnath-Heres** (see preceding art.). According to Josephus, Joshua was buried at Thamna (Θαμνά), a city of Ephraim (*Ant.* v. i. 29). This is apparently identical with Thamna, the chief town of a toparchy (*BJ* III. iii. 5), which adjoined the toparchy of Lydda (*Onom.*), and was reduced to subjection by Vespasian before he marched on Lydda and Jamnia (*BJ* IV. viii. 1). Thamna, now *Tibneh*, occupied an important position on the road from Jerus. to Antipatris and Cæsarea. It was taken by Cassius (*Ant.* XIV. xi. 2), and was occupied by John the Essene, at the commencement of the Jewish war (*BJ* II. xx. 4). Eusebius and Jerome (*Onom. s.* Θαμναθσαρά) say that Timnath-ṣeraḥ, the town of Joshua, where his tomb was shown, was in the hill-country, and that it was in the territory of Dan. They identified it with the *Thamna* to which Judah went up to visit his sheep-shearers (Gn 38[12]), and placed it in Dan, or Judah, on the border of Lydda, and on the road from that place to Jerus. (*Onom.* Θαμνά). Elsewhere (*s.* Γαάς) they state that Joshua's tomb was shown near Thamna, on the N. side of Gaas, a mountain of Ephraim. Jerome takes St. Paula to Timnath-ṣeraḥ after leaving Bethel, and before reaching Shiloh (*Ep. Paul.* xv.). The place referred to by Eusebius and Jerome is *Tibneh.*

Two sites have been proposed for Timnath-ṣeraḥ, and their claims may be thus stated—

(1) *Tibneh* is an old Tibnath, and the position, guarding an approach to the interior of the country, is a suitable one for the home of the great Jewish warrior. Josephus probably, and early Christian tradition certainly, identifies it with the city of Joshua. In the north face of a hill to the S. of the ruins there is a remarkable group of rock-hewn tombs; a great oak tree near the tomb is called *Sheikh et-Teim*, 'the chief servant of God'; and about 3 miles to the E. is *Kefr Ishuʿa*, or Joshua's village (*PEF Mem.* ii. 374–378; Guérin, *Samarie*, ii. 89, etc.). The identification with *Tibneh* is accepted by most moderns, *e.g.* Dillm. (on Jos 19[50]), Moore, Mühlau (in Riehm's *HWB*), Buhl (170).

(2) *Kefr Ḥâris*, about 9 miles south of *Nâblus*, is, according to existing Samaritan tradition, the burial-place of Joshua and Caleb. It is also the *Kefr Cheres* of the Jewish pilgrims, Rabbi Jacob (A.D. 1258), hap-Parchi, etc., which Schwarz (151) places S. of *Nâblus*. To the E. of the village there are two sacred places (*mukâms*)—one named *Neby Kifl*, the 'Prophet of the Division by Lot,' the other *Neby Kulda*, or *Kunda*. Conder identifies the first with Joshua, the second he takes to be a corruption of Caleb (*PEF Mem.* ii. 378). If the identification with *Kefr Ḥâris* be accepted, it must be supposed that the name of the place, *Timnath*, has disappeared whilst its distinctive title, *Ḥereṣ* or *Ṣeraḥ*, has survived. C. W. WILSON.

TIMON (Τίμων).—One of the seven elected (Ac 6[5]) to assist the apostles by 'serving tables.' Later legends about him will be found in the *Acta Sanctorum* under April 19, when he was commemorated.

TIMOTHEUS (Τιμόθεος).—**1.** A leader of the Ammonites who was defeated in many battles by Judas Maccabæus (1 Mac 5[6ff. 34ff.], 2 Mac 8[30] 9[3] 10[24-37]). According to 2 Mac 10[37] he was slain at the capture of Gazara by the forces of Judas. For the unchronological setting of the narrative in 2 Mac. see vol. iii. p. 191^{b}. 2. The AV form of the name TIMOTHY everywhere in NT except 2 Co 1[1], 1 Ti 1[2], 2 Ti 1[2], Philem [1], He 13[23].

TIMOTHY (Τιμόθεος), St. Paul's young and trusted companion, was a native of Lystra, or possibly of Derbe (Ac 16[1] 20[4], where see Blass); the son of a Greek father and of a mother who was a Jewess at least by religion (2 Ti 1[5]) and probably also by birth. The son of a mixed marriage, he received a name which was fairly common in Greek (1 Mac 5[6ff.], 2 Mac 8[30]), but which by its significance would be acceptable to a religious Jewess; he was trained by his mother in the OT Scriptures (2 Ti 3[15]), but was not circumcised. When St. Paul reached Lystra on his First Missionary Journey, the young Timothy accepted Christianity, being converted by St. Paul (1 Co 4[14-17]), and probably was a witness of his sufferings at this time (2 Ti 3[10. 11], cf. Ac 14[22]). By the time of the Second Missionary Journey he was a disciple well known to the Christians both in Lystra and in Iconium: the mention of his mother first, the description of her in some MSS of the Western text as 'a widow,' and perhaps the use of ὑπῆρχεν (Ac 16[3]), make it probable that his father was already dead.

St. Paul was attracted by Timothy, and wished to have him as a travel-companion to take the place of John Mark, if not of Barnabas. If we may refer to this occasion the language of 1 Ti 1^{18} 4^{14}, 2 Ti 1^{6}, St. Paul was not left unaided in this decision. Prophetic utterances, perhaps those of Silas, who was himself a prophet (Ac 15^{32}), led Paul to him: the local presbyters laid their hands upon him (cf. Ac 13^{3}); Paul joined in the formal setting apart of 'his son' for the task; he himself witnessed a noble confession in their presence (1 Ti 6^{13}); and thus received a formal ministry (2 Ti 4^{6}, Ac 19^{22}), perhaps with the title of 'evangelist' (2 Ti 4^{5}), but in 1 Th 2^{6} he is loosely classed with Paul and Silas as an 'apostle.' In one respect Timothy was not fitted for the task: St. Paul's plan was to preach first to the Jews, and they would be offended by the presence of one who was half-Jew by birth and yet never circumcised, so St. Paul took him and perhaps with his own hand circumcised him (cf. Hort, *Judaistic Christianity*, pp. 84–87; *The Christian Ecclesia*, pp. 178–188; and, as against the historical character of this incident, Holtzmann, *Die Pastoral-Briefe*, pp. 67–78). Timothy now became a loyal companion, slaving for St. Paul as a son for a father (Ph 2^{22}); he took an active part in preaching at Thessalonica (1 Th 1. 2 *passim*); accompanied Paul to Berœa, and stayed there when St. Paul was obliged to withdraw to Athens, but at the apostle's request followed him speedily thither. Thence he was despatched at once on an important mission to strengthen the Thessalonians who were suffering under persecution, and on returning with his report found St. Paul already removed to Corinth. His presence and the news he brought gave St. Paul new life, for Timothy joined him in preaching Jesus Christ the Son of God (2 Co 1^{19}): he was associated with Paul and Silvanus in both letters to the Thessalonians, and was perhaps the scribe in each case, though there is not sufficient ground for accepting Spitta's theory (*zur Gesch. des Urchristenthums*, i. p. 110) that 2 Thess. was his composition. After this time he is not mentioned again until we find him with Paul at Ephesus on the Third Missionary Journey (Ac 19^{22}); he may have been with him all the time, or may have stayed at Ephesus, a stay which would have qualified him for his later work there. On this occasion he was sent again on a mission—this time with Erastus and apparently other brethren (1 Co 16^{11}) to Macedonia and thence to Corinth (1 Co 4^{17}). The mission took place shortly before the writing of 1 Cor. (4^{17}); its purpose was to remind the Corinthians of St. Paul's 'ways in Christ'; St. Paul was anxious about the result; he was afraid that Timothy would be timid, and that others might set him at nought, and he bespoke a kindly reception for him (1 Co $16^{10.11}$). The effect of his mission was not successful; he brought back news which caused Paul great anxiety and necessitated a mission of Titus; it is possible that a personal attack was made on Timothy, and that he is ὁ ἀδικηθεὶς of 2 Co 7^{12} in whose interests Paul had demanded sharp punishment on the offender (see PAUL, vol. iii. p. 711^{b}). However this may be, he followed Paul to Macedonia, was associated with him there in the writing of 2 Cor., and was with him in Corinth as an active worker (ὁ συνεργός μου) who sends greeting to the Christians at Rome (Ro 16^{21}, if this chapter belongs to this date). When Paul started on his last journey to Jerusalem, Timothy was one of his party, and was with him at Troas (Ac $20^{4.5}$); but he is not mentioned again in the Acts, though he probably completed the journey to Jerusalem. He must also have joined Paul in his imprisonment at Rome, as he is associated with him in writing Col. (1^{1}), Philemon (v.^{1}), and Philippians (1^{1}); and St. Paul contemplates sending him on a mission to the Philippian Church (2^{19-24}). Of this no more is heard; but on the supposition of the genuineness of the Pastoral Epistles, Paul when released joined Timothy in the East, and while on a journey to Macedonia left him in charge of the Church of Ephesus (1 Ti 1^{3}). His task was to be the representative of the absent apostle, who was hoping to return shortly; he was to check false teaching, to order public worship, to regulate the requisite qualifications for the ministry, and to exercise discipline over all orders in the Church. It may be that for this task he was formally set apart by laying on of hands both of the apostle and of the presbyters (1 Ti 1^{18} 4^{14}, 2 Ti 1^{6}, but see above). As the apostle might be delayed from returning, he wrote 1 Timothy to lay stress on the points of primary importance and to strengthen and embolden Timothy. Not long thereafter Paul was arrested a second time and carried to Rome; thence he wrote 2 Timothy, begging Timothy not to be ashamed of the gospel, but to come with Mark to help him in his imprisonment, and, before he leaves, to secure the transmission of true teaching by ordaining trustworthy ministers. It may have been on this visit to Rome that Timothy was himself arrested on the occasion on which the writer of the Ep. to the Hebrews mentions his release (He 13^{23}).

---

* It is not improbable that by an intentional metathesis, to avoid anything that savoured of idolatry, Timnath-*ḥeres*, '*portion of the sun*,' was changed into Timnath-*ṣeraḥ*. See HERES, *ad fin.*; and cf. Moore on Jg 2[9].

Of Timothy's subsequent history little can be said with certainty. He *may* be [but this is very unlikely] the 'angel' of the Church of Ephesus addressed in Rev 2^{1-7}; he may be one of the sources from which St. Luke gained information for the composition of the Acts, though there is no ground for regarding him as the author of the book or of the 'We' sections (see Zahn, *Einleitung*, ii. p. 424). Church tradition regarded him as having continued bishop of Ephesus until his death (*Const. Apostol.* vii. 46; Euseb. iii. 46), as having been martyred in a popular tumult when he tried to dissuade the people from taking part in the violent and coarse orgies of the καταγώγιον (a festival of which there is no mention elsewhere), and his bones are said to have been transferred to Constantinople by Constantius (Polycrates and Simeon Metaphrastes quoted in the *Acta Sanctorum*, iii. pp. 176–183, *Menæon*, ad Jan. 22; Lipsius, *Die Apocryphen Apostelgesch.* ii. 2, 372–400).

Though Titus is a stronger man and more able to deal with crises, yet Paul's love and affection goes out more lavishly to the younger Timothy, whose character is clearly marked. He is affectionate to tears (2 Ti 1^{4}), delicate and often ill (1 Ti 5^{23}), timid (1 Co 16^{10}), shrinking from a proper assertion of his own authority (1 Ti 4^{12}), needing to be warned against youthful lusts (2 Ti 2^{22}), to be encouraged to face shame for Christ's sake (2 Ti 1^{8}). Yet he has been Paul's loyal follower and imitator from the first (2 Ti 3^{10}); he is his 'genuine' son (1 Ti 1^{2}), his loved son (2 Ti 1^{2}), his son loved and faithful in the Lord (1 Co 4^{17}); of one mind with himself (Ph 2^{20}), 'working the Lord's work as I do' (1 Co 16^{10}); 'my fellow-worker' (Ro 16^{21}); 'our brother and God's minister' (1 Th 3^{2}); 'the slave of Jesus Christ' (Ph 1^{1}), who 'seeks the things of Jesus Christ' (*ib.* 2^{21}).

Timothy's death is commemorated in the Greek and Armenian Churches on Jan. 22, in the Coptic Church on Jan. 23, in the Latin and Maronite Churches on Jan. 24, though the earlier Latin calendars place it on Sept. 27, perhaps as following the day of the commemoration of St. John, who was thought of as his predecessor in the see of Ephesus (Lipsius, *l.c.* p. 392; Nilles, *Kalendarium Manuale utriusque Ecclesiæ*, Innsbruck, 1896).

TIMOTHY, FIRST EPISTLE TO.—

i. Historical Situation.
ii. Analysis.
iii. Literary Dependence.
iv. Situation implied at Ephesus: (*a*) False teaching; (*b*) Church organization
v. Authorship.
vi. Integrity.
vii. Value.
Literature.

i. HISTORICAL SITUATION. — St. Paul had recently been with Timothy: either they had been together in Ephesus, or Timothy had come from

Ephesus to meet Paul at some point on his journey to Macedonia (cf. the situation of Ac 20^{17} with 1^{3}). St. Paul was bound to go forward, but hoped to return shortly: yet he was so much impressed with the dangerous tendencies of some false teachers at Ephesus, who were tempting the brethren there from walking in 'sober gospel ways,' that he pressed Timothy to stay on in order to counteract them.

Some time elapsed. Paul may have heard that all was not prospering at Ephesus, possibly through a letter from Timothy himself, or his natural anxiety (cf. 1 Thess.) may have prompted him to write. Timothy was, indeed, a 'genuine son'; he had witnessed a good confession in the past, prophecies had pointed him out for the task, he had received a special gift for his ministry by the laying on of hands ($1^{2.\,18}$ 4^{14} 6^{12}); yet he was naturally timid, he was young (4^{12}), he had frequent attacks of illness (5^{23}), he might be misled (5^{7} 6^{11}); St. Paul's own return might be delayed (3^{15}): so he writes this letter to press his original charge more solemnly on Timothy, to encourage him in his work, to guide him in his teaching and dealing with various classes in the Church, and to regulate certain points of Church order, which needed organization without delay.

The central purpose is summed up in 3^{15} *ἵνα εἰδῇς πῶς δεῖ ἐν οἴκῳ θεοῦ ἀναστρέφεσθαι.*

The subjects are miscellaneous, and no very exact analysis can be expected; but three points stand out clearly in the structure. (1) There is a rough correspondence between the introductory and the concluding sections; cf. $1^{3\text{-}11}$ with $6^{3\text{-}10}$, $1^{18\text{-}20}$ with $6^{11\text{-}16.\,20.\,21}$. These form a framework for the central part. (2) The central part falls into clearly-marked halves, and the kernel of the whole Epistle, which divides these halves, is 3^{16}. The mystery of the Incarnate, Risen, and Ascended Lord is the fact on which Christian life and teaching is to be based, by which the Christian minister is to be inspired. (3) $6^{17\text{-}19}$ is a postscript, which would more naturally have been placed before or after $6^{1.\,2}$, but which was added as an after-thought, perhaps first suggested as needing treatment by $6^{9.\,10}$.

ii. ANALYSIS.—

$1^{1.\,2}$. Greeting.

Introductory, $1^{3\text{-}20}$.

(*a*) Reminder of the purpose for which Timothy was left at Ephesus (^{3}), description of the false teaching as speculative rather than ministering to the spiritual life ($^{4.\,5}$), as ignorantly taught by teachers who lay stress on law ($^{6.\,7}$) without knowing the true purpose of law and its relation to the gospel ($^{8\text{-}11}$).

(*b*) Personal expression of Paul's own gratitude to Christ Jesus, who had entrusted him with the ministry in spite of his past sin, as a proof of God's long-suffering and as an encouragement to others, for the gospel is summed up in the *faithful saying*, Χριστὸς Ἰησοῦς ἦλθεν εἰς τὸν κόσμον ἁμαρτωλοὺς σῶσαι ($^{12\text{-}17}$).

[This section is not only a personal digression called out by the thought of God's mercy to himself, but is intended to point Timothy to the same source of strength for his task (ἐνδυναμώσαντι, cf. II 2^{1}), and to fix his mind on the central message of the gospel as a gospel of salvation from sin (cf. ^{5} and ^{19})].

(*c*) Reiteration of the charge to Timothy, and enforcement of it by (1) a reminder of the past prophecies about him (^{18}); (2) a warning drawn from the fate of two false teachers ($^{19.\,20}$).

Formal advice, 2^{1}–6^{2}. A. *General*, 2^{1}–4^{5}. B. *Personal*, 4^{6}–6^{2}.

A. *General regulations of Church Life.*

I. *The proper scope of Public Prayer.*—This is to include all mankind, and specially rulers, that Christians may live a quiet life ($2^{1.\,2}$). This is based on God's desire to save all men ($^{3.\,4}$), which itself rests on (1) the unity of God (^{5}); (2) the nature of Christ representing both God and man (*ib.*); (3) the conscious purpose of Christ's death, who died for all, and commissioned Paul to teach this truth ($^{6.\,7}$).

II. *The position of men and women at Public Prayer.*—

Men are to lead the prayers (^{8});

Women to dress modestly and avoid ostentation ($^{9.\,10}$), to listen in silence and subjection ($^{11.\,12}$). This is based on the order of creation (^{13}), and woman's action at the Fall (^{14}). Yet woman too will share the Christian salvation, if she abide in a Christian life, for the *faithful saying* declares σωθήσεται διὰ τῆς τεκνογονίας (^{15}).

III. *Rules for the choice of ministers.*

(1) For the ἐπίσκοπος. His position is one of honour and of work (3^{1}), hence he must be tested as to his private character ($^{2.\,3}$); as to his power of ruling his own family well ($^{4.\,5}$); he must not be a new convert (^{6}), he must have won the respect of the heathen world (^{7}).

(2) For διάκονοι: their private character must be tested ($^{8\text{-}10}$), and their relation to their own family (^{12}). For their office, too, may be one of honour, and will raise their status in Christ's sight (^{14}).

(3) For γυναῖκες. They too, if in any official position, must have a high character (^{11}).

The purpose of all these regulations is to secure a right moral life and intercourse in God's family, because it is His Church, and the upholder of the Truth. This truth is summed up in the well-known hymn about Christ—

ἐφανερώθη ἐν σαρκί,
ἐδικαιώθη ἐν πνεύματι,
ὤφθη ἀγγέλοις,
ἐκηρύχθη ἐν ἔθνεσιν,
ἐπιστεύθη ἐν κόσμῳ,
ἀνελήμφθη ἐν δόξῃ.

Warning.—Yet there are symptoms of false teaching, that will contradict this great truth, depreciating marriage and food, though they are God's creatures, God's gifts, capable of sanctification, if received with prayer and thanksgiving ($4^{1\text{-}5}$).

[This section forms the transition from A to B. It stands in contrast to 3^{16} (4^{1} δὲ), but leads on to 4^{6} (ταῦτα)].

B. *Personal advice to Timothy.*

(*a*) *With regard to his own teaching and conduct.*—He is to be loyal to these truths (^{6}), to avoid foolish fables (^{7}), to exercise a true asceticism, such as will produce true holiness—for holiness, according to the *faithful saying*, ἐπαγγελίαν ἔχει ζωῆς τῆς νῦν καὶ τῆς μελλούσης,—and any effort is worth while, for our hope rests on a God of life, a Saviour of all mankind ($^{6\text{-}11}$). He is to assert himself, in spite of his youth; to be a model of Christian character; to attend to public reading, exhortation, teaching; to remember the gift given him for his task, and to throw his whole heart into his work ($^{12\text{-}16}$).

(*b*) *For his dealings with various classes of people.*

1. *Men*, old and young (5^{1}).—2. *Women*, old and young (^{2}).—3. *Widows*, who are to be supported by the Church, only if their own families cannot do so (^{3} and ^{4}), who are to lead a religious life of prayer ($^{5.\,6}$). There is to be kept a list of widows above 60 years of age, of good character; but younger widows are not to be enrolled upon it, but are to be encouraged to marry ($^{7\text{-}16}$).—4. *Presbyters:* the hard-working are to be rewarded ($^{17.\,18}$); the sinful to be formally tried and punished impartially ($^{19\text{-}21}$); he must not ordain (? remit penalties) hastily, lest he should be entangled in the sins of others (^{22}); but he must keep himself pure, though this need not imply total abstinence (^{23}), and he will need caution in judgment, whether for praise or blame ($^{24.\,25}$).—5. *Slaves*, whether under heathen or Christian masters ($6^{1.\,2}$).

Conclusion.

(*a*) Further denunciation of the false teachers, as conceited, ignorant, excited about questions which only produce envy and strife, striving to make money, knowing nothing of true Christian content, but ruining themselves through the desire of gain ($^{3\text{-}10} = 1^{3\text{-}10}$).

(*b*) Solemn appeal to Timothy to avoid such teaching: to aim at spiritual qualities, to lay hold of eternal life, remembering his past confession; and to hold fast Paul's commandment with the thought of the future appearance of the Lord ($^{11\text{-}14} = 1^{18\text{-}20}$).

Doxology ($^{15.\,16}$).

Postscript.—Further advice as to the teaching which Timothy is to give to the rich ($^{17\text{-}19}$).

Final appeal to Timothy to guard the deposit and to avoid false claims to knowledge ($^{20.\,21}$).

Salutation.

This analysis will have shown that the primary interest is ethical and spiritual. Morality, Salvation, Truth are the keynotes; the Church worship and Church ministries are to minister to them. The kernel is the great hymn of 3^{16}, but each section has some great doctrinal statement or some faithful saying embedded in it, which leads up to or away from that climax (1^{15} $2^{4\text{-}6}$ 2^{15} $4^{4.\,8\text{-}11}$ 6^{6}). The Epistle is full of the thought of the Salvation of all mankind, the consecration of all Creation.

At the same time it is personal throughout; and it is hard to believe that it was intended to be read out as it stands, in public; though a greeting to the whole Church is added (6^{21}), and though the substance of the teaching was meant to be conveyed to the Church (4^{11} 5^{7} $6^{2.\ 17}$), and though certain sections ($2^{1\text{-}15}$ $3^{1\text{-}13}$ $5^{3\text{-}16}$) are necessarily of a general kind. In these it is hard to feel sure whether the writer has only the local needs of Ephesus in his mind, or whether he was consciously framing rules which would be of universal application and obligation (cf. 1 Co 7^{17}). The phrase *ἐν παντὶ τόπῳ* (2^{8}) favours the latter view; so perhaps does the use of *ἐκκλησία* in 3^{15}; and some of the rules deal with such essential doctrines or points of morality that the writer may have regarded them as *ipso facto* binding on every one: but his primary thought was probably only for the church or churches of which Timothy was in charge.

iii. LITERARY DEPENDENCE.—The OT is quoted as authoritative only once, 5^{18}=Dt 25^{4} (cf. 1 Co 9^{9}); but its language is consciously adapted or its history appealed to in—

2^{13}=Gn 2^{22} (cf. 1 Co 11^{8}).
2^{14}=Gn 3^{6} (cf. 2 Co 11^{3}).
4^{4} =Gn 1^{31}.
5^{5} =Ps 4^{6} (?) (cf. 1 P 3^{5}).
5^{19}=Dt 19^{15} (cf. 2 Co 13^{1}).
6^{1} =Is 52^{5} (cf. Ro 2^{24}).

It will be noticed that nearly every passage had been used in earlier Pauline Epistles.

In $2^{13.\ 14}$ we have perhaps a later Jewish adaptation of the OT history. A Christian rhythmical hymn is quoted in 3^{16}; Christian sayings in 1^{15} 2^{15} (?) 4^{9} (?) (*πιστὸς ὁ λόγος*); Christian prophecy in 4^{1} (cf. 1^{18} 4^{14}); liturgical doxologies are used, which had probably passed from Jewish into Christian worship, in 1^{17} $6^{15.\ 16}$; traces of a creed seem to underlie 6^{13}; and Greek proverbial sayings, 1^{9} (?) 4^{4} 6^{7}.

With regard to writings of the NT, there are interesting parallels with the Gospels, especially with St. Luke, which in 5^{18} may possibly be treated as 'Scripture' on a level with the OT; but none of the other parallels give the impression of literary quotation, so that it is probably not so here.

Cf. 2^{6} with Mk 10^{45}.
4^{8} ,, Lk 18^{30}.
5^{5} ,, ,, 2^{37}.
5^{18} ,, ,, 10^{7} (where Luke agrees verbally with 1 Tim., but Matt. differs).
5^{21} ,, ,, 9^{26}.
$6^{17\text{-}19}$,, ,, $12^{20.\ 21}$.

There are striking points of contact with 1 Peter; cf. $2^{9\text{-}11}$ with 2 P $3^{1\text{-}6}$, 3^{16} with 1 P $3^{18\text{-}22}$, 5^{5} with 1 P 3^{5}; but it is not clear whether they do (so von Soden) or do not (so Jülicher) imply literary acquaintance: if they do, the priority seems to be clearly on the side of 1 Timothy.

On the other hand, 'an intimate acquaintance with the Pauline letters must be assumed on the part of the writer' (Jülicher). There are certainly conscious parallels with Romans and 1 and 2 Corinthians.

The parallels with Romans and 1 and 2 Cor. are explicable either as deliberate adaptations by some later writer or as the reiterations of the same thought by Paul himself. Those with 2 Tim. and Titus are stronger, and either point to nearly contemporary composition by one writer or to a deliberate adaptation. It has been held by von Soden (*Hdcom.* p. 154), Moffatt (*Historical NT*, p. 560), McGiffert (*Apost. Age*, p. 413), that 1 Tim. is the latest of the three, and based on 2 Tim. and Titus; but a mere comparison of style does not indicate any priority as between 1 Tim. and Titus, and favours the priority of 1 Tim. to 2 Timothy. The other points of difference—fuller organization in 1 Tim., fuller description of the false teachers, etc.—are as explicable by the difference of circumstances in each place as by a difference of date.

iv. SITUATION IMPLIED AT EPHESUS.—(*a*) *The False Teachers.*—The primary purpose of the letter is to remind Timothy of the charge given to him to check certain false teachers; but, as he is assumed to know them, they are described in such general terms that it is difficult for us to identify them. It is not, indeed, necessary to assume that all the descriptions apply to one set; Ephesus supplied a great variety of forms of religion, heathen, Jewish, and Christian (Ac 19): and $4^{1\text{-}2}$ (cf. Tit 1^{10}, 2 Ti 3^{1}) perhaps implies a separate development in the future; yet the probability is in favour of one main tendency. The teachers were prominent in the Church (1^{6}): they may have held office [cf. the stress on the discipline over presbyters ($5^{20\text{-}25}$), and the need of more careful choice of ministers ($3^{1\text{-}13}$)]: two of them had already been 'handed over to Satan' (1^{20}): and they may have attempted to attack St. Paul's own apostleship (1^{1} 2^{7} 1^{20} *μὴ βλασφημεῖν*). They are untrue to the central Christian temper (1^{6}), they do not listen to the dictates of their own conscience (1^{19} 4^{2}), are ignorant (1^{7}), influenced by the desire of making gain out of their religion ($6^{5\text{-}10}$), living in a state of feverish excitement (6^{4} *νοσῶν*), suggesting curious disputations and investigations which are 'other' than the deposit (1^{3} 6^{20}), and producing an atmosphere of strife, jealousy, and suspicion (6^{4}). In the substance of their teaching a few details emerge.

(1) They claimed to be 'teachers of *law*' (1^{7}): misinterpreting the OT in some way for purposes other than those for which it was intended (cf. 2 Ti $3^{16.\ 17}$): possibly depreciating law in an antinomian spirit, so that the writer has to insist on its real value ($1^{8\text{-}10}$): or, more probably, exaggerating its value, so that he has to point out its limitations, as intended only for *ἄδικοι* (*ib.*).

(2) They laid stress on *μῦθοι καὶ γενεαλογίαι* (1^{4} 4^{7}). The reference of this is also ambiguous. The words would be applicable to the speculative theories of Gnosticism, with its legends about the creation of the world and the relationships of the various æons which separated God from matter: and the Christian writers of the 2nd cent. constantly made this application (Irenæus, *adv. Hær.* Præf.; Tertullian, *c. Valent.* 3, *de Anima*, 18, *de Præscriptione*, 33, *adv. Marcionem*, i. 9; Epiphanius, *Hær.* 33. 8).

But the context connects them with teaching about the Law (1^{7}): Titus speaks of *Ἰουδαικοὶ μῦθοι* (1^{14}), and connects *γενεαλογίαι* with *μάχαι νομικαί* (3^{9}); and Ignatius (*ad Magn.* 8) uses exactly similar language of the Judaizers of his day. They are therefore Jewish in origin, and were probably speculations based upon the legendary history of the patriarchs and their descendants, akin to the Jewish Haggadoth, and illustrated by the Book of Enoch, the Book of Jubilees, and the treatise on Biblical Antiquities attributed to Philo [cf. Hort, *Judaistic Christianity*, pp. 130–146]. The reference to Jannes and Jambres (2 Ti $3^{8.9}$) will then be a half-ironical *ad hominem* illustration from one of their own favourite myths.

(3) They laid a special claim to *knowledge* (6^{20}). This again would have a peculiar applicability to any form of Gnosticism, and it is so applied by Hegesippus *ap.* Euseb. iii. 32; but it is equally applicable to the Rabbinic claim to special knowledge (Lk 11^{52}, Jn 7^{49}, Ro 2^{20}). The word ἀντιθέσεις in 6^{20} offers an easy suggestion to the ἀντιθέσεις, 'Contradictions between OT and NT,' of Marcion; but such an allusion is inconsistent with the stress on Jewish law (cf. 2), and impossible in date, unless the verse be a subsequent interpolation. It may either refer to 'Rival theses,' *i.e.* conflicting decisions of the Jewish Rabbis on the application of the Law, the Jewish Halakha, the 'tradition of the elders' (so Hort, *l.c.*); or it may be translated 'oppositions' (cf. 2 Ti 2^{25}), and if so, gives no clue to the nature of the opposition.

(4) They taught a false *asceticism*, prohibiting marriage, requiring abstinence from certain foods (4^{1-4}), and perhaps from wine (5^{23}), and that on the ground that matter was evil ($4^{4.5}$, cf. $4^{7.8}$ 6^{17}). This particular teaching is ascribed to δαιμόνια, and so probably came from a heathen source; and it is quoted as a prophecy of the future, and so is perhaps separable from the rest. But the writer is probably quoting a *past* prophecy as being fulfilled in the present, and it is placed in close connexion with the 'myths' (4^7). This teaching, again, is exactly parallel to the teaching of later Gnostics (cf. Clem. Alex. *Strom.* iii. 3; Tert. *adv. Marcionem*, i. 14; Irenæus, *Hær.* i. 28); but it may equally have arisen from an exaggeration of the Jewish law, with a mixture of Oriental speculation, coming perhaps through Essenism (cf. 1 Co 7 and 8, Ro 14, Col 2, He 13).

It is perhaps legitimate to read allusions to the false teachers in the regulations of chs. 2. 3, which follow so directly upon the warning against them. If so, their teaching was characterized by an exclusiveness, limiting God's universal salvation, whether from a Gnostic or a Jewish standpoint, and perhaps denying the salvation of women; perhaps also by a low standard of morals.

The main tendency, then, is that of a Rabbinic speculative Judaism, playing with historical legends and casuistry, and coloured by an asceticism borrowed from some heathen source, perhaps through Essenism (cf. Lightfoot, *Col.* 'On the Colossian Heresy,' *Biblical Essays*, xi., *Ignatius*, i. pp. 359–374).

(*b*) *Organization of the Church.*—The Church forms one organized community, described as God's family ($3^{5.15}$), an 'ecclesia' of a God of life (*ib.*): its members are οἱ ἀδελφοί (4^6), οἱ πιστοί (4^{12} 5^{16} 6^2), ἅγιοι (5^{10}). They meet for common worship, and apparently up to the time of this letter men and women alike had been wont to teach and to lead the prayers, but the writer limits this right to the men (2^{8-12}). At the worship there are reading, exhortation, and teaching (4^{13}), prayers, intercessions, thanksgivings (2^1 5^5). Over this body the apostle is supreme: he hands over offenders to Satan (παρέδωκα, 1^{20}; but this would not necessarily exclude the co-operation of the Church, as in 1 Co 5^4); his exhortations (2^1) and wishes (2^8) are authoritative; the true teaching is the gospel, which has been entrusted to him (1^{11} 2^7). Timothy is his delegate, 'the instrument of an absent rather than a wielder of inherent authority' (Moberly), commissioned to ordain ministers (though the whole community would have a voice in the choice of them, cf. $3^{2 \text{ and } 10}$), to exercise discipline over them, to regulate worship, to control teaching, and hand on the traditions of the apostle. His exact status is not clear: he may have been a temporary delegate for a special work, as he had been before to Corinth (1 Co 4^{14-17}) and Philippi (Ph 2^{19}), and as Titus had been twice or thrice to Corinth (2 Co 7 and 8); or he may have been permanently set apart as St. Paul's delegate for the higher functions of ministerial work, unlimited by any local sphere, but sent from time to time to various places; or, again, he may have received a permanent commission to represent the apostle and a permanent localization at Ephesus, or possibly throughout Asia Minor. Either view is tenable, but the first springs most naturally out of the language of 1^3 4^{14}.

It is also uncertain whether he had received special ordination for this task. He had received a special gift, given by laying on of the hands of the presbyters, and prophecies had led Paul to choose him (1^{18} 4^{14}); but the reference may be either to consecration for *this* piece of work, or to formal ordination when he first became Paul's helper (Ac 16^{1-4}). His position seems to be that of a vicar apostolic rather than of a localized bishop, though it is the germ out of which the later localized and monarchical episcopate developed.

The more permanent ministry under Timothy is assumed to be already in existence. There are no directions to establish any new office, unless it be that of the church-widows, but only to regulate and spiritualize those that exist. These are—

(1) The ἐπίσκοπος. He occupies a prominent position in the eyes of the Church and the heathen world; he must have high moral qualifications: from these it may be inferred that his duties will be to entertain travelling brethren (φιλόξενος), to teach (διδακτικός), perhaps to control the finances (ἀφιλάργυρος), to preside and care for the Church (προστῆναι, ἐπιμελεῖσθαι).

(2) πρεσβύτεροι, who are formally ordained (?) for the position (5^{22}), who also preside (προεστῶτες), who also preach and teach (ἐν λόγῳ καὶ διδασκαλίᾳ), who receive maintenance in return for their work, and who are under Timothy's discipline. (There is not, as often assumed, a contrast in 5^{17} between teaching and non-teaching presbyters, but only between those who take pains with their teaching and those who do not).

Are these two different orders of ministers, or only two names for one order? This question, too, cannot be positively answered. The fact that πρεσβύτεροι are not mentioned in ch. 3; that the ἐπίσκοπος is not mentioned in ch. 5; that the same functions of presiding and teaching are attributed to both; the *prima facie* meaning of Tit 1^{5-7}, cf. Ac 20^{17-28},—these favour the identification of the two. On the other hand, the constant use of the singular ἐπίσκοπος and of the plural πρεσβύτεροι, and the usage of the 2nd cent., favour the separation, and leave it a tenable view that out of the many presbyters one bishop was already chosen at Ephesus in order to preside over the whole and to represent them to the outer world.

(3) διάκονοι. Subordinate officers, whose character has to be tested before the whole community before they enter on office. Their duties are not defined; but they perhaps have to administer the finances under the ἐπίσκοπος (μὴ αἰσχροκερδεῖς), and to teach, as a successful diaconate gives them boldness of speech. After their diaconate they may perhaps hope to rise to a higher position (βαθμός) in the Church ($3^{8-10.\,12.\,13}$).

(4) γυναῖκες are also mentioned in the official ministry, between two sections dealing with διάκονοι: *i.e.* probably 'women who are deacons,' deaconesses; but possibly only 'wives of deacons.' A high character is required of them, but their duties are not defined.

(5) χῆραι. The regulations for widows are described at fuller length, and give the impression that the writer is introducing a fresh organization in this case. There is probably a distinction to be drawn between lonely widows who are the

objects of charity, and who devote their time to prayer (5^{4-8}), and active widows who are church workers, whose names are entered on a church list, after careful examination of their antecedents ($5^{9.10}$). The distinction is not, however, clearly marked. See also art. WIDOW.

[Cf. Gore, *The Church and the Ministry*, ch. v.; Moberly, *Ministerial Priesthood*, ch. v.; Hort, *Christian Ecclesia*, chs. xi. xii.; J. H. Bernard in *Camb. Gr. Test.* pp. lvi–lxxiv; Weiss, § 4; Zahn, *Einl.* i. 459–466].

v. AUTHORSHIP.—The Epistle claims to be by St. Paul, and is directly attributed to him by Irenæus (Præf. II. xiv. 7, IV. xvi. 3), Tertullian (*de Præscr.* c. 25), Clement Alex. (*Strom.* ii. p. 457, iii. p. 534), and the Muratorian Canon; it was included in the Latin and Syriac versions, and this implies an acceptance of its Pauline claim. It was known to Marcion (*c.* 140); there are many parallels to its regulations in the earliest documents that underlie the *Apostolic Constitutions* (cf. Harnack, *TU* II. v. pp. 50–52, or *Chron.* i. p. 483): these may be due to independent treatment of some earlier list of regulations, but the more prob. view is that the *Apost. Const.* give a later and fuller adaptation of 1 Timothy; and there are parallelisms to its language in the Epistle of Vienne and Lyons (Eus. v. 1), Hegesippus (Eus. iii. 22), Justin Martyr (*Dial.* vii. 17, xxxv. 3 (?)), and above all in Polycarp (cc. 4. 5. 8. 9. 12), Ignatius (*ad Trall.*, *Inscr. ad Magn.* 8, *ad Polyc.* 3), and Clement of Rome (7. 21. 54. 61), which make it probable that it was known to all these writers, and well known in Asia Minor before A.D. 115, and perhaps at Rome before A.D. 95. For an instructive comparison of the Pastoral Epistles with Ignatius, cf. von der Goltz in *TU* XII. iii. pp. 107–118, 186–194.

On the other hand, it was rejected with 2 Tim. by Tatian (Jerome, *Prol. ad Titum*), by 'certain heretics' (Clem. Alex. *Strom.* ii. 11), and with both 2 Tim. and Titus by Marcion (Tertull. *adv. Marcionem*, v. 21) and Basilides (Jerome, *l.c.*). Tertullian implies that the reason of the rejection was that they were private letters; but it may have been due to a dislike of their teaching, or, if they were not Pauline, to a real knowledge of their origin. The external evidence is as strong in church writers as for any Epistle; but it is met by a persistent rejection on the part of some heretics.

The internal evidence permits two alternatives. Either the author is Paul, or he is some later writer anxious to support Christian morality and orthodox teaching against growing heretical tendencies, and for this purpose composing the letter, possibly with the help of some genuine Pauline fragments, and certainly with a deliberate use of the Pauline letters. In deciding between these two alternatives it is not possible to appeal to points of similarity with Pauline language or with St. Paul's character, as they are assumed on both sides; on the other hand, differences from the known facts of St. Paul's life are as much an argument against the second alternative as against the first.

(1) The historical situation cannot be fitted into the account of St. Paul's life in the Acts. This is true in spite of recent attempts to place it at the time of Ac 20^{38} (Bartlet, *Apostolic Age*, pp. 179–182, 511–515; Bowen, *The Dates of the Pastoral Epistles*, London, 1900); yet the Acts is incomplete even over the ground which it traverses, *e.g.* it makes no mention of the intricate circumstances connected with the mission of Titus to Corinth, *i.e.* it helps us to understand 2 Cor. as little as this Epistle. Further, it confessedly ends before the death of St. Paul. There are other grounds for believing in a release of St. Paul after Ac 28 (cf. art. PAUL), and the situation implied here may easily fall in the interval between that release and his death, about the same time as Titus but before 2 Tim., as this Epistle gives no trace of the danger of persecution.

(2) The style is unlike St. Paul's more argumentative passages, but it resembles that of the more practical sections of the earlier Epistles, *e.g.* 1 Th 5, Ro 12–16, 1 Co 16, 2 Co 8. 9. The general structure, the quick passage from practice to doctrinal basis, the personal interludes (1^{12} 2^{7}), the frequent repetition of a word and its cognate forms (*πίστις*, 1^{12-17}; *πᾶς*, 2^{1-7}; *πλοῦτος*, $6^{17.18}$), the fondness for sharp antithesis (5^{6} 5^{13} 6^{7} 6^{19}), the use of the language of the OT and of Greek proverbs, are subtle points that might escape an imitator. But two points of difficulty remain. (*a*) The vocabulary is largely different. The average of *ἅπαξ λεγόμενα* is one for every verse and a half: a large group of words (34 in the three Pastoral Letters) is not found elsewhere in St. Paul, but is found in St. Luke's writings; and many characteristically Pauline words are absent (cf. Holtzmann, *Einl.* pp. 318, 319, *Past. Briefe*, p. 100; W. H. Simcox in *Expositor*, 1888, p. 180).

But the argument from the mere use of words is always precarious (cf. an illustration from Shakespeare in the *Expos. Times*, June 1896, p. 418, and from Dante in Butler's 'Paradise,' p. xi); St. Paul's language elsewhere shows great variation, even within the compass of one letter (cf. 2 Co 8. 9 with 10–13); the proportion of *ἅπαξ λεγόμενα* is—

1 for 1·55 verses in the Past. Epp.;
1 ,, 3·66 ,, ,, 2 Cor.;
1 ,, 5·53 ,, ,, 1 Cor.;

hence the difference between 2 Cor. and 1 Cor. is as great as that between the Past. Epp. and 2 Cor. (Kölling *ap.* Weiss, p. 51). Within the Pastorals 72 words are found in 1 Tim. only, 44 in 2 Tim. only, 26 in Titus; 10 are peculiar to 1 Tim. and Titus; 8 to 1 and 2 Tim.; 3 to 2 Tim. and Titus. *ὠφέλιμος, εὐσέβεια, διάβολος* as adjective, are common to the three, and they all have some word cognate to *σώφρων*, and the phrases *πιστὸς ὁ λόγος, ἐπίγνωσις ἀληθείας, ἡ ὑγιαίνουσα διδασκαλία, ὁ νῦν αἰών*. There is no word which is of clearly later date: many of the differences arise from difference of subject, esp. in 2^{8-10} 5^{3-16} where they are most frequent; some occur in phrases which seem to be quotations (see above). Many are words common in the Greek of the Apocrypha (cf. the instances from 2 Mac. in *Camb. Gr. Test.* p. xxxix). Some few are Latinisms (*χάριν ἔχω, πρόκριμα*), due perhaps to residence in Rome; others are medical metaphors (*ὑγιαίνειν, νοσεῖν*), due perhaps to intimacy with St. Luke; while it is difficult to estimate how far the mere wording of a letter was due to the amanuensis employed. [The question of the vocabulary is carefully treated in Findlay's Appendix to Sabatier, *The Apostle Paul*].

(*b*) But many of the phrases seem technical and stereotyped: *Ἰησοῦς ἡ ἐλπὶς ἡμῶν* (1^{1}; notice the advance on Col 1^{27}), *ἡ παραγγελία* (1^{5}), *ἡ ὑγιαίνουσα διδασκαλία* (1^{10}), *πιστὸς ὁ λόγος* (1^{15} etc.), *τὴν καλὴν στρατείαν, τὴν πίστιν* (1^{19}), *ὁ σωτὴρ ἡμῶν θεός* (2^{3}), *τὸ μαρτύριον καιροῖς ἰδίοις* (2^{6}), *ἡ τεκνογονία* (?) (2^{15}), *τὸ μυστήριον τῆς πίστεως* (3^{9}), *τὸ τῆς εὐσεβείας μυστήριον* (3^{16}), *ἡ καλὴ διδασκαλία* (4^{6}), *ἡ διδασκαλία* (6^{1}), *ἡ εὐεργεσία* (?) (6^{2}), *ἡ ἐντολή* (6^{14}), *ἡ παραθήκη* (6^{20}); there is an articulated fixity about them which seems to mark a late date, and to be unlike the freshness of the earlier style. This, again, is true; but the date on any hypothesis is later, the diction is that of 'the old man' *less* 'eloquent,' and he is writing to an intimate companion, so that his language may naturally have somewhat of an esoteric stamp.

(3) The tone of the religious life implied shows a similar development. It is in all essentials Pauline; for it consists of life eternal, won by Christ's death, which has brought salvation to all mankind; and this life must show itself by a high Christian morality, and be ready to face the appearance of Jesus Christ. But there is more stress on the value of law; on the need of good works, or attractive works, *καλὰ ἔργα* (4 times in 1 Tim., 3 in Tit., elsewhere not in St. Paul); religion is described as *εὐσέβεια* (8 times in 1 Tim., once in 2 Tim. and Tit., not elsewhere) or *θεοσέβεια* (1 Ti 2^{10} only); the favourite qualities are those of a sober, orderly loyalty. Yet each point could be illustrated from St. Paul (1 Co 6^{2}, Ro 3^{31} 7^{12}, Gal 1^{8} $5^{6.\,22.\,23}$, Eph 2^{10}), and there is a uniform tendency in the earlier Epistles to pass onward from the strain of the first conversion to the quiet ordered after-life, and to bring every sphere of human relationship under the control of Christian discipline (cf. W. Lock, *St. Paul, the Master Builder*, ch. 4).

(4) So, too, with regard to Church organization. There are more details of it, and more stress upon it; yet the details can be paralleled elsewhere: cf. Ac 14^{23} 21^{17}, Ja 5^{14} (*πρεσβύτεροι*), Ac 20^{28}, Ph 1^{1} (*ἐπίσκοποι*), Ph 1^{1} (*διάκονοι*), Ro 16^{1} (deaconess), Ac 6^{1} 9^{39}, 1 Co 7 (*χῆραι*). St. Paul organized some ministry from the first (1 Th 5^{12}, 1 Co 12^{28}); his influence from the first had been used to check the irregular utterances of the spirit and to lay greater stress on the ordered ministry (1 Co 12–14); and the further stress upon it is natural with the lapse of time bringing new developments of false teaching and the prospect of his own death.

The prominence of prophecy, the uncertainty about the exact status of Timothy, about the presence of a monarchical episcopate, about the distinction between *ἐπίσκοπος* and *πρεσβύτερος*, the need of regulation of public speaking by women, all favour a date considerably earlier than the Ignatian letters.

Certainly the letter gives the impression of a Church well established; the functions of the various ministers are implied as already fixed, the *ἐπισκοπή* is an object of desire (3^{1}), Timothy can choose between novices and older members of the Church (3^{6}), the Church widow must be of 60 years of age (5^{9}), there has been sad experience of the falling away of Christian widows ($5^{12.\,15}$); but none of these points carry us beyond the possible conditions of a flourishing community in a large city which may have been established at least ten years, at a time of quick development such as is stamped on every page of the NT.

The advice of 5^{14} is inconsistent with that of 1 Co 7^{40}, but there the advice is confessedly a counsel of perfection (cf. v.^{39}), and given in face of a special necessity.

A comparison with other documents connected with Ephesus, *e.g.* Ac 20^{18-35}, esp. ^{30}, the Prologue of St. John (with the stress on God's creation of all things (cf. 4^{4}), of the manifestation of Christ in flesh (cf. 3^{16}), of the contrast between the Law and grace and truth and glory (cf. 1^{8-11})), and with the Ep. to Eph. (with its stress on the Ascended Lord as the source of spiritual strength, on the importance of the ministry, of the Church, of family life, its witness to the growth of Christian psalms and hymns), shows that the writer knows the conditions of Ephesus in the 1st century.

(5) The teaching of the false teachers has been shown to be compatible with the Pauline authorship, and it may be added that the very vagueness of it suits an earlier rather than a later date, while the absence of any certain or probable allusion to Docetism, which was the prevalent danger in Ephesus and its neighbourhood at the time of 1 John and of the Ignatian letters, is in favour of placing this Epistle before those.

(6) Some critics feel an artificiality in the situation implied. Paul is about to return shortly, yet troubles to write on points like those of 2^{1}–3^{13}, which could afford to wait; yet the circumstances of the writing of 1 Cor. and 1 Thess. (1 Co 4^{19}, 1 Th 3^{11}) are exactly analogous. Again, Timothy is placed in a position of very great importance, yet is distrusted as young, liable to be weak, and to be misled; but this corresponds to the little we know of Timothy's character elsewhere, and it is probable that he had failed to deal with a crisis at Corinth (cf. TIMOTHY): and both these are objections to *any* unity of authorship; indeed, if anything, it is more probable that St. Paul should have spoken thus in a private letter to Timothy, than that a later writer, who was *ex hypothesi* using Timothy as a type of an important official, treated as being the recipient of important instructions, should have thus weakened his character.

The conclusion is difficult. The Epistle marks at all points an advance on the earlier Epp. of St. Paul. In style, in organization, in stereotyped fixity of teaching, in the character of the teachers opposed, there are marked differences. On the other hand, in all these points it also offers marked differences from any writings of the 2nd cent. It falls within a period in which we have little to guide us. 'The secularization of Christianity is in full swing' (Jülicher), but there were the beginnings of this in 1 Cor. and Ephesians. 'The writer is a type of a time when the ethical voice of a noble Hellenism and the Roman instinct for organization are uniting themselves with the Christianity which had sprung as religion out of Judaism, in order to build up the old-catholic Church' (von Soden); but such incorporation of Greek and Roman thought had taken place in Paul's time, and was mainly due to his genius. It is Pauline in claim; admittedly Pauline in central doctrine; 'their author was an adherent of the apostle's who reproduced his master's ideas' (Moffatt, *l.c.* p. 561). He has an intimate acquaintance with the Pauline letters: the letter was accepted as Pauline by those who most represented Paul's teaching. Whether we can take the further step and assert that it is Paul's own work, depends upon the question whether the stress on organization, authority, teaching, loyalty, can fall within his lifetime; and whether he was one who could forget the controversies of the past and devote himself in the face of a new danger to lay stress on the foundation already laid, and to try to secure a high moral and spiritual tone within the Churches under his control by enforcing more strictness in worship and in the qualifications for the ministry. The points of comparison with the earlier Epistles can scarcely be urged in favour of the authorship; indeed in one or two places, 1^{11} 2^{7} (esp. the parenthesis, *ἀλήθειαν λέγω, οὐ ψεύδομαι*), the language seems scarcely explained by the circumstances of the time, but to be due to a mere extract from earlier letters, and if so, would be an argument *against* genuineness; but these phrases may be reminiscences in St. Paul's own mind of a past controversy (cf. Eph 2^{9}) rather than extracts from his letters; while the differences, *e.g.* in the salutation (1^{1}), in the deeper description of his own sinfulness (1^{12-15}), side by side with the stronger assurance of the truth of his message, the boldness of the criticism on Timothy, the personal reference to his illnesses and his water-drinking, the affectionateness of the last appeal (6^{20}),—all these are subtle points, which are more natural at first than at second hand, and which seem to bring us face to face with Paul himself.

vi. INTEGRITY.—There is no MS ground for doubting the integrity of the Epistle; nor is there any intrinsic inconsistency or lack of arrangement—given the ordinary discursiveness of a letter—which would suggest interpolation. For the awkward anacoluthon 1^{3}, cf. Eph 3^{1}; 3^{11} comes in awkwardly between ^{10} and ^{12}, and may need transposition, but 3^{12} may be an after-thought (cf. 1 Co 1^{16}); for 6^{17-19} cf. Ro 16^{17-20}.

But the doubt has arisen in connexion with the authorship. On the theory of the Pauline authorship, it has been suggested that the sections which imply a late date may be later additions to a genuine letter. Thus 3^{1-13} is of a quite general character: it has no personal expression: it could be dropped without destroying the sequence of thought. $2^{1-7.\ 8-15}$ $5^{1-16.\ 17-22}$ are almost as general; and the personal expressions *παρακαλῶ* 2^{1}, *βούλομαι* 2^{8} 5^{14}, *ἐπιτρέπω* 2^{12}, *διαμαρτύρομαι* 5^{21}, might be those of Timothy himself or of some later authority, laying down detailed instructions in accordance with the general principles enunciated by St. Paul. This would meet the difficulty of the large number of non-Pauline words in these sections; but that may be met by the fact that Paul is treating of new subjects, and is perhaps borrowing from half-stereotyped lists of virtues required of candidates for office, perhaps based on Jewish requirements, perhaps on Gentile analogies (for the correspondence between the requirements of 3^{1-8} and the characteristics of the Stoic wise man, cf. *Camb. Gr. Test.* p. 57): besides, it makes it necessary to treat 2^{7} as a deliberate insertion, with a view to claim Pauline authorship for the section [cf. Harnack (*Chron.* pp. 482–484), who treats 3^{1-13} $5^{17.\ 20}$ as fragments later than 138 A.D.]. Again, on the theory of the non-Pauline authorship, it is necessary to explain the personal allusions. Some of these ($1^{4.\ 12-16}$ 2^{7}) may be borrowed from or based upon previous letters, but 5^{23} cannot be; it cannot have been invented by a forger; it must be genuine, and the very awkwardness of its insertion at this point is against the theory of a second-hand compiler, who might more naturally have inserted it in 4^{6-16}. The command and the insertion of the command here depend upon some intimate acquaintance between the writer and Timothy, and intimate knowledge of the conditions at Ephesus.

The most elaborate attempt to resolve the letter into its constituent factors is that of Knoke (*Commentar zu den Pastoralbriefe*, 1889), who assumes a combination of three letters—two of them from Paul to Timothy, the third the final redaction in the 2nd cent., in the interests of Church organization. An attempt to read these letters consecutively as arranged by him,

(*a*) $1^{3.\ 4.\ 18}$–2^{10} 3^{14}–4^{12} $5^{1-3.\ 5.\ 6.\ 11-15.\ 19-24}$,
(*b*) 1^{12-17} 3^{14}–$4^{11.\ 13-16}$ 2^{12-15} 5^{7-9} 6^{17-19},
(*c*) $3^{1-9.\ 12.\ 10.\ 13}$ 2^{11} $5^{9.\ 10.\ 16.\ 4.\ 17}$ $6^{1.\ 2}$,

will show the arbitrariness of the division, and the possibility on such a test of subdividing the three still further. For exact details of suggested theories cf. Moffatt, *l.c.* p. 702; Clemen, *Die Einheitlichkeit der paul. Briefe*, pp. 143–175; McGiffert, pp. 405–412; Harnack, *Chron.* i. pp. 480–484.

vii. VALUE.—The intrinsic value is partly independent of its authorship, for the Pastoral Epistles, even if not written as proofs of love and affection by Paul to Timothy and Titus, 'in honore tamen ecclesiæ catholicæ in ordinatione ecclesiasticæ disciplinæ sanctificatæ sunt' (Murator. Canon). But its witness is not so much to details of ecclesiastical order (for these are ambiguous), as to principles.

(*a*) It witnesses, more fully than even Titus and 2 Tim., to the principle of the delegation of apostolic authority. The highest duty of ordaining, and exercising discipline over all the officers, is not inherent in a Church already possessing presbyters and deacons, but is delegated from above to a representative of the apostle. On the Pauline authorship the fact that this was Paul's view, on the non-Pauline authorship the belief in the fact is testified. St. Paul acts as St. John acted in the presence of the growing needs of the Church (Clem. Alex. *Quis Dives*, c. 42).

(*b*) It witnesses that a highly ethical and spiritual conception of religion is consistent with and is safeguarded by careful regulations about worship, ritual and organized ministry. There is no opposition between the outward and the inward, between the spirit and the organized body.

(*c*) It breathes a healthy manly impatience of intellectual quibbles and sophistries, which are divorced from a moral life. It is akin to St. Paul's protest against *σοφία* and *γνῶσις* in 1 Co 1 and 7, but it carries it into a different region.

(*d*) In details it has had a direct influence upon the position and dress of Christian women in worship—though here it does not add anything to 1 Cor.—upon the subjects of prayer in all Christian liturgies, making them universal and loyal, and so contributing to a missionary feeling and to a conciliatory attitude of the Church to its rulers. It is again the first handbook of Church discipline, and its direct influence may be seen in the *Apostolic Constitutions* and subsequent legislation, mainly in requiring high moral qualifications in all Christian officials, and in insisting on a high standard of justice and impartiality in dealing with them. Even more is it the germ of treatises on the qualifications of the ministerial office, such as St. Chrysostom's *περὶ ἱερωσύνης*; St. Ambrose, *de Officiis Ministrorum*; St. Gregory, *de Pastorali Cura*.

LITERATURE.—A very full account of previous literature will be found in Holtzmann's or in Mangold's *Einleitung*. It will be sufficient here to mention as the best modern statements of the problems connected with the Epistle: (1) against the Pauline authorship, Holtzmann, *Die Pastoralbriefe* (1886); von Soden in the *Hand-Commentar*; Harnack, *Chronologie*, i. pp. 480–485 (1897); Jülicher, *Einleitung*⁴, pp. 136–156 (1901); McGiffert, *History of Christianity in the Apostolic Age*, pp. 398 ff. (Edin. 1897); Moffatt, *Historical NT*, pp. 556–563 (Edin. 1901).

(2) For the Pauline authorship, Weiss in Meyer's *Commentar zum NT*; Riggenbach in the *Kurzgef. Comm.* (semi-Pauline); Zahn, *Einleitung*, i. pp. 398–489 (1897); Salmon, *Introd. to NT*, c. xx.; Findlay's Appendix attached to the translation of Sabatier's *The Apostle Paul* (1891); Lightfoot, *Biblical Essays*, chs. xi. xii., and Hort's *Judaistic Christianity* and *The Christian Ecclesia*.

For exegesis: Theodore of Mopsuestia with Swete's notes (Cambridge, 1882) is indispensable as representing the Patristic views. Theodoret and Ambrosiaster are terse and sensible, and St. Chrysostom's homilies are illuminating and edifying. Of modern commentators von Soden for keen penetration, Weiss and Riggenbach for well-balanced judgment, are pre-eminent, and H. P. Liddon for careful analysis and Patristic illustrations (1897). Ellicott, Alford, Wace (in the *Speaker's Commentary*) are careful and learned; Plummer in the *Expositor's Bible* interesting and suggestive; J. H. Bernard in *Camb. Gr. Test.* (1899) and A. E. Humphreys in *Camb. Bible for Schools* (1897) are excellent school manuals; R. F. Horton in the *Century Bible* (1901) is interesting, but sometimes inconsistent. Useful notes on special verses will be found in Westcott-Hort, ii. App. p. 133, and Field's *Otium Norvicense*, iii.² pp. 203–214.

W. LOCK.

TIMOTHY, SECOND EPISTLE TO.—

i. Historical Situation of the writer.
ii. Analysis.
iii. Literary Dependence.
iv. Situation at Ephesus.
  (*a*) False Teaching.
  (*b*) Church Organization.
v. Authorship.
vi. Integrity.
vii. Value.

i. HISTORICAL SITUATION.—St. Paul is in prison at Rome, bound with a chain, and had been a prisoner for some length of time ($1^{8.\ 16.\ 17}$ 2^{9}). He had incurred imprisonment in the cause of Christ (1^{8}) as an apostle and teacher of the gospel (1^{12} 2^{10}): perhaps some definite charge of misdemeanour had been made against him (ὡς κακοῦργος, 2^{9}; cf. κακοποιός, 1 P 2^{12} 4^{15}, but this may be no more than a simile). But the place and circumstances of his arrest are not clear. He had been travelling through Asia Minor and Greece with a band of fellow-travellers (cf. Tit 3^{15} οἱ μετ᾽ ἐμοῦ πάντες), including Demas, Crescens, Titus, Tychicus, Erastus, and Trophimus; apparently he had been opposed at Troas by Alexander, and obliged to leave hastily ($4^{13.\,14}$): in Asia he was deserted by those to whom he looked for support (1^{15}): at Miletus he left Trophimus ill: at Corinth Erastus stayed behind: the rest probably moved forward to Nicopolis (Tit 3^{12}): and there, or perhaps at Rome itself, he may have been arrested: Demas deserted him: Crescens was despatched to Galatia (?Gaul): Titus to Dalmatia: Tychicus to Ephesus: and when he writes Luke is with him single-handed. An Asiatic Christian, Onesiphorus, had found him out, though with difficulty, had cheered his loneliness, and perhaps was enabled to better his condition (1^{16}); the Roman Christians are in touch with him, and he is able to send a word of greeting from all of them (4^{21}). Perhaps his trial had already begun and been adjourned ($4^{16.\,17}$, but cf. Zahn, *Einl.* i. p. 402, and Spitta, *Zur Gesch. des Urchristentums*, i. pp. 35–50, who make out a good case for referring this to his trial in the previous imprisonment): at any rate he regards his death as certain and as not far off ($4^{8.\,9}$). So in his loneliness he wants help, and his mind turns to his 'beloved son' Timothy, and to Mark, to whom he had been reconciled. Timothy was at the time somewhere in Asia Minor,—probably at Ephesus, as he is in a position of authority, where he has to teach and hand on his teaching, cf. 1^{18} $2^{2.\,14}$ 3^{1} $4^{2.\,19}$,—and Paul writes to beg him to come, and to come quickly before the winter, to pick up Mark by the way, and to stop at Troas for the cloak and books and parchments left there. But Timothy was of a timid nature, and the journey was one which would imply peril, and possibly he may arrive too late to see St. Paul, or may have to face death himself; so he exhorts him to have courage and to provide others who will be able to teach the truth, and warns him against the special dangers which are likely to beset his teaching. The interest of the Epistle oscillates between St. Paul's desire for sympathy and his wish to strengthen Timothy's hands and to guard the deposit of the truth.

ii. ANALYSIS.

$1^{1.\,2}$. Greeting.
$^{3\text{-}5}$. Thanksgiving for Timothy's past affection and faith, and desire to see him again.
A. 1^{6}–2^{13}. Exhortations based mainly on St. Paul's position.
B. 2^{14}–4^{8}. Exhortations based mainly on the position of Timothy.
A. Exhortation (1) to stir up his ministerial gift (^{6}):
remembering the nature of the Spirit given by the laying on of the apostle's hands (^{7}).
(2) to be bold to face suffering (^{8}):
remembering (*a*) the power and grace of God, which has conquered death and brought life and immortality to light ($^{9.\,10}$).
(*b*) the example of Paul himself, who has faced suffering with perfect trust in God ($^{11.\,12}$).
(3) to hold fast the truth entrusted to him (^{13}), in the strength of the indwelling Spirit (^{14}).
These exhortations are enforced by an appeal to the example of others:
(*a*) as a warning—the disloyalty of the Asiatic Christians (^{15}).
(*b*) as an encouragement—the boldness and affection and kindly help of Onesiphorus ($^{16\text{-}18}$).
(4) to be strong in the power of grace (2^{1}).
(5) to commit the true teaching to others and secure its tradition (2^{2}).
(6) to be ready to face suffering,—like a noble soldier (^{3}), which implies whole-hearted service (^{4}); like an athlete, who must keep the rules of the game (^{5}); like a husbandman, who is only rewarded if he toil well ($^{6.\,7}$):
remembering (*a*) the gospel of the Risen Christ, which has enabled Paul himself to face suffering for the elect's sake ($^{8\text{-}10}$).
(*b*) the faithful saying—with its encouragement to all who suffer with Christ, and its warning to all who deny Him ($^{11\text{-}13}$).
B. Exhortations, mainly dealing with the nature of the teaching to be given by Timothy—
(1) to urge Christians to avoid idle and useless discussions (^{14}).
(2) to be himself a true worker, rightly teaching the truth and avoiding profane babblings ($^{15.\,16}$):
remembering that (*a*) such discussions lead to impiety and spread quickly to the ruin of faith ($^{17.\,18}$).
(*b*) whereas God's foundation rests upon His knowledge of His own, and their abstention from iniquity (^{19}).
(*c*) in every house there are good and bad vessels, and a man must cleanse himself from evil to be a good vessel ($^{20.\,21}$).
(3) to avoid youthful passions, and to aim at the true spiritual qualities (^{22}).
(4) to avoid foolish investigations (^{23}):
for they cause strife, and hinder the true character and patient hopeful work of the servant of the Lord ($^{24\text{-}26}$).
(5) to avoid false teachers: for,
(*a*) there lies in the future a great growth of empty profession of Christianity combined with selfishness and a low standard of morality ($3^{1\text{-}5}$).
(*b*) this will be ministered to by false and vain teachers, deluding their votaries and opposing the truth, like Jannes and Jambres, who will, however, be soon exposed ($^{6\text{-}9}$).
(6) to abide loyally by his past teaching:
remembering (*a*) their past common experience of suffering, and of God's protection from it ($^{10.\,11}$).
(*b*) that suffering is a universal law for Christians (^{12}).
(*c*) that deceivers will grow worse (^{13}).
(*d*) the teachers from whom he has learnt even from childhood the real spiritual value and purpose of all Scripture ($^{14\text{-}17}$).
(7) to fulfil his whole duty, as an evangelist, with patience, sobriety, and courage ($4^{1\text{-}5}$):
remembering (*a*) that people will grow impatient of sound teaching ($^{3.\,4}$).
(*b*) that Paul himself is passing: his work is done: he can only look forward to the crown of righteousness ($^{6.\,7}$).
(*c*) that that crown will be given to all who love the Lord's appearing (^{8}).
$4^{9\text{-}21}$. Personal messages.
Appeal to Timothy to come quickly, because of Paul's loneliness ($^{9.\,10}$): to bring Mark also (^{11}), and to stop at Troas for his cloak and books (^{12}): to avoid Alexander ($^{14.\,15}$).
Reminder of the way in which the Lord had protected him in the past in spite of men's desertion, and trust in Him for the future ($^{16\text{-}18}$).
Special greetings to and from individuals ($^{19\text{-}21}$), with further account of his fellow-travellers (^{20}), and a renewed appeal to come soon.
^{22}. Final Salutation to Timothy and to those with him.

With the exception of the last word the Epistle is a personal letter throughout, and was probably never intended to be read aloud to the Church under Timothy's care. The note in 2^{7} emphasizes this esoteric character.

iii. LITERARY DEPENDENCE.—The Epistle is so personal and so little argumentative that there is little direct quotation in it, even from the OT, the importance of which is so strongly insisted upon ($3^{15\text{-}17}$). The allusions to it are subconscious and secondary. This may be partly accounted for by the fact that the writer was without his books and parchments (4^{13}); yet his mind is thoroughly steeped in it. Nu 16^{5}, Is 26^{13} lie behind 2^{19}, but mediated through Christ's saying in Mt $7^{23.\,24}$, Lk $13^{25\text{-}27}$: Wis 15^{7} lies behind 2^{20}, perhaps mediated through Ro 9^{21}: Ps 62^{12} is adapted in 4^{14}: Ps $22^{22\text{-}29}$ colours the whole language and thought of $4^{17.\,18}$; and perhaps Is $42^{1\text{-}3}$ affects the description of the servant of the Lord in $2^{24\text{-}26}$.

Jewish tradition—whether written or unwritten is uncertain (cf. Thackeray, *Relation of St. Paul to Contemporary Jewish Thought*, pp. 215–222)—is quoted in $3^{8.\,9}$.

One 'faithful saying' is quoted in 2^{11-13}, possibly a fragment of a Christian hymn based on Ro 6^{8} 8^{17}, Mt 10^{33}, Lk 12^{9} (cf. *CGT*, *ad loc.*): the 'seals' in 2^{19}, while based on the OT, were probably already stereotyped as Christian watchwords: 2^{8} reads like a reminiscence of some early form of creed (cf. Burn, *Introduction to the Creeds*, pp. 27–30): 4^{1-5} is perhaps a quotation from some Christian prophet (cf. Jude ^{17}): 4^{8} from some ἄγραφον of the Lord (cf. Resch, *Agrapha*, p. 253): 4^{18} recalls the end of the Lord's Prayer.

There are many parallelisms with the earlier Pauline Epistles.

$1^{3\text{ff.}}$	cf.	Ro $1^{8\text{ff.}}$.	2^{11-13}	cf.	Ro 6^{8} 8^{7}.
1^{7}	,,	Ro 8^{15}.	2^{16}	,,	Tit 3^{9}.
1^{8}	,,	Ro 1^{16}, Eph 4^{1}.	2^{22}	,,	1 Ti 6^{11}.
1^{9}	,,	Ro 16^{25}, Eph 1^{4} 2^{8}.	3^{5}	,,	Tit 1^{18}.
1^{11}	,,	1 Ti 2^{7}.	3^{7}	,,	Tit 1^{18} 3^{1}.
1^{14}	,,	Ro 8^{11}.	4^{6}	,,	Ph 1^{23} 2^{17}.
2^{4-6}	,,	1 Co $9^{7\text{ff.}}$			

Of all these passages Ph 1^{23} 2^{17}, 1 Ti 2^{7} 6^{11} alone suggest a conscious literary imitation; and they are equally consistent, if not more consistent, with the hypothesis that they are the entirely independent utterances of the same writer. The correspondences with the Acts are mainly with the speeches of St. Paul there (1^{3}, cf. Ac 23^{1} 24^{14}; 4^{7}, cf. Ac 20^{24}), but they are not close enough to be extracts; and if they need any explanation, it is very possible that St. Luke was preparing the Acts at this time.

iv. SITUATION IMPLIED AT EPHESUS (?). — (*a*) *False Teachers.*—The warning against false teachers is less prominent than in 1 Tim. or Titus: they are in the background, and their features are seen with less distinctness; yet, so far as they can be descried, they may be identified as the same as there. Their chief characteristic is to 'strive about words' (2^{14}), to indulge in 'profane babblings' (2^{16}), in 'foolish and ignorant questionings' (2^{23}), in 'fables' (4^{4}): they are 'corrupted in mind' (3^{8}), unspiritual (2^{16}), tending to a low standard of morality (2^{19}): attracting silly women by professions of knowledge, yet unable to satisfy their desire for it ($3^{6.\,7}$). These tendencies will increase hereafter (3^{1} ἐν ἐσχάταις ἡμέραις, perhaps an application of some previous prophecy; perhaps little more than 'hereafter,' cf. Pr 31^{25}), but within Timothy's own lifetime (3^{5} ἀποτρέπου, 4^{3-5}). In all these points they resemble the teachers of 1 Tim. and Titus. There are, however, two distinctive traits. (1) They are γόητες (3^{13}), *i.e.* either, loosely, 'seducers' (AV), 'impostors' (RV): or, more exactly, 'magicians,' 'jugglers,' carrying on, even in their professed Christianity, the old Jewish sorcery or the magical formulæ of the 'Ephesian letters,' akin to Simon Magus, Elymas, the sons of Sceva, or those who practised 'curious arts' at Ephesus. The analogy of Jannes and Jambres (3^{8}) makes it probable that the more exact sense is right.

(2) Two of them, Hymenæus and Philetus, taught definitely that 'the resurrection is already past.' Such an assertion must have sprung from a low view of matter, shrinking from belief in a literal resurrection of the body, and *either* (*a*) asserting that the only resurrection is the resurrection of the spirit to newness of life in baptism—a view which springs from the same source as the difficulties about the resurrection in 1 Co 15, and may have been based on a misrepresentation of St. Paul's own teaching (Ro 6^{4}), and which was a common tenet in Gnostic teaching (cf. Iren. i. 23, ii. 31; Tert. *de Resurr.* 19, *de Præscript.* 3; Justin, *Dial.* 80; Polyc. c. 7; 2 Clem. Rom. 9), but would also find sympathy in Jewish thought; *or* (*b*) asserting that a man only rose and lived again in his posterity, an explanation which is found in *Acta Theclæ* 14, ἡμεῖς σε διδάξομεν ἣν λέγει οὗτος ἀνάστασιν γίγνεσθαι ὅτι ἤδη γέγονεν, ἐφ' οἷς ἔχομεν τέκνοις—a view which would be akin to earlier Jewish thought, but is a less natural perversion of any Christian theory (see Zahn, *Einl.* i. p. 486).

There is, then, nothing to dissociate the teachers of this Epistle from those of 1 Tim. and Tit.; and the importance laid on the true spiritual purposes of the OT, as well as the *ad hominem* appeal to the Jewish Haggada ($3^{8.\,9}$), make it probable that they were perverting the spiritual value of the OT by the introduction of worthless Rabbinic legends and speculations.

(*b*) *Church Organization.*—On this there is little stress and few details of it. Timothy represents St. Paul; he is to uphold the deposit, the teaching received from Paul, Paul's gospel ($1^{12.\,13}$ $2^{2.\,8}$ $3^{10.\,14}$); he is to guide the teaching of others ($2^{14\text{ff.}}$), to exercise discipline (4^{2}). He has received a spiritual qualification for his task conferred by the imposition of St. Paul's hands (1^{6}, but see 1 TIMOTHY): his task is described as a διακονία, he himself as an εὐαγγελιστής: he is being summoned away for a special visit to St. Paul, but it seems to be assumed that he will return (3^{1-6} 4^{3-5}). Meanwhile he is to secure a sure succession for St. Paul's teaching by entrusting it to others, who will be able to hand it on in their turn to others (2^{2}). The suggestion of this Epistle, in contrast to that of 1 Tim., is distinctly against the idea that Timothy was a temporary delegate, and favours the theory that he held a permanent office and a permanent localisation of the office.

v. AUTHORSHIP.—The external evidence for the Pauline authorship is much the same as that for 1 Timothy, save that the allusions to its language in writers of the first quarter of the 2nd cent. are less unequivocal. It was possibly known by Ignatius, more probably by Polycarp (c. $5=2^{12}$, c. $9=4^{10}$), but the conscious borrowing from the Epistle is not certain in either writer. This difference may be due to the fact that it is a more private letter than 1 Timothy.

On the other hand, the intrinsic evidence of genuineness is much stronger than in 1 Tim. or in Titus. Positively, there are personal touches throughout; negatively, there is less to be urged against the genuineness. The picture of Timothy as young, timid, affectionate, is of a piece with what is known of him elsewhere: the allusions in 1^{15-18} 2^{18} $4^{10-16.\,19-21}$ bear the stamp of truth, giving a picture of desertion and cowardice in some Christians which could scarcely have been invented, and they are independent of the Acts and of all other known sources. So with regard to the writer; in character—the affection for his fellow-workers, the gratitude for kindness, the sensitiveness to desertion (cf. 2 Cor.), the prayer for those who have deserted him, the sense of the importance of his own mission, the appeal to his own teaching and his own sufferings, the self-sacrifice for the elect's sake, the assurance of the Lord's protection and of the reward which he shall receive at the last day; in method of teaching—the loyalty to Judaism (1^{3}=Ph 3^{5}), the value attached to the OT ($3^{16.\,17}$, cf. Ro 15^{4}), the use of Jewish traditions (4^{8}), the masculine contempt for trivialities of argument (2^{16}); in the substance of the doctrines taught—the stress on God's purpose and grace, on the conquest of death, on the risen Christ as the inspirer of confidence, on the need of suffering and of courage, on the moral tests of faith,—all these point clearly to St. Paul. There is no objection, on the side of Church organization or of the doctrines assailed, to be raised against his authorship. The slight distrust of Timothy's courage and conduct (1^{6} 2^{22}) may surprise us, but they would be more surprising in a forger: the repetition to him of the names of his mother and grandmother (1^{5}) are indeed unnecessary, but very natural in an old man recalling his old converts; the assertion of his apostleship (1^{11}) is natural to one who is enforcing the duty of loyal adherence to his teaching: the vague generalities about the false teaching and the absence of controversial argument in refutation of them are natural in writing to one who knew all the circumstances. The reference to the persecutions in Antioch, Iconium, and Lystra *only* (3^{11}), is explicable, as they were the first which Timothy had witnessed, and is very like that in 2 Co $11^{32.\ 33}$. The only ground of suspicion lies in the style—partly in the large number of *ἅπαξ λεγόμενα* (44 in this Epistle alone: *ἀθλεῖν, ἀκαίρως, ἀκρατής, ἀναζωπυρεῖν, ἀνάλυσις, ἀνανήφειν, ἀναψύχειν, ἀνεξικάκος, ἀνεπαίσχυντος, ἀνήμερος, ἀντιδιατίθεσθαι, ἀπαίδευτος, ἀποτρέπεσθαι, ἄρτιος, ἀφιλάγαθος, βέλτιον, γάγγραινα, γόης, γυναικάριον, δειλία, ἔκδηλος, ἐλεγμός, ἐνδύνειν, ἐπανόρθωσις, ἐπισωρεύειν, θεόπνευστος, καταφθείρειν, κνήθειν, λογομαχεῖν, μάμμη, μέμβρανα, νεωτερικός, ὀρθοτομεῖν, πιστοῦσθαι, πραγματία, στρατολογεῖν, συνκακοπαθεῖν, σωφρονισμός, φελόνης, φίλαυτος, φιλήδονος, φιλόθεος, χαλκεύς, χρήσιμος*, no one of which, however, suggests a later date), and more definitely, in the many words or phrases—either Latinisms (*χάριν ἔχω, δι' ἣν αἰτίαν*) or half-stereotyped formulæ (*καθαρὰ συνείδησις, καθαρὰ καρδία, ἐπίγνωσις ἀληθείας, παραθήκη, ὑγιαίνοντες λόγοι, ἡ ὑγιαίνουσα διδασκαλία, πιστὸς ὁ λόγος, βεβήλοι κενοφωνίαι, ἡ τοῦ διαβόλου παγίς, ὁ τοῦ θεοῦ ἄνθρωπος, ὁ νῦν αἰών*)—which suggest a different writer at a rather later stage of Christianity. With regard to these the suggestions urged on 1 Tim. will hold good, and it will perhaps be felt that, if they stood alone, they would not be so striking as when placed side by side with 1 Tim. and Titus. They would be scarcely a serious objection to this Epistle, on the hypothesis that those were later imitations of this.

The difficulty of inserting the historical situation in the time covered by the Acts, or of placing the date of the Epistle in the first Roman imprisonment, seems insuperable, and, if it is genuine, it presupposes a later imprisonment (cf. 1 TIMOTHY).

vi. INTEGRITY. — The MSS supply no hint of interpolation or of 'contamination' in the Epistle, neither does any internal necessity require such an hypothesis. But there are certain facts which have not unnaturally raised doubts about the integrity. Thus (1) the Epistle varies between two main purposes, and there is a possibility of contradiction between them. The greater part is an instruction to Timothy about his teaching at Ephesus, and it seems to be assumed that he will remain there; the latter part summons him to leave and join the writer. These two purposes are obviously capable of being combined, and the appeals in chs. 1 and 2 may naturally be interpreted 'show courage by coming to join me in my prison,' 'entrust your teaching to others in your own absence or in the prospect of your own death'; but this is not said, as might have been expected in the face of 4^{9}.

(2) Again, sections of the Epistle are personal and distinctly Pauline throughout; while others (2^{14}–3^{9}) consist of vague generalities, consistent with Pauline authorship, but not demanding it.

(3) There are some apparent contradictions, *e.g.* 3^{6} as contrasted with 2^{17} (but they are not necessarily spoken of the same persons, and, while 3^{6} refers to external success, 2^{17} refers mainly to internal degeneracy): again, 4^{11} as contrasted with 4^{21} (but Luke may have been St. Paul's only attendant in prison, Eubulus and the others Roman Christians who had access to him from outside).

(4) The construction of the opening sentence is difficult, and has suggested that it has been carelessly reconstructed from some earlier form; but its difficulty does not go beyond that of many Pauline paragraphs. Again, 1^{15-18} is easily separable from the surrounding context, and its connexion with it is not at first sight obvious: yet there is a real connexion (see the analysis), and the difficulty of its position will remain on any theory of construction.

These facts have given rise to attempts of two kinds to resolve the Epistle into separate parts.

(1) It consists of two, or possibly more, letters by St. Paul himself, which have been accidentally combined. In this case 1^{1}–4^{8} with, perhaps, 4^{19-21} and ^{22b} might form one letter, written from the Roman imprisonment, and 4^{9-18} with 4^{22a} will be a second letter, perhaps written earlier, at the time of the imprisonment in Cæsarea (Clemen), or even later in the Roman imprisonment. This theory meets many difficulties, would imply very little dislocation of MSS, and very possibly has an analogy in the end of the Epistle to the Romans.

(2) It consists of genuine fragments of Pauline letters, worked up into one whole by some later writer, say of the time of Domitian (Clemen), with the object of strengthening Christians in the face of persecution, and securing the tradition of apostolic doctrine against innovating tendencies. We might then have (*a*) $4^{9-15.\ 19-21.\ 22a}$ a short letter, calling Timothy to rejoin him, written at some time in the third missionary journey (McGiffert, Bartlet); (*b*) 1^{1}–2^{13} 3^{10}–4^{8} and 4^{16-18} a letter of encouragement to Timothy, written at the end of the Roman imprisonment; (*c*) 2^{14}–3^{9} the addition of the ultimate redactor. Further and more detailed suggestions of the possibility of reconstruction will be found in Clemen (*Die Einheitlichkeit der Paul. Briefe*, pp. 142–156); McGiffert (*The Apostolic Age*, pp. 404–414); Moffatt (*The Historical New Testament*, pp. 700–704). But there is no sufficient reason for treating any part of the Epistle as un-Pauline: the theories of interweaving of document with document are too intricate to be probable, and no one theory has commanded anything like a common assent. Jülicher (*Einleitung*^{3}, pp. 155, 156) entirely rejects the theory, because of the unity of each of the Pastoral Epistles, and regards them throughout as purely inventions attributed to the apostle.

vii. VALUE.—The importance of the Epistle is not great on doctrinal or ecclesiastical grounds: doctrinally, indeed, it adds the fullest statement of the inspiration of the OT and of its primary value to a Christian teacher that is to be found in the NT: it probably bears witness to the practice of prayer to God for mercy to the dead (1^{18}), and it shows the power of the Christian doctrine of a Risen Christ to support a Christian in the face of death: ecclesiastically, it shows the value attached to the imposition of the apostle's hands, and to a succession of ministers as a means of securing the tradition of sound teaching; but none of these points are peculiar to this Epistle. Its real value is historical and personal. Assuming the Pauline authorship, it is the chief source of evidence for Paul's life after the close of the Acts, supporting the theory of a second imprisonment, giving details of the last trial, implying further missionary work to the east, and possibly to the west (4^{10}) of Rome, testifying to his reconciliation with John Mark, and giving glimpses of some of his friends, who are not known to us from other sources. On the non-Pauline authorship, its witness to these historic facts may be trusted, and it would also be a witness to the tone of ecclesiastical thought in Pauline Churches at the end of the 1st or beginning of the 2nd cent. But its main interest is one of character, and two portraits emerge from it. (1) The portrait of the ideal Christian minister. He is, like Christ Himself, to reproduce the features of Isaiah's ideal of 'The

Servant of the Lord,' patient, gentle, hopeful, interceding (2^{24}): he is to be God's man, His loyal liegeman (3^{17}); like a soldier, unentangled with civil duties (2^{14}); like an athlete, obeying loyally the rules of the contest (2^{5}); like a husbandman, toiling hard, and, if so, earning his reward (2^{6}); like a tradesman, honestly cutting out his goods (2^{15} ?); like a fisherman, trying to catch back those who have been caught by the devil (2^{26} ?): he needs courage, gentleness in face of opposition, willingness to face suffering, hopefulness for those who have gone wrong: he is to be serviceable (*εὔχρηστος*, 4^{11}), thoroughly equipped for every good work (3^{17}), to keep himself free from moral evil (2^{22}), to rekindle the grace given by ordination, remembering that it was the gift of a spirit of love and power and discipline (1^{7}). In teaching, he is to avoid idle speculations and restless innovations, to be loyal to the truth, to be long-suffering and yet bold in rebuke; the remembrance of the Risen Christ is to be ever before him; and he is to take for his standard of life and teaching (*a*) the facts of the apostle's life (3^{10}), (*b*) the outline of the apostle's teaching, (*c*) the OT Scriptures, which are not only able to make him wise unto salvation, but also to guide him in his discipline of others.

(2) The portrait of the Christian minister, with his work done, facing death (cf. 1 John and 2 Peter). He acquiesces gladly in the present, but his eyes are turned mainly to the past or to the future. He recalls the way in which he from his youth, and his ancestors before him, have worshipped God (1^{3}): he dwells on God's power ($1^{7.\,8.\,12}$ 2^{1} 4^{17}) as having protected him in all past dangers (3^{11}), as communicated to himself (4^{17}), and yet independent of himself—God may imprison His preachers, but His word is never fettered (2^{9}): he reviews his whole course, he has no doubt of his reward; and so he looks into the future, he anticipates the false teaching that will arise (3^{1}), he warns against it, he provides for a succession of teachers to whom the truth can be entrusted (2^{2}): he strengthens his favourite son for his task: he is sure that God will protect him from every evil work that may meet him in this life, and he looks beyond the grave: he sees God's sure foundation firmly standing (2^{19}): he sees God protecting the teaching which he has handed back to His care (1^{12}): he sees God rewarding evil-doers according to their work (4^{14}): he sees the heavenly kingdom, eternal glory, life and immortality; he sees the coming in brightness (*ἐπίφανεια*) of the Righteous Judge, and the crown of righteousness given to him and to all who have loved that coming (4^{8}).

The Epistle is the letter of a good shepherd who is laying down his life for his sheep to one whom he is training to be also a good shepherd and to lay down his life for his sheep, and is inspired by the remembrance of 'the Good Shepherd' who had laid down His life and risen from the grave.

LITERATURE.—For the literature cf. 1 Timothy and Titus.

W. LOCK.

TIN (בְּדִיל *bĕdhîl*) was known as an alloy with copper at least as early as 1600 B.C. in Egypt, and probably before 2000 B.C. in Europe. It was also prepared pure in Egypt at least by 1400 B.C. The source of it is much debated. Banca, Spain, and Britain have all been proposed. That it appears as an alloy earlier in Europe than in Egypt shows that it was European; and the nearest source of it to the early bronze lands of Europe is in the tin mines of Bohemia and Saxony. Tin (Gr. *κασσίτερος*) in the literal sense is mentioned in Nu 31^{22} (P) along with brass, iron, and lead, and along with the same metals is used fig. of Israel in Ezk 22^{18} (cf. v.^{20}); and it appears in Ezk 27^{12} along with silver, iron, and lead, as an article of commerce brought to Tyre from Tarshish. In Is 1^{25} 'alloy' would be a better rendering than 'tin.' In Zec 4^{10} הָאֶבֶן הַבְּדִיל = *plummet*. See further under MINES, MINING. W. M. FLINDERS PETRIE.

TIPHSAH (תִּפְסַח = 'the ford').—The name of two places.

1. (*Θαψά*; *Thaphsa*) The northern limit of Solomon's dominions west of the Euphrates—the southern limit being Gaza (1 K 4^{24}). It is identified by nearly all commentators with Thapsacus on the right bank of the Euphrates, above the confluence of the *Belik*. Tiphsaḥ was the lowest ford across the Euphrates, and the point at which Cyrus the younger forded the river, the water being breast-high (Xen. *Anab*. I. iv. 11). At the same place Darius crossed before and after Issus, and Alexander crossed in pursuit, on two bridges (Arrian, iii. 7). Tiphsaḥ was the most important crossing-place in the middle course of the Euphrates, and on one of the great commercial routes between the East and the West. In the time of Xenophon it was great and prosperous, and it is mentioned later as the point at which river-borne goods from the lower Euphrates were landed and shipped. Under the Seleucids it was called *Amphipolis*. The town was at or near *Kalaʻt Dibse*, about eight miles below *Meskine* (Peters, *Nippur*).

2. (B *Θερσά*, A *Θαιρά* [*i.e.* תִּרְצָה Tirzah]; *Thapsa*) A town, apparently near Tirzah, which was taken by Menaḥem after he had dispossessed Shallum and seized the throne (2 K 15^{16}). Josephus (*Ant*. IX. xi. 1) writes the name *Θαψά* as if it were Thapsacus. Thenius suggests that the name was originally written *Tappuah* (cf. Luc. *Ταφωέ*). The site is unknown. C. W. WILSON.

TIRAS (תִּירָס; *Θειράς*, Luc. *Θιράς*).—A son of Japheth, Gn 10^{2} [P], 1 Ch 1^{5}. Ethnologically, the name should probably be identified with the *Turusha*, a seafaring people mentioned in the Egyptian inscriptions of the 13th cent., the *Τυρσηνοί* of the Greeks (so Ed. Meyer [*Gesch. d. Alterthums*, i. 260], followed by Dillm., Holzinger, Gunkel, *et al.*). Jensen (*Theol. Ltztg.* 1899, 3, col. 70) makes it = Tarsus; W. Max Müller (*Orient. Ltztg.* Aug. 1900, col. 290) takes it as a doublet of Tarshish of v.^{4}, which he identifies with Turs, *i.e.* the land of the Tyrrhenians or Italy. There are the strongest objections to the view of Josephus (*Ant*. I. vi. 1), Jerome (on Gn 10^{2}), and the Targg., that *Tîraṣ* = the Thracians. J. A. SELBIE.

TIRATHITES (תִּרְעָתִים; BA *Ἀργαθιείμ*, Luc. *Θαραθεί*).—A family of scribes that dwelt at Jabez, 1 Ch 2^{55}. The passage is very obscure. See SHIMEATHITES, and cf. GENEALOGY, vol. ii. p. 128^{a}, and Wellh. *de Gentibus*, 30 ff.

TIRE.—The Eng. word 'tire,' which occurs as a subst. = headdress in Is 3^{18}, Ezk $24^{17.\,23}$, Jth 10^{3} 16^{8}, is simply an aphetic form of 'attire'; it has nothing to do with 'tier' or 'tiara,' though its special application to the dress for the *head* is perhaps due to such a fanciful connexion. Cf. Adams, *II Peter*, 70, 'They metamorphose their heads, as if they were ashamed of the head of God's making, proud of the tire-woman's. Sometimes one tire is half the husband's rent-day'; also Spenser, *FQ* II. ix. 19—

> 'Her yellow golden heare
> Was trimly woven, and in tresses wrought,
> No other tire she on her head did weare,
> But crowned with a garland of sweete rosiere.'

The verb 'to tire' is used more generally = dress, adorn, as 1 P 3^{5} Tind., 'For after this maner in the olde tyme dyd the holy wemen which trusted in God, tyer them selves, and were obedient to their husbandes'; though its only occurrence in AV has the sense of attiring the head, 2 K 9^{30} 'And she painted her face, and tired her head, and looked out at a window.' The Heb. verb in this last passage is הֵיטִיב, lit. *to make a thing good, right, beautiful* (LXX ἀγαθύνειν); cf. its use in Ex 30^{7} (of trimming a lamp) and Hos 10^{1} (of erecting goodly *mazzēbahs*). The nouns rendered 'tire' are—**1.** פְּאֵר Ezk 24$^{17.\ 23}$. This word prob. denotes a *tiara* or *turban* of an ornate character. Its other occurrences are Ex 39^{28}, Ezk 44^{18} (both of the headdress of the priests), Is 3^{20} (worn by fashionable ladies) 61$^{3.\ 10}$ (in the last the bridegroom 'makes his headdress priestly,' in allusion to the splendour of, or the special way of folding, the priestly turban [unless, with Marti, *et al.*, we read יָכִין for יְכַהֵן]). **2.** שַׂהֲרֹנִים Is 3^{18}. See CRESCENTS. **3.** μίτρα, Jth 10^{3} 16^{8}.

J. HASTINGS.

TIRHAKAH (תִּרְהָקָה), king of Cush (Θαρά [so B in 2 Kings; A Θαρακά, which is read also by B in Isaiah; Luc. Θαρθάκ] βασιλεὺς Αἰθιόπων), marched out from Egypt against Sennacherib during the expedition of the latter against Judæa, in the reign of Ḥezekiah (2 K 19^{9}, Is 37^{9}), immediately before the destruction of Sennacherib's army in the night by the angel of the Lord at Libnah. Herodotus (ii. 141) relates that Sethos or Sethon, king of Egypt and priest of Hephæstus, obtained the destruction of the army of Sennacherib from his god, who at night-time sent a host of field mice into the invaders' camp at Pelusium. The mice devoured the bow-strings and harness, and left the foe helpless. 'Sethon' seems to be simply the title of the priest of 'Hephæstus,' *i.e.* Ptah of Memphis (see Griffith, *Stories of the High Priests of Memphis*, p. 8), and this title is hardly compatible with that of king. If Sennacherib's expedition be that of B.C. 701,—the only expedition to these parts recorded in his annals (see art. SENNACHERIB),—it must have taken place before the reign of Tirhaḳah, which began in 691. This evidence combined points to the following hypothetical reconstruction of the episode: Tirhaḳah, before his elevation to the Ethiopian-Egyptian throne, was governor of Lower Egypt; and at its capital, Memphis, he was high priest of Ptah when Sennacherib threatened invasion (Griffith, *l.c.* p. 10). After some signal and unexpected disaster on the frontier of Palestine or Egypt, Sennacherib was compelled to retreat hastily.

To return to facts: Sennacherib died in B.C. 682. Tirhaḳah (Egyp. THRQ), who was the last king but one of the 25th (Ethiopian) Dynasty,—founded by Shabaka,—began to reign in 691. His monuments are found at Gebel Barkal in Nubia, as well as throughout Egypt. In Egyptian documents Tirhaḳah is entitled 'Pharaoh'; but, though probably long resident in Egypt before ascending the throne (Schaefer, *Aegyp. Ztschr.* 1900, 51), he was essentially an Ethiopian, and was for some time excluded from Egypt by the Assyrians. Outside Egypt, doubtless, he was known as 'king of Cush.' After sustaining several attacks, Taharqa (Assyr. Tarḳū) was driven out of Egypt in 670 by Esarhaddon, who plundered Memphis and Thebes, and divided the government among 20 rulers — chiefly native — tributary to Assyria. This arrangement was of short duration. Tirhaḳah seems to have returned to Egypt after Esarhaddon had withdrawn, and Esarhaddon was on his way to punish the Egyptian revolt when he died in Nov. 669 (Johns in *Enc. Bibl. s.v.* 'Esarhaddon'). The first expedition of his successor, Assurbanipal, was against Egypt. It was on a great scale, and overwhelmed both Lower and Upper Egypt. Tirhaḳah fled from Memphis to Thebes, and from Thebes to Ethiopia, whence he at once commenced intriguing with the princes of the Delta. The plot was frustrated, and soon afterwards Tirhaḳah died. He was succeeded by Tanut-Amon (Assyr. Tandamane), who recovered Egypt, but was driven out by Assurbanipal in the last Assyrian expedition ever made against that country.

F. LL. GRIFFITH.

TIRHANAH (תִּרְחֲנָה; B Θαράμ, A Θαρχνά, Luc. Θαραανά). — A son of Caleb by his concubine, Maacah, 1 Ch 2^{48}.

TIRIA (תִּירְיָא, but Baer תִּרְיָא; B om., A Θηριά, Luc. Ἐθριά).—A son of Jehallelel, 1 Ch 4^{16}.

TIRSHATHA (הַתִּרְשָׁתָא).—The word occurs in five places; the LXX omits it altogether in Neh 8^{9} 10^{1}; reads on the doubtful authority of a late corrector Ἀθαρσαθά in Neh 7^{70}; and in Ezr 2^{63}, Neh 7^{65} fluctuates between A Ἀθερσαθά, B Ἀθερσαά, and Ἀσερσαθά. The term occurs also under the disguised form of Attharias in 1 Es 5^{40} and of Attharates in 1 Es 9^{49} (cf. vol. i. p. 203). That the word is the name of an office, is indicated by the constant presence of the article; but Ewald's (*HI*, Eng. tr. v. 87) conjecture of the high-shrievalty is not happy. The word is genuine Persian, a modified form of a hypothetical Old Pers. *tarsāta* (cf. J. Scheftelowitz, *Arisches im AT*, p. 93), of which 'his reverence' in its literal sense and not in its ecclesiastical usage may be taken as a close modern equivalent. In Neh 12^{26} and elsewhere, for the Persian term is substituted the Semitic הַפֶּחָה (see GOVERNOR), which is the title of the prefect or viceroy, with both civil and military functions, of a province or smaller district under either Assyrian or Persian rule. The appointment was made directly by the king; and when for any reason such an official was sent on special service, his relation to the chief of the province was not always clearly defined, and friction and jealousy followed (Ezr 5^{3} to 6^{14}). The title is derived from the Assyrian *paḫû*, through the Babylonian *paḫat* (see Delitzsch, *Heb. Lang. in Light of Assyr. Research*, pp. 12, 13; Schrader, *COT* i. 175, 176), and is neither post-exilic nor Persian in its origin. Its use dates from the time of Jeremiah, and continued into the Talmudic period, when the term was used as equivalent to ἀρχιερεῖς (*Bikkurim*, iii. 3). On the whole the Tirshatha appears to have been a royal commissioner or plenipotentiary, invested with the full powers of a satrap or viceroy, and employed on a special mission with the accomplishment of which his appointment ceased.

R. W. MOSS.

TIRZAH (תִּרְצָה, Θερσά).—**1.** Mentioned Jos 12^{24} as one of the 31 places whose kings Joshua smote. Tirzah afterwards became the capital of Jeroboam I., presumably of his son Nadab, and certainly of the three adventurers, Baasha, Elah, and Zimri (1 K 14^{17} 15$^{21.\ 33}$ 16$^{6.\ 8.\ 9.\ 15}$). In 1 K 14^{17} the reading of the LXX (A) is Σαριρά, *i.e. Zereda*, Jeroboam's birthplace. Baasha was buried at Tirzah (1 K 16^{9}), probably Elah also, as it was there he was slain while drinking in the house of one of his officers (v.$^{9f.}$). The Omrides transferred the seat of government to Samaria (vv.$^{24.\ 29}$), but Tirzah retained its importance probably as a fortress, as it was there [if MT be correct, but cf. LXX and Buhl, p. 247] that Menaḥem gathered a force to attack Shallum (2 K 15^{14}). After this Tirzah drops out of history.

In Ca 6^{4} the Shulammite is declared to be beautiful as Tirzah, comely as Jerusalem. The Heb. custom of personifying cities as women robs this comparison of the strangeness it would else have for us. It may be the glory and prestige of the capital that led to the simile, quite as much as the circumstance that Tirzah had a reputation for beauty, or that it occupied a site renowned for its loveliness.*

---

* Neither LXX nor Vulgate take Tirzah here as a proper name. A derivation from רָצָה, *to delight*, is implied in their renderings (εὐδοκία, *suavis*).

The site of Tirzah has not yet been recovered beyond doubt. *Teiasir*, a fortress on the high road from Shechem to Bethshan at its junction with the Abel-meholah road (see G. A. Smith, *HGHL* 355), seems too far north to suit 2 K 15^{14}, and generally farther north than Jeroboam would be likely to fix his home. Robinson (*BRP*^{2} iii. 302 f.) suggests the identification of Tirzah with *Tulluzah*, a town on a hill not far north of Mt. Ebal, which agrees with the position assigned to *Thersa* by Brocardus (*Descriptio*, vii.), 3 leagues east of Samaria. A. Socin in Baedeker's *Pal. and Syr.* accepts this identification; but Buhl (*GAP* 203) is inclined to identify Tirzah with the modern *eṭ-Ṭîre*, the Tirathana of Jos. (*Ant.* XVIII. iv. 1) in the neighbourhood of Gerizim.

2. One of the five daughters of Zelophehad whose case decided woman's rights in property among the Jews. The order of their names (Nu 26^{33} 27^1 36^{11}, Jos 17^3, all P) differs in 36^{11} from that of the other lists, and Heb. and LXX do not agree.

A. S. AGLEN.

TISHBITE.—See ELIJAH, vol. i. p. 687; and cf. Ed. König in *Expos. Times*, xii. (1901) 383.

TISHRI (Month).—See TIME.

TITANS.—A Greek word (Τ(ε)ιτᾶνες), mythological in its history and meaning, used in the LXX in translating the term 'valley of Rephaim' in 2 S $5^{18.22}$. It is also used in Judith (16^7), in the encomium upon the heroine—

> 'For their mighty one fell not by young men,
> Neither did sons of Titans smite him,
> Nor tall giants set upon him;
> But Judith,' etc.

These passages are principally interesting as showing how the Hellenistic Jews who translated the OT, and who wrote Judith, connected in thought the *rĕphā'îm* of their scriptures with the dim and mighty figures of the Greek mythological legends. See REPHAIM, GIANT.

W. J. BEECHER.

TITHE (מַעֲשֵׂר, δεκάτη).—The payment of tithe is a practice both ancient and widespread, being found among many peoples, Semitic and non-Semitic. The choice of a tenth as the portion due to God was dictated by obvious considerations. The history of the tithe in Israel is in many respects obscure. In the strange, and probably late, document, Gn 14, we read that Abraham paid tithes of the spoil to Melchizedek; and Jacob at Bethel makes a conditional vow to pay God a tenth of all that He gives to him (Gn 28^{22} E). But these narratives cannot be taken as evidence for patriarchal times. The latter is one of several which carry back the practice of the narrator's own time to an origin in the patriarchal age, and is illustrated by Am 4^4, which shows that tithes were paid at some of the N. Isr. sanctuaries in the reign of Jeroboam II. (see Driver, *ad loc.*). It is accordingly remarkable that no reference is make to tithes in the Bk of the Covenant. This is usually explained on the theory that the tithes were originally identical with the first-fruits, and that the need of more strictly defining the amount that should be paid, led, in the later legislation, to the use of the term which had already been employed in the N. Isr. sanctuaries. W. R. Smith, on the contrary, thinks that the tithe was a fixed tribute, comparatively modern in its origin. At an earlier period the tribute took the form of first-fruits, which were a private offering. When this was no longer adequate to meet the expenses of a more elaborate cultus, the tithe was charged as a fixed burden on land. We know from 1 S 8^{15} that a tithe was paid to the king, and, if he devoted this to the support of the royal sanctuaries, the transition to a tithe paid by the farmers directly to the sanctuaries is readily accounted for. Unlike the first-fruits, the tithe was used to provide the public banquets at sacred festivals (see W. R. Smith, *RS*^{2} 245–254). The later legislation and practice were as follows:—

(*a*) *In Deuteronomy.*—In 14^{22-27} it is enacted that each year the produce of the soil should be tithed, and the tithe taken to the central sanctuary and there eaten; or, if this be inconvenient by reason of distance, it may be turned into money, which must be spent on a sacrificial banquet at the central sanctuary. To this the Levite, since he has no portion, is to be invited. It must be noticed that the tithe is not used for public feasting, but is to be consumed by the farmer and his household. This regulation may be a reform due to the fact that in earlier times the ruling classes, while not furnishing the provisions for the feast, secured the best for themselves. Further, the tithe is not used for the support of the priesthood or the temple services. The Levite has a moral claim to a share in the banquet, but it rests with the farmer himself whether this is recognized. In the following verses ($14^{28.29}$) and in 26^{12-15} it is enacted that every third year, called the year of tithing, all the tithe shall be laid up in the towns and distributed to the Levite, the stranger, the fatherless, and the widow. It is generally agreed that Deuteronomy does not contemplate two tithes,—one to be consumed each year, including the third, at the central sanctuary, and the other to be levied for charity every third year,—but rather a different destination for the same tithe, so that in the third year it shall be kept at home and devoted exclusively to charity. The origin of this regulation is perhaps to be found in the abolition of the old public banquets, and consequent necessity that some other provision should be made for the poor. Since there would be no tithe in the Sabbatical year, when the land lay fallow, the year of tithing would probably coincide with the third and sixth years in each cycle of seven years. The question remains whether the tithe in Deuteronomy is to be identified with the first-fruits. In favour of this view it may be urged that it is not probable that a double tribute should be exacted from the crops, and that the close connexion of the law of first-fruits with that of tithes in Dt 26^{1-15} shows that the two are really identical. The basket of first-fruits presented to the priest must be assumed in that case to be a portion of the first-fruits taken from the tithe. The command to 'rejoice in all the good which J″ thy God hath given unto thee,' implies that a feast followed the presentation of the basket of first-fruits, and this would correspond to the banquet on the tithe enjoined 14^{22-27}. The introduction of the term 'tithe' will then have been due to the necessity of fixing with precision the amount of the first-fruits. On the other hand, 18^4 ordains that the first-fruits shall be given to the priest, but this was certainly not the case with the tithe. And the feast referred to in 26^{11} may not have been a feast on the first-fruits. It is difficult to decide between the two views, but it seems safer on account of 18^4 (which would otherwise have to be regarded as probably later) to distinguish between the tithe and the first-fruits. The objection based on the improbability that a double tribute would be exacted, falls to the ground if the first-fruits consisted merely of the basket of fruit, etc., presented at the central sanctuary.

(*b*) *In the Priestly Code* (P).—In the legislation of Ezekiel, which forms the transition to P, there is no law as to tithes. P exhibits a great advance on the earlier regulations. According to Nu 18^{21} 'all the tithe in Israel' is given to the tribe of Levi 'for an inheritance.' The Levites are in their turn to give a tenth of this ('a tithe of the tithe') to the priests ('a heave-offering to Aaron the priest,' Nu 18^{26-28}). The origin of this is probably to be sought in an extension of the charity tithe enjoined in Deuteronomy, which is now devoted to the Levites exclusively, and used for this purpose, not once in three years, but every year. Lv $27^{30.\ 31}$ ordains that, if the tithe is redeemed, one-fifth of the value shall be added. It is generally agreed that a tithe of cattle is not contemplated, but only of agricultural produce. It is true that in Lv $27^{32.\ 33}$ cattle are included, and rules are given as to the selection, and to prevent any exchange. But this law stands by itself, it is not referred to in Neh $10^{37.\ 38}$ 12^{44} $13^{5.\ 12}$, and is first mentioned 2 Ch $31^{5.\ 6}$. It is probably a later addition inserted between the time of Nehemiah and that of the Chronicler. Attempts have been made to reconcile the regulations of the Priestly Code with those of Deuteronomy. It has been supposed that Deuteronomy refers to a second tithe distinct from that in P and to be levied on the nine-tenths remaining after the tithe to the Levites had been deducted. Against this the following considerations are decisive. No hint is given in Deuteronomy that such a second tithe is spoken of, nor can such an interpretation be fairly put on the passage, for a reference to the assumed first tithe would have been necessary. Nor is it probable that a tax of nearly one-fifth of the whole produce should be imposed on the farmers. Nor is it credible that the Levites should participate in the second tithe because, like the poor and defenceless, they were dependent on charity, if they were in possession of a tithe already made over to them. And, lastly, the language of Nu 18^{21} 'unto the children of Levi, behold, I have given all the tithe in Israel for an inheritance,' utterly excludes any tithe which was devoted, as the Deuteronomic tithe, to other purposes. Here, as elsewhere, the explanation is that the regulations belong to different stages of legislation.

(*c*) *In later Judaism.*—Two tithes were levied —one for the Levites in accordance with the law of P, the other to be consumed by the offerer in accordance with that of D. The tithe was the most valuable part of the income of the Levites. The Mishna laid down this rule: 'Everything which may be used as food, and is cultivated and grows out of the earth, is liable to tithe' (*Maaseroth* i. 1). The Pharisees evinced their scrupulous adherence to the Law by offering tithes of 'mint, anise, and cummin' (Mt 23^{23}). The second tithe was of course consumed by the offerer, and with it the tithe of cattle was usually reckoned, though Philo apparently includes it in the perquisites of the priests. If the second tithe was converted into money, one-fifth of the value had to be added; and the money could be spent only on food, drink, and ointment necessary for the sacrificial feast. The charity tithe (or 'third tithe') was levied for the poor every third year.

LITERATURE.—Nowack, *Heb. Archäol.* ii. 257-259; Wellhausen, *Prolegom.* pp. 156-158; Driver, *Deut.* pp. 166-173; W. R. Smith, *RS* 2 pp. 245-253; Schürer, *HJP* II. i. 231.

A. S. PEAKE.

TITLE ON CROSS.—It was customary in the Roman empire, when a criminal was going to execution, for a board (called *σανίς*), on which the ground of condemnation (*αἰτία, causa*) was written, to be carried before him or hung round his neck—the inscription being known as *titulus* (Gr. *τίτλος*). Instances of this custom will be found in Suet. *Calig.* 32—'*præcedente titulo qui causam pœnæ indicaret,*' *Domit.* 10; Eusebius, *HE* v. 1 (see Swete, *St. Mark*, p. 359). All four evangelists mention that the custom was observed at the crucifixion of Jesus Christ, though they describe the title as affixed to the cross, without referring to its being carried on the way to Golgotha. They have various styles of indicating it. As usual, St. Mark's description is the fullest. He calls it 'the superscription of his accusation' (*ἡ ἐπιγραφὴ τῆς αἰτίας αὐτοῦ*, Mk 15^{26}); in the First Gospel it is 'his accusation' (*αἰτίαν αὐτοῦ*, Mt 27^{37}); and in the Third it is simply 'a superscription' (*ἐπιγραφή*, Lk 23^{38}). The Fourth Gospel calls it by the technical name (*τίτλος*), and states that it was written in three languages—Hebrew (*i.e.* Aramaic, the language of the Jews of Palestine), Latin (the official language), and Greek (the language current throughout the East), Jn $19^{19.\ 20}$. The four Gospels also vary in their statements of the words of the title, viz.:—

Mk = 'The king of the Jews' (*ὁ βασιλεὺς τῶν Ἰουδαίων*).
Mt = 'This is Jesus the king of the Jews' (*οὗτός ἐστιν Ἰησοῦς ὁ βασιλεὺς τῶν Ἰουδαίων*).
Lk = 'This is the king of the Jews' (*ὁ βασιλεὺς τῶν Ἰουδαίων οὗτος*).
Jn = 'Jesus of Nazareth the king of the Jews' (*Ἰησοῦς ὁ Ναζωραῖος ὁ βασιλεὺς τῶν Ἰουδαίων*).

It is not easy to determine which of these was the original form of words. The instance from the *Letter of the Churches of Vienne and Lyons*, where the martyr's name is given (*οὗτός ἐστιν Ἄτταλος ὁ Χριστιανός*, Eusebius, *HE* v. 1), would suggest (1) that Mt and Lk are right in giving the word '*this*' (*οὗτος*), and (2) that Mt and Jn are right in giving the name—'*Jesus.*' Since Mt is the only Gospel that has both the forms found in the passage cited from Eusebius, the preference seems to lie with the phrase as given in that Gospel. But then we cannot be sure that the same form of words was used in all cases, or that the *Letter of the Churches of Vienne and Lyons* gives it with verbal accuracy. Moreover, it may have been variously phrased in the three languages. The following arrangement has been suggested:—

ישוע הנצרי מלך היהודים

ΟΥΤΟϹ ΕϹΤΙΝ ΙΗϹΟΥϹ Ο ΒΑϹΙΛΕΥϹ ΤΩΝ ΙΟΥΔΑΙΩΝ.

REX JUDAEORUM.

(See Geikie, *Life and Words of Christ*, ch. lxiii. note e).

The variations are quite immaterial. In all four accounts the essential words are the same. The title describes Jesus as 'King of the Jews.' It makes no mention of sedition or usurpation; the phrase is absolute. Plainly, it was a sarcastic expression; but it was perceived at once that the point of the sarcasm was against the Jews rather than against their Victim. This is shown by St. John, who narrates how the chief priests requested Pilate to change the title to 'He said, I am king of the Jews,' and how Pilate haughtily refused to alter what he had written (Jn $19^{21.\ 22}$).

W. F. ADENEY.

TITTLE.—The Eng. word 'tittle' is simply a various spelling of 'title.' One of the uses of 'title' (after Lat. *titulus* in late use, and Fr. *title*) was to denote the stroke above an abridged word. It was thence used for any trifling stroke or mark which distinguished one letter from another, and was chosen by Wyclif and Tindale to translate the Gr. *κεραία* (WH *κερέα*, see vol. ii. App. p. 151) in its only occurrences Mt 5^{18}, Lk 16^{7}. All the Eng. VSS up to and including AV (1611), except the Rhemish, spell the word with one *t*. So Tindale in his address to the Reader, *Pentateuch* (Mombert's Reprint, p. 3), 'For they which in tymes paste were wont to loke on no more scripture then they founde in their duns or soch like develysh doctryne, have yet now so narowlye loked on my translatyon, that there is not so moch as one I therin if it lacke a tytle over his hed, but they have noted it, and nombre it unto the ignorant people for an heresye.' But, in quoting Mt 5^{18} three pages later, he spells the word 'tittle.'

The Gr. *κερέα* (lit. 'little horn') was used by grammarians to denote the Gr. accents and any small stroke distinguishing one Heb. letter from another, as ב from כ. On the importance attached to these marks by the Rabbins see Lightfoot on Mt 5^{18} (vol. xi. p. 99 ff.). J. HASTINGS.

TITUS (*Τίτος*).—A companion of St. Paul, who is always mentioned by him with great affection and confidence, yet whose name appears but on rare occasions in the Epistles and never in the Acts. On account of this silence of the Acts it has been conjectured that Titus is the second name of some one of St. Paul's companions who are mentioned there, and attempts have been made to identify him with Timothy, with Silas, and with Titus (or Titius) Justus (Ac 18^{7}); but none of these conjectures has met with acceptance (cf. Zahn, *Einleitung*, i. pp. 149, 190; Holtzmann, *Pastoralbriefe*, p. 81). The name is Latin, but, as with *Paul*, this proves little: his birthplace is unknown; later legends place it in Crete; St. Chrysostom in Corinth; and the Acts of Thecla (c. 2) speak of him as living with Onesiphorus at Iconium at the time of St. Paul's first visit there. All that can be said for certain is that he was a Gentile (Gal 2^{3}), probably converted by St. Paul himself (*γνησίῳ τέκνῳ*, Tit 1^{4}), and living at Antioch fourteen years after St. Paul's conversion, when the dispute arose about the circumcision of the Gentiles. At this time Paul took him with him to Jerusalem: there an attempt was made to compel him to be circumcised; St. Paul resisted the compulsion, and probably Titus was never circumcised, though the ambiguity of St. Paul's words leaves it just possible that he was circumcised as a voluntary concession on St. Paul's part (cf. Lightfoot on Gal 2^{1-4}; Hort, *Judaistic Christianity*, pp. 76–83).

Titus remained St. Paul's companion, being perhaps with him when he wrote Galatians [may *ὁ σὺν ἐμοί* (2^{3}) mean 'who is with me still'? cf. *οἱ σὺν ἐμοί* of 1^{2}], but not mentioned again until the time of the incidents which caused the writing of 1 and 2 Corinthians. At this time he paid two, if not three, visits to Corinth.—(*a*) In the year before the writing of 2 Cor. (*ἀπὸ πέρυσι*, 8^{10}) he went at Paul's request (2 Co 12^{18}) with one other brother to Corinth, perhaps carrying 1 Cor. with him, perhaps also authorized to explain the method of the collection for the saints alluded to in 1 Co $16^{1.2}$: at any rate he did organize it, and that on a religious basis (*προενήρξατο*, 2 Co 8^{6}), and returned to St. Paul with news of the zeal shown in the matter at Corinth.—(*b*) Probably after he had left Corinth there arose some serious opposition to St. Paul there; perhaps Timothy was insulted and set at nought [cf. 2 CORINTHIANS and PAUL], and Titus, who was already known there, was despatched from Ephesus to deal with the crisis, carrying the letter referred to in 2 Co 2 and 7. St. Paul had often boasted to Titus of the loyalty of his Corinthian converts (2 Co 7^{14}); but he was afraid now lest his boast would be proved empty: he waited, restless and anxious for the return of Titus; he expected to meet him at Troas, but Titus did not appear; apparently, the crisis required a longer time than Paul had expected: he moved on to Macedonia; and there Titus arrived, and with good news. The majority of the Corinthian Church had formally punished the offender: they had received Titus with fear and trembling: they had shown regret for their previous conduct, indignation against the offender, enthusiasm for St. Paul: Paul's boast had been justified: Titus had been overjoyed: St. Paul was comforted (2^{14} 7^{11-15}).—(*c*) On the receipt of this news Paul wrote 2 Cor. and requested Titus, who gladly accepted the request, to go, accompanied by two other brethren, on a fresh visit to Corinth and to complete the collection for the saints. Titus was to represent the apostle; the two brethren represented Churches, probably those of Macedonia (8^{23}).

The next reference to Titus is in the letter to him. This implies that St. Paul, after the release from his first Roman imprisonment, had travelled with Titus in the East, that they had landed at Crete and had evangelized several towns (*κατὰ πόλιν*, 1^{5}), but that St. Paul had been unable to remain longer, and had therefore left Titus behind to appoint presbyters and to complete the organization of the Church. Titus found considerable opposition, especially from the Jews (1^{10}), and much tendency to insubordination, and possibly had written to St. Paul to report this and to ask for his advice (so Zahn, *Einleitung*, i. p. 430). Whether this were so or not, St. Paul wrote a short letter pressing him to complete the organization, to ordain presbyters, to teach sound doctrine and avoid empty disputations, and to exercise his authority firmly. The letter was probably sent by Zenas and Apollos (3^{13}), and Titus was requested to be ready to leave Crete and join St. Paul at Nicopolis as soon as he should receive a further message through Artemas or Tychicus (3^{12}). Probably it was thence that St. Paul despatched him on a mission to Dalmatia (2 Ti 4^{10}).

A comparison of 1 Ti 3^{12} with Tit 2^{15} perhaps suggests that Titus was older than Timothy, and the relations of the two with the difficulties at Corinth imply that he was the stronger man (cf. 1 Co 16^{10} with 2 Co 7^{15}). He volunteers readily for a delicate task (2 Co 8^{17}), is full of affection and enthusiasm for the Corinthians (*ib.* 7^{15}); he is effective, free from all sordid motives, sharing St. Paul's spirit, walking in his steps (12^{18}), his genuine son (Tit 1^{4}), his brother (2 Co 2^{13}), his partner and fellow-helper (8^{23}).

The omission of his name in the Acts is scarcely remarkable when the references in the Epistles are considered: if the incident of Gal 2 is to be identified with that of Ac 15, he is alluded to, without name, in *τινας ἄλλους ἐξ αὐτῶν* (v.^{2}): the incidents of 1 and 2 Cor. are wholly omitted in the Acts: and those of the Epistle to Titus and of 2 Tim. fall without its scope.

It is interesting to note that Titus, the Gentile, is chiefly employed in missions to the mainly Gentile Church of Corinth: that his principal work there was organizing the collection for the saints, carrying out the injunction to 'remember the poor,' laid upon St. Paul in his presence at Jerusalem (Gal 2^{10}); and that at Crete he finds his chief opponents among those of the circumcision, (Tit 1^{10}).

Subsequent Church historians treated Titus as bishop of Crete and living a celibate life to an old age in the island (Eusebius, *HE* III. iv. 6; *Const. Apost.* vii. 46; pseudo-Ign. *ad Philad.* c. 3; and for fuller details, Lipsius, *Die Apokryph. Apostelgeschichte*, ii. 2, pp. 401–406). An interesting panegyric on him is found in the works of Andrew of Crete (Migne, *Patr. Gr.* vol. 97). His name is given still to churches in Crete: it was appealed to as a battle-cry in the struggles of the Cretans with the Venetians; his body was said to have been retained at Gortyna for many centuries; the head was carried away by the Venetians, and is still preserved at St. Mark's. His death is commemorated on Jan. 4 in the Latin Church, on Aug. 25 in the Greek, Syriac, and Maronite Churches (*Acta Sanctorum*, i. pp. 163, 164; Nilles, *Kalendarium Manuale*). W. LOCK.

TITUS, EPISTLE TO.—

i. Historical Situation of the Letter.
ii. Analysis.
iii. Literary Dependence.
iv. Situation at Crete: (*a*) false teaching; (*b*) organization.
v. Authorship.
vi. Integrity.
vii. Value.
Literature.

i. HISTORICAL SITUATION.—Paul and Titus had been together in Crete. It is probable that they found the island already evangelized before their arrival (cf. Ac 2^{11}); for by the time this letter is written whole families ($1^{6.\ 11}$), and people of all classes and ages (2^{1-10}), consisting both of Jews and Gentiles (1^{10}), belong to the Church. But the communities were unorganized, and there were false teachers. St. Paul himself began to complete the organization; probably meeting with opposition from the false teachers ($3^{10.\ 11}$), and calling out hearty affection from others ($3^{14.\ 15}$). But for some reason he could not stay to finish his work, and left Titus with definite instructions to complete it (1^5). Time elapsed after he left, but apparently only a short time, before this letter was written. St. Paul was moving about with some of his disciples (3^{15}),—perhaps in Macedonia (if we may argue from the likeness to 1 Tim.),—intending to winter at Nicopolis. Possibly he received some communication from Titus, reporting progress at Crete (so Zahn, *Einl.* i. p. 430; but unconvincingly). More likely, he took the opportunity of the fact that Zenas and Apollos were starting on a journey which would take them past Crete to send a letter to Titus in order to prepare him to join him in Nicopolis, and to strengthen him to enforce a high moral standard in Crete, in spite of the dangerous tendencies of the false teachers.

The dates both of the visit to Crete and of the composition of the letter are uncertain. The organization of the Church is so little advanced that it might easily fall within the period covered by the Acts; and it is possible that the visit may be that of Ac 27^9 (*ἱκανοῦ χρόνου*), and that this letter was written early in the Roman imprisonment (so Bartlet, *Apostolic Age*, p. 182): but Titus is not mentioned as being present at the time of Ac 27, and the surest indication for the date of the letter is its likeness to 1 Tim.; so that probably both the visit and the letter fall after the release from the Roman imprisonment [see 1 TIM.].

ii. ANALYSIS.—

1^{1-4}. Salutation (with special emphasis on the writer's own apostleship and on the common faith).
1^5–3^{11}. Advice to Titus.
A. 1^{5-16}. *Need of appointing proper ministers.*
  Reminder of Paul's past instructions to appoint presbyters (^{5}).
  Importance of high moral character in an overseer ($^{6-8}$), that he may (*a*) strengthen the sound teaching, (*b*) refute the opponents of it (^{9}).
  Description of these opponents, as insubordinate, quibbling, money-making, caring for fables and commandments of men, forgetting the great Christian truth—'All things pure to the pure,'—inconsistent and worthless ($^{10-16}$).
B. 2^1–3^{11}. *Sketch of the true features of the Christian character which Titus is to enforce.*
  (*a*) *For Christians among themselves* (2^{1-15}); for the elder men and women, for the younger women and men, for Titus himself, and for slaves,—all are to live a life true to the sound teaching: (1) in order to avoid giving offence to the heathen world around ($^{5.\ 8.\ 10}$); (2) because the saving grace of God and Christ's atonement have trained us to rise above sin, and live an attractive life ($^{11-14}$).
  (*b*) *For Christians in relation to the outer world* (3^{1-8}): (*α*) subordination to authority (^{1}); (*β*) gentleness to all men (^{2}).
    Reason—God's loving-kindness to us has raised us from the old heathen life of hatred to a new life of righteousness; so that believers in God are bound to set an example of noble and useful lives ($^{3-8}$).
  (*c*) *For Titus himself.*—He is to avoid foolish questionings (^{9}), and to reject from the Church a 'heretic' who refuses to listen to his admonition ($^{10.\ 11}$).
Personal message about his own movements ($^{12.\ 13}$).
Final word of advice to those who obey him at Crete (^{14}).
Salutation (^{15}).

Like 1 Tim., it is essentially a private letter of instructions, probably never intended to be read aloud in the churches at Crete, though a word of greeting to the whole Church (or possibly only to Titus and his helpers) is added (3^{15}). The main stress is throughout on character, on a useful fruitful life, as the outcome of a wholesome teaching; and (as in 1 Tim.) each section culminates in an important doctrinal statement—1^{15} 2^{11-14} 3^{4-7}, the last saying being called 'faithful' (*πιστὸς ὁ λόγος*).

iii. LITERARY DEPENDENCE.—One Christian saying is quoted (*πιστὸς ὁ λόγος*, 3^8), and one line of Epimenides (1^{13}). The OT is never appealed to in direct quotation, but its language is consciously used in 1^{14}=Is 29^{13} (cf. Mt 15^9, Mk 7^7, Col 2^{22}), 2^5 =Is 52^5 (cf. Ro 2^{24}, 1 Ti 6^1), 2^{14}=Ps 130^8, Dt 14^2, cf. Ezk 37^{23} (cf. 1 P 2^9), 3^6=Jl 3^1 (cf. Ac $2^{17.\ 18}$); all of them passages which belong to the common stock of early Christian writers, and half of which are used in the Pauline Epistles.

Reminiscences of our Lord's teaching may be found in 1^{15} (=Mk 7^{19}, Lk 11^{41}), 3^5 (=Jn 3^5), 3^{10} (=Mt 18^{15-17}), but are not such as to imply literary dependence on the written Gospels. The same is true of points of similarity with 1 Peter, which are very slight: 1^{5-9} = 1 P 5^{1-4}, 3^1 = 1 P 2^{13}, 3^{4-7} = 1 P 1^{3-5}. (But see Bigg, *International Critical Commentary on 1 and 2 Peter*, p. 21, who would regard 1 Peter as older than and as having influenced this Epistle). There are more verbal points of contact with the earlier Pauline Epistles; cf.

1^{1-4} with Ro 1^1 16^{25-27}.
1^{15} ,, ,, 14^{20}.
2^{14} ,, Gal 1^4 (?).
3^1 ,, Ro 13^1.
3^3 ,, Eph 2^3, 1 Co 6^{9-11}.
3^5 ,, ,, 2^8 5^{26}.

But they all suggest the same mind dealing with the same subject at a different time, rather than a different writer borrowing from literature.

The relation to 1 Tim. and, in a less degree, to 2 Tim. is more complex. As compared with 1 Tim. the purpose is the same, and the structure is the same; the warning against false teachers forming a framework in which the rules about organization and character are inserted; in the same way each section culminates in a doctrinal climax. There is also verbal similarity of a marked type.

Cf. Tit 1^{1-4} with 1 Ti $1^{1.\ 2}$.
,, 1^{5-9} ,, ,, 3^{1-7}.
,, 1^{11} ,, ,, 3^9, 2 Ti 3^6.
,, 2^{1-6} ,, ,, $5^{1.\ 2}$.
,, 2^7 ,, ,, 4^{12}.
,, $2^{9.\ 10}$,, ,, 6^1.
,, 2^{14} ,, ,, 2^6.
,, 2^{15} ,, ,, 4^{12} 5^{20} 6^2.
,, 3^1 ,, 2 Ti 2^{21} 3^{17}.
,, 3^5 ,, ,, 1^9.
,, 3^9 ,, 1 Ti 4^7 6^{11}, 2 Ti $2^{16.\ 23}$.

In nearly every case there is a freshness of treatment which is against the theory of deliberate borrowing; even in 1^{5-8}, the most continuous instance of similarity, there are changes (*e.g.* the omission of *μὴ νεόφυτον*, 1 Ti 3^6) which are suitable to the circumstances of a comparatively new Church, and this list of requirements may easily have been drawn up in a written form by St. Paul for frequent use, and be partly indebted to Jewish or Gentile lists of official requirements (cf. 1 TIM.).

The more complex organization and the fuller details about worship in 1 Tim. apparently favour the priority of Titus; but all the differences may be due to the different circumstances of the two delegates and the two Churches. There is nothing in the letters to make it improbable that they were written on the same day and sent by the same messenger.

The analogy of the relation of Ephesians to Colossians is the nearest in the NT.

iv. SITUATION IMPLIED IN CRETE.—(*a*) *The false teachers* are partly Jews, partly Gentiles; the Jews being the more prominent. They are influential, upsetting whole families (1^{11}), opposing sound teaching (1^{9}), tending to reject the authority of Titus (1^{10} 2^{15} 3^{10}), quibbling, misleading, money-seeking (1^{10-12}), inconsistent in their lives with their professed knowledge of God (1^{16}, but these words do not necessarily apply to the teachers). The substance of their teaching consists of foolish and profitless investigations, genealogies, questions connected with the Law ($3^{9.10}$), Jewish legends, and commands of men (1^{14}), apparently laying stress on the requirements of a Levitical purity (1^{15}). In contrast with 1 Tim., there is in this Epistle no trace of anything akin to 2nd cent. Gnosticism. Each phrase is not only capable of a Jewish explanation, but calls for it as its natural meaning. The question of purity (1^{15}) is on a par with our Lord's treatment of Pharisaism (Mk 7); the confession of a knowledge of God is more naturally attributable to Jews, 1^{16} (cf. Ro 2^{17}), than to Gentiles; and the genealogies and legends will probably be those connected with the patriarchal history (cf. 1 TIMOTHY).

(*b*) *Organization.*—As with Timothy at Ephesus, the exact position held by Titus himself at Crete is not clear. He represents the apostle and his teaching; he has authority (*ἐπιταγή*, 2^{15}), which is not confined to one place, but extends over the whole island (1^{5}): it extends to ordaining presbyters, to correcting and exercising discipline over 'heretics' (2^{15} 3^{11}), to enforcing the lines of teaching and the features of Christian character (2 *passim*); but whether the position was permanent or temporary is not clear: the most probable inference from 1^{5} and 3^{12} is that the delegation of power was for a temporary purpose only. Nothing is said about any ordination for the work.

For permanent organization, he is to appoint presbyters (whether one or more is not stated) in each city; and apparently the presbyter in each city is the same as the *ἐπίσκοπος* (1^{5-7}, but see 1 TIMOTHY). Their moral qualifications for office are stated; and it may be inferred that their duties were to teach (1^{9}), perhaps to control the finances of the community (1^{7} *μὴ αἰσχροκερδῆ*, but 1^{11} shows that this is not a necessary inference), and to be hospitable, ready to welcome Christians from other Churches (cf. Ramsay, *The Church in the Roman Empire*, p. 368).

There is no mention of deacons, deaconesses, or widows. The Christians are called *ἐκλεκτοὶ θεοῦ* (1^{1}), *λαὸς περιούσιος* (2^{14}) (both OT titles for Israel), *οἱ πεπιστευκότες θεῷ* (3^{8}), and perhaps—by a title which suggests the new family of God—*οἱ ἡμέτεροι* (3^{14}). There is no reference to common worship, except as implied in the references to teaching and exhortation. Baptism is referred to as the instrument of salvation (3^{5}); perhaps 1^{16} (*ὁμολογοῦσιν*) points to some public confession of faith.

v. AUTHORSHIP.—The external evidence is much the same as in 1 Timothy. The evidence of its rejection is less, but the parallels to its language are also fewer. It is quoted as Pauline in Irenæus (i. 16. 3, iii. 3. 4), Clem. Alex. (*Strom.* i. p. 350), Tertull. (*de Præscript.* 6, *adv. M.* 5. 21), and the Muratorian Canon. It was accepted by Tatian in spite of his rejection of 1 and 2 Tim., but rejected by Marcion and Basilides (Tert. *adv. Marcionem*, v. 21). It was embodied in the Syriac and Old Latin Versions, and parallels to its language are found in Justin Martyr (*Dial. c. Tryph.* 47) and Theophilus (*ad Autolyc.* iii. p. 126, where the command of 3^{1} is quoted as a *θεῖος λόγος*); and perhaps in Ign. (*ad Magnes.* c. 8 = 3^{9}) and Clem. Rom. (i. 2 = 3^{1}).

It claims to be by St. Paul in 1^{1-4}; and implicitly in 3^{12-14}, passages which are indeed separable from the rest. But in the body of the letter there is nothing in tone, teaching, or circumstance inconsistent with his authorship. The character of Titus corresponds to the little known of him elsewhere (cf. TITUS): the character of the writer, his insistence on his own teaching and wishes (cf. 1 Cor.), the sharpness of tone against false teachers (cf. Gal., 2 Cor.), the quick passage from moral inference to doctrinal premiss, the quotation from Greek poetry, the adaptation of OT language, the sense of his own sinfulness (3^{3}), are quite Pauline. So, too, the bases of doctrine,—the purity of all created things to the pure (cf. Ro 14): the eternal promise of life, the manifestation of it in due time, the saving grace, its universal efficacy (2^{11}), the redeeming death of Christ, the gift of the Spirit in baptism, the power to live a new life of love, the looking forward to the Coming of Christ, are quite true to the earlier letters, though the expressions are never borrowed. The false teaching implied at Crete and the organization of the Church, each simpler than in 1 Tim., can clearly fall within his lifetime.

The only ground of suspicion lies in the vocabulary and its relation to that of 1 and 2 Timothy. (*a*) There are 26 *ἅπαξ λεγόμενα* in 46 verses, *αἱρετικός, ἀκατάγνωστος, αὐτοκατάκριτος, ἀφθορία, ἀψευδής, βδελυκτός, ἐγκρατής, ἐκστρέφομαι, ἐπιδιορθόω, ἐπιστομίζω, ἱεροπρεπής, Ἰουδαϊκός, καλοδιδάσκαλος, ματαιολόγος, οἰκουργός, ὀργίλος, πρεσβῦτις, στυγητός, σωτήριος, σωφρονίζω, σωφρόνως, φιλάγαθος, φίλανδρος, φιλότεκνος, φρεναπάτης* (Gal 6^{3} *φρεναπατάω*), *φροντίζω*. Yet none of these betrays a late date. *αἱρετικός*, the only one that suggests a later ecclesiastical meaning, is earlier in existence than St. Paul, and the new meaning given to it here is akin to his own use of *αἵρεσις*, and apparently means 'factious' rather than 'heretical'; and it is still an adjective.

(*b*) There is, as in 1 Tim., a fixity of phrase which suggests lateness, *e.g.* *ἐπίγνωσις ἀληθείας, ἀλήθεια ἡ κατ' εὐσέβειαν, καιροῖς ἰδίοις* (1 Tim. only, but *καιρῷ ἰδίῳ*, Gal 6^{9}), *ὁ σωτὴρ θεός* (applied both to God the Father and to Christ here: in 1 Tim. only to the Father, in 2 Tim. only to Christ), *μιᾶς γυναικὸς ἀνήρ* (1 Tim. only), *ἡ διδασκαλία ἡ ὑγιαίνουσα* (1 and 2 Tim.), *καλὰ ἔργα* (1 Tim.), *ὁ νῦν αἰών* (1 Tim., 2 Tim.), *ὁ μέγας θεός, λουτρὸν παλινγενεσίας, πιστὸς ὁ λόγος* (1 Tim., 2 Tim.).

We are in the presence of a large vocabulary, fresh, fixed, and shared to a great extent by the writer of 1 and 2 Timothy. The alternatives of authorship are *either* that it is by Paul himself, writing late in his life, and writing to an intimate companion,—and there can be little doubt that if the Epistle stood alone, this would be the natural explanation; *or* by some later writer, essentially Pauline in spirit, perhaps using genuine Pauline fragments (see below), and wishing to obtain Pauline authority for securing a sober useful standard of Christian life and high standard of clerical morality, as against a revival of a Rabbinical Judaism. On this latter supposition the priority of Titus to 1 Tim. would seem almost certain, as there would be so little reason for the same writer composing it if 1 Tim. were in existence, and intended as a general treatise.

vi. INTEGRITY.—The MSS suggest no insertion or dislocation in the text; nor does the sequence of thought require such a theory. 1^{7-9} is indeed easily separable from the rest, but no conclusive reason requires its separation; and 3^{14} comes in awkwardly after 3^{13}, but there is a possible connexion of thought between them, and such postscripts are found elsewhere, Ro 16^{17-20}, 1 Ti 6^{17-19}.

The question of the integrity has arisen only on the theory of a non-Pauline authorship: for critics are almost entirely agreed in regarding $3^{12.13}$ or 3^{12-15} as Pauline, and the question arises whether there are other Pauline fragments, and whether they are separable.

The chief attempts to distinguish are these—

1^{1-6}. Pauline (McGiffert, Harnack, Clemen); but expanded from some simpler form by a late hand (von Soden).

1^{7-9}. Non-Pauline (*ib.*), added to strengthen the episcopate in the 2nd cent. (Harnack); but the distinction between the ἐπίσκοπος and πρεσβύτεροι would have been clearer.

1^{7-11}. Non-Pauline (Hesse, Clemen).

$1^{12.13.16}$. Pauline. $1^{14.15}$ non-Pauline (*ib.*) (as not suiting the other descriptions of the false teachers; but there is no real inconsistency).

2. Non-Pauline (Hesse).

3^{1-7}. Pauline (McGiffert). Non-Pauline (Clemen): partly because 3^{4-7} is a repetition of 2^{11-14}, but there is a difference in the motive appealed to, which suits the exhortation of $3^{1.2}$.

3^{8-11}. Non-Pauline. $3^{12.13}$ Pauline (Harnack, McGiffert, Clemen).

The Pauline fragment so obtained is supposed to be a letter from Paul written to Titus at Corinth after 2 Cor.; this was developed into a letter to Crete at the end of the 1st cent. because of the outbreak of Judaism there (Clemen). There is, however, no substantial ground for distinguishing between Pauline and non-Pauline, except in 1^{1-4} and $3^{12.13}$: the grounds for separation elsewhere are hypercritical and the divisions arbitrary.

For fuller details cf. McGiffert, *Apostolic Age*, p. 406; Harnack, *Chronologie*, i. p. 480; Clemen, *Die Einheitlichkeit der Paul. Briefe*, pp. 157–163; Moffatt, *Historical NT* p. 700.

vii. VALUE.—As with 1 Tim. (which see), the value is a good deal independent of its authorship, and due to the fact of its canonization. On the point of the organization of the Church it adds nothing to that in detail or principle; but it has a historical value as showing the method of organizing communities in a very early stage of development, as showing the persistence of Judaism as a danger to the early Church; and the atmosphere of a suspicious and critical heathenism in which it lived. In such an atmosphere, and dealing with communities of rough islanders on a low social level and disposed to anarchy, the writer, while laying stress on faith and the salvation wrought by the appearance of Christ, organizes a ministry, insists on moral qualifications for it, and tries to develop an orderly, disciplined, useful, fruitful life in all ages and classes, and inspires even slaves with the hope that they may adorn the true teaching: it is an attempt to convert heathenism by the attractive beauty of an ordered family life and a loyal citizenship. Doctrinally, the Epistle offers no new point of interest unless it be the identification of Christ with 'the Great God,' 2^{13} (but see Ezra Abbot, *Critical Essays*, xviii.), or the reference to baptism as λουτρὸν παλινγενεσίας, 3^{4}.

LITERATURE.—The same introductions and commentaries as are referred to under 1 TIMOTHY are useful for this Epistle, with the exception of H. P. Liddon; to the Patristic commentaries should be added a short commentary by Jerome, and a long extract on $3^{10.11}$ from Origen's lost commentary preserved in a Latin translation by Pamphilus. W. LOCK.

TITUS JUSTUS.—See JUSTUS, No. 2. **TITUS MANIUS.**—See MANIUS.

TIZITE (הַתִּיצִי; B ὁ Ἰεασεί, A ὁ Θωσαεί, Luc. Ἀθωσί).—A designation, whose origin is unknown, applied to JOHA, one of David's heroes, 1 Ch 11^{45}.

TOAH.—See NAHATH.

TOB, THE LAND OF (אֶרֶץ טוֹב 'land of good'; γῆ Τώβ; *terra Tob*).—The place to which Jephthah fled for refuge from his brethren, and in which he was living when the elders of Gilead went to fetch him on the occasion of the Ammonite invasion of Gilead (Jg $11^{3.5}$). At a later date, 12,000 'men of Tob' (AV Ish-tob) formed part of the force raised by the Ammonites in their war with David (2 S $10^{6.8}$ B Εἰστώβ). They are here associated with the Syrians of Beth-rehob and Zobah, and the king of Maacah—all small Aramæan states. The 'land of Tubias' (AV 'places of Tobie'), in which all the Jews were put to death by the Gentiles (1 Mac 5^{13}), was apparently the same place. In 2 Mac 12^{17} Charax, a place 750 stadia from the strong town of Gephyrum, or Caspin, is said to have been occupied by Jews called **Tubieni**, *i.e.* 'men of Tob.'

Possibly Θαῦβα, which, according to Ptolemy (v. 19), was S.W. of Zobah, is identical with Tob. The Jerusalem Talmud explains 'land of Tob' by *Susitha*—the 'province of Hippene' (Neubauer, *Géog. du Talm.* 239). In this case Tob would be Hippos, or Susitha, now *Sûsiyeh*, on the E. side of the Sea of Galilee, and not far from Gamala, *Kal'at el-Husn*. Conder (*Hbk. to Bible*, 295) and G. A. Smith (*HGHL* 587) identify Tob with *et-Taiyibeh*, about 10 miles south of Gadara (*Umm Keis*). De Saulcy identifies it with *Thaban*, about 9 miles east of the bridge over the Jordan called *Jisr Benât Yakûb*. C. W. WILSON.

TOB-ADONIJAH (טוֹב אֲדוֹנִיָּה 'good is the Lord Jah' [Gray, *HPN* 140, n. 3]; B Τωβαδωβειά, A and Luc. Τωβαδωνιά).—One of the Levites sent by king Jehoshaphat to teach in the cities of Judah, 2 Ch 17^{8}.

TOBIAH (טוֹבִיָּה and טוֹבִיָּהוּ 'Jah is [my ?] good').—1. The eponym of a family which returned from exile, but could not trace their genealogy, Ezr 2^{60} (B Τωβειά, A Τωβίας, Luc. Τουβίας) = Neh 7^{62} (BA Τωβιά, Luc. Τουβίας). 2. The Ammonite who, in conjunction with SANBALLAT and others, persistently opposed the work of Nehemiah, Neh $2^{10.19}$ $4^{3.7}$ 6^{17} $13^{4.8}$ (Τωβιά, Τωβίας). For details see art. NEHEMIAH.

TOBIAS (Τωβ(ε)ίας, Τωβείς).—1. The son of Tobit, To 1^{9} and often; see art. TOBIT (Book of). 2. The father of HYRCANUS, 2 Mac 3^{11}.

TOBIEL (Τωβιήλ, *i.e.* טוֹבִיאֵל 'El is [my ?] good'; cf. the name TABEEL).—The father of Tobit, To 1^{1}.

TOBIJAH (טוֹבִיָּה).—1. One of the Levites sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17^{8} (LXX om.). 2. One of a deputation that came from Babylon to Jerusalem with contributions of gold and silver, from which a crown was ordered to be made either for Zerubbabel *and* Joshua (Ew. Hitz.) or for Zerub. and *not* Joshua (Wellh. Now., cf. G. A. Smith, ii. 308 f.), and laid up in the temple as a memorial of the donors, Zec $6^{10.14}$ (LXX in both passages tr. טוביה by χρήσιμοι, *i.e.* טוֹבֶיהָ).

TOBIT, BOOK OF (A βίβλος λόγων Τωβίτ, B Τωβείτ, ℵ Τωβείθ; Lat. *liber Tobiæ, liber Tobit et Tobiæ, liber utriusque Tobiæ*; = Heb. טוֹבִיָּה = 'Jehovah is my good,' and טוֹבִי, dropping the theophoric affix יָה).—One of the deutero-canonical books of the OT, containing, according to Jewish conceptions, an idyllic picture of pious home life in the Captivity.

i. TEXTS AND VERSIONS.—The popularity of the story of Tobit is attested by the number of variations in which it exists in several languages. We shall, in the course of this article, endeavour to prove that the book was originally composed in Aramaic; though all trace of the original is lost, and the Aramaic MS, now extant, is somewhat late, and was not taken directly from it.

(1) *Greek Version.*—Of this we have three texts: (*a*) that of AB. The differences between these two

MSS are few and unimportant. (*b*) That of ℵ, which while giving little additional matter, adopts a more verbose style than AB. Whether AB or ℵ presents the earlier text is much disputed. Fritzsche, Nöldeke, Grimm support AB; Ewald, Reusch, Schürer, Nestle, Harris, ℵ. (*c*) A recension of 6^9–13^8, found only in three cursives: the Zittau Cod. 44 and the Ferrara Codd. 106, 107, and given at length by Fritzsche (*Handbuch z. d. Apokr.*). These present a composite Greek text. From 6^9 to 7^{17} it presents many features of originality, but contains many of ℵ's additions to the text of B, *e.g.* $6^{14f.}$ 7^{11-13}. From 8^1 to 12^6 it agrees closely with the Syriac, which, as we shall see, during this section transfers its allegiance from B to ℵ. From 12^6 to 13^8 it presents some readings of B, as 12^8 13^{5-8}, but agrees in the main with Syr., even when Syr. differs from both B and ℵ, as in 12^{12-19}. Before 6^9 and after 13^8 our cursives present the text of B.

(2) *Latin Versions.*—(*a*) Vetus Itala or Old Latin, which Ilgen, in 1800, correctly surmised was based on a then unknown Gr. text, which has proved to be that of ℵ. Though all codices of this Version agree substantially with ℵ, there are clearly three recensions. (*α*) It. I., the text edited by Sabatier (*Bibliorum sacrorum Latinæ versiones antiquæ*, Paris, 1751) and by Neubauer (in his excellent little work, *The Book of Tobit*). It is based on a Parisian Codex, Regius 3654, and on Cod. 4 in the library of S. Germain. (*β*) It. II., a text found in Cod. Vat. 7 which contains only 1–6^{12}, and once belonged to queen Christina of Sweden. It was collated by Sabatier in the above work, and was edited by Bianchini, Rome, 1740. (*γ*) Fragments of a third recension (It. III.) are given in the *Speculum* of Augustine, edited by Mai (*Spicilegium*, ix.).—(*b*) The Vulgate. Jerome affirms that he translated Tobit in one day from the Syro-Chaldee. As he was not familiar with this language, a Jew, who knew both languages, translated it for him into Hebrew, from which he made his Latin translation. There are many readings in Vulg. that were not found in any other text, until Gaster, 1896, discovered a Heb. MS, which in the narrative, as distinct from the exhortations and prayers, agrees in the main with Vulg. (see below, HL).

(3) *Syriac Version.*—This has been edited by Walton in his Polyglot; and by Lagarde in *Libri apokr. Syriace*. As far as 7^{11} it is a close translation of B. After that, it agrees with ℵ or the Gr. cursives. It lacks 13^{9-18}.

(4) *Chaldee* or *Aramaic Version* (Aram.).—This was first edited by Neubauer from a collection of Midrashim, copied in the 15th cent. in Greek-rabbinical characters. The Book of Tobit is an extract from the *Midrash rabbah-de-rabbah* on Genesis, and forms a haggāda on Jacob's promise to give a tenth of his proceeds to God (Gn 28^{22}). Neubauer thinks that the Chaldee text of Jerome was Aram. in a fuller form; but in the view of the present writer there are facts which seem to imply that the Aram. is a translation from the Greek. The facts that the dat. Ῥάγοις (4^1 5^5) is found in Aram. as רגיש, and Ἐκβατάνοις (3^7 6^5) as אגבתנים, and the acc. Τίγριν (6^1) as תיגרין; and that the Gr. words ἄριστον (2^1) and σημεῖον (5^2) are transliterated in Aram., afford strong proof that Aram. is based on a Greek text: not on ℵ (as Schürer), for Aram. agrees more often with B than with ℵ; but on a briefer text than either, and more free from Christian influences.

(5) *Hebrew Versions.*—(*a*) Heb. Munsteri (HM), so called because it was published, with a Lat. tr., by Seb. Münster, at Basle, in 1542. The *first* edition, however, was printed at Constantinople in 1516. It is included in Walton's Polyglot, and also in Neubauer's *Tobit*. Neubauer gives, in the footnotes, various readings from No. 1251 of the Heb. MSS in the National Library at Paris: from a Persian tr. from the Heb. which is No. 130 in the same Library; and No. 194 of de Rossi's catalogue, at Parma. It is noteworthy that HM usually agrees with Aram. when the latter dissents from the Greek. In chs. 12. 13, where Aram. is lacking, HM presents an eclectic text, agreeing in the main with Syr., but for 13^{3-18} it has an original and very brief doxology, and omits ch. 14 altogether. Ginsburg assigns it to the 5th century.—(*b*) Heb. Fagii (HF). This is a free, independent translation, made perhaps in the 12th century. The translator was a learned Jewish scholar, fond of precise, technical terms; very familiar with the Heb. Bible, and fond of introducing suitable Bible texts, and of reducing the text of Tobit to biblical phraseology. This is also given in Walton's Polyglot.—(*c*) Heb. Londinii (HL) is a text found by Gaster in the British Museum, Add. 11,639. A description and translation of the MS, which belongs to the 13th cent., is given by Gaster in *PSBA*, vol. xviii. 208 ff., 259 ff., and vol. xx. 27 ff. So far as the exhortations, prayers, and doxologies are concerned, they are certainly late. They develop, in a remarkable degree, the tendency observable in HF to reduce the text to biblical phraseology. In the exhortations, etc., HL gives us a cento of Scripture texts, skilfully selected as being most cognate to the Gr. text. As to the *narrative*, it is intensely interesting to note how closely HL agrees with Vulg., and Gaster claims for the MS as a whole a close relationship to the 'Syro-Chaldee' used by Jerome. As to the narrative portions, the author of HL certainly *may* have used an Aramaic or Heb. text closely related to Jerome's 'Syro-Chaldee,' though, if the doxologies, etc., are of late composition, one cannot escape the unpleasant surmise that HL may be drawn from the Vulg. itself.—(*d*) Heb. Gasteri (HG). This was copied some years ago by Gaster from a Midrash on the Pentateuch, which he fears has now perished. It is a condensation in Heb. of the narrative portions of Aram., with the exhortations, prayers, and doxologies rigorously excluded, and all approach to verbosity in the narrative sternly checked. It is possible that the author of HL may have possessed a similar History, exhibiting those peculiarities of the Vulg. which, until the publication by Gaster of the translation of HL, were considered unique in the Vulgate. The tr. of HG is given in *PSBA* vol. xix. 33 f. Its agreements with Aram. are very significant.

ii. THE NARRATIVE.—Tobit, a pious Jew of the tribe of Naphtali, very scrupulous as to feasts and tithes, was, with his wife Anna and his son Tobias, taken into captivity by Enemessar (Shalmaneser) to Nineveh. Even there he remained loyal to Mosaism, abstaining from eating the food of the Gentiles; and yet became in time the king's purveyor. Once when travelling in Media, he deposited 10 talents of silver with a brother Jew named Gabael, at Rhagæ (RAGES). When Sennacherib (who is called in 1^{15} Enemessar's son) returned from Judah, Tobit fell into disfavour, chiefly from his habit of burying Jews who were assassinated in the king's fury. Tobit fled, but, on the entreaty of his nephew Achiacharus (Ahiḳar), was reinstated by king Sarchedonus (Esarhaddon) (ch. 1). At a feast of Pentecost he sent out his son to bring in some poor Jew to dine with him. Tobias returned, saying there was a Jew lying in the street strangled. Tobit rose at once, hid him, and at night buried him. Being thus rendered unclean, he slept in the courtyard; and sparrows 'muted warm dung into his eyes' and blinded him (2^{1-10}). Reduced to poverty again, Anna wove and spun for hire, and one day, under provocation, she reproached her husband for his blindness; whereupon he prayed to die (3^{1-6}). The same day, in Ecbatana of Media, Sarah, the daughter of Raguel and Edna, who had been married seven times, but whose husbands had all died on the bridal night, was reproached by a maid for having slain them; whereas it was Asmodæus, the arch-demon, who slew them. She also prayed to die (3^{7-15}). The prayers of both were heard, and Raphael was sent to deliver both of them. Tobit, in view of his death, wished to send Tobias to Rhagæ, to fetch the silver, and gave him a long exhortation (ch. 4). When Tobias sought a guide, Raphael offered his services, pretending to be Azarias, a kinsman. The guide's wages being fixed, the two set out with a favourite dog for Media (ch. 5). On the way, while Tobias was bathing in the Tigris, a great fish threatened him, but he caught it; and on Raphael's advice cut out its heart, liver, and gall for medicinal use later on (ch. 6). Passing through Ecbatana, they stayed with Raguel; and Tobias asked for Sarah in marriage. He had been previously instructed by Raphael how to exorcise the demon from Sarah, and before night the marriage was celebrated (ch. 7). Raguel naturally is apprehensive, and digs a grave at midnight; but the odour of the heart and liver of the fish, when burnt on ashes, caused Asmodæus to flee to Egypt, whither Raphael follows him and binds him; and Tobias and Sarah, after uniting in prayer, pass the night in peace (8^{1-10}). Edna satisfies herself on this during the night, and Raguel, after previously thanking God, fills in the grave and prepares the nuptial festivities, which he swears must last 14 days (8^{11-21}). Raphael goes forward to Rhagæ, secures the silver, still sealed in bags, from Gabael, and brings him back to the wedding, where he pours his blessings on the bridal pair (ch. 9). The festivities over, Raguel sends forth Tobias and his wife in peace to Nineveh, and gives them half his wealth (10^{7-12}). Anna has for days been very miserable, and has stood all day on the highway watching, at intervals reproaching poor blind Tobit for allowing their son to go (10^{1-5}). When at length she sees Tobias and Azarias who had come on in front, she runs to tell Tobit. Tobias skilfully applies the gall of the mysterious fish to his father's eyes; a white film peels off and his sight is restored. Then Tobit and Anna welcome Sarah with pious wishes (ch. 11). All that remains is to reward the faithful Azarias. Father and son agree to give him half of all they have. Whereupon he discloses his identity and returns to heaven (ch. 12). In ch. 13 we have a Song of Thanksgiving from Tobit; and in ch. 14 Tobit, being now very old, gives to his son and grandsons his dying valedictions, and urges them to leave Nineveh for Media. After his death they go to Media, and arrive in time to witness the death of Raguel and Edna. Tobias lives to a ripe old age, and is allowed to hear the glad news of the destruction of Nineveh.

VARIATIONS OF THE NARRATIVE IN THE SEVERAL VERSIONS.—If we compare the Jewish VSS with the Gr. and Lat. we find three interesting variations: (*a*) Aram. and Heb. VSS all omit reference to the dog, which the other VSS mention. (*b*) In 8^7 the Jewish VSS (as also Syr.) narrate that after Tobias' prayer in the bridal chamber, '*Sarah* said Amen'; the rest, that 'they *both* together said Amen.' (*c*) In 5^3 9^5 Aram., HM, HF say that Gabael gave Tobit his *bag* as a token, not his *bond*.

Aram., HL, HG, and Vulg. differ from the rest in that throughout they speak of Tobit in the third person, whereas all other texts make Tobit speak in the first person as far as 3^{15}. The third is used afterwards.

[*N.B.*—Except when quoting from the Vulg., the verses are those of the RV].

Peculiarities of text.—(α) B stands alone (except HG) in omitting the blessing of Gabael, 9^6; and in its condensation of Edna's prayer, 10^{12}; though HL and Vulg. omit this entirely. Unique readings are: glory of the great Raphael, 3^{16}; Jonah, 14^8; Nasbas, 11^{18}; Aman, 14^{10}; 158 years old, 14^{11}.—(β) ℵ. There are scores of στίχοι added by ℵ to the text of B. A few may be noted: 1^2 Thisbe is 'west of Phogor'; 1^5 Israel sacrificed to the calves 'on all the Mts. of Galilee'; 2^{11} 'on the 7th of the month Dystrus she cut the web'; 5^3 Raguel and Tobit divided the bond into two, and each took half; 5^5 the mendacious angel says, 'I have come here to work'; 6^8 'blow on the films'; cf. also 10^{10} 12^8 13^{16}. ℵ omits 4^{7-19} (owing probably to a leaf being lost) and 13^{6b-10}. In 13^{18} it gives the correct spelling 'Αχειχάρ, and gives a fuller account of him than B.—(γ) *Greek cursives.* A remarkable Gnostic reading occurs in 8^{15} 'Let all *the Æons* praise thee, and let thy angels bless thee.' This is the only Gr. text which says 'the dog ran *before* them' (11^4).—(δ) *Syriac*, which is really two recensions connected at 7^{11}, shows the fact in change of spelling: Achior, 2^{10}; Aḥiḳar, 14^{10}; Raga, $4^{1.\ 20}$; 'Arag, 9^2; 'Edna, 7^2; 'Edna, 7^{14}. Alterations:—102 years, 14^2; 107 years, 14^{14}; 10 days, 8^{20}. Additions:—Edna dressed Sarah, 7^{16}; Anna put on a veil before going to meet her son, 11^9. Omissions:—13^{9-18}, where Tobit exults in the glories of the future Jerusalem; 14^3 'Jonah' and also 'Nahum'; 14^5 the words, 'but not like to the former house'; $14^{6.9}$ that all nations shall forsake idolatry; 7^{13} the marriage contract.—(ε) *Aramaic* is embedded in a Midrash, and is inserted there to show the merit of giving tithes. The moral at the end also is: 'Behold we learn how great is the power of alms and tithes,' and Gn 14^{20} 26^{12} 28^{22} are cited in confirmation. Its chief peculiarity is that the MS virtually closes with ch. 11. A few lines, in place of Greek ch. 12, state that Raphael did not go into the house, but went his way; and when Tobias went out to seek him he could not find him, nor had any one seen him; and thus Tobit knew he was an angel. In place of ch. 14, Aram. states that, when Tobit fell sick, he called for his son and impressed on him the importance of almsgiving from the example of the three patriarchs. Aram. omits Tobit's genealogy, 1^1; Aḥiḳar's offices, 1^{22}; Elymais, 2^{10}; and the dog, 5^{17} 6^2ℵ 11^4. On the other hand, it expands Sennacherib's return, 1^{18}; Anna's welcome to Sarah, 11^9; and Tobit's thanksgiving, 11^{14}. In 10^7 Aram. and HM say, 'Anna ate nothing but tears.' Aram. abridges the destination of the three tithes, 1^{6-8}; calls Asmodæus 'king of Shedim,' $3^{8.\ 17}$+; and renders 5^{18} 'without money, God has fed us.' It contains 4^{7-19} lacking in ℵ; and agrees with B against ℵ about as often as with ℵ against B.—(ζ) *Heb. Munsteri* is remarkable for its omissions from the Gr., sometimes pruning its redundancies as in $4^{6.\ 11-16}$ $6^{11.\ 14}$+. With Aram. it omits 1^{21}; Elymais, 2^{10}. It omits Sarah's intention to hang herself, 3^{10}; and her going to meet Tobias, 7^1. It omits 'Noah' from 4^{12}; the citation of Gn 2^{18} in 8^6; Tobit's conversation with Anna, 10^{2-5}; and Aḥiḳar's visit, 11^{18}. It abridges Tobit's prayer for death, 3^6; and the prayers in 8^5 $8^{15f.}$ $12^{6ff.}$. But HM has also several original enlargements: notably after 1^{20}, where we have a Midrash on the mischief caused by Sennacherib. After 3^4 it cites Is 1^9, and Ps 17^{15} after 4^{10}. It abridges and modifies the Song in ch. 13 (omitting ch. 14), and its last words are, 'O Lord of the world! show us in our days salvation and redemption by the coming of our Redeemer and the building of Ariel'; then citing Jer 23^6, Ps 147^2. Theological features are the thrice repeated prayer for 'children devoted to the Law,' 8^7 9^6 10^{11}; the designation of Raphael as 'prince,' 3^{17} 12^{15}; Jerusalem as 'Ariel,' 13^{16}; and Jehovah as 'the Holy One, blessed be he,' 4^{19} 12^{12}+. A play on words occurs in 3^7 'It is not meet to call thee Sarah, but Ẓarah (distress).' Instances in which HM agrees with Aram. against the Gr. are: 1^{10} (dwell), 1^{13} (until his death), 2^{10} (every morning), 5^3 $9^{2.\ 5}$ (bag), 3^{16} 12^{11} (throne), 6^{17} (under her clothes), 6^{18} ('foreseen' for 'foreordained'), 10^7 (nothing but tears).—(η) *Heb. Fagii* differs from B very considerably. It is fond of inserting OT texts: 3^5 Ps 40^{13}, 3^6 Ps 63^3, 4^{13} Pr 16^{18}, 4^{19} Pr 3^3, 13^6 Ps 86^{15} 96^6 72^{10}, Jer 31^{17}. It aims at precision: in speaking of 'peace-offerings,' 1^4; 'a beka'' for 'a drachma,' 5^{14}; 'the right of redemption,' 3^{17} 7^{10}; 'the eternal home,' 3^8; 'the Torah and the Halakhah,' 7^{12}; the seven blessings, 7^{13}; the cemetery, 8^9; and especially in 1^8, where it assigns the third tithe 'for the repair of the breaches of the house,' cf. 2 K 22^5. Interesting theological allusions occur: 3^{16} prayer was heard before our Father in heaven, 4^{11} the judgment of Gehinnom, 8^6 the first Adam, 6^{17} the union of Tobias and Sarah was foreseen from the 6th day of creation, 8^{15} the Æons of the Gr. cursives are described as 'those who are exalted above all blessing and praise,' 14^5 'the house shall stand until the completion of one æon.' But the learned Rabbi was no geographer. He gives Alemania = Germany for Elymais in 2^{10}; Midian for Media, 1^{14}; and Laodicea (?), 6^2. The latter part of ch. 14 is meagre. Aḥiḳar is omitted 11^{18} 14^{10}.—(θ) *Heb. Lond.* is, as we have said, remarkable for presenting many readings heretofore found only in Vulgate. Such, *e.g.*, are 1^{14} 'power to go where he wished'+, 1^{23} Tobit fled naked with wife and son, $2^{12ff.}$ the parallel between Tobit and Job, 3^{10} Sarah spent 3 days in prayer, $6^{18ff.}$ Raphael advises 3 nights of continence. HL also agrees with Vulg. in omitting Aḥiḳar in B 2^{10} and the doctors in ℵ 2^{10}, as well as in many other omissions; but HL gives the absurd amount of 1000 talents in 1^{14}; it narrates Sarah's intended suicide, which Vulg. omits, 3^{15}; it states that Anna went to the outskirts of the town, 5^{16}; and that a large party went with the bridal pair a day's journey homewards; and every one gave a ring of gold and a *ḳĕsîṭah* and a piece of silver, 11^1; it also introduces two long original prayers, by Tobias and Sarah, in the bridal chamber, ch. 8. Vulg. only gives Sarah's prayer thus: 'Be merciful to us, O Lord, be merciful, and let us both grow old healthily together,' 8^{10}.—(ι) HG has a few unique readings: *e.g.* 'dust' for 'dung,' 2^{10}; 'ring' for 'bond,' 5^3; and that Tobias put the heart of the fish on a *censer* and burnt it under Sarah's clothes. It is very brief, but agrees closely with Aram.: *e.g.* HG and Aram. only say that the fish 'sought to eat the *bread* of the youth,' 6^{2}.—(ϰ) *Itala* is a close translation of א. We have collated only the text given by Neubauer. Its chief eccentricity is the spelling of proper names. Bihel for Thisbe, 1^{2}; Raphain for Phogor, 1^{2}; Bathania for Ecbatana, 5^{6}; Anna (so Vulg.) for Edna, wife of Raguel. It states that Raphael *read* the prayers before God, 12^{12}; and gives 'didrachma' for 'drachma,' 5^{14}.—(λ) *Vulgate.* Jerome omits (with HL) all mention of Aḥiḳar, except in 11^{20}, which is probably an interpolation. He also omits the patriarchs in 4^{12}; the fate of Nadab, 14^{10}; and the fate of Nineveh, 14^{15}. But he has several additions. Some we have mentioned under HL. Others are Sarah's prayer, 3^{13}; and her self-vindication, $3^{16\text{ff.}}$. These are found in HL, but in more biblical language; but Vulg. alone states that Tobias, father and son, remained three hours on their faces before Raphael, 12^{22}; that the dog wagged its tail, 11^{9}; that the coating of an egg peeled off Tobit's eyes, 11^{14}; that Tobias held his father half an hour, 11^{14}; and closed the eyes of Raguel in death, 14^{15}. Scholars have often pointed out the indications in Vulg. of the fact that Jerome was a Christian and an ascetic. Even if provisionally we concede that he had an Aram. MS before him, which in the narrative resembled HL, Jerome's personal influence can still be traced. The three nights' continence we should have to surrender ($6^{18\text{ff.}}$), as this is in HL; but HL does not contain 2^{18}, where in Vulg. Tobit says, 'We are sons of God, and wait for that *life* which God is about to give'; so 12^{9} 12^{13} 9^{11}.

iii. Original Language.—We wish now to adduce evidence, which we trust will be regarded as conclusive, that the original language was *Aramaic.* (1) The Aram. form אָתוּר (Heb. אַשּׁוּר) is found in א 14^{15} 'Αθουρεία, and 14^{4} 'Αθήρ. (2) If we accept alphabet 69 in Euting's *Tabula Scripturæ Aramaicæ* as an approximation to the Aram. alphabet used (*ex hypothesi*) in the original copy of Tobit, we find that it explains the diverse form of many proper names, as in each case the letters confounded are very similar: *e.g.* שמליה in א 5^{13} for שמעיה in B; ענמסר for שלמנסר; סנחרים in א 1^{15} + for סנחריב; עביאל HF 9^{5} for נבאל; פנר in א 1^{2} for פער; רגואל for רעואל; קסרי in א 10^{13} for כסרי in Syr. (3) The variants in the VSS are often possible renderings of the same Aramaic word. 'The *mountain* of Ararat,' 1^{21} (Bא, Syr., It.), and 'the *land* of Ararat' (Aram. HM, HF), are possible renderings of טור (Schwally, *Idioticon*, 37). 'Thou judgest *for ever*,' 3^{2}, [Bא, It.] 'Thou judgest *the world*,' [Aram., HM], give לעלם; 5^{7} 'Wait *young man*' [א Syr.], 'Wait *a little*' [Aram. HM], give זעיר; 2^{4} 'I left the *meal*' [א Vulg.], 'I left the *table*' [Aram. HM, It.], give שרותא. In Pal. Syr. at Ac 16^{34} this word is used for τράπεζαν. In 4^{17} Jerome has *constitue* for ἔκχεον, thus giving to נְסַךְ, imperative of Aram. נסך 'to pour out,' the meaning of Heb. נסך or סכך. (4) In other instances the variants yield *similar* Aramaic words—

1^{4}	א, Heb., Itala	was *built* in it	אתבני
	Syriac	was *prophesied* in it	אתנבי
1^{13}	אB	God gave me μορφήν	דמותא
	HM, HF	God gave me *favour*	רחמותא
1^{18}	אB, Aramaic	I *stole* the bodies	גנבת
	Itala	I *wrapped* . . .	ענבת
1^{21}	אB	all the *finance* of the kingdom	חשבנא
	Itala	all the *care* . . .	חששא
2^{6}	B	your *pleasures*	שבוהיכון
	א	your *ways*	שביליכון
	Itala	your *songs*	שבחיכון
2^{10}	אB	Achiacharus *nourished* me	פַּרְנֵס
	HF, It. II.	Ach. *persuaded* me	פַּיֵּס
4^{3}	א	bury me *honourably*	בהדרא
	HF	bury me *immediately*	כהדרא
6^{17}	א, HF	*Take* her	שא לה
	Itala	*Ask* for her	שאל לה
8^{3}	א	*bound* him forthwith	חבר
	Itala	*returned* forthwith	חזר
10^{12}	B	*Honour* thy father	הַדַּר
	א	*Return* to thy father	הֲדַר
11^{11}	B	*daubed* it on his eyes	פח
	א	*blew* into his eyes	אפית
12^{13}	אB	thou didst *cover* the dead	שקעת
	Syriac	thou didst *carry away*, etc.	שקלת
12^{14}	אB	sent me *to heal* thee	מיסא
	Itala	,, ,, *to test* thee	מַסִּיא
14^{4}	א	our brethren *shall be counted*	יתפרעון
	B	,, , *shall be scattered*	יתפרשון
14^{5}	א	the time of *the seasons*	עלמיא
	HF	,, ,, *one æon*	עלם א'
	Itala	,, ,, *cursings*	עלבניא

iv. Historical Character.—This was never called in question until Luther did so. The minuteness of its details has often been adduced as evidence of its historicity, and it must be admitted that there is nothing in it so marvellous and superstitious as to be incredible to educated men of antiquity. The angelophany is only a slight amplification of Gn 18; possession by unclean spirits was a recognized belief, and exorcism by fumigation was recognized in medical science. W. R. Smith quotes from Ḳaswini, i. 132, that 'the smell of the smoke of crocodiles' liver cures epilepsy, and its dung and gall cure Leucoma' (*Encyc. Brit.*^{9} art. 'Tobit'). Without calling in question that the book probably rests on a real history, the following considerations forbid our regarding it as being what it claims to be, viz. a narrative written in the 7th cent. B.C.:—(1) It contains *historical* errors. (*a*) It was Tiglath-pileser who took Naphtali and Zebulun into captivity (B.C. 734), not Shalmaneser, 2 K 15^{29}. (β) Sennacherib was not Shalmaneser's son (1^{15}), but the son of Sargon a usurper. (γ) It is implied in 1^{4} that Tobit was a boy at the time of Jeroboam's revolt from the house of David. (δ) The occurrence of Ahasuerus (14^{15}) and Aman (A 14^{10}) ought not to be pushed. 'Ασύηρος in B is a scribe's blunder for 'Αθουρίας in א, and 'Αμάν in A is due to the same cause, taking 'Αχιάχαρος for Mordecai.—(2) It is a *geographical* error to put the Tigris between Nineveh and Ecbatana; and also to state (so א Aram. HM, It.) that Rhagæ is two days from Ecbatana. B omits the 'two days'; but in 6^{9} says that Ecbatana was '*nigh* unto Rhagæ.' It took the army of Alexander 10 days to march from one to the other (Arrian, iii. 20).—(3) The *spirit* and *theological tone* belong to a later date.

v. Date of Composition.—Most Roman Catholic authorities, relying on 12^{20} 13^{1}, ascribe the book to the 7th cent. B.C. Ilgen maintains that 1–3^{7} $13^{1\text{-}8}$ was written by Tobit in B.C. 689, and the rest in Palestine about B.C. 280. Ewald fixes it B.C. 350. Graetz assigns it to the time of Hadrian (A.D. 130), and Kohut to A.D. 226. The chief reason alleged for the last two dates is that it is considered that the one principal object of the book is to insist on the duty of burying the dead. Twice in Jewish history was this prohibited: after the fall of Bether, so valiantly defended by Bar Cochba, and in Persia under Ardeshir I. Both these dates are probably nonsuited by the fact that Tobit is cited by Polycarp († 155). The following considerations suggest the 2nd cent. B.C. as the probable date:—(1) Unless it could be shown that 14^{5} is prophetic, it implies that the writer was living at the time of a temple which was inferior in grandeur to Solomon's, *i.e.* before the time of Herod. (2) The law of marriage with relatives, so strongly insisted on also in the Book of Jubilees, fell into desuetude before the 2nd cent. A.D. (Rosenmann, *Studien z. B. Tobit*). (3) The prominence given to the duty of interring the dead may well have been caused by the action of Antiochus Epiphanes, who, we are told (2 Mac 5^{10}), 'cast out a multitude unburied.' (4) Marriages with Gentiles still needed discouragement, 4^{12} 6^{15}. (5) It contains no bright eschatology, and no

Messianic hope, from which it seems to have been written before the persecution of Antiochus. (6) Its soteriological and ethical tone closely resembles that of other works known to have been written about a century B.C. This we will now try to prove.

vi. TOBIT AND CONTEMPORARY JEWISH LITERATURE.—1. *Sirach.* There is, as Fuller has shown (*Speaker's Apocr.* i. 160), a great resemblance between the thought of Tobit and Sirach.

(1) As to the saving value of good works. Both emphasize the value of almsgiving: it is a good gift in God's sight, To 4^{11}, fills the doer with life, cleanses away all sin and delivers from death, 12^{9}; cf. Sir 3^{20} 29^{12} 40^{24}. Sinners are enemies of their own life, 12^{10}; cf. Sir 18^{21} 38^{15}. (2) The eschatology of Sir. and of Tobit are on the same plane. Both regard Sheol as the abode of joyless shades: it is ὁ αἰώνιος τόπος, 3^{6}, where even the righteous go, 3^{10} 13^{2}; cf. Sir 46^{19} 14^{16} 17^{28}. (3) Both insist on reverent interment of the dead. Very pathetically does Tobit ask to be buried, 4^{3}, and for Sarah to be buried beside him, 4^{4}; he risks his life to inter his brethren, 1^{17} $2^{3.7}$, and urges his son to place cakes (and wine, Aram., HF, It., Vulg.) on the graves of the righteous [cf. Tylor's *Primitive Culture*, i. 485 ff., ii. 30 ff.]; cf. Sir 7^{33} 30^{18} 38^{16}. (4) Both set value on the same ethical duties: purity of marriage, $4^{12f.}$ 8^{6}, Sir 7^{26} 36^{24}; honesty to servants, 4^{14}, Sir $7^{20f.}$; the true estimate of wealth, 5^{18}, Sir 5^{1}; benevolence, $4^{7.14.17}$, Sir 4^{1-5} 12^{4} 35^{10}. (5) Both base all virtue on the fear of God, $4^{5.6.19}$, Sir 6^{37} 35^{10} 37^{15}.

2. *The Story of Aḥiḳar.*—In this work, recently published by Camb. Univ. Press, Aḥiḳar is a pious vizier of Sennacherib, who, being childless, adopted a boy, Nadan, and took much pains with his instruction; but when Nadan grew up he incriminated his adoptive father by false letters, and caused him to be sentenced to death. The executioner spared his life, and imprisoned him in a cellar under his (Aḥiḳar's) house. At length he was released, and vengeance was executed on Nadan. This is the story which is alluded to in 14^{10}, more fully in ℵ than B.

Aḥiḳar, in 'the Story,' bemoans himself thus: 'I have no son to *bury* me, nor a daughter, and my possessions no one inherits.' Read with this To 1^{18} 2^{7} 3^{15} 4^{3}. There are many features of resemblance between Aḥiḳar's moral teaching to Nadan, and Tobit's to Tobias. In the Syriac Version of Aḥiḳar (*op. cit.* 61) we read: 'My son, eat thy portion, and despise not the righteous' (cf. To 4^{13}); 'Do not eat bread with a shameless man' (cf. To 4^{17} Vulg.); 'Associate with a wise man and thou wilt become like him' (cf. To 4^{18}); 'My benevolence has saved me' (cf. To 4^{10}); 'My son, flee from whoredom' (*op. cit.* 5); cf. 4^{12}; and notably, 'Pour out thy wine on the graves of the righteous, rather than drink it with evil men'; cf. 4^{17} 'Pour . . . give (it) not to sinners.' Harris discusses the two texts of ℵ and B in the *Story of Aḥiḳar*, ch. v., and also in the *Amer. Journ. of Theology*, iii. 541.

3. *The Book of Jubilees* contains passages probably known to the author of Tobit.

To 4^{12} states that Noah took a wife from his relatives. Of course there is no Scripture warrant for this; but Jubilees (ch. 4) furnishes us with the names of the wives of all the patriarchs from Adam to Noah, and each one married a very near relative. Again, when Jacob left home for Haran, Isaac (Jub 27^{10}) uses words to Rebekah which resemble To $5^{20f.}$ 10^{6} 'My sister, weep not: he has gone in peace, and in peace will he return (so ℵ 5^{21}). The Most High will preserve him from all evil. For I know his way will be prospered . . . and he will return in peace to us (To 5^{20}), for he is on the straight path (4^{19}). He is faithful (ℵ 10^{6}), and will not perish.' In Jub 22^{16} we read, 'Separate thyself from the nations, and eat not with them, and become not their associate (To 1^{10}): they offer their sacrifices to the dead, and eat over their graves' (To 4^{17}).

4. The *Testament of Job* has the foll. parallels:—

Job's wife begged bread for him (ch. 22); Job sang a hymn (ch. 33); in ch. 45 Job, when dying, says, 'Behold, I die; only forget not the Lord (To 4^{5}); do good to the poor (4^{16}); despise not the helpless (4^{13}); take not to yourselves wives from strangers (4^{12}), and, lo, I distribute to you all as much as belongs to me' (4^{16}).

5. *Judith* (8^{2}) attaches importance to the fact that she and her husband were 'of the same tribe and family.'

vii. TOBIT IN THE CHURCH.—The *Didaché* (1^{2}) gives this advice, 'Whatever thou wishest not to happen to thee, do not thou to another'; To 4^{15} gives this form, 'What thou hatest, do not to another' (so also Hillel [Taylor, *Pirḳe Aboth*, 37]). *Did* 4^{6-8} is also an adaptation of To $4^{10f.}$. Polycarp (*ad Phil.* ch. 10) says, 'When ye can do good, defer it not, for almsgiving delivers from death'; cf. To 12^{9}. Pseudo-Clem. (*ad Cor.* 16) seems to quote 12^{8} thus: 'Almsgiving is as good as repentance for sin; fasting is better than prayer, but almsgiving (is better) than both. Love covereth a multitude of sins. Prayer from a good conscience saveth from death.' Harris (*Amer. Journ. Theol.* iii. 546 ff.) suggests to read 'prayer' for the first 'almsgiving'; and thinks we have the original reading of To 12^{9} in the Gr. cursives. 'Good is prayer with fasting, and almsgiving with righteousness better than both.' Clem. Alex. quotes 4^{16} as ἡ γραφή (*Strom.* ii. 23, § 139). Origen (*Ep. ad Afric.* xiii.) and Athanasius (*Apol. c. Arian.* xi.) use Tobit as canonical, though theoretically they did not include it in the Canon, because it was not in the Heb. Bible. Cyprian treats it as authoritative in his work on the Lord's Prayer (c. 32). Hilary cites it to prove the intercession of angels (*in Ps.* 129^{7}). Ambrose (*de Tobiâ*, 1. 1) treated the book as prophetic, and Augustine included it among the Apocr. of the LXX which 'the Christian Church received' (*de Doctr. Christ.* ii. 8). Jerome (*Præf. ad libb. Salomonis*) allowed its perusal, but forbade its canonicity; whereas the Council of Carthage (A.D. 397) and the Councils of Florence (1439) and of Trent (1546) declared it canonical. Luther (cf. Fritzsche, p. 19) deemed it 'a truly beautiful, wholesome, and profitable fiction.' The Homilies of the Church of England use 4^{10} 12^{9} as 'a lesson which the Holy Ghost doth teach in sundry places of the Scripture' (Second Book, *On Alms-deeds*, part 1). The Offertory contains sentences drawn from To 4^{7-9}, and the preface to the Marriage Service, that marriage 'ought not to be taken in hand lightly or wantonly to satisfy carnal lusts,' is clearly an adaptation of Vulg. 6^{17}; in fact, the first Prayer Book of Edward VI. contained these words: 'As Thou didst send the angel Raphael to Thobie and Sara, the daughter of Raguel, to their great comfort, so vouchsafe to send Thy blessing upon these Thy servants.' The names of Abraham and Sarah are now substituted.

LITERATURE.—*COMMENTARIES:* Ilgen, *Die Geschichte Tobi's, nach drey verschiedenen Originalen*, Jena, 1800; Reusch, *Das Buch Tobias*, Freiburg, 1857; Fritzsche, *Exeg. Handbk.* 1853; Fuller, *Speaker's Apocr.*, vol. i., London, 1888; Sengelmann, *Das Buch Tobit*, Hamburg, 1857; Gutberlet, *Das Buch Tobias*, Münster, 1877; Bissell in Lange's *Apocr.*, Edinburgh, 1880; Scholz, *Comm. z. B. Tobias*, Wurzburg, 1889; Zöckler, *Apokr. des AT*, München, 1891; Löhr in Kautzsch's *Apokr. u. Pseudepigr. des AT*, Tübingen, 1900.—*TEXTS:* Swete, *OT in Greek*, vol. ii., gives the text of B and ℵ in full, with readings from A as footnotes; Fritzsche gives the text of the Cursives 44. 106 in his *Com.* pp. 89–104; Neubauer on *Tobit* gives Aram., HM, It. I.; the Syriac is found conveniently in Lagarde's *Libri VT Apocr. Syriace*, London, 1861; for HF we have only Walton's *Polyglot*; the most accurate edition of Vulg. is that of Vercellone, Romæ, 1861.—*HELPS TO STUDY:* Schürer, *HJP* II. iii. 37–44; *The Story of Ahikar*, from the Syr., Arab., Arm., Eth., Gr., and Slav. New Heb.].

J. T. MARSHALL.

TOCHEN (תֹּכֶן 'task,' 'measure'; B Θόκκα, A Θόχχαν; *Thochen*).—A town of Simeon mentioned with Ain, Rimmon, and Ashan (1 Ch 4^{32}), and consequently in the Negeb. There is no name like Tochen in the corresponding list of Jos 19^{7}, where, however, the LXX Θόκκα shows that the name has fallen out. The site is unknown.

C. W. WILSON.

TOGARMAH (תֹּגַרְמָה, Θοργαμά, *Thogorma*).—Son of Gomer and brother of Ashkenaz and Riphath (Gn 10^{3}). If Ashkenaz is the Asguza of the Assyr.

inscriptions which is associated with the Minni by Esarhaddon, we shall have to look for Togarmah to the east of Assyria. In 1881 Fr. Delitzsch suggested that it might be Til-garimmu, a fortress of Kummukh or Comagênê; but it must have been a country, since horses and mules were exported from it (Ezk 27^{14}), and not a mere fortress. Most modern authorities decide for Western Armenia. A. H. SAYCE.

TOHU.—See NAHATH.

TOI.—See TOU.

TOKHATH.—See TIKVAH.

TOLA (תּוֹלָע 'crimson worm' 'cochineal'; Θωλά, Jg $10^{1.2}$).—A minor judge, following Abimelech. His name is that of one of the chief clans of Issachar; see Gn 46^{13}, Nu 26^{23} (הַתּוֹלָעִי, ὁ Τωλαεί), 1 Ch $7^{1f.}$, and art. PUAH. His home and burial-place were at Shamir, the seat of the clan, probably in the N. of the highlands of Ephraim: the site is unknown.
G. A. COOKE.

TOLAD (תּוֹלָד 'birth,' 'generation'; B Θουλαέμ, A Θωλάδ; *Tholad*).—A town of Simeon mentioned with Ezem, Bethuel, Hormah, and Ziklag (1 Ch 4^{29}). It is the same place as El-tolad in the Negeb (Jos 15^{30} 19^{4}). The site has not been recovered.
C. W. WILSON.

TOLBANES (Τολβάνης), 1 Es 9^{25}=Telem, Ezr 10^{24}.—One of the porters in the time of Ezra.

TOLL, PLACE OF (τελώνιον, Mt 9^{9}, Mk 2^{14}, Lk 5^{27}, in AV 'receipt of custom').—The place where the tax collector sat to receive his dues. In Wyclif's translation it is rendered *tolbothe*. In the case of Matthew or Levi, the toll collected was the custom exacted by and paid into the treasury of Herod Antipas, the Idumæan prince who then ruled over Galilee. The τελώνιον at Capernaum was of importance, as a large traffic passed on the highway between Damascus and Ptolemais. See PUBLICAN. J. MACPHERSON.

TOMB.—See BURIAL and SEPULCHRE.

TONGUES, CONFUSION OF.—The narrative of Gn 11^{1-9} is too familiarly known to need detailed repetition here; and it will be sufficient to recall briefly its leading features. Mankind, at the time to which it refers, all had one speech, and lived together. They journeyed, it seems to be implied, nomadically from spot to spot; and on one of their journeys they found a plain in the land of Shin'är (Babylonia), where they settled, and where also they determined to build a city, and a lofty tower, which should both gain them lasting renown, and also serve as a centre, or rallying-point, to prevent their being dispersed over the surface of the earth. J″, however, 'came down' to view the building, and [supplying here, with Stade, *ZAW*, 1895, p. 158, and others, words which v.^{7} seems to show have been omitted] having returned to His lofty abode, signified to His heavenly counsellors or associates there (cf. 3^{22}) His disapproval of it: if this, He said, is the beginning of their ambition, what will be the end of it? nothing will soon be too hard for them. So He 'came down' a second time, and 'confounded' (Heb. *bālal*) their language; and from this occurrence the narrator (J) explains the diversity of existing languages, the dispersion of mankind, and the name of the city of Babylon (in Heb. *Babel*).

1. From a critical point of view, the narrative presents considerable difficulties; for, though it belongs to J, it is difficult to harmonize with other representations of the same source. The distribution of mankind into different nations has been already described by J in (parts of) ch. 10, and represented there, not as a punishment for misdirected ambition, but as the result of natural processes and movements; and Babylon, the building of which is here interrupted, is in 10^{10} represented as already built. The narrative connects also very imperfectly with the close of J's narrative of the Flood; for, though the incident which it describes is placed shortly after the Flood, the terms of v.^{1} ('the whole earth'), and the general tenor of the following account, imply a considerably larger population than the 'eight souls' of Noah's family. In all probability (Dillm.) the story originally grew up without reference to the Flood, or the usual derivation of mankind from the three sons of Noah, and it has been imperfectly accommodated to the narratives in chs. 9 and 10; perhaps, indeed, Wellh. and others (cf. the *Oxf. Hex. ad loc.*) are right in conjecturing that originally it belonged to the same cycle of tradition of which fragments are preserved in 4^{17-24}, and formed part of the sequel to 4^{24}.

It is difficult to avoid the conclusion (Wellh., Dillm., and others; cf. the *Oxf. Hex.* ii. 5 f.) that 4^{17-24} (describing the beginnings of *existing* civilization) belongs to a cycle of tradition, in which the continuity of human history was not interrupted by a Flood; and if the conjecture, just mentioned, respecting 11^{1-9} be correct, the same assumption must of course be made with regard to that.

2. That the narrative can contain no scientific or historically true account of the origin of language, is evident from many indications. In the first place, *if* it is in its right place, it can be demonstrated to rest upon unhistorical assumptions: for the biblical date of the Flood (Ussher's artificial treatment of Gn 11^{27} and Ex 12^{40} being disregarded) is B.C. 2501 (or, acc. to the LXX of Gen. and Ex., 3066); and, so far from the whole earth being at either B.C. 2501 or B.C. 3066 'of one language and one speech,' we possess inscriptions dating from periods much earlier than either of these dates written in *three* distinct languages—Sumerian, Babylonian, and Egyptian. But, even if Wellh.'s supposition, that the narrative belongs really to an earlier stage in the history of mankind, be accepted, it would still be impossible to regard it as historical. For (1) it could not, even then, be placed in a different category from the other narratives in Gn 1–11, which (for reasons which cannot be stated fully here; cf. FALL, FLOOD, etc.) must relate to the prehistoric period. And (2) the narrative, while explaining ostensibly the diversity of *languages*, offers no explanation of the diversity of *races*. And yet diversity of language—meaning here by the expression not the relatively subordinate differences which are always characteristic of languages developed from a common parent-tongue, but those more radical differences relating alike to structure, grammar, and roots, which show that the languages exhibiting them cannot be referred to a common origin—is *dependent upon diversity of race*. Of course, cases occur in which a people living near a people of another race, or sub-race, have adopted their language (as, *e.g.*, the Celts in Cornwall have adopted English); but, speaking generally, radically different languages are characteristic of different races, or (if the word be used in its widest sense) of subdivisions of races, or sub-races, which, in virtue of the *faculty* of creating language distinctive of man, have created them for purposes of intercommunication and to satisfy their social instincts. Differences of *race*, in other words, are more primary in man than differences of *language*,* and have first to be accounted for. It is, now, a disputed ethnological

---

* Cf. Sayce, *Races of the OT*, p. 37 f., 'Diversity of race is older than diversity of language.'

problem whether man appeared originally upon the globe at one centre or at many centres.

The former of these alternatives is preferred by modern scientific authorities. Mr. Darwin in his *Descent of Man*, vol. i. ch. 7, after reviewing the arguments on both sides, sums up (pp. 231-233, ed. 1871) in its favour (upon the ground, stated briefly, that the resemblances, physical and mental, between different races are such that it is extremely improbable that they should have been acquired independently by aboriginally distinct species or races): see also to the same effect Lyell, *Principles of Geology*^{12} (1875), ii. ch. 43; Huxley, *Critiques and Addresses* (1883), p. 163 ff. (= *Collected Essays*, vii. p. 249 ff.); and Dr. Tylor, art. 'Anthropology' in the *Encycl. Brit.*^{9} and in his volume *Anthropology* (1881), p. 6. But of course these authorities postulate for man a far higher antiquity than is allowed by the biblical narrative (so also Sayce, *Races of the OT*, 23, 37).

But, whichever of these alternatives be adopted, it is easy to see that differences of race are not accounted for in the biblical narratives: the case of primitive man appearing independently at different centres (with, it may be supposed, racial distinctions, at least to some degree, already implanted in him at these centres) is not contemplated in them at all; if, on the other hand, racial differences were gradually developed by the play of natural selection upon the descendants of a single pair, migrating into new climatic and other physical conditions, then the growth of these differences is neither explained by the biblical narratives, nor, in fact, reconcilable with them. For, taking account only of the simplest and most obvious division of mankind into the white, black, and yellow races,* even Gn 10 (Sayce, *HCM* 120) notices only (except Cush?) tribes and nations belonging to the *white* race; while, from the known fixity of racial types, in cases where we are able to observe them, it is certain that, if the white, black, and yellow races, with the many sub-races included in each, have been developed from a single original pair, the process must have occupied a vastly longer period of time than is allowed by the biblical narrative (which places the creation of man at B.C. 4157, or [LXX] B.C. 5328), however early after Adam the dispersion of Gn 11^{9} may be supposed to have actually occurred.

3. It does not fall within the province of a Dictionary of the Bible to give an account of the languages of the world; but a few particulars may be stated here for the purpose of indicating the general conclusions to which the study of the subject has led modern philologists. Prof. Sayce writes (*Introd. to the Science of Language*, 1880, ii. 31 f.): 'The genealogical classification of languages, that which divides them into families and sub-families, each mounting up, as it were, to a single parent-speech, is based on the evidence of grammar and roots. Unless the grammar agrees, no amount of similarity between the roots of two languages could warrant us in comparing them together, and referring them to the same stock. . . . The test of linguistic kinship is agreement in structure [*i.e.* the formation of sentences], grammar, and roots. Judged by this test, the languages at present spoken in the world probably fall, as Prof. Friedrich Müller observes, into "about 100 different families," between which science can discover no connexion or relationship. When we consider how many languages have' probably 'perished since man first appeared upon the globe, we may gain some idea of the numberless essays and types of speech which have gone to form the language-world of the present day.' Basque is an example of an isolated survival of an otherwise extinct family of speech; and in Tasmania four dialects spoken when our colonists first landed on the island have recently disappeared. On pp. 33-64 of the same volume Prof. Sayce gives a list of 75 families of languages, all unrelated to each other, and each comprising mostly a variety of individual languages or groups of languages.

Of these families the two best known are the Semitic and the Aryan (or Indo-European). The principal languages included in the *Semitic* family are Assyro-Babylonian, Hebrew, Phœnician and Punic, the different Aramaic dialects, Arabic, the S. Arabian dialects (Himyaritic or Sabæan, and Minæan), Ethiopic and allied dialects: all these, though in subordinate details they often differ widely, yet display such obvious resemblances in 'structure, grammatical form, and roots,' that they are manifestly merely varieties of a common parent-tongue. The principal groups included in the *Aryan* family are the Indian group (Sanskrit, with allied languages and many modern vernaculars), the Iranian group (Zend, Persian, etc.), the Celtic group (Welsh, Cornish, Irish, etc.), the Italian group (Umbrian, Oscan, Latin, with the dependent Romance languages), the Thrako-Illyrian group, the Hellenic group, the Letto-Slavonic group (Slavonic, Russian, Polish, Lithuanian, etc.), and the Teutonic group (Gothic, Low German, Anglo-Saxon, English, Dutch, High German, Old Norse, Icelandic, Swedish, Danish, Norwegian): all these languages, though in details they differ even more widely than the Semitic languages, nevertheless exhibit so many common features as to make it evident that they are but varieties, which have arisen by gradual differentiation, under the influence of separation and different local conditions, out of a single original parent-tongue.

Languages, however, differ not only in grammar and roots, but also in a manner which it is more difficult for those, like ourselves, familiar with only one type of language, to realize, viz. 'morphologically,' or in the manner in which ideas are built up into a sentence. Different races do not *think* in the same way; and consequently the forms taken by the sentence in different languages are not the same. The only type of language with which we are practically acquainted is the 'inflectional' type, which prevails in Western Asia and Europe, and to which both the Semitic and Aryan families belong; but there are besides the 'agglutinative' type (of which Turkish is an example), spoken chiefly in Central Asia, the Islands of the Pacific, and many parts of Africa, the 'incorporating,' of which Basque (in S.W France) is the chief representative, the 'polysynthetic,' which prevails throughout America,* and the 'isolating' (of which Chinese is the best-known example), characteristic of Eastern Asia (Tibet, Burmah, etc.): all these types of language differing in the manner in which ideas are grouped by the mind, and combined into sentences (for further particulars reference must be made to Sayce, *op. cit.* i. 118–132, 374 ff., ii. 188 ff.; *Races of the OT*, 35 f.; or Whitney's art. 'Philology' in the *Encycl. Britannica*, ed. 9). It is remarkable, as even this cursory description will have indicated, that the morphological character of a language is correlated, in some hidden way, with the geographical and climatic conditions of the country in which it originated: thus the different families of languages spoken in America, though utterly unrelated to each other, are nevertheless all 'polysynthetic.'

It is an obvious corollary from the radical differences which the various families of language display, as compared with one another, that, whatever may have been the case with the races of mankind, the families of language spoken by mankind must have arisen independently at different centres of human life. 'The languages of the present world are but the selected residuum of the infinite variety of tongues that have grown up and decayed among the races of mankind. . . . The idioms of mankind have had many independent starting-points, and, like the Golden Age, which science has shifted from the past to the future, the dream of a universal language must be realized, if at all, not in the Paradise of Genesis, but in the unifying tendencies of civilization and trade' (Sayce, *Science of Lang.* ii. 322, 323).

---

* See, further, on the classification of the races of mankind, Dr. Tylor's article and work (ch. 3) referred to above.

* In polysynthetic languages the sentence is the unit of thought; and in many of them separate *words* hardly exist.

As need hardly be remarked, what the primitive language of mankind was, is unknown. Formerly, indeed, it was the general belief that it was Hebrew, and all other languages were supposed to be derived from this (!); see Max Müller, *Lectures on the Sc. of Lang.* 1st series, ed. 1864, p. 132 ff. Leibnitz appears to have been the first to point out the absurdity of this view, remarking justly (*ib.* p. 135 f.) that 'to call Hebrew the primitive language was like calling branches of a tree primitive branches'; and the science of comparative philology, which has arisen since Leibnitz's day, has but confirmed the soundness of his judgment. Even among the Semitic languages, Arabic, in many respects, exhibits older and more original features than Hebrew; besides, unless all analogy is deceptive, the language of primitive man must have been of a far more simple, undeveloped type than any of the existing Semitic languages.

4. Differences of language and differences of race thus point independently to the great antiquity of man upon the earth. And their evidence is more than confirmed by testimony from other quarters. Even during the last ten years the discoveries of Petrie and de Morgan in Egypt, and of Hilprecht and others in Babylonia, have shown that civilization existed in these two countries at a period considerably earlier than had previously been supposed; while the existence of inscriptions, sculptures, paintings, and various objects of art, belonging certainly to a date not later than B.C. 4000, makes it evident that the beginnings of civilization and art in both these countries must have preceded that date by many centuries, not to say by millennia. And the numerous relics of human workmanship, especially stone implements of different kinds, and bone or other material, engraven with figures, which have been found during recent years in different parts of Europe and America, bear testimony, in the opinion of geologists, to a greater antiquity still, and show that man, in a rude and primitive stage of development, ranged through the forests and river-valleys of these continents, in company with mammals now extinct, during periods of the so-called 'glacial age,' when the glaciers (which then extended over large parts both of the British Isles and of the Continent of Europe) retreated sufficiently to enable him to do so (Dawkins, *Early Man*, 112-122, 137, 152 ff., 161-164, 169, etc.). The date at which these relics of human workmanship were embedded in the deposits in which they are now found, cannot be estimated, precisely, in years B.C.; but the late Prof. Prestwich, a geologist not addicted to extravagant opinions, assigned to palæolithic man, as 'a rough approximate limit, on data very insufficient and subject to correction,' a period of from 20,000 to 30,000 years from the present time.

See Prestwich's *Geology* (1888), ii. 534; in his *Controverted Questions of Geology* (1895), p. 46, he gives similar but somewhat higher figures. It was in 1859 that 'the barriers which restricted the age of man to a limited traditional chronology were overthrown by the discoveries in the Valley of the Somme and Brixham Cave' (*ib.* p. 19). 'Palæolithic' implements are those found in association with extinct mammalia; 'neolithic' implements, which show a higher type of workmanship, are those found with existing species. In the palæolithic period, the 'river-drift man' hunted the elephant and the lion, the hippopotamus and the rhinoceros, in the valley of the Lower Thames.—See further on this subject Evans, *The Ancient Stone Implements, Weapons, and Ornaments of Great Britain*^{2}, 1897 (on their antiquity, pp. 703-9); Boyd Dawkins, *Early Man in Britain*, 1880 (where, at the end of the several chapters, the characteristics of the civilization of the successive ages—the river-drift hunter, the cave man, the neolithic farmer and herdsman [contemporary with the beginnings of organized empires in the East], the bronze age, and the iron age—are well indicated); Lyell, *Antiquity of Man*^{4}, 1873; Lord Avebury (Sir J. Lubbock), *Prehistoric Times*^{6} (1900), esp. ch. 11; G. F. Wright, *Man and the Glacial Age* (in the *Intern. Scient. Series*), 1892, p. 242 ff.; Morris, *Man and his Ancestor* (a small popularly written work), 1900, p. 21 ff.; Tylor, *Anthropology*, p. 28 ff. That man was coeval in Western Europe with the glacial period is accepted by Sayce, *Races of the OT*, p. 23.

The general conclusion, resulting from all that has been said, may be summed up in Dr. Tylor's words: 'Man's first appearance on earth goes back to an age compared with which the ancients, as we call them, are but moderns. The four thousand years of recorded history only take us back to a prehistoric period of untold length, during which took place the primary distribution of mankind over the earth and the development of the great races, the formation of speech and the settlement of the great families of language, and the growth of culture up to the levels of the old-world nations of the East, the forerunners and founders of modern civilized life' (*Anthropology*, p. 24).

5. It is thus apparent that there are two great facts, the *antiquity of man*, and the *wide distribution of man over the surface of the earth*, of which the biblical narrative, whether in 11^{1-9} or elsewhere, takes no account. It is true, of course, that $11^{8.9}$ accounts *ostensibly* for the distribution of man 'over the face of the whole earth'; but it has been shown above why it does not do so really: the dispersion is placed *too late* to account for the known facts respecting both the distribution of man and the diversity of races: how, for example, can the 'river-drift man' of the glacial, or even of the post-glacial, period be brought within the scope of the biblical narrative? To say that the biblical writers spoke only of the nations of whom they knew is perfectly true; but the admission deprives their statements of all historical or scientific value: 'palæolithic' and 'neolithic' man, and the black and yellow historic races, all existed; and any explanation, purporting to account for the populations of the earth, and the diversity of languages spoken by them, must take cognizance of them: an explanation which does not take cognizance of them can be no historically true account either of the diffusion of mankind, or of the diversity of speech. The first 11 chapters of Genesis, it may be safely assumed, report faithfully *what was currently believed among the Hebrews* respecting the early history of mankind: they contain no account of the *real* beginnings of man, or of human civilization, upon the earth.

6. The true explanation of the story in Gn 11^{1-9}, it cannot be doubted, is that which is given by Prof. (now Bishop) Ryle in his *Early Narratives of Genesis*, p. 127 ff. As in 2^{4b}-4 the origin of various existing customs and institutions is explained in accordance with the beliefs of Hebrew antiquity, so in 11^{1-9} the explanation is given of the diversity of languages spoken by different peoples inhabiting different parts of the earth. As soon as men began to reflect, they must have wondered what was the cause of differences of language, which not only impressed the Hebrews (Is 33^{19}, Dt 28^{49}, Jer 5^{15}, Ps 114^{1}), but also were an impediment to free intercourse, and accentuated national interests and antagonisms. 'The story of the Tower of Babel supplied to such primitive questionings an answer suited to the comprehension of a primitive time. Just as Greek fable told of the giants who strove to scale Olympus, so Semitic legend told of the impious act by which the sons of men sought to raise themselves to the dwelling-place of God, and erect an enduring symbol of human unity to be seen from every side'; and how Jehovah interposed to frustrate their purposes, and brought upon them the very dispersal which they had sought to avoid. The narrative thus contains simply the answer which Hebrew folk-lore gave to the question which differences of language and nationality directly suggested. At the same time, it is so worded as to convey (like the other early narratives of Genesis) spiritual lessons. Though the conception of Deity is naïve, and even, it may be (v.^{7}), imperfectly disengaged from polytheism, the narrative nevertheless emphasizes Jehovah's supremacy over the world; it teaches how the self-exaltation of man is checked by God; and it shows how the distribution of mankind into

nations, and diversity of language, is an element in His providential plan for the development and progress of humanity.

7. No Bab. parallel to Gn 11^{1-9} has as yet been discovered.

The reference in the fragmentary Brit. Mus. Inscription (K. 3657), tr. by G. Smith, *Chald.-Gen.* 160, and mentioned in *HCM* 153, is very uncertain; for though the inscr. does seem to speak of the erection of some building in Babylon by the order of the king, which offended the gods, so that they 'made an end by night' of the work done by day, the crucial words, rendered 'strong place' and 'speech,' are (as is admitted for the latter [*tullu*] by Smith himself, p. 163) both extremely doubtful: see Delitzsch's note in the Germ. tr. of Smith's book, p. 310; and for *tâzimtu*, 'strong place,' Del. *HWB* 37, where it is tr. *Wehklage*! Cf. the transcr. and tr. by Boscawen in *TSBA* v. (1877) p. 303 ff. (where, however, p. 308, 'speech' for *melik*, 'counsel' (*HWB* 413), is quite gratuitous).

In the Jewish Haggada of a later age, the tower was said to have been destroyed by mighty winds: see the *Orac. Sibyll.* iii. 97 ff. (whence Jos. *Ant.* I. iv. 3 [the quotation] = Alex. Polyhistor *ap.* Syncell. *Chron.*, ed. Dindorf, i. 81 C), and *Jubilees* 10^{19-26} (tr. Charles, *JQR* vi. 208 f.): cf. (from Abydenus) Eus. *Præp. Ev.* ix. 14 = Eus. *Chron.*, Schoene, i. 33 = Syncell. i. 81 D, and (from Eupolemus *ap.* Alex. Polyhistor) ix. 17. 1. From the fact that in Jos. and Abyd. (τοὺς ἀνέμους θεοῖσι βωθέοντας ἀνατρέψαι τὸ μηχάνημα) the plural 'gods' is used, Stade (*l.c.* p. 161 f.) conjectured that these authorities have preserved reminiscences of an older polytheistic version of the tradition.

In fact, though the narrative plainly presupposes a knowledge of Babylonia, it does not seem itself to be of Babylonian origin: if any Bab. legend lies at the basis of it, it must have been strongly Hebraized. As Gunkel has remarked, the narrator speaks as a foreigner rather than as a native: the unfavourable light in which the foundation of Babylon is represented; the idea that the erection of what (*ex hyp.*) can hardly have been anything but a Bab. *ziḳḳurat* (or pyramidal temple-tower *) was interrupted by (*ex hyp.*) a Bab. deity; the mention, as of something unusual, of brick and bitumen, as building materials, and the false etymology of the name 'Babel,' are all features not likely to have originated in Babylonia. It does, however, seem a probable conjecture (Ewald, *Jahrb.* ix. [1858] 12f., Schrader, Dillm.) that some gigantic tower-like building in Babylon, which had either been left unfinished or fallen into disrepair, gave rise to the legend. The tower in question has often been supposed to be Iuriminanki, the *ziḳḳurat* of Ê-zida, the great temple of Nebo, in Borsippa (a city almost contiguous to Babylon on the S.W.), the ruined remains of which form the huge pyramidal mound now called *Birs Nimroud.* This *ziḳḳurat*, remarkably enough, Nebuchadnezzar states had been built partially by a former king, but not completed: its 'head,' or top, had not been set up; it had also fallen into disrepair; and Neb. restored it.† Others regard it as an objection to this identification that Ê-zida was not actually *in* Babylon; and prefer to think of Itiminanki, the *ziḳḳurat* of Ê-sagil, the famous and ancient temple of Marduk in Babylon itself, the site of which is generally ‡ considered to be hidden under the massive oblong mound called *Babil*, about 20 miles N. of Birs Nimroud.§ Schrader does not decide between Ê-zida and Ê-sagil: Dillm. thinks Ê-sagil the more likely, but leaves it open whether, after all, the Heb. legend may not have referred to some half-ruined ancient building in Babylon, not otherwise known to us. The high antiquity of Babylon, and the fact that it was the chief centre of a region in which the Hebrews placed the cradle of the human race, would fit it to be regarded as the point from which mankind dispersed over the earth.

See, further (besides the Comm.), Cheyne, art. 'Babel (Tower of)' in the *Encycl. Bibl.*; and Dr. Worcester in *Genesis in the Light of Modern Knowledge* (New York, 1901), 491 ff.

S. R. DRIVER.

TONGUES, GIFT OF.—i. THE BIBLICAL EVIDENCE.—(*a*) *Acts of the Apostles.* On the first day of Pentecost after the Resurrection and Ascension (Ac $2^{1ff.}$), the disciples, about 120 in number (1^{15}), were assembled together. 'Suddenly there came from heaven a sound as of the rushing of a mighty wind, and it filled all the house where they were sitting. And there appeared unto them tongues parting asunder, like as of fire; and it [*sc.* γλῶσσα] sat upon each one of them. And they were all filled with the Holy Spirit, and began to speak with other tongues as the Spirit gave them utterance.' Two wonders are here described—the vision of the fiery tongues, apparent to all in the house, but, as it seems, to them only; and the speaking 'with other tongues,' which was, as the sequel shows, apparent to others also. The latter (v.^{11}) consisted in 'speaking the mighty works of God.' It was not, at first at any rate, addressed to those outside. But 'when this sound was heard, the multitude came together,' and Jews, then present at Jerusalem from every nation under heaven, heard to their astonishment the brethren speaking in their own respective languages (vv.$^{5-12}$). Some, however, 'mocking, said, They are filled with new wine.' In reply to these latter, St. Peter interprets the phenomenon by recalling the prophecy of Joel, which speaks of an outpouring of the Spirit in the latter days, which shall cause the servants and handmaidens of the Lord to see visions and to prophesy (vv.$^{17.18}$), and deduces it from the Messianic office of Jesus, in whose exaltation this promise of the Holy Spirit is fulfilled (v.^{33}). The phenomenon of the fiery tongues reappears no more in the sacred narrative; but that of speaking with tongues is repeated (Ac $10^{44.46}$) upon the conversion of the Gentile household of Cornelius, who with a sudden inspiration of the Holy Spirit 'speak with tongues and glorify God.' This is clearly the same phenomenon as is described in Ac 2^{11}, and *the identity is expressly asserted by St. Peter* (11^{15}) ὥσπερ καὶ ἐφ' ἡμᾶς ἐν ἀρχῇ. The 'speaking with other tongues' is therefore a recurrent phenomenon in the Apostolic Church; and accordingly we read of the twelve disciples at Ephesus (19^{6}), that 'when Paul had laid his hands upon them, the Holy Ghost came on them; and they spake with tongues and prophesied.' In this passage the phenomenon is for the first time expressly associated with the exercise of the prophetic gift. (On Spitta's analysis of the sources of Ac $2^{1ff.}$ see Knowling, p. 100).

(*b*) *Gospel of St. Mark.*—In the doubtful appendix to this Gospel (16^{17}), among the wonders which are to follow those who believe, it is said 'they shall speak with [new] tongues.' The word 'new' is of very questionable genuineness; if it be rejected, the passage is a bare reference to 'speaking with tongues,' and throws little light upon the nature of the utterances.

(*c*) *First Epistle to the Corinthians.* — In chs. 12–14, especially the last-named chapter, we have the most circumstantial reference to the phenomenon. In 12^{4-11} St. Paul enumerates different gifts, which in their diversity proceed from the self-same Spirit. First come gifts of ordinary teaching (λόγος σοφίας, λ. γνώσεως), then faith, healings, and other miracles, then at the end prophecy and the discerning of spirits, followed, in the last place of all, by 'kinds of tongues' (γένη), a new qualification, and 'interpretation of tongues,' which also appears in these chapters alone. The enumeration of offices and gifts in vv.$^{28\cdot 30}$ corresponds to that of gifts in vv.$^{4-11}$. The teaching offices come first (apostles, prophets, teachers), then miracles and healings, then 'helps' and 'guidances,' then, again last of all, 'kinds of tongues.' Prophecy and 'discernings of spirits' are evidently omitted here because of the insertion of 'prophets' after 'apostles.' Then, in the interrogative clauses that follow, the 'tongues,' this time with the added mention of 'interpretation,' but without the mention of *γένη*, again bring up the rear: 'Do all speak with tongues? do all interpret?' In ch. 13 the tongues, which St. Paul has put last in the order of precedence, come first in the order of depreciation. 'Tongues of men and of angels' may be taken as a climax, for this purpose, upon the less rhetorical *γένη γλωσσῶν* (see below, § iii. (*b*)). Apart from charity, not only tongues (however wonderful), but even prophecy, even *works* of charity, are worthless. Compared with it, prophecy, tongues, knowledge itself, all belong to our childhood, to our ignorance, to the sphere of things temporal. Then in ch. 14, after a closing reminder of the subordinate place which *πνευματικά* are to occupy in our desires as compared with charity, the apostle enters in detail upon a comparison between the two most conspicuous *πνευματικά*, viz. prophecy and tongues. Prophecy is the more desirable of the two, *because it is addressed to men, and benefits them*, whereas 'tongues' *are addressed to God, and benefit the speaker only* (vv.$^{1-5}$). The only exception to this is when the speaker (or some other person, v.$^{27f.}$) can interpret his utterances. This would enable the rest of those present to join in with their 'Amen' (v.^{16}), and so derive some benefit from the prayer. Without going into details of exegesis, which in this chapter are full of difficulty, it is sufficient to emphasize certain points upon which the apostle speaks without any obscurity. *Firstly*, as already remarked, the speaker with tongues speaks to God only; his utterance is *not a sermon but a prayer* or *psalm* (vv.$^{2.\ 13.\ 14.\ 15}$), or a *thanksgiving* (v.^{16}). *Secondly*, the utterance is *unintelligible to the hearers, and even to the speaker.* The spirit is in prayer, but the *mind* takes no part, it is *unfruitful* (vv.$^{14.\ 15}$); the speaker 'edifies himself' apparently by his attitude of ecstatic devotion, not by conscious expression or reception of ideas. *Thirdly*, while 'interpretation' is thought of as possible, its absence seems to have been the rule, its presence the exception (vv.$^{5.\ 13}$). Accordingly (*fourthly*), the impression which 'tongues' produce upon a visitor, especially on a non-believer (v.^{23}), is that of an assembly of madmen (cf. Ac 2^{13}); whereas, in the case of prophecy, the non-believer, or at any rate the visitor, will be profoundly stirred, probably to conversion (vv.$^{24.\ 25}$).

† The inscr. is tr. in *KAT*^{2} 124 f., *KIB* iii. 2, pp. 53, 55.

‡ See, however, Hommel in vol. i. p. 213^{a}; and BABYLON, § 8, in the *Encycl. Bibl.*

§ See the plan of Babylon and its environs in Smith's *DB*, *s.v.*; or in the *Encycl. Bibl.* *s.v.* Views of the two mounds referred to may be seen in Smith, *s.v.* 'Babel,' and 'Babel (Tower of)'; Riehm, *HWB*, *s.v.*; or Ball's *Light from the East*, pp. 220, 221.

The closing section of the chapter (v.$^{26ff.}$) shows the *ἀκαταστασία*, which had resulted at Corinth from the childish (12$^{15.\ 29}$ 13^{11} 14$^{12.\ 20}$) desire of too many of the members of the Church to excel in the exercise of abnormal gifts, and from their dangerous tendency to value spiritual gifts in proportion to their abnormal features. The apostle exactly inverts this principle.

ii. CLASSIFICATION OF THE DATA.—There is no possible doubt that the phenomena of the Church of Corinth are homogeneous with those which meet us at Cæsarea (Ac 10^{46}) and at Ephesus (Ac 19^{6}). These two passages are linked together by the reference to baptism, and the close relation of the tongues to prophecy connects the latter passage with the phenomena of Corinth. We may therefore conclude that one feature of the life of the Apostolic Churches was the correlation between the perceptible presence of the Holy Spirit, which began at baptism, but was continued in the assemblies and corporate acts of the Churches (see vol. ii. pp. 407^{b}, 409^{a}), and certain utterances on the part of members of the Churches, sometimes intelligible and less ecstatic (prophecy), sometimes more ecstatic and not intelligible (tongues). On the border-line between the two classes of utterance would come the interpretation of tongues, a gift apparently known to St. Paul, but assumed by him to be exceptional, and passed over in the more occasional notices of the Acts of the Apostles. With these data we can without difficulty class the reference in St. Mark 16 (above, i. (*b*)). It has been not infrequently laid down, that while these passages refer to one homogeneous group of phenomena, that group is separated from the phenomena of Ac 2 by a difference in kind. This assumption, however, is in too direct conflict with the words of St. Peter (Ac 11^{15}) to be admitted. The homogeneity of the later phenomenon with that of Pentecost, here asserted, can be denied only by undermining the credit of the Acts as a source. But, while we are thus obliged to class the phenomena of Ac 2 with those of the other passages of the NT, it must be recognized that with the features common to all passages certain peculiarities are combined in the narrative of Pentecost. First, there is the sound of the rushing wind; second, the vision of the fiery tongues; thirdly, the intelligibility of the utterances *without the 'interpretation,'* which to St. Paul is necessary if the 'tongues' are to be understood. But in Ac 2, as in 1 Co 14, the 'tongues' are utterances of worship, not of a didactic character, not addressed to the Jews (whose attention is attracted by the utterances only after they have begun); the association with prophecy, implied in the quotation from Joel, is, to St. Peter apparently, as to St. Paul, due simply to identity of *origin*; and in both passages (Ac 2^{13}, 1 Co 14^{23}) the impression produced upon less sympathetic hearers is similar. In the attempt, therefore, to interpret correctly the data of the NT relating to the subject of 'tongues,' the only sound method to adopt will be to begin from the most circumstantial account we have,—that of St. Paul,—but, in applying the results to other passages, to bear in mind any peculiar features which distinguish their account of what is certainly in substance the same phenomenon.

iii. INTERPRETATION OF THE EVIDENCE.—(*a*) St. Paul, in common with all to whom the Christian religion is a revelation from God, assumes that the gift of tongues is an energy of the Holy Spirit. No doubt he places it lower in value than any other spiritual gift enumerated by him. No doubt, also, like other gifts of the Spirit, it was capable of being simulated by phenomena not due to genuine inspiration. There was room here for *διάκρισις* (1 Co 12^{10}). But the main criterion to be applied by the discerner of spirits was *the substance of what was said* (1 Co 2^{4}, cf. 1 Jn 4^{1}, the apostle has no sympathy with the heathenish idea that an utterance, apart from its intrinsic value, could be accredited by its abnormal circumstances). Now, in the case of an unintelligible utterance, like that of *ἐν γλώσσῃ*, no such criterion was applicable. The apostle therefore assumes, in the case of tongues, that he has to do in each instance with the spiritual reality, not with a merely natural phenomenon (14$^{4.\ 16}$). We must be content with the same assumption, however mindful that where there is the need of self-control (14^{28}) there is the possibility of self-will. The Spirit is doubtless really at work, even upon a psychical background of obscure, easily perversible, mental exaltation.

(*b*) If the phenomena of the NT are essentially homogeneous, we may safely reject some explanations which are applicable at most to a limited number of the passages under review. First among these may be set aside that based upon the strictly literal and physical sense of *γλῶσσα*, understood of 'the tongue' or organ of speech (Eichhorn, Meyer, etc.). This might at first sight be thought applicable to Ac 2. The disciples, as the fiery tongues appear to settle upon each of them, begin to speak *ἑτέραις γλώσσαις* (compare the probably spurious *καιναῖς* of Mk 16^{17}), *i.e.* with (literal) tongues other than their own, identified with, or symbolized by, the tongues of flame. But it cannot be seriously argued that the 'tongues' of this passage are different from the 'dialects' of vv.$^{6.8}$; this identification is quite clear in v.^{11} *ταῖς ἡμετέραις γλώσσαις*. And this carries with it (by Ac 11^{15}) the interpretation of Ac 10^{46} 19^{6}, where *λαλεῖν γλώσσαις* is equivalent to λ. *ἑτέραις* γ. in Ac 2. The literal sense claimed for γλ. in these latter passages has no support in Ps 38^{4} LXX *ἐλάλησα ἐν γλώσσῃ μου*, where the use of the possessive indicates the literal sense. But it is argued that the literal sense is applicable in 1 Co 12. 14 (but $13^{1?}$), where ($14^{14f.}$) *προσεύχεσθαι γλώσσῃ* is contrasted with *πρ. τῷ νοΐ*, the tongue (so it is urged) being conceived as the passive instrument of the *πνεῦμα*, and the plural *γλῶσσαι* (surely a *reductio ad absurdum*) referring 'to the various motions of the tongue' (so Thayer-Grimm, *s.v.*; see also Meyer-Heinrici on 12^{10}). *Γλῶσσα* must mean an utterance, not merely the moving tongue; this latter sense breaks down in the pl. *γλῶσσαι*, and still more conspicuously in the phrase *γένη γλωσσῶν*, which clearly points to various kinds of utterance, whether foreign languages or not.

(*c*) Another sense of *γλῶσσα* which fails of general applicability is that (exemplified in Aristotle, *Poet.* 21 f.) of 'unusual word,' *e.g.* expressions borrowed from the Aramaic, like 'Amen,' 'Maran Atha,' or 'Abba' (Ernesti, Bleek, etc.). The use of such expressions would not be improbable in a state of high spiritual tension, and in fact the last-named word was regarded by St. Paul as specially characteristic of the Spirit (Ro 8^{15}, Gal 4^{6}); but there is nothing in his language to connect it specifically with 'tongues,' which possibly may be referred to, though even this is uncertain, in the *στεναγμοὶ ἀλάλητοι* of Ro 8^{26}. Moreover, this sense of *γλῶσσα* fits ill with the data of Ac 2, and still worse with those of 1 Co 14; for these occasional borrowed words had a well-recognized meaning, and in their use the *νοῦς* was not *ἄκαρπος*.

(*d*) The same principle, to say nothing of other considerations, absolutely excludes the idea, which has some traditional support in Christian opinion from Origen (*in Rom.* 1^{13}) downwards, that the apostles, at any rate, if not all those present, received at Pentecost the more or less permanent power of *preaching in foreign languages*. To begin with (above, § ii.), the speaking with tongues is an utterance of worship, not of instruction. It has been argued that we never read of the apostles needing the services of an interpreter. But neither do we read of their 'speaking with tongues' on any occasion subsequent to Pentecost. St. Paul, it is true, claims to possess the gift, but in a context (1 Co 14^{18}) which excludes any reference to preaching. With one exception, indeed, we do not read of any apostolic preaching in lands where Greek or Aramaic would not be a sufficient medium. The partial exception is in the bilingual district of Lystra (Ac 14), and here the apostles clearly do not follow what is said *Λυκαονιστί*. Ocular evidence at last enables them to realize that they are regarded as gods. But though the sacred text says nothing of *preaching*, permanently or even temporarily, in foreign tongues, it certainly suggests at first sight that a great number of foreign languages were supernaturally *spoken*, if only in adoration, on the occasion of the first Pentecost.

(*e*) This interpretation is not so wholly excluded as might appear at first sight by the language of 1 Co 14. For although the *γλῶσσαι* are, without one to interpret them, unintelligible even to the speaker, the possibility of interpretation, clearly contemplated by St. Paul, suggests that he regarded the utterances as having a meaning, though as a rule not ascertainable (*τὴν δύναμιν τῆς φωνῆς*, v.^{11}). If so, the only difference in Ac 2 would be that the interpreter was on that occasion unnecessary.

What, then, is really described in Ac 2? The view has been held by both ancient (Greg. Naz. *Or.* 41. xv, Bede, etc.) and modern writers, that while the disciples spoke in some one language, each group of hearers understood the words as spoken in his own; just as St. Vincent Ferrer, preaching in Spanish, was said to have been understood by English, Flemish, French, and Italian hearers, etc. But this is not what the narrative describes: we have a miracle of *speech*, not of *hearing* only, they began (before the hearers had come) to speak *ἑτέραις γλώσσαις*. But the more difficult question is in what precisely does the miracle described consist? The hearers are not Gentiles, but Jews (2^{5}). Proselytes are included among the Roman visitors (2^{10}, it is conceivable that Ἰουδ. τε κ. προσ. applies to *all* the countries enumerated, but the mention of Ἰουδαίαν (v.^{9}) is rather adverse to this); but clearly we have to do with the assembly of Jewish pilgrims, including perhaps some more permanent visitors (*κατοικοῦντες*, v.^{5}), whom a great festival would find gathered in the Holy City. Now the list (vv.$^{9\text{-}11}$) is one *of countries, not of languages*. Of the fifteen nationalities or regions enumerated, Judæa (even if here used by Luke as in Lk 4^{44} for Palestine generally) and probably Arabia (see ARETAS) belong to the domain of Palestinian Judaism whose language was West Aramaic. The Jews of the Euphrates region, Parthians, Medes, Elamites (*i.e.* of Persia, Elam had ceased to exist as a kingdom since the days of Assurbanipal), and Mesopotamians represent the Babylonian group of Jews, who used an East-Aramaic dialect.

This leaves us with nine countries, of which five fall within Asia Minor, where the Jews, as their inscriptions show, spoke Greek (Schürer, *HJP* §§ 2, 31; this was the case as far north as the Crimea). Of the remaining four, Egypt is the mother of Hellenistic Judaism, Cyrene was Greek, Greek was the language of the Jews in Crete, and, as their inscriptions show, of the Jews of Rome. Accordingly, the narrative does not appear to carry us beyond the area of Greek and Aramaic-speaking Judaism. That the Jews of the different countries enumerated spoke these languages with dialectical differences, is of course more than probable. It might therefore suggest itself that the obstacle overcome by the inspiration of Pentecost was diversity not of language but of dialect only. But we cannot appeal, for confirmation of this, to the use of the word *διάλεκτος* (in vv.$^{6\text{-}8}$), for the word means *language* (*e.g.* Aramaic as contrasted with Greek, Ac 1^{19} 21^{40} 26^{14}). A stronger point is that the surprise of the hearers turned on the fact that the speakers were Galilæans (Ac 2^{7}, cf. Mt 26^{73}), *i.e.* not merely men of Palestinian language (Ἑβραῖοι), but men of a marked provincial dialect. But, quite apart from the result of the above analysis of the list, there is no evidence that Jews outside Palestine used any language but Greek or Aramaic. The conclusion, then, as to the exact implications of the narrative is very obscure. We must probably be content with a *non liquet*; possibly the language of St.

Peter ($2^{17.\,18.\,33}$, note ἐκχεῶ, ἐξέχεεν) may permit the conjecture that the narrative combines the two elements, afterwards treated as distinct, of tongues and prophecy. Common to all the NT descriptions of the tongues is the feature of utterances not in the common language of the speakers; but whereas in 1 Cor. the hearers are, as a rule (*i.e.* without an interpreter), in the dark as to the meaning, in Ac 2 the meaning is clear to both Greek-speaking and Aramaic-speaking Jews without any such aid: they hear the praises of God each in the tongue wherein he was born.

(*f*) It has been necessary, in order to test the possibility of a definite interpretation of the data, to reduce the narrative of the first Christian Pentecost to its framework of definite prose statement, so far as the nature of the γλῶσσαι, our special subject of inquiry, is concerned. If our conclusion on this point is necessarily indefinite, we must remind ourselves that the γλῶσσαι are but one element in an event of momentous significance, the baptism (Ac 1^5) of the Christian Society for its mission to mankind. The baptism of Pentecost takes its place, in intimate context with the Resurrection and Exaltation of Christ, as the experience which lies behind, and is needed to render conceivable, the abrupt psychological transition which transformed the cowed, perplexed, scattered disciples of a few weeks before into the band that in the succeeding narrative sets out upon its march with joyous swing, conquering and to conquer. That the Spirit was then really given is impossible for believers in the Resurrection of Christ to doubt. That His coming was overwhelming in its suddenness and intensity, and was attended by physical signs not repeated in their fulness on any later occasion, is not less credible than the reality of the 'promise of the Father' and of its fulfilment. That these signs should be not only unaccountable by ordinary causes, but in some details incapable of precise definition, is a small thing, and antecedently probable. Beyond this it is hardly possible to go.

iv. LATER HISTORY.—There is no clear evidence of tongues as a religious phenomenon anterior to NT times, nor of their survival in the early Church after the apostolic age. Ecstatic utterances appear to have occurred in some forms of OT prophecy (2 S 19^{20} etc.), but no mention is made of 'tongues' as a feature of them. Even in heathen religions, as St. Paul hints (1 Co $12^{1ff.}$), there were analogous phenomena which it was necessary to remember in the attempt to 'discern' the true work of the Holy Spirit. This suggests that profound religious excitement, to whatever cause it may be due, tends to find expression in abnormal utterance. In the NT this tendency gradually gives way to more normal forms; in Eph $5^{18.\,19}$ we catch, as it were, the last echoes of glossolalic speech; in the later Epistles we hear no more of it. Irenæus (*Hær.* v. vi.) can still tell us, speaking apparently from hearsay, of brethren who prophesied, and spoke through the Spirit in all kinds (παντοδαπαῖς) of tongues; but Chrysostom (on 1 Co 14) frankly declares that the gifts described by St. Paul were unknown in the Church of his day. That the gift of tongues really survived even down to the time of Irenæus is, in the absence of corroborating evidence, difficult to believe. His rather vague statement may rest on some report as to the Montanists of Asia Minor, but in their case again the definite evidence we possess points to 'prophecy' rather than 'tongues' as the distinctive form of their ecstatic speech.

Of more modern examples of such utterances among the Franciscans of the 13th cent., the early Quakers, Jansenists, Methodists, the French Prophets of the Cevennes, and particularly the Irvingites whose 'tongues' (1832-3) have been described by several competent observers, we will only observe that it would be harsh and unjust to ascribe all such phenomena to the studied attempt to reproduce those of the apostolic Church. In whatever way we may explain these utterances, and however good reason there may be to suspect occasional simulation, the spontaneity of the phenomena in general must be freely admitted. But, for reasons suggested above, great caution is necessary in applying them to the interpretation of the NT data.

LITERATURE.—On the last-named class of phenomena, Plumptre's excellent article in Smith's *DB* gives useful references; see also Miller, *Irvingism.* On the NT data the literature is considerable. The Commentaries, *e.g.* those of Meyer-Wendt and Knowling on Ac 2, of Meyer-Heinrici, Godet, Edwards on 1 Co 12. 14, sum up and discuss the various explanations. Among many separate essays we may mention those of Schneckenburger (*Beitr.* 1832); Wieseler (in *SK*, 1838); Hilgenfeld, *Glossolalie*, Leipzig, 1850; Zeller, *Acts of the Ap.*, Eng. tr. vol. i. p. 171 (the ablest anti-miraculous discussion; denies any historical foundation for Ac 2); Rossteuscher, *Gabe d. Sprachen im Apost. Ztltr.* (Marb. 1855, Irvingite); P. Schaff, *Church History*, vol. i. § 24; Weizsäcker, *Apost. Ztltr.* p. 589 ff.; A. Wright, *Some NT Problems*, 277 ff. In these works references will be found to many other discussions, an enumeration of which is beyond the limits of this article.

A. ROBERTSON.

TOOLS.—In Syria, since its conquest by the Arabs in the 7th cent., little or no progress has been made in the mechanical arts: workmen still use much the same kinds of tools and methods of working as their ancestors did ten centuries ago. It is only within the last 40 or 50 years that European implements have come into use. It would occupy too much space to give an account of the tools used in the different handicrafts of Syria; it may be sufficient to mention a few employed in masonry, carpentry, and smith work.

Masonry.—In Syria, in very early times, stones were hewn from the rock by a pointed hammer called the *bîk* (see HAMMER), and the larger the stone the less, of course, was the labour of cutting. This seems to have been the reason for the great size of the stones in the oldest part of the temple of Baalbek. When the wedge came into use for splitting rocks, smaller stones were quarried, and consequently buildings were more quickly constructed. The masons of Lebanon, who are still acknowledged to be the most skilful builders in Syria, use no means, such as cranes, for lifting a stone to its position on the wall they are building. If a stone is too large to be carried, an inclined plane is made of trunks of trees, or of stones and earth, and the stone is rolled to its place. Chisels are used only for giving a fine edge to a stone, or for carving. For other tools see HAMMER.

Carpentry.—The tools of the Lebanon carpenters are the very same as those used by the ancient Egyptian workmen; only, instead of being of flint or bronze, they are of steel. Of all his tools, the *ḳadûm* or adze is the most useful to the Syrian carpenter; it is hammer, chisel, and plane in one. In the early part of this century planes were not used by the carpenters in the higher villages of Lebanon; planks of wood were smoothed by the adze. The ancient Egyptian adze appears to have been, at first, a sharp flint fastened by thongs to a handle, and replaced by a blade of bronze when metals came into use. The axe passed through similar changes. The bow and drill are still in use for boring holes in wood; the awl is a shoemaker's tool. These tools with the saw are the ordinary implements of a Syrian carpenter, and are carried about by him when seeking work. European tools are, however, becoming common.

Smith.—The hammers and tongs are very much the same in form as those used in Europe, but very roughly made. Anvils are simply cubical masses of iron having the upper surface faced with steel. The original bellows was a tube through which the workman blew into the fire; then goat-skin bags were employed; and the form of bellows used by the coppersmiths of Syria at the present time is almost the same as that depicted on the tombs of ancient Egypt. The modern worker in iron requires a more powerful instrument, and two large circular bellows are placed so that he may take advantage of the weight of his body in working them. See, further, the separate articles on various tools. W. CARSLAW.

TOPARCHY (*τοπαρχία*).—A word used only in 1 Mac 11^{28}, and there to denote three 'provinces' (RV; AV 'governments') to which the name *νομός*, or 'nome' (AV and RV 'governments'), is given in 1 Mac 10$^{30.\ 38}$ 11^{34}. The three toparchies—Aphærema, that is, Ephraim-Ophrah, Lydda, and Ramathaim—were detached from Samaria and added to Judæa some time before the war between Alexander Balas and Demetrius Soter, and their possession was confirmed to Jonathan Maccabæus by Demetrius II. Nikator.

The toparchy was a small administrative division, corresponding to the Turkish *Nahieh*, which was administered by a toparch as the *Nahieh* is by a mudir. According to Pliny (v. 14), Judæa was divided into ten, or, according to Josephus (*BJ* III. iii. 5), into eleven toparchies. See Schürer, *HJP* II. i. 151 ff. C. W. WILSON.

TOPAZ.—In four passages of the OT (Ex 28^{17} 39^{10}, Ezk 28^{13}, Job 28^{19}) the Heb. word פִּטְדָה [ד *raphatum*] is rendered 'topaz' by AV and RV, in accordance with LXX *τοπάζιον* and Vulg. *topazius*. The other ancient VSS vary their rendering, Pesh. using ܐܪܘܩܐ, ܡܪܒܠܐ, and ܡܪܓܢܝܠܐ, whilst Targ. has יַרְקָן and כַּרְנְּלָא יַרְקָא. The LXX and Vulg. also employ *τοπάζιον*, *topazion*, as representing פָּז at Ps 119^{127}; but the Pesh. there contents itself with the vague term 'precious stones,' and the Targ., still more correctly, אוֹבְרִיזָא (Gr. *ὄβρυζον*). In the NT the topaz is mentioned but once (Rev 21^{20}), as the ninth of the foundation stones of the New Jerusalem. The two passages in Ex. name it as the second stone in the first row on the high priest's breastplate, and it is usually believed to have borne the name of Simeon. The comparison used in Job implies its costliness, and indicates the quarter from which it was chiefly derived: 'The topaz of Ethiopia shall not equal it [wisdom].' In Ezek. the wearing of it is a mark of regal splendour: 'Every precious stone was thy [the king's] covering, the sardius, topaz,' etc. There is a fair amount of probability in the derivation of the Heb. name פִּטְדָה from the Sansk. *pîta*, 'yellow,' and in the suggestion that the Gr. form and those derived from it are merely a transposition of the Heb., *t p d* for *p ṭ d*. Codex Amiatinus in Rev 21^{20} spells the word with a *d*, *topadius*.

The question whether the topaz of the Bible is identical with our gem of that name has been rendered somewhat difficult by the well-known description of the stone in Pliny, *Hist. Nat.* xxxvii. 8—

> 'Egregia etiam nunc sua topazio gloria est, e virenti genere, et cum primum reperta est, prælatæ omnibus. Accidit in Arabiæ insula, quæ Cytis vocabatur, in quam devenerant Troglodytæ prædones fame et tempestate fessi, ut, cum herbas radicesque foderent, eruerunt topazion. Hæc *Archelai* sententia est. *Juba* Topazum insulam in Rubro mari a continenti stadiis ccc abesse dicit; nebulosam et ideo quæsitam sæpius navigantibus nomen ex ea causa accepisse, topazim enim Troglodytarum lingua significationem habere quærendi. . . . Eadem sola nobilium limam sentit.'

We need not discuss the etymology: the two important points are the greenness of the gem and its softness. The first of these is not fatal to the identification, seeing that we know of green topazes; the second is. Pliny may have included the chrysolite and the peridot under this name. Yet it does not follow that all the ancient mineralogists agreed with him. It would not be easy to find a more apt description of our topaz than in the first few words of Strabo's interesting account, Γεωγραφικά, xvi.—

> Λίθος δὲ ἐστι διαφανής, χρυσοειδὲς ἀπολάμπων φέγγος, ὅσον μεθ' ἡμέραν μὲν οὐ ῥᾴδιον ἰδεῖν ἐστι, περιαυγεῖται γάρ· νύκτωρ δ' ὁρῶσιν οἱ συλλέγοντες· περικαθάψαντες δὲ ἀγγεῖον σημείου χάριν μεθ' ἡμέραν ἀνορρύττουσι. καὶ ἦν σύστημα ἀνθρώπων ἀποδεδειγμένων εἰς τὴν φυλακὴν τῆς λιθίας ταυτῆς, καὶ τὴν συναγωγήν, σιταρκουμένων ὑπὸ τῶν τῆς Αἰγύπτου βασιλέων.

The statements which have appeared as to the chemical composition of the topaz differ strangely. Streeter (*Precious Stones*, p. 221), referring to the distinction between Oriental and Occidental topazes, says that the former consist of pure alumina, the latter being more than half alumina and for the rest composed of silica and fluorine. On the other hand, it has been spoken of as a silicate of aluminium associated with the fluorides of aluminium and silicon. In shape it is an orthorhombic prism with a cleavage transverse to the long axis. It has the power of double refraction, and becomes electric when heated or rubbed. It is almost as hard as the diamond, but there are a few engraved specimens—an antique one, for instance, at St. Petersburg, with the constellation Sirius. Australia produces green and yellow stones. Exquisite transparent ones, clear and bright as the most sparkling water, come from Tasmania—*gouttes d'eau*, the French call them. In Saxony pale violet are found; in Bohemia sea-green; in Brazil red, from pale to deep carmine.

Pliny's influence is very apparent in *The Lapidarium* of Marbodus—

'From seas remote the yellow *Topaz* came,
Found in the island of the self-same name;
Great is the value, for full rare the stone,
And but two kinds to eager merchants known.
One vies with purest gold, of orange bright;
The other glimmers with a fainter light:
Its yielding nature to the file gives way,
Yet bids the bubbling caldron cease to play.
The land of gems, culled from its copious store,
Arabia sends this to the Latian shore:
One only virtue Nature grants the stone,
Those to relieve who under hemorrhoids groan.'

Ruskin, in his lecture on the symbolic use of precious stones in heraldry, states that the topaz is 'symbolic of the Sun, like a strong man running his race rejoicing, standing between light and darkness, and representing all good work.' It is curious to compare this with Marbodus, in his Prose on the Twelve Foundation Stones: 'Contemplativæ solidum vitæ præstat officium.'

J. TAYLOR.

TOPHEL (תֹּפֶל, Τόφολ).—A place named in defining the situation of Dt 1^{1}. It has been frequently identified (since Robinson, *BRP*^{2} ii. 167, 187, following a suggestion of Hengstenberg) with *eṭ-Ṭafîle* in Gebal, about 15 miles S.S.E. of the Dead Sea, but phonetic, apart from other, reasons make this identification very uncertain (see Driver or Dillm. *ad loc.*).

TOPHET, TOPHETH.—A word of doubtful origin, disputed etymology, rare occurrence, and somewhat uncertain meaning. Milton refers to it, and gives his idea of it in the lines—

'The pleasant valley of Hinnom, Tophet thence
And black Gehenna call'd, the type of hell.'
PL i. 404, 405.

It appears only in the OT, and is never reproduced in the NT. It is not found in the apocryphal books, and its earliest occurrences in Christian literature seem to be in Eusebius (*Onom.*) and

Jerome (on Jer 7^{31}). Even in the OT its range is very limited. It is peculiarly a term of Jeremiah's. It is found once in the historical books (2 K 23^{10}), once in the poetical books (Job 17^{6}), once in Isaiah in a modified form (Is 30^{33}), and elsewhere only in Jeremiah ($7^{31.\,32}$ $19^{6.\,12.\,13.\,14}$). Ewald is of opinion that the use of the term *Topheth* in the special sense which it has in 2 Kings was not customary so early as Isaiah's time (*Hist. of Israel*, iv. 209, Longmans' tr.). The Hebrew form in all the occurrences but one is תֹּפֶת. In the Isaianic passage, however, it is תָּפְתֶּה. This latter form is probably constructed by extension from תֹּפֶת, as we have אִשֶּׁה from אֵשׁ, פִּשְׁתָּה from פֵּשֶׁת (so Dillm. *Jes. ad loc.*); although some (*e.g.* Stade, *Gesch.* i. 610) have had recourse, in endeavouring to explain it, to such expedients as changing the vocalization so as to get תָּפְתּוֹ (= 'his Topheth'), or detaching the final ה and connecting it (as the interrogation הֲ) with the word that follows (see the Dictionaries, and Klost., Bredenk., Cheyne [*SBOT*], Marti, *et al.*). The pronunciation of the word is uncertain. In the Massoretic text the vocalization of *bōsheth*, 'shame,' has probably been given it as a thing of evil name, and the LXX makes it *Tapheth.* In the ancient Versions, indeed, it takes different forms, *e.g.* *Thopheth* (Vulg.), Τάφεθ (LXX, Aq., Symm.), Θαφέθ (LXX in some copies, Aq., Theod.), Θόφθ (Aq.). In Is 30^{33} the rendering of the LXX is ἀπαιτηθήσῃ or ἀπατηθήσῃ; in Jer 19^{6} διάπτωσις; in Jer 19^{13} ὁ διαπίπτων (in some copies); and in Jer 19^{14} again διαπτώσεως (in some copies). The AV makes it *Tophet* in all cases except 2 K 23^{10}, where it is *Topheth.* RV has *Topheth* throughout.

The passage in Job may be at once discounted. There the word is an ordinary descriptive noun, formed probably from a root meaning to 'spit,' and so expressing something *abhorred* or *abominated.* Job describes himself as become 'an open abhorring' (RV text), 'one in whose face they spit' (RV margin); wrongly rendered by the AV 'I was as a tabret,' on the supposition that תֹּפֶת 'spitting' is akin to תֹּף 'timbrel.' In the other passages the word is a local name, and means properly '*the* Topheth,' the article being attached to it except where it has the prepositions בְּ, כְּ connected with it. The extended form תָּפְתֶּה, however, is anarthrous, and is probably to be rendered '*a* Topheth is prepared of old,' as in RV.

In its various occurrences the term is associated, directly or indirectly, with the valley of shameful name, known in the OT variously as 'the valley of Hinnom' (only in Jos 15^{8b} 18^{16b}, Neh 11^{30}), 'the valley of the son of Hinnom' (*e.g.* Jos 15^{8a} 18^{16a}, 2 Ch 28^{3} 33^{6}, Jer 7^{32} $19^{2.\,6}$), 'the valley of the children of Hinnom' (2 K 23^{10} *Kĕthībh*), or simply 'the valley' (Jer 2^{23} 31^{40}), in which the idolatrous Jews, especially in the times of Ahab and Manasseh (cf. 2 Ch 28^{3} 33^{6}), practised the cruel rites of the worship of Molech, and offered human sacrifices. It is with reference to the reforms of Josiah and the steps which he took to defile the impious and horrid place, and prevent any man thereafter from making 'his son or his daughter to pass through the fire to Molech,' that mention is made of Topheth in the *narrative* of the OT. The passage in 2 Kings is the passage of primary interest in the study of the term. But the passages in the Prophets have also their contribution to make.

In the paragraph in Isaiah which gives the oracle concerning the destruction of Assyria, Jehovah is represented as Himself coming from afar to execute vengeance on the oppressors of Israel. His people look on and sing their song of gladness, while judgment is done upon their enemies certainly and completely. The declaration of the certainty and completeness of the overthrow of the Assyrian takes the form of an announcement that for the king, or for his god, 'a Topheth,' a place of burning and abhorrence like that in the unclean valley of Hinnom, 'is prepared of old' and 'made ready,' a place of fire which Jehovah Himself hath made 'deep and large,' the pile whereof is 'fire and much wood'; 'the breath of the Lord, like a stream of brimstone, doth kindle it' (RV). It is a destruction utter and abhorrent, prepared and ordained in the Divine counsels. In Jeremiah the associations and applications of the word are different. It is used in connexion with Judah's sin and the doom of Jerusalem. There is a retributive judgment of God, the prophet declares, that is to overtake the stubborn, idolatrous, impenitent people, against which the sanctity of Shiloh and Jerusalem and the Temple will be no protection. The place which witnessed their wickedness shall witness their punishment. *Topheth* and *the valley of Hinnom* shall no more be known as such, but shall be called 'the valley of slaughter.' Where the Jews had built their high places and had made their children pass through the fire to Molech, there they shall see the awful defilement and overwhelming destruction of war (ch. 7^{29-34}). This is repeated in ch. 19^{1-15} in connexion with the figure of the broken vessel. The city is to be polluted by appalling carnage; the hardened people are to be punished with a destruction so terrible that Topheth shall be filled with their dead bodies 'till there be no place.' The new announcement, too, of retribution that is made by Jeremiah in response to Pashhur's vengeance is introduced by the statement (ch. 19^{14}) that he 'came from Topheth whither the Lord sent him to prophesy.'

These being the occurrences of the word, what can be gathered with respect to the position and the exact sense of *Topheth?* Some have taken *Topheth* to be simply a synonym for *Gehinnom.* But it is clear that the two terms do not designate precisely one and the same thing. Several of the passages in view speak of Topheth as *in* the valley of Hinnom—a locality, or, it might be, an object in it. This does not settle, however, the question of the situation of Topheth. It is still uncertain where the Hinnom Valley lay, and with what it is to be identified in the topography of the Holy City. Authorities are still divided on the question whether it is the valley to the east of Jerusalem, the Kidron Valley (Sir C. Warren); the central valley, the Tyropœon (Sayce, Robertson Smith, Schwarz, etc.); or the *Wady er-Rabābi* or *Rubâbeh*, the deep ravine to the west and south, between the slopes of the 'Hill of Evil Counsel' and the steep sides of Zion (see article HINNOM, VALLEY OF). This leaves the precise position of Topheth in suspense. It is true that in the narrative of Josiah's reforms in 2 K 23 much is said of Kidron, but it does not follow that Topheth was on the east of Jerusalem. Far less can that position be argued out from the statement in Jer 19^{2} that the valley of Hinnom is 'by the entry of the east gate,' as it is erroneously rendered by the AV. For the gate *Harsith* or *Harsuth* mentioned there is not the 'Sun-gate' or the 'east gate,' but probably the 'Sherd-gate,' 'the gate of potsherds' (RV), so called perhaps from the fragments of potter's work scattered about there. Neither does the allusion to 'the graves of the children of the people' (2 K 23^{6}) carry us far, although Sir Charles Warren thinks we may infer from it that Topheth was near the common burial-place. Nor, again, is much to be made of tradition. Jerome describes the place as a green and fertile spot in the Hinnom Valley 'watered by the springs of Siloam'—*Illum locum significat, qui Siloœ fontibus irrigatur et est amœnus atque nemorosus hodieque hortorum præbet* *delicias* (on Jer 7[31]). This might point to its being at the mouth of the Tyropœon or on the south of the Kidron. Tradition, again, places the site of Aceldama among the rock-hewn tombs of the 'Hill of Evil Counsel,' and Eusebius speaks of 'the place called *Thapheth*' as if it had been regarded on to his own day as situate 'in the suburbs of Ælia,' near 'the Fuller's Pool and the Potter's Field or the place Aceldama' (*Onom. sub voc.* Θάφεθ). But there must have been some inconstancy in the traditional account, or either Jerome or Eusebius must have made a mistake. For Jerome speaks of Aceldama as on the south (*ad australem plagam montis Sion*), while Eusebius says it was ἐν βορείοις. If, however, the 'Potter's Field' is 'the Field of Blood,' and the gate *Harsith* (Jer 7[2]) is the 'Sherd-gate,' Topheth might be located somewhere on the south and west of Jerusalem and on the eastern side of the Hinnom Valley. Sir Charles Warren (cf. Smith's *DB*, *sub voc.* 'Hinnom') points out that where the *Wady er-Rubâbeh* joins the Kidron there is 'an open plot of ground' which might be the spot that Jerome identified with Topheth. These references, however, are meagre, and leave us uncertain as to the strength or the antiquity of the tradition behind them.

On the origin and etymology of the word much has been written that is doubtful, not to say purely fanciful. Some have attempted to connect it with the Greek θάπτειν in the phrase πυρὶ θάπτειν (Ges.), or with the Greek τύφειν and the Hebrew אָפָה=*cook*, תֻּפִּינִים=*cooked pieces* for offerings (cf. Lv 6[14]). Jerome, deriving it probably from פָּתָה, interpreted it as=*latitudo*. Some of the great Rabbis (*e.g.* Rashi and D. Kimchi) understood it to come from תָּפַף=*strike, beat*, with reference to the supposed beating of drums and other instruments to drown the cries of the sacrificial victims in the cruel rites of the Molech worship — a practice the alleged existence of which is not borne out by any sufficient evidence in ancient writers. Others have had recourse to peculiar foreign forms, to Assyro-Persian roots, to the Egyptian Θωύθ or Θώθ, etc. (Andr. Müller). Some, again, have taken the original idea to have been that of *beauty*, with reference to Jerome's description of the place. With this in view, Rosenmüller, *e.g.*, was bold enough to connect it with יָפָה=*to be fair*, as if the primitive form had been תּוֹפֶת. With a somewhat similar idea, others, pointing to the mention in succession of *tabrets* (תֻּפִּים) and *Topheth* in Is 30[32. 33], look again to the verb תָּפַף=*strike* (a timbrel or the like), and attach to the word *Topheth* the sense of 'Music-grove,' as if it had been originally part of the royal garden, defiled at a later period by idol-worship and abominable, idolatrous sacrifice (H. Bonar in Smith's *DB*).

Dismissing these fanciful conjectures, we have to choose between two explanations which alone have much reason in them. One of these seeks the origin of the term in a root תוף, Arabic تفف = to *spit out*, and so to *regard with contempt* or *loathing*. In this case the idea will be that of 'place of abhorrence,' 'place of abomination' (Böttcher, Riehm, Pressel, etc.). This is favoured by the fact that there does exist a descriptive noun תֹּפֶת, which appears to have this meaning, in Job 17[6]. The other explanation looks to a root expressing the notion of *burning*, which is supposed by some to show itself in a Persian *toften* (Ges.), in the Greek τέφρα, the Latin *tepidus* (Streane). In this case the idea would be that of 'place of burning.' This, again, is understood by some to refer to the disposal of the dead, by others to the offering of sacrifices, in particular to the burning of human sacrifices, as in the worship of Molech. The difficulty in the way of the first of these suppositions is that, except in special cases (*e.g.* that of Saul, 1 S 31[12]; that of the victims of plague, Am 6[16] etc.), the Hebrew dead were not burned, but buried. With regard to the second supposition, the question is whether, as it is ordinarily put, it will suit the various passages. In the case of Is 30[33], *e.g.*, Dillmann is of opinion that it is a vast human holocaust that is in view; while Robertson Smith thinks that the imagery of the passage would be rendered discordant if the notion of the sacrifices in the valley of Hinnom were introduced. The latter scholar, therefore, gives the question another application. He seeks an Aramaic origin for the word, and he connects its use with such sacrifices as the Harranian. He points to the fact that at the time when the term 'first appears in Hebrew, the chief foreign influence in Judæan religion was that of Damascus' (2 K 16). This, he thinks, makes the theory of an Aramaic origin not improbable. He notices, further, that the Arabic word *othfīyā* and the Syriac *tfāyā* are names for 'the stones on which a pot is set, and then for any stand or tripod set upon a fire.' He supposes that a variant form *tfath* might have existed which would be quite according to analogy, and takes תפת to be an Aramaic term for 'a fireplace, or for the framework set on the fire to support the victim.' He points out further, that among the Semites human sacrifices were disposed of ordinarily by burning, and that the victims generally were not burned on the altar or within the sanctuary, but outside the city. His view, therefore, is that the passage in Isaiah refers to 'a rite, well known to Semitic religion, which was practised at Tarsus down to the time of Dio Chrysostom, and the memory of which survives in the Greek legend of Heracles-Melkarth, in the story of Sardanapalus, and in the myth of queen Dido'—the annual rite commemorating the death of the local god in fire. Thus '*the Topheth*' is taken to be the 'fireplace,' or pyre, the deep pit dug in the valley of Hinnom for the purpose of the most distinctive act in the performance of these horrid rites — the burning of the victims. It may be added that Ewald, who places the deep valley of Ben-Hinnom on the south of the 'long, broad ridge' to which 'the ancient name of Zion originally belonged,' takes Topheth to be a glowing furnace in the valley, and regards everything as pointing to the conclusion that it was Manasseh who first built it.

LITERATURE.—Commentaries on the OT passages (Dillmann-Kittel, Marti, and Skinner on *Isaiah*, Duhm on *Jeremiah*), the Lexicons, the Bible Dictionaries (Herzog's *PRE*, Riehm's *HWB*, Smith's *DB*, *sub voc.* 'Hinnom,' 'Gehinnom,' 'Gehenna'); the books on the geography of the Holy Land (Robinson, etc.); Ewald's *Hist. of Isr.* iii. pp. 123, 124, iv. p. 208, etc., Longmans' tr.; Böttcher's *De Inferis*, p. 85; W. R. Smith's *Rel. of the Sem.*[2] pp. 372-378.

S. D. F. SALMOND.

TORAH.—See LAW.

TORCH.—See LAMP and LANTERN.

TORMAH (תָּרְמָה 'fraud, deceit'; B ἐν κρυφῇ, A μετὰ δώρων).—In the margin of Jg 9[31] 'in Tormah' is given as an alternative rendering of the Hebrew word translated 'craftily' (AV 'privily'). Some commentators have suggested that Tormah is a corruption of Arumah (v.[41]); but there is no evidence one way or the other. The text certainly appears to be corrupt. See Moore, *ad loc.*

C. W. WILSON.

TORTOISE.—The AV tr. of צָב *ẓāb* (Lv 11[29]); RV has 'great lizard'; prob. the *land monitor* is meant. See CHAMELEON, LIZARD.

TOU (תֹּעִי).—King of HAMATH on the Orontes, who sent an embassy to congratulate David on his defeat of HADADEZER, with whom Tou himself had waged frequent wars, 1 Ch $18^{9f.}$ In the parallel passage, 2 S $8^{9f.}$, the name appears as **Toi**, which, however, is less probable philologically (see Driver, *Text of Sam.* 217). In 2 Sam. the LXX has, B Θουού, A and Luc. Θαεί; in 1 Chron., B Θῶα, A Θοού, Luc. Θολά. J. A. SELBIE.

TOWER.—(A) In OT for **1.** מִגְדָּל *migdāl*. The *migdāl* served sometimes to defend a city wall, and in particular an angle in the wall or a gate (2 Ch $14^{7\,(6)}$ 26^{9}). Engines for casting arrows and stones were sometimes placed in the towers (26^{15}). A single tower sometimes served as a citadel (Gn 11^{4}, Jg 9^{51}). In the country, towers were erected for the protection of the flocks and herds, and to safeguard the roads (2 K 17^{9}, 2 Ch 26^{10} 27^{4}). The pilgrim route from Damascus to Mecca is dotted with towers which protect the wayside wells (Doughty, *Arabia Deserta*, i. 9, 13). A vineyard was sometimes watched from a *migdāl* (Is 5^{2}, cf. Mt 21^{33}), sometimes from a mere ‘booth’ (סֻכָּה *ṣukkah*). The towers of Jerusalem are mentioned generally in Ps 48^{12}, Is 33^{18}; see also Neh 3^{1} (towers of HAMMEAH and of HANANEL; cf. also Ryle's note *in loco*); v.^{11} (tower of the furnaces; cf. Ryle, and see JERUSALEM, vol. ii. p. 593, for this tower and the next mentioned); vv.$^{25\text{-}27}$ (the [great] tower that lieth out); Ca 4^{4} (tower of David); $7^{4\,(5)}$ (the tower of Lebanon which looketh toward Damascus). ‘The tower of Babel’ (it should be noted here) is not a biblical phrase; the presumption of men was shown not in the height of the tower, which is hyperbolically expressed, but in the whole scheme embodied in the building of ‘the city and the tower.’ That ‘the name of the LORD is a strong tower’ (Pr 18^{10}) may mean either of two things: (1) that God Himself is a protection, or (2) that the mention of His name in an adjuration often stops an intended act of violence. The second sense may be illustrated from the tradition that the prophet Mohammed once spared a female captive who exclaimed, ‘I take refuge in God (*a'ūdhu billāhi*) from thee.’ Mic 4^{8}, in which Zion is addressed, ‘O tower of the flock,’ is taken by Nowack (*in loco*) and others as a later addition. Jerusalem is here represented, it is said, as already desolate, as a lonely tower from which grazing flocks are watched. A more natural interpretation of the phrase is suggested by Is 14^{32}. Zion is the tower in which the flock of God takes refuge from the enemy.

2. ‘Tower’ stands also for *migdōl* (Ezk 29^{10} 30^{6}) in EV, where RVm more correctly gives a proper name ‘from Migdol’ (LXX ἀπὸ Μαγδώλου). **3.** בַּחַן *baḥan*, בָּחוֹן *bāḥōn* (pl. בַּחוּנִים *baḥūnīm*), a tower used by besiegers for observing and (sometimes) for attacking a city; Is 23^{13}. The prophet Jeremiah is compared (Jer 6^{27}) with one of these towers, because he was the herald and (in a sense) the instrument of God's judgments on Jerusalem; cf. Ezk 4^{3}, where the prophet is directed to besiege the city in dumb show. The rendering of Jer 6^{27} in RVm ‘trier’ is supported by LXX and Pesh. (Lee), and yields a play on the following verb ‘try,’ but the AV is probably right. **4.** ‘High tower’ is the rendering of מִשְׂגָּב *misgāb*, in Ps $18^{2\,(3)}$ EV, and $59^{9\,(10).\,17\,(18)}$ RV. God is called the Psalmist's *misgāb*. **5.** עֹפֶל *'ōphel* (2 K 5^{24} AV). RV gives ‘hill’ (correctly). **6.** מָצוֹר *māẓōr* (Hab 2^{1}), a word meaning ‘entrenchment,’ ‘rampart.’ **7.** פִּנָּה *pinnah* (Zeph 3^{6}), ‘towers’ AV, ‘battlements’ RV, ‘corner towers’ RVm (rightly, towers being often set at an angle of a city wall). **8.** The word צְרִיחַ *ẓĕrîaḥ* (Jg 9^{46} ‘hold’ AV, 1 S 13^{6} ‘high places’ AV) has been taken by Jewish expositors to mean a ‘tower,’ but Driver (on 1 S 13^{6}) shows good reason for rendering ‘vault’ or ‘underground chamber’; the Lyons Heptateuch (ed. U. Robert) has *promuntuarium* (for *promptuarium*), ‘store-room, magazine,’ in Jg 9^{46}.

(B) In the Apocrypha ‘the tower’ is the regular rendering in AV in 1 and 2 Maccabees of ἡ ἄκρα, ‘the citadel’ (RV), *i.e.* the fortress commanding the temple (see JERUSALEM, vol. ii. p. 594), which is also called ἡ ἀκρόπολις, ‘the tower’ (2 Mac 4^{12}), ‘the castle’ (v.$^{27\,(28)}$), so AV; ‘the citadel’ (RV). ‘Tower’ is also the translation of πύργος, a wooden building carried by an elephant, and holding thirty-two men (1 Mac 6^{37}), also a place of execution in which criminals were smothered in ashes (2 Mac 13^{5}). In Sir $37^{14\,(18)}$ σκοπή is ‘high tower’ AV, ‘watch-tower’ RV, but the Hebrew varies between שֵׁן *shēn*, ‘a steep rock’ (cf. 1 S 14^{4}), and מִצְפָּה *miẓpeh*, ‘watch-tower’ with עֵץ *'ēẓ*, ‘tree,’ in margin. Sir 26^{22} (‘a married [woman] is a tower against death to [her] husband,’ AV) occurs in a passage of nine verses which is omitted from RV as an interpolation. It is absent from the uncials (אAB), but it is found in Clem. Alex. $^{\text{p. }229}$, in cursive 248 (HP), and in the Syriac and Arabic, and so most probably existed at an early date in Hebrew. The correct translation of v.^{22b} is ‘A married woman is a tower of death to those who have company (τοῖς χρωμένοις) with her.’ The ‘tower of death’ is, no doubt, the tower of punishment described in 2 Mac 13^{5} (see above).

(C) In NT ‘tower’ represents πύργος in Mt 21^{33} (=Mk 12^{1}, see Swete's note) a tower in a vineyard; Lk 13^{4} the tower in Siloam; cf. 14^{28}. Silwān, the modern Siloam, is built on a steep escarpment of rock, on which a building with good foundations would stand for ever; ill-laid foundations would drop their superstructure to the very bottom of the valley.

W. EMERY BARNES.

TOWN CLERK (γραμματεύς).—An official whose powers and functions varied at different periods and in different countries of the Greek world. Here we speak only of the *grammateus* in the Græco-Asiatic cities under the early Roman empire. The titles ‘clerk of the city’ (γρ. τῆς πόλεως), ‘clerk of the senate’ (γρ. τῆς βουλῆς), ‘clerk of the people’ (γρ. τοῦ δήμου), ‘clerk of senate and people, or of senate and *ekklesia*’ (γρ. βουλῆς καὶ ἐκκλησίας), and even ‘clerk of senate and people and *gerousia*,’ are all found in inscriptions of those cities. Sometimes there seems to be a difference between some of these titles; but in other cases it seems probable or certain that the ‘clerk of the city,’ the ‘clerk of the senate and the people,’ and the ‘clerk of the people,’ were various designations of one very important official.

The *grammateus* was responsible for the form of the decrees, which were submitted to the popular assembly, *i.e.* the *Demos* assembled in *ekklesia*. These decrees under the empire were first approved by the senate, and afterwards sent to be approved by the people in the *ekklesia*. The powers of the people were limited to accepting or rejecting the decrees sent down from the senate. They could not amend, and gradually their approval became a mere form, which followed as a matter of course, inasmuch as the Roman imperial system discouraged and limited the powers of the popular assembly. After the decrees were passed, the *grammateus* sealed them with the public seal (δημοσία σφραγίς) in the presence of witnesses (δογματογράφοι). In many places he even proposed the decrees in the popular assembly, and acted as chairman.

In Ephesus (Ac 19^{35}), at an excited and uproarious gathering of the people in the theatre (a common place for regularly summoned meetings of the popular assembly), the clerk speaks as one both possessing authority and under personal responsibility for the popular action. The Roman administration regarded irregular and unruly popular assemblies as a serious and even capital offence, because they tended to strengthen among the people the consciousness of their power and the desire to exercise it; and the clerk was evidently afraid lest he should be personally held to account for the irregular meeting.

This picture, as indicated in Acts, is entirely in keeping with the position of the *grammateus* as indicated in the inscriptions. In Ephesus that official is occasionally styled '*grammateus* of the Ephesians'; and often an event is dated by the clerk of the year. Money bequeathed to the people was under his charge. He often was responsible for the execution of works ordered by the people. The inscriptions of neighbouring cities whose constitution is most likely to have closely resembled the Ephesian, enable us to add many other details. The position of clerk is spoken of as the climax of a career of public service to the State of Tralles (*μετὰ πολλὰς ἀρχὰς καὶ λειτουργίας γραμματεύσαντα τῆς πόλεως ἐπιφανῶς*, *CIG* 2931). He along with the *strategoi* (to whom the real conduct of business came to be trusted more and more in the Greek cities of Asia) drafted the decrees; and this implies that he had a seat as assessor on the board of *strategoi*, and perhaps even presided there (*γνώμη στρατηγῶν καὶ τοῦ γρ. τοῦ δήμου*).

The clerk contrasts the confused assembly in the theatre with the *ἔννομος ἐκκλησία*, *i.e.* the people legally and properly assembled in the exercise of its powers. Such meetings were either ordinary on fixed days (*νόμιμοι* in an Ephesian inscription), or extraordinary, specially summoned at an unusual time (called *σύγκλητοι* at Athens); but the latter class of meetings required special authorization from the Roman governor of the province, and certainly were rarely permitted by the jealousy of Roman policy. The term *ἔννομος ἐκκλησία* has not hitherto been found at Ephesus, but occurs at Termessos (see Lanckoronski, *Städte Pamphyl.* ii. p. 33).

LITERATURE.—Hicks, *Greek Inscr. of the Brit. Museum*, iii. p. 82; Liebenam, *Städteverwaltung im röm. Kaiserreiche*, p. 288 f.; Lévy in *Revue des Études Grecques*, 1895, p. 216 ff.; Ramsay in *Expositor*, Feb. 1896, p. 137 ff., and in *Cities and Bish. of Phrygia*, i. 66; Svoboda, *Griech. Volksbeschlüsse*, p. 206 f.

W. M. RAMSAY.

TRACHONITIS.—In the Bible only in Lk 3^1, in defining Philip's tetrarchy: *τῆς Ἰτουραίας καὶ Τραχωνίτιδος χώρας*. Trachonitis was properly the country of, or round, the Trachon or Trachons (*ὁ Τράχων, οἱ Τράχωνες*), the name given by the Greeks (*τράχων*=' rough, rocky ground') to those areas of split and shattered deposits of lava which form so characteristic a feature of the volcanic country S.E. of Damascus, and are known to the Arabs of to-day by the name of *wa'ar* (=' stony waste'). *Wa'ar* is the equivalent of the Hebrew יער. The latter is wrongly rendered 'forest' in AV and RV; at the most it can mean only 'wood,' and generally seems to be no more than 'jungle.' Wetzstein (*Reisebericht über Hauran u. die Trachonen*, 15, n. 3) gives good grounds for the opinion that יער originally meant the same as the Arab. *wa'ar* (cf. especially Is $21^{13ff.}$), and that its association with wood, for which he supplies a modern Arabic analogy, is only secondary. Strabo (xvi. 2. 20) speaks of 'the two so-called Trachones behind Damascus.' These are, without doubt, the two largest lava areas in the region, the Ṣafā and the Lejā. Their edges are well defined, and visible from far on the surrounding plain—split banks of black rock with a sheen on it: about 30 ft. high. Within such borders the surfaces are amongst the most waste and broken upon earth. The lava in cooling has assumed the wildest shapes. Its surface has been likened to 'a petrified ocean' (cf. Merrill, *E. of Jordan*, p. 11) and to an 'ebony glacier with irregular crevasses' (*HGHL*^{4} 616). Wetzstein gives a vivid description (with sketches) of the tossed and broken formation, with the volcanic vents from which it burst. 'The Ṣafā is still, as on the day of its origin, a gush of lava, black and of a dull sheen, full of countless streams, bridged over by thin vaults, of petrified black, often also bright red, waves, which roll down the slopes from the craters over the high plateau' (*op. cit.* p. 7). The Ṣafā, 'the empty or naked,' has no water or vegetation: 'no human being can exist upon it': it lies, too, far east in the desert. The Lejā, 'the refuge,' on the other hand, lies on the fertile plain of Ḥauran, and appears always to have been inhabited. It is 370 square miles in extent, almost bridging the plain between Jebel Druz (from now extinct volcanoes at the N. end of which, the Gharārat el-Ḳibliyeh and Tell Shiḥan, it issued) and the ranges to the E. of Hermon and S. of Damascus. It contains few springs, but with winter rains these form occasional small lakes. Soil has gathered in many of the hollows, and there are cultivated fields. Flocks can be pastured: there are enclosures of dry stone walls, which prove the ancient herding of cattle; and remains of vineyards, and cisterns. The ruins of villages, and well-preserved ancient towns,—Musmieh, Nejrân, Dama, Kubab, Jurēn, and others,—the remains of defences against the easier entrances, and numerous traces of cuttings for roads, point to a considerable population in ancient times. The region is still partly inhabited and cultivated. While, therefore, Strabo, as a geographer, spoke of two Trachons, the Ṣafā and the Lejā, the former, uninhabited and lying far from the ways of men, was ignored by history, and the latter was to history *the* Trachon *κατ' ἐξοχήν*. So an inscription in Musmieh (le Bas-Waddington, No. 2524), and another in Bereke (*id.* 2396), and so Josephus (*Ant.* XV. x. 1).

How far back the human history of the Lejā extends is quite unknown to us. On the one hand, it is hard to think that so safe and habitable a 'refuge,' whether from Arab raids or the armies of the ancient powers, was unused by man, so long as the surrounding country was inhabited; and equally hard to suppose that a phenomenon of nature, so singular and conspicuous, was not frequently upon the lips of the surrounding peoples. On the other hand, in the OT there is no certain reference to the Lejā. ARGOB in Bashan was identified with it by the Targums, and the identification has been repeated in our days (by Porter, Henderson, and the maps of the Pal. Expl. Fund), on the grounds that the Lejā can hardly have been omitted from the Biblical Geography, and that the phrase by which Argob is described, חֶבֶל אַרְגֹּב, literally the 'rope' or 'limit' of Argob, exactly suits the well-defined edge of the Lejā, called by the Arabs of to-day the Loḥf. But חֶבֶל as a geographical term is properly 'district,' and applicable to any well-defined region; and the only natural derivation of ארגב is from רגב, 'a clod of earth,' which no one could take as characteristic of the Lejā; while, also, Israel's conquests very probably did not extend so far to the N.E. Argob is now generally identified with the district of Suwet, E. of Gilead and W. of the Zumle range: to the S. of Bashan, but geologically connected with the latter. Again, in the חררים of Jer 17^6, 'waste tracts,' it is possible to see a reference to the two Trachons, but more probably the word has the much wider reference to all those stony areas of the Arabian desert to which its Arabic equivalent *ḥarra* applies (Doughty, *Arabia Deserta*, *passim* and Index). Porter (*Giant Cities of Bashan*, 1882, p. 12 ff., etc.) and others have taken the ancient buildings in the towns of the Lejā and other parts of Ḥauran and Bashan to be the actual remains of the giant races who, according to the OT, preceded the Amorites in the occupation of these lands, and of the Amorites themselves, *i.e.* the cities of Og king of Bashan. For the reasons stated above, we may well believe that the sites of these cities were occupied at a very early historical period; and the visitor to those in Bashan itself (as the present writer recently verified) may still note rude fortifications (under or near the obviously later city walls) which resemble the Amorite remains recognized in other parts of Palestine. But, on the other hand, the peculiar architecture in the Lejā and surrounding country (whether above or under ground), in which Porter claimed to have discovered the 'Giant Cities of Bashan,' bears no proofs of an origin earlier than the eve of the Christian era; that is, after the Greeks settled east of the Jordan.

Practically, therefore, the history of the Lejā opens with the appearance of its Greek name, *Trachon*. The Greeks, who began to settle on the E. of Jordan soon after Alexander the Great's Syrian campaign, seem to have made no impression on the Lejā, which was occupied by Nabatæan Arabs down to the arrival of Pompey's legions at Damascus, in B.C. 65 and 64. The Romans, coming to the aid of the Greek cities, crushed all the Semitic powers in Ḥauran, whether Jewish or Arab, but do not appear to have occupied Ḥauran itself. In B.C. 25 one Zenodorus is said to have ruled over part of the Ituræan territory on the slopes of Hermon, Auranitis (=Ḥauran, Jos. *Ant.* XV. x. 2), and Trachonitis, *i.e.* the Trachon along with some territory round it (Jos. *Ant.* XV. x. 1 Τράχων ‖ *BJ* XVII. ii. 1, etc. Τραχωνῖτις). Josephus and Ptolemy enable us to define approximately the then limits of this territory. According to *Ant.* XV. x. 3 it touched in the N.W. the districts of Ulatha and Paneas, about the sources of Jordan at the S. foot of Hermon; according to *Ant.* XVII. ii. 1, 2 it marched with Batanæa; and according to Ptolemy, v. 15. 4, it extended towards Mons Alsadamus, the present Jebel Druz. Ptolemy speaks of the Τραχωνῖται Ἄραβες 'under' that mountain. About B.C. 25 these Arabs raided the Greeks of Ḥauran, and the Greeks complained to Varro, governor of Syria. Varro appears to have himself inflicted some chastisement upon them (Jos. *BJ* I. xx. 4). But subsequently orders came from Augustus that Varro should replace Zenodorus by Herod, who had already (from his towns Gadara and Hippos eastward: *Ant.* XV. vii. 3; *BJ* I. xx. 3) some experience of fighting with the Trachonite Arabs (*Ant.* XV. v. 1; *BJ* I. xix. 2). Herod subdued them for a time (*Ant.* XV. x. 1; *BJ* I. xx. 4); but they, apparently unable to live upon the meagre crops of the Lejā itself, again, during Herod's absence in Rome, raided the fertile lands to the W. of them (*Ant.* XVI. ix. 1). Herod's soldiers defeated them and drove them into Nabatæa (to the S. of Ḥauran), with the exception of a few, who remained in the Lejā, and the most of whom Herod himself, when he returned, slew. The remainder, in alliance with the Nabatæans, kept up a series of attacks on Herod's borders. He put a force of 3000 Idumæans into Trachonitis, and placed the command in the hands of Zamaris, a Jew from Babylonia, for whom he built forts in Batanæa and at Bathyra, perhaps the present Busr (el-Hariri), on the S. border of the Lejā (*Ant.* XVII. ii. 1–3). Zamaris—it is not mentioned that he conquered the Lejā itself—quieted the surrounding country, and Herod built a temple near Kanatha, in the ruins of which an inscription still records the erection of a statue to him (le Bas-Waddington, 2364). By Herod's testament, his son Philip in B.C. 4 received 'Trachonitis,' along with the rest of the country between the Yarmuk and Hermon, as his tetrarchy (*Ant.* XVII. viii. 1, xi. 4, XVIII. iv. 6; *BJ* II. vi. 3). Strabo (xvi. 2. 20) describes, about A.D. 25, the general security of the country under Philip. Philo (*Legat. ad Gaium*, 41) gives the name Trachonitis to the whole of Philip's tetrarchy. When the latter died, in 34, Trachonitis and the rest of his tetrarchy was comprised in the province of Syria until 37, when Caligula gave it to Agrippa, who held the country as far as the eastern slopes of the Jebel Druz (cf. his inscription, still extant at el-Mushennef [Wadd. 2211]). It was from Agrippa's reign onward that the architecture of the district increased, according to the numerous inscriptions; though the Roman road through the Lejā itself may be as early as the time of Varro (see above). From A.D. 44, when Agrippa died, the whole of Palestine was directly governed by Roman officials till 50, when Chalcis, and 53, when the tetrarchies of Philip and Lysanias, were given to Agrippa II., whose inscriptions are numerous throughout Trachonitis. In A.D. 100, on Agrippa's death, the direct Roman administration seems to have been resumed; and in 106, by the creation of the further province of Arabia, Trachonitis became part of the inner province of Syria. The bulk of the remains of its ancient civilization date from the subsequent period. The road just mentioned and others through the province may be wholly or mainly the work of the Antonines. In 295 Trachonitis was joined to the province of Arabia.

The question, whether in the time at which Lk 3[1] was written the Ituræan district and Trachonitis were two distinct portions of Philip's tetrarchy, or two equivalent or overlapping names for it, has already been fully discussed under ITURÆA.

G. A. SMITH.

TRADE and COMMERCE.—i. TERMS.—'Trade' in AV of Gn $46^{32.\ 34}$ means 'occupation,' and has no equivalent in the Hebrew. In Ezk 27^{12-17} it represents the Heb. נתן 'gave'; in Gn $34^{10.\ 21}$ it is the rendering of סחר *ṣḥr*. The participle of this last verb is used for 'merchant'; and cognate nouns, סָחָר, סַחַר, סְחֹרָה, מִסְחָר, for 'place of traffic,' 'merchandise,' 'profit,' traffic,' and, by the use of abstract for concrete, 'traffickers' (Gr. *ἐμπορεύεσθαι*, *ἔμπορος*, *ἐμπορία*; Lat. *negotiari*, *negotiator*, *institor*, *negotiatio*, *mercatus*). The root *ṣḥr*= 'travel,' and describes the merchant as a travelling trader. Similarly from רכל *rkl*, originally 'to travel,' connected with *regel*, 'foot,' we have *rōkhēl*, 'merchant' (*ἔμπορος*, *institor*, *negotiator*, *venditor*, etc.), רְכֻלָּה 'traffic' (*ἐμπορία*, *negotiatio*), מַרְכֹּלֶת 'place of traffic' (RV 'merchandise,' *ἐμπορία*, *negotiatio*). The Heb. words of this group chiefly occur in Neh 3. 13, Ezk 26–28.

Similarly in 1 K 10^{15}, 2 Ch 9^{14} MT couples *'anshê hat-tārîm* (EV 'chapmen') with *ṣōḥĕrîm*, 'merchants'; and *tārîm*, which should mean 'spies,' is explained as 'those who go to and fro,' 'traffickers'; but the text is corrupt. Kittel ('Chronicles' in *SBOT*) proposes to read *'ăsher mē'ārîm*, 'that which came from the cities.'

The proper names *Kĕna'an* (Is 23^{8}), *Kĕna'ănî* (Pr 31^{24} etc.), are also used to mean 'merchant.' In Neh 10^{31} מַקָּחוֹת, from לקח 'to take,' is used in the sense of 'goods for sale' (EV 'ware'); and in Ezk 27 עִזְבוֹנַיִךְ is used for 'thy wares,' so RV (not, as AV, 'thy fairs').

The roots of the following seem to have had originally the meaning 'exchange' or 'barter':

ערב ‘traffic,’ and its derivative מַעֲרָב ‘merchandise’ or ‘traffic,’ only in Ezk 27, cf. DEBT, PLEDGE; with the allied group מור ‘to exchange *or* barter,’ and תְּמוּרָה ‘exchange,’ ‘barter,’ ‘price’; מֹהַר ‘price paid for a wife,’ and its denom. מהר ‘to buy a wife’; מכר ‘to sell,’ and מֶכֶר ‘wares *or* price’; מְחִיר ‘price.’

The common word for ‘buy,’ קנה, is a general term meaning ‘possess’ and ‘acquire’; so מִקְנֶה, מִקְנָה, ‘possession,’ sometimes mean ‘purchase’ or ‘price.’ Another term for ‘buy’ is כרה; and לקח ‘take’ is sometimes tr. ‘buy.’ שבר usually means ‘to buy corn.’

Other words for ‘price’ are יְקָר, lit. ‘value,’ and עֵרֶךְ ‘an equivalent.’ For ‘caravan’ we have אֹרְחָה (Gn 37[25], Is 21[13], Job 6[18. 19]), הֲלִיכָה (so only Job 6[19] poet.), and מִקְוֵה (1 K 10[28]=2 Ch 1[16]), and שָׁרָה (Ezk 27[25]), lit. ‘company’ *or* ‘band.’ A special class of merchant ships were styled ‘ships of Tarshish.’ See TARSHISH. The tr. ‘make merchandise’ in Dt 21[14] 24[7] is a mistake. The meaning of the word (התעמר, only in these two passages) is probably ‘play the master’ (LXX in 24[7] *καταδυναστεύσας*); see Driver's note.

In the NT we have for ‘merchandise,’ *ἐμπορία*; ‘to trade,’ *ἐργάζομαι, ἐμπορεύομαι*; ‘to buy,’ *ἀγοράζω, ὠνέομαι*; ‘to sell,’ *ἀποδίδωμι, πιπράσκω, πωλέω*; ‘merchant,’ *ἔμπορος*; ‘banker’ *or* ‘money-changer,’ *τραπεζίτης*; ‘seller of purple,’ *πορφυρόπωλις*; ‘bank’ *or* ‘counter,’ *τράπεζα* (lit. ‘table’); ‘mart,’ *ἐμπόριον*; ‘price,’ *τιμή*; ‘valuable,’ ‘expensive,’ *πολυτελής, πολύτιμος*; ‘lading of a ship,’ *γόμος*.

ii. DATA.—1. *General.*—The natural features of a country indicate the character and extent of its commerce. Given harbours or practicable land routes, etc., it will export what it produces easily, and import what it produces with difficulty or cannot produce at all. See articles on the various countries of the Bible. Again, references to the possession of articles of foreign production imply commerce with the place of production. See articles on GOLD, SILVER, DRESS, etc.

2. *Trade in OT.*—There are numerous scattered references, but the leading cases are the accounts of Solomon's commerce (1 K 5. 9[26-28] 10[11-29]), and of the unsuccessful attempt of Jehoshaphat to imitate him (1 K 22[48]); and of the Sabbath trading at Jerusalem (Neh 13[15-22]). The commerce of Tyre is described in Is 23, Ezk 26. 27. A caravan trade in spices, etc., with Egypt is mentioned in Gn 37[25] (J), and implied in 43[11] (J).

3. *Trade in the Apocrypha, NT, Josephus, Talmud*, etc.—In 1 Mac 14[5] Simon makes Joppa a port, and in To 4[1] 9[5] we read of a deposit of money repaid on the production of a receipt. In the NT commerce furnishes our Lord with many illustrations; St. Paul sails in trading vessels, and meets with Lydia, ‘the dealer in purple’ (Ac 16[14]), and the manufacturers of silver shrines for Diana (Ac 19[24]). The commerce of Rome, under the name of Babylon, is described in a passage, Rev 18, adapted from Ezk 27. There are scattered references in Josephus. The Talmud often refers to the articles and conditions of commerce in its discussions on tithes, and on the ritual questions, uncleanness, etc., arising out of relations between Jews and Gentiles. These notices can be applied only with caution to periods earlier than the compilation of the Talmuds (A.D. 400-600).

4. *Other Authorities.*—The immense collection of Egyptian, Assyrian, and Babylonian documents and inscriptions afford much information as to commerce in general, and some, direct and indirect, as to that of Palestine. The classical authorities, especially Strabo and Pliny, furnish us with information as to commerce in general in the Greek and Roman periods.

iii. COMMERCE OF THE ANCIENT EAST.—The Tel el-Amarna tablets show that in B.C. 1400 there was an extensive commerce between Babylonia and other States of the farther East, and Syria and Egypt. The letters passing between the Eastern kings and the kings of Egypt are full of references to the journeys, to and fro, of caravans, and to the interchange of numerous commodities. Three lists of articles sent by a king of Egypt to the king of Babylon, and of the wedding presents or dowry of an Eastern princess who married a king of Egypt, occupy 14 large octavo pages in small type (Winckler, p. 399 ff.). Evidence is furnished by inscriptions, etc., of such commerce from an even earlier period, onwards throughout the Bible history. The series of commercial documents, contract tablets, etc., in Babylonia from about B.C. 2400, and in Assyria from about B.C. 900, bear direct evidence to the existence of considerable internal trade, and imply foreign commerce. At a later time such documents enable us to trace the history of the great Babylonian banking firm of Egibi from the reign of Nebuchadnezzar to that of Darius. In the *Times* of 10th Oct. 1899 Conder quoted a letter, which he dated about B.C. 2000, from an Assyrian merchant to a correspondent in Cappadocia, asking, ‘Can I settle and trade in Cappadocia on payment of a tax, and by living as a son of the land?’ Assyria and Babylonia received merchandise from the farther East, and transmitted it westward. The Phœnicians from Tyre and Sidon and other cities were the intermediaries of a great sea traffic between Western Asia and the shores of the Mediterranean and the Eastern Atlantic, and also, for the most part, of the sea traffic between Egypt, Syria, and other Mediterranean countries (Erman, *Life in Ancient Egypt*, Eng. tr. 15). Later on, this traffic was more and more shared by the Greeks. Egypt received the produce—ivory, ebony, skins, slaves, etc.—of Nubia and other countries to the south, and occasionally sent trading vessels to the ‘incense countries,’ Punt, etc., *i.e.* Southern Arabia, Somaliland, and perhaps farther east. The celebrated queen Hatshepsut (*c.* B.C. 1500) sent such an expedition (Petrie, *Hist. of Egypt*, ii. 79). There was also trade by land between Arabia and Syria, and, by way of the Isthmus of Suez, with Egypt.

In later times four main causes tended to promote and systematize the commerce of Western Asia, and its trade relations with Egypt and the other Mediterranean countries: (1) the establishment of the Persian dominion over Western Asia and Egypt, including the Greek cities of Asia Minor and many of the Greek islands; (2) the conquests of Alexander, the establishment of Greek States with political relations with Macedonia and Greece, and the founding of numerous Greek colonies throughout Syria; (3) the dispersion of the Jews; (4) the establishment of the authority of Rome over the Mediterranean countries and Western Asia.

iv. EXTENT AND DEVELOPMENT OF ISRAELITE COMMERCE.—We know hardly anything of Israelite trade during the *nomad period*. Probably the clans sometimes carried merchandise between Syria and Egypt (Gn 37[25] 43[11]), or escorted trading caravans; and at other times levied tolls or blackmail upon caravans passing through districts which they occupied. With the *settlement in Canaan*, the Israelites would gradually become involved in the system of internal trade, and of trade with Arabia, Egypt, Phœnicia, and the East which had been established for centuries. For some time this trade would remain in the hands of the original inhabitants, from whom the Israelites would obtain foreign commodities, partly by purchase, partly by plunder, *e.g.* Achan's Babylonish mantle (Jos 7[21]).

In time the extension of the Israelite territory, the growth of cities, and the increase of the power and splendour of the royal court brought about an increase of wealth, and involved the Israelites more largely in the commerce of Syria. The unification of the tribes into a single organized State promoted the interchange of the produce of different districts, the cattle of the pastures, the wheat of the corn-lands, the wine and oil of other districts. The towns must have supplied their wants from the country, and in turn furnished the farmers with some manufactured articles. At first, no doubt, an Israelite farm was largely sufficient unto itself, but the growth of civilization would tend to a primitive division of labour and consequent trade. The establishment of the monarchy promoted external commerce by securing for its subjects the right to travel and trade in foreign countries. Ahab, for instance, obtains from Ben-hadad the right to have 'streets' (חֻצוֹת) in Damascus, *i.e.* an Israelite trading quarter or bazaar (1 K 20^{34}). A powerful king obtained large quantities of foreign commodities as presents or tribute, *e.g.* the gifts of the queen of Sheba and other princes, etc., to Solomon (1 K 4^{21} $10^{10.25}$). The king made similar presents in return (1 K 10^{13}). Moreover, a wealthy sovereign would need foreign articles of luxury for his court, materials for his buildings, and equipment for his army and navy. Thus Solomon obtained timber and carpenters for his buildings, and sailors for his ships, from Hiram king of Tyre (1 K 5^{1-12} 9^{27}); spices, etc. (10^{10}), from the queen of Sheba; horses and chariots for his army from Egypt ($10^{28.29}$). These imports implied exports; Hiram was paid for his timber in wheat and oil ($5^{11.12}$), and there were the 'presents' to friendly princes. David's conquest of Edom (2 S 8^{14}) had given Israel a port, EZION-GEBER, on the Red Sea, from which Solomon sent a trading fleet, partly manned with Phœnician sailors, to Ophir (see OPHIR) for gold, precious stones, etc. (1 K 9^{26-28}). In 10^{22} this traffic with Ophir is said to have been conducted by Solomon and Hiram conjointly, by means of a navy which sailed every three years, and brought 'gold, silver, ivory, apes, and peacocks.'* Further, Solomon not only imported horses and chariots from Egypt, but also sold them to the Hittite and Syrian kings (1 K $10^{28.29}$). The wide extent of Solomon's dominions gave him an opportunity, of which he doubtless availed himself, to provide for the safety and comfort of the caravans from the East to Palestine.† Naturally, the commerce was not entirely in Solomon's hands, and 1 K 10^{15} refers to the traffic of the merchants.

The only other reference to the trade from Ezion-geber to Ophir is the statement that Jehoshaphat made an unsuccessful attempt to renew it (1 K 22^{48}). Probably in the troubles at the close of Solomon's reign, Judah lost its free access to the Red Sea, and the traffic ceased once for all. Otherwise what we read of the commerce of Solomon's reign will hold good, in varying degrees, for the period of the monarchy. The references of the prophets of the eighth century to the prosperity and luxury of the two kingdoms under Uzziah, Jotham, and Ahaz of Judah, and Jeroboam II. of Israel, imply a demand for foreign manufactures and an active commerce (Is $2^{6.7.16}$ 3^{18-24},* Hos 2^{8} 10^{1} $12^{1.7.8}$ 13^{15}, Am 6^{3-6} 8^{5}). On the other hand, the calamities that befell Israel and Judah between B.C. 740 and 586 must have seriously affected its commerce.

It is doubtful whether the Israelites had trading vessels *on the Mediterranean* before the Exile. Herzfeld (*l.c.* p. 17) contends for a considerable maritime traffic mainly in the hands of Zebulun. In the Song of Deborah we read in RV of Jg 5^{17}—

> 'And Dan, why did he remain in ships?
> Asher sat still at the haven (m. shore) of the sea,
> And abode by his creeks.'

This passage seems to imply seafaring habits on the part of the tribes on the Mediterranean coast. It has, however, been proposed to read נאחיו 'meadows' for אניות 'ships'; or to render the first line, 'Why does he live neighbour to the ships?' (Moore), or 'Why does he fear the ships?' *Dan*, too, must be the northern Dan.—In the Blessing of Jacob (B.C. 1000–850) RV renders Gn 49^{13}—

> 'Zebulun shall dwell at the haven (m. beach) of the sea,
> And he shall be for an haven (m. beach) of ships;
> And his border shall be upon Zidon.'

This passage, again, seems to imply maritime trade. Ball, however (in *SBOT*), reads for the second line, 'And he shall sojourn (יגור) in ships,' cf. Jg 5^{17}; Dillmann renders, 'He settles towards the strand of the ships'; while Holzinger denies that the verse in any way refers to trade or seafaring.—In the Blessing of Moses (B.C. 930–750) RV translates Dt $33^{18.19}$—

> 'Rejoice, Zebulun, in thy going out;
> And, Issachar, in thy tents.
> They shall call the peoples unto the mountain;
> There shall they offer sacrifices of righteousness:
> For they shall suck the abundance of the seas,
> And the hidden treasures of the sand.'

'The abundance of the seas' will be fisheries and sea-borne merchandise; 'the hidden treasures of the sand,' the glass made from the sand about Accho, and the purple dye made from the shellfish. 'Going out' is explained of mercantile expeditions. It is also, however, suggested that 'the peoples' were called 'to the mountain' to a gathering which was at once fair and festival, and that Zebulun and Issachar obtained their 'abundance' and 'treasures' by purchase from the Phœnicians, and not by any seafaring of their own. Ball (on Gn 49^{13}) points out that the fact that one of the clans of Issachar is called *Tola*, the name of the worm from which the dye was taken, suggests a connexion between Issachar and that industry.—The only other item of direct evidence in favour of Israelite traffic on the Mediterranean in this period is the mention of 'ships of Tarshish' (cf. TARSHISH) in Is 2^{16}; but it does not follow that these were Israelite ships. On the other hand, the ports north of Carmel were in the hands of the Phœnicians, and the only port south of Carmel, Joppa, a very bad harbour or roadstead, is never mentioned by pre-exilic writers, and it is doubtful if it was ever occupied by the Israelites. Moreover, the historian who dwells with such marked interest on the commerce of Solomon would surely have mentioned Mediterranean traffic if it had existed. On the whole, therefore, the extant evidence fails to prove that the Israelites had trading vessels on the Mediterranean. Doubtless, however, the tribes bordering on Phœnicia—Zebulun, Asher, and Issachar—profited by the wealth and commercial activity of their neighbours; and members of these tribes settled amongst the Phœnicians and shared their trade.

---

* 1 K 9^{26-28} and 10^{22} clearly refer to the same traffic. The 'navy of Tarshish' does not mean a navy going to Tarshish, but a navy consisting of a large class of vessels similar to those which went to Tarshish. The statement of 2 Ch 9^{21}, that 'the king had ships that went to Tarshish,' is a natural misinterpretation of the statement in Kings. Cf. 1 K 22^{48} 'Jehoshaphat made ships of Tarshish to go to Ophir' (Herzfeld, *Handelsgesch. der Juden*, p. 28; Benzinger on 1 K 10^{22}; Oettli on 2 Ch 9^{21}).

† Herzfeld (*l.c.* p. 26) lays great stress on the statement in 2 Ch 8^{4} that Solomon conquered Hamath, and built Tadmor; the latter point being confirmed by the *Ḳerê* of 1 K 9^{18}. TADMOR (Palmyra) would be an important station on the caravan route to the East. But, according to Benzinger on 1 Kings and Barnes on 2 Chron., the reference to Tadmor in the latter is due to a misunderstanding of the former.

* 3^{18-23} is perhaps an interpolation.

Another question is as to how far, in the time of the monarchy, the commerce of Israel was *in Israelite hands.* The fact that in Job 41^{6} and Pr 31^{24} 'Canaanite,' and in Hos 12^{7} 'Canaan,' is used to mean 'merchant'; and apparently in Is 23^{11}, Zeph 1^{11} 'Canaan' is used for 'the merchant people,' suggests that in early times the trade of Israel was largely carried on by the Phœnicians. The various codes and the prophets make scant reference to trade. In view of the keen interest in the commerce of Tyre shown by Is 23, Ezk 26. 27, we should have expected more detailed notice of Israelite trade if it had been largely in native hands. Hos 12^{7}, indeed, 'He [Ephraim] is a trafficker [*lit.* 'Canaan'],'* implies the development of native commercial activity in the Northern Kingdom in the last period of its independence. But this seems to have been a new development, speedily cut short by the fall of Samaria. Again, Ezk 26^{2} represents Tyre as exulting over the fall of Jerusalem, 'the gate of the peoples,' and expecting to profit—perhaps commercially—by her ruin: 'I shall be replenished, now that she is laid waste.' No doubt, Jerusalem was to some extent a commercial city. On the other hand, it is to a Canaanite merchant that the Israelite housewife sells her cloth (Pr 31^{24}); the merchant is not mentioned amongst the notables in such lists as Is $3^{2.\ 3}$; and, except Solomon and his agents, no Israelite merchants are mentioned before the Exile. Probably much of the internal traffic, and most of the import and export trade, were in the hands of Phœnicians and other foreigners.

The *restored Jewish community* in Palestine during the Persian period was small and poor (Hag $1^{1\text{-}11}$ $2^{16.\ 17}$, Zec 7^{7} $8^{4.\ 5.\ 10}$, Mal 3^{14}, Neh 1^{3} 2^{17} 4^{2} 5), and its commerce must have been very limited. Still the Jewish settlement was a city, —Jerusalem and its territory,—and a city implies local and other trade (so Neh $3^{31.\ 32}$ $13^{15\text{-}20}$, where we find the trade partly in the hands of the 'men of Tyre'). There is evidence that during this period Dor, Joppa, and Ashkelon were held by the Phœnicians (G. A. Smith, *HGHL* 129). Probably most of the external and some of the internal trade of the Jewish community in Palestine was in the hands of the Phœnicians. When Jonah set sail from Joppa for Tarshish, it was in a Gentile ship (Jon 1^{5}).

By the time the *Greek period* was reached, the restoration of the temple, the reforms of Nehemiah, and the natural growth of the community must have led to some development of trade, which would be further stimulated by the Greek colonization of Western Asia. Some token of a growing interest in commerce may be seen in the Bk. of Sirach, which refers to the subject more frequently and precisely than does Proverbs. Many of the references, indeed, are quite general, to the dangers of suretiship (Sir 8^{13} $29^{14\text{-}20}$, as in Pr 11^{15} 17^{18} 20^{16}); or to the obligation to deal fairly (Sir 5^{8} $29^{4\text{-}7}$ 41^{18}, as in Pr 16^{11} $20^{10.\ 23}$); or to other general topics (Sir 37^{11}, as in Pr 11^{26}). But Sir $42^{1\text{-}8}$ implies a more intimate acquaintance with commerce, *e.g.* v.[7]—

> 'Whatsoever thou handest over, let it be by number and weight;
> And in giving and receiving let all be in writing.'

In other passages we discern the protest of traditional sentiment against a growing predilection for business life. Thus—

> 'Hate not laborious work;
> Neither husbandry, which the Most High hath ordained' (Sir 7^{15}).
> 'A merchant shall hardly keep himself from wrong-doing' (Sir 26^{29}).

On the other hand, the silence of Ecclesiastes as to trade still illustrates the comparative indifference of the Palestinian Jew to commerce. Ec 3 does not state that 'there is a time to buy and a time to sell.' This silence is the more significant in a book written in the name of Solomon, the merchant-king.

The *restoration of Jewish autonomy*, and the extension of their territory by the *Maccabees*, must have further promoted trade, more especially the acquisition of Joppa by Simon as a Jewish port (1 Mac 14^{5}). Throughout the Persian and Greek periods the growing commerce of the Jewish Dispersion (see below) must have done something to foster trade in Palestine; which would be further encouraged by the frequent resort of the Jews of the Dispersion to Jerusalem, especially for the Passover.

During the *Roman* or *Herodian period* the same causes were at work, aided by the security and facility of communication due to the imperial government. Herzfeld (pp. 66–130) shows that the Mishna and Jerusalem Talmud make frequent references to the trade of Palestine, and enumerates, mainly from these sources, 135 foreign articles imported into Palestine. On the other hand, Josephus (*c. Apion.* i. 12) denies that the Jews occupied any territory on the coast, or cared to engage in commerce: Ἡμεῖς τοίνυν οὔτε χώραν οἰκοῦμεν παράλιον, οὔτ' ἐμπορίαις χαίρομεν, οὐδὲ ταῖς πρὸς ἄλλους διὰ τούτων ἐπιμιξίαις. He makes this statement to explain why the ancient Greeks never heard of the Jews, and doubtless handles his facts with the rhetorical licence of an advocate, *more suo*. Yet his words probably represent the attitude of old-fashioned Palestinian Jews.

The *Dispersion* of the Jews which began with the fall of Samaria had, before the beginning of the Christian era, scattered Jewish communities over all the Mediterranean lands, together with Arabia and the ancient Assyria and Babylonia. These communities are found in all the great commercial cities—Rome, Antioch, Thessalonica, Corinth, Alexandria, etc. Their circumstances militated against their holding land, even when it was not legally forbidden to them; on the other hand, their relations with fellow-countrymen all over the known world gave them then, as now, exceptional facilities for commerce; so that we may conclude that the Jews of the Dispersion were largely occupied with commerce. This conclusion is supported by references to Jewish merchants and trade in various countries. Jos. (*Ant.* XX. ii. 3, 4) mentions a Jewish merchant at the court of Adiabene; Philo (*in Flaccum*, 8) mentions Jewish shipmasters and merchants at Alexandria; and Herzfeld (p. 219) quotes Talmudic references to Jewish traders in Mesopotamia.

v. TRADE ROUTES, MARKETS, HARBOURS, ETC. —1. *Transport of Commodities.* In times of peace, in the more settled countries, merchants (cf. above, 'Terms'), travelling singly or in small companies, carried their wares to their customers, or to markets (Neh 13^{16}), and visited the scattered farmsteads to purchase farm produce, or clothing made by the housewife or her maids (Pr 31^{24}). The more important international traffic was carried on by caravans of camels (Gn 37^{25}), asses (Gn 42^{27} 43^{18} 45^{23}, Ezr 2^{67}), mules (2 K 5^{17}, 1 Ch 12^{40}), oxen (1 Ch 12^{40}), and slaves (2 K 5^{23}). Horses were not used as beasts of burden or for draught, only for riding and chariots. In Gn $45^{19.\ 21.\ 27}$ 46^{5} waggons (*'ăgālôth*) are sent to fetch the aged Jacob and the women and children (cf. the Egyp. *'agolt*, a baggage-waggon drawn by oxen, Erman, *Egypt*, Eng. tr. p. 491). In Nu 7^{3}, 1 S 6^{7} waggons drawn by oxen are used to carry the tabernacle furniture and the ark. In the pictures of convoys of prisoners taken by the Assyrians, the baggage and the sick are sometimes carried in waggons (Maspero, *Anc. Egypt and Assyria*, Eng. tr. p. 336). But there is no mention of waggons in the description of the great caravan in Ezr 2$^{66.\,67}$; and they cannot have been largely used. The caravans were usually accompanied by an armed escort (Ezr 8^{22}).—2. *Trade Routes.* Caravan routes led from S.W. Arabia along the Red Sea from Elath; and also from the Persian Gulf across Arabia to Petra. From Petra there were routes to Egypt, to Gaza, and along the east of the Dead Sea, and the Jordan to Damascus. The great route from the East led from Babylon, across the Euphrates and the desert, by the oasis of Palmyra, to the Plain of Jezreel and the Mediterranean. Another route, partly coinciding with this, started from Gilead, passed over the Plain of Jezreel, and went on by Gaza to Egypt (Gn 37^{25}). Another route went from Damascus by Scythopolis and the Plain of Jezreel to Accho. From Scythopolis routes led to Samaria, Shechem, and Jerusalem. Also from Jerusalem a route by Jericho (Lk 10^{30}) crossed the Jordan, and joined the route east of the river; other routes led to Joppa (Ezr 3^{7}), and, in NT times at any rate, to Gaza (Ac 8^{26}) and, by Antipatris, to Cæsarea (Ac 23$^{31.\,32}$). The combination of these routes connected Babylonia, etc., Damascus, Samaria, Phœnicia, Philistia, Gilead, Jerusalem, Arabia, and Egypt. The Roman roads in Palestine are mostly later than the Bible period. There were numerous minor routes (Herzfeld, pp. 22, 46, 141; G. A. Smith, *HGHL* 149–154, 388 ff., 425–430, 597 ff., 626). An important Egyptian caravan route led from Coptos on the Nile to Sauu (*Wādy Gasus*) on the Red Sea (Erman, p. 505). In NT times a great system of Roman roads connected the East with Rome; the most important route was Rome to Brundusium (*Via Appia*), and from Dyrrachium by Thessalonica to Byzantium (*Via Egnatia*).

---

* RVm renders, 'As for Canaan . . .'; but even so the following verse implies that Ephraim had imitated Canaan.

By sea there was traffic from Babylonia with the East by the Persian Gulf; from Edom and Egypt with the East from ports on the Red Sea; from the Phœnician cities with all the Mediterranean lands and the farther West. A similar trade existed, chiefly in the hands of the Phœnicians and the Greeks, from the coast of the Delta. This developed immensely after the foundation of Alexandria. The rivers Euphrates, Tigris, and the Nile were great trade routes.

The chief seaports of Syria are TYRE and ZIDON, and the other Phœnician cities, and JOPPA (cf. above).

As to markets, the MAKTESH of Zeph 1^{11} seems to have been a trading quarter of the Phœnicians in Jerusalem; and Dt 33$^{18.\,19}$ has been supposed to refer to a fair connected with a religious festival held on the borders of Zebulun and Phœnicia. Markets must have existed in the cities, and elsewhere, probably especially in the neighbourhood of 'high places,' but ancient Israel had no 'commercial cities.' In the NT the market-place (*agora*) is often referred to (Mt 11^{16} etc.); and we read of a market held in the temple precincts (Mk 11^{15}, Jn 2^{14}). Herzfeld (pp. 130, 324) gives Talmudical references to shops and markets, especially some that seem to imply weekly markets on Monday and Thursday.

In some cases Israel enjoyed the privilege of a trading quarter, 'streets' or bazaars, in foreign cities; and granted similar privileges to foreigners (1 K 20^{34}, Zeph 1^{11}).

vi. ARTICLES OF COMMERCE.—The chief exports from Palestine were corn, oil, wine, balsam, spices, cattle, wool, fish, and slaves. Honey, balsam, wheat, and oil were exported to Phœnicia (1 K 5^{11}, Ezr 3^{7}, Ezk 27^{17}, Ac 12^{20}), also oaks from Bashan (Ezk 27^{6}). To Egypt were exported spices, balm, myrrh, honey, pistachio nuts, almonds, oil (Gn 37^{25} 43^{11}, Hos 12^{1}). For the slave-trade see SERVANT. Other exports may be inferred from the existence of fertile vineyards and pasture lands, and of the fisheries on the Sea of Galilee. Every article grown or manufactured in Palestine would be exported at some time or another; at any rate, in small quantities. Conversely, most of the products of countries with which the Jews had commercial relations would be imported at some time or another (cf. above, § iii.). But the chief imports were timber and artisans from Phœnicia (1 K 5^{11}, Ezr 3^{7}); corn, horses, and chariots from Egypt (Gn 41^{57}, 1 K 10$^{28.\,29}$, Dt 17^{16}); gold and silver, spices, timber, precious stones, ivory, apes and peacocks, gold and silver plate and ornaments, armour, and mules from Arabia, Ophir, and other countries (1 K 10$^{10\text{-}25}$); wool and sheep from Moab (2 K 3^{4}, Is 16^{1}).

The special products of each district would be articles of internal commerce with other districts; farm produce was sold in the cities; the products of the industry of the cities were bought for the country; and foreign imports were distributed from the cities through the country. Salt (see SALT) was supplied from the districts by the Dead Sea; cattle, wool, etc., from the pastures to the east and south; corn, etc., from the fertile arable land in Esdraelon and elsewhere.

A long list of the articles of Tyrian commerce is given in Ezk 27.

vii. THE GOVERNMENT AND COMMERCE.—Both in Israel and elsewhere, commerce was often carried on by the kings themselves, *e.g.* Solomon, Hiram (1 K 10^{22}), and Jehoshaphat (1 K 22^{48}). The presents interchanged between friendly princes were really barter on a large scale; in the Tel el-Amarna tablets the kings of Egypt haggle over the exact value of the 'presents' they give and receive, in true Oriental fashion (Winckler, p. 61 f.). The tribute from dependent States, the 'presents' or prices paid for princesses given in marriage, were a one-sided commerce carried on for the benefit of the kings.

The governments of ancient States intervened, as we have seen, to obtain special trading privileges for their subjects in foreign countries (1 K 20^{34}); also to secure for them protection and redress for injuries (Winckler, *Amarna Tablets*, p. 25).

From the analogy of other States we should suppose that the Israelite kings levied taxes on imports and exports, and tolls on merchandise passing through the country. In one of the Amarna tablets (Winckler, p. 93) a foreign king stipulates that his property shall not be dealt with by the customs of Egypt. In NT the customs officers of the Herods and the Romans are referred to (Mk 2^{14} etc.); see PUBLICAN.

viii. COMMERCE OF THE ROMAN EMPIRE. — In NT times the empire possessed a highly developed and elaborate commercial system, largely administered by great trading corporations, and involving credit and other features of modern banking. The most important branch of Roman commerce was the corn trade between Egypt and Rome (Ac 27$^{6.\,38}$ 28^{11}).

ix. ETHICS OF COMMERCE. — The Bible deals directly with only two or three elementary points, such as the duty of fair dealing, and the danger of greed of gain (see SERVANT).

On the general subject cf. the articles MONEY, SOLOMON, WEALTH; also the articles on countries, dress, ornaments, etc.

W. H. BENNETT.

TRADES.—It was an ancient custom and law among the Jews that every boy must learn a trade, not necessarily as a means of livelihood, but as a precautionary measure against destitution, if fortune failed, and the temptations of an idle life. One of the Rabbinic sayings is, 'He that teaches not his son a trade, is as if he taught him to be a thief'; and another, 'He that hath a trade in his hands is as a vineyard that is fenced,' *i.e.* he will be secure from the dangers of temptation and want. Many of their great Rabbis are known by their surname of trade, *e.g.* 'Rabbi Johanan the shoemaker, Rabbi Isaac the blacksmith,' etc. The two illustrious doctors who founded the schools known by their names—Hillel and Shammai—not long before the Christian era, had been taught trades; and the latter, who was a mason, continued to take a practical interest in his handicraft, even when he was vice-president of the Sanhedrin and had a large following of students. So also St. Paul, who was destined for the Rabbinic office, was taught tent-making, probably before he left Tarsus, his native city, to sit at the feet of Gamaliel in Jerus. and learn from him the intricacies of Jewish law. This was of great use to him after his conversion, when he was often compelled to maintain himself by his labour (Ac 18^{3}); so that he was able to say, 'Neither did we eat bread for naught at any man's hand, but in labour and travail, working night and day, that we might not burden any of you' (2 Th 3^{8}).—In many handicrafts the ancients attained a very high degree of excellence, and the Hebrews must have learned much from the Egyptians and Phœnicians. The pyramids, temples, and tombs of Egypt, the temples of Greece and Jerus. and Baalbek, and the images of gods and men, show a knowledge of masonry and sculpture which modern skill can hardly equal, while in the work of the goldsmith and jeweller the ornaments belonging to a queen of the 11th dynasty (about B.C. 2000), which were lately found in Dahshur, are said by good judges to be unsurpassed for beauty and finish in the present-day markets of Paris or London. The Tyrian purple dyes, the rich colouring on Egyp. tombs, the elegant vases of pottery and gold, the linen fabrics of the loom, and other products of manual work so copiously depicted on Egyp. walls, all tell the same story of the high civilization in art of those times. — The principal trades mentioned in the Bible are those of smiths and armourers (1 S 13^{19}), coppersmiths (2 Ti 4^{14}), goldsmiths (Is 46^{6}), jewellers (Hos 2^{13}), masons (2 K 12^{12}), carpenters (Mt 13^{55}), tentmakers (Ac 18^{3}), potters (La 4^{2}), tanners (Ac 9^{43}), fishers (Is 19^{8}), bakers (Jer 37^{21}), barbers (Ezk 5^{1}). Spinning, weaving, and sewing were chiefly the work of women (1 S 2^{19}, Pr 31^{19}). See separate articles on the above subjects. J. WORTABET.

TRANCE (ἔκστασις). — While in class. Greek ἔκστασις has the meaning of frenzy, in Bib. Greek it is not found in this strong sense, but means either distraction of mind due to fear or astonishment (Ps 16^{11} LXX, Ac 3^{10}), or religious rapture (Ac 10^{10} 11^{5}). In the strict sense, religious ecstasy denotes a state in which the mind is so dominated by emotional excitement that sensibility to external impressions, the free activity of the intellect, and the initiative and control of the will, are for the moment in abeyance. Its significance as a medium of revelations was found precisely in this suppression of the ordinary mental functions, the mind being regarded as under the control of the Deity, and therefore as His instrument. Ecstasy has been, and is, a more or less familiar phenomenon in almost all religions, more especially in times of religious excitement. While occurring spontaneously, recourse has often been had to artificial means, such as the concentration of the mind on an abstract idea or significant word, fasting, fixing of the look, seclusion, whirling and bodily contortion—above all, music and dancing. In the early days of Heb. prophecy such stimulants were not unknown (1 S 10^{5}, 2 K 3^{15}). When, however, we come to the canonical prophets, there can no longer be any question of ecstasy in the sense of a morbid state. What is indicated by such expressions as 'the hand of the LORD was upon me' is rather a religious exaltation of spirit, in which the free activity of the mind is not suppressed but heightened. Such a state lies behind vision as its psychological condition. See VISION. The prophets never appeal to the abnormal character of their experience as authenticating their message. In the Apostolic Church we find a revival of ecstasy in the stricter sense, as an accompaniment of the fresh and often violent religious awakening (1 Co $14^{2ff.}$, Ac 2^{13}). It found expression in rapt utterances. While yielding a certain recognition to this gift of tongues St. Paul indicates that it was apt to breed confusion (1 Co $14^{23.\,33}$), and he places it under strict rule. He himself had also the gift of tongues, but he does not set great store by it (1 Co 14^{19}); and while he relates a marvellous ecstatic experience of his own (2 Co $12^{2ff.}$), he nowhere traces his doctrines to such a source. His allusion to this experience is too vague to admit of its character being precisely defined. See, further, the articles on PROPHET.

W. MORGAN.

TRANSFIGURATION, THE. — The word comes from *transfiguratus est*, the Vulg. tr. of μετεμορφώθη in the narratives of Matt. and Mark. Elsewhere this verb is rendered either *reformari* (Ro 12^{2}) or *transformari* (2 Co 3^{18}). The event which it designates is recorded thrice (Mt 17^{1-8}, Mk 9^{2-8}, Lk 9^{28-36}) and alluded to once (2 P 1^{16-18}) in NT. The narratives of Matt. and Mark agree closely in wording. But Matt. alone records that when the disciples heard the voice they fell on their faces; and that Jesus came and touched them and said, 'Arise, and be not afraid.' Mark alone has the words, 'so as no fuller on earth can whiten them.' Luke is more independent. Excepting as regards Peter's exclamation and the voice from heaven, his wording is mainly his own; and even in Peter's words he renders 'Rabbi' by his favourite Ἐπιστάτα, where Matt. has Κύριε. Luke alone tells us that Jesus went up the mount to *pray*, and that He was praying when He was transfigured. In expressing the Transfiguration he avoids μετεμορφώθη (which might have suggested to Gentile readers the metamorphoses of heathen deities), and substitutes the characteristic ἐγένετο ἕτερον. And he alone tells us that Moses and Elijah were talking of Christ's ἔξοδος at Jerusalem, and that the disciples were heavy with sleep.

The main questions respecting this unique incident in the life of Christ are those as to the place, the nature, and the significance of it.

(1) As to the 'high mountain' (Matt., Mark), which when 2 Pet. was written had become 'the holy mountain,' there are two traditions, which can be traced to the 4th century. (*a*) That it was the *Mt. of Olives.* This is incredible. Both before and after the Transfiguration Christ is in Galilee. And the Mt. of Olives would not have been called ὑψηλόν. (*β*) That it was *Mt. Tabor.* This is near enough to Cæsarea Philippi to be possible; and, although it is only about 1700 ft. above the sea, it appears to be much higher, and commands a very extensive view. But it is not probable. Just a week ('six days,' Matt., Mark; 'about eight days,' Luke) before this event Christ was at Cæsarea Philippi. After it He went through Galilee to Capernaum (Mk

9$^{30.33}$, Mt 17$^{22.24}$) on His way to Jerusalem. Would He have gone from Cæsarea Philippi past Capernaum to Tabor, and then back to Capernaum? A much more serious objection is that at this time there was a village or town on Tabor, which Josephus fortified against Vespasian (*BJ* IV. i. 8, II. xx. 6; cf. *Ant.* XIV. vi. 3); so that the necessary solitude (*κατ' ἰδίαν*, Matt., Mark) could hardly be found there. Yet Cyril of Jerusalem (*Catech.* xii. 16) regards it as certain; and through the great influence of Jerome this tradition became widely accepted. In the Greek Church the Feast of the Transfiguration (Aug. 6) is called *τὸ Θαβώριον*. But (*γ*) the best modern writers prefer *Mt. Hermon* (Keim, Lichtenstein, Porter, Schaff, Stanley, Ritter, Robinson, Trench, Tristram). It is over 9000 ft. high, and could easily be reached in much less than a week from Cæsarea Philippi.

(2) Christ calls the event a 'vision,' *ὅραμα* (Mt 17^{9}), which does not mean that it was unreal. It was not one person's optical delusion, but a vision granted to three persons at once. It was a Divine revelation, the manner of which is unknown to us. We can neither affirm nor deny that Moses and Elijah, who had both been taken from the earth in a supernatural way, were there in the body, or only in the spirit, or not at all, except by representation. That the event is historical is shown by the three harmonious accounts, by the intelligible connexion with what precedes and follows, and by the improbability that an inventor would have invented the prohibition to speak of it. Matt. gives Christ's prohibition; Luke states that the disciples kept silence; Mark records both the prohibition and their obedience. There is no suspicious similarity between this event and the Transfiguration of Moses, although Strauss and Keim maintain that there is. And the silence of John is no difficulty, for he would readily omit what had been so often told before. The allusion in 2 Pet. is evidence of what was commonly believed when that letter was written. That a fact corresponding to all this evidence took place is the most reasonable explanation of the evidence.

(3) The meaning of the event is more within our comprehension than the manner of it. Whether it is correct to call it 'the culminating point in Christ's public ministry' or 'the great dividing line in the life' is not certain. That in consequence of it a 'sense of urgency and of the immediateness of a great crisis weighs upon the Lord' is more than we know. It was a foretaste of Christ's glory both in earth and in heaven. As such it served to strengthen the disciples, who had been greatly disturbed by the prediction of Christ's sufferings and death; and to this end they were allowed to listen to Moses and Elijah talking with Him about His death, and to hear the heavenly voice, which had proclaimed His Divine Sonship previous to His ministry, proclaim the same previous to His Passion. It showed them the supernatural character of His kingdom. It helped them to see that the OT being fulfilled by Christ is done away in Christ. Moses and Elijah vanish, and 'Jesus alone' (Matt., Mark, Luke) remains. To Christ Himself it may have had significance also. Whether or not it conveyed to Him any larger knowledge of His Father's will, this foretaste of His glory may have helped Him to bear the prospect of His approaching sufferings. He accepted the strengthening of an angel in Gethsemane, and may have accepted some analogous strengthening on the mount.

LITERATURE.—See Comm. and Lives of Christ; also the Dict. and Encyc. articles on 'Transfiguration' and 'Verklärung.' See also 'The Significance of the Transfiguration,' by W. J. Moulton, in *Bibl. and Sem. Studies* (Yale Univ.), 1901, pp. 157–210.

A. PLUMMER.

TRAVAIL.—In modern editions of AV a distinction has gradually arisen between 'travail' and 'travel,' the former being used when the meaning is to labour (or as subst. for 'labour,' 'trouble'), especially in childbirth, the latter when it is simply to journey. But in the editions of 1611 there was no such distinction. Thus in 1611 Mt 25^{14} reads, 'For the kingdome of heaven is as a man travailing into a farre countrey'; but Is 21^{13} 'In the forest in Arabia shall yee lodge, O yee travelling companies of Dedanim.' So in Ec 4^{4} we find 'Againe I considered all travaile'; but in 4^{6} 'Better is an handfull with quietnesse, then both the hands full with travell and vexation of spirit.' Nor have the editors or printers carried out their distinction completely. In La 3^{5} 'He hath . . . compassed me with gall and travel,' the spelling of AV is retained in mod. editions (Cov. 'travayle,' RV 'travail'). In Nu 20^{14} the sense has evidently been missed, the wider meaning of toil and trouble in the wilderness being taken as if it were merely the marching through it: AV 1611, 'Thou knowest all the travaile that hath befallen us' (mod. edd. 'travel,' RV 'travail').

The Eng. word is simply the Fr. *travail*, toil, trouble, the origin of which is unknown. In Cotgrave's French Dictionary *travail* is described as 'travell, toyle, teene, labour, business, paines-taking, trouble, molestation, care.' Travelling, which is now undertaken for pleasure, was so conspicuous a form of toil and trouble that it appropriated the name. The change of spelling was assisted by the fact that 'traveil' was another variety of spelling in early use. Thus in Ec 2^{23} AV 1611, 'For all his dayes are sorrowes, and his traveile, griefe.' The meaning was sometimes 'be weary,' as Is 40^{31} Wyc. 'Who forsothe hopen in the Lord, shul chaunge strengthe, take to federes as of an egle; rennen, and not travailen; gon, and not faylen.' For the spelling 'travel' for labour cf. Gosson, *Schoole of Abuse*, 41, 'I burnt one candle to seek another, and lost both my time and my travell when I had doone'; and in the sense of labour in childbirth, Hall, *Works*, ii. 11, 'If the house of David had not lost all mercy and good nature, a Daughter and [of] David could not so neere the time of her travell have bin destitute of lodging in the city of David.'

J. HASTINGS.

TREASON.—This word occurs in EV only in 1 K 16^{20} (of Zimri) and 2 K 11^{14}=2 Ch 23^{13} (the exclamation of Athaliah). In these instances it had better have been rendered 'conspiracy,' the tr. of the same Heb. term (קֶשֶׁר) in RV of Is 8^{12} (AV 'confederacy'; for justification of the reading קֶשֶׁר against Secker, Lowth, Lagarde, Stade, *et al.*, who emend קֹדֶשׁ, see Cheyne, *Introd. to Is.* 40; LXX has *σκληρὸν*=קָשֶׁה), and in AV and RV of 2 S 15^{12}, 2 K 17^{4}, Jer 11^{9}, Ezk 22^{25}. Cf. the use of the verb קשׁר in 1 S 22$^{8.13}$, 2 S 15^{31}, 1 K 15^{27} 16$^{9.16}$, 2 K 9^{14} 10^{9} 12^{20} (=2 Ch 24$^{25f.}$) 14^{19} (=2 Ch 25^{27}) 15$^{10.15.25.30}$ 21$^{23.24}$ (=2 Ch 33$^{24.25}$), 2 Ch 24^{21}, Neh 4^{8}, Am 7^{10}, in all of which both AV and RV render by 'conspire,' 'make conspiracy,' or 'be a conspirator.'

J. A. SELBIE.

TREASURE, TREASURER, TREASURY.—The word 'treasure' is used in EV in two distinct senses, which are approximately represented in English by 'store' and 'storehouse' respectively. The same ambiguity of meaning (which might be avoided in English by uniformly employing 'treasure' for the one sense and 'treasury' for the other, or by abolishing the latter term altogether and replacing it by 'storehouse' or the like) attaches to some of the words which in the original of the OT are the source of these renderings.

(1) 'Treasure' in the sense of *store* usually stands for Heb. אוֹצָר (generally plur. אוֹצָרוֹת): of gold, silver, costly utensils, etc., Jos 6$^{19.24}$ (the vessels found in Jericho [AV and RV have here 'treasury,' which is not so suitable a tr. as 'treasure' or 'store']), Is 2^{7} 30^{6} 45^{3} ('treasures of darkness,' *i.e.* concealed, hoarded treasures), Hos 13^{15}, Jer 15^{13} 17^{3} 20^{5} 48^{7} 49^{4} 51^{13}, 1 K 14$^{26\ bis}$, 2 K 24$^{13\ bis}$, perhaps also Is 39$^{2.4}$, although this should perhaps come under (2); wealth in general, Pr 15^{16} 21$^{6.20}$, 1 Ch 29^{8} (the contributions for the building of the temple [here both AV and RV have rightly 'treasure,' but, strangely enough, RV gives 'treasury'

in the similar passage, Ezr 2^{69}=Neh 7^{71}], called in 1 Ch 29^{16} הָמוֹן, lit. 'crowd,' 'abundance,' AV and RV 'store,' cf. 2 Ch 31^{10}); of stores of food, drink, etc., 1 Ch $27^{27.\ 28}$ (AV and RV 'increase'), 2 Ch 11^{11} (AV and RV 'store'); fig. 'treasures of wickedness' (Mic 6^{10}, Pr 10^{2}), 'the fear of the LORD is his treasure' (Is 33^{6}).

'Treasure' stands in OT also for **1.** חֹסֶן, lit. 'strength': Pr 15^{6}, Ezk 22^{25} (AV and RV in both 'treasure'). The Heb. term occurs also in Is 33^{6} (AV 'strength,' RV 'abundance'), Jer 20^{5} (AV 'strength', RV 'riches'), Pr 27^{24} (AV and RV 'riches'). **2.** מַטְמוֹן '*hidden* (treasure),' √ טמן 'conceal': Gn 43^{23} (of money hid in the sacks of Joseph's brothers), Is 45^{3} (treasures at present hidden are to become the spoil of Cyrus), Jer 41^{8} (AV 'treasures,' RV 'stores,' of wheat, barley, oil, and honey hidden in a field), Job 3^{21} (some long for death as for hid treasures), Pr 2^{4} (wisdom is to be sought for like hid treasures). **3.** The same is the meaning of מִכְמַנִּים in Dn 11^{43}, where, indeed, it is possible that we ought to read מַטְמֹנִים. **4.** מִסְכְּנוֹת, from √ סכן 'to be of use,' 'to benefit' (see below for the examples of its use). **5.** עָתוּד (*Ḳĕrê*) or עָתִיד (*Keth.*), in plur. עֲתִידֹתֵיהֶם, Is 10^{13}, lit. 'the things prepared or provided for them,' AV and RV 'their treasures.' **6.** The combination שְׂפֻנֵי טְמוּנֵי חוֹל (RV 'the hidden treasures of the sand'), Dt 33^{19}, may allude to the wealth derived from the manufacture of glass (see Driver, *ad loc.*). **7.** בֶּצֶר, prop. 'precious ore,' Job $22^{24.\ 25}$ (AV in first 'gold,' in second 'defence,' RV in both 'treasure,' m. 'ore'). **8.** For Mal 3^{17} ('a peculiar treasure') see art. JEWEL. **9.** מַצְפֻּנִים, Ob ^{6} (AV 'hidden things,' RV 'hidden treasures').

'Treasure' in NT is always θησαυρός except in Ac 8^{27}, where the word γάζα from the Persian is used of the treasure of queen Candace. θησαυρός occurs in Mt 2^{11} (of the treasures carried by the magi), $6^{19.\ 20.\ 21}$ ‖ Lk $12^{33.\ 34}$ (of the treasures of earth contrasted with those of heaven; cf. the treasure in heaven spoken of in Mt 19^{21} ‖ Mk 10^{21} and Lk 18^{22}), Mt 13^{44} (the kingdom of heaven is like treasure hid in a field; cf. the above OT passages Jer 41^{8}, Job 3^{21}, Pr 2^{4}), He 11^{26} ('the treasures of Egypt'); fig. in 2 Co 4^{7} ('we have this treasure in earthen vessels'; see art. POTTER, p. 25^{b}), Col 2^{3} ('in Christ are all the treasures of wisdom hid').

(2) 'Treasure' or 'treasury' in the sense of *storehouse* is almost always the tr. in OT of בֵּית אוֹצָר: Neh 10^{38} (cf. 12^{44} and Dn 1^{2}), Mal 3^{10} (AV and RV 'storehouse'); or, more frequently, without the בֵּית: 1 K 7^{51} $15^{18\ bis}$, 2 K 12^{18} 14^{14} 16^{8} 18^{15}, Jer 38^{11} 50^{25} (fig. of Jahweh's armoury) v.^{37} (?), Dt 32^{34} (the guilt of the heathen is sealed up in God's treasury till the day of retribution come; see Driver, *ad loc.*), 1 Ch 9^{26} $26^{20\ bis.\ 22.\ 24.\ 26}$ $28^{12\ bis}$, 2 Ch 5^{1} 16^{2} (?) 32^{27} (cf. Ezk 28^{4}), Jl 1^{17} (AV and RV 'garners'), Pr 8^{21}, Neh $13^{12.\ 13}$. Cf. the use of מִשְׁכְּנוֹת in 2 Ch 32^{28}. אוֹצָר is used fig. of God's storehouses for rain, snow, hail, wind, sea, in Dt 28^{12}, Job $38^{22\ bis}$, Jer 10^{13} 51^{16}, Ps 33^{7} 135^{7}; cf. the use of צְפוּנִים in Job 20^{26}.

In the king's 'treasure house' of Ezr 5^{17} (בֵּית גִּנְזַיָּא, cf. 6^{1} and 7^{20}) the archives of the kingdom were kept. In Est 3^{9} 4^{7} the treasury of the Persian king appears under the name גִּנְזֵי הַמֶּלֶךְ; cf. the likewise Persian name גַּנְזַךְ in 1 Ch 28^{11}.

We read of 'treasure (RV 'store') cities' (עָרֵי מִשְׁכְּנוֹת) in Ex 1^{11} [J], 1 K 9^{19} (=2 Ch 8^{6}), 2 Ch 8^{4} 17^{12}. For the custom of storing up provisions in particular cities cf. Gn $41^{48.\ 56}$, and see an account of the granaries and 'store houses' of ancient Egypt in Maspero, *Dawn of Civilization*, 284.

For the chambers (לְשָׁכוֹת) or cells used for storage purposes in the temple see next article.

In the NT 'treasure'='treasury' is (*a*) θησαυρός: Mt 12^{35} ‖ Lk 6^{45} (the good or evil treasury of the heart) 13^{52} ('which bringeth out of his treasury things new and old'); (*b*) once, Mt 27^{6}, it is Κορβανᾶς (from Heb. קָרְבָּן; see CORBAN), 'place of [sacred] gifts'; (*c*) γαζοφυλάκιον; see next article; (*d*) in Lk 12^{24} ('which have neither storehouse nor barn') the word for 'storehouse' is ταμεῖον [in Dt 28^{8} and Pr 3^{10} for the Heb. אֲסָמִים; AV in former 'storehouses,' RV 'barns,' which is adopted by both versions in the latter].

Treasurer occurs as follows. **1.** Neh 12^{13} 'I made treasurers (Hiph. of אצר) over the storehouses' (עַל־הָאוֹצָרוֹת, AV and RV 'treasuries'). **2.** Ezr 1^{8} 'MITHREDATH the treasurer'; 7^{21} 'I, Artaxerxes, make a decree to all the treasurers.' The term (found also in Aram., New Heb., and Syr.) here used is גִּזְבָּר, plur. גִּזַבְרַיָּא, a loan-word from the Persian *ganjvar*, Pehlevi *ganzavar*. **3.** Dn $3^{2.\ 3}$ Aram. גְּדָבְרַיָּא (plur. emphat.). This may be a by-form of the above גִּזַבְרַיָּא (so Prince), or a textual error for הַדָּבְרַיָּא (AV and RV 'counsellers') found in vv.$^{24.\ 27}$ 4^{36} 6^{7} (so Graetz, Bevan, *et al.*). But it seems more likely that it is a dittography from the following דְּתָבְרַיָּא. This conclusion (which is that of Lagarde, Nöldeke, *et al.*; Driver and Marti leave the question open) is supported by the circumstance that the LXX and Theod. have only seven officials in place of the eight of MT. **4.** Is 22^{15}, of Shebna. The Heb. term סֹכֵן (fully discussed under art. SHEBNA) would be better rendered 'servitor' or 'steward.' **5.** Ro 16^{23}, where RV substitutes 'treasurer' for AV 'chamberlain' as tr. of οἰκονόμος (see STEWARD). J. A. SELBIE.

TREASURY (OF TEMPLE).—The word γαζοφυλάκιον, tr. 'treasury' in the NT, is used in the LXX for the Heb. words* meaning cells or apartments of the temple court, in which sacred offerings and utensils were kept, and in which also the priests dwelt.† The word is used in the Books of Maccabees of the sacred treasury in which not only public treasures were stored, but also public records,‡ as well as property belonging to widows and orphans.§ In the inner court of Herod's temple there were rooms which Josephus‖ represents by γαζοφυλάκια, showing that the term had a wider sense than 'treasury' would suggest. In the NT the word is used in three places, viz. Mk $12^{41.\ 43}$ ‖ Lk 21^{1}, Jn 8^{20}.

Josephus has it in the singular,¶ apparently for the special room in the women's court in which gold and silver bullion were preserved. In Jn 8^{20} this sense would stand, but not so in the parallel passages of Mark and Luke, where the word is apparently the equivalent of the Rabbinical שׁוֹפָרוֹת, 'trumpets,' so called because they had the shape of the ram's-horn trumpet. There were thirteen such boxes, and they may be assumed to have been in the women's court, or the widow could not have got at them with her mite. Six out of the thirteen were to receive free gifts, the remaining seven being for distinct purposes, figured probably on the boxes. They were most likely placed on each side of the large gate which led from the women's to the men's court. See TEMPLE (Herod's), and cf. also art. TREASURE. T. W. DAVIES.

TREE (עֵץ *'ēẓ*, δένδρον, ξύλον).—The Holy Land is not now a land of trees. Even the mountain tops are for the most part bare, and none of the primeval forests have been preserved. This very fact emphasizes the importance and value of trees, wherever they are planted or grow spontaneously. A large part of the trees that exist are cultivated for their fruits, as the palm, fig, apple, pear, apricot, peach, plum, banana, orange, lemon, citron, walnut, pistachio; or their leaves, as the mulberry; or their wood, as the pine. Solitary trees or small groves are planted by tombs (1 S 31^{13}) or on high places. From ancient times men loved to rest under such trees (Gn $18^{4.8}$, 1 S 22^{6}). When the hail broke 'every tree' in Egypt (Ex 9^{25}), it was a national disaster. A fruit tree near a besieged city was not to be cut down (Dt 20^{19}), but to be kept for the use of the besieged. Other trees might be cut (v.^{20}). 'A tree planted by watercourses' (Ps 1^{3}) was an emblem of vigour (cf. the vision in Dn 4). The expression 'tree of life' (Gn $3^{22.24}$) was afterwards applied figuratively (Pr 3^{18} 11^{30} 13^{12} 15^{4}). A tree is known by its fruit (Mt 12^{33}). Allusion is made to the great variety of trees which flourish in Palestine (Lv 19^{23}, Ec 2^{5}). Under 'the tree of the knowledge of good and evil' (Gn 2^{17} 3^{6}) our first parents fell. Under the trees of Gethsemane our Saviour accepted His Father's will (Mt 26^{36-46}). The 'tree of life' in heaven has food and healing for the nations (Rev $22^{2.14}$).

TRIBE.—

i. *Terms.*—In EV 'tribe' is tr. in OT of Heb. מַטֶּה *maṭṭeh* (φυλή, *tribus*), שֵׁבֶט *shēbheṭ*, or שָׁבֶט *shebheṭ* (φυλή, *tribus*), Aram. שְׁבַט *shĕbhaṭ* (φυλή, *tribus*); in NT of Gr. φυλή. Δωδεκάφυλον is used Ac 26^{7} for 'the set of twelve tribes.' In Is 19^{13} *shēbheṭ* is used of the 'tribes' (Cheyne 'castes,' Duhm 'nomes') of Egypt, and in Mt 24^{30} φυλή of 'tribes' generally; otherwise all these words are used exclusively of the tribes of Israel, except that *shēbheṭ* is occasionally used of the subdivisions of these tribes, Jg 20^{12}, 1 S 9^{21}, according to MT 'tribes of Benjamin'; but probably the sing. should be read, 'tribe of B.' [Moore, H. P. Smith]; and Nu 4^{18} MT, 'cut not off the tribe of the families,' where, however, we should perhaps read 'cut not off from the tribe,' etc. [the text is doubtful, see LXX, Vulg.]. The use of *maṭṭeh* and *shēbheṭ* for 'tribe' is figurative, the words meaning originally 'rod,' 'staff,' 'sceptre,' 'branch,' etc., in which senses they are used in OT. *Oxf. Heb. Lex.* explains under מַטֶּה: '*tribe*, orig. company led by chief with staff.'

Maṭṭeh as 'tribe' is found in P in the Hexateuch, in Chron.; and in 1 K 7^{14} 8^{1}, where Benzinger regards the clauses in which *maṭṭeh* stands as late additions, in 8^{1} the *maṭṭeh*-clause is absent from LXX^{B}. *Shēbheṭ* is common in D, is found in JE, and very occasionally in P (possibly only in redactional passages), and occurs throughout the OT from JE to Chronicles. Giesebrecht (*ZATW*, 1881, p. 242) maintained that the name and thing expressed by *shēbheṭ* died out before the Exile, and *maṭṭeh* was used for it after the Exile. This position is controverted by Driver, *Journ. Philol.* xi. 1882, p. 213 f. The decision depends partly on the view taken as to the text, etc., of individual passages; current views on these points seem to admit the opinion that (1) *shēbheṭ* occurs in post-exilic literature only in passages borrowed from pre-exilic works, or as a literary archaism, its use having been revived through a study of the earlier literature; and that (2) there is no certain instance of the use of *maṭṭeh* for 'tribe' before the Exile.—The use of Aram. words corresponding to *shēbheṭ* in the sense of 'tribe' may be due to the influence of the OT.—On the terms for the subdivisions of the tribe, viz. *mishpāḥā* and *bêth 'ābh*, see FAMILY and below.

ii. *Origin, Nature, and History of the Tribe as a Social Organization.*—The articles on individual tribes show that there are two chief theories of their origin. First, the biblical statements as to the patriarchs are understood as personal history, and the tribe is regarded as having arisen chiefly by the natural increase of the descendants of a son or grandson of Jacob. The descendants of each son kept together as a social group, in which, however, foreign slaves, wives, etc., were sometimes included. The second theory, now more generally held, regards much that is said of the patriarchs and their children as tribal history told in a personal form; cf. BENJAMIN, i. 272^{b}; JUDAH, ii. 792^{b}. According to this view the tribes did not all arise as subdivisions of Israel, but Israel was formed, in a measure, by the aggregation of some of the earlier tribes. The process by which the complete set of tribes was formed began before the Conquest, and was continued afterwards. Israel as it invaded Palestine was a loose confederation of kindred tribes. These tribes had themselves been formed by the aggregation of smaller bodies or *mishpāḥās*, which were groups of families. We have few data as to the tribal system in the nomadic period; but it would be similar to that of the nomadic Arabs. The unifying forces in the tribe, clan, etc., were the blood-bond, and the tribal or family cult. The blood-bond was partly real, partly theoretical; it could be established by mutual agreement and religious ceremonies. The chief duties of members of a tribe were to act together in war, and to protect one another by blood-revenge. The tribes and their subdivisions were fluid organizations liable to combination, subdivision, loss by secessions, and gain by accessions. Cf. W. R. Smith, *Kinship*, etc. 1–58, 171; *RS* 38 ff.

In the Conquest, Israel fought by tribes and subdivisions of tribes; sometimes the tribes combined (Jg 1^{3} 4. 5), sometimes they acted separately (Jg $1^{22\text{ff.}}$). In the settlement the natural tendency would be for each family, clan, and tribe to settle together in the same district (Jos $14^{1.2}$ 18^{10}).

It is, however, quite uncertain how far the tribes which we find in Canaan under the monarchy correspond to tribes which existed before the Conquest. Even where there was a real connexion, the name may have been changed. Thus, as the sons of concubines, Gad and Asher (Zilpah), Dan and Naphtali (Bilhah), are regarded as additions to Israel after the Conquest. The stories of the late birth of Benjamin and of the recognition of Ephraim and Manasseh (Gn 48^{8-22} JE) have been understood to mean that these three tribes were formed by the subdivision of Joseph after the Conquest. These views are partly confirmed by the fact that some of these tribal names are apparently names of places in Palestine: Asher (*Aseru*) appears as the name of a district or people in Galilee in inscriptions of Seti I. and Ramses II.; Benjamin is 'son of the right hand' or 'south,' *i.e.* the southern district of Joseph; and Ephraim, from its form (cf. *Mizraim*, etc.), should be a place-name meaning 'a fruitful land.' The discovery of *Joseph-el* (?) and *Jacob-el* (see JACOB, ii. p. 526^{b}) in a list of places in Palestine conquered by Thothmes III., B.C. 1481–1449, has led to the suggestion that the tribe of Joseph assumed that name after its settlement in Canaan. On the other hand, the comparative lack of territory, and the insignificance of Reuben, Simeon, and Levi in historic times, point to the antiquity of these tribal names (but cf. LEVI).

Possibly in early times the tribes of Israel were known as Rachel and Leah, and at some time, before or after the Conquest, these broke up into divisions, which eventually became the twelve tribes.

After the Conquest the tribes became essentially territorial, though no doubt the theory of the blood-bond survived. Similarly the *mishpāḥā* came to mean the town, or quarter of a town, or village, or district. Hence the tribal name denoted a district, and the tribe included not only the Israelite invaders, but also in time the natives whom they absorbed, or by whom they were absorbed. These tribal districts had no fixed or continuous political organization, and they varied in number or extent. The real political units

were the smaller communities, towns, and districts whose inhabitants were bound together by neighbourhood and common interests. War would unite a whole tribe or a number of tribes, and induce them to recognize a single leader, like Gideon or Jephthah, and to accord him a certain authority after he had brought the war to a successful close. The term *shōphēṭ* used for such leaders in Judges suggests that their authority was utilized to decide disputes too serious to be settled by local chiefs. The Song of Deborah implies that, apart from such 'judges,' a tribe had no single head; at any rate it does not mention any one in that position, except Deborah and Barak, but speaks of the 'governors' (*mĕḥōḳĕḳîm*) of Machir, 'they that handle the marshal's staff' (*mōshĕkhîm bĕshēbhet ṣōpher*) of Zebulun, and the 'princes' (*sārîm*) of Issachar. Similarly in the times of the Judges and the Monarchy we read of 'elders' of Gilead, Jg 11[5]; of Israel, 1 S 4[3] etc.; of Jabesh, 1 S 11[3]; of Judah, 2 S 19[11]; of the 'princes' (*sārîm*) of Gilead, Jg 10[18]. Normally, the highest authorities in the tribe were those 'elders,' probably the heads of the *mishpāḥās* (B. Luther). 1 Ch 27[16-24], which assigns a 'ruler' (*nāghîdh*) or 'captain' (*sar*) to each tribe, is probably from a late post-exilic source (Gray, *HPN* pp. 185-188). Abimelech's kingship (Jg 9) was quite exceptional, and was not tribal; he is spoken of as king of Shechem only.

It is possible that the tribes brought with them into Palestine a tribal cult, and established tribal sanctuaries which would serve as rallying points. The sanctuary of Dan, at the Northern Dan (Jg 17. 18), however, is hardly an example; the priest, etc., were acquired in Palestine, and Dan itself may not have been one of the original tribes; still, in forming a tribal sanctuary, it may have been imitating them. Dt 33[18. 19] seem to refer to a sanctuary of Zebulun and Issachar. Even if a tribe had no official sanctuary, the various high places promoted union and intercourse in a district.

After the establishment of the Monarchy, as the power of the kings increased, the tribal names gradually became mere geographical expressions, and the districts they denoted ceased to be political divisions. Solomon (1 K 4[7-19]) divided the land of Israel, with the exception of part of Judah, into twelve districts, which do not coincide with the tribal districts. In a measure, however, the tribal system prevailed: by the division into two kingdoms and the disappearance or absorption of the weaker tribes, Judah became the Southern kingdom, Ephraim the Northern kingdom, and Gad stood for S.E. and Eastern Manasseh for N.E. Israel; although the political existence of the other divisions of the Northern kingdom is sometimes recognized (Is 9[21]). The oracles on the tribes, the Blessing of Jacob (Gn 49), and the Blessing of Moses (Dt 33), come to us in their present form from the period of the Monarchy; but they are constructed on the model of more ancient oracles, so that the fact that they contain sayings on nearly all the tribes (cf. below) does not show that the tribe continued a political unit throughout the Monarchy; on the other hand, the space devoted to Judah and Joseph in Gn 49, and to Joseph and Gad in Dt 33, supports the view taken above. The section on Levi (Dt 33[8-11]) may have received its present form from one of the Deuteronomic writers. The disappearance of the tribe as a political unit is further indicated by the silence of 2 K, etc., and especially by the fact that, with two exceptions, none of the numerous lists of Jewish families in *Ezra* and *Neh.* refer them to their tribes. The exceptions are Neh 11[3-24] 11[25-36] (in their present form very late, Guthe, *SBOT*, etc.), where, too, 'Benjamin' and 'Judah' may be mere names of districts.

On the other hand, the Blessings of Jacob and of Moses, with Ezk 48 and such references as Ps 68[27] 80[2], show that a strong archaic religious interest was taken in the ancient tribes. One result of this interest was the set of tribal genealogies, Gn 46[8-72] = Nu 26[5-51] (late strata of P), 1 Ch 2-9, which partly expressed the recollections of ancient politics and geography, and partly served to connect existing families with the primitive tribes. Meyer (*Entstehung*, 160) deduces from the statement in Ezr 2[59-61] that certain families could not prove Israelite descent, the conclusion that the rest traced their descent from Judah or Benjamin. The silence as to tribal descent, mentioned above, seems to show that this is an erroneous theory; and the habit of tracing descent to the ancient tribes and their primitive clans became general only long after the Exile; families which derived their ancestry from distinguished men, David, Saul, etc., could of course name their tribe. In other cases, a family would determine its tribe from its home before or even after the Exile, and from similar circumstances. Hence the description of various persons in the Apocrypha and NT as belonging to certain tribes (To 1[1], Jth 8[1], 2 Mac 3[4], Lk 2[36], Ro 11[1]) can be accepted only in this limited sense.

iii. *Order and Grouping.*—The accompanying Table will show that the tribes are arranged in twenty different orders, only one of which, that of Nu 2. 7. and 10, recurs. The principles of arrangement are—

(1) The relationship to Jacob, and his wives and concubines. Thus: Sons of—

Leah: Reu., Sim., Levi, Jud., Iss., Zebulun.
Zilpah: Gad, Asher.
Rachel: Joseph, Benjamin.
Bilhah: Dan, Naphtali.

This principle, modified in some cases by others, determines the order in Gn 29-35, in the Blessing of Jacob (Gn 49), and in the lists based on the Blessing (Gn 46, Ex 1, Nu 1 (two). 2. 7. 10. 13. 26, 1 Ch 2[1f.] 27).

As the grouping according to wives and concubines does not correspond to any known historical situation after the Conquest, it must be based on a tradition of the circumstances of Israel before, or shortly after, that event.

(2) Geographical position. This position influences most of the lists mentioned above, and governs in large measure those in Nu 34, Dt 33, Jos 13 ff., Jg 5, 1 Ch 2[3]-8 (partly), 12; Rev 7 (partly).

(3) In Dt 27 tradition and geography have some influence,—witness the position of Simeon and Issachar; but the chief principle seems to be that the tribes regarded for various reasons as more important are chosen to bless, and the less important to curse. The cursing tribes belong to the E. and N. districts, which were carried away captive first.

(4) The list in Ezk 48 is based on the geography of the monarchy modified by the transference of the Eastern tribes to the West of Jordan, and by the ideal necessity for placing the temple about the middle of the country.

In the Table on the preceding page the sons of the various wives, etc., are printed thus:—

Sons of Leah, small caps., *e.g.* REU.; of Zilpah, ordinary type, *e.g.* Gad; of Rachel, small caps. italic, *e.g.* *JOS.*; Bilhah, italic, *e.g.* *Dan.*

iv. *Subdivisions of the Tribe.*—The tribe was a confederation of *mishpāḥās* (cf. above), RV 'families'; and the *mishpāḥā* was a group of households, *bayith* or *bēth 'abh* ('father's house').* A common worship of the *mishpāḥā* is implied in 1 S 20[6]. The names of some of the *mishpāḥās*

---

* Also used of a tribe (Nu 17[17]), or chief division of a tribe (Nu 3[20] (?)).

(Hebronites, Nu 3^{27}; Hezronites, Nu 26^{6}; Shechemites, Nu 26^{31}) show that in many cases the *mishpāḥā* came to mean the inhabitants of a town or district. Jg 9^{1}, however, implies that in the time of Abimelech ben Gideon there were more than one *mishpāḥā* in Shechem. According to the oldest form of the Gideon narrative (J, Jg 6^{34} 8^{4}, see analysis in *PB*), Gideon's force consisted of the fighting men of the *mishpāḥā* Abiezer, who amounted in number to three hundred. In Ex $12^{3.\,4}$ the *bayith* or *bêth 'abh* is spoken of as normally capable of consuming a paschal lamb at one meal.

Cf. FAMILY, GOVERNMENT, ISRAEL, JACOB, and articles on the separate tribes, etc.

LITERATURE.—See on FAMILY; also B. Luther, 'Die israelitischen Stämme,' *ZATW*, 1901, Heft 1, pp. 1–76; Cornill, *Hist. of the People of Israel*, pp. 36–62; Steuernagel, *Die Einwanderung der isr. Stämme in Kanaan*, 1901; Ed. König, *Neueste Prinzipien der alttest. Kritik geprüft*, 1902, p. 35 ff.

W. H. BENNETT.

TRIBUTE (IN OT).—**1.** מַס. The rendering 'tribute' for this word is very misleading. Its meaning is collective=*forced labourers, labour-gang*. One of the most notable of such companies was the body of task-workers for the public service, consisting of 30,000 men, which Solomon (see above, p. 565^{b}) raised by levy upon the people (1 K $5^{13\,(27)}$ $9^{15.\,21}$; contrast the statement in 2 Ch $8^{8f.}$, according to which this levy was imposed only upon the remnant of the aboriginal inhabitants of Canaan). Something of the same kind appears to have been introduced already by David (2 S 20^{24} 'Adoram was over the labour-gang,' cf. 1 K 4^{6} 5^{13} 12^{18}=2 Ch 10^{18}). Another familiar instance is the slave-gangs of Israelites in Egypt, with their overseers (שָׂרִים Ex 1^{11}). Conquered populations were frequently subjected to forced labour: Dt 20^{11}, Jos 16^{10} 17^{13}, Jg $1^{28.\,30.\,33.\,35}$, Is 31^{8}, La 1^{1}. 'Issachar became a slaving labour-band' (לְמַס־עֹבֵד Gn 49^{15} [J]). In Pr 12^{24} it is said that 'slothfulness [a slothful man] shall be put under taskwork.' In late Hebrew the word מַס (by use of the concrete for the abstract) came to mean *forced service, serfdom*. In Est 10^{1} it possibly means *tribute* in sense of *forced payment*.

2. In Dt 16^{10} EV 'with a tribute of a freewill offering' would be clearer if RVm were adopted: 'after the measure of the,' etc. The Heb. [here only] is מִסַּת, common in Aram.='sufficiency,' and as adv. acc.=*pro ratione*. The meaning is that the offerer is to give according to the full measure in which Jahweh has blessed him in the year's harvest (see Driver, *ad loc.*, and *Oxf. Heb. Lex. s.v.*).

3. מִדָּה (loan-word from Assyr. *mandattu*, 'tribute'), Ezr 4^{13}, Neh 5^{4}. **4.** בְּלוֹ (prob. the Assyr. *biltu*, 'impost'; see Schrader, *COT* ii. 65 f.). **5.** מֶכֶס, prop. 'computation,' used only of the duty for Jahweh levied on the spoil, Nu $31^{28.\,37.\,38.\,39.\,40.\,41}$ [all P]. **6.** מַשָּׂא, lit. 'burden,' 2 Ch 17^{11} (cf. 2 Ch 24^{27}, Hos 8^{10}). **7.** עֹנֶשׁ 'fine,' 'indemnity,' 2 K 23^{33} (of the sum exacted by Pharaoh-necho after he had deposed Jehoahaz), cf. Pr 19^{19} (AV 'punishment,' RV 'penalty').

J. A. SELBIE.

TRIBUTE (IN NT).—Κῆνσος, Lat. *census* (Mt 22^{17}, Mk 12^{14}), φόρος (Lk 20^{22} 23^{2}, Ro $13^{6.\,7}$), in Mt 17^{25} τέλη ἢ κῆνσος ('toll or tribute'), an annual tax levied on persons, houses, or lands. In all the passages quoted the reference is to the imperial taxes, to taxes paid to a prince or civil governor on behalf of the Roman treasury. Both κῆνσος and φόρος are, properly, direct taxes. The φόροι, strictly speaking, were taxes paid by agriculturists, the payment being generally made in kind, and were contrasted with the τέλη or customs collected by the publicans. The word κῆνσος, again, was originally used of the property register upon which taxation was calculated, and thence came to mean the capitation or poll tax (cf. D in Mk 12^{14} ἐπικεφάλαιον). In Mt 17^{24} the word tr. 'tribute' in AV and 'half-shekel' in RV is the didrachmon. This sum every adult male Israelite had to pay to cover the cost of the public sacrifices at the temple. The 'stater' of v.^{27} was a tetradrachmon, equal to a whole shekel, and therefore payment for two. After the destruction of Jerusalem, Vespasian caused the Jews to pay this didrachmon tax for the support of the temple of Jupiter Capitolinus in Rome. Nerva, though not abolishing the tax, made it less offensive to the Jews by dissociating it from this heathenish use. See MONEY.

Cagnat, *Étude Historique sur les Impôts Indirects*, Paris, 1882; and Otto Hirschfeld, *Untersuchungen auf dem Gebiete der Röm. Verwaltungsgeschichte*, i. (down to Diocletian), Berlin, 1877.

J. MACPHERSON.

TRIBUTE MONEY, τὸ νόμισμα τοῦ κήνσου (Mt 22^{19}), the coin used in payment of the imperial taxes. The phrase literally means 'the lawful money of the tax.' The tribute had to be paid in the current coin of the realm. See MONEY.

TRIPOLIS (ἡ Τρίπολις).—A city of Syria, at which Demetrius Soter landed with an army when he wrested the kingdom from his cousin Antiochus V. (2 Mac 14^{1}; *Ant.* XII. x. 1). It was to Tripolis that Antiochus Cyzicenus retired after being defeated by Hyrcanus (*Ant.* XIII. x. 2).

Tripolis was a maritime town of Phœnicia, and a member of the Phœnician league. Its Phœnician name, and the date of its foundation, are unknown; but it must have been founded some time after Aradus. Each of the principal Phœnician cities, Tyre, Zidon, and Aradus, had its separate quarter at Tripolis, and hence the name—'the three cities.' Little is known of its early history, but, from its position near the western end of the 'entrance of Hamath,' it must have been a place of commercial importance. It was adorned with stately buildings by the Seleucids and the Romans, and a gymnasium was built there by Herod the Great (Jos. *BJ* I. xxi. 11). When Tripolis was besieged by the Arabs, most of the inhabitants escaped by sea, and after its capture it was colonized with Persians and Jews. Even in A.D. 1047, Nâsir-i-Khusrau writes that all the Moslems belonged to the Shi'ah sect. Tripolis was taken by the Crusaders (A.D. 1109), when a valuable library was burned. Under the Franks there was a large silk industry, which was destroyed when the place was captured by the Egyptians (A.D. 1289). At this time Tripolis occupied its original position on the seashore; but the constant attacks of the Franks created such a feeling of insecurity that in 1366 a new town, the present *Tarâbulûs*, was founded about 2 miles inland, on higher ground on the banks of the *Nahr Kadisha*. The old town had the sea on three sides, and on the fourth it was protected by a wide, deep ditch. Hardly a trace of its great buildings remains; war and a succession of severe earthquakes have destroyed everything. The site is now occupied by *el-Mîna*, the seaport of *Tarâbulûs*, which has a large and increasing trade. The plain between old and new Tripolis is still remarkable for the exuberant fertility which attracted the attention of all mediæval pilgrims and travellers.

C. W. WILSON.

TROAS (Τρῳάς, or more correctly Ἀλεξάνδρεια ἡ Τρῳάς) was a city on the Ægean coast of Asia Minor, opposite the small island of Tenedos. The district in which it was situated was sometimes called as a whole Troas, and is in modern times generally called the Troad; it was the north-western part of the land of Mysia. A city was founded on the site by Antigonus, and called Antigonia Troas: the people of Skepsis, Cebren, Hamaxitus, and other towns were settled there. In 300 Lysimachus refounded and renamed the city Alexandria Troas. It was for a time under the dominion of the Seleucid kings of Syria; and there are coins of Antiochus II. Theos (B.C. 261–246) struck at Troas. As Seleucid power waned, it gained its freedom and began to strike its own coinage. Many tetradrachms ΑΛΕΞΑΝΔΡΕΩΝ with the head and name of Apollo Smintheus were coined there from about B.C. 164 to 65; they are all dated from an era whose first year was probably about B.C. 300, when Alexandria was founded.* The Pergamenian rule, under which it must have passed, was not, like the Seleucid, destructive to freedom; and the same was true of the Roman dominion, under which the city passed in B.C. 133.

The Romans cherished a peculiarly warm feeling towards Troas, on account of their Trojan origin, a legend in which they had come to believe thoroughly; their favour for Ilium on the same ground is well known. Alexandria was made a Roman Colonia by Augustus, under the name Colonia Augusta Alexandria Troas (to which under Caracalla the titles Aurelia Antoniniana were added). It possessed the *jus Italicum*, *i.e.* the Italian privileges in the tenure and ownership of land, along with immunity from poll-tax and land-tax (*immunitas*), and freedom from the command of the governor of the province (*libertas*). It had the ordinary colonial constitution, chief magistrates called *duoviri*, and a senate of *decuriones*; and it was divided into 10 *vici*. Its citizens belonged to the Roman tribe Aniensis (not Sergia, as commonly stated), see Kubitschek, *Imp. Rom. tribut. descript.* p. 247. It became one of the greatest and largest cities of the north-west of Asia. In the coasting voyage system of ancient navigation, it was the harbour to and from which the communication between Asia and Macedonia was directed (cf. Ac 16^8 20^5, 2 Co 2^{12}). Owing to the greatness of Troas and its legendary connexion with the foundation of Rome, the idea was actually entertained by Julius Cæsar of transferring thither the centre of government from Rome (Suet. *Jul.* 79); and some similar scheme was still not wholly forgotten when Horace protested against it in *Od.* iii. 3. Hadrian probably visited Troas,† and it was perhaps his interest in it that led the wealthy and politic Herodes Atticus‡ to build there an aqueduct (the ruins of which were imposing in very recent times) and baths.

Finally, that dream of the early empire may have had some influence on Constantine, who (as Gibbon says), 'before he gave a just preference to the situation of Byzantium, had conceived the design of erecting the seat of empire on this celebrated spot, from which the Romans derived their fabulous origin.' In view of these fanciful but really cherished schemes, it is interesting to observe that the modern name is Eski-Stamboul, 'Old Stambul,' while Constantinople is Stamboul simply.

The great sanctuary of the Alexandrian State was the temple of Apollo Smintheus, near the coast, about twelve miles south of the city; it was originally in the territory of Hamaxitus, and Alexandria inherited the temple along with the people of that town. The symbol of this god was the mouse (or rat), which often appears on the coins of Troas.

The route followed by St. Paul, with Silas and Timothy, from the Bithynian frontier near Dorylaion or Kotiaion, brought the party to the coast at Troas (Ac 16^{6-8}). There can be little doubt that this road led down the Rhyndacus valley past the hot springs Artemaia, sacred to Artemis, on the river Aiscpos.§ In the *Acta Philetœri* (*Acta Sanctorum*, 19 May, p. 312 ff.) the tradition (which is clearly older than the *Acta*) is recorded that the church at a village Poketos, between the Rhyndacus and Cyzicus, was dedicated by Paul and Silas when they visited Troas. This tradition probably relates to this journey (though it might seem not impossible that it relates to the visit of Paul [Silas is not mentioned] to Troas in 2 Co 2^{12}), and embodies a belief that Paul preached in Mysia on this journey, conformably to which belief the Western reading in Ac 16^6 has διελθόντες τὴν Μυσίαν, where ℵAB, etc., have παρελθόντες, 'neglecting,' *i.e.* passing through without preaching in Mysia (on account of the prohibition to evangelize the province Asia, of which Mysia was part, Ac 16^6). Here the Western reading and the local tradition seem to form a later and secondary interpretation, which tended to obscure and expel the true Lukan reading. The 'open door' at Troas (2 Co 2^{12}) implies either that great facility for mission work was found in the city, or that the city was the entrance of a good avenue to reach the country around and behind (compare the similar door at PHILADELPHIA).

LITERATURE.—On Troas see the travels of Chandler, Fellows, etc., also an article in *Mittheilungen d. d. Instituts zu Athen*, ix. 36; Choiseul Gouffier, *Voyage Pittoresque*, ii. 434; le Bas-Waddington, iii. 1035–1037, 1730–1740; Wroth in *Catalogue British Museum, Coins of Troad, Aeolis, etc.*; *CIG* 3577–3594; *CIL* iii. 384–392.

W. M. RAMSAY.

TROGYLLIUM (Τρωγύλλιον).—According to the AV of Ac 20^{15}, which follows cod. D, the ship in which St. Paul sailed, when on his way to Cæsarea and Jerusalem at the close of his third missionary journey, 'tarried at Trogyllium' after touching at Samos, and before sailing on the following day to Miletus. The principal MSS (ℵ, A, B, C) omit the words 'tarried at Trogyllium.' The addition in D was possibly founded on a tradition that survived in the churches of Asia, and gives a detail which in itself is highly probable (cf. Ramsay, *St. Paul the Trav.* p. 294).

The promontory of Trogyllium projects from the mainland of Asia Minor, and overlaps the eastern extremity of Samos so as to form a strait less than a mile wide between the two promontories. Through this strait St. Paul sailed, and it is natural to suppose that the ship may have anchored for the night under the lee of Trogyllium, either because the wind had dropped, or because there was no moon. A little to the E. of the end of the promontory, not more than a mile from Samos, there is an anchorage still called 'St. Paul's Port' (Conybeare and Howson, *Life and Epp. of St. Paul*, xx. n.). Ramsay has pointed out (*Ch. in Rom. Empire*, 155 n.) that the voyage of St. Willibald is an apt illustration of that of St. Paul, and that his 'Strobolis on a high mountain' is Trogyllium.

C. W. WILSON.

TROPHIMUS (Τρόφιμος).—One of St. Paul's companions (Ac 20^4), called with Tychicus Ἀσιανοί. These two disciples, with others, travelled with the apostle from Macedonia to Asia, and preceded St. Paul to Troas in his third missionary journey. From thence Trophimus must have accompanied St. Paul to Jerusalem. He was an Ephesian (Ac 21^{29}), and the riot raised against St. Paul in Jerusalem was made chiefly on the ground that he had introduced Trophimus, a Gentile, into the temple. The only other passage in the NT where his name occurs is 2 Ti 4^{20}, where St. Paul says, 'Trophimus I left at Miletus sick.' It is to be noted that St. Paul had also sent Tychicus to Ephesus (2 Ti 4^{12}). This must have happened after St. Paul's first imprisonment. Trophimus has been identified with one of the companions of Titus who with Titus carried the 2nd Epistle to the Corinthians from Ephesus to Corinth (2 Co 8^{16-24}). The Greek *Menology* celebrates Trophimus on April 14 with Aristarchus and Pudens, and asserts that they were of the Seventy, and suffered martyrdom at Rome under Nero.

(For the identification of Trophimus with the disciple in 2 Co 8^{18} see Stanley on *2 Cor.* 2nd ed. p. 492).

H. A. REDPATH.

---

* Another suggestion is that the Seleucid State era, beginning B.C. 312, was used at Troas; but all the dated coins were struck after Troas had been included in the Pergamenian realm, and the use of the Seleucid era then, though possible, seems improbable.

† The inscription, *CIL* iii. 466, quoted in proof by Durr (*Reisen des K. Hadrians*, p. 55), affords no evidence. But Hadrian certainly visited Ilium and probably Lesbos (*per Asiam et insulas*, Spart.); and Troas lay between them.

‡ Probably A.D. 132–135, when he was *legatus* to improve the condition of the free cities of Asia (Philostr. *Vit. Soph.* I. xxv. 13).

§ Ramsay, *St. Paul the Trav.* p. 197. A different theory of route was stated by Mr. Munro in the *Geographical Journal*, Feb. 1897, p. 169 f., but afterwards abandoned by him (*Journal of Hell. Studies*, 1901, p. 235).

TROW.—The Eng. verb to 'trow' is the same in origin as 'true' and 'trust.' Its earliest meaning is to believe or trust, as Archbp. Hamilton's *Catechism*, xxv, 'He that trowis and fermely beleiffis in the sone of God, hais evirlastand lyfe, in this warld in hoip, and in the warld to cum in deid'; also p. xxx, 'Thai suld trow the artikillis of thair Crede'; and Mandeville, *Travels*, 13, '*Jesu Christus nascetur de Virgine Maria, et ego credo in eum*, that is to say, Jesu Christ shall be born of the Virgin Mary, and I trow in him.' But through degeneration the word came to signify no more than *think* or *suppose*, as Lk 8^{25} Rhem. 'Who is this (trow ye) that he commaundeth both the windes and the sea, and they obey him?'; Ac 8^{30} Rhem. 'Trowest thou that thou understandest the things which thou readest?' This is the meaning in Lk 17^{9}, the only occurrence of the word in AV, 'Doth he thank that servant because he did the things that were commanded him? I trow not' (*οὐ δοκῶ*; edd. and RV omit). J. HASTINGS.

TRUMPET (including Feast of Trumpets and New Year).—Among the wind instruments of the Hebrews (see MUSIC, § 2, *e* and *f*) were two, *shōphār* and *ḥăẓōẓĕrah*, which are variously rendered in AV by 'trumpet,' 'trump,' and 'cornet.' The more ancient of these, especially used for *secular* purposes, except in P, was the horn or *shōphār* (LXX *κερατίνη* or *σάλπιγξ*). The latter word is used by Philo, who describes the feast of the 1st of Tishri as the feast of the *σάλπιγγες* (Wendland, *Neuentdeckte Fragmente Philo's*, p. 11; Schürer, *GJV*³ ii. p. 450).

The Heb. name שׁוֹפָר is probably derived from a root meaning *to be bright*, in reference to the clear, sharp, piercing tone of the instrument. That it was made of horn is attested not only by the tradition of the synagogue, but also by the interchange between שׁוֹפָר and קֶרֶן ('horn'); see Jos $6^{4.5}$. As, moreover, the word יוֹבֵל ('ram,' whence 'Jubilee,' see SABBATICAL YEAR) is often associated with *shōphār*, the original instrument was probably made of a ram's horn (cf. Nowack, *Heb. Arch.* i. 277). Some authorities suggest that possibly in later times an instrument of similar shape was made of *metal* (Benzinger, *Heb. Arch.* 277; Kirkpatrick on Ps 98^{6} etc.). The modern synagogue, which still uses the *shōphār* in the months of Elul and Tishri, preferentially employs the ram's horn, but the Mishna (*Rosh Hashana* iii. 2) permits the use of the horn of any (clean) animal *except the cow.* Driver (*Joel and Amos*, p. 144) defines the biblical *shōphār*, however, as 'the curved horn of a cow or ram.' The Mishna (*ib.* § 3) specially mentions the straight horn of the ibex as used in the temple. The common crook form is pictured in vol. ii. p. 462, but Asiatic Jews prefer spiral forms similar to the trumpets of the Hindu priests. Among the exhibits at the Anglo-Jewish Exhibition (1887, *Catalogue*, p. 97, beautifully illustrated by Frank Haes, Edition de Luxe) was one from Aden, made from the splendid horn of the koodoo (cf. F. L. Cohen, *Jewish Chronicle*, Sept. 1, 1899, p. 25). Thus the *shōphār*, though preferentially made in Western lands of the ram's horn, may be constructed of the horn of any sheep, goat, or antelope, growing separately from its core, and it 'varies in shape from absolute straightness through a gradual curve to the spiral.' The crook is preferred, not, as modern Jewish homilists hold, for symbolical reasons, but 'because of the same acoustic effects consequent on such a curve, as decided the form of the ancient Roman cavalry trumpet, or the modern saxophone. The trumpet of the Roman cavalry was, indeed, only a large *shōphār*, elegantly fashioned in bronze' (Cohen, *ib.*).

The ancient preferential use of the ram's horn was strengthened by the association of the Day of the Trumpet (1st of Tishri) in later Jewish ritual with the narrative of the offering of Isaac (Gn 22^{13}. The whole chapter is read in the synagogues on the 2nd of Tishri, and references to the incident abound in the ritual of the festival). The horns now used are sometimes carved, and adorned with golden crowns and Hebrew inscriptions, but no metallic attachment is permitted at the mouthpiece (*Shulchan Aruch*, *Orach Chayim*, § 585 ff. For an excellent account of the construction of the *shōphār*, with illustrations, see C. Adler, *Proceedings of the U.S. Museum*, xvi. 287–301; Reports, 1892, 437–450; 1899, p. 548).

As in the modern synagogue, so in the Bible, the *shōphār* is associated (together with certain special offerings, Nu 29^{2-6}) with the feast held on the new moon (see NEW MOON) of the seventh month. This feast is an addition to the Calendar of the Feasts in P (Lv 23^{23-25}, Nu 29^{1-6}). 'In the seventh month, on the first day of the month, shall be a solemn rest unto you (זִכְרוֹן תְּרוּעָה), a memorial of blowing of trumpets' (Lv 23^{24}). 'It is יוֹם תְּרוּעָה, a day of blowing of trumpets unto you.' Thus the precise instrument is not named in the Hebrew (LXX has *σαλπίγγων* in Lev., whence the plural 'trumpets' in AV. The synagogue uses only one instrument. In Num. the LXX has simply *ἡμέρα σημασίας*—'a day of signalling'), but the *shōphār* is obviously intended, for the term *tĕrûah*, though also used of the *ḥăẓōẓĕrah* (Nu 10^{5}) and the cymbal (Ps 150^{5}), is connected with the *shōphār* in several passages (see esp. Lv 25^{9}, a passage on which the Mishna rightly relies). The exact musical notes intended are unknown; indeed the rude horn has no precise note, and various examples not only differ in this respect from one another, but from one and the same *shōphār* very different effects are produceable. Greater attention was probably paid to rhythm and length than to the actual musical sounds, and this is still the case. 'Any sound is satisfactory,' runs the Rabbinical prescript, but tradition confesses itself unable to be more precise. In the Bible various terms are used: תָּקַע (whence the term תָּקוֹעַ Ezk 7^{14} for 'trumpet,' and the New Heb. *tĕḳîah* for a *note* on the same instrument) *to smite*, hence *to produce a sharp, clear note*; מָשַׁךְ *to draw out* or *prolong* (whence perhaps the *tĕḳîah gĕdōlah*, or great *tĕḳîah* of the modern synagogue; cf., however, Is 27^{13}); and הֵרִיעַ (whence the biblical *tĕrûah*) *to produce a trembling, vibratory note, or a series of quick blasts.*

The Rabbinical ritual, unable to identify the biblical notes, prescribed three sounds: the simple *tĕḳîah*, the *tĕrûah* produced by vibrating the lips and not the *shōphār*, and the *shĕbārîm* or three short *broken* notes. The *ba'al tōḳēah*, who blows the *shōphār*, utters the benediction, 'Blessed art thou O Lord our God, King of the Universe, who hast sanctified us by thy commandments and commanded us to hear the sound of the *shōphār*.' The number of distinct notes varies in different rites (from 30 to 100). A whole section of the *mûsaph* or additional service of the Day of the Trumpet is known as the *shōphārōth* (Mishna, *Rosh Hashana*, iv. 5); it consists of a collection of scriptural passages in which the *shōphār* is mentioned (see Singer, *Authorized Daily Prayer-Book*, p. 252; and on the New Year Liturgy, Friedmann in *JQR* i. 62). These passages refer chiefly to the giving of the Law at Sinai and to the future redemption, and the association of the *shōphār* with the latter event often occurs in the NT ('Last trump,' 1 Co 15^{52}; cf. 1 Th 4^{16}, Mt 24^{31}, 2 Es 6^{23}, and Is 27^{13}, Zec 9^{14}). Thus the *shōphār* plays its part not only in the biblical feast, but also in the general scheme of the later New Year celebrations.

The festival has, from early Rabbinical times, been known as רֹאשׁ הַשָּׁנָה (New Year; see TIME), יוֹם הַזִּכָּרוֹן ('Day of Memorial'; cf. Lv 23^{24}), and יוֹם הַדִּין ('Day of Judgment'). The festival has been spiritualized into a solemn day of self-introspection, and the *shōphār* is regarded as a signal, calling to inner and outward repentance.

In anticipation of the feast itself, the *shōphār* is with this object sounded in many synagogues throughout the previous month Elul, morning and evening, with the exception of the Sabbaths. (If the 1st of Tishri happen to fall on a Saturday, the *shōphār* is not sounded, except in certain Reformed Jewish congregations. In the temple the *shōphār* was of course sounded on the Sabbath). So, too, after the festival, the *shōphār* is sounded (among the Sephardic Jews) on the 7th day of Tabernacles (*Hosha'ana Rabba*) during the seven circuits of the palms. This last act completes the penitentiary cycle, which includes the Day of Atonement. The whole period is the most solemn in the modern Jewish Calendar, and it is noteworthy that Rabbinical Judaism has in this case, as in several others, developed the biblical prescriptions in a purely spiritual direction. One of the finest sections in Maimonides' Code (*Mishneh Torah*) is the section on Penitence (תְּשׁוּבָה 'return'), in which the ideas of a sense of sin, regret, and practical amendment are, on the basis of Rabbinical conceptions, combined into a remarkable and beautiful whole. It should be added that the עקידה or binding of Isaac on the altar plays in the liturgy of the synagogue for the New Year a rôle in some, though not in the most characteristic, aspects not unlike that of the Crucifixion in the theology and liturgy of the Christian Church.

The other uses of the *shōphār* are not easily discriminated from those of the *ḥăẓōẓĕrah*, and the two instruments must be considered in conjunction. The *ḥăẓōẓĕrah* differed from the *shōphār* in shape (see vol. iii. p. 462 f.), being nearly a yard long, a straight slender tube with a slight expansion at the mouth and a bell-shaped end (Jos. *Ant.* III. xii. 6 ; so Arch of Titus and Coins). It also differed in material, as it was made of metal ('beaten silver,' Nu 10^{2}). The *ḥăẓōẓĕrah* was the sacred clarion, and was closely connected (mostly in P and Chron.) with the later temple service as described in Chronicles. It was a more musical instrument than the *shōphār*, and was used almost exclusively by the priests. As a secular instrument, the *ḥăẓōẓĕrah* is mentioned in Hos 5^{8}, together with the *shōphār*, as used to signal the approach of an invading army. 'Previously to the Exile,' says Cheyne (*ad loc.*), 'the cornet (*shōphār*) and the trumpet (*ḥăẓōẓĕrah*) were probably different names for the same instrument, as the Law (Nu 10$^{1-10}$ 31^{6}) prescribes the use of the silver trumpet in cases when, according to the prophetic and historical books, the cornet or *shōphār* was used. In writings of post-captivity origin (Ps 98^{6}, 1 Ch 15^{28}, 2 Ch 15^{14}) they appear to represent different instruments, or rather slightly different varieties of the same instrument.' Perhaps in 2 K 11^{14} the *ḥăẓōẓĕrah* is a secular instrument (so *Oxford Hebrew Lex.* p. 348). Mostly it was the *shōphār* that was used in war as a signal either for assembly (Jg 3^{27}, 2 S 20^{1}), attack, or retreat (2 S 2^{28}). We cannot tell whether it was the *shōphār* or *ḥăẓōẓĕrah* that is referred to often in the Books of the Maccabees (*e.g.* 1 Mac 3^{54} σάλπιγξ, 4^{40} 'trumpeted with trumpets of signals,' 5^{31} etc.). The watchman blew the *shōphār* to raise an alarm or to indicate impending danger (Am 3^{6}, Jer 6^{1}, Ezk 33^{6}), and Moore (on Jg 6^{34}) renders *shōphār* by 'war-horn.' In the narrative of Gideon (Jg 7^{16}) there seems a large supply of horns in the camp, but in v.^{8} it is expressly said that the troops that were sent home left their horns with Gideon, thus enabling him to furnish each of his 300 men with a *shōphār* (see Moore, *Judges*, p. 203 ff.). In the Jubilee year the *shōphār* was sounded on the 10th of Tishri as a signal (Lv 25^{9} P), and this may be the origin of the synagogue usage to sound the *shōphār* on the conclusion of the Day of Atonement. Possibly, however, this is connected with the custom of sounding a trumpet (*ḥăẓōẓĕrah*) in the temple at the beginning and end of the Sabbath (T. Jerus. *Shabbath* xvii. 16*a* ; Bab. *Shabbath* 35*b* ; Jos. *Ant.* IV. ix. 12 : 'the top of the Pastophoria, where one of the priests usually stood and gave a signal beforehand in the evening with a trumpet at the beginning of every seventh day [Friday evening], as also in the evening when the sabbath day was finished, giving notice to the people when they were to leave off work, and when they were to go to work again').

Reverting to Bible times, a blast of trumpets announced an important event such as a royal accession (1 K 1$^{34. 39}$ the *shōphār* is named, but the *ḥăẓōẓĕrah* in 2 K 11^{14}), and the popular joy was aided in the same manner on other occasions (2 S 6^{15}, cf. Ps 47^{5}). Liturgically, the *ḥăẓōẓĕrah* was the priestly instrument *par excellence* (the Levites had several other instruments). The silver trumpets were blown at the beginning of each month (Nu 10^{10}), but the *shōphār* on the New Moon of Tishri (see Kirkpatrick's notes on Ps 81).

The Talmud (Mishna, *loc. cit.*; Talm. Bab. *Rosh Hashana* 26*b*) explains that the silver trumpets were not omitted on the 1st of Tishri, but that *besides* these a *shōphār* (of straight ibex horn with a golden mouthpiece—an addition unlawful except in the temple) was sounded, its notes being made to predominate over the trumpets.

The silver trumpets were sounded at the daily burnt-offering (2 Ch 29$^{26-28}$, Nu 10$^{1. 2. 10}$), and at the three pauses in the singing of the daily psalms (a later introduction) three blasts (nine in all) were sounded from the silver trumpets, and the people fell down and worshipped (2 Ch 29^{28} etc.). There seem to have been 7 trumpets in the Levitical orchestra (so Büchler, *ZATW*, 1899, p. 329, on basis of 1 Ch 15^{24}, Neh 12^{41}). On the prostration as signalled by the trumpets see also Sir 50$^{16. 17}$; Mishna, *Tamid* vii. 3. Trumpets were also used on semi-religious occasions of joy, and particularly at the Ceremony of the Water-Drawing at the Feast of Tabernacles (Mishna, *Succah* v. 4), a ceremony which is very ancient, and may even underlie Is 12^{3}.

I. ABRAHAMS.

TRUST.—See FAITH.

TRUTH.—The usage of Holy Scripture in respect to words expressive of the idea of 'truth,' in its broadest signification, is a point of considerable interest and importance. The study of it illustrates the influence of Hebrew training upon the writers of NT, and brings into relief characteristics of the ethical and religious thought both of OT and NT which are full of profound instruction.

i. THE OLD TESTAMENT.—The verb אָמַן—from which אֱמֶת and אֱמוּנָה, the words with which we are principally concerned, are derived—signifies to *support, sustain.*

In the Qal it is used of a nurse carrying a child (Nu 11^{12}, 2 S 4^{4}, Ru 4^{16}), and more generally of those who have the charge of rearing children (2 K 10$^{1. 5}$, Is 49^{23}, Est 2^{7}); in the Niphal, of those who are carried (Is 60^{4}). Again of that which is firmly founded, as 'a *sure* house' (1 S 2^{35} 25^{28}, 1 K 11^{38}, and cf. 2 S 7^{16}), of a firmly fixed nail (Is 22$^{23. 25}$), of national stability and prosperity (2 Ch 20^{20}, Is 7^{9}); of that which continues long (Dt 28^{59}); of waters that are unfailing (Is 33^{16}, Jer 15^{18}); of Samuel *established* as a prophet (1 S 3^{20}); of words being established—*i.e.* verified—, God's words through His prophets (1 Ch 17$^{23. 24}$, 2 Ch 1^{9} 6^{17}, Hos 5^{9}), and of the word of men (Gn 42^{20}), and, in a remarkable passage, of those who have a character for uttering sentiments that are true, showing knowledge of human life and its laws, etc. (Job 12^{20}); lastly, in a distinctly ethical sense, of one trustworthy in ordinary human relations (Pr 11^{13} 25^{13} 27^{6}, Neh 13^{13}, Is 8^{2}), or unswerving in his loyalty to Jehovah (Ps 78$^{8. 37}$), faithful in the fulfilment of a trust divinely committed (Nu 12^{7}, 1 S 2^{35} 22^{14}); also of God's faithfulness (Is 49^{7} 55^{3}, Jer 42^{5}, Dt 7^{9}, Ps 19^{7} 89^{28} 93^{5} 111^{7}).

The Hiphil has the sense *to put confidence in, to believe*, either specific declarations of God or of man (Gn 15^{6} 45^{26}, Is 53^{1}, Jon 3^{5} etc.), or persons, again either God (Dt 1^{32}, 2 Ch 20^{20} etc.) or man (Jg 11^{20}, 2 Ch 32^{15} etc.). Comp. also Job 39^{12} of putting confidence in the wild ox, and Job 4^{18} 15^{15} of God, 'He putteth no trust in his holy ones,' and Job 15^{31} 'to trust in vanity.' It is also used absol. Is 7^{9} 28^{16} etc. There are more special applications at Dt 28^{66}, Job 24^{22} 39^{24}.

The noun אָמְנָה *a pillar* (2 K 18^{16}) illustrates clearly the signification of the root. For the ethical idea connected with it we have analogies in נָכוֹן *made firm, fixed*, hence morally *directed aright, stedfast* ; and יַצִּיב (Aram.) *stable, true* ; cf. יְצַב (Aram.) *to make firm*, and Heb. הִתְיַצֵּב *to station oneself.*

The senses in which אֱמוּנָה is used correspond on the whole very closely with those of the verb, and so, to a considerable extent, do those of אֱמֶת. The former word, however, sometimes has a purely physical meaning : this the latter never has, while (unlike the former) it is also used to describe a quality of speech or thought in a manner not distinguishable from that in which the term 'truth' commonly is among ourselves. In the following analysis the two words will be taken together; this is most convenient, because their meanings overlap. But references to the former are printed in thick type.

1. *Steadiness*, **Ex 17^{12}** (on the construction see Ges.-K. § 141^{d}).

2. A *set*, or *fixed*, *office*, or perhaps a *trust* (as RVm in some places), **1 Ch $9^{22.26.31}$, 2 Ch $31^{15.18}$**.

3. *Loyalty to obligations and engagements*, *uprightness*, *honest dealing*, as between man and man, Jg $9^{15.16.19}$, **Ps 37^{3}, Jer $5^{1.3}$**; perhaps also Gn 42^{16}. אֱמֶת in this sense is frequently joined with חֶסֶד, kindness or mercy—so in Gn 24^{49} 47^{29}, Jos $2^{12.14}$, Pr 3^{3} 16^{6} (cf. also Pr 20^{28}, included under headings 5 and 9, for their conjunction as Divine attributes. For the general purport of the combination see the latter place).

4. *Honesty* and *fidelity* in respect to a charge committed to one, **2 K 12^{15} 22^{7}, 2 Ch 31^{12} 34^{12}**, Neh 7^{2}.

5. *Justice* in a specific sense, that which is in accordance with rights, Hos 4^{1}, Dn 8^{12}. So also **Pr 12^{17}** ('he that uttereth truth =declareth what is just'). Similarly **Jer 7^{28}**, Is 59^{4}. As a quality of judges and kings, **2 Ch 19^{9}**, Ex 18^{21}, Ezk 18^{8}, Pr 20^{28} 29^{14}. This characteristic is emphatically applied to the government of the Messianic king, **Is 11^{5}**, Ps 45^{4}, Is 16^{5} 42^{3}.

6. Of a state of true national well-being, which would be specially realized in the promised times, frequently coupled with 'peace.' As the Heb. for 'peace' implies *health*, *soundness*, so that for 'truth' implies *stability*. But the word 'truth' may also, from its associations, suggest a condition in which justice prevails in all social relations (**Is 33^{6}**, Ps $85^{10.11}$, Jer 33^{6}), also 'peace of truth,' *i.e.* '*assured* peace,' Jer 14^{13}, and more generally 2 K 20^{19}, Is 39^{8}, Est 9^{30}, Zec $8^{16.19}$.

7. *Faithfulness* to God, as shown by zeal for His worship, the avoidance of the worship of false gods, and diligence in keeping all His commandments. Justice between man and man is included, because He ordains it. Sometimes it is difficult to say whether most stress is laid on one or another part of this complex idea. The reference, however, seems, considering all the associations of the word, to be most often to the faithfulness shown in outward conduct, even in the phrase 'in truth'; other expressions in the same contexts refer to inward sincerity, Jos 24^{14}, Jer 2^{21} (cf. 'children that will not deal falsely,' Is 63^{8}) 4^{2}, **Ps 119^{30}** (cf. v.^{29}), 2 Ch 31^{20} 32^{1}, 1 S 12^{24}, 1 K 2^{4} 3^{6}, 2 K 20^{3}, Is 10^{20}. Yet at Ps 145^{18}, Is 48^{1} 'in truth'=*sincerely*, in contrast with hypocrisy. Cf. also Ps 51^{6}. The expression 'I have walked' or 'I will walk in thy truth' (Ps 26^{3} 86^{11}) may on the whole most probably belong to this heading; that is to say, 'Thy truth' may mean the faithfulness (towards Thee) which Thou hast appointed. But 'walking in God's truth' might also possibly mean 'walking in reliance on God's faithfulness.'

8. *Confidence*, *trust*, **Hab 2^{4}**; probably, however, the meaning here also is 'faithfulness' (RVm), in which case this passage should be placed under 3.

9. As a Divine attribute; (*a*) God's *constancy* to His people, the *faithfulness* with which He had fulfilled or would fulfil His covenant with Abraham and his descendants or with David (Gn 24^{27}, **Hos $2^{19.20}$**, Mic 7^{20}, **Ps $89^{1.2.5.8.15.24.33.49}$** 98^{3} 100^{5} **115^{1} 117^{2} $119^{42.121.130}$**); also in regard to all who serve Him (Gn 32^{10}, Ps 25^{10} 30^{9} $40^{10.11}$ 54^{5} $57^{3.10}$ 71^{22} 86^{15} 88^{11} 92^{2} 108^{4} 138^{2} $143^{1.2}$, Pr 14^{22}, Is $38^{18.19}$). It is also recognized that alike in the case of the nation (**La $3^{22.23}$**, Neh 9^{33}), and of the individual (**Ps 119^{75}**), calamities do not prove that God has failed in faithfulness. We meet, also, with the prayer or wish that God may show His truth (2 S 2^{6} 15^{20}, Ps 61^{7}). In the great majority of the passages, so far given under this head, חֶסֶד 'mercy' is coupled with 'truth.' These two words are doubtless to a certain extent complementary, the one as expressive of a free compassion and favour which is ever fresh, the other of a fidelity to promises. But there is a danger of pressing this contrast too far, as Wendt seems to do, *SK*, 1883, p. 520. When society was less organized and rights could be less easily enforced and were even less determinate, the spirit of mercy was often required to dictate the doing of truth (or justice). Moreover, love is at all times the true motive for the doing of justice, and no other is likely to suffice if it be a question of justice in those many relations of life with which law cannot interfere; while at the same time the action of true love must ever be controlled by the law of justice. This applies where the two words are conjoined in speaking of human action (see above, No. 3). But so, also, the thought that God's truth proceeded from His mere goodness is frequently suggested in OT, and, on the other hand, that His mercy is an exhibition of His truth. God's own love is closely associated with His righteousness (comp. the usage of the word צֶדֶק in OT; see also Ps 62^{12}). Some other combinations should be compared, esp. 'the light of God's countenance,' *i.e.* His favour and 'his truth' (Ps 25^{5} 43^{3}), 'his righteousness' and 'his truth' (Ps 40^{10}, Zec 8^{8}; cf. also **Dt 32^{4}**).

(*b*) Truth seems also to be contemplated more generally as one of the great elements in God's character, Ex 34^{6}, **Ps 36^{5} 119^{90}**. He is the true God, as contrasted with the false gods who are but lying vanities (Ps $31^{5.6}$, 2 Ch 15^{3}, and Jer 10^{10}, where 'the living God' is a parallel expression). Hence His works are wrought in faithfulness, Ps $33^{4.5}$ 111^{7} 19^{9} 69^{13}, Is 25^{1}. His commandments also are true in that they are firmly established, that they are not subject to change, that those who observe them will certainly be rewarded, and those who transgress them punished, **Ps 119^{86}, $119^{142.151.160}$**, Neh 9^{13}, **Pr 11^{18}**, Is 61^{8}.

10. Of the utterances of prophets (1 K 17^{24} 22^{16}, 2 Ch 18^{15}, Is 43^{9}, Jer 26^{15} 28^{9}); of a vision that does not mislead, Dn 8^{26} 10^{1}. 'The writing of truth' is the book of destiny, Dn 10^{21}; cf. 11^{2}.

11. Truth, in the sense in which we commonly employ the term, for the agreement between language and facts whatever these may be; 1 K 10^{6}, 2 Ch 9^{5}, Dt 13^{14} 17^{4} 22^{20}, Jer 9^{5}, Ps 15^{2} ('in his heart' here should be 'with his heart,' *i.e.* cordially, gladly), Pr 12^{19} 14^{25} 22^{21}.

12. Divine revelation (Mal 2^{6}, Dn 9^{13}); or that true philosophy, that knowledge of the order of the world and of life, to which the wise have in fuller or less measure attained (Pr 8^{7} 23^{23}, Ec 12^{10}); with this last sense cf. the use of the verb at Job 12^{20}.

[The noun אֵמֻן occurs in sing. at Dt 32^{20}, and in pl. at Pr 13^{17} 14^{5} 20^{6}, Is 26^{2} in sense 'faithfulness,' to which Ps 12^{1} 31^{23} should perhaps be added (so RVm); but in these two passages it may be pass. partic. of Qal, and mean 'the faithful' (so RV). אֹמֶן in Is 25^{1} is taken in same sense, but the phrase of which it forms part is thus rendered difficult, and the pointing may be wrong. On אָמֵן see AMEN].

In the case of both words it is easy in the vast majority of instances to trace the connexion with the signification of the root, which, ethically regarded, conveys the notion of constancy, steadfastness, faithfulness. But there are secondary meanings, and the precise train of ideas by which these were reached cannot be considered certain. Thus truth in the sense of civil justice—to which, in some passages at least, it approximates—may be derived from the general notion of faithfulness, and with this—when it is a question of a social state in which justice prevails—the notion of stability, which brings us still nearer to the original meaning of the root, may be united. Since not merely אֱמֶת but אֱמוּנָה is used in this way, some such explanation seems on the whole the most likely. Yet it may also be supposed that justice in giving or procuring judgment is called truth, simply as being in agreement with the facts. The same view of truth may also, with even more probability, be suggested, when it is predicated of speech or of thought. Nevertheless, the origin even of this application may have lain in the circumstance that truth-speaking is part of the character of a faithful man; or again, the intention may have been to describe words that are well founded, based upon facts, and therefore firm. This idea of an underlying reality may probably be traced in the use of the term to describe God's revealed will, or the knowledge of the wise. It may not be unnecessary to add a caution that we must not so insist on giving effect to the force of the root as to exclude other ideas which may have entered in the course of the history of the word, and thus to limit the range of its meaning.

Moreover, the various senses of a word, even after they have once been differentiated by custom, may act and react upon one another in their further use. And thus there can be little doubt that the conception formed of religious and intellectual truth must have been more or less affected by the various associations of the term which had come to be employed to designate it. In particular, the contemplation of truth as an attribute of the Divine nature and operations must in devout and reflective minds have promoted a comprehensive and profound view of the quality. It will be important to bear this in mind when we pass on to consider the meaning of 'truth' in the NT. First, however, we must briefly notice the usage of the LXX, whereby the Greek language itself, which the NT writers were to use, was in a measure re-minted.

The verb אָמַן—to pass over the ptcp. of Qal, meaning 'a nurse,' or having kindred significations to this—is represented by *πιστοῦν* (Niph.), *πιστεύειν* (Niph. and Hiph.), *πίστιν ἔχειν* (Niph.), *πιστὸς εἶναι*, or ptcp. *πιστός* (Niph.). אֱמוּנָה 20 times by *πίστις* and once adjectivally by *πιστός*, 22 times by *ἀλήθεια* (20 of these being in the Psalms, 8 in Ps 88 (89) alone; the other two are 2 Ch 19^{9}, Is 11^{5}), twice by *ἀληθινός* (Is 25^{1} 29^{4}). אֱמֶת in nearly four-fifths of the passages in which it occurs is rendered by ἀλήθεια, 12 times by ἀληθινός, a few times by ἀληθής and ἀληθῶς, 12 times by δικαιοσύνη or δίκαιος, and once by ἐλεημοσύνη.

The difference in the treatment of אֱמוּנָה and אֱמֶת shows a sense, which is up to a certain point correct, of the difference between them in meaning. One of the most instructive points, however, in connexion with our present subject is the practice of the LXX in regard to the rendering of the former word. Broadly speaking, πίστις or πιστός is used where it is a question of human character or conduct, ἀλήθεια and its derivatives with reference to Divine.

Πίστις is, however, attributed to God once, acc. to Q^{mg}, at La 3^{23}; the adverbial phrase ἐν πίστει is also used a few times of God, Ps 32 $(33)^4$, Hos 2^{20}, Jer 35 $(28)^9$ 39 $(32)^{41}$, and the epithet πιστός is applied to God, Dt 7^9 32^4, and to the Divine testimony, covenant, etc., Ps 18 $(19)^7$ 88 $(89)^{28}$ 110 $(111)^7$, Is 55^3. ἐν ἀληθείᾳ is used in a charge to judges, 2 Ch 19^9, ἀληθής of human character, Neh 7^2; a few other similar instances might be given; ἀλήθεια is used for אֱמוּנָה at Is 11^5 to describe an attribute of the Messianic king. It may be further noted here that πίστις is only once used to render אֱמֶת with reference to God, and there only in the phrase ἐν πίστει (Jer 31 $(32)^{41}$). πίστις at Pr 14^{22} refers, according to LXX, to men.

The idea of 'faithfulness' is, as a matter of fact, very prominent in OT in connexion with the Divine character, and is undoubtedly conveyed by the word אֱמוּנָה, used of God, and from this point of view would have been best represented by πίστις or πιστός. But the LXX translators seem to have felt that the ordinary associations with these words were too purely human. ἀλήθεια was a word of larger meaning, and, though the same ideas were not connected with it by reason of its derivation and history, it conveyed, even according to classical usage,—though especially, of course, that of the philosophical writers,—the notion, not simply of agreement between speech and fact, but of *reality*. This helped to make the word serviceable as a rendering alike of אֱמוּנָה and of אֱמֶת. At the same time, the new contexts into which it was brought could not fail to have an effect upon its signification. Its former use could scarcely make intelligible such expressions, for instance, as ἐξαποστέλλειν ἀλήθειαν (Ps 42 $(43)^3$ 55 $(57)^3$), or ποιεῖν ἀλήθειαν (said of God Gn 47^{29} etc., and of men Jos 2^{14} etc.). It is not, however, to be supposed that the translators either intended, or would have been able, to transfer to ἀλήθεια all the associations of the original words. But it acquired a connotation which was partly the result of its classical usage—for on this side, also, the biblical use received enrichment—partly of the Hebrew words for which it now stood. Lastly, the occurrence of ἡ ἀλήθεια repeatedly in books of the Apocrypha, in remarkable sayings, in the sense in which we have met with אֱמֶת two or three times in the Sapiential books of the Canon, for the sum of true knowledge, or Divine revelation, deserves to be noticed. *E.g.* see 1 Es 3^{12} $4^{35.41}$, Sir $4^{25.28}$.

The use of ἀληθής and ἀληθῶς in LXX need not detain us; there is nothing in the case of either that calls for special remark, with the exception that once the former is applied as an epithet of a man. But the use of ἀληθινός must be examined. The effect of the termination -ινος is to draw attention, as it were, to the presence of the quality denoted by the root, in that to which the epithet is applied. Sometimes ἀληθινός does not practically imply more than ἀληθής with a certain amount of emphasis on it, *e.g.* 3 (1) K 10^6. But in other places ἀληθινός signifies in a more specific manner that the thing is what it professes to be, or that it really corresponds to the idea of the name given to it. This seems to be the force of the word at 2 Ch 15^3—'for a long while there was in Israel no God who was truly such.' But this sense is not common in LXX. Again, it expresses the notion of trustworthiness as an attribute of persons, or of their habitual words and deeds. Evidently, this imports something deeper than simply the truth of a particular saying or report can. This appears to be the commonest meaning in the LXX, and we can trace in this the influence of the Hebrew (*e.g.* Ps 18 $(19)^9$ 85 $(86)^{15}$, Is 59^4, Jer 2^{21}). In Zec 8^3—κληθήσεται ἡ Ἰερουσαλὴμ πόλις ἡ ἀληθινή—there is not specially the idea of trustworthiness, but it is asserted that the character of Jerusalem should be that of a city full of truth.

ii. THE NEW TESTAMENT.—In NT the conception of 'truth,' while it retains traces of its previous biblical history, is greatly enlarged and deepened, especially in the writings of St. Paul and St. John. It will be most convenient and instructive to examine the idea separately, in the first instance, in different writers or groups of writings. The Synoptics and Acts will form one such group, which will not detain us long. Next, we will take the Epp. of St. Paul. Epistles other than those of St. Paul and St. John may most suitably be considered immediately after those of St. Paul, as their usage resembles his, on the whole, most nearly. Lastly, we will take the Johannine writings; the idea of truth in these, or, to speak more accurately, in the Gospel and the Epp., has important elements in common with that in St. Paul, but there are also significant traits characteristic of each writer.

1. *Synoptics and Acts.*—The few instances of the occurrence of ἀλήθεια and its congeners have little that is distinctive about them. It will suffice to notice (*a*) the use of ἀληθής to describe character, not simply speech or doctrine, Mt 22^{16}=Mk 12^{14}; (*b*) ἐπ' ἀληθείας and ἀληθῶς in the mouth of Christ (Lk 4^{25} 9^{27} 12^{44}), where it may be compared with His use of Ἀμήν, and is probably a Greek equivalent for that word, and doubtless is intended to convey the same earnestness of asseveration; (*c*) τὸ ἀληθινόν, of the true riches (Lk 16^{11}), where we cannot but be reminded of the use of ἀληθινός in regard to the true bread, light, etc., in the Fourth Gospel, which must be considered presently.

We do not find in this group of writings any examples of πιστός used of God or Christ, or of πίστις as a Divine attribute.

2. *Epp. of St. Paul.*—i. There are two passages (Ro 3^7 15^8) in which ἀλήθεια signifies the Divine characteristic of *fidelity*, just as אֱמֶת and אֱמוּנָה so frequently do in OT. In the context of the former place, vv.$^{3.7}$, πίστις as an attribute of God, and the contrast between it and human ἀπιστία should be observed, also that between ἀληθής and ψευστής, ἀλήθεια and ψεῦσμα, and that which is implied between ἀλήθεια and ἀδικία. At the same time there is ground for Cremer's remark, that the substitution of ἀλήθεια for πίστις as the argument proceeds, shows that ἀλήθ. is the word of larger meaning.

πιστός is strikingly used by St. Paul as an epithet of God in connexion with the thought of the new pledges which God has given in Christ and through the mouth of His servants and the work of the Spirit. See esp. 1 Co 1^9, 1 Th 5^{24}, also (where the reference may be more general), 1 Co 10^{13}, 2 Th 3^3, 2 Ti 2^{13}. The same quality of fidelity and trustworthiness is attributed, it would seem, to Christ at 2 Co 11^{10}, where the apostle claims that this ἀληθ. Χριστοῦ is reflected in himself, Christ's servant. Cf. also Ro 9^1, and consider as illustrating the thought 2 Co 1^{18-20}. At Eph 4^{21} καθώς ἔστιν ἀλήθεια ἐν τῷ Ἰησοῦ has a somewhat different force (see below).

ii. But far more commonly ἀλήθεια, generally with the def. art. prefixed, denotes not a quality of a person, Divine or human, but a body of doctrine, though it is always the ascertained will of God which is so designated. In Ro $1^{18.25}$ $2^{8.20}$ it refers to Divine truth, imparted to man through reason and conscience and the laws of nature, as well as in a more specific manner to the Jews. But far more often St. Paul describes thereby the Divine revelation in Christ, the substance of the apostolic message, the gospel. See esp. Eph 1^{13}, where 'the word of the truth' is placed in apposition with 'the gospel of your salvation.' See also 1 Ti 3^{15} 6^5, 2 Ti $2^{15.18}$ 3^8 4^4, Tit 1^{14}, in all which places 'the truth' is plainly contemplated as in some sense formulated. It is to be believed (2 Th $2^{12.13}$), known (1 Ti 2^4 4^3, 2 Ti 2^{25}, Tit 1^1), loved (2 Th 2^{10}). On comparing these passages it must be evident that ἡ ἀλήθ. τ. εὐαγγ. (Gal $2^{5.14}$, Col 1^5) likewise means not the truthfulness of the gospel, but 'that truth which is set forth in the gospel.' At 2 Co 4^2 13^8 also 'the truth' seems to have the same meaning.

In several passages where the def. art. is omitted, this same object appears to be intended, and the purpose of the omission is only to lay special stress upon its character as truth (2 Co 6^7, Gal 5^7, 2 Th 2^{13}, 1 Ti 2^4, 2 Ti 2^{25} 3^7). At 1 Ti 2^7 also—διδάσκαλος ἐθνῶν ἐν πίστει καὶ ἀληθείᾳ—the πίστις and the ἀλήθεια seem each to be the subject-matter of St. Paul's teaching presented under two different aspects. So, again, at Eph 4^{21} there is plainly a reference to knowledge that has been imparted in the words, 'Ye did not so learn Christ if so be that ye heard him, and were taught in him, even as truth is in Jesus.' But the moral characteristics and contents and effects of the doctrine appear clearly from the context. St. Paul declares that the true reception of it must render it impossible for them to practise sins that were common among the Gentiles. And he goes on to speak of the old man as, on the other hand, 'waxing corrupt after the lusts of deceit,' while truth is one of the determining principles of the whole nature of the new man: 'After God' he 'hath been created in righteousness and holiness of truth.'

The ethical qualities of 'the truth' may be not less forcibly illustrated from some of the passages enumerated above in which the def. art. is used. 'The truth' commends itself not merely to the intellect but to the conscience of man, by what it is (2 Co 4^{2}). The principle that is most directly adverse to it is ἀδικία (Ro 2^{8}, 2 Th 2$^{10.12}$), the very same that is contrasted with δικαιοσύνη as an attribute of God (Ro 3^{5}). The strength of the apostle and his fellow-workers lies solely in the power which is inherent in that which they teach by virtue of its nature (2 Co 13^{8}), and the sense of this lays them under the obligation to practise the utmost sincerity in word and deed (2 Co 4^{2} 6^{7} 13^{8}).

iii. As might be expected from what we have already seen, St. Paul shows a high sense of the value of truth as an ordinary human virtue (1 Co 5^{8}, 2 Co 7^{14} 12^{6}, Eph 4^{25} 5^{9} 6^{14}, 1 Ti 2^{7}).

iv. ἀληθινός occurs but once in the Epp. of St. Paul, at 1 Th 1^{9}, as an epithet of God. It marks out the God who is really God in contrast with false gods. (Cf. in LXX 2 Ch 15^{3} and Is 65^{16}).

3. *Epistles other than those of St. Paul and St. John.*—Ἀλήθεια occurs 7 times in this group (He 10^{26}, Ja 1^{18} 3^{14} 5^{19}, 1 P 1^{22}, 2 P 1^{12} 2^{2}), and appears in every instance to mean, as in 2 ii. above, the doctrine delivered by the apostles of Christ. Several of the same characteristics of this 'truth' might be illustrated from them. The Divine attribute of 'faithfulness' is asserted in 1 P 4^{19}, not only, as in OT or as by St. Paul, in regard to those who have been brought into a new relation to God 'in Christ,' but still more largely in the unique and remarkable phrase πιστὸς κτίστης.

Before we pass on we must note the use in Ep. to Heb. of ἀληθινός in regard to the heavenly archetypes of the tabernacle and sanctuary of the old covenant (8^{2} 9^{24}). At 10^{22}, where it is applied to καρδία, its force may be expressed by 'thoroughly true' (cf. Is 38^{3}, and see below 4 iii.).

4. *The Johannine writings.*—i. Ἀλήθεια is used a few times for a simple quality inherent in a person (Jn 4$^{23.24}$ 8^{44}; there does not seem to be any other clear instance).

ii. Most commonly that is signified by it, the knowledge of which is of all knowledge the most necessary for man, and which was made known in and through Christ in a way that it never had been before. The connexion between 'the word' that is taught and 'the truth' appears 8$^{31.32}$ and 17^{17}, and the evangelist declares that 'the truth came through Jesus Christ' (1^{17}).

A portion of it only could be communicated by Christ to His disciples during His time on earth, because they were unprepared to receive it. And it can never be fully comprised in any formulas. Nothing could show this more clearly than its identification with a person—with Christ Himself (Jn 14^{6}). Moreover, it evidently has intimate relations with the ideas of 'the light' and 'the life' by which He is also described. The manifestation of the truth gives light; the inward appropriation of it brings life. After the withdrawal of the visible presence of Christ it was to be the office of the other Paraclete, who was promised, to teach the truth (Jn 16^{13}). He is called 'the Spirit of the Truth' (Jn 14^{17} 15^{26} 16^{13}, 1 Jn 4^{6}), chiefly, perhaps, because of this function which He is to discharge, but partly also, it may be, on account of its very nature; for the spiritual is pre-eminently the true, the real (cf. Jn 4$^{23.24}$). It is even said of the Spirit, as well as of the Christ, that He is 'the Truth' (1 Jn 5^{6}). Yet His relation to the Truth as revealed in Christ is carefully defined (Jn 16$^{13-16}$).

The truth has been and is commended through testimony,—that of the Baptist (Jn 5^{33}), that of Christ Himself (8^{40} 18^{37}); and the testimony is believed by those in whom there is a right moral disposition (*ib.* cf. also 3^{21}). The function of the Spirit, too, is described as 'bearing witness' (1 Jn 5^{7}). His witness must be primarily inward, to the human spirit; yet it is to be remembered that He acts upon each individual not only directly, but through others, and through the whole Body of Christ.

If a certain moral aptitude is a condition for receiving the truth, so also, when received, it has profound moral effects. It makes free (Jn 8^{32}). The recognition of the truth and conformity to it brings man's being into the state meant for it; the discords and contradictions involved in a state of sin are removed. This freedom is described from another point of view as holiness (17^{19}).

In 1 John the truth in action and thought and character is contrasted with viciousness in conduct and hollow self-complacency (1 Jn 1$^{6.8}$ 2^{4} 3^{19}). But even in such passages the truth is not to be thought of merely as a quality, the presence or absence of which in human characters may be noted. Rather it is the same truth which is elsewhere regarded as an object of knowledge, considered here in its practical consequences. The unity of thought, the prevalence of the same dominant ideas, throughout the Johannine Gospel and Epp., are decisive for this view. And indeed we can sometimes mark the more absolute and the more concrete meanings of truth passing, as it were, the one into the other, as in 1 Jn 2^{4}, where it is implied that the commandments of Christ furnish the norm for truth of life. Again, where we observe similarity with OT language,—as in Jn 1$^{14.17}$ (cf. חֶסֶד joined with אֱמֶת and אֱמוּנָה Ps 40^{11} 85^{10} etc., in LXX ἔλεος καὶ ἀλήθ.), and ποιεῖν τὴν ἀλήθειαν, 1 Jn 1^{6} (cf. Neh 9^{33} etc.),—though the form of expression has doubtless been derived thence, other considerations must also be borne in mind in determining the meaning. Indeed in the former of these examples the substitution of χάρις for ἔλεος employed by LXX should warn us to do this, as Cremer points out.

iii. Ἀληθινός, which occurs but 5 times in the remainder of NT, is common in the Johannine writings, and adds materially to the prominence of the idea of truth in them. It is unquestionably used sometimes in the Gospel and First Ep. to signify that a thing truly corresponds to the idea of the name given to it (Jn 1^{9} 4^{23} 6^{32} 15^{1}, 1 Jn 2^{8}). Some writers try to bring all the applications of it under this head. Thus Jn 7^{28}—ἔστιν ἀληθινὸς ὁ πέμψας με—is explained by Bp. Westcott as meaning 'one who completely satisfies the conception of a sender . . . God is described as true, not merely in so far as He gave a true message, but as one who really sent a messenger; a real Father, as it were, sending a real Son.' [He 10^{22} ἀληθινῆς καρδίας—he renders 'a heart which fulfils the ideal office of the heart']. But such a thought seems in many cases too far-fetched. In particular, when applied to persons, it is more natural to take ἀληθινος to mean 'full of the quality of ἀλήθεια.' Where it is an epithet of κρίσις (Jn 8^{16}) or of μαρτυρία (19^{35}), it is a little more difficult to decide between the two views of its force, chiefly because they so nearly approximate. Judgment or testimony, which fulfils the idea expressed by the term, must be judgment or testimony which has the quality of, and corresponds with, truth. Yet the latter explanation is to be preferred as the simpler. This seems to be the force of the word in all the 10 places in which it occurs in the Apocalypse (3$^{7.14}$ 6^{10} 15^{3} 16^{7} 19$^{2.9.11}$ 21^{5} 22^{6}), in which it is generally combined with other adjectives—ἅγιος, δίκαιος, πιστός—and used to describe God or Christ, or the Divine ways, words, judgments. Ἀληθινός in this use of the word differs from πιστός only in having a somewhat larger meaning. On the other hand, at 1 Jn 5^{20}, in the concluding words of the verse, οὗτος ἐστιν ὁ ἀληθινὸς Θεός, 'the true God,' has the same meaning as at 1 Th 1^{9} (see above, 2 iv.), viz. as distinguished from false gods; and this may therefore be the meaning of ἀληθινός in the two preceding cases in the same verse, though the other shade of meaning would seem natural, especially in the second of them.

Whereas, then, in OT 'truth' is mainly thought of as a quality inherent in God or in men, especially the quality of steadfastness or fidelity, it is used commonly in NT in a more detached and larger sense for the real, that which indeed is, and which it is the proper function of the mind of man to occupy itself with and to apprehend. At the same time, this 'truth' does not appeal solely to the intellect. That it may be received, the moral dispositions of men must correspond with it; and its reception will further take effect upon character. In conforming himself to it in his life lies man's only security for well-being. The associations which the word had acquired through OT usage helped to secure for the conception those elements to which this deep moral and religious significance is due.

It appears, further, that the knowledge of the truth in its fulness has been rendered possible only through Divine revelation. The idea of revelation was no new one; but it is a point of great importance, not only that the contents of revelation should have been greatly extended, but that what before was known simply as the Will of God, or as Torah (Instruction), should now be called by the name which denoted agreement between statement and fact in common matters, or between a mental image and an external object, the opposite of illusion, fancy, or mere opinion. We have seen the beginnings of such a use of the term in a few instances in the later books of OT and in the Apocrypha, and Greek modes of thought may in a measure have facilitated it. The significance of the usage in NT lies in the actual application of it to the Christian revelation and in its frequency. Finally, after the idea has been abstracted and made comprehensive, it is once again connected with persons. The source of it, in this fuller meaning of the term, is found in the Divine nature, in the Father, in Christ, in the Holy Spirit.

Unless we impugn the historical trustworthiness of the Fourth Gospel, that presentation of the idea of truth which is characteristic of NT begins with the teaching of Christ Himself. St. Paul, however, would seem to have acquired his view of it rather from the effect on his mind of faith in Christ than directly from any of His sayings. And in the case of St. John, too, it was doubtless the impression left upon him by the Person of the Lord which led him to perceive the meaning and power of the words on this subject which he has recorded. They and their fellow-believers felt that in the doctrine of Christ, and in the character and counsel of God, manifested in the Person and the life, death, and resurrection of Christ, they had been permitted to grasp that which is substantial and abiding, and to which the name 'the true' belongs of right, in a way that it does to nothing else. But a standard of reality had thus also been furnished them, of which the effect may be seen in that transparent sincerity of temper and high estimate of the value of ordinary truthfulness which they show, and which is the more noteworthy by reason of the contrast which it offers with the usual tendencies both of Oriental and of Greek character.

The term 'the truth,' as applied to Divine revelation, has in later generations been sometimes vulgarized, and often employed with too little sense of its ethical associations. On the other hand, the study of Nature and the study of History have in our own day, in consequence of the thoroughness and the improved methods with which they have been pursued, supplied a high ideal of intellectual truth. In the NT attention is undoubtedly fixed primarily on moral and spiritual truth, which in large degree rests upon evidence that is specially appropriate to it. Yet the spirit of the NT is favourable to the vigorous and fearless application to religious knowledge of the same tests, so far as it is amenable to them, as to other branches of knowledge; while a large conception of truth is suggested to the mind, which must embrace facts of every order, alike those which are known through sensible experience and that deeper reality in which even these must have their ground.

It cannot but be interesting to those whose mother-tongue is English that the word 'truth' has much the same range of meaning as the biblical terms which we have been considering; whereas in German *die Treue* has been kept to the meaning of constancy, and *die Wahrheit* denotes agreement between statement, or thought, and fact, and in the Romance languages the distinction between *fides* and *veritas* is maintained in the words derived from them.

LITERATURE.—H. G. Hoelemann, *Bibelstudien*, i. 1861; H. H. Wendt, 'Der Gebrauch d. Wörter ἀλήθεια, ἀληθής, und ἀληθινός im Neuen Testamente,' *SK*, 1883, also *Inhalt d. Lehre Jesu*, 1890, p. 199 ff.; Cremer, *Wörterbuch d. Neutest. Gräcität, s.v.* 1893 [Wendt appears to the present writer to force OT associations too much on passages of NT, forgetting the powerful new influences that were at work. On the other hand, Cremer makes a little too much, perhaps, of the analogies of classical usage]; Westcott, *Gospel of St. John*, Introduction, p. xliv ff.; Hort, *The Way, the Truth, and the Life*.

V. H. STANTON.

TRYPHÆNA (Τρύφαινα).—In Ro 16^{12} St. Paul salutes two women, Tryphæna and Tryphosa, 'who labour in the Lord.' The names occur in Inscriptions of the Household, *CIL* vi. 4866, D. M. | VARIA · TRYPHOSA | PATRONA · ET | M. EPPIVS · CLEMENS | : 5035 D. M. | TRYPHAENA | VALERIA · TRYPHAENA | MATRI · B·M·F· ET | VALERIVS · FVTIANVS : 5343 TELESPHORVS · ET · TRYPHAENA and others.

The name Tryphæna has a further interest in Christian tradition which may be shortly referred to. In the *Acts of Paul and Thecla* a considerable part at Pisidian Antioch is played by a wealthy lady who is called 'the queen Tryphæna.' For the existence of this person there is historical authority. A coin of Pontus is known having on the obverse ΒΑΣΙΛΕΩΣ ΠΟΛΕΜΩΝΟΣ, on the reverse ΒΑΣΙΛΙΣΣΗΣ ΤΡΥΦΑΙΝΗΣ. This Tryphæna was daughter of Polemon, king of part of Lycaonia and Cilicia, wife of Cotys king of Thrace, and mother again of Polemon king of Pontus. She was great-granddaughter of Marcus Antonius, and consequently first cousin once removed of the emperor Claudius. She belonged to a family of great wealth and high repute in the eastern part of the empire which provided tributary kings for many of the small principalities there existing. We know that her son Polemon became a Jew, and it is very probable that Tryphæna may have belonged to that class of devout and honourable women mentioned in Ac 13^{50} (see also Hogarth, *Authority and Archæology*, p. 391).

A. C. HEADLAM.

TRYPHON (Τρύφων).—An officer of Alexander Balas, who, after the death of the latter, took advantage of the unpopularity of Demetrius to put forward Antiochus, the son of Balas, as a claimant to the throne (1 Mac 11^{39}). His real aim, however, was to gain the crown for himself, and this he accomplished after he had murdered in succession Jonathan the Maccabee (12^{39-50}) and Antiochus ($13^{31f.}$). His rapacity led Simon to appeal to Demetrius (13^{34}). The latter was organizing an expedition against Tryphon when he was himself made prisoner by ARSACES (14^{1-3}). In the end Antiochus Sidetes, the brother of Demetrius, attacked Tryphon, besieged him in Dor, and pursued him when he escaped thence to Orthesia ($15^{10-14.\ 37-39}$). Tryphon was finally shut up in Apamea, where he committed suicide (Strabo, p. 668; Jos. *Ant.* XIII. vii. 2; App. *Syr.* 68). See, further, art. MACCABEES; and cf. Schürer, *HJP* I. i. 176, 246 ff.

TRYPHOSA.—See TRYPHÆNA.

TUBAL (תּוּבַל and תֻּבַל; LXX Θόβελ, A in Ezk 39^1 Θόβερ).—A people in Asia Minor, always (except in Is 66^{19} [MT], Ps 120^5) named along with MESHECH. Lagarde (*Ges. Abhandl.* 254) identified the latter with the *Moschi*, and Tubal with the *Tibareni*, and this has been generally accepted. The Tibareni are mentioned by Herodotus (iii. 94, vii. 78), and are known to have dwelt east of the Thermodon in the mountainous district to the S.E. of the Black Sea. They are the *Tabal* of the Assyr. inscriptions (cf. Schrader, *Keilinschr. u. Geschichtsforsch.* 155 ff., *KAT*² 82 ff. [*COT* i. 64 ff.]; Del. *Paradies*, 250 f.; Halévy, 193 ff.; Ed. Meyer, i. 245). In Gn 10^2 [P] = 1 Ch 1^5 Tubal is a son of Japheth; in Is 66^{19} [LXX] Meshech and Tubal are associated with Javan as distant peoples; in Ezk 32^{26} they appear as peoples who have suffered severe reverses; in Ezk 27^{13} as trading with Tyre in slaves and vessels of copper; in Ezk $38^{2f.}$ 39^1 as among the chief allies of GOG. In Ps 120^5 ('Woe is me that I sojourn with Meshech [LXX οἴμοι ὅτι ἡ παροικία μου ἐμακρύνθη, 'woe is me that my sojourn is prolonged,' *translating* משך], that I dwell beside the tents of Kedar'), Meshech and Kedar stand as types of savage peoples; as we say, 'it could not be worse among Turks and heathen' (Duhm, *ad loc.*).

See, further, next article. J. A. SELBIE.

TUBAL-CAIN (תּוּבַל קַיִן).—One of the sons of LAMECH, and brother of JABAL and JUBAL, Gn 4^{22} [J]. The MT (לֹטֵשׁ כָּל־חֹרֵשׁ נְחֹשֶׁת וּבַרְזֶל), which is certainly corrupt, might possibly (although חֹרֵשׁ in the sense of 'cutting instrument' is a difficulty) mean 'the forger of every cutting instrument of copper and iron.' It is likely, however, that לֹטֵשׁ was originally a marginal gloss to חֹרֵשׁ (Olshausen, Ball) or to קַיִן (Holzinger, Gunkel), and that the words הוּא הָיָה אֲבִי (cf. vv.$^{20.\,21}$) have dropped out before כָּל־. The rendering would then be 'he was the father of all such as forge copper and iron.' The LXX (Θόβελ· *καὶ ἦν σφυροκόπος, χαλκεὺς χαλκοῦ καὶ σιδήρου*) supports the view of Wellh. (*Comp.*^{2} 305), which has found general acceptance, that the name תּוּבַל alone stood in the original text, this Tubal being the *heros eponymus* of the Tibarenian metal-workers (cf. Ezk 28^{13} and the preceding art.), and that קַיִן, the generic name for 'smith,' was afterwards added. The double name Tubal-cain would thus have its analogues in such combinations as Jahweh-Elohim. Against Budde's reconstruction (*Urgeschichte*, 137 f.) of the text, which makes Lamech instead of Tubal-cain the subject of חֹרֵשׁ וגו׳, see Dillm. and Holzinger, *ad loc.* Cheyne (*Encyclopedia Biblica*, i. col. 626 f.) suggests that Tubal is 'a pale form of the god of the solar fire, Gibil or Nusku,' and that in the earliest form of the Heb. legend he was the instructor of men in the art of getting fire.

J. A. SELBIE.

TUBIAS, TUBIENI.—See TOB.

TURPENTINE TREE.—Only Sir 24^{16} AV (B *τερέμινθος*, ℵA *τερέβινθος*) 'As the turpentine tree [RV 'terebinth'] I [*sc.* Wisdom] stretched out my branches.' The Syr. has רודדפנא *rhododaphne, i.e.* the oleander, which appears to be an unfortunate guess of the translator, who did not understand the Heb. אֵלָה (?); so Ryssel in Kautzsch's *Apokr. ad loc.* See, further, art. TEREBINTH.

TURTLE, TURTLE DOVE (תּוֹר *tôr*, *τρυγών*, *turtur*).—The Latin name of this bird is a reduplication of the Heb., and both refer to its well-known note. There are three species in Palestine and Syria, *Turtur auritus*, L., the true turtle dove, *T. risorius*, L., the collared turtle dove, and *T. Senegalensis*, L., the Egyptian turtle dove. The collared species is the largest, reaching 13 in. in length, and is found principally about the Dead Sea and in the Jordan Valley. It is an Indian species. It derives its name from a narrow black collar at the back of the neck. The palm or Egyptian turtle dove is smaller, being about 10 in. long. It is more widely distributed than the last species, but not as much so as the following. It also has a black collar. It nests by preference in palm trees, whence one of its names. The common turtle dove is not only general in distribution, but very abundant. It is about 12 in. long, and has 3 oblique coloured bands at the side of the neck. The Scripture references in the older books are to the bird as a substitute for the pigeon in sacrifice (Gn 15^{9}, Lv 5^{7} etc., Nu 6^{10}; cf. Lk 2^{24}). The plaintive note and unresisting habits of the turtle dove are probably the characteristics alluded to by a psalmist, when he pleads that the gentle turtle dove shall not be delivered to the cruelties of the wicked (Ps 74^{19}). Its voice is the harbinger of spring (Ca 2^{12}). Its migrations are also alluded to (Jer 8^{7}). The above references would apply equally to any or all of the species. The palm turtle could have been used for sacrifice in the wilderness; the collared turtle would have served in the plains of Moab; while the common turtle would be found in all parts of the land. The common Arab. name for the turtle dove is *terghull*. It is also called *ṣulṣul*, *dubsî*, and *fâkhit*. There is the usual uncertainty as to the specific value of these names.

G. E. POST.

TUTOR.—Gal 4^{2} only, 'The heir . . . is under tutors and guardians,' *i.e.* as RV, 'under guardians and stewards,' Gr. *ὑπὸ ἐπιτρόπους καὶ οἰκονόμους* (cf. Lightfoot, *ad loc*). In its oldest use 'tutor' (Old Fr. *tuteur*; Lat. *tutor* a protector, from *tueor* to protect) means protector or guardian. Thus Fletcher, *Double Marriage*, v. 1—

> 'I'll have mine own power here,
> Mine own authority; I need no tutor.'

The word still has this sense in Scots law: Freeman, *Norman Conquest*, v. 252, 'The guardian—the tutor in Scottish phrase—of the orphans and their land.' Cf. Knox, *Hist.* 423, 'Now when we are at our full maturitie, shall we be brought back to the state of Pupils, and bee put under Tutory?'

J. HASTINGS.

TWELVE.—See NUMBER, vol. iii. p. 563ᵃ.

TWIN BROTHERS.—See DIOSCURI.

TYCHICUS (Τυχικός), classed with Trophimus as Ἀσιανοί, *i.e.* natives of Asia (Ac 20^{4}). They were, with other disciples, St. Paul's companions in travel from Macedonia as far as to Asia, and preceded him to Troas. Tychicus is mentioned four times in the Epistles of St. Paul. In Eph $6^{21.\,22}$ St. Paul says, 'That ye also may know my affairs and how I do, Tychicus, the beloved brother and faithful minister in the Lord, shall make known to you all things: whom I have sent unto you for this very purpose, that ye may know our state, and that he may comfort your hearts.' He was therefore the bearer of the letter to its destination, whatever that may have been. Tychicus had the same charge entrusted to him by St. Paul, a prisoner at Rome, in carrying the Epistle to the Colossians ($4^{7.\,8}$), where he is called, in addition to the titles given above, St. Paul's 'fellow-servant in the Lord.' From 2 Ti 4^{12} it appears that Tychicus was sent on a second occasion to Ephesus, most probably after St. Paul's first imprisonment at Rome. At this time his old companion Trophimus was close by 'at Miletus sick' (2 Ti 4^{20}). St. Paul also speaks of sending Tychicus or Artemas to Titus (Tit 3^{12}) to Crete, and says that when he does, Titus is to 'give diligence to come unto him to Nicopolis.'* He may have been the other disciple (2 Co 8^{22}) with Trophimus (see TROPHIMUS) who carried the 2nd Epistle to the Corinthians from Ephesus to Corinth. One tradition makes Tychicus bishop of Chalcedon in Bithynia. In the Greek *Menology* (Dec. 9) he is said to have been bishop of Colophon after Sosthenes, and to have suffered martyrdom for the Christian faith.

H. A. REDPATH.

TYRANNUS (Τύραννος) is mentioned only in Ac 19^{9}. When St. Paul, after spending three months in addressing himself to the Jews of Ephesus, using the synagogue for his place of preaching, found them determinedly hostile, he withdrew his adherents from the synagogue and began 'reasoning daily in the school of Tyrannus' (*καθ' ἡμέραν διαλεγόμενος ἐν τῇ σχολῇ Τυράννου*). The passage is enigmatical in its extreme brevity; but it may have been addressed to readers who were more familiar with the situation than we are.

The word *σχολή*, rendered 'school' in AV and RV, means leisure, and is frequently applied to the learned leisure of the contemplative or philosophic life as contrasted with the life of politics or business; hence it is frequently used to denote the written treatises produced in the philosopher's cultured leisure, or the lessons or lectures which he gives to pupils; and, finally, it is often applied, as here, to the place or building or room in which such lessons were given. Some such locality, already used for lecturing or teaching, was procured for the use of St. Paul when the synagogue ceased to be suitable. When we attempt to go beyond this, we find that the difficulties are many. The very reading is uncertain; and the difference is of the utmost importance for the sense.

---

* This was previous to the writing of the 2nd Epistle to Timothy.

(1) The reading which we have quoted follows the text of the great MSS ℵAB (supported by many secondary authorities). It might be possible that the writer should designate in this bare way a school which belonged to a private individual, Tyrannus, otherwise unmentioned in the work, and necessarily obscure to all except his own contemporaries in Ephesus. A case which presents a remarkable analogy occurs in Juvenal, vii. 40, where a rich patron puts at the disposal of his humble poet-friend 'the house of Maculo' (*Maculonis ædes*),[*] a disused house in a remote part of Rome, which for some reason was familiar to the Roman public whom Juvenal addressed. But the illustration proves that this meaning cannot be accepted in Ac 19[9]. There is not the remotest probability that the writer of Acts was addressing an Ephesian audience, to whom 'the school of Tyrannus,' an obscure place belonging to a private person, was familiar. The only other possible interpretation of this text is that 'the school of Tyrannus' was a public building in Ephesus, which could thus be described by its stereotyped name.[†] It would then be necessary to understand that St. Paul, as a teacher of a new philosophy, lectured publicly in this building. It is well known that philosophical teachers commonly gave lectures or held discussions in this public fashion in buildings or localities freely open to the whole population, as Socrates and St. Paul held disputations in the Athenian agora, as the Stoics lectured in the Stoa Pœkile and the Academics in the Academy. The custom is in keeping with the extreme openness and publicity of life in Greece or Italy, which was such that a schoolmaster is represented in a Pompeian wall-painting as holding classes in the open forum. Habitual use of a public building could hardly be made except with permission granted by the city or the magistrate charged with surveillance of the building (probably the *agoranomos*, corresponding to the Latin *ædilis*). Now, although St. Paul was evidently regarded not unkindly by magistrates and leading men in Ephesus (cf. Ac 19[31, 37]), yet it would be surprising that he should be accorded such formal public recognition; and it seems quite out of harmony with the general character of Pauline teaching that he should have accepted such a position, for recognition by a public official or body implies some submission to conditions and sacrifice of freedom. St. Paul's address to the Ephesian elders is far from suggesting any such legalized method of address during the period of his Ephesian ministry (Ac 20[18-35]). Hence the almost unanimous opinion of scholars has rightly rejected the view that Tyrannus' school was a public building. Yet it seems necessary in that case also to reject the reading of ℵAB, etc. (adopted in RV), and return to the text of 'Western' type which appears in AV.

(2) This text in its various forms differs only by adding a word or words after the reading of ℵAB, etc.[‡] The common reading adds *τινός* after *Τυράννου*: an exclusively and characteristically Western reading adds also *ἀπὸ ὥρας πέμπτης ἕως δεκάτης*. 'The school of a certain Tyrannus' must be a private, not a public, building or place; Tyrannus was either a teacher who ordinarily used it, or the private owner who granted the use of it whether for hire or free. In the latter case the situation would be similar to that in the passage just quoted from Juvenal, according to the reading of the scholiast and many editors: the patron grants to his literary friend the use of a poor old house belonging to himself. A certain individual named Tyrannus might on this interpretation have permitted St. Paul to use or to hire a *schola* which belonged to him: *τινός* explains and apologizes for the mention of an unknown person. There can be no doubt that goodwill to St. Paul must have been entertained by the person who allowed him the use of this school. Even if he hired it, we may be sure that no actively hostile owner would have let it to him.

But the Bezan addition 'from the fifth to the tenth hour' strongly favours the interpretation that Tyrannus was a teacher or philosopher, who also used the *schola*. It was then obviously necessary to make some arrangement as to hours: Tyrannus continued to use the *schola* during the early hours of the day, while St. Paul used it from one hour before noon till two hours before sunset. This partition of the day is an interesting point, and true to ancient life. The customary time for teaching in Græco-Roman life began very early, probably soon after sunrise. Juvenal in his usual exaggerating way describes the teacher as already in school at work before sunrise by artificial light (vii. 222);[*] and it is established by many passages that the fifth hour was the usual time for stopping all work and business (Martial, iv. 8. 3, *prandium* being eaten between the fifth hour and noon). Thus the school would be vacated by Tyrannus at the fifth hour, and was then at the disposal of St. Paul till the tenth.

The full Western text establishes the meaning of an otherwise very obscure passage, and gives a natural and satisfactory sense. The shortest text implies a sense that is either un-Lukan or improbable. There seems no reason why the Western addition should be made, while there was considerable temptation to allow the words of the Western text to drop out, as they seemed quite unimportant to 3rd cent. students. These considerations make it probable that the full Western reading is the true Lukan text, and that part of the true text was lost from many authorities. We cannot think that both the long and the short readings are original Lukan (as Blass and others hold).

The possibility that Tyrannus may have been a Jew has been favourably regarded by some scholars. But this seems distinctly improbable. If Tyrannus was an unconverted Jew, he would have almost certainly been unfavourable, if not actively hostile, to Paul; and he would have been most unlikely to facilitate the apostle's work, especially as by doing so he would have incurred the strong dislike of his own people. The sequence of thought in the verse, 'he separated the disciples (*i.e.* from the Jews), speaking daily in the school of Tyrannus,' seems hardly reconcilable with the view that Tyrannus was a Jew. Moreover, the way in which 'a certain Tyrannus' is mentioned would hardly suggest that he was a convert. But it is an error on the part of some writers to urge the Greek name as any argument against the theory that Tyrannus was a Jew. The Jews of the great cities of Asia Minor had become very strongly Grecized, and Greek names were in ordinary use among them.

Further, Knowling points out that the daily meetings in the *schola* imply that St. Paul made his adherents separate even from the synagogue services of the Sabbath. It seems impossible that a Jew could have aided in such a purpose.

The name is given in D as *Τυραννίου τινός*: this is certainly a mere corruption. The name Tyrannus is common in inscriptions, and several persons of the name are mentioned in literary authorities; but Tyrannius is unknown. The form Τυράννιον is a woman's name (neuter diminutive), like Τυραννίς (falsely accented, *CIG* 3730). W. M. RAMSAY.

---

[*] This is the MSS reading. Many editors follow the scholiast, who evidently had *maculosas*.

[†] The origin of the name would of course be obscure to us, on this view: it would be in keeping with Greek city life if Tyrannus was the donor, who built the *schola* and presented it to the city.

[‡] Blass in his edition of the Western (Roman) Text, Leipzig 1896, prefers the reading *τὸ καθ᾽ ἡμέραν*, following D: his reason is perhaps that this is characteristically Attic. He also strangely denies that the Western reading contained *τινός* (though he accepted this in his earlier edition), in spite of the strong *consensus* of Western authorities for it.

[*] So also Martial, ix. 68.

TYRE (צֹר [11 times צוֹר] *Ẓôr, i.e.* 'rock'; Τύρος; Tel el-Amarna tablets *Zuru, Zurri*; referred to by Jerome as Σώρ, Πέτρα, ἡ Τυρίων πόλις; Arab. *Ṣûr*).—i. SITUATION.—The modern small town of Tyre, built on the ruins of the once celebrated city, lies on a narrow strip of the Phœnician plain, about equidistant from Ẓidon and Acre. On the north the sandy coast-line runs up to the headland of Sarafend (Sarepta), and on the south the view is blocked by the high three-headed promontory, of which the middle point is the precipitous Ladder of Tyre (*Scala Tyriorum*). The ancient island, with its half mile of channel between it and the coast, is now a blunt headland, and there is nothing to remind the present inhabitants of the existence of the famous mole, and of the difficulties encountered in its construction. The pathway of 60 yards in width, along which the soldiers of Alexander rushed to the attack, is now half a mile broad, owing to the drifting up of the sea sand on the S.W. side.

It was from the island that the town received its name. The Rock, lying off, about a mile in length and three-quarters of a mile in width, was the special feature that caught the eye, both on land and at sea. And it was owing to the accommodation which the island provided for shipping, and the protection thus afforded to its inhabitants, that Tyre became the most celebrated maritime city of the ancient world. At these entrances of the sea Tyre sat like a pedlar spreading out his wares at a city gate, and became 'the merchant of the peoples unto many isles' (Ezk 27[3]). The island had two harbours, one on the north side and the other on the south, formed by the indentation of the outline, and extended by breakwaters. These harbours were called the Ẓidonian and Egyptian, much in the same way as the west gate of Jerusalem is called the Jaffa gate, and its northern the Damascus gate. The part of the town that was built on the mainland was strongly fortified, and in times of peace the inhabitants cultivated the neighbouring gardens, and received their supply of water by aqueduct from the great fountain now called *Ras-el-ʿain*, lying several miles to the south. As the wealth of Tyre increased, and the danger of military invasion became chronic, its inhabitants would come to regard the island as being not merely the storehouse of their merchandise, and a place of retreat in time of invasion, but as the actual city of Tyre. Thus the city on the shore, with its often-battered walls and scattering of peasant houses among the gardens by the aqueduct, was called ἡ πάλαι Τύρος, Παλαίτυρος, *Palætyrus, vetus Tyrus.*

According to a letter, quoted by Josephus (*Ant.* VIII. ii. 7) as having been written by king Hiram to Solomon, the request for payment in grain is based on the fact that Hiram's people inhabited an island. The five years' siege by Shalmaneser IV., and that of thirteen years by Nebuchadnezzar, also seem to indicate that Tyre could not be attacked in the ordinary way.

Nothing now remains of the strength and splendour of the island fortress, except that on a calm day one may look from a boat, and see in the water along the rocky shore great blocks of the ancient breakwater and tumbled pillars of rose-coloured granite.

ii. ANTIQUITY.—In the time of Joshua, Tyre is mentioned as being a fortified city, and its character as a stronghold is also noted in 2 S 24[7], Is 23[14], Zec 9[3]. It is included in the list of Phœnician towns visited by the Egyptian *mohar* in the time of Ramses II. Herodotus (ii. 44) states, on the authority of the Tyrian priests of Melḳarth, that the town was built about B.C. 2750. Josephus, on the other hand, informs us (*Ant.* VIII. iii. 1) that Tyre was founded 240 years before the building of the temple, *i.e.* about B.C. 1217. Isaiah seems to be referring to a well-known claim when he speaks of the city 'whose antiquity is of ancient days' (23[7]). Strabo (XVI. ii. 22) calls it ἀρχαιοτάτη πόλις Τύρος.

iii. RELATIONSHIP OF TYRE AND ẒIDON.—Isaiah speaks of Tyre as the 'daughter of Zidon' (23[12]). With this agree the references in Greek and Latin poetry, where Ẓidon represents in a general way everything Phœnician. Ẓidon seems to have been the first to pass from being a fishing village, as its name implies, to the undertaking of commercial transactions on the coast of Syria. From this small beginning, her ships began to traffic with Cyprus and northwards among the Greek islands. The transference of maritime power from Ẓidon to Tyre was owing, according to one account (Justin, 18. 3), to an attack by the Philistines of Ascalon upon Ẓidon by way of punishing that city for having seized Dor. Possibly, a number of the Ẓidonian merchants transferred their connexion to Tyre as being more convenient for the trade with the south-east of the Mediterranean. Isaiah refers to Tyre as having been replenished by the merchants of Ẓidon (23[2]). While Ẓidon had made its name familiar over the eastern half of the Mediterranean, Tyre put a bolder spirit into its mercantile enterprises, and steadily advanced in wealth and power until it became 'the mart of nations' (Is 23[3]). See, further, under ZIDON.

iv. EXTENT AND INFLUENCE OF TYRIAN TRADE.—While Tyre produced certain manufactured articles, such as glass work and the crimson and bluish-purple dyes obtained from the shell-fish * of the coast, the chief cause of its wealth and fame was its trade-carrying pre-eminence. Tyre was the great sea-pedlar of the ancient world. By their charts of the ocean and study of the stars, along with carefully guarded records as to depths and distances, winds and currents, the Tyrian sailors were able to outstrip all competitors by sailing during the night, and keeping their course when out of sight of land. Also by land they had their trading stations along the eastern caravan routes that passed to the N.E. by Aleppo and Palmyra, and to the S.E. into Arabia. From Armenia to the Persian Gulf all the paths of merchandise converged towards Tyre. Their ships, for a time in partnership with those of Solomon, traded in the Red Sea. A recent conjecture is that Sofala (with the prefix *s* dropped and the *l* restored to *r*) was the celebrated OPHIR, with its traces of Semitic workmanship in the neighbouring gold mines. The Tyrians rounded the continent of Africa in their vessels, not larger than a modern herring-boat. They traded on the Nile, selling their wares and laying in wheat and linen at their station at Memphis. They had their ports along the north coast of Africa, notably at Utica and Carthage, the latter of which was said to have been founded by the Dido of romance. In the great Roman epic Virgil must give his hero a Tyrian steersman, Palinurus (possibly *Baʿalo-nûhro*, 'Baal is light'). All the islands of the Mediterranean were familiar with their richly freighted vessels. Beyond the Straits of Gibraltar they established Gades and other stations on the west coast of Spain. They crossed also to Cornwall, and passed down the west coast of Africa as far as Cape Nun and the Canary Islands. Traces of their presence survive, especially in the islands of Cyprus, Sicily, and Sardinia, in the names of harbours, in excavated relics, and in graves with Phœnician inscriptions, telling where some Tyrian sailor had rested from his wanderings.

---

* In 'the book of the Rolls,' pp. 47, 48 (*Studia Sinaitica*, No. viii.), there is an account, which the writer of the book dismisses with contempt, of the way in which the purple dye of the Tyrian murex was discovered. It was a Jewish tradition to the effect that a shepherd lad one day noticed his dog eating something on the shore near Tyre, and observed that the dog's mouth was stained with bright crimson fluid. With the Oriental instinct for decoration he dipped some wool in the bright dye, and put it on his head as a crown. The incident having been reported to Hiram, king of Tyre, the dye instantly became an important article of commerce.

Ezekiel (ch. 27), in describing the height of glory from which Tyre was cast down because of the unrighteousness of her traffic, gives a glowing account of the various lands that gave her of their best, ministering to her vast merchandise, and so to her wealth and power and pride and destruction. In Ezk $27^{25.\,26}$ there is a picture of the ships of Tarshish, homeward bound and heavily laden, being buffeted by the common Levanter or east wind of the Mediterranean.

Tyre was a great civilizer, bringing East and West together, and teaching the world the peaceful lesson of mutual dependence. From the 12th cent. B.C. it strove with wonderful talent and persistency to carry out its great aim, which was to gain from the whole world rather than to gain the world itself. Its world was gain. Its destiny, unlike that of Rome, was not to beat down the proud and mighty, but to supply the wants of the rich and great, bringing idols for their shrines, beautiful vases for their palaces, shields and swords of cunning work for warriors, cloth of gold, embroidery, and royal purple for kings, and silk work in stripes and tartan for princesses. By exporting various products to lands where they were unknown or of inferior quality, productive activity was stimulated on all sides, and the standard of industrial art was raised. Like a goodly merchantman, Tyre was willing to pay for her treasures. Thus tribute was willingly given to kings in return for freedom of trade; and with regard to unseen dangers and difficulties, of which they were deeply conscious, their commercial prudence was ready with costly gifts or cruel sacrifices in order to touch the vanity or avert the wrath of the gods. It was an expenditure in order to secure a larger gain.

v. TYRE AND ASSYRIA.—Under Assur-nazir-pal, Shalmaneser II., and Tiglath-pileser, Assyria gradually established its authority over Phœnicia, until Shalmaneser IV. in 726 overran the country. Tyre refused to surrender, and Shalmaneser succeeded in detaching her jealous rival Zidon, so that he was able to attack Tyre by sea with an armada of 60 ships. The Tyrians moved out to meet them, and with 12 war-vessels defeated their enemy, taking 500 prisoners. The siege was maintained on land for five years, until it was raised on account of the death of the Assyrian king (*Ant.* IX. xiv. 2). Later on, Tyre was attacked with uncertain success by Sennacherib with a vast army. In 673 Esar-haddon found his vassal Tyre in league with Egypt, and in 664 Assur-bani-pal took it by storm.

vi. TYRE AND ISRAEL.—In the partition of the kingdom of Israel under Joshua, the stronghold of Tyre is mentioned in connexion with the portion of Asher (Jos 19^{29}). The most intimate connexion between Tyre and Israel was in the time of Hiram and Solomon, when a covenant of friendship was entered into in connexion with the building of the temple (2 S 5^{11}, 1 K 5^{1} $7^{13.\,14}$ $9^{11.\,12}$, 1 Ch 14^{1} 22^{4}, 2 Ch $2^{3.\,11.\,13.\,14}$). Amos ($1^{9.\,10}$) complains that this covenant * was shamefully violated by the Tyrians when they sold Israelite captives as common slaves. In the prophecies of Isaiah, Jeremiah, and Ezekiel, the pride, luxury, and greed of Tyre are denounced (Is 23^{1-17}, Jer 25^{22} 27^{3} 47^{4}, Ezk 26. 27. 28. 29). In the Psalms, the daughter of Tyre with her costly gift stands in the retinue around the throne (45^{12}), its inhabitants are mentioned among the sworn enemies of Israel (83^{7}), and again Tyre is numbered among those who are brought to know the Lord (87^{4}). The beautiful scenery of Ephraim is likened to that of Tyre (Hos 9^{13}), and in Zec 9^{2} the astuteness of the Tyrians is alluded to.

In the NT its people are among those who flock to Galilee to see and hear Christ (Mk 3^{8}, Lk 6^{17}). Christ visited its coasts (Mt 15^{21}, Mk 7^{24} [where see Swete's note]), and declared that its people, if favoured like the cities of Galilee, would have been moved to repentance (Mt $11^{21.\,22}$, Lk $10^{13.\,14}$). The incident of reconciliation with Herod, recorded in Ac 12^{20}, reveals in its motive and management the artfulness of the Phœnician trader. Finally, in Ac $21^{3.\,7}$ the ship in which St. Paul sailed to Syria comes to Tyre to discharge its cargo.

vii. TYRE AND BABYLON.—In the early years of the Bab. empire, Tyre was left at peace, and its connexion with Egypt was more closely established. When it became evident that Babylon was to tread in the path of Assyria, the Phœnician cities Gebal, Zidon, and others with them, laid aside their local jealousies and sought to strengthen Tyre to defy the invader (Ezk 27^{8}). After the famous battle of Carchemish, in which Nebuchadnezzar defeated Pharaoh-neco in 605, Tyre was besieged for 13 years (cf. Jos. *Ant.* X. xi. 1). The issue of this siege is somewhat uncertain (see *Expos. Times*, x. 378, 430, 475, 520). The prophet Ezekiel seems to imply at least that the island was not given up to plunder, but the Divine purpose was fulfilled in punishing the unrighteous princes and the proud king of Tyre (Ezk 28^{12} 29^{17-20}). A time of anarchy and unrest followed, in which the city discarded for a time its monarchical form of government. Gradually order was restored, prosperity returned, and the allegiance to Babylon remained unbroken to the end of that dynasty in 538.

viii. TYRE AND PERSIA.—The condition of Tyre under the Persians was better than it had been under the Assyrians and Babylonians. Persia required the help of the Phœnician fleet in attacking Egypt and repressing the rising Macedonian empire. When after B.C. 400 the power of Persia showed signs of decay, the Phœnician cities rebelled; but when Zidon was reduced to ashes by Ochus in 351, Tyre surrendered without a siege. During the Persian dynasty it is related, to the credit of Tyre, that its fleet refused to convey the army of Cambyses against Carthage on account of blood-kinship, and thus an expedition was averted that might have influenced the destinies of Rome.

ix. TYRE AND THE MACEDONIANS.—The greatest event in the history of Tyre was its capture by Alexander in B.C. 332 after a siege of seven months. Much ingenuity and courage were displayed on both sides. Help was expected from Carthage, Persia, Cyprus, Zidon, but in vain. It was Tyre's darkest day when Alexander was seen bearing down from the north with a large fleet chiefly collected from Phœnician ports and old rivals. It was the fire from the midst of her that had come to devour a city that claimed admiration and obedience, but did not ask to be loved. The mole was completed with ease, when the harbour was thus blockaded; and in the taking of the city 6000 are said to have perished by the sword, 2000 were crucified, and 30,000 women, children, and slaves were sold. Yet within the brief space of 18 years Tyre was repeopled and refortified, and was able to offer a strong but ineffectual resistance to Antigonus. About 287 it again became an Egyptian possession, till in 198 it fell to the Seleucidæ, and, with the exception of a brief interval (83–69) of Armenian rule, it remained under its Syrian governors till in 65 it passed quietly into the Roman empire, receiving the status of a free city. In the 4th cent. A.D. Jerome refers to Tyre as a beautiful city and 'an emporium for the commerce of the whole world.' It was made the seat of a bishopric, and had two such talented but widely-different citizens as Origen and Porphyry. Later on, it was taken by the Saracens in the 7th cent., recovered by the Crusaders in 1124, to fall again into the hands of the Saracens in 1291. After relapsing for a time into the possession of Egypt, with minor intervals of Druze and Venetian control, it ceased to exist as maritime Tyre and became an Arab village.

---

* For a different interpretation of the 'covenant of brothers' see Driver, *Joel and Amos*, p. 137.

Few sites in the historical East present such an affecting and instructive record of persistent struggle, splendid achievement, and irretrievable doom. By her destined pathway of commerce Tyre exerted upon the world an influence that ranks with that of Jerusalem in religion, Athens in philosophy, and Rome in government. But to-day the steamers on the Syrian coast that call at the Bay of Acre and Zidon consider Tyre too insignificant to deserve a visit. After having been the mother of colonies and mistress of the seas, bearing her merchandise into otherwise unvisited lands and adjusting the supply and demand of the world, Tyre is now content at the close of her career to be a stagnant village in stagnant Turkey.

LITERATURE.—Thomson, *Land and the Book*; Robinson, *BRP* (Index); Rawlinson, *Hist. of Phœnicia*, and *Phœnicia* in 'Story of the Nations'; Kenrick, *Phönicia*; Movers, *Die Phönizier*; art. PHŒNICIA in present work. G. M. MACKIE.

TZADE (צ).—The eighteenth letter of the Heb. alphabet, and as such employed in the 119th Psalm to designate the 18th part, each verse of which begins with this letter. It is transliterated in this Dictionary by ẓ.

U

UCAL (אֻכָל).—Mentioned only in Pr 30^1. In AV and RV the word is treated as a proper name. It is, however, of an unusual form, and there are other objections to the rendering. A slightly different reading (see RVm) would give the meaning, 'I have wearied myself *and am consumed*' (LXX καὶ παύομαι). See ITHIEL, and cf. Lag. *ad loc.*

UEL (אוּאֵל; BA Οὐήλ, Luc. Ἰωήλ).—One of the sons of Bani who had married a foreign wife, Ezr 10^{34}; called in 1 Es 9^{34} JUEL.

UKNAZ.—For וּקְנַז in 1 Ch 4^{15} AVm gives 'Uknaz' instead of 'even Kenaz' (AV) or 'and Kenaz' (RV). In all probability something has dropped out of the text, which had read originally 'the sons of Elah: . . . and Kenaz.' This is favoured by the plural *sons*. An alternative is to drop the ו, with LXX (καὶ υἱοὶ Ἀδά· Κενέζ) and Vulg. (*Filii quoque Ela: Cenez*), and read simply KENAZ (קְנַז).

ULAI (אוּלַי, Theod. Οὐβάλ, LXX Οὐλαί).—The classical Eulæus, now the *Karûn*. It flowed past Susa or Shushan, and Assurbanipal states that in the battle fought outside that city between the Assyrians and the Elamites, the Ulâ (or Ulai) was choked with the bodies of the slain. In Dn $8^{2.16}$ it is similarly described as flowing past Shushan. The Eulæus is also called Pasitigris by the classical geographers, and Pliny (*HN* vi. 27) says that it surrounded the citadel of Susa. But the rivers of Susiana have so changed their channels since the classical epoch as to make their identification with the present rivers of the country somewhat difficult. It would seem, however, that what are now the Upper Kerkhah and the Lower Karûn were formerly a single stream (see SHUSHAN). A cuneiform tablet (*WAI* ii. 51. 32) describes the Ulâ as 'the water which carries its treasures into the deep' (but see Driver on Dn 8^2, and Dieulafoi, as cited p. 126 *n.*). A. H. SAYCE.

ULAM (אוּלָם).—1. The eponym of a Manassite family, 1 Ch $7^{16.17}$ (BA Οὐλάμ [B om. in v.^{17}], Luc. Ηλάμ). 2. A Benjamite family, specially noted as archers, 1 Ch $8^{39.40}$ (B Αἰλάμ, Αἰλείμ; A both times Οὐλάμ). Benjamite archers appear also in 2 Ch $14^{7\,(8)}$.

ULFILAS' VERSION.—See VERSIONS (Gothic).

ULLA (עֻלָּא; BA Ὠλά, Luc. om.).—The eponym of an Asherite family, 1 Ch 7^{39}.

UMMAH.—An Asherite city, Jos 19^{30}. There can be little doubt, however, that the MT עֻמָּה here is a slip for עַכּוֹ ACCO (cf. Jg 1^{31}); so, following certain MSS of the LXX (Ἀκκώ, Ἀκκώρ), Dillmann, Bennett, Kautzsch, *Oxf. Heb. Lex.* etc.

UNCLEAN, UNCLEANNESS.*—

i. Origin of the distinction between Clean and Unclean.
ii. Four main types of Uncleanness; connected with (*a*) the functions of reproduction; (*b*) food; (*c*) leprosy; (*d*) death.
iii. Uncleanness and Ritual.
iv. Uncleanness in NT.
Literature.

i. ORIGIN OF THE DISTINCTION BETWEEN CLEAN AND UNCLEAN.—The distinction between clean and unclean is to be found as far back as we are able to trace the history of the religion of Israel. The validity of Rachel's excuse to her father when seeking the teraphim (Gn 31^{35} E) rested on the uncleanness of her condition; and Saul, in spite of his insane suspicion of David, yet recognizes that he may be detained from the feast of the new moon by ceremonial defilement (1 S 20^{26}). The division of Israelites into 'those shut up and left at large,' indicates how frequent uncleanness was if those shut up are those ritually unclean. Several allusions to uncleanness are found in the Prophets (Am 7^{17}, Hos 9^{3}, Ezk 4^{14}, Hag 2^{13}, Is $52^{1.\ 11}$ 35^{8}), while in Deuteronomy, and much more elaborately in the Priestly Code, it is made the subject of detailed legislation. The laws of defilement and purification were developed by the misdirected ingenuity of the scribes into a system of casuistry, even more than ordinarily fine-spun and minute, which constituted, in fact, the most important part of the regulations by which the pious Jew had to order his life. But the laws of uncleanness are far older than the Hebrew people. It is only necessary to read them, to be convinced that they are not the creation of the higher religion of Israel. Anthropology, however, has proved, what might naturally have been suspected, that they belong essentially to the prehistoric past. Their congenial atmosphere is not that which breathes in the Hebrew prophets, but that which animates the crudest forms of savage religion.

---

* This article deals only with the ceremonial idea of uncleanness, not with the ethical or religious. The Heb. verb טָמֵא, with the noun טֻמְאָה or טָמְאָה and adj. טָמֵא, is commonly used to express this idea. The notion of profanation or pollution is conveyed by the verb חִלֵּל, which also means 'to make common'; the corresponding noun is חֹל. The late verb גָּאַל is rare in this sense. Cleanness is expressed by the verb טָהֵר, its noun טָהֳרָה, and adj. טָהוֹר. These words may further express the idea of purification, for which the Piel and Hithpael of חָטָא are also used. The Greek word for uncleanness, ἀκαθαρσία, is used in the NT, except in Mt 23^{27}, in an ethical sense only, and the adj. ἀκάθαρτος is used in the Gospels exclusively of unclean spirits, and in the Epp. in an ethical sense. It is used of ceremonially unclean birds in Rev 18^2, and, coupled with κοινός, 'common,' is used of ceremonially unclean food in Ac $10^{14.28}$ 11^8. Ceremonial defilement is expressed by the verb κοινόω, 'to make common,' and its adj. κοινός (Mt 15, Mk 7, Ac 10. 11. 21^{28}, Ro 14^{14}, Rev 21^{27}), and once (Jn 18^{28}) by μιαίνω. For the idea of purification the verb καθαρίζω, with the noun καθαρισμός and adj. καθαρός, and the verb ἁγνίζω, with its noun ἁγνισμός, are used.

Some of the laws might, indeed, be explained on rational grounds, as due to sanitary precaution, to love of cleanliness, to natural aversion from disgusting objects. But it is certain that these do not explain many of the prohibitions, and cannot account for the precise selection or omission which characterizes the list of things unclean. We may grant that these considerations may have played some part in late development, but this should probably be reduced to a minimum. It is more likely, in fact, that the laws of uncleanness created sanitary laws and aversion for certain things than that they were created by them. Where a tribe happened to regard things as unclean which also are insanitary, it would, so far as it did so, increase its chances in the struggle for existence, while natural selection would tend to eliminate tribes whose ritual in no way coincided with sanitary requirements. Thus with the survival of the former set of tribes sanitary regulations might come by degrees to be established, with no intention of doing more than securing ritual cleanness. Again, what we call natural aversion is probably natural only in the sense that habit is second nature. The natural disgust which we feel at certain kinds of food is due altogether to custom, and sentiment formed by custom. The dog or horse is naturally no more repulsive than the ox, yet many have an invincible repugnance to dog-flesh or horse-flesh. A Jew's instinctive loathing for the swine, which is eaten freely by Gentiles, often survives the surrender of all religious scruples. And it is decisive that these laws originated at a time when the rudiments of sanitation were still undreamed of, and are found among peoples who own no restraint of cleanliness or natural disgust. It is also well known that even in higher religions ritual cleanness may be obtained by bathing in very dirty water. Still less happy are the attempts to find a rational basis for these laws in the spiritual principles of the higher religion of Israel. For not only does it need strained arguments to remove their essentially irrational character and make them at home in a spiritual religion, but the numerous parallels in much lower religions are so close that it is unreasonable to shut the eyes to their essential affinity. It is futile to fumble at the lock with such rusty keys, when anthropology has given us one which fits every ward.

The ideas and usages among other peoples, which are similar to the Hebrew laws of uncleanness, are conveniently classed under that widespread system known as 'taboo.' The general notion of taboo is that certain things are regarded as unsafe for contact or use in common life, by reason of the supernatural penalties which would thereby be incurred. A common thing may become taboo through the action of a god, chief, or priest, and the sanction for the restriction he imposes is his own power of avenging its violation. But some things or conditions are intrinsically taboo, and infringement of their character brings its own penalty by a mechanical necessity without external aid. There is an inherent energy in them, which is discharged on all who rashly break the taboo. One of the most striking features of taboo is its infectious character. It is transmitted by contact, and the person or thing thus tabooed may become a new source of infection, though the supernatural virus loses intensity at each new stage of transmission. The infection might in some cases be removed by ritual means, chief among which must be placed washing. In other cases it was too deeply engrained to be removed. From this single root of taboo sprang not uncleanness only, but holiness. Originally, paradoxical as it may seem, there was little difference between them. Both holiness and uncleanness are infectious, and require identical or similar ritual purification (see HOLINESS). It is especially instructive to compare the law of the sin-offering (Lv 6^{25-30}) with such passages as Lv $11^{24-28.\ 31-35}$ $15^{4-12.\ 20-24.\ 26.\ 27.}$ It is to be observed that both are treated as of purely materialistic quality, so much so, in fact, that holiness or uncleanness may be scoured off a vessel, unless it is of unglazed earthenware and the holiness or uncleanness has soaked into it, in which case it must be broken. It is further confirmation of the original identity of the two, that while a holy thing is usually said to communicate holiness and an unclean thing uncleanness, in one case a holy thing produces uncleanness. The canonicity of a book was expressed in the phrase, it 'defiles the hands.' If it was a common, that is, a non-canonical book, it was not holy; if canonical, it was holy, and produced ceremonial defilement. The practical consequence of both holiness and uncleanness was to withdraw the object they infected from participation in common life. The holy thing was dedicated to God, and to treat it as common was to violate its sanctity and incur His anger. Hence the avoidance of holiness as a plague, and the precautions taken to avoid catching it. Moses must keep his distance and remove his shoes from his feet on ground made holy by God's presence in the bush (Ex 3^{5}); bounds (corresponding to a taboo line) must be set about the mountain at Sinai, lest the people draw too near and J″ break forth upon them. Whatever touched the mountain became so sacred that it was too dangerous to be touched, the death penalty must be executed on it from a safe distance (Ex 19^{12-24}). The men of Beth-shemesh, and Uzzah, were smitten for contact with the ark (1 S 6^{19}, 2 S 6^{7}). The priests are bidden put off the garments wherein they minister, when they go out to the people, lest they sanctify the people with their garments (Ezk 44^{19}); and those who take part in the heathen mysteries described in Is 65^{3-5} warn the bystanders not to come near lest they catch the contagion of their holiness (Is 65^{5} reading, with a change in the pointing, 'lest I make thee holy').

The process by which the notions of holiness and uncleanness, which were undifferentiated in taboo, came to be distinguished was probably something of this kind. It has already been pointed out that two classes of taboo may be distinguished. A common thing may become taboo if a god or sacred person lays a taboo upon it. Or a thing or state may be intrinsically taboo. Roughly speaking, this corresponds to the distinction between holy and unclean. The holy is that which is naturally common, but has become holy through contact with the Divine. But there is an uncleanness of a primary order, of an intrinsic and not accidental kind, uncommunicated as no earthly holiness can be said to be. It is true that there is a communicated uncleanness, but uncommunicated uncleanness has no uncommunicated holiness to match it in the human realm. All holiness is derivative save the holiness of God. It is by this principle that the unclean thing may be taboo in its own right, while the holy thing cannot be, that we must explain the priestly torah given in Hag $2^{12.\ 13}$. Holy flesh infects with holiness a garment in which it is carried, but this garment does not transmit the holiness to what it touches. A man who is unclean by contact with a dead body infects with

---

* 'In general, we may say that the prohibition to use the vessels, garments, and so on, of certain persons, and the effects supposed to follow an infraction of the rule, are exactly the same whether the persons to whom the things belong are sacred or what we might call unclean and polluted' (Frazer, *The Golden Bough*^{2}, i. 325; cf. also ii. 304–309).

uncleanness what he touches. In other words, a dead body is endowed with higher virulence of contagion than holy flesh. And the reason is that a corpse is a fountainhead of uncleanness, while holy flesh is holy, not intrinsically, but only because it has been devoted to God, the sole fountainhead of holiness. Probably, then, the distinction between holiness and uncleanness was simply the explicit affirmation of a distinction already implicit in the idea of taboo. And it was a great step in advance when the essential difference of things indiscriminately classed together as taboo emerged into clear consciousness. A large irrational element, it is true, survived in the idea of holiness as well as in that of uncleanness. But by linking the idea of holiness with that of God, the former was started on a career of intellectual, moral, and spiritual development, which made it at last the fit expression of the highest religious ideal. On the other hand, uncleanness remained to the last a virtually savage idea, one of the heathen survivals in Judaism which Christianity had simply to eliminate. And where life is lived under the shadow of innumerable taboos, these form an insuperable barrier to progress, for man is tied to the fixed routine, not venturing on unknown paths for terror of the perils that lurk everywhere in his way. But when taboos are recognized as expressing the will of the gods, instead of the paralyzing dread of unknown and incalculable forces, we have the restraint imposed by a kind and trusted deity, which leaves room for progress, because it introduces a rational element, and claims for religion what had been inextricably bound up with superstition.*

The opposite of 'holy' is 'common,' the opposite of 'unclean' is 'clean.' While 'holy' and 'unclean' are strong positive terms, 'common' and 'clean' are simply their pale negatives. Clean is not the same as holy; it implies no dedication to the Divine service, and has no infectious quality. The clean person is one who may freely approach his God in worship. For this he need not be holy, though there are certain cases where cleanness, *i.e.* the mere absence of uncleanness, is insufficient. At Sinai the Hebrews had to sanctify themselves by washing and abstinence from women (Ex 19). But so exceptional an occasion cannot be taken as typical. Nor are the common and the unclean identical; the common is rather, ordinarily at any rate, also the clean. Yet, just as the clean and the holy tended to be identified, since whatever is holy must also be clean, so their opposites, the unclean and the common. But, in spite of such obliteration of distinctions, it only creates confusion if they are not emphasized.

It should further be noticed that the laws of uncleanness, while largely a survival from prehistoric savagery, or the semi-civilization of primitive Semites, partly originated in a protest of the higher religion of Israel against heathenism. Certain things which were connected with heathen cults, and constituted a danger to spiritual religion, were placed under taboo. Whether by survival or protest a thing was regarded as unclean, it was alike an abomination to J", cutting off the offender from intercourse with Him and fellowship with the community. It is probable that the extent to which the laws are due to protest against heathenism has been overrated in recent discussions. Similarly, in the face of savage parallels, it is probable that some laws in the Priestly Code, which are often regarded as very late developments and impracticable refinements, are in substance of the highest antiquity. That, as at present codified, they are late is clear, and such a passage as Lv 11^{24-38} is not unfairly regarded as exhibiting the rudiments of the casuistry of the scribes. But the central prohibition of the passage is probably quite early. It is remarkable that some taboos which survived into the Levitical legislation, disappeared among the more conservative Arabs.

ii. FOUR MAIN TYPES OF UNCLEANNESS may be distinguished: uncleanness connected with (*a*) the functions of reproduction, (*b*) food, (*c*) leprosy, (*d*) death. These must now be considered in detail.

(*a*) *Uncleanness connected with the functions of reproduction.*—These functions early excited the superstitious awe of mankind, which invested the organs and their activities with mysterious powers. Sexual intercourse was widely regarded as producing uncleanness, which might be removed by bathing, but in some cases fumigation was also required. Among the Arabs it was specially necessary to take precautions against the demons on the consummation of marriage (Wellh. *Reste Arab. Heid.*^{2} 155). The Book of Tobit yields an interesting parallel to this. Before Tobias married Sarah she had been given to seven husbands, who had been slain on the bridal night by Asmodæus her demon lover (To 3^{7-9} $6^{13.14}$ 7^{11}). Tobias drove away the demon by fumigation, burning on the ashes of incense some of the heart and liver of a fish (8^{1-3}). It is probable that among the Hebrews intercourse was always considered to produce defilement. This is expressly laid down in P (Lv 15^{18}). Naturally the defilement was slight, involving bathing and uncleanness till the evening. Certain conditions of holiness, however, required complete abstinence. This was so when J" was to appear on Sinai (Ex 19^{15}). So David's men may eat holy bread only on condition that they 'have kept themselves from women' (1 S 21^4). David's reply is obscure (see Driver and H. P. Smith on the passage, also W. R. Smith, *l.c.* pp. 455, 456). But it seems clear that on a warlike expedition David asserts that women were taboo. The prohibition of women to those engaged in war is widespread. War was regarded as sacred; the warriors were holy as long as the campaign lasted. Among many savage peoples continence must be observed not only by the warriors, but, on grounds of sympathetic magic, by those left at home, and after their return this taboo with many others is enforced with even greater strictness (Frazer, *l.c.* i. 328; W. R. Smith, *l.c.* 455). No such strictness obtained among the Hebrews in historical times, but Uriah's refusal to visit his wife while the campaign was in progress was probably due to a religious scruple of this kind (2 S 11^{8-13}). Perhaps it is on this ground that we may explain why a man is excused from military service during the first year after marriage, Dt 24^5.

Puberty is regarded by many people as a period when evil can be averted only by the observance of very rigorous taboos. The boys then pass through elaborate ceremonies of initiation, circumcision often playing an important part. So far as boys are concerned, the original meaning of circumcision was lost among the Hebrews by the custom of performing it on the eighth day. But uncircumcision came to be regarded as uncleanness, depriving the offender of approach to God or membership in the community. In the case of girls an analogous rite was often performed, though not, so far as we know, by the Hebrews.

But the greatest terror was aroused by **menstruation.** At its first appearance the girl was often strictly isolated, and in some cases this was continued for years. All through life, precautions, though not so stringent, had to be taken. The blood was regarded as highly dangerous for men to touch or even see (Frazer, *l.c.* i. 325, 326, iii. 204–233; W. R. Smith, *l.c.* 447, 448; Spencer and

---

* See W. R. Smith, *RS*^{2} pp. 152–155.

Gillen, *The Native Tribes of Central Australia*, pp. 460, 461; Kalisch and Dillmann-Ryssel on Lv 15^{19-24}).[*] Among the Arabs 'menstruous women might not take part in feasts and sacrifices, only for them are the old expressions for clean and unclean customary in pre-Islamic Arabic' (Wellh. *l.c.* 170). This was true also in Israel. As in so many other cases, the strictness of the taboos on this state is much modified. But it naturally fell among the graver types of uncleanness. For it was a condition doubly unclean, combining the uncleanness of the reproductive functions with that of blood. It was regarded as unclean in old Israel (Gn 31^{35}, 2 S 11^{4}). In the Priestly Code (Lv 15^{19-24}) the period of 'separation' is defined as seven days. The uncleanness was communicated to the bed or seat; contact with either of these produced uncleanness till evening, and required the washing of body and clothes. So infectious was the impurity that any one touching an article on the bed or seat incurred the milder penalty of uncleanness till the evening. This is the penalty prescribed according to the present text of Lv 15^{19} for contact with the patient herself. But it is incredible that a secondary stage of uncleanness should require a more complete purification than the primary. Probably the words 'shall wash his clothes, and bathe himself in water, and' have fallen out. The meaning of the injunction in Lv 15^{24} is uncertain. Probably it does not refer to conjugal relations, which in these conditions were not only said in Lv 20^{18} (H) to incur the punishment of death, but were viewed with utter repugnance in antiquity. It is possible that the reference may be, as some think, to defilement caused by the commencement of the discharge during intercourse.

Closely connected with this form of uncleanness was that caused by abnormal issues in both sexes. The pathological conditions indicated need not be discussed in detail (see the commentaries). An 'issue of blood' (Lv 15^{25-30}, Mt 9^{20} and paralls.) made a woman unclean as in the normal discharge. The impurity lasted seven days after the discharge had stopped. Then she offered two turtle doves or young pigeons—one for a sin- and the other for a burnt-offering. It is curious that neither in the case of the normal nor abnormal issue is any reference made to washing of body or clothes in the case of the woman, though both are required for the man (Lv $15^{13.16}$). Jewish custom at a later period certainly insisted on a bath of purification after the normal discharge. In the case of men, seminal emission involved washing of the body and uncleanness till the evening, while every garment or skin on which there had been any discharge must be washed and be unclean till evening. According to Dt $23^{10.11}$, a nocturnal accident while on a military expedition excluded a man from the camp for the next day. As evening came on he had to bathe, and he returned to camp when the sun was down. Corresponding to the abnormal discharge of women is that of men described in Lv $15^{2.3}$. The various forms of uncleanness produced by it are elaborately referred to (vv. $^{4-12}$). The rites of purification are the same as for a woman's abnormal issue.

That *childbirth* made the mother unclean is only what was to be expected. It is surprising that Nowack should regard this as obviously a development in later time of the old view that pollution was incurred by intercourse as by menstruation (*Heb. Archäol.* ii. 284). The uncleanness of childbirth is an almost universal belief among primitive peoples.[*] It was also an Arab custom in certain places to build a hut outside the camp, where the woman had to stay for a time (Wellh. *l.c.* p. 170). The fact clearly is, that, so far from being a late development among the Israelites, it was a survival from prehistoric times. And a modified survival, for it is striking that whereas the newborn infant is almost universally regarded as in a high degree taboo, this has not survived among the Hebrews (though Ezk 16^{4} may allude to it).[†] The rule in Lv 12 (P) enjoins that after the birth of a boy the mother shall be unclean, as in menstruation, for a week, and shall continue 'in the blood of *her* purifying' thirty-three days. During the first week her uncleanness would of course be infectious, but possibly this was not so during the rest of her forty days. All that is required is that 'she shall touch no hallowed thing, nor come into the sanctuary.' When a girl was born, the two periods were doubled. It was commonly believed that the symptoms persisted much longer after the birth of a girl than after that of a boy. The numbers thirty-three and sixty-six are chosen to make up with seven and fourteen the favourite number of forty and its multiple eighty. When the requisite period was over, she offered a lamb of the first year for a burnt-offering, and a young pigeon or a turtle dove for a sin-offering. If too poor to offer a lamb (as was the mother of Jesus, Lk 2^{24}), a second young pigeon or a second turtle dove might be substituted.[‡]

The *'prohibited degrees'* belong to the same order of ideas: on this subject the article MARRIAGE may be consulted. On forbidden degrees in Arabia see W. R. Smith, *Kinship*, ch. vi.; and, on the whole subject, especially Westermarck, *The History of Human Marriage*², chs. xiv. xv., and the summary pp. 544–546.[§] The 'bastard,' who is excluded from the assembly of J″, is probably the offspring of such a marriage (Dt 23^{2}).[‖] Probably Moabites and Ammonites are excluded on the ground of the incestuous origin of the two peoples (Gn 19^{31-38}). The exclusion of eunuchs (Dt 23^{1}) is apparently meant to refer, in the first place at any rate, to those who had mutilated themselves for religious reasons. This is an example of a taboo originating in a protest against heathenism.

Some see analogous ideas in the prohibition of 'unlawful mixtures.' Sowing a field with two kinds of seed made the whole crop holy, that is, taboo. Linen and wool might not be used in the same garment; the clothing proper to one sex might not be worn by the other;[¶] an ox and an ass might not be yoked together to the plough; nor must cattle gender with a diverse kind (Dt $22^{5.9-11}$, Lv 19^{19}). Parallels cannot here be quoted so easily. The Kamschatkans at the beginning of the 18th cent. had a taboo on cooking fish and flesh in the same pot.* Frazer gives several examples of taboo on mixing different kinds of food in the stomach (*l.c.* ii. 336, 337). Baentsch says that mingling of stuffs from the animal and vegetable kingdoms played a rôle in magic.

---

[*] 'The object of secluding women at menstruation is to neutralize the dangerous influences which are supposed to emanate from them at such times. That the danger is believed to be especially great at the first menstruation appears from the unusual precautions taken to isolate girls at this crisis. . . . In short, the girl is viewed as charged with a powerful force which, if not kept within bounds, may prove destructive both to the girl herself and to all with whom she comes in contact. . . . The uncleanness, as it is called, of girls at puberty and the sanctity of holy men do not, to the primitive mind, differ from each other. They are only different manifestations of the same mysterious energy which, like energy in general, is in itself neither good nor bad, but becomes beneficent or maleficent according to its application' (Frazer, *l.c.* iii. 232, 233). For the Arabic custom see W. R. Smith, *l.c.* 448. The Basutos purified girls at womanhood by sprinkling (Tylor, *Primitive Culture*³, ii. 432).

[*] 'Women after childbirth and their offspring are more or less tabooed all the world over' (Frazer, *l.c.* iii. 463). See also Jevons, *Introd. to the Hist. of Rel.* 74, 75.

[†] See Jevons, *l.c.* 75, 76; Tylor, *l.c.* ii. 431.

[‡] For savage purifications see Tylor, *l.c.* 432, 433.

[§] The Australian black-fellows of the interior, quite uncivilized as they are, have developed a most elaborate system of forbidden degrees (see Spencer and Gillen, *l.c.* ch. ii.).

[‖] Bertholet thinks they were the offspring of the mixed marriages in the time of Ezra and Nehemiah. It is questionable if the chapter is so late as that, and the reference in the same context to Moab and Ammon confirms the other view.

[¶] 'This is not a mere rule of conventional propriety, but is directed against those simulated changes of sex which occur in Canaanite and Syrian heathenism' (W. R. Smith, *OTJC*² 365).

Possibly we should regard as an extension of the law of issues, the uncleanness of the *human excreta*. Ezekiel protests against using human excrement for fuel with which to bake bread, on the ground of the uncleanness that would then be communicated to the food, and is permitted to substitute animal excrement, which apparently was not defiling, or defiling in a much slighter degree, and is often used now in Syria for fuel (Ezk $4^{14.\,15}$). The law in Dt 23^{12-14}, directed to secure cleanness in the camp, is regarded by some as a mere impracticable refinement of a theorist. But numerous savage parallels may be quoted for this as for all the Hebrew war taboos. Frazer says that the rules of ceremonial purity prescribed for Hebrew warriors are 'identical with rules observed by Maoris and Australian black-fellows on the warpath.' The precise rule in question is found among Australians, Melanesians, South Africans, and Fijians. Frazer suggests that the original motive in the case of the Hebrews was identical with the avowed motive of savages, 'a fear lest the enemy should obtain the refuse of their persons, and thus be enabled to work their destruction by magic' (*l.c.* i. 328).† It is not necessary to appeal to savages; the same custom is found among the Arabs (Wellh. *l.c.* p. 173). We should perhaps bring under the same law the prohibition of woollen garments to the priests, because they caused sweat (Ezk $44^{17.\,18}$). The clause 'they shall not gird themselves *with anything that causeth* sweat' is regarded by Cornill and Toy as a gloss, and the translation is a little uncertain; but it correctly represents what must have been the object of the prohibition, as is shown by the Syrian and Egyptian parallels. A law of decency underlies the requirement in Ezekiel and P that the priests should wear linen drawers. This was a survival of the feeling that the deity dwelt in the altar, and that the person must not be exposed to it (Ezk 44^{18}, Ex $28^{42.\,43}$, Lv 6^{10} 16^{4}). In the Book of the Covenant the same result was secured by the prohibition of steps up to the altar (Ex 20^{26}, see W. R. Smith, *OTJC*^{2} p. 358).

(*b*) *Uncleanness connected with food.* — The article FOOD deals very fully with much of this subject, and it is unnecessary to repeat in detail what is said there. Naturally, however, questions arise in this article that do not arise in an article on Food. The taboos on food among savage peoples are very numerous. These cannot be explained as due to sanitary considerations or as the expression of natural disgust. The reason is religious. It is very probable that many cases are to be explained as originating in totemism.‡ But it is not only among savages that such restrictions on food are found. They survive among many civilized peoples of antiquity — Indians, Egyptians, Syrians, Greeks, and others. According to Wellhausen, the distinction between clean and unclean food was not known to the ancient Arabs; they recognized only usual and unusual (*l.c.* 168, 169). At the same time, taboos in some sense seem from Wellhausen's own statements to have been recognized. Still in this, as in some other respects, the Hebrews preserve the more primitive type.* In the Flood story (J^2) the distinction between clean animals and animals not clean is presupposed as known, though the technical word for unclean (טָמֵא) is not used (Gn 7^{2} 8^{20}). P, on the contrary, represents man as hitherto vegetarian; and when animal food is first permitted, no restriction is made, except that the blood should not be eaten, since it was the vehicle of the life (Gn 1^{29} $9^{3.\,4}$). We have lists of clean and unclean animals in Dt 14^{4-20} and Lv 11.†

The criterion for clean beasts, that they must part the hoof and chew the cud, should probably be regarded as a late attempt to define a class by a single formula, the members of which had already been selected on other grounds. The camel, hare, and coney (*Hyrax Syriacus*) are pronounced unclean, because while they chew the cud they do not part the hoof, and the swine for the opposite reason. The *camel* was eaten by the Arabs and used in sacrifices: it may conceivably have been excluded on this latter account. There are traces of a belief in Arabia 'that camels, or, at all events, certain breeds of camels, were of demoniac origin' (W. R. Smith, *RS*^{2} 283, n. 2).‡ The *hare* was probably a sacred animal, for 'hares' heads were worn as amulets by Arab women' (W. R. Smith, *l.c.* 382), and the foot was used as a charm against demons (*Kinship*, 211). While the Arabs eat it, the other inhabitants of Syria, the Turks and the Armenians, abstain from it, and the Parsees regard it as the uncleanest of animals; the ancient Britons regarded it as taboo, 'gustare fas non putant' (Cæs. *de B. G.* v. 12. See Dillm. and Kalisch, *Leviticus*, ii. 55).§ It was supposed to menstruate, and was thus assimilated to mankind. It was regarded as very lascivious (cf. Barn. 10). The *coney* (*Hyrax Syriacus*) is still avoided for food by Christians and Mohammedans in Abyssinia. In the Sinai peninsula it, with the panther, is believed to have been originally human, and he who eats its flesh, it is said, will never see his parents again (W. R. Smith, *RS*^{2} 88, 444). There is much evidence to show that the *swine* was a holy animal. While forbidden food to the Semites, the taboo was variously explained as due to its holiness or uncleanness. It was eaten only in such mystic sacrifices as are described in Is 65^{3-5} $66^{3.\,17}$. The Egyptians regarded it as highly taboo, not only as food, but to touch; yet once a year sacrificed it to the moon and Osiris, and ate the flesh. Its identification with the demon Set or Typhon, the enemy of Osiris, is probably a degradation from its original identification with Osiris himself. Among the Syrians it seems to have been regarded as an incarnation of Tammuz. Its flesh was also taboo to worshippers of Attis. It was further supposed to possess magical powers.*

---

* Brinton, *Religions of Primitive Peoples*, p. 109.

† Hair and nail parings are often buried with great precaution, for a similar reason. The 'hill of foreskins' (Jos 5^{3}), according to one interpretation of its meaning, would be a Hebrew parallel (cf. 24^{30} LXX).

‡ See W. R. Smith, *Kinship*, ch. viii. and pp. 304–311, *OTJC*^{2} 366, 367, *RS*^{2} *passim*; Spencer and Gillen, *Native Tribes of Central Australia*, 167–169, 202–211, 467, 468; Jevons, *Introd. to the History of Rel.* 102, 116–127.

* In spite of this, there is one important respect in which the primitive type seems not to be preserved. Frequently certain foods are taboo to people in various stages of life or certain physical conditions, or again to particular orders of people. Elaborate rules may be found in Spencer and Gillen, *l.c.* 256, 467–473; Frazer, *l.c.* i. 391. Only slight survivals are to be found among the Hebrews, *e.g.* taboo on wine and whatever comes from the grape, imposed on the Nazirite, and his mother before his birth, and the prohibition of wine to the priests before offering. With such slight exceptions, the food taboos are binding on all Israelites. In this connexion Saul's taboo on eating food till evening, unwittingly violated by Jonathan (1 S 14^{24-31}), may be referred to. We naturally sympathize with Jonathan's common-sense criticism; but this was somewhat rationalistic for that age, and the writer represents J″ as too much offended by its transgression to answer when consulted. Saul wished by this strong taboo to assure supernatural aid, such as would be cheaply purchased by the impaired efficiency of his men.

† The relation between these laws is disputed. Some regard the law in Deut. as a secondary addition. It seems at least probable that the two sections are mutually independent; and it is not unlikely that they draw on oral or written torah of the priests. Driver and White assign Lv $11^{2-23.\,41-47}$ to H. Baentsch ('Handkom.' *Ex.–Lev.*) objects that the passages exhibit too little of H's phraseology. For a very elaborate analysis see *Oxf. Hex. ad loc.*, and art. LEVITICUS.

‡ 'I take it, however, that the eating of camel's flesh continued to be regarded by the Arabs as in some sense a religious act, even when it was no longer associated with a formal act of sacrifice; for abstinence from the flesh of camels and wild asses was prescribed by Symeon Stylites to his Saracen converts; and traces of an idolatrous significance in feasts of camel's flesh appear in Mohammedan tradition' (W. R. Smith, *l.c.* 283).

§ On the Yorkshire superstition of the close connexion between hares and witches see Frazer, *l.c.* iii. 408.

The criterion that clean animals must be ruminants with cloven hoof excluded the ass, horse, and dog, and all beasts of prey. The *ass* seems from Jg 6^{4} to have been commonly used for food: the Midianites 'left no sustenance in Israel, neither sheep, nor ox, nor ass' (cf. 2 K 6^{25}). The Arabs seem to have regarded it as a sacred animal, and it was forbidden to his converts by Symeon Stylites, just as our abstinence from horse-flesh is due to the prohibition to Christian converts from the worship of Odin, to whom it was sacrificed. The story that the Jews worshipped the ass may point to the worship of it in Syria. The flesh and hoofs were used for magical purposes by the Arabs (see W. R. Smith, *Kinship*, 308; *RS*^{2} 468).† The *horse* was little used by the Hebrews, even in war; probably the uncleanness of the ass would be felt to extend to it. Josiah 'took away the horses that the kings of Judah had given to the sun' (2 K 23^{11}); this connexion with idolatry may account for its uncleanness. Four horses were cast into the sea at Rhodes at the annual feast of the sun (W. R. Smith, *RS*^{2} 293). The *dog* seems to be sacred from the reference to its use in the mysteries (Is 66^{3}). Among the Harranians dogs were said in the mysteries to be the brothers of men. They seem also to have been sacred among the Carthaginians and Phœnicians. 'In Moslem countries dogs are still regarded with a curious mixture of respect and contempt' (W. R. Smith, *l.c.* 291, 292).‡ *Beasts of prey* were naturally regarded as unclean, because they fed on the blood as well as the flesh of their victims. Most of the unclean birds were birds of prey or fed on carrion. Others lived in ruins, and were regarded as companions of the demons who haunted them. (For the ostrich as a demon cf. W. R. Smith, *l.c.* 129, n. 2). It is curious to observe how unclean birds mentioned in these lists are catalogued with the uncanny monsters which are to dwell in the ruins of Babylon (Is $13^{21.22}$, Jer 50^{39}) or Edom (Is 34^{11-16}). No list of clean birds is given. See article FOOD for those that were eaten. It need only be mentioned that the *dove* was permitted, though to the Syrians taboo in a high degree.§

Fish also were taboo to the Syrians, who regarded ulcers as the penalty for eating them (W. R. Smith, *l.c.* 292, 449). The Hebrews did not sacrifice, but were permitted to eat them. The only restriction was that fish without fins and scales might not be eaten. The reason was, no doubt, their snake-like appearance, the serpent being unclean (see FOOD).

Further, in the Law of Holiness (H) '*swarming things*' (see art. CREEPING THINGS, where the two terms so translated are distinguished) are forbidden (Lv 11^{41-44}). What was included under this term may be seen in the article mentioned (vol. i. 518^{b}). The prohibition of reptiles is explained by the superstitions universally attached to serpents. The Arabs frequently regarded them as demoniacal, and identified them with the *jinn* (W. R. Smith, *l.c.* 120, 121, 129, 130, 442, *Kinship*, 197; and especially Wellh. *l.c.* 152–155).* The serpent of Gn 3 illustrates the demoniacal nature of these reptiles. It is curious that the list in Deuteronomy speaks only of 'winged swarming things,' by which apparently winged insects are meant. These are regarded as unclean also in P (Lv 11^{20}, unless this belongs to H), for the phrase 'winged swarming creatures that go on all fours' seems to mean the same as 'winged swarming creatures.' Four kinds of *locusts* are permitted for food (see FOOD, LOCUST). Whether this is a variation from Dt 14 is uncertain. On the one hand, the rule in the latter passage seems to admit of no exception. On the other, the term translated 'fowls' in Dt 14^{20} may be used in this restricted sense of 'winged swarming things,' in which case the meaning will be that certain winged insects are clean and lawful food. Inserted in Lv 11 we have a list of things the carcases of which produce uncleanness through contact (vv.$^{24-38}$). This list includes the unclean quadrupeds, and of swarming things—the weasel, the mouse, certain lizards, and the chameleon.

It is curious that the list is not more extensive, especially as the author enters on a casuistical discussion of details. The swarming things mentioned were regarded as demoniacal, the mouse is coupled with the swine in Is 66^{17} as eaten in the mysteries there denounced (see W. R. Smith, *Kinship*, 302, 303, *RS*^{2} 293; A. Lang, *Custom and Myth* (1893), 103–120). This section is probably a later addition, not at all on the ground that pollution by contact is a late refinement of pollution by eating, for taboo on contact is very ancient, but because of its casuistry and its interruption of the context. Touching involves uncleanness till the evening, bearing the carcass of the quadrupeds induces uncleanness in a deeper degree; for not only is the person unclean till the evening, but he must wash his clothes. The carcases of swarming things infect with uncleanness all clothing or vessels, and the food in them. The vessels are unclean till the evening, and must be steeped in water. If made of earthenware they must be broken, as the uncleanness would sink into the pores. A fountain or cistern, however, remained clean, though whatever touched the unclean thing (*i.e.* to remove it) became unclean. Seed was not polluted by contact, unless water, by which it would soak in, had been put upon it.

Contact with a clean beast that died a natural death produced uncleanness till the evening. Eating of it or carrying it involved the washing of clothes in addition. In Lv 17^{15} bathing of the body is also required.

This law is made to apply to the stranger as well as the home-born. In Dt 14^{21} the prohibition is made absolute for the Hebrews, and based on their holiness to J″. But the flesh of such animals may be given to the stranger who is sojourning in Israel, or sold to the foreigner.† It must be remembered that the law is not sanitary, but ritual; there was therefore no reason why a taboo, binding on the holy people, should be imposed on those who are not members of it. For the priestly legislators the land is holy, because J″ dwells in it, and therefore those who are in it, Israelites or not, must observe precautions against uncleanness. The priests are forbidden to eat such food absolutely (Lv 22^{8}). The reason was that the flesh had still the blood within it. Blood was always prohibited (1 S 14^{33}, Dt 12^{23-25}, Gn 9^{4}, Lv 17^{10-14} 3^{17} etc.), but the prohibition seems not always to have been observed (1 S 14^{33}, Ezk 33^{25}). It, with the fat, was regarded by primitive peoples as in a special sense the seat of life, and in ordinary sacrifice was made over to the deity. It is probable, however, that in the earliest type of sacrifice it was devoured by the worshippers, and in the mystic sacrifices that are referred to in Is 65. 66 this feature reappeared. The breaking of the dog's neck was a killing of it without shedding the blood (see, further, under FOOD, SACRIFICE).[*]

---

* See Movers, *Die Phönizier*, i. 218-220 (where several further exx. are collected); W. R. Smith, *l.c.* 153, 218, 290, 291, 411, 475; Frazer, *l.c.* ii. 299-311; Jevons, *l.c.* 118, n. 3; the very elaborate discussion in Kalisch, *Leviticus*, pt. ii. 79–93; also art. FOOD.

† According to Ex 34^{20} (JE) the firstling of an ass had to be redeemed with a lamb, but if not redeemed its neck must be broken. The later law (Lv 27^{27}) prescribed that an unclean firstling should be redeemed at the priest's valuation, plus one-fifth, but if not redeemed it must be sold.

‡ Frazer mentions that the dog is regarded by the Ojibways 'as unclean, and yet in some respects as holy' (*Enc. Brit.*^{9} art. 'Taboo').

§ W. R. Smith, *Kinship*, 196; *RS*^{2} 219. The author points out that though a 'clean' bird in legal times, we never read of it in OT as an article of diet. It was not used for sacrifices accompanied by a meal, but in burnt-offerings and sin-offerings, which had a connexion with mystical sacrifices (p. 294).

* For India see Frazer, *The Golden Bough*^{2}, i. 456, 457.

† In Ex 22^{31} (JE) 'flesh that is torn of beasts in the field' is not to be eaten, because the Hebrews are holy to J″; it must be cast to the dogs.

The 'sinew of the thigh' is said in Gn 32^{32} not to be eaten by the Israelites, though no reference is made to this in the Law. It became taboo through the touch of Jacob's Divine antagonist. Probably, as W. R. Smith suggests, 'the thigh is a seat of life and procreative power' (*RS*² 380).[†]

The thrice repeated (Ex 23^{19} 34^{26}, Dt 14^{21}) taboo on *seething a kid in its mother's milk* is discussed in the articles FOOD, GOAT. Here it is necessary to add only what is required by the nature of this article.

We may safely set aside the view that the rule rests on sentimental considerations. It is directed against some religious or magical practice in connexion with the dish. The common explanation that goat's milk was used to produce fruitful crops, while true in itself, does not account for this special prohibition. W. R. Smith suggests that milk was a substitute for blood, so that this dish would violate the taboo on blood (*l.c.* 221). But neither does this explain why it is *a kid* so prepared that is forbidden. If goat's milk possessed magical qualities, these might be supposed to be present also in a sucking kid. The combination of the two doubles the magical intensity, and we may suppose that the rite condemned was originally pastoral rather than agricultural. The subsequent use of goat's milk in agriculture is a natural application of a pastoral charm for fruitfulness. The question may further be raised whether it has not been too hastily assumed that 'mother's milk' means simply goat's milk, *i.e.* the milk of any goat. The physical blood relation between the kid and its dam would make the magic more efficacious, doubling it in upon itself.

As examples of the care with which the Jews practised these laws, Dn 1^{8}, To 1^{10-12}, Jth $12^{1.2}$, Ad. Est 14^{17}, 1 Mac $1^{62.63}$, 2 Mac 6^{18} 7^{1} may be quoted.

The ultimate origin of the uncleanness of certain animals probably lies in the fact that they were *totems of primitive Semites.* It is true that some of the greatest Semitic scholars doubt if the Semites passed through the totem stage. Egyptologists also seem to be unanimous in denying that totemism ever prevailed in Egypt. But it is a question on which the anthropologist also, with the comparative method, must be consulted; and Robertson Smith, the chief defender of the theory in question, spoke with the authority not only of a most eminent Semitist, but that of an expert anthropologist. The theory gains much of its plausibility from the light and order it brings to a number of otherwise obscure and incoherent facts. That the unclean foods are so numerous is perhaps due to the very heterogeneous origin of the Hebrew people, the totems of many stocks being regarded as forbidden food by the united nation. At the same time it must be remembered that among savage races totem stocks exist side by side in the same community, without necessarily tabooing each other's totems, though they may avoid the ostentation with which they feast on the totem of an enemy. Further, even in totem clans there are taboos on food at certain stages of life or in certain conditions, which are otherwise lawful food. We need not, of course, look for actual totemism in the historical period of the Hebrew people. But if the Semites passed through totemism, numerous survivals must be expected, and part at least of the prohibitions probably are to be accounted for in this way. Two principles, however, even in this case, may have been at work. The lists in Deuteronomy and Leviticus may include food traditionally taboo. In this case the Law simply endorses, as in so many instances, ancient practices. But they may also forbid food, not on the ground of immemorial custom, but because its use in heathen rites constituted a religious danger to Israel. It ought to be added that the proof of the demoniacal or magical qualities attaching to certain unlawful foods in no way conflicts with their totem character. On the contrary, as is well illustrated by the connexion between the *jinn* and the wild beasts among the Arabs, these qualities are probably attributed to them in virtue of their original totem significance.

(*c*) *Uncleanness connected with leprosy.*—This disease and the purifications after cure are so thoroughly dealt with in the article LEPROSY that it is unnecessary to add more here than a few supplementary remarks. For the view there mentioned, that the leper was regarded as the victim, in a peculiar degree, of a stroke of God, like the man hanged on a tree, 'accursed of God,' we may compare the euphemistic name for it among the Arabs, 'the blessed disease,' *mubâraka* (Wellh. *l.c.* 199). The man 'smitten by God' necessarily becomes unclean. We find examples of a belief among savages that leprosy may be caused by eating the totem animal, though it must be added that other diseases might be so incurred, skin diseases, however, predominating. With this we should compare the fact that the Egyptians, to whom the swine was taboo in a high degree, thought that drinking pig's milk caused leprosy (Frazer, *l.c.* ii. 306, 307). The rules laid down for lepers corresponded to those prescribed for mourners; perhaps the feeling entered in that leprosy was a living death. The ritual of releasing the live bird into the open field, rests on a similar idea to that expressed in the 'goat for Azazel.' A similar custom was practised by widows in Arabia on release from the uncleanness of widowhood, at the end of a year.[*] The bird is said to have died. An Assyrian parallel is, 'May the bird to heaven cause it (my groaning) to ascend' (*RP* ix. 51). It seems strange that a guilt-offering should be required. Nowack (*Heb. Arch.* ii. 289) thinks the author regarded a sin-offering as inadmissible in this very peculiar rite, and further took the rite over from an earlier time, and did not freely create it (see, further, LEPROSY).

(*d*) *Uncleanness connected with death.*—This also is familiar among primitive peoples. That the numerous rites which have grown up around the dead express partly a horror of the spirit and dread of its return, is true.[†] But there are many examples of rites designed to continue with the dead the communion held with them while living.[‡] Frequently the taboos on the dead are attributed to ancestor-worship; but this view seems improbable, for we find the taboo more widely prevalent than it is likely ancestor-worship ever was,—and the proofs for this among the Hebrews are certainly not stringent. The taboos rest on the belief that the soul survives the body, and lingers near its earthly house or its grave. How serious the danger was taken to be, is clear from the highly infectious character attributed to it.[*] This prevails, probably, among all savage peoples. The Hebrews are in this respect more primitive than the Arabs. Among the latter, mourning does not usually make unclean; and in Islam contact with the corpse does not defile, though it is doubtful if this rule prevailed among the ancient Arabs (Wellh. *l.c.* 171, 172). Such cases, among the Hebrews, as those of contact with the carcases of animals have already been dealt with. The human corpse was regarded by them as most defiling. Although we have no very early evidence, it is unquestionable, in view of the savage parallels, that they always had this belief, and, in more primitive times, probably in a much intenser form. The late codification of the laws in no way disproves, in itself, the antiquity of the observances.

[*] See W. R. Smith, *Kinship*, 309, 310, *RS*² 234, 235, 338–352; Frazer, *l.c.* i. 353–362; Jevons, *l.c.* 73, 74.

[†] For the same taboo among the N. American Indians, accounted for by a mythical story, see Frazer, *l.c.* ii. 419–421. Kaffir men also will not eat it, it is 'sent to the principal boy at the kraal, who with his companions consider it as their right.'

[*] Wellh. *l.c.* 171; W. R. Smith, *l.c.* 422. The reference to Frazer, *l.c.*, in the article LEPROSY, corresponds to iii. 15 in the second edition.

[†] Frazer, *l.c.* i. 325, etc.; Tylor, *l.c.* ii. 25–27; W. R. Smith, *l.c.* 336, n. 2, 369, 370.

[‡] W. R. Smith, *l.c.* 322, 323, 370. 'While the rudest nations seek to keep up their connection with the beloved dead, they also believe that very dangerous influences hover round deathbeds, corpses, and graves, and many funeral ceremonies are observed as safeguards against these' (336, n. 2). 'There is a tendency at present, in one school of anthropologists, to explain all death customs as due to fear of ghosts. But among the Semites, at any rate, almost all death customs, from the kissing of the corpse (Gn 50^{1}) onwards, are dictated by an affection that endures beyond the grave' (323). See, also, Tylor, *l.c.* 32–34 (especially the pathetic dirge there quoted); Jevons, *l.c.* 46–58.

The fullest legislation on the subject is to be found in Nu 19 (P). It is there enjoined that every one who touches 'the dead body of a man shall be unclean seven days.' If a man die in his tent, every one who is in the tent, or who enters it, is unclean for seven days; and any vessel standing open in the tent is unclean. In the open field actual contact is necessary to produce defilement. But such contact was not merely with a body dead by the sword or natural death, but even with a bone or the grave. Hence it became customary to whiten graves, that they might be readily avoided and involuntary uncleanness not be contracted (Mt 23^{27}, Lk 11^{44}). The striking illustration of the infectious uncleanness of the corpse given in Hag 2^{11-13} has been already referred to. The law in Nu 19^{22} is that whatever the person thus unclean touches shall be unclean, and the person who touches this object shall be unclean till even. In Nu 5^{2} those unclean by the touch of a corpse are put out of the camp along with lepers and those who have issues. Josiah defiled the altars at the high places with dead men's bones (2 K $23^{16.20}$). Similarly, the dead bodies of Gog's host defiled the land, which was cleansed only by their burial (Ezk 39^{12-16}). In old Israel the kings were buried close to the temple, a practice warmly denounced by Ezekiel as defiling it (43^{7-9}). Bloodshed defiles the land, and the uncleanness can be removed only by the blood of him that shed it (Nu 35^{33}).[†] Hence warriors, while holy persons, as already shown, were rendered unclean by the slaughter of men in war. Thus, after the slaughter of the Midianites, those who had killed any one or touched the slain had to remain outside the camp seven days, purifying themselves on the third and seventh day. Every thing that could endure fire was passed through it, but was also purified with the water of separation. All that could not endure the fire was passed through water. Clothes had to be washed on the seventh day (Nu 31^{19-24}). Some of the taboos on warriors have been already discussed. The present rule is relegated by some to the class of legal refinements which had never any existence in the national life. Here, again, the comparative method warns us against too hasty a conclusion. Even more stringent rules are found among savages.[*] Their origin seems to be due to dread of vengeance from the ghosts of the slain. Among the taboos to which the Nazirite was subject was that on contact with the dead. This and the purification prescribed for its violation are fully discussed in the art. NAZIRITE.

The priest, according to Ezekiel, must come at no dead person to defile himself, except parent, child, brother, or unmarried sister.[†] In the case of the death of such a relative, even after he is cleansed he must wait seven days, and then, on entering the sanctuary, he must offer a sin-offering (Ezk 44^{25-27}). A curious relaxation of the law of uncleanness is that those who are unclean by contact with a dead body may yet eat the passover (Nu 9^{6-12}). Certain mourning customs also produced uncleanness. Hence the Israelite, when offering his charity tithe, was required to affirm that he had not eaten of it while mourning, nor removed it from his house while unclean, nor given of it for the dead (Dt 26^{14}). If he had eaten of it in his mourning, it would have contracted his uncleanness.[‡] The reference to giving it for the dead is of uncertain meaning. The sense may be that he has not sent it to the friends of the deceased for a funeral feast (which would make the whole tithe unclean), or that he has not (in accordance with a very widespread custom) placed some of it in the tomb to serve the spirit for food on its road to Shĕôl, or that he has not used it in sacrifices to the dead (cf. Jer 16^{7}, itself an obscure passage). The bread of mourners is referred to in Hos 9^{4} as causing uncleanness. Other mourning customs, such as cuttings in the flesh, or making baldness between the eyes for the dead, are forbidden in Dt 14^{1}, Lv 19^{28}, as incompatible with the holiness of the people of J". Both are well-known savage customs,[§] and were regarded as legitimate signs of mourning (Jer 16^{6}, Ezk 7^{18}, Is 22^{12}) apparently down to the time of Ezekiel (see CUTTINGS IN THE FLESH, MOURNING). The mourning custom for the captive whom the Israelite (Dt 21^{10-13}) takes to wife is interesting. The shaving of head and paring of nails remove the uncleanness of mourning (cf. the shaving of hair in the cleansing of the leper, Lv 14^{9}). A similar rite was performed by widows in Arabia after the twelve months they spent in a hut outside the camp, neither dressing the hair nor cutting the nails.[‖]

Purification from the uncleanness caused by a dead body was effected by the 'water of separation,' made by pouring water on the ashes of a red heifer (Nu 19). The heifer was completely burnt, along with cedar wood, hyssop, and scarlet. The burning of the blood in this rite is unique; it was clearly intended to communicate an intenser sanctity to the ashes. The ashes were kept in a clean place outside the camp, and 'living water' was poured on them. Then the unclean was sprinkled by a clean person on the third and the seventh days, and on the latter he washed his clothes and bathed his body, and was clean at even. The priest who superintended the slaughter and burning of the heifer, and the man who burned her, had to wash their clothes, bathe, and be unclean till even. He who gathered the ashes had to wash his clothes, and be unclean till even; he who sprinkled the water had to wash his clothes, and he who touched it was unclean till even (see, further, art. RED HEIFER). The purifications prescribed after the slaughter of the Midianites (Nu 31^{1-24}), including fire for metal, have been already referred to.

---

[*] 'Among the Maoris any one who had handled a corpse, helped to convey it to the grave, or touched a dead man's bones, was cut off from all intercourse, and almost all communication, with mankind. He could not enter any house, or come into contact with any person or thing, without utterly bedevilling them. . . . And when, the dismal term of his seclusion being over, the mourner was about to mix with his fellows once more, all the dishes he had used in his seclusion were diligently smashed, and all the garments he had worn were carefully thrown away, lest they should spread the contagion of his defilement among others' (Frazer, *l.c.* i. 323, 324; Jevons, *l.c.* 57, 58, 76–78).

[†] When the offender was unknown, guilt was purged from the land by the ritual of the heifer, whose neck was broken in an uncultivated valley with running water (Dt $21^{1.9}$). See HEIFER; Driver, *ad loc.*; and W. R. Smith, *l.c.* 370, 371.

[*] Frazer, *l.c.* 331-339. The account of the Pima Indians is especially noteworthy as showing that taboos far more 'impracticable' than those enjoined in Nu 31 are actually observed. The uncleanness and purification prescribed in this passage for warriors after the return from battle are similar to those recognized over a very wide area.

[†] Unmarried sister, because marriage was regarded as transferring her to the husband's family. The same feeling underlies the law that the priest's daughter on marriage to a stranger loses the right to eat of the heave-offerings of the holy things (Lv 22^{12}). Women could not eat of the sin-offering (Lv 6^{29}), guilt-offering (7^{6}), or meal-offering (6^{18}), on account of their high sanctity.

[‡] For taboos on mourners and mourning customs see Frazer, *l.c.* i. 388, 389; W. R. Smith, *l.c.* 322–326, 336; Wellh. *l.c.* 170, 171, 177 ff.; Spencer and Gillen, *l.c.* 499, 500–507, 509.

[§] See, for example, Spencer and Gillen, *l.c.* 509, 510.

[‖] W. R. Smith, *l.c.* 428, 447; Wellh. *l.c.* 171. The meaning of the custom is clearly brought out by Frazer, *l.c.* i. 388, 389. He quotes parallels from mourning customs in ancient India, Borneo, and the West Coast of Africa. It is very instructive, as throwing light on the underlying idea, that moral uncleanness is purged away in some cases by the shaving off of all the hair and bathing in the sacred stream.

iii. UNCLEANNESS AND RITUAL.—Throughout the history of Israel uncleanness disqualified a man for the worship of God. David's absence from the sacred festival was fully accounted for by the supposition of his uncleanness (1 S 20^{26}); Jeremiah was 'restrained,' probably by uncleanness, and could not go into the temple (Jer 36^{5}). The idea has undergone an ethical transformation when the song of the seraphim and the smoke of the Divine resentment (?) make the heart of Isaiah quail at the consciousness that in his moral impurity he has dared to cross the temple threshold (Is 6^{3-5}). In spite of Ezekiel's complaints that the priests had not caused the people to discern between the clean and the unclean (22^{26}), it is clear that some rules were all along observed. Yet these permitted practices which, from the standpoint of Judaism, were highly irregular. Uncircumcised foreigners were allowed to enter the sanctuary (Ezk 44^{7}). Ezekiel insists that this shall be absolutely forbidden in the future (44^{9}). Uncircumcision in the male worshipper was regarded as uncleanness, as a state which precluded him from communion with God. So we read that into the restored Jerusalem, the holy city, there shall come no more the uncircumcised and the unclean (Is 52^{1}). The rule is strongly enforced in the Law. Similarly, the unclean may not pass along the holy way by which pilgrims come up to the temple (Is 35^{8}). The sacred feasts may be observed by any clean Israelite. The meat of the peace-offerings may be eaten by any clean person, but any one eating with his uncleanness upon him will be cut off by the stroke of Divine judgment (Lv 7^{19-21}).* On the other hand, both clean and unclean were permitted to eat the flesh of sacrificial animals if they were not brought in sacrifice (Dt 12^{15} 15^{22}), but the blood had to be poured out on the earth as water. Naturally, uncleanness disqualified the priests for eating holy things (Lv 22^{3-7}, cf. Is 52^{11}). If, further, the sacred food touched anything unclean, it might not be eaten (Lv 7^{19}).

A very interesting law is that forbidding an iron tool to be used on the stones of which the altar is constructed (Ex 20^{25}, Dt $27^{5.6}$, Jos 8^{31}). Exodus, it is true, does not mention iron; it simply forbids the altar to be polluted by the use of a tool to hew the stones. But the point of the prohibition lies in the reference to iron. It can scarcely be that the requirement that the stones shall be unhewn is a protest against the intrusion of culture into religion. Nor can there be any question of offending the deity that dwelt in the stone, for it is not a monolith, but a structure built out of several stones, that the author has in view. Nor is the use of iron in war and its consequent connexion with death regarded as unfitting it for the service of God (in this case 1 Ch 22^{8} might be compared). The taboo on iron in ritual is very widely observed. It is wholly due to 'the conservatism of the religious instinct.' Long after iron came into common use in daily life, the dread of innovation in religion forbade it to be employed in ritual. Hence bronze knives continued to be used in religious ceremonies after iron knives were in common use. But it is even more striking that survivals from the Stone Age should persist into the Iron Age than that we should have survivals from the Bronze Age. Yet of this there are several examples. The true parallel to the prohibition of the iron tool on the altar is Zipporah's circumcision of her son with a flint (Ex 4^{25}), and Joshua's circumcision of the Israelites with flint knives (Jos $5^{2.3}$).*

Lastly, the references to foreign lands as unclean have a ritual significance. Palestine was the only land in which J″ could be worshipped with sacrifice and offering, unless soil were actually taken from the clean into the unclean land, as was done by Naaman (2 K 5^{17}), whose point of view, we need not doubt, was shared by ordinary Israelites. Exile was therefore regarded with dread, for it severed the connexion of the worshipper with his God. And since neither tithe nor first-fruit could be offered, the crops remained unclean, and those in an unclean land were compelled to eat unclean food (Hos $9^{3.4}$).

iv. UNCLEANNESS IN NT.—Since nothing in the Law touched the daily life of the Jew at so many points as the laws of uncleanness and purification, and that not only in the Dispersion (where the sacrificial system could not legally be practised) but in Palestine itself, it was natural that the scribes should develop the rules concerning it with the most painful minuteness. Casuistry, in fact, ran riot in this inviting field. The NT has many references to the laws of purification, and the largest of the six books of the Mishna (סדר טהרות) is devoted to this subject. Thirty chapters in it are devoted to the single subject of vessels. The rules went far beyond anything laid down in even the most casuistical Pentateuch laws. This is shown most of all in the regulations about the Washing of Hands. It was granted that these were not found in the Law, but were only traditions of the elders; yet they were very strictly enforced. The chief point to observe is that the hands were washed before food although they might be ceremonially clean. At first adopted by the Pharisees, it became a practice almost universal among Jews. Probably its origin was to prevent any contact with food when the person might have unconsciously contracted defilement. If the hands were known to be unclean, two washings before food were required. It also became customary to wash the hands after food; and some Pharisees, ingenious in discovering new ways of self-righteousness, washed between the courses. The washing of the hands was performed by pouring, the hands being held with the fingers up, so that the uncleanness might be washed down away from the fingers. The water had to run down to the wrist, else the ceremony was ineffectual (Edersheim thinks that in Mk 7^{3} we should translate πυγμῇ, 'to the wrist'; but see Swete's note). We have a further reference to the Jewish custom in the story of the marriage at Cana, where there were six stone waterpots for the water of purification (Jn 2^{6}; cf. also the discussion between John the Baptist's disciples and a Jew about purification, Jn 3^{25}, and the Jews purifying themselves or avoiding defilement before the passover, 11^{55} 18^{28}).

---

* The apparent exception to this principle already mentioned, that the unclean by touch of a dead body might eat the passover, is partially accounted for by the fact that in P the passover is not considered a sacrifice (cf. 2 Ch 30^{17-20}, Ezr 6^{20}).

* See Frazer, *l.c.* i. 344–348. Among the natives of Central Australia circumcision and subincision are still performed with stone knives, though iron knives are known. But, according to tradition, circumcision was originally performed with the fire-stick, and the stone knives were adopted because so many died in consequence of the operation (Spencer and Gillen, *l.c.* 223, 224, 394–402).

More importance attaches to the attitude of Jesus and the apostles to these customs. He excited the surprise of a Pharisee because He did not wash His hands before breakfast (Lk 11$^{38-41}$); and His disciples, by the same neglect, led the scribes and Pharisees to challenge Jesus to account for their behaviour (Mk 7$^{1-5}$, Mt 15$^{1.2}$). This gave Him occasion to denounce the making void of the word of God through tradition, and to enunciate the great liberating principle that not that which goeth into a man defiles him, but that which cometh out of him, from the heart. At one stroke He repealed all the Levitical rules as to unclean meats (Mk 7$^{6-23}$, Mt 15$^{3-20}$). There can be no such thing as ceremonial, there is only moral defilement. It was long, however, before this decisive pronouncement was really appreciated by the disciples. Just before he was sent to Cornelius, St. Peter could say that he had never eaten anything common or unclean (Ac 10^{14}). The principle was adopted, with concessions to Jewish prejudices against meats offered to idols, things strangled, and blood, in the letter of the Church of Jerusalem (Ac 15^{29}). St. Paul expressed the principle in the clearest form—that all things are clean, and nothing of itself is unclean (Ro 14$^{14.20}$, cf. Tit 1^{15}). 'All things are lawful; meats for the belly, and the belly for meats: but God will destroy both it and them' (1 Co 6^{13}). Nay, food perishes in the very act of use. What we can destroy must not be suffered to rule us (Col 2$^{20-22}$). So Christians must not permit themselves to be judged in meat or drink (Col 2^{16}). But, in actual practice, both Jesus and St. Paul made gracious concessions to Jewish feeling. Jesus bade the leper offer for his cleansing the things which Moses commanded (Mk 1^{44}). And St. Paul himself, becoming a Jew to the Jews, submitted to a rite of purification (Ac 21^{26}). This apostle laid down the great principle that Christians must be governed by the law of love; and, while we cannot make the conscience of another the measure of our own, we must exhibit always the tenderest consideration for the scruples of others, lest we place a stumbling-block in their way; and, further, that where these scruples exist, he who entertains them must not defile his conscience by violating them. But it is clear that in the Christian atmosphere the essentially heathen idea of ceremonial uncleanness could not survive.

LITERATURE.—The most important has been freely quoted in the article. Most is to be learned from W. R. Smith and Frazer (cf. also his art. 'Taboo' in the *Enc. Brit.*^{9}). For Arab usage Wellhausen's *Reste Arab. Heid.*^{2} is valuable. For non-Semitic parallels Jevons' *Introd. to the Hist. of Rel.*, and Spencer and Gillen's very important work, *The Native Tribes of Central Australia*, are most useful. The Hebrew customs are treated by Benzinger, and much more fully by Nowack, in their works on *Hebrew Archæology*. Their conclusions on several points might have been modified by a more thorough study of savage parallels, through which alone we can hope to understand the Israelitish ideas and usages. The discussion in the *OT Theologies* of Schultz, Dillmann, Smend, and Marti may also be consulted, together with Stade's in his *GVI*^{2} i. 481–487. The commentators on *Leviticus* deal with the subject; the soundest treatment is probably that of Baentsch in Nowack's *Handkommentar*. Bertholet's commentary in Marti's *Kurzer Hand-Commentar* appeared too late to be used in this article. An article by J. C. Matthes, 'De begrippen rein en onrein in het OT,' in the *ThT* xxxiii. (1899) 293 ff., has not been read by the present writer.

A. S. PEAKE.

UNDERGIRD.—See art. SHIPS AND BOATS, p. 506^{b}.

UNDERLING.—Sir 4^{27} 'Make not thyself an underling to a foolish man' (*μὴ ὑποστρώσῃς σεαυτὸν ἀνθρώπῳ μωρῷ*, RV 'Lay not thyself down for a fool to tread upon': for *ὑποστρώννυμι* used literally see Lk 19^{36} 'they spread their clothes in the way'). Underling is found in the Bishops' Bible La 5^{3} 'Wee are underlings without fathers'; and in Bunyan, *Holy War*, p. 15, 'Can you be kept by any Prince in more slavery and in greater bondage than you are under this day? You are made underlings, and are wrapt up in inconveniences.'

J. HASTINGS.

UNDERSETTER (כָּתֵף 'shoulder,' esp. as support for burdens).—The Heb. word (in the plu.) is translated 'undersetters' only in 1 K 7$^{30\,bis.\,34\,bis}$, and the meaning there is pedestals for the bases of the lavers in the temple. The Eng. word means props or supports, but that it is not altogether an inappropriate translation the foll. quotation shows: Gn 49^{15} Wyclif (1388), 'Isachar . . . undirsettide his schuldre to bere.' Elyot (*Governour*, i. 28) says that 'a wyse and counnynge gardener, purposynge to have in his gardeine a fine and precious herbe,' will, 'as it spryngeth in stalke, under sette it with some thyng that it breake nat, and alway kepe it cleane from weedes.' Tindale uses the verb metaph., *Expos.* p. 208, 'If our souls be truly underset with sure hope and trust.' Wyclif (1388) has the form 'undersettings' in Ezk 41^{26} (same Heb.), the 1382 ed. having 'shoulders.'

J. HASTINGS.

UNDERTAKE.—Is 38^{14} 'O Lord, I am oppressed; undertake for me' (עָרְבֵנִי, RV 'be thou my surety': in Job 17^{3} the very same form of the verb is rendered in AV 'put me in a surety,' RV 'be surety for me'). The Eng. word has the usual sense of the intrans. verb, 'to assume responsibility for,' 'become surety for.' Cf. Fuller, *Holy War*, p. 137, 'The barren warres in Syria starved the undertakers.' J. HASTINGS.

UNDERWRITE.—2 Mac 9^{18} 'He wrote unto the Jews the letter underwritten' (*τὴν ὑπογεγραμμένην ἐπιστολήν*). The word is used literally, as RV 'the letter written below,' the words of the letter being then quoted. Cf. Shaks. *Macbeth*, V. viii. 26—

> 'We'll have thee, as our rarer monsters are,
> Painted upon a pole, and underwrit
> "Here may you see the tyrant."'

J. HASTINGS.

UNEASY is now restless, but in its only occurrence in AV it means literally 'not easy,' 'difficult': 2 Mac 12^{21} 'The town was hard to besiege, and uneasy to come unto' (*δυσπρόσιτος*, RV 'difficult of access'). So Shaks. *Tempest*, I. ii. 451—

> 'This swift business
> I must uneasy make, lest too light winning
> Make the prize light.'

The modern sense is quite as old, thus *II Henry IV*. III. i. 10—

> 'Why rather, sleep, liest thou in smoky cribs,
> Upon uneasy pallets stretching thee?'

J. HASTINGS.

UNGRACIOUS.—This Eng. word occurs in 2 Mac 4^{19} 'this ungracious Jason' (*Ἰάσων ὁ μιαρός*, RV 'vile'), 8^{34} 'that most ungracious Nicanor' (*ὁ τρισαλιτήριος Νικάνωρ*, RV 'thrice-accursed'), 15^{3} 'the most ungracious wretch' (*ὁ τρισαλιτήριος*, RV 'the thrice-accursed wretch'), always in the sense now conveyed by *graceless*. So Mt 18^{32} in Cranmer's Bible, 'O thou ungracious servaunt' (Gr. *Δοῦλε πονηρέ*). Cf. Erasmus, *Crede* 45, 'Rejoysynge in synne and ungratiousnes'; Hos 7^{1} Cov. 'When I undertake to make Israel whole, then the ungraciousnesse of Ephraim and the wickednes of Samaria commeth to light.' J. HASTINGS.

UNICORN (רְאֵם and רְאֵים *rĕ'êm*, רֵים *rêm*; cf. Assyr. *rîmu* [see Schrader, *KAT*^{2} 456]).—The various forms of the Heb. word refer to an animal, characterized by its great strength (Nu 23^{22} 24^{8}), untameableness (Job 39$^{9.10}$), fleetness and activity (Ps 29^{6}), noted for its horn (Ps 92^{10}), of which it had more than one (Dt 33^{17} קַרְנֵי רְאֵם 'horns of a *rĕ'êm*,' not pl. as in AV 'unicorns'; cf. Ps 22^{21} קַרְנֵי רֵמִים 'horns of *rêms*'), associated with bullocks and bulls (Is 34^7). All of these references seem to point to a well-known animal, probably of the ox tribe. Certainly they do not refer to the fabulous unicorn, a rendering which has been adopted from the LXX μονοκέρως, which is the word in all the above passages except the last, where the rendering is ἁδροί = 'strong ones.' The Arab. *ri'm* is undoubtedly a white antelope, probably the *leucoryx*. Some of the above references would suit this animal. But most of them seem to imply a creature of the ox sort, and one of the strongest and fiercest of its group. RV tr. it 'wild ox,' m. 'ox-antelope.' Two species of wild oxen once abounded in Palestine. One, *Bos primigenius*, the *Auerochs* of the Old Germans, is now quite extinct everywhere. The other, *Bison bonasus* or *Bos urus*, which the Germans erroneously call the *Auerochs*, still exists in the forests of Lithuania and in the Caucasus. The latter cannot be the *rĕ'ēm*, on account of the shortness of its horns. The former was noted for its size, and the prodigious length and strength of its horns. It existed in Germany down to the time of Cæsar (*Bell. Gall.* vi. 28), and is depicted on the monuments of Assyria as one of the animals hunted by the kings of that country. (See art. ASSYRIA, vol. i. p. 182^b). Relics of it are found in the bone brecchia caves of Lebanon, and in the lake-dwellings of Switzerland. It is probable that it was not extinct until the Middle Ages. It is every way likely that this is the animal intended by the *rĕ'ēm*. Cf. Tristram, *Nat. Hist. of Bible*, 146 ff., and Driver, *Deut.* 407.

G. E. POST.

UNKNOWN GOD (*ἄγνωστος θεός*).—In his speech at Athens, St. Paul begins by referring to the universal interest in religious matters shown by the Athenians. In passing through the city he had seen an altar dedicated TO THE UNKNOWN GOD (*ἀγνώστῳ θεῷ*). He makes this the text of his speech, saying that that Divine power which they ignorantly worshipped he would declare to them (Ac 17^{23}). An exact parallel to this inscription is not known. An inscription is quoted from Euthalius (ed. Zacagn. p. 514): *Θεοῖς Ἀσίας καὶ Εὐρώπης καὶ Λιβύης, θεῷ ἀγνώστῳ καὶ ξένῳ*. According to Jerome (on Tit 1^{12}), the Athenian inscription was *Deis ignotis et peregrinis*. Other quotations are Paus. I. i. 4: *Θεῶν ἀγνώστων καὶ ἡρώων*; Philaster, *Vit. Apoll.* vi. 3: *Ἀθήνησιν, οὗ καὶ ἀγνώστων δαιμόνων βωμοὶ ἵδρυνται*. None of these give the parallel required, but all suggest that such an inscription would be possible. The whole point of the inscription lay in its being in the singular; and it is quite uncalled for to suggest, as Blass does, that St. Paul wrote originally in the plural because the neuter (*ὃ . . . τοῦτο*) in the next verse is changed by later MSS into the masculine (see Blass, *ad loc.*).

A. C. HEADLAM.

UNLEAVENED BREAD.—See LEAVEN and PASSOVER.

UNNI (עֻנִּי).—**1.** The name of a Levitical family of musicians, 1 Ch 15^{18} (B Ἐλιωήλ, ℵ Ἰωήλ, A Ἀνί, Luc. Ἀνανίας) ^{20} (Bℵ Ὠνεί, A Ἀνανί, Luc. Ἀνανίας). **2.** See UNNO.

UNNO (עֻנּוֹ *Kĕthîbh*, followed by RV; but *Ḳĕrê* עֻנִּי **Unni** (so AV, cf. 1 Ch $15^{18.\ 20}$)).—The name of a family of Levites that returned with Zerubbabel, Neh $12^{8\,(9)}$ (BA om., $ℵ^{c.\ a\ mg}$ Ἰανά, Luc. Ἰαναί). Guthe would read עֹנִים, which he finds represented by the *ἀνεκρούοντο* of Lucian, taking the Ἰαναί of the latter to be a doublet of this word, and dropping BAKBUKIAH as an explanatory gloss derived from 11^{17}.

UNRIGHT.—Wis 12^{13} 'To whom thou mightest shew that thy judgment is not unright' (*ὅτι οὐκ ἀδίκως ἔκρινας*, RV 'that thou didst not judge unrighteously'). We find 'unright' for *unrighteous* also in Tindale, as *Pent.* (Mombert's ed.), p. cxxviii, '*Avims*, a kynde of Giauntes, and the worde signifieth crooked, unright, or weaked.' More common, however, is the subst. 'unright' for *unrighteousness, wrong*; thus Tindale's *Pent.* Gn 16^5 (ed. 1530), 'Thou dost me unrighte' (changed in 1535 ed. into, 'The wrong I suffre be on thy head'); Dt 25^{16} 'All that doo unright are abominacion unto the Lord.'

J. HASTINGS.

UNTOWARD.—The meaning of this word is seen in the foll. quotation from the *Judgement of the Synode at Dort*, p. 32, 'All men therefore are conceived in sin, and borne the children of wrath, untoward to all good tending to salvation, forward to evil.' It occurs in Ac 2^{40} 'Save yourselves from this untoward generation' (*ἀπὸ τῆς γενεᾶς τῆς σκολιᾶς ταύτης*, RV 'from this crooked generation'). The subst. 'untowardness' is also found in AV in the headings to Is 28, Hos 6.

J. HASTINGS.

UPHARSIN.—See MENE, MENE, TEKEL, UPHARSIN.

UPHAZ (אוּפָז; in Jer 10^9 Μωφάζ, Q^{mg} Σουφείρ, Vulg. *Ophaz*; in Dn 10^5 Theod. Ὠφάζ; Vulg. [*aurum*] *obrizum*).—There is considerable uncertainty as to this word, which is much increased by the diverse opinions of the ancient authorities. Thus LXX has in Dn 10^5 *καὶ τὴν ὀσφὺν περιεζωσμένος βυσσίνῳ, καὶ ἐκ μέσου αὐτοῦ φῶς* instead of Theodotion's *καὶ ἡ ὀσφὺς αὐτοῦ περιεζωσμένη ἐν χρυσίῳ Ὠφάζ*, implying considerable divergence as to the reading. The Vulg. *aurum obrizum* is evidently based upon a comparison of the Heb. form of Uphaz with פָּז *pāz*, 'pure gold,' whilst the Gr. Μωφάζ implies some such variant reading as מוּפָז *mûphāz*, 'pure,' said of gold, though the Gr. translator of Jer 10 regarded this, like its variant Ophaz, as the name of a place. On the other hand, the mention of gold in both passages where the word occurs, naturally caused other translators to think of אוֹפִר Ophir, from which the Heb. form of Uphaz (without the vowel-points) differs only in having ז for ר.* It is apparently this which has given rise to the Gr. var. Σουφείρ (see art. OPHIR) in Q^{mg} (so also the Targ. and Pesh.). Among the conjectures as to the position of Uphaz may be mentioned that of Hitzig, that it may be the Sanskr. *vipâça* ('the free'), designating an Indian colony from the neighbourhood of the Hyphasis (= Hyphas = Uphaz) or Indus (Sanskr. *vipâça*), which had settled in Yemen—an identification which has been described as 'more acute than probable.'

LITERATURE.—*Calwer Bibellexikon*, and Riehm, *Handwörterbuch*, *s.v.*

T. G. PINCHES.

UR (אוּר 'flame').—Father of one of David's heroes, 1 Ch 11^{35} (B Σθύρ, A Ὡρά, Luc. Οὔρ). See AHASBAI.

UR OF THE CHALDEES (אוּר כַּשְׂדִּים; ἡ χώρα [τῶν] Χαλδαίων; *Ur Chaldæorum*).—The name of this city or district occurs four times in the OT, namely, Gn $11^{28.\ 31}$ 15^7, and Neh 9^7; and as there is no indication as to its position, except that it was 'of the Chaldæans,' much uncertainty exists as to its identification, which is increased by the fact that the LXX do not transcribe the name Ur, but substitute for it *χώρα*, 'country.' Apparently on account of its comparative nearness to Canaan, whither Teraḥ and his family were bound (Gn 11^{31}), and because of the passage in Ac 7$^{2.4}$, where the proto-martyr, St. Stephen, places it in Mesopotamia, many have supposed it to be identical with Urfa or Orfa, which the Greeks named Edessa. The origin of this city is attributed by Isidore to Nembroth or Nimrod, which opinion is confirmed by Ephraem, who states that Nimrod ruled at Arach and Edessa (*Comm. in Genesim*). From Isidore's reference to Μάννου Ὄρρα, which Vaux explains as 'evidently the Orrha of Mannus, who was one of the kings of Edessa,' the ancient name of the place has been described as Orrha, the likeness of which to Ur is evident. As, however, this name would seem not to be provable before B.C. 150, it is doubtful whether it can be quoted in support of the identification of Edessa with so old a site as Ur of the Chaldees. Indeed, according to Appian, the town itself was comparatively modern, having been built by Seleucus. Testimony to the firm belief of the Mohammedans that Urfa is the ancient Ur of the Chaldees is to be found in the fact that the chief mosque there bears the name of the 'Mosque of Abraham,' whilst the pond in which the sacred fish are kept is called 'the lake of Abraham the Beloved.'

---

* The reading אוֹפִר instead of אוּפָז is adopted by Ewald, Klostermann, Prince, Driver, Marti ['probably'], *et al.*

Another tradition, which is at the same time also the received opinion of scholars at the present time, is, that Ur of the Chaldees is the modern Mugheir, or, more correctly, *Muḳayyar*, 'the pitchy,' so called from the bitumen used in the construction of the principal building on the site. The original name of this place was Uru, and as it lies in S. Babylonia, anciently called (though not by the native inhabitants) Chaldæa, such an identification would leave but little to be desired. It is contained in a tradition quoted by Eusebius from Eupolemus, who lived about B.C. 150, to the effect that, tenth in generation and thirteenth in descent, there lived in the city of Babylonia called Camarine (Καμαρίνη), which is called by some the city Urie (Οὐρίη), a man named Abraham, of noble race, and superior to all others in wisdom. As Eupolemus occupied himself especially with Jewish history, there is hardly any doubt that what he says was the common opinion of the Jews at the time. That the place he refers to is that now represented by Mugheir is proved by the fact that its later name, Camarine (perhaps Aramaic), is evidently connected with the Arabic name for the moon, *ḳamar*, and that the city anciently occupying the site is now known to have been the great centre of Babylonian moon-worship. The statement that it was in his time called *by some* Urie is significant, as it suggests that the ancient name was going out of use.

The position of this city is close to the point where the Shatt al-Hai enters the Euphrates, about 125 miles N.W. of the Persian Gulf. Babylonian lists of wooden objects refer to a class of ship called *Urite*, suggesting that it was anciently not so far from the sea, its present inland position being to all appearance caused by the alluvial deposits at the head of the Gulf. The ruins cover an oval space, 1000 yards long by 800 wide, and consist of a number of low mounds within an enclosure. The principal ruin is near the northern end, and is evidently the remains of a tower in stages, such as many of the cities of Babylonia and Assyria anciently possessed, and similar to the Birs-Nimroud (generally regarded as the tower of Babel) and the temple of Belus at Babylon (which Nebuchadnezzar calls 'the tower of Babylon'). From the bricks of this building we obtain indications of its history, among the kings who restored it being Ur-Engur, Dungi his son (about B.C. 2700), Kudur-mabug and his son Arad-Sin (or Eri-Aku = ARIOCH), and Nûr-Addi; whilst other names found in connexion with this or other ruins on the site are, En-anna-duma, Bûr-Sin, Išmê-Dagan and his son Gungunu, Rim-Sin (probably the same as Arad-Sin or Eri-Aku), Sin-idinnam of Larsa, and Kuri-galzu son of Burnaburiaš. The principal ruin, which was, as has been already said, the great temple-tower of the place, was apparently 'the supreme great temple' (*ê gala maḫa*), called, to all appearance, Ê-šu-gana-dudu. Nabonidus, in the inscription on the four beautiful cylinders found at the four corners of this edifice, tells us that he restored it, and, in doing so, seemingly came across the records of Ur-Engur, and Dungi his son, whom he apparently regards as its founders. From this inscription we gather that the tower bore also the names of Ê-lugal-gaga-sisa and Ê-giš-šir-gala. South of the temple-tower of Nannara was the temple of the goddess Nin-gala, and south-east Ê-gipara, 'the temple of the lady of the gods.' Like other renowned cities in Babylonia, it was one of the sacred places to which the dead were taken for burial, and is completely surrounded by graves. In the time of Ur-Engur and his successors, it was the capital of the district, and an exceedingly important place, many of the smaller States around being subject to it. The possession of important shrines naturally added to its influence, and Peters states that from the amount of slag found there it must have been also one of the principal manufacturing centres of the district in which it lies. Many scholars are of opinion that proof of the identity of Ur of the Chaldees with this site lies in the fact that Ḥaran, to which city Teraḥ and his family migrated, was also a centre of moon-god worship, whilst the sacred mountain of the Jews, Sinai, being so named after Sin, the moon-god, is a further confirmation. This, however, is a point which may well be left undecided, as it is by no means certain that Teraḥ and his family were worshippers of the moon; and, even supposing that such was the case, Ḥaran may have been selected for other reasons than that the moon-god was worshipped there, shrines to that deity being not uncommon in the ancient East.

Notwithstanding the inherent probability of the identity of the ancient Babylonian Uru (Mugheir) with the biblical Ur of the Chaldees, the name is not so near as might be wished. The Heb. form has a long vowel, represented by אוּ, at the beginning, and no vowel at all after the consonant (ר). In the Bab. *Uru*, however, though there is no indication that the end-vowel was long, there is but little doubt that it was originally so, as the non-Semitic (Akkadian) form *Urima*, or, better, *Uriwa*, shows. Frd. Delitzsch (*Paradies*, p. 226) expresses the opinion that the old form of the name in Akkadian was Urum (Uruma); but that this is not quite correct, is proved by the 4-column syllabary 82–8–16, 1,* where the non-Semitic pronunciation is given as Uri, the terminal *-ma* or *-wa*, found in the archaic brick-inscriptions from the site, being (as is usual in the Assyr.-Bab. syllabaries) omitted. There would, then, seem to be but little doubt that these last two syllables, *-ima* or *-iwa*, are in part preserved in the form *Urie* (Οὐρίη), used by Eupolemus as quoted by Eusebius. It is true that it implies that the *i* of *iwa* only was heard, but the Heb. form, which is undoubtedly older, does not contain it.

This circumstance leads to the probability that the Ur-Kasdim of the OT may, in reality, stand for more than the name of a mere city; and if this be the case, it is not impossible that by these words the whole land of Akkad was intended—the Uri or Ura of the non-Semitic (Akkadian) inscriptions. The patriarch and his family in such a case would have had the whole extent of the province of Akkad

---

* Published by T. G. Pinches in S. A. Smith's *Miscellaneous Assyrian Texts*, 1887 (pl. 26).

(northern Babylonia) in which to roam and find pasturage for their flocks and herds, instead of being confined to the neighbourhood of the city of Uru (Mugheir). Ur-Kasdim, 'Ur of the Chaldæans' (the '*land* of the Chaldæans' of the LXX), is probably so called in order to distinguish it from some other Ur where the Chaldæans were not; and, in this case, either the province of Ura (Akkad) or the city of Uriwa would suit best, to the exclusion of Urfa and the castle of Ur between Hatra and Nisibis.

From exceedingly early times the kings of Babylonia called themselves kings of Kengi-Ura, *i.e.* Sumer and Akkad, and from this equivalence it is clear that Uri or Ura is the same as the district (not the city) called Akkad, and so named apparently from one of the chief cities, known as Agadé, Semiticized into Akad or Akkad. On this account the Semitic population called the whole tract Akkadu, 'the Akkadian (land),' to the exclusion of Uru, which name was already used, to all appearance, as the Semitic form of Uriwa. That they did not call this Akkadian district Uru may be regarded as an argument against its possible identification with Ur of the Chaldees, though it would seem, on the other hand, to be to a certain extent justified by the translation of the LXX, whose rendering, 'country of the Chaldæans,' notwithstanding that it does not seem to represent any Semitic or non-Semitic Babylonian expression,* may nevertheless be due to some tradition which they possessed. In connexion with this it is worthy of note that Ur, in the Heb. text, is not called the 'city,' but the 'land' of the nativity of Ḥaran, who died there 'in the presence of his father Teraḥ.'

The tradition that Ur of the Chaldees is represented by the ruins known as Warka may be dismissed, as this is now known to be the Erech of Gn 10^{10}, called by the Babylonians *Uruk*.† Its identification with the castle of Ur (Ammianus Marcellinus, XXV. viii. 7) in the Mesopotamian desert between Hatra and Nisibis, is also worthless, this place having been founded by the Persians.

Concerning the name itself, it is needful to state that *Kaldu* is to all appearance a late word, not provable in the cuneiform inscriptions before the 9th cent. B.C., when Adad-nirari III. uses it, and seems to mean, by the expression *mât Kaldi*, the whole of Babylonia. The Heb. *Kasdim* preserves the original *s*, changed, in the native form, into *l* before the dental.‡

URBANUS (Οὐρβανός, AV Urbane).—The name (masculine) of a Christian greeted by St. Paul in Ro 16^{9}, described as 'our helper in Christ.' The name is common among slaves, and is found in inscriptions of the Imperial household (*CIL* vi. 4237). He is commemorated Oct. 31 with Stachys and Amplias (which see). For later legends see *Acta Sanctorum*, Oct., vol. xiii. p. 687.

A. C. HEADLAM.

URI (אוּרִי 'fiery'; or perhaps contracted from אוּרִיָּה).—**1.** The father of BEZALEL, Ex 31^{2} 35^{30} 38^{22}, 1 Ch 2^{20}, 2 Ch 1^{5} (B Οὐρείας in all except 1 Ch 2^{20} Οὐρεί; A Οὐρί in all except 2 Ch 1^{5} Οὐρίας). **2.** Father of one of Solomon's commissariat officers, 1 K 4^{19} (BA Ἀδαί, Luc. Ἀδδαί). **3.** A porter, Ezr 10^{24} (Bℵ Ὠδούθ, A Ὠδουέ, Luc. Οὐρίας).

URIAH, in 2 K 16^{10-16} **URIJAH** (אוּרִיָּה, אוּרִיָּהוּ Jer $26^{20.\ 21.\ 23}$, 'flame of J″' or 'my light is J″'; B Οὐρείας, A Οὐρίας; *Urias*).—**1.** One of David's 'thirty' mighty men (2 S 23^{39}, 1 Ch 11^{41}). Like Ahimelech, another of David's followers, Uriah belonged by race to the ancient Hittite population; but, as his name seems to indicate, he had adopted his master's God as his own. The few personal traits of Uriah's character, which are incidentally revealed in the narrative of 2 S 11, not only illustrate the quiet heroism so often existent in the lives of commonplace people, but also enable us to gauge the depths to which David had fallen.

When summoned by royal command from the scene of war, Uriah's behaviour was guided by a resolve to live as far as was possible under the same conditions as his comrades in the field; accordingly after his interview with David, instead of seeking repose and relaxation in his own house, he immediately went on duty as one of the royal bodyguard; and this chivalrous determination was so firmly fixed in his mind that he retained it even when intoxicated. Josephus (*Ant.* VII. vii. 1) in his usual way embellishes the story of Uriah's death. In particular he states that David wrote to Joab 'commanding him to punish Uriah, and signified that he had offended,' and supplies graphic details of the engagement in which Uriah fell. Besides 2 S 11, Uriah's name occurs in 2 S $12^{9.\ 10.\ 15}$, 1 K 15^{5}, Mt 1^{6}.

2. High priest in the reign of Ahaz. The two notices of him that are found in the Bible leave us in some doubt as to his real character. On the one hand, he is selected (Is 8^{2}) as one of two 'faithful witnesses' who were to attest the utterance of the prophecy concerning Maher-shalal-ḥash-baz; while, on the other hand, the narrative of 2 K 16^{10-16} presents us with the picture of a weak compliant man who not only tolerated but even actively abetted the religious innovations of king Ahaz. It is possible that this unworthy complaisance is the cause of the omission of his name in what seems intended to be a list of high priests in 1 Ch 6^{4-15}. He is, however, included in a list given by Josephus (*Ant.* X. viii. 6), which is evidently based on that in Chronicles. There are so many suspicious features about the Chronicler's list that one is tempted to suppose an extensive corruption of the text. It is of course conceivable that Urijah was the *second* priest, whose special duty it was to regulate the temple services (cf. Jer 29^{26}).

The changes introduced by Ahaz with the connivance of Urijah were of a startling character. The priest had apparently so placed the Assyrian altar that the ancient brazen altar stood between it and the front of the Holy Place. Ahaz, however, was determined that his new altar should be the 'great' or principal one, and so he removed the ancient altar to the north side of the new one. The new altar now occupied the correct legal position before the Holy Place, and was used for all ordinary sacrificial purposes. The old altar was not, however, entirely discarded. From time immemorial kings and leaders of Israel had inquired of J″ at this same brazen altar. A favourable answer might not so easily be obtained at a new one, however elegant and modern. The old altar therefore was retained for purposes of divination. It must, however, be noted that this explanation of v.^{15} is not free from doubt. Michaelis, followed by Gesenius, Kittel, *et al.*, renders וּמִזְבַּח הַנְּחֹשֶׁת יִֽהְיֶה־לִּי לְבַקֵּר: 'as for the brazen altar it will be for me to inquire,' *i.e.* 'to consider what I shall do with it'; so Vulg. *erit paratum ad voluntatem meam.* The LXX εἰς τὸ πρωί [=לַבֹּקֶר] does not convey a meaning consistent with the context. It seems to be implied in the subsequent narrative that Urijah assented to the other structural alterations in the temple carried out by Ahaz.

---

* *Uru*, the non-Semitic (dialectic) word for 'city,' the original form of which was *guru*, also *kur*, 'country,' and *ḫur*, 'mountain,' furnish material for comparison, but the combination of these with Kasdim, 'Chaldæans,' a *Semitic* word, is in the highest degree unlikely.

† Sir Henry Rawlinson (*JRAS* xii. 141, note) refers to a tradition that Abraham was born not at Ur, but at Erech. This would bring the district of Ur somewhat far south, but Erech *may* have been included within its boundaries. The statement probably has, however, little or no value.

‡ According to Prof. Sayce, the Kasdim and the Chaldæi each had a different origin, the former being those West Semitic tribes who invaded Babylonia towards the end of the 3rd millennium B.C., and established there that dynasty of kings of which Ḫammurabi (Amraphel) is the most renowned. It was at this time that Kasdim and Babylonian became synonymous, like Chaldæan and Babylonian in later days. Ur (Muḳayyar), being situated on the western bank of the Euphrates, would naturally be in the district which, as pointed out by Hommel, was outside the limits of Babylonia proper, and therefore within the domain of those early conquerors. (On these matters, and the question of Arphaxad, see Sayce, *Expos. Times*, Nov. 1901, pp. 64–66, and Hommel, *ib.*, March 1902, p. 285).

3. A prophet, son of Shemaiah of Kiriath-jearim, the story of whose death is incidentally narrated in Jer 26$^{20-23}$. From this we learn that he was a contemporary and perhaps a disciple of Jeremiah, whose denunciations against Jerusalem and Judah he is stated to have echoed. Unlike the greater prophet, however, he did not succeed in evading the vengeance of Jehoiakim. Uriah having taken refuge in Egypt, the king demanded his extradition through Elnathan, his father-in-law (2 K 24^{8}), who was leader of an embassy, the real object of which was, in all probability, to solicit the aid of Egypt against Nebuchadnezzar. It is unlikely that Jehoiakim would have gone to the trouble and expense of sending a special mission merely to capture a single prophet. Having executed Uriah, the king added the further outrage of casting his dead body into the common graveyard. It is commonly thought that this story is introduced here by Jeremiah in order to prove that his own personal risk, as recorded in this chapter, was a very real one. On the other hand, Rashi maintains that these verses constitute the rejoinder of Jeremiah's enemies to the precedent of Hezekiah and Micah alleged by his friends. **4.** A priest, son or representative of HAKKOZ (Neh 3$^{4.21}$), by whom is probably meant the seventh of the twenty-four courses of priests (1 Ch 24^{10}). He is mentioned only as father or ancestor of Meremoth or Meraioth, an eminent priest who was chief of the four officials to whom Ezra entrusted the sacred vessels and treasure brought from Babylon (Ezr 8^{33}, 1 Es 8^{62} [URIAS]), who repaired two sections of the wall of Jerusalem (Neh 3$^{4.21}$), and whose name is substituted in the lists of priestly families, Neh 10^{5} 12$^{3.15}$, for that of Hakkoz. **5.** One of those who stood on Ezra's right hand when he publicly read the Law (Neh 8^{4}, 1 Es 9^{43} [URIAS]). He was probably a priest.

N. J. D. WHITE.

URIAS.—**1.** (B Οὐρείας, B^{b} Οὐρίας, A Οὐρί, AV Iri) 1 Es 8^{62} (LXX ^{61}). In Ezr 8^{33} Uriah. Perhaps identical with—**2.** (B Οὐρείας, B^{b} A Οὐρίας) 1 Es 9^{43}. In Neh 8^{4} Uriah.

URIEL (אוּרִיאֵל, 'flame of El,' or 'my light is El'; cf. Phœn. ארמלך, Assyr. *Urumilki*).—**1.** A Kohathite chief, 1 Ch 6$^{24\,(9)}$ (B 'Οριήλ, sup ras A^{a}? and Luc. Οὐριήλ), 15$^{5.11}$ (B Οὐριήλ, 'Αριήλ, A both times Οὐριήλ). **2.** The maternal grandfather of Abijah, 2 Ch 13^{2} (BA Οὐριήλ). See MAACAH, No. 3, and cf., further, Benzinger, *Chron. ad loc.* **3.** See next article.

URIEL (Οὐριήλ).—One of the four chief archangels. In Enoch 20^{2} he is called 'the angel who is over the world (? angel-host) and Tartarus.' In keeping with this title, Uriel is the one who accompanies Enoch in his visits to Tartarus, and who explains to him the tortures of the lost (19^{1} 21$^{5-10}$ 27^{2} 33^{3}). In 2 Esdras, Uriel is sent to ask Esdras if he can 'weigh the flame of fire, or measure the wind, or recall the past.' If not, why does he presume to challenge the dealings of God (4^{5})? Similar errands are narrated in 2 Es 5$^{20\text{ff.}}$ 10^{28}. In the *Prayer of Joseph*, Uriel is the angel with whom Jacob wrestles. In wrestling with him, Jacob claims to be 'the firstborn of every creature animated by God,' and affirms that Uriel is eighth in rank after him [see JOSEPH, PRAYER OF, vol. ii. p. 778^{b}]. In the *Sibylline Oracles*, ii. 228, Uriel is named as the one who will bring the sorrow-stricken forms of the Titans and giants to judgment; and in the *Life of Adam and Eve*, § 48, Michael and Uriel are commanded to bury Adam and Abel in Paradise.

J. T. MARSHALL.

URIM AND THUMMIM.—From an interesting passage of an early historical work we learn that the ancient Hebrews recognized three principal media through which the Divine will might be revealed to men. When Saul in his later years 'inquired' of J″, 'J″ answered him not, neither by dreams, nor by Urim—which we may provisionally render, by the sacred lot—nor by prophets' (1 S 28^{6}). The same three channels of Divine communication were also recognized in ancient Greece, although there divination by lot 'was entirely overshadowed by the prophetic frenzy and inspiration through dreams' (art. 'Sortes' in Smith's *Dict. of Antiq.*^{3}). In this article we have to investigate the mode of ascertaining the Divine will by means of the sacred lots, known as 'the Urim and the Thummim [more correctly *Tummim*].'

Considering the evident importance of this, apparently the only legitimate, mode of divination in early times, the number of express references to the Urim and Thummim is surprisingly limited. In Ex 28^{30}, Lv 8^{8} (both P) we have הָאוּרִים (*hā-'ûrîm*) and הַתֻּמִּים (*hat-tummîm*); in Ezr 2^{63}, Neh 7^{65}, without the article (here only in OT) *'ûrîm* and *tummîm*. Dt 33^{8} gives them in the reverse order (see below). In Nu 27^{21}, 1 S 28^{6} *'ûrîm* stands alone. 1 S 14$^{41\text{f.}}$, from which, in our MT, Urim and Thummim has disappeared, will be fully discussed below,* where also will be found the few references in the apocryphal writings.

The present vocalization leaves no doubt as to the etymology and signification of אוּרִים and תֻּמִּים intended by the Massoretic scholars. The former is evidently connected with אוֹר 'light,' the latter is the plural of תֹּם, 'completeness,' in a moral sense 'perfection,' 'innocence'; the idea being, perhaps, that Urim was the lot which *brought to light the guilt* of the subject of the ordeal, while Thummim established his *innocence.* The words are to be understood as intensive plurals, and rendered, on this hypothesis, 'Light and Perfection (or Innocence),' rather than as RVm (Ex 28^{30}), 'the Lights and the Perfections.' It will, however, appear in the sequel that the sacred lot was frequently used where there is no question of guilt or innocence, and it is an open question whether the Massoretic pronunciation reaches back to the time when the lot was in use. Various alternative etymologies have been proposed of late. Thus Wellhausen in his *Prolegomena* (Eng. ed. p. 394) proposed to connect Urim with the verb אָרַר, 'to curse,' and expressed approval of Freytag's connexion of Thummim with the Arabic *tamîma*, a species of amulet (see Freytag, *Lex Arab.-Lat.* i. 199^{b}; *JBL* xix. (1900) 58); cf. Haupt-Schwally, *ZATW* xi. 172, who suggests 'cursing and blessing' as probable renderings; and Ball, in the list of proper names at end of his *Light from the East*, 'biddings and forbiddings (?).' In his later works, however, Wellh. has given up this etymology. In view of the ancient and long-continued influence of Babylonian ideas on the religious thought of the West, there is greater probability in the etymology recently proposed by some Assyriologists of repute, who suggest as the root of אוּרִים the Piel infin. form *u'uru* (stem אאר or איר), 'to send forth (an edict),' whence *urtu* and *tertu*, the technical Babylonian terms for an oracle. (See Zimmern, *Beiträge zur Kentnis d. bab. Religion*, 88 f. 91, note 2; Muss-Arnolt, *AJSL* xvi. (1900) 218). One is further tempted to connect Thummim with the verb *tamû*, Piel *tummû*, frequent in the divination vocabulary of the Babylonians, in the sense of 'to put under a spell' (see Zimmern's vocabulary, *op. cit.* 78). 'If these derivations are correct, אוּרִים and תֻּמִּים would correspond to the Babyl. *ûrtu* ("command," "decision," mostly of the gods), and *tamîtu*, a synonym of *pirishtu*="oracle," "oracular decision of the gods"' (Muss-Arnolt, *op. cit.* 219).

The renderings of the ancient VSS give no help either towards the etymology and significance of the original terms, or towards the real nature of the objects themselves.

---

* In Ps 43^{3} Lagarde (*Prophetæ chald.* p. xlvii) would read 'send forth thy Urim and thy Thummim' (cf. Dt 33^{8}). See also Duhm in *Kurzer Handcom. in loc.*

The Targums and Syr. VSS merely transliterate the Heb. terms. The Gr. VSS vary in a remarkable way, showing that their authors had no tradition to guide them. For אוּרִים we find the following renderings: (*a*) δήλωσις, 'manifestation' (perhaps rather 'direction,' 'instruction,' since the corresponding δηλόω is used by LXX to render the Hiphil of יָרָה in Dt 33^{10} and other synonymous Heb. verbs), Ex 28^{30} [LXX ^{26}], Lv 8^{8}, 1 Es 5^{40}; (*b*) δῆλοι * [*scil.* λίθοι], 'clear,' 'transparent' [jewels, see below], Nu 27^{21}, Dt 33^{8}, 1 S 14^{41} [not in MT] 28^{6}, Sir 45^{10}, also 36^{3} [EV 33^{3}], according to the better reading of אA; cf. AVm 'as the asking of Urim'; (*c*) the verb φωτίζω, 'to give light,' Ezr 2^{63}, Neh 7^{65}; (*d*) the later translators prefer the more literal rendering φωτισμοί, 'lights,' so Aq., Symm., and Theod. Ex 28^{30}; but in Dt 33^{8} Symm. has (*e*) διδαχή, the source of Jerome's *doctrina*, unless the Latin Father so understood δήλωσις as above suggested.

For תֻּמִּים we have (*a*) ἀλήθεια, 'truth'—perhaps suggested by the fact that the presiding judge in Egypt wore, suspended from his neck, an image of Tme, the Egyptian goddess of truth (see end of this article)—Ex., Lv., Deut., 1 Es., as above, Sir 45^{10}; (*b*) ὁσιότης, 1 S 14^{41},† here 'innocence'; (*c*) τέλεια, 'perfect things,' Ezr 2^{63}; (*d*) in the later translators (Aq. etc.) also literally τελειότητες, 'perfections.' The renderings of the Old Latin and Jerome hesitate in the same way between *doctrina*, *demonstratio*, *ostensio*, also *doctus*, for Urim, and *veritas*, *perfectio*, *sanctitas*, *perfectus*, *eruditus*, for Thummim.

In proceeding to investigate the nature and use of the Urim and Thummim, it seems advisable to begin with the data of the youngest products of Heb. literature, and to proceed backwards to those of the earliest. Setting aside for the present the speculations of Philo and Josephus, to whom we shall return, we find no help in our investigation from the references in the deutero-canonical writings recorded above, viz. 1 Es 5^{40}, in which the high priest is described as 'wearing Urim and Thummim' (so RV; AV, following Vulg., 'clothed in doctrine and truth'), Sir 36^{3} 45^{10}. The first item of interest is furnished by the fact recorded in Ezr 2^{63}=Neh 7^{65}, that certain families were excluded from the enjoyment of priestly rights until the purity of their descent should be established by 'a priest with Urim and with Thummim.' From this it is manifest that the use of these mysterious objects, and possibly also their precise nature, were unknown to the Jewish authorities of the post-exilic age.

This brings us to the Priests' Code. Without pausing to inquire, at this stage, into the full significance attributed by the compilers of this document to the Urim and Thummim, we may learn at least two facts which will clear the way for further investigation, and prove the impossibility of a widely current view as to the identity of these objects. After giving minute directions for the making of the 'breastplate of judgment' (for which see vol. i. p. 319 f.), attached to the high priest's ephod, P proceeds thus: 'And thou [Moses] shalt put *into the* (breastplate or) *pouch of judgment* the Urim and the Thummim' (Ex 28^{30}). No explanation is given of these, nor any instructions for making them. The latter omission so impressed the Samaritans that the requisite order is supplied here, and executed 39^{21}, in their recension of the Pentateuch. The rendering above given of the ambiguous phrase of the original וְנָתַתָּ אֶל־חֹשֶׁן הַמִּשְׁפָּט is that imperatively demanded by the context (see the commentaries) in preference to the possible alternative adopted by the LXX, καὶ ἐπιθήσεις ἐπὶ τὸ λόγιον τῆς κρίσεως τὴν δήλωσιν καὶ τὴν ἀλήθειαν, 'thou shalt *put upon* ‡ the oracle of judgment the Urim and the Thummim.' This mistaken rendering is mainly responsible for the view entertained by many writers, from Josephus to Kalisch (*Hist. and Crit. Comm. in loc.*), that the Urim and Thummim are to be identified with the jewels of the breastplate, enumerated in the verses preceding. P's contribution to the discussion, therefore, consists in showing (1) that the Urim and Thummim were understood in priestly circles, about the close of the Exile, as something distinct both from the ephod and from the gems with which the pouch of the ephod was ornamented; and (2) that they were conceived as *material objects of comparatively small dimensions*, capable of being inserted in the pouch, which indeed was constructed solely with a view to contain them. The other references of the Priestly Code (Lv 8^{8}, Nu 27^{21}) give no further clue to the nature of Urim and Thummim. The second passage, however, shows the importance attached to them in the ideal theocratic community of P as the authorized medium of Divine revelation.

When we pass from these ideal representations to the actual history of the pre-exilic period, while we meet with an equal readiness to presuppose familiarity with the objects under discussion, we are able for the first time to learn something as to the *modus operandi* in the use of the sacred lot. The most explicit of the earlier passages in which this *modus operandi* is exhibited is the graphic narrative in 1 S 14. Here we find the Hebrew host, led by Saul and Jonathan, proceeding to ascertain the cause of the Divine displeasure (v.^{37}) in the face of their hereditary enemies, the Philistines. Unfortunately, the Heb. text has here suffered serious mutilation, and, as even the most conservative scholars admit, must be restored by the help of the Greek version. The latter, in Lucian's recension (Lagarde's ed.), runs thus, v.$^{41\text{f.}}$: 'And Saul said, O Lord, the God of Israel, why hast thou not answered thy servant this day? if the iniquity be in me or in Jonathan my son, give Urim (δὸς δήλους [see above]); and if thou sayest thus: The iniquity is in the people, give Thummim (δὸς ὁσιότητα; MT הָבָה תָמִים, which cannot possibly mean, as RV, 'show the right').* And the lot fell upon Saul and Jonathan, and the people escaped. And Saul said: Cast the lot between me and Jonathan my son, and on whomsoever the Lord shall cause the lot to fall, let him die.' The true text was apparently still accessible to Jerome, who renders: 'si in me aut in Jonatha filio meo, est iniquitas hæc, da ostensionem [Urim]; aut si hæc iniquitas est in populo meo da sanctitatem [Thummim].'

From the text of this important passage in its original form, then, we learn (1) that the Urim and Thummim were the recognized medium for discovering the guilt or innocence of suspected parties, a species of Divine ordeal; (2) that as the lots were only two in number, only one question could be put at a time, and that in a way admitting only of two alternative answers; (3) that where these answers, from the nature of the case, could not be given by a mere 'yes' or 'no' (see below), it was necessary to agree beforehand on the way in which the issuing lot was to be interpreted; (4) a fourth inference, that the manipulation of the lots was the prerogative of the priests, may be drawn from the context (see below), but is more explicitly stated in the only other reference to Urim and Thummim in pre-exilic literature. In the so-called 'Blessing of Moses' (Dt 33)—perhaps as early as the time of Jeroboam I. (so Dillmann and Driver), certainly not later than Jeroboam II. (so most critics)—the benediction of Levi opens thus: 'Give to Levi thy Thummim, and thy Urim to the man of thy favour' (v.^{8}, following LXX with Ball, *PSBA*, 1896, 118 ff., and Bertholet, *Kurzer Handcom. in loc.*).

Another step forward is suggested by the comparison of the function here assigned to the

---

* Hos 3^{4} LXX for 'teraphim.'

† The MT has here the corrupt reading תָּמִים, see below.

‡ The Samaritan-Hebrew actually read ונתתת על here and in Lv 8^{8}.

* See Driver's *Notes on the Heb. Text of the Books of Samuel* for the restoration of the original Hebrew of the essential portions of the above.

Levitical priesthood with another recital of the priestly prerogatives, where the tribe of Levi alone is represented as chosen by J″ 'to offer upon mine altar, to burn incense, and *to bear* [*] (לָשֵׂאת) *an ephod before me*' (1 S 2^{28}, cf. 22^{18} LXX). For although our present Heb. text nowhere *expressly* associates the Urim and the Thummim with the mysterious ephod-image of the early writers (see EPHOD, No. 2, vol. i.), an examination of the whole narrative of 1 S 14 in the Greek text, and of other passages in the Books of Samuel, where this ephod figures as indispensable to the manipulation of the lot, leads to the conclusion that the ephod-image and Urim and Thummim had some intimate but as yet undiscovered connexion the one with the other. Thus, in 1 S 14, the priest of v.^{36} who presides over the ordeal of Urim and Thummim can be no other than Ahijah the descendant of Eli, who accompanied Saul, 'bearing an ephod' (נֹשֵׂא אֵפוֹד v.^{3}). In v.^{18}, according to the true text, he is summoned to 'bring forward the ephod' (*προσάγαγε τὸ ἐφούδ*—not as in MT 'the ark'; see ARK, vol. i. p. 150^{a}, note §; EPHOD, vol. i. p. 776, note ‡), evidently for the purpose of consulting the lot, but immediately ordered to 'withdraw' his hand when on the point of proceeding to its manipulation (v.^{19}). Again, in the story of David's adventures at Keilah, we read of his being joined by the priest Abiathar, bringing 'an ephod in his hand' (1 S 23^{6}). He is requested by David, in terms identical with those used by Saul, to 'bring forward the ephod' (v.^{9}); whereupon the former proceeds to ask a series of questions, each capable of being answered by a simple 'yes' or 'no' (vv.$^{10-12}$). It is impossible to escape the inference that these two narratives of a solemn inquiring of J″ on the part of Saul and David offer complete parallels, that in both the answer is obtained by means of Urim and Thummim, and that in either case these objects are carried in and cast from, or in some other way intimately connected with, the ephod-image. What has now been said of the incidents of 1 S $23^{6ff.}$ applies equally to the similar procedure in $30^{7ff.}$, where David again 'inquired of J″' by means of the ephod.

Indeed most scholars would go further, and maintain that in a number of other places, where the same phrase 'to inquire of J″ (שָׁאַל בַּי״)' is employed, and where the use of the sacred lot 'before J″' is stated, recourse to Urim and Thummim is implied in every case. The most important of such passages are Jos 7^{14-18} Achan's trespass, Jg $1^{1f.}$ $20^{27f.}$, 1 S 10^{19-22} the election of Saul, 2 S 2^{1} $5^{19.23}$.

To say that the Urim and Thummim of the earlier historians must have been intimately connected with the portable images to which they gave the name of ephod in the casting of the sacred lot, does not help us to discover the real nature of the objects in question. The etymology, as we have seen, is equally of no avail. The Greek translators in rendering Urim by *δῆλοι* [λίθοι] apparently identified it with the jewels of the breastplate. We are therefore left to *conjecture* that, on the analogy of the *sortes* of classical antiquity, they may have been two stones, either in the shape of dice or in tablet form, perhaps also of different colours. Some support is given to this view, which is that of most modern writers (see Literature at end of article), by the fact that the Heb. word for 'lot,' *gôrāl*, as is inferred from its Arabic congeners, originally signified a stone (cf. Gr. *ψῆφος*, 'a pebble used in voting,' and the Bab. *puru*, 'a stone,' whence, according to Jensen, quoted by Wildeboer in *Kurzer Handcom.*, פּוּרִים Est 3^{7}, synonymous with גּוֹרָל, is derived).

With the growth of more spiritual conceptions of the Divine character and of His relation to mundane affairs, recourse to the lot as a means of ascertaining the mind of J″ gradually fell into abeyance. It cannot be a mere coincidence that the use of Urim and Thummim is never mentioned in the historical narratives after the time of David. The rise of the prophetic order in Israel provided the nation with a worthier channel for the revelation of the Divine will, and with more trustworthy counsellors in the crises of the individual and national life. The further we descend the stream of history the more conspicuous is this displacement of the priestly lot by the prophetic voice (contrast Ezr 2^{63} = Neh 7^{65} with 1 Mac 4^{46} 14^{41}). That the Urim and Thummim should reappear in the scheme of the Priestly Code is not surprising. It is part of its ideal reconstruction of the theocracy that the high priest should be at all points fully equipped for his office as the Divine vicegerent in the theocracy. For this end he is provided with the already mysterious Urim and Thummim, the manipulation of which was one of the most prized of the ancient prerogatives of the priestly caste. Their early association with the now long tabooed ephod-image, and the fact that the bosom-folds of the upper garment was a common receptacle for the 'lot' as used in everyday affairs (see Pr 16^{33} 'the lot is shaken in the bosom-fold, but the whole disposing thereof is of J″'),[*] may have suggested to the authors of the Priestly Code the placing of the Urim and Thummim in the jewelled pouch of the high priest's ephod. In any case it is clear from the principal passage, Ex 28^{30}, that it is rather a symbolical than a practical significance that is attached to the mysterious contents of the 'pouch of judgment (or decision).' Israel, in the person of Aaron its representative, is here presented as the continual recipient of J″'s 'decisions' and guidance, and the position of the symbols 'upon his heart' betokens the readiness of Israel at all times to yield obedience to these Divine commands.

After the exhaustive presentation of the earlier biblical data as to the use and associations of the Urim and Thummim, little need be said of the views of older scholars, whose method of research was vitiated by their taking the representations of the Priests' Code as decisive for the nature and use of these objects in the historical period. Thus, probably, few will be found to maintain the once widely accepted theory that found the prototype of the Urim and Thummim in the jewelled image of Tme, the goddess of truth and patron of justice, which the Chief Justice (ὁ *ἀρχιδικαστής*, Ælian, *Var. Hist.* xiv. 34; cf. Diod. Sic. i. 48) of Egypt wore on his breast; still less to defend an Egyptian etymology for Urim and Thummim (Wilkinson, *Anc. Egyptians* [1878], vol. iii. p. 183, with figure of judge's breastplate).[†] The same comparative ignoring of the evidence of our oldest sources as to the nature of the ancient lot is fatal to the acceptance of the thesis recently brought forward by an American scholar (Muss-Arnolt, see below), that the Urim and Thummim are a reflexion of the 'Tablets of Destiny' of the Babylonian mythology.[‡]

Nor need we dwell on the many absurd speculations as to the nature of Urim and Thummim, and as to the mode in which their guidance was supplied, which are to be found in the works of Jewish and Christian writers from Philo and Josephus downwards, and for which the curious reader is referred to the bibliography at the end of this article.* Philo, it may be said, did not, as is often erroneously stated, regard the Urim and Thummim as two images carried in the breastplate (see Mangey's note, *Opp.* ii. 152), but as symbols of 'the two virtues, Illumination and Truth (δήλωσίν τε καὶ ἀλήθειαν).' Josephus (*Ant.* III. viii. 9) does not expressly name the Urim and Thummim, but appears to identify them with the jewels of the breastplate and on the shoulders of the high priest, which, by a miraculous effulgence, gave supernatural guidance, particularly on the eve of battle.†

---

[*] Not as EV. 'to wear,' a sense which נָשָׂא nowhere has in Hebrew.

[*] Cf. Book of Jubilees 8^{11}, where the lots for the apportioning of the earth among the sons of Noah are drawn from the patriarch's bosom.

[†] See, however, Hommel, *AHT* 282 f., who finds the original of the Jewish high priest's ephod in the pectoral of the High Priest of Memphis, as figured by Erman, *Egypt*, 298.

[‡] The most that can be said for this view is that the presence of these tablets on the breasts of Marduk and Nebo was known to P, and may possibly have influenced his placing of them on the breast of the high priest (but see above).

A favourite explanation of Jewish writers, reaching back to the Jerusalem Targum (pseudo-Jonathan on Ex 28^{30}), was to the effect that Urim and Thummim contained the sacred tetragrammaton (יהוה), which spelled out answers to inquirers by illuminating the letters of the tribal names on the transparent gems! Scarcely less curious is the view, probably still widely entertained, that the high priest threw himself into a hypnotic trance by gazing intently on the dazzling jewels,—again wrongly identified with Urim and Thummim,—and while in this state was the recipient of the Divine message (see Kalisch, *Exodus*, pp. 540-545, and cf. Plumptre in art. cited above).

LITERATURE.—For the views of older scholars see Buxtorf, 'Historia Urim et Thummim' in Ugolini, *Thesaurus*, vol. xii., and Spencer, *De legg. Hebræorum ritualibus* (1685), dissert. 7. Of modern works and articles reference may be made, besides the ordinary commentaries, to the artt. in Winer's *RWB* (with reff. to many older works); Riehm, *HWB*, art. 'Licht und Recht' (Luther's rendering of Urim and Thummin); Smith's *DB*, and esp. to the excellent study of Kautzsch in *PRE*² vol. xvi.; the standard treatises on Biblical Archæology; Kalisch's excursus in the body of his commentary on *Exodus*, pp. 540–545; Haupt, 'Babylonian Elements in the Levitical Ritual' in *JBL* xix. (1900) pp. 58 f., 72 f.; and for a complete conspectus of the views of modern scholars, W. Muss-Arnolt, *The Urim and Thummim, a Suggestion as to their original Nature and Significance*, a reprint from *AJSL*, July 1900.

A. R. S. KENNEDY.

USURY.—See DEBT, vol. i. p. 579 f. We may add here that the Babylonian contract tablets show that the payment of interest was an established custom from the time of Khammurabi (*c.* 2200 B.C.) onwards. Doubtless it had already existed for centuries in the time of that king. He interferes to enforce the payment of a loan with interest. The usual rate of interest seems to have been 20 per cent., though the payment is also mentioned of 11⅔ and 13⅓. In another case a loan is to be repaid within two months, after which 10 per cent. interest will be charged. In addition to silver or money there are lent corn, dates, sesame seed, and onions. Some of the loans are secured on houses, slaves, etc.; and in one case the services of the slave specified as security are given in place of interest. These contract tablets, etc., extend from *c.* 2200 B.C. to *c.* 100 B.C. (*Guide to Bab. and Assyr. Ant.*, Brit. Mus., 1900, pp. 122-191).

At Athens, in the classical period, interest varied from 12 to 20 per cent., at Rome from 8½ to 12 per cent.; but towards the beginning of the Christian era the rate of interest at Rome was lowered through the accumulation of capital, but high rates still prevailed in the provinces. In Greece and Rome money was often lent and interest paid by the month. See art. 'Interest' in *Dict. Class. Ant.*, O. Seyffert, etc. W. H. BENNETT.

UTA (Οὐτά), 1 Es 5^{30}.—His sons returned among the temple servants under Zerubbabel. There is no corresponding name in Ezra and Nehemiah.

UTHAI (עותי).—**1.** The name of an individual or a family of Judah, settled at Jerusalem after the Captivity, 1 Ch 9^4 (B Γωθει, A Γωθί, Luc. Οὐθί); called in Neh 11^4 ATHAIAH. **2.** One of the sons of Bigvai who returned with Ezra, Ezr 8^{14} (B Οὐθί, A Οὐθαί, Luc. Ὠθαί).

UTHI (B Οὐτού, A Οὐθί), 1 Es 8^{40} = Uthai, Ezr 8^{14}.

UZ (עוץ; LXX Ὦς [Gn 22^{21} Ὦξ, Lag. Ὦζ; Job 1^1 32^2 $42^{17b.\,e}$ ἡ γῆ [χώρα] ἡ Αὐσ(ε)ῖτις]; Vulg. *Hus* [Gn 10^{23} *Us*, Jer 25^{20} *Ausitis*]).—**1.** The eldest son of Aram, and grandson of Shem (Gn 10^{23}). As the name of Aram is omitted in the parallel passage in 1 Ch 1^{17}, Shem would there seem to have been his father. This, however, must be due to some oversight, the wanting passage being duly inserted in the LXX.—**2.** A son of Naḥor by Milcah, the eldest brother of Buz and Ḳemuel 'the father of Aram' (Gn 22^{21}). In the AV the name is transcribed Huz (Josephus has Οὖξος).—**3.** One of the two sons of Dishan, son of Seir the Ḥorite (Gn 36^{28}).—**4.** The name of the native place of Job. Considerable difference of opinion exists as to how far the above names are connected. There would seem to be but little doubt that the genealogical statements in Gn 10 are ethnological and geographical rather than personal, and all that can be deduced from them therefore is, that the people of Uẓ were Semites of the Aramæan stock. That Uẓ the son of Naḥor should be uncle of Aram and Chesed, is probably due to the existence of two distinct traditions concerning these Semitic races, the earlier one making him a son of Aram, and the later one attributing to him an earlier period than that of Aram. Nevertheless, it is not by any means impossible that a recurrence of names at a later date may have taken place, such a thing being by no means unusual, as the genealogical lists show.* Kautzsch, on the other hand, goes further, and maintains not only the connexion of Uẓ the grandson of Shem with Uẓ the son of Naḥor, but also with Uẓ the son of Dishan as well.† This he regards as indicating that the district belonging to the tribe represented by Aram's firstborn originally included a considerable part of that of the Aramæan tribes. From this Uẓ in the wider sense is to be separated Uẓ in the narrower sense, which originated in the mingling of the Aramæan Uẓites with another Semitic race—the 'Naḥorites' of Gn $22^{21ff.}$. Uẓ the grandson of Seir is to be explained in a similar manner as a mingling of (pre-Edomite) Ḥorites and Aramæan Uẓites in a part of Idumæa. The 'land of Uẓ' would therefore be a rather extensive geographical idea. All this seems to be confirmed by other coincidences of names accompanying that of Uẓ—the name of Aram, already referred to; Maacah, another son of Naḥor (Gn 22^{24}, which forms part of a geographical name in 1 Ch 19^6); Buz (Gn 22^{21}) and Buzite (Job 32^2); Chesed (Gn 22^{22}) and Kasdim (Job 1^{17} AV and RV 'Chaldeans'); Shuaḥ, a nephew of Naḥor (Gn 25^2), and Shuḥite (Job 2^{11}); also Ḳedem, the country whither Abraham sent Shuaḥ, together with his other children by Ḳeturah (Gn 25^6), and the race to which Job belonged—the 'sons of the East' or Bĕnê-Ḳedem (Job 1^3).

The question of the position of the land of Uẓ would appear to be determinable within very narrow limits. In Job $1^{15.\,17}$ it would seem that

---

* A convenient and accessible summary of the more important of these older views will be found in Plumptre's article in Smith's *DB*.

† Josephus' statement, 'the breastplate and sardonyx (prob. intended by him to represent Urim and Thummim) left off shining two hundred years' before his time, is too absurd to require refutation.

* The Assyro-Babylonian royal lists likewise indicate that the repetition of renowned or venerated names was far from being an uncommon thing among the Semites in ancient times.

† It is to be noted that Frd. Delitzsch regards Uẓ, the grandson of Seir (Gn 36^{28}), as another person of the same name,—or a chance-likeness,—a theory supported by La 4^{21}, where Edom appears in temporary possession of Uẓ, either wholly or in part.

Job's estate lay open to the depredations of the Sabæans and the Chaldæans, and was therefore on the edge of the great desert, agreeing with v.^{19}, where the destruction wrought by the wind from that direction is referred to. The native countries of Job's friends likewise favour this view—that is, so far as those districts can be identified. Thus Eliphaz came from Teman (Job 2^{11}), which was to all appearance an Edomite locality, Teman being referred to in Gn 36^{11} as a descendant of Esau and son of Eliphaz, which last was evidently, therefore, a genuine Edomite name. His second friend, Bildad 'the Shuḥite,' came from Shuaḥ, the district and name of one of the sons of Abraham and Ḳeturah. The name of Job's third friend, Ẓophar the Naamathite, does not help, that district being unknown (see NAAMAH); but Elihu the Buzite must have come from a neighbouring country, as is implied by Gn 22^{21}. The inscriptions of the kings of Assyria also throw some light upon the question. Thus Esarhaddon, in one of his expeditions to the west, passed through *Bâzu*, reaching, at a distance of 180 *kas-gid*, the country of Ḥazû, and these two districts are, with one consent, regarded as the Buz and Hazo of Gn 22^{21,22}. Shuaḥ is in like manner identified with the *Suḫu* of Tiglath-pileser I., according to whom it lay one day's journey from Carchemish in the land of Ḥatti. In the same neighbourhood lay the land of *Yasbuḳâa* ('the Yasbuḳians'), identified by Frd. Delitzsch with the Ishbak of Gn 25^{2}. This place, which is referred to by Shalmaneser II., was in the neighbourhood of Shuaḥ, with which it is mentioned in the passage of Genesis here referred to. Shalmaneser received tribute from the land of Shuaḥ; but whether it was at this time (B.C. 859) or 28 years later, when he sent an army to the same district, is not certain. On the second occasion he received tribute from a certain Sâsi, *mâr mât Uẓẓâ*, 'a son of the land of Uẓẓâ,' who submitted to him, and whom he placed on the throne of Patinu. It may even be that the rulers of this latter place were counted among 'the kings of the land of Uẓ.' Uẓẓâ (or Ûẓâ, as analogy teaches may have been the more correct form) certainly lay, according to Frd. Delitzsch, W. and N.W. of Aleppo, at no great distance from Patinu, and must have been an important place; hence the raising of its king to the dominion of Patinu.*

Though the Assyrian inscriptions do not indicate clearly the land of Uẓ, and its identification with the land of Uẓẓâ is not so satisfactory as could be wished,† they at least confirm the indications given in the Book of Job. Tradition places the home of the patriarch in the Ḥaurân, where a monastery bearing his name exists (it is situated in the *Wâdy el-Lebweh*). He is said to have been a native of *Jôlân*, and early Arabian authors state that he was born in the neighbourhood of *Nawâ*. Not far from the monastery is shown the *Maḳâm Eyyûb*, or 'Station of Job,' his well, and the trough in which he is said to have washed after his trials were over. His tomb is shared by a Mohammedan saint, and on a hill close by is a stone upon which he is said to have leaned when first afflicted. The currency of the tradition among both Christians and Mohammedans living in the district implies that it is of considerable antiquity. In view of the testimony of the Assyrian inscriptions as to the position of the land of Uẓ, however, Frd. Delitzsch would prefer to regard it as being situated rather in the neighbourhood of Tadmor (Palmyra). According to Josephus (*Ant.* I. vi. 4, 5) it embraced Trachonitis and Damascus, and the LXX represents the patriarch as having lived in Ausitis, on the borders of Edom and Arabia (there is no doubt that it was closely connected with the former country), so that the neighbourhood of Palmyra would seem to be much too far N.E. It is difficult, however, to fix, at this distance of time, the boundaries of a district which is known to have been fairly extensive, and which probably varied in extent, in consequence of political changes, from time to time.

LITERATURE.—Kautzsch in Riehm's *Handwörterbuch*, *s.v.*; Frd. Delitzsch in *ZKF* ii. 87 ff. (cf. his *Paradies*, 259); Baedeker's *Palestine and Syria*, 407.

T. G. PINCHES.

UZAI (אוּזָי).—Father of Palal who helped to rebuild the wall, Neh 3^{25} (B Εὐεί, A Εὐζαί, Luc. Οὐζαί).

UZAL (אוּזָל, Sam. איזל).—Name of a son of Joktan, Gn 10^{27} (A Αἰζήλ), 1 Ch 1^{21} (A Αἰξήν, B om., Luc. Οὐζάλ), but figuring as a local name in Ezk 27^{19}, according to one interpretation [reading מֵאוּזָל ('from Uzal,' so RVm), with Hitzig, Smend, Cornill, *et al.*; B ἐξ 'Ασήλ, A ἐξ 'Ασαήλ]. With this word Gesenius compared *Euzelis of Hindu*, mentioned as a market town in a passage of John of Ephesus (6th cent. A.D.) preserved by Dionysius of Tell-Mahre (*ap.* Assemani, *Bibl. Or.* i. 361), who supposed it to be situated in the interior of the Indian (*i.e.* Arab) country, beyond the territory of the Himyar. This may well be identical with Uzal (Al-Bekri, p. 206), Izal or Azal (Yakut after Hamdani), which the Arab geographers declare was the former name of Ṣan'a, now capital of Yemen. The name was, they think, changed to Ṣan'a either in honour of a queen of that name, or of Ṣan'a son of Azal; or it may have been given the place by the Abyssinians, in whose language it means 'fortress.' The name Ṣan'âu is found in an inscription which Glaser (*die Abessinier*, etc. p. 117) assigns to the 2nd cent. A.D. An earlier name (according to him) was Tafidh (*Skizze*, ii. 427); none of these names appear to be known to the classical geographers of Arabia (Pliny, Ptolemy, etc.), who go rather fully into the names of places and tribes in Arabia Felix. The Arab tradition, however, regarded it as the most ancient city in the world, and the seat of the 'kings of Yemen'; the former theory being apparently due to the derivation of the name Azāl from the Arabic *azal*, 'eternity,' or to the alternate form Uwal (Harris, *loc. citand.*, p. 319), which might be rendered 'first.' If, however, there be any truth in its great antiquity, and its having been a metropolis in ancient times, it must be identical with one of the capitals mentioned by Pliny and Ptolemy; but with which cannot at present be decided. The name of the city must therefore have changed repeatedly; and in the use of the name Azāl or Izāl in the century before Mohammed we are justified in seeing with Glaser (*Skizze*, ii. 427) the influence of the Jews. Their influence in these regions appears from the statements of the Syriac chronicler to have been considerable; and early Arabic writers occasionally preserve traditions dating from the time of their ascendency. A place was shown at Ṣan'a where sixteen prophets had been slaughtered at once (Ibn Rustah); and Wahb Ibn Munabbih (died *c.* 735 A.D.) professed to have found in a sacred book the text, 'Azal, Azal, though all be against thee, yet will I be gracious unto thee,' which seems to come from Is 29$^{1-3}$ with Azal substituted for Ariel (*Taj al-'arus*). Whether, then, the place was called Azal by conjectural identification of it with the son of Joḳtan, or Azal was an old name revived by the Jews, is not clear; the latter supposition is rather the more probable, because an Arabian locality, Azalla, is mentioned in the campaign of Assurbanipal (*KIB* ii. 221), and Azal rather than Uzal is the form that is best attested. The objection to the identification raised by Glaser (*l.c.* 436) on the ground that of the objects mentioned by Ezekiel as exported from Uzal only iron is really found in the neighbourhood, whereas spices are not to be found in the whole of Yemen, seems wanting in weight, since Ṣan'a may have been a depôt for them; rather more force attaches to his objection that the port of Ṣan'a would probably have been Aden (mentioned by Ezekiel in this context) rather than Waddan (VEDAN) and Javan. But, indeed, the difficulties of both text and interpretation in the passage of Ezekiel are so great as to render it unsuitable for the deduction of inferences.

---

* Whether Patinu be connected etymologically with Batanea or not is uncertain, but is worthy of consideration.

† There is doubt as to the sibilant, whether it be really ẓ (צ) or z (ז). In addition to this, a long terminal vowel would not be expected. Delitzsch evidently regards the word as a gentilic adjective; but if this be the case, there is a mistake in the text, *Uẓ-ẓa-a* having been written for *Uẓ-ẓa-a-a* (= *Uẓẓâa*).

Of the beauty and wealth of Ṣan'a glowing descriptions are given by Arabic writers, and modern travellers (*e.g.* W. B. Harris, *A Journey through the Yemen*, 1893, pp. 299–322) confirm them. It is at an elevation of 7250 feet above the sea-level, with a mountain (Jebel Nujum) rising abruptly on the east. In the rainy season a torrent of water runs through the river-bed, which occupies the middle of the town; Ibn Rustah (*Bibl. Geogr. Arab.* vii. 110) says it is not much narrower than the Tigris, and was in his time used for irrigation. The climate varies little during the whole year; and of most produce there are two crops. The fortress and temple of Ghumdan, destroyed by the Caliph Othman, was the most magnificent building in Arabia. In the 7th cent. of Islam the Zaidite Imams made it their capital. Of the forms of the name, *Izal* appears to be the best attested; the LXX translators clearly connected the second syllable with *Il* (god), and the first perhaps with the god *As* (who appears in some Punic proper names) or some other deity. Other etymologists seem scarcely more successful.

D. S. MARGOLIOUTH.

UZZA (עֻזָּא). — **1.** The eponym of a Benjamite family, 1 Ch 8^{7} (B Ναανά, A 'Αζά, Luc. 'Αζάν). **2.** The head of a family of Nethinim that returned, Ezr 2^{49} (B Οὐσά, A 'Αζά, Luc. om.) = Neh 7^{51} (B 'Οζεί, A 'Οζί, Luc. 'Αζά). **3.** The driver of the cart on which the ark was removed from Kiriath-jearim, 2 S $6^{3.\,6.\,7.\,8}$ = 1 Ch $13^{7.\,9.\,10.\,11}$. Uzza's sudden death at a place called, in commemoration of this untoward incident, **Perez-uzzah** ('breach of Uzzah'; cf. artt. CHIDON and NACON), led to the temporary abandonment of David's project of transporting the ark to Jerusalem. Uzza's death was attributed by the popular mind to anger on the part of Jahweh at his having presumed to handle the sacred emblem too familiarly. There are, however, points of obscurity in the narrative, and the text is in several instances quite uncertain. See Driver, Wellh., Budde, Löhr, H. P. Smith, *ad loc.*

The name appears as עֻזָּא, Uzza, in 2 S 6^{3}, 1 Ch $13^{7.\,9.\,10.\,11}$, as עֻזָּה, **Uzzah**, in 2 S $6^{6.\,7.\,8}$. B has everywhere 'Οζά, which is read also by A in the Chron. passages; A has in 2 Sam. 'Αζζά, once [6^{3}] 'Αζά.

4. Manasseh and his son Amon were buried in the 'garden of Uzza' (גַּן־עֻזָּא), 2 K $21^{18.\,26}$ (LXX κῆπος 'Οζά), which was attached to the palace of Manasseh. The conjecture of Stade (*GVI* i. 569, ii. 679), that עֻזָּא here = עֻזִּיָּה (Uzziah), has found wide acceptance (but see footnote to next col.).

J. A. SELBIE.

UZZAH (עֻזָּה).—**1.** The name of a Merarite family, 1 Ch $6^{29\,(14)}$ (B 'Οζά, A 'Αζά, Luc. 'Οζιά). **2.** See UZZA, No. 3.

UZZEN-SHEERAH.—See SHEERAH.

UZZI (עֻזִּי; 'Οζ(ε)ί).—**1.** A descendant of Aaron, 1 Ch $6^{5.\,6.\,51}$ [Heb. $5^{31.\,32}$ 6^{36}], Ezr 7^{4}. **2.** The eponym of a family of Issachar, 1 Ch $7^{2.\,3}$. **3.** The name of a Benjamite family, 1 Ch 7^{7} 9^{8}. **4.** A Levite, son of Bani, overseer of the Levites dwelling in Jerusalem, Neh 11^{22}. **5.** The head of a priestly family, Neh $12^{19.\,42}$.

UZZIA (עֻזִּיָּא, prob. same as עֻזִּיָּה, *Uzziah*; B 'Οζειά, A 'Οζιά, Luc. 'Οζίας).—One of David's heroes, 1 Ch 11^{44}.

UZZIAH (עֻזִּיָּהוּ and עֻזִּיָּה [on the name see next art.]). —**1.** A king of Judah. See next article. **2.** A Kohathite Levite, 1 Ch $6^{24\,(\text{Heb. }9)}$ (B 'Οζειά, $A^{a?}$ sup ras 'Οζίας). **3.** The father of an officer of David, 1 Ch 27^{25} (B 'Οζειού, A 'Οζιού). **4.** A priest who had married a foreign wife, Ezr 10^{21} (B 'Οζειά, A 'Οζιά, Luc. 'Οζίας). **5.** Name of a Judahite family after the Exile, Neh 11^{4} (B 'Αζέδ, ℵ 'Αζεδνά, A 'Οζιά, Luc. 'Οζίας). The LXX reads 'Οζ(ε)ιά also in Neh 11^{5} for חֲזָיָה HAZAIAH of MT.

UZZIAH (AZARIAH).—The Heb. names vary in form. We have עֻזִּיָּהוּ (2 K $15^{32.\,34}$, Is 1^{1} 6^{1} 7^{1}, 2 Ch $26^{1\text{ff.}}$ 27^{2}) and עֻזִּיָּה (2 K $15^{13.\,30}$, Hos 1^{1}, Am 1^{1}, Zec 14^{5}). The meaning is 'J" is my strength.' We have a Heb. parallel in עֻזִּיאֵל and in the Phœn. עזבעל and עזמלך. The alternative Heb. name עֲזַרְיָהוּ occurs in 2 K $15^{6.\,8}$, while עֲזַרְיָה is found in 2 K 14^{21} $15^{1.\,7}$ etc., and also 1 Ch 3^{12}. The meaning of the alternative name is similar to that of עֻזִּיָּהוּ, viz. 'J" hath helped (me).'

In Assyr. the names *Ašur-nirâri* ('Ashur is my help') and *Rammân-nirâri* ('Rammân is my help') are parallel in thought and expression to both the alternative proper names of the Heb. monarch, while the Phœn. furnishes a close analogy to the latter in עזרבעל 'Baal is (my) help,' represented in Latin by *Hasdrubal*; or, with the elements of the name reversed, in בעלעזר (cf. also עזרתבעל, prob. 'my help is Baal'; and see Bloch, *Phön. Glossar.* p. 49). The Gr. forms are 'Οζείας ('Οζίας) and 'Αζαρίας. In a number of instances, as in 2 K $15^{13.\,32}$ (and in v.^{34} in A), LXX substitutes 'Αζαρίας for Uzziah, whereas in 2 K 15^{30} 'Αχάς is substituted for 'Αζαρίου, which is the reading of A. In Is 6^{1} 7^{1} 'Οζίας is the form preserved in B^{b}AQ. It is quite possible that the king had really only one name, עזריה, and that the name עזיה (Uzziah) may have arisen through a corruption of the text, the early form of י (*yôd*), viz. 𐤉, being confounded with an imperfectly written ר (*resh*), viz. 𐤓.[*]

Uzziah was the son of Amaziah king of Judah, and, according to the redactor of the Books of Kings (see Kittel's *Com.*), ascended the throne of Judah at the age of sixteen, and in the 27th year of Jeroboam king of Israel (2 K $15^{1\text{f.}}$). It is well known, however, that such synchronisms are of no chronological value, and lead to endless confusion. We can only assert that both these kings were contemporaries. Whether Uzziah's reign extended to 52 years is uncertain.

The record of his reign in 2 K 14 and 15 is singularly brief. Though the worship of the high places—the normal cult of Israel and Judah—still continued, the verdict of the Deuteronomic redactor is favourable to him, as it was to the memory of his father, Amaziah; he 'did what was right in the eyes of the Lord' (2 K 15^{3}).

The record in the Book of Kings gives us no information respecting the events of this long reign, except that Uzziah fell a victim to leprosy towards its close (2 K 15^{5}). But in 14^{22} we probably have a fragment from the Annals which refers to his reign, though its somewhat strange position after the section by the redactor (vv.$^{15\text{-}21}$) renders its interpretation uncertain. We there read that Elath, the chief port of Edom, which was of great commercial value to Judah as an outlet as well as inlet for commerce, was again recovered to Judah by the successful military enterprise of Azariah after his father's disastrous overthrow by Jehoash king of Israel had entailed its temporary loss. Owing to the leprosy which attacked Uzziah towards the end of his long reign, he was compelled to go into retirement,* while his son Jotham discharged the royal functions (שׁפט) in his place.

---

[*] This seems to us more probable than the view of Stade (*GVI* i. p. 569 footn.^{1}) that the name 'Azariah was abbreviated to עֻזָּא (2 K 21^{18} 'garden of 'Uzza,' cf. 2 S 6^{3}), and that the name 'Uzziah grew out of the latter. For 'Uzzâ is not improbably the name of a deity, as 2 K 21^{18} and 2 S 6^{8} seem to indicate. On the Arabian Al-'Uzza see Baethgen, *Beiträge zur Sem. Religionsgesch.* p. 114; Ḳorân, 53. 19; Wellhausen, *Reste*^{2}, p. 34 ff.

Such is all that can be learned about this monarch in 2 Kings. The Book of Chronicles (2 Ch $26^{5\text{-}20}$) adds to the above narrative a number of details. (1) We have an account of the military preparations and exploits of the king, and also of his agricultural pursuits. (2) We have a *Haggadic* narrative attached to the fact of the king's leprosy which ascribes the latter to Divine judgment on him for attempting to fulfil the priestly function of offering incense on the altar of incense. Kittel in his *History of the Hebrews* attempts to defend the historicity of this conflict between the royal and priestly authority; † but it is quite clear that the form of the narrative is based on the tradition of the P passages in Ex $30^{1.6.7}$, Nu 17^5 18^7. Furthermore, the name of the chief priest *Azariah* probably originated from the older alternative name of Uzziah himself, who, like Solomon and all royal personages (cf. the Assyr. kings who assumed the office of *patesi*), exercised priestly functions.

But the *military* exploits and preparations of Uzziah recorded in 2 Ch $26^{6\text{-}15}$ cannot be dismissed as unhistorical, since they serve to explain facts in subsequent history which would otherwise remain obscure. We read that Uzziah equipped an armed host of 307,500 men, and fortified Jerusalem, and provided it with engines of war. He also conducted a successful campaign against the Philistines, and stormed the cities of Gaza, Jabneh, and Ashdod, and also conquered the Arabians and Ammonites. Subsequently recorded events render many if not all of these details exceedingly probable, though here, as so often in Chronicles, the numerical statements are exaggerated. (*a*) That Jerusalem was fortified and provided with means of defence during the reign of Uzziah, is rendered exceedingly probable by the account of its defence in the days of Ḥezeḳiah, which has come to us not only in the record of 2 K $18^{13\text{ff.}}$, but in the Taylor cylinder of Sennacherib (col. ii. 69–col. iii. 41), which, in describing the invasion of Palestine by Sennacherib, expressly mentions (1) the forty-six fortified towns (col. iii. 13) captured by the Assyrians; (2) that the Philistine town Eḳron (*ir Amḳarruna*) was under the control of Ḥezeḳiah, and that the king Padi, a puppet of Assyria, was delivered up to the king of Judah (col. ii. 70 ff.). Now, it is reasonable to conclude that the control of Philistia by Ḥezeḳiah was probably due to the strong military policy of Uzziah described by the Chronicler, who must have derived his information from annals of his reign from which the redactor of the Books of Kings did not draw. Certainly, the reign of Aḥaz, distracted by the troubles of the Syro-Ephraimite invasion and weakened by subservience to Assyria, was not the time when strong defensive measures would be adopted. Indeed we know that Philistia was instigated to revolt by the confederacy of the two Northern kings. (*b*) The mention of Arabians (col. iii. 31) among the troops which defended Jerusalem against Sennacherib sustains the statement of the Chronicler that Uzziah subjugated the Arabs, and this is probably to be connected with the recovery of Edom and the port of Elath to which 2 K 14^{22} refers. (*c*) Kittel lays stress on the prosperity of Judah in the days of Aḥaz, of which Is 2 and 3 furnish abundant evidence. This is best explained as due to the consolidation of the resources and power of the Southern Kingdom during the long and prosperous reign of Uzziah described in 2 Ch 26. This view is ably sustained by McCurdy in the *Expositor*, Nov. 1891, p. 388 ff.

It was formerly held by Assyriologists, including especially Schrader, that the records of Tiglath-pileser prove that Uzziah (Azariah) was the head of a powerful confederacy of Northern Hamathite States against Assyria. Unfortunately, the passages in which reference is made to Azariah (*Az(Iz)ri-ya-u*), whom Schrader identified with Uzziah (*KGF* 399–421), are much mutilated. The following is a translation of the passages so far as they can be deciphered and interpreted on the basis of Rost's edition of Tiglath-pileser's Annals, lines 101–111—

101–2 . . . my officer as ruler of the province I placed over them [gifts and tribute like the Assyrian imposed on them]
103 in the further course of my campaign the tribute of the ki[ngs
104 I received Azar]iah king of Ja-u-di like . . .
105 . . . zariah of Ja-u-di . . .
[106 and 107 seem to refer to the towns in which Azariah sought refuge]
108 by the attack of the light-armed (?) of the bodyguard . . . [of the approach of
109 the Assyrian troops] the numerous, they heard [their heart] feared
110 [the town] I destroyed, laid waste, burnt down
111 . . . placed themselves on the side of [Azar]iah strengthened (?) him . . .

Lines 125–132 refer to the 19 districts of Hamath which 'placed themselves on the side of Azariah,' the series being enumerated from South to North, the most southerly being Arḳâ, Zimarra, Usnu, Sianna, and Ṣimirra, and the most northerly Ellitarbi and Bumami.

Now, even twenty years ago, the identification of the *Azri-ia-u* of Tiglath-pileser's Annals with Azariah of Judah was disputed, for example, by Gutschmid (*Neue Beiträge zur Kunde des alten Orients*, p. 55 ff.) and by Wellhausen (*Jahrbücher für deutsche Theologie*, xx. 632). But at that time there were certainly many reasons why the identification made by Schrader should have been considered sound. No other land *Ja-u-di* was then known except Judah. Judah was called by that name in the Nabî-Junus inscription preserved in Constantinople, in which Sennacherib refers to his subjugation of Ḥezeḳiah (of which the following is a transcription, line 15: *rap-šu na-gu-u* (*mâtu*) *Ja-u-di Ḫa-za-ki-a-u šarri-šu i-mid ap-ša-a-ni*), while the references to the same king in connexion with (*mâtu*) *Ja-u-da-ai* in the Prism inscription of Sennacherib (col. ii. 72, iii. 12, 13) need not be cited here. Indeed Tiglath-pileser himself (2 Rawl. 67, line 61) refers to *Ja-u-ḫa-zi* (*mâtu*) *Ja-u-da-ai* in close juxtaposition to the rulers of Ashkelon and Edom, so that it is absolutely certain that *Ja-u-ḫa-zi* (=Joaḥaz) is the Assyrian name of king Aḥaz. Moreover, the fact here mentioned, that Aḥaz paid tribute to the Assyrian monarch, is certified by 2 K 16^8. Certainly, the evidence for Schrader's identification seemed cogent.

Nevertheless, there are serious difficulties in the way of its acceptance. In the *first* place, the geographical conditions militate strongly against it. The nineteen districts of Hamath can hardly have depended for support on the ruler of so distant a realm as Judah. *Secondly*, the chronological argument tells decisively against it. For if Uzziah was the mainstay of a conspiracy of nineteen Hamathite States in 738 B.C., which is the year which Assyrian data would lead us to assign to its overthrow, we can allow only three years for the leprosy of Uzziah, the interregnum of Jotham, Jotham's sole reign, and the Syro-Ephraimite war against Judah. *Thirdly*, the discovery of the Zinjerli inscription (on the stele erected by בר רכב the son of Panammu, king of Sam'al, to his father) has thrown a fresh light on the problem. There we find mention of a land יארי (and also on the stele of Hadad, erected by Panammu its king). We might with Winckler regard the א here as *hamza* and pronounced as *u*, and thus read the word (as the Assyrians did) *Ja'udi*. This country lay north of the Orontes and bordered on the land Unki, and it is possible that Sargon refers to it in his Nimr. insc. line 8 : (*mâtu*) *Ja-u-du ša ašaršu rûḳu*, 'J. whose situation is remote.' The mention of Hamath in the same line lends colour to this view. The objection that the name *Azrijâhu*, with its Heb. name of deity, clearly indicates a Hebrew personality, loses force when we remember that Hamath, as we learn from the same inscription of Sargon, had a prince called *Jau-bi'di*, elsewhere called *Ilu-bi'di*. This shows that a deity *Jâhu* was also worshipped in those regions. *Lastly*, the close similarity which subsisted between the language of the Zinjerli inscr. and Hebrew renders it in no way improbable that the land Ja'di should have a ruler named Azariah. The capital of the land was Kullani, the Calno of Is 10^9.

---

* The text here is uncertain. The Heb. text has בְּבֵית הַחָפְשִׁית, LXX ἐν οἴκῳ ἀφφουσώθ (cf. 2 Ch 26^{21}). Judging from the well-known meaning of חָפְשִׁי, this can mean only 'in a free house,' *i.e.* free from the intrusion of others. The expression, however, is very strange, and Kittel is warranted in accepting the ingenious emendation of Klostermann, בְּבֵיתֹה חָפְשִׁית 'in his house unmolested,' חָפְשִׁית being an adverb with the ending ִית—, as in אֲחֹרַנִּית (Gn 9^{23}).

† *Gesch. der Heb.* ii. p. 281.

This is the evidence based on the arguments used by Winckler (*Alttest. Forsch.* i. (1893) pp. 1–23; cf. *KAT*^{3} i. 54 ff., 262) for disconnecting the inscr. of Tiglath-pileser from any reference to Uzziah (Azariah) of Judah.* McCurdy, however, upholds Schrader's position (*HPM* i. 413 ff.), but the arguments of Winckler have been adopted by Hommel (art. ASSYRIA in this Dict. vol. i. p. 185, footn.†), Guthe (*GVI* p. 188), Maspero (*Passing*, etc., 150). The chronological difficulties which beset the biblical student of the latter half of the 8th cent. become in this way somewhat lessened. The death-year of Uzziah may be placed, as Winckler suggests, in 739 B.C., but it may easily be earlier (*KAT*^{3} i. 320)—in fact as early as 750 (Winckler, *Gesch. Israel's*, Theil i. p. 179). Cf. Cheyne, *Introduction to Isaiah*, pp. 4, 16 ff. OWEN C. WHITEHOUSE.

UZZIEL (עֻזִּיאֵל 'my strength is El,' cf. the name עֻזִּיָּה *Uzziah*; LXX 'Οζ(ε)ιήλ).—1. A son of Kohath, Ex $6^{18.\ 22}$, Lv 10^4, Nu $3^{19.\ 30}$, 1 Ch $6^{2.\ 18}$ 15^{10} $23^{12.\ 20}$ 24^{24}; with gentilic name the **Uzzielites** (הָעָזִּיאֵלִי), Nu 3^{27}, 1 Ch 26^{23}. **2.** A Simeonite; one of those who took part in the expedition to Mt. Seir, 1 Ch 4^{42}. **3.** Eponym of a Benjamite family, 1 Ch 7^7. **4.** A musician, of the sons of Heman, 1 Ch 25^4 (called in v.^{18} AZAREL). **5.** A Levite, of the sons of Jeduthun, 2 Ch 29^{14}. **6.** One of the guild of the goldsmiths, who took part in the repairing of the wall, Neh 3^8. **7.** See JAAZIEL.

---

* If the view advocated in this art. be correct, the statement in art. CHRONOLOGY OF OT (vol. i. p. 401^b *ad fin.*) will have to be modified accordingly.

V

VAGABOND.—This English word is used in AV in the sense of *wanderer* (Lat. *vagabundus*, from *vagari* to wander). It is applied to Cain, Gn 4^{12} 'A fugitive and a vagabond shalt thou be in the earth' (נָע וָנָד, LXX *στένων καὶ τρέμων*, Symm. *ἀνάστατος καὶ ἀκατάστατος*, Vulg. *vagus et profugus*, Tind. 'A vagabunde and a rennagate,' RV 'A fugitive and a wanderer'), 4^{14}; Ps 109^{10} 'Let his children be continually vagabonds, and beg' (וְנוֹעַ יָנוּעוּ בָנָיו; Cov. 'Let his children be vagabundes and begg their bred'). So in Jg 11^3 Cov. 'There resorted unto him [Jephthah] vagabundes, and wente out with him'; Fuller, *Holy War*, 206, 'Being to shape their course into Palestine, they went into France; showing they had a *vertigo* in their heads, mistaking the West for the East; or else, that like vagabonds they were never out of their way'; Goldsmith, *Citizen*, vii. 'He who goes from country to country, guided by the blind impulse of curiosity, is only a vagabond.'

The adj. occurs in Ac 19^{13} 'Certain of the vagabond Jews, exorcists' (*τῶν περιερχομένων* 'Ιουδαίων, RV 'strolling'). So Melvill, *Diary*, 361, 'To take order with the pure [=poor] that there be not vagabund beggars'; Shaks. *Ant. and Cleop.* I. iv. 45—

> 'Like to a vagabond flag upon the stream.'

J. HASTINGS.

VAHEB (וָהֵב).—An unidentified locality, mentioned only in the obscure quotation from the book of the WARS OF THE LORD in Nu 21^{14} (BA Ζωόβ, F and Luc. Ζοόβ). See SUPHAH.

VAIL.—See VEIL.

VAIZATHA (וַיְזָתָא; B Ζαβουθαῖος, A Ζαβουγαθά, ℵ Ζαβουδεθάν, Luc. 'Ιζουθάθ).—One of the ten sons of Haman, Est 9^9. The name may be = Pers. *Vahyazdâta*, 'given of the Best one' (cf. Benfey, *Pers. Keilinschr.* [1847] 18, 93; F. Spiegel, *Altpers. Keilinschr.* 240).

VALE, VALLEY.—*Vale* stands in AV for two Hebrew words עֵמֶק and שְׁפֵלָה; and *valley* for five Hebrew words, בִּקְעָה, גַּיְא, נַחַל, עֵמֶק, שְׁפֵלָה, and one Greek word, *φάραγξ* (Lk 3^5†). Of these words, the meaning and use of בִּקְעָה, a *broad plain between hills*, שְׁפֵלָה *lowland* (so always in RV), and נַחַל *wādy*, have been dealt with under PLAIN, 3. 7, and RIVER, 3, respectively; so that גַּיְא, עֵמֶק, and *φάραγξ* alone remain to be considered here.

1. גַּיְא (*gai'*), always 'valley' in both AV and RV, is a *narrow* valley, and would be more exactly represented by *glen* or *ravine*. The *gai's* mentioned in the OT are—the v. of Hinnom (Jos 15^8 and frequently; 'the valley,' Jer 2^{23}), which gave its name to the '*valley*-gate' of Jerus. (2 Ch 26^9, Neh $2^{13.\ 15}$ 3^{13}); of Iphtaḥ-'ēl, Jos $19^{14.\ 27}$, on the border between Zebulun and Asher; of Ẓebo'im (the hyænas), 1 S 13^{18}, S.E. of Gibeah; of Salt, apparently somewhere near Edom (2 S 8^{13}=1 Ch 18^{12}, cf. Ps 60^{title}; 2 K 14^7, 2 Ch 25^{11}); the v. of craftsmen, or smiths (1 S 13^{19}; cf. *HGHL* 160 f., 211), 1 Ch 4^{14} (RV here *Ge-ḥarashim*), Neh 11^{35}, near Lod (Lydda); and of Ẓephathah, 2 Ch 14^{10}, near Marēsha (though prob. 'in the v. *north of* M.' should be read with LXX; cf. Buhl, 89), no doubt the *Wādy el-Afranj*, *HGHL* 231, 233. Valleys not expressly named are—the v. in front of Beth-pe'or, a station of the Isr., in which Moses

was buried (Nu 21^{20}, Dt 3^{29} 4^{46} 34^{6}); one on the N. of Ai (Jos 8^{11}); one near Gedor (1 Ch 4^{39}; but see Gedor, 2); one in the 'vale' of Elah (1 S 17^{3}), perhaps the 'deep trench which the combined streams' of the W. es-Sur and the W. el-Jindy 'have cut through the level land' below the point where they meet (*HGHL* 228); the 'valley of vision,' in or close to Jerus. (Is $22^{1.5}$); one close under Samaria (Is $28^{1.4}$, Mic 1^{6}); one mentioned as the ideal burial-place of the hosts of Gog (Ezk $39^{11.11.15}$); and the ravine which Zech. ($14^{4.5.5}$) pictures as being split through the Mt. of Olives, when J″ descends upon it to deliver His people.

The word occurs also, without reference to specific localities, in Ps 23^{4} ('a ravine of deathly gloom,' fig. of a situation of loneliness and peril); Is 40^{4} (LXX *φάραγξ*, whence Lk 3^{5}); and in the plur. generally (usu. opp. to *mountains*), 2 K 2^{16}, Ezk 6^{3} 7^{16} 31^{12} 32^{5} 35^{8} $36^{4.6}$. In 1 S 17^{52a} (RV 'to *Gai*') 'to *Gath*' is evidently to be read with LXX and most moderns; see v.^{52b}. In the Apocrypha 'valley' stands for *φάραγξ*, Jth 2^{8} 7^{4} 11^{17} 12^{7} 13^{10}; and for *αὐλών*, Jth 4^{4} $7^{3.17}$ $10^{10.11}$.

2. עֵמֶק *'ēmek* (EV mostly *valley*; AV *vale* in Gn $14^{3.8.10}$ 37^{14}, to which RV adds Gn 14^{17}, Jos 8^{13} 15^{8} 18^{16}, 1 S $17^{2.19}$ 21^{9}). *'Ēmeḳ* (lit. *depth, deepening*) is 'a highlander's word for a valley as he looks *down* into it, and is applied to wide avenues running up into a mountainous country, like the Vale of Elah, the Vale of Hebron, and the Vale of Aijalon' (*HGHL* 384). It thus denotes something broader than a *gai'*, but less extensive or plain-like than a *biḳ'āh* (Plain, 3);* and it is a pity that, for distinction, especially from *gai'* ('valley'), it has not in AV been uniformly represented by 'vale.'

The importance of distinguishing specific geogr. terms in the OT was long ago pointed out, and well illustrated, by Stanley, *S. and P.*, Appendix, pp. 475–534; cf. *HGHL* 653 ff. The student will find it a good plan, in the case both of these and of other synonyms (cf. Creeping Things; Offer, Offering) which are confused in EV, to mark on the margin of his RV either the Heb. word used or its proper English equivalent.

The following are the *'ēmeḳs* mentioned in the OT:—the 'vale' of Siddim, Gn $14^{3.8.10}$; of Shaveh, Gn 14^{17}, said there to be the same as the 'King's Vale,' which is mentioned also in 2 S 18^{18} † (according to Jos. *Ant.* VII. x. 3, 2 stadia from Jerus.); of Hebron, Gn 37^{14}; of Achor, Jos $7^{24.26}$ 15^{7}, Hos 2^{15}, Is 65^{10}; of Aijalon, Jos 10^{12}, a 'broad fertile plain gently sloping up' between the hills 'to the foot of the Central Range' (*HGHL* 210); of Rephaim, S.W. of Jerus., on the border between Judah and Benj., Jos 15^{8} 18^{16}, 2 S $5^{18.22}$ 23^{13} (=1 Ch $14^{9.13}$ 11^{15}), Is 17^{5}; ‡ of Jezreel, Jos 17^{16}, Jg 6^{33}, Hos 1^{5}, not the 'great plain' of Esdraelon (Jth 1^{8}), *W.* of Jezreel, stretching towards Carmel, but 'the broad, deep vale *E.* of Jezreel which descends to the Jordan' (*HGHL* 384 f.); of Ḳĕẓiẓ, Jos 18^{21} (RV 'Emek-keziz,' as the name occurs in an enumeration of *cities*), somewhere in E. Benjamin; of Elah, 1 S $17^{2.19}$ 21^{9}, now prob. the *W. es-Sunṭ*, 18 m. W.S.W. of Jerus. (*HGHL* 226 f.); of Beracah ('Blessing'), 2 Ch $20^{26.26}$, in or near the wilderness of Tekoa (v.^{20}); of Succoth, Ps 60^{6}=108^{7}, the broad part of the Jordan valley about Succoth, near the ford Dāmiyeh, S. of the Jabbok (cf. Jos 13^{27} 'in the *vale*,' of the same locality); of Baca ('weeping'), Ps 84^{6}; of Gibeon, Is 28^{21} (prob. some part of one of the gorges which lead down from Gibeon to Aijalon, Jos 10^{10-13}; cf. *HGHL* 210); of Jehoshaphat, Jl $3^{2.12}$ (perhaps the fairly broad and open part of the *naḥal* of the Kidron, between Jerus. and the Mt. of Olives), called in v.^{14} by the emblematic name 'vale of decision' (*i.e.* of judgment).

'Vales' without specified names are alluded to in Jos 8^{13} ('the vale' near Ai, rightly distinguished in RV from the 'valley' (*gai'*) of v.^{11}); 13^{19} (in Reuben); 19^{27} (a place Beth-hā'ēmeḳ, in Asher); Jg 5^{15} (the Plain of Esdraelon); $7^{1.8.12}$ (apparently the vale of Jezreel, 6^{33}); 18^{28} ('the vale that belongeth to Beth-Rĕḥob'); 1 S 6^{13} (near Beth-shemesh; the broad valley, the upper part of the *Wādy eṣ-Ṣarār* (the ancient *naḥal* of Soreḳ), opening out westwards and leading down in the direction of Ekron; (cf. *HGHL* 218 f.); 1 S 31^{7}=1 Ch 10^{7} (prob. the vale of Jezreel); Jer 21^{13} (very uncertain; the Tyropœon valley? or as Jl 3^{2}, above? or not of Jerusalem at all?); 32^{40} (the *gai'* of Hinnom); 47^{5} (of the Phil. plain, though hardly suitable, in spite of *HGHL* 655; read prob. 'the remnant of *the 'Anāḳim'* [עֲנָקִם for עֲמָקִם; see Jos 11^{22}], with LXX, Ges., Hitz., Graf, Giesebr. etc.); $49^{4.4}$ (in Ammon). The word is also used generally of 'vales' in different parts of the country, mentioned often either with reference to their fertility (cf. 1 S 6^{13}, Is 17^{5}), or as suitable for war-chariots to deploy in; Nu 14^{25}, Jos 17^{16}, Jg $1^{19.34}$, 1 K 20^{28}, 1 Ch 12^{15} 27^{29}, Job $39^{10.21}$ ('he paweth in the *valley*,' of the war-horse), Ps 65^{13}, Ca 2^{1} ('the lily of the *valleys*'), Is 22^{7} (about Jerus.), Jer 48^{8} (in Moab), Mic 1^{4}.

S. R. Driver.

VANIAH (וַנְיָה [but text dub.]; B *Οὐιεχωά*, A *Οὐουνιά*, ℵ *Οὐιερεχώ*, Luc. *Οὐανιά*).—One of the sons of Bani, who had married a foreign wife, Ezr 10^{36}.

VANITY.—1. הֶבֶל (1) lit. a breath of air, as a gentle breeze, Is 57^{13}; a breath of the mouth, Ps 144^{4}; hence (2) fig. evanescence, emptiness, La 4^{17}, Job 9^{29}; (3) idols and idolatry, Dt 32^{21}, Jer 10^{8}, 2 K 17^{15}, Ps 31^{6}; (4) exhalation, mist, Ec 6^{4} 11^{8} (cf. Abel [wh. see], Gn 4^{2}). 2. אָוֶן (1) labour, sorrow, Hos 9^{4}, Hab 3^{7} (cf. Ben-oni for Benjamin, Gn 35^{18}); (2) nothingness, Is 41^{29}; worthlessness, sinfulness, Job 31^{3}, Pr 17^{4}; (3) idols and idolatry, Is 66^{3}, 1 S 15^{23} (cf. Beth-aven for Beth-el, Hos 4^{15} [see Cheyne, p. 69]; Aven for On in Egypt, Ezk 30^{17}; Aven for Heliopolis in Syria, Am 1^{5}). 3. שָׁוְא (1) wickedness, Job 11^{11}; (2) calamity, Is 30^{28}; (3) falsehood, Ps 12^{2}; (4) emptiness, uselessness, Ps 60^{11}, Mal 3^{14}, Jer 2^{30}, Ps 127^{1}. 4. רִיק (1) emptiness, Jer 51^{34}; hence (2) fig. a useless, worthless thing, Ps 2^{1} 4^{2} 73^{13}, Lv 26^{16}, Is 49^{4}, Hab 2^{13}. 5. תֹּהוּ (1) waste, Gn 1^{2}, Dt 32^{10}, Is 24^{10}; hence (2) fig. emptiness, uselessness, Is 49^{4} 41^{29} 45^{19}. Greek *ματαιότης*, what is devoid of truth and fitness, 2 P 2^{18}; perverseness, Eph 4^{17}; frailty, Ro 8^{20}; also *ματαιολογία*, empty talk, 1 Ti 1^{6}; *ματαιολόγος*, idle talker, Tit 1^{10}; *μάταιος*, devoid of force, truth, success, result, Ja 1^{26}, 1 Co 15^{17} 3^{20}, Tit 3^{9}, 1 P 1^{18}; *τὰ μάταια*, idols and idolatry, Ac 14^{15}; *ματαιόω*, to become profitless, empty, Ro 1^{21}. Also *κενός*, literally empty, fig. void of truth, Eph 5^{6} Col 2^{8}; void of worth, Ja 2^{20}; void of result, 1 Co 15^{10}; *κενοδοξία*, groundless self-esteem, empty pride, Ph 2^{3}; *κενόδοξος*, conceited, Gal 5^{26}; *κενοφωνία*, empty discussion, 1 Ti 6^{20}, 2 Ti 2^{16}; *κενόω*, to empty, to make void, Ro 4^{14}, 2 Co 9^{3}: also some other words of less importance.

The varied senses, literal and figurative, of the words tr. 'vanity' indicate the wide range of its use in the Scriptures. The literal tr. 'breath' would probably be better than 'vanity' in several passages (Ps 78^{33} 94^{11} 144^{4}, Is 57^{13}) in which the word is used to indicate the evanescence of man's life (also Ec 6^{4} 11^{8}, cf. Ro 8^{20}), which itself is unsubstantial and unsatisfying (Job $7^{3.16}$, Ps $39^{5.6.11}$, Hab 2^{13}). Man himself cannot be trusted (Ps 60^{11} 62^{9}), and this his worthlessness is shown alike in falsehood (Job 31^{5}, Ps 12^{2} 41^{6}, Pr 30^{8}, Is 58^{9} 59^{4})

---

* Only once or twice does it seem to be used of what is elsewhere described by one of these words (Jer 21^{13}? 32^{44}; Jg 5^{15}).

† AV '*dale*' in these two passages; RV inconsistently 'King's Vale' in Gn 14^{17}, 'king's dale' in 2 S 18^{18}.

‡ RV, again inconsistently, 'vale' in Joshua, elsewhere 'valley.'

and in wickedness (Job 11^{11} 31^{3}, Ps 10^{7}, Is 5^{18}, Eph 4^{17}, 2 P 2^{18}), of which the disaster and disappointment of his lot are but the punishment (Job 15$^{31.\ 35}$, Is 30^{28}, Pr 22^{8}), although man dares to question God's meaning in making him (Ps 89^{47}, cf. Is 45^{18}).

As there is but one God, idols are unreal (Is 66^{3}, Jer 10^{15} 51^{18}, cf. 1 Co 8^{4}); their worship is unprofitable (Dt 32^{21}, 1 S 15^{23}, 2 K 17^{15}, Ps 4^{2} 24^{4} 31^{6}, Jer 2^{5} 10$^{3.\ 8}$ 16^{19} 18^{15}, cf. Ac 14^{15}), and their worshippers worthless (1 S 12^{21}, 2 K 17^{15}, Is 41^{29} 44^{9}). Under the same judgment come false prophecy (Jer 23^{16}, La 2^{14}, Ezk 13$^{1\text{-}23}$, Zec 10^{2}), reliance on any other help than God's (Is 30^{7}, Jer 3^{23}, La 4^{17}), and ritual without righteousness (Is 1^{13}, cf. Ja 1^{26} 2^{20}). While to doubt or unbelief, God's service (Ps 73^{13}, Mal 3^{14}), His dealing (Jer 2^{30}, Is 49^{4}), and even His law (Jer 8^{8}), may seem to come to naught, yet He does reward those who do His will (Dt 32^{47}, Is 65^{23}), and fulfils His promises (Is 45^{19}) as His threats (Ezk 6^{10}). Without His blessing (Ps 127$^{1.\ 2}$), or by His curse (Lv 26^{16}), man's labour is profitless (cf. Pr 13^{11} 21^{6}), for man before God is nothing (Is 40$^{17.\ 23}$), and his charms worthless (Pr 31^{30}).

Jesus pronounced worthless alike Gentile ritual (Mt 6^{7}) and Pharisaic piety (Mt 15^{9}, Mk 7^{7}, cf. 1 P 1^{18}), and Paul so judged pagan philosophy and the speculative theology which, under its influence, was finding entrance into the Church (Ro 1^{21}, Eph 5^{6}, 1 Co 3^{20}, Col 2^{8}, and 1 Ti 1^{6} 6^{20}, 2 Ti 2^{16}, Tit 1^{10} 3^{9}). Christian faith, life, and service have worth and use (1 Co 15$^{10.\ 58}$, 1 Th 2^{1}), but may lose these through man's failure or faithlessness (1 Co 9^{15}, 2 Co 6^{1} 9^{3}, Ph 2^{16}, 1 Th 3^{5}). Denial of the resurrection of Christ makes Christian preaching false (1 Co 15^{14}) and Christian faith profitless (1 Co 15^{17}); and even belief in works empties faith of worth (Ro 4^{14}) and Christ's death of meaning (Gal 2^{21}).

Thus, in the Bible, 'vanity' is used in the objective sense of emptiness, worthlessness, unprofitableness, uselessness, deceit, and illusion; in the subjective sense of conceit or pride it is not used, but the idea is expressed by the compound words vainglory (Ph 2^{3}) and vainglorious (Gal 5^{26}). The fullest treatment of the vanity of man's life, work, joy, and hope is found in the Bk. of ECCLESIASTES (which see). A. E. GARVIE.

VASHNI.—Samuel's firstborn son, according to MT of 1 Ch 6$^{13\ (\text{Eng. }28)}$, which is followed by AV. RV, following the Syr. (see mg.), and on the strength of v.$^{18\ (33)}$ and the ‖ 1 S 8^{2}, supplies Joel as the name of Samuel's oldest son, and substitutes 'and the second Abiah' (וְהַשֵּׁנִי אֲבִיָּה) for 'Vashni and Abiah' (וַשְׁנִי וַאֲבִיָּה). This is supported also by Luc. [although BA have Σαν(ε)ί] Ἰωὴλ καὶ ὁ δεύτερος Ἀβιά, and is adopted by Driver, Kittel, Benzinger, *et al.*

VASHTI (וַשְׁתִּי, perh. = Pers. *vahista*, 'best' [Jensen, *Ztschr. f. Kunde d. Morgenl.* 1892, pp. 63, 70, connects the name with that of the Elamite goddess *Mašti* or *Wašti*; see also Wildeboer, *Kurzer Hdcom.* 'Esther,' p. 173]; BA Ἀστίν, Luc. Οὐαστίν).—The name of the queen of Ahasuerus (Xerxes), Est 1$^{9.\ 11.\ 12.\ 15.\ 16.\ 17.\ 19}$ 2$^{1.\ 4.\ 17}$. See art. ESTHER in vol. i. p. 775.

VAU OR WAW (ו).—The sixth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 6th part, each verse of which begins with this letter. In this Dictionary it is transliterated, when consonantal, by *v* or *w*.

VEDAN (וְדָן [AV, taking ו as conjunction, tr. 'Dan also'], Ezk 27^{19}).—Name of a city (Rashi). It is identical in form with the Arabic Waddan, a name clearly connected with the god Wadd, who was worshipped by Kalb and other tribes. The geographers mention three places of this name, of which the only one that can be plausibly identified with Vedan is midway between Mecca and Medinah, six miles from Abwa on the pilgrims' road (Istakhri, etc.). It was celebrated in Islam as the scene of Moḥammed's first campaign, and also as the home of the poet Nusaib. Modern travellers in this perilous region do not appear to mention the name. Ezekiel says that Vedan exported goods from Uzal to Tyre, implying that the first was a port. Waddan may at one time have been one, and have ceased to be so owing to the recession of the sea. If Uzal is Ṣan'a, the goods had to come a long distance. According to Burckhardt (*Travels in Arabia*, French ed. ii. 216), the pilgrims take forty-three days from Ṣan'a to Medinah. See UZAL.

Brugsch (*Religion der alten Ægypter*, p. 152) suggests that Vedan is to be identified with 'Uethen, also written Ueten, Ueden, and Uedenu, a spice-bearing country, situated to the east of Egypt, whose inhabitants, the Uethentians, were first subdued by king Thotmosis III.' According to Mariette (*Karnak*, p. 47), the monument to which he refers is a work of imagination, not of history, and it would be a mistake to demand of it decisive arguments on questions of geography.

D. S. MARGOLIOUTH.

VEIL and (AV) **VAIL.**—In the AV 'vail' and 'veil' are both used, and that alike for the article of dress so called, and for a part of the tabernacle and the temple. The spelling 'veil' in AV does not occur outside the NT, except in Ca 5^{7}. On the other hand, 'vail' is not used in the NT, except in 2 Co 3$^{13\text{ff.}}$ In RV 'veil' is the uniform spelling.

i. *The Veil of the Tabernacle and the Temple.*—Two Heb. words used in connexion with the tabernacle are tr. in AV 'veil.' **1.** מָסָךְ (*māsākh*), RV 'screen,' stands for the coloured linen covering which hung before the door of the *hêkāl* or Holy Place.* It is also used for a similar covering which hung in front of the gate entering the court.† **2.** פָּרֹכֶת (*pārôketh*), perh. from Assyr. 'what shuts off,' is the technical term for the veil of the same material which hung between the *hêkāl* and *dĕbîr* or Most Holy Place;‡ for this we find also a combination of the two words, thus פָּרֹכֶת הַמָּסָךְ.§ All the above occurrences are in P, and they relate to the tabernacle—a significant fact.

We read of no veil in Solomon's temple nor in Ezekiel's, except that 2 Ch 3^{14}, written under P's influence, says Solomon's temple had a *pārôketh* or inner veil. Besides the one passage adduced, there is no Biblical evidence for this fact. Thenius reconstructs 1 K 6^{21} so as to bring the word *pārôketh* into the text; but he has absolutely no support from MSS, versions, or ancient citations. Lund‖ and the older authorities generally take for granted that the outer and inner veils of the tabernacle were found also in Solomon's temple. The only proof Lund gives is the above passage from Chronicles.

It is probable that Zerubbabel's temple had veils corresponding to the *māsākh* and *pārôketh* of the tabernacle, but there is no certainty of this. Since the tabernacle follows the second temple in so many matters in which the latter differs from Solomon's temple (*outer* and *inner* courts, etc.), it is *a priori* likely that they coincided in having an outer veil before the entrance of the *hêkāl* and an inner one before the entrance of the *dĕbîr*.¶

---

* Ex 26$^{36\text{f.}}$ 39^{38} 40^{5}.

† Ex 35^{17} 39^{40}.

‡ Ex 26$^{31.\ 33.\ 36.}$ 35, etc.

§ Ex 35^{12} 39^{34} 40^{21}, Nu 4^{5}. In Lv 24^{3} פָּרֹכֶת הָעֵדֻת 'veil of the testimony' (because hiding the ark), 4^{6} פָּרֹכֶת הַקֹּדֶשׁ.

‖ *Heiligthümer*, 307^{b}.

¶ τὸ καταπέτασμα, with the article, stands in LXX (Ex 26^{33} etc.) and in Philo (*Vit. Moys.* III. iii. 5) for the inner veil, *the* veil pre-eminently.

The evidence that Herod's temple had the two veils referred to above is stronger, though not conclusive. It is but one veil—the inner—that is spoken of in the NT, and that only in two connexions, viz. the account of the Crucifixion in the Synoptics,[*] ('the veil of the temple was rent in twain') and also in Hebrews.[†] In the latter it is the tabernacle, not the temple, that is meant; but as this Epistle was written almost certainly before the destruction of the temple in A.D. 71, there would have been some hint of it if the sanctuary known to the writer lacked this feature.

Josephus clearly points out the existence of the two veils in the temple which he describes, and there can be little doubt that his account is based on what he saw. Of the outer one he says, 'it was a Babylonian curtain of fine linen interwoven with blue scarlet and purple, and of a contexture that roused admiration.'[‡] Tbe inner veil, it seems implied, was of tbe same kind.

Maimonides says there were thirteen veils about the temple, viz. seven for the seven gates of the court; one at tbe gate of tbe porch, one at the gate of the temple; two between the *hêkāl* and *dĕbir*, and two in the space above the house. Lightfoot adopts this opinion.[§] Another Jewish opinion which Lightfoot,[‖] Lund,[¶] and others approve of is, that in the post-exilic temples the cubit-thick wall separating *hêkāl* and *dĕbîr* of Solomon's and Ezekiel's temples was lacking. Instead of it there were two veils one cubit apart, occupying tberefore exactly the same space as the wall. In favour of this, Lightfoot, followed by Lund, adduces Maimonides[**] and tbe Talmud, both Mishna[††] and Gemara,[‡‡] thougb in tbe latter Rabbi Jose raises a discordant voice, which is silenced by tbe harmonizing Rabbis.

ii. *The Veil as an article of dress.*—Many of the words rendered 'veil' in EV designate articles which would not be so called in modern English books, as they do not cover the face alone, nor do they in all cases cover the face at all. Indeed, even the face-veils which may be seen in Egypt and Palestine very rarely cover more than the lower half of the face, leaving the eyes and forehead entirely exposed. The white muslin veils which cover the whole face are used in the harem, and are not intended to *cover*, but to *decorate* the face.[§§]

The veil plays a much more important part in women's life in the East than in the West. No respectable woman in an Eastern village or city goes out without it, and, if she does, she is in danger of being misjudged; indeed, English and American missionaries in Egypt told the present writer that their own wives and daughters when going about find it often best to wear the veil.

But it should be borne in mind that the ancient Egyptians were as much strangers to the face-veils as Europeans are, for on their paintings and sculptures such veils never appear.[‖‖] Nor were such veils worn by the ancient Ethiopians,[¶¶] Greeks,[***] or the primitive inhabitants of Asia Minor.[†††] They are not worn at the present day in Egypt or Syria by slaves, by the very poor, by the Bedawin, nor in out-of-the-way places by any, as a rule. The present writer stayed two days with the chief of Tobas, between Nâblus and the Jordan: the wife, daughters, etc., wore no veils, and were quite free. The people who have been most influenced by Islâmic culture are most observant of the veil, which is in favour of the belief that its use in the modern East, and also the institution of the harem, are due to Islâm.

In early times the Israelites laid but little stress on the use of the veil by women. Neither Sarah nor Rebekah wore it on the occasions mentioned in Gn 12^{14} and $24^{65f.}$, though Rebekah put it on when she appeared before Isaac. When worn at all in Biblical times, it was mostly[*] as an ornament, as is the case now with Moslem women in the harem. Jewish women in Palestine—Jerusalem, etc.—are not in the habit of wearing veils.

Gn $24^{65f.}$ and $29^{22f.}$ show that it was customary among the early Israelites for betrothed maidens to veil themselves before their future husbands, and especially at the time of the wedding. This custom obtains in Egypt at the present day.[†] The use of the veil by betrothed maidens and brides may betoken subjection. St. Paul in 1 Co $2^{5ff.}$ so regards it.[‡]

Rashi says, 'The Israelitish women in Arabia go out veiled (רְעוּלוֹת), while those in India go out with a cloak fastened about the mouth' (פְּרוּפוֹת). It has been inferred from Gn 38^{14} that immoral women were to be known by the veil they wore;[§] but probably Tamar wore the usual veil on the occasion referred to in order to escape recognition by her father-in-law, Judah. Nor does Ex 34^{33-35} show that men as well as women wore veils. Moses when he descended from the mountain wore a מַסְוֶה, *i.e.* a covering: a word not elsewhere used, though its cognate סוּת is found,[‖] and has for parallel לְבֻשׁ 'clothing,' 'garment.' מַסֵּכָה[¶] occurs in Is 25^7 (AV 'vail') and 28^{20}, and by RV it is rendered rightly 'covering.' מַסְוֶה, סוּת, and מַסֵּכָה are general terms, and should never be tr. 'veil.' כְּסוּת עֵינַיִם in Gn 20^{16} does not mean a veil, but a covering or blinding of the eyes by a gift; cf. Dillm. *ad loc.*, and vol. iii. p. 129^a.

Tbe following Heb. words appear to denote veils in a stricter sense:—

1. רְעָלָה.[**] See art. MUFFLERS. 2. Tbe צָעִיף is what Rebekah wore before Isaac,[††] and Tamar before her father-in-law.[‡‡] The word means what is 'doubled' over.[§§] We know that it covered the face.[‖‖] 3. צַמָּה is tr. by AV in Is 47^2, Ca $4^{1.3}$ 6^7 'locks' (of hair), but there can be little doubt that the word means some kind of veil. Tbat like צָעִיף it covered the face, is all we know about it. 4. רָדִיד appears to have been a light garment which covered the whole dress,[¶¶] as Jerome[***] and Schröder beld.[†††] See Del. (on Is 3^{23}), and art. MANTLE, vol. iii. p. 240^a. 5. סָדִין[‡‡‡] is held by Delitzsch to have been a kind of veil or light summer outer garment. Tbe Arabic word (*sidn*, *sadeen*) is explained by Freytag and Lane as 'veil'; but a veil in the Englisb sense is hardly meant by the Hebrew or the Arabic word. It was probably a summer outer dress of fine material (cambric or muslin), and so, according to Is 3^{23}, capable of much adornment. See Del. on Pr 31^{24}.

LITERATURE.—In addition to the works cited above, cf. Dozy, *Diction. détaillé d. noms des vêtements chez les Arabes*; Weiss, *Gesch. der Tracht und des Geräths der Völker des Alterthums*, Stuttg. 1881; and also the works on Biblical Archæology, especially tbat by Nowack.

VERSIONS.—

Introductory.
- i. General History: (*a*) origin and early history; (*b*) revisions; (*c*) printed editions.
- ii. Method of use, and precautions to be observed: (*a*) those precautions common to all authorities; (*b*) those peculiar to the Versions.
- iii. Uses of tbe Versions: (*a*) critical; (*b*) exegetical; (*c*) general, in connexion with the history of tbe Bible, Canon, etc.; (*d*) literary and philological.

Introductory.—The object of this article is not to treat any Version in detail, but to draw attention to some of the features common to them all, with only sufficient illustrations[*] to make the general statements intelligible.

It will be well to state at the outset the main objects which the student of the Versions may have in view. The most important is their use for critical purposes in conjunction with MSS of the original text of the OT or NT, and with Patristic Quotations. The second is their use for exegetical purposes. Thirdly, they have a value in connexion with the history of the Bible and the light they throw on a number of questions, such as the Canon, the order of books inside the Canon, etc. Lastly, many of the Versions are of the greatest interest from a literary and philological standpoint, because they are often the earliest monuments of the language in which they are written.

Their exact and scientific use, however, depends on a knowledge of their history, and on a consideration of certain precautions and limitations, which their history shows to be necessary if sound conclusions are to be reached. It will be desirable, therefore, firstly to consider some general points in their history, secondly to notice some of the necessary cautions, and lastly to discuss the uses just enumerated.

i. GENERAL HISTORY.—The first reference to translations of the Bible is found by some in the words of Neh 8^8 'They read in the book in the law of God distinctly [RVm 'with an interpretation'], and they gave the sense so that they understood the reading.' The Heb. word מְפֹרָשׁ used for 'distinctly' occurs again in Ezr 4^{18}, where RVm renders 'translated.' The text gives more correctly than the margin the meaning of the Hebrew, which does not imply more than clearness in the reading. Moreover, the supposed need of a translation requires us to believe that the Jews returned from the Exile ignorant of the Hebrew in which the Law was written—a view hardly tenable in face of the post-exilic writings contained in the Bible. In any case we should have to think of an explanation rather than a translation, and an oral and not a written Version. We cannot therefore fix precisely the date at which Versions of the Bible began to be made.

There is little doubt that the earliest Version committed to writing was the SEPTUAGINT, begun for the use of the Alexandrian Jews under Ptolemy II. (B.C. 285–247), and 'it is probable that before the Christian era Alexandria possessed the whole or nearly the whole of the Hebrew Scriptures in a Greek translation' (Swete, *Introd. to OT in Greek*, p. 25). The only other Version for which there is likely to have been any demand in pre-Christian times is the SYRIAC. There are various traditions as to the origin of this Version, *e.g.* those recorded by Gregory Barhebræus, which refer it to the date of Solomon (who is said to have had it made for Hiram), or to the incidents recorded in 2 K 17^{27}, or that recorded by Jacob of Edessa, which assigns it to the date of Abgar, king of Edessa. Like the Septuagint, it was not the work of one time or one hand; for 'from the differences of style and manner in its several parts we may suppose that it was made by many hands, and covered a long period of time' (W. Wright, *Encyc. Brit.* 'Syr. Lit.' p. 824). The earliest definite reference to the Version is in a commentary of Melito of Sardis, where ὁ Σύρος is cited at Gn 22^{13}. To this date, *i.e.* to the 2nd cent. A.D., the beginning of the Version may be assigned. To the same century the beginning of the LATIN Version, and to that or the following century the origin of the EGYPTIAN Versions, is generally ascribed. These represent the earliest Versions of the Bible, and they are succeeded by numberless others up to the present time.

If the beginnings of the history of the Versions take us back so far, and are veiled in obscurity, the last chapter cannot yet be written, for each year sees some fresh translation made for purposes of missionary work.[*] The chief critical interest of the latest is to be found only in the illustrations they afford of the difficulties which beset the translator of every age in his attempt to transfer the ideas and expressions of one language into those of another without suggesting new associations or dropping old ones.

The study of this long history is a fascinating subject. It presents problems of all kinds, and for their solution draws on the stores which have been accumulated by the students of language and literature, of art, of palæography, of liturgical usage, of history,[†] and many other branches of knowledge, while in return the MSS of the Versions contribute to all these studies material which is often of the greatest value, and can be found nowhere else. Hence the student of the Versions will find materials in books and periodicals dealing with almost every subject, and the literature is almost boundless.

1. *Origin and early History.* — The first point to try to make clear is at *what date and place*, and in *what circumstances*, the Versions in each language were made. We find general and somewhat rhetorical statements, like that of Chrysostom, in which he says, in his first Homily on St. John, that the Syrians, Indians, Persians, Ethiopians, and numberless other nations, have translations into their own languages. But it is only in regard to some of the later ones, that is, those made in and after the 4th cent., that we have definite historical statements on these points: as, for example, in the case of the Gothic, Armenian, and Slavonic; and even these apparently definite statements will not always stand cross-examination, and need explanation or qualification. In some cases they are so much later than the event to which they refer as to be untrustworthy in detail, while in other cases they lack perspective, and ascribe to one person or date work which probably passed through several hands and extended over a long period. Besides such historical statements, which have to be carefully examined before we use them, we have arguments of an inferential kind, based on the evidence afforded by the MSS of the Version itself.

The first question which we naturally ask is whether the Versions were *authoritative*, the work of translators chosen for their knowledge of the two languages involved, and from MSS carefully selected of a collection of books regarded as canonical, or whether they were made by private and irresponsible persons independently, in different districts, and from chance MSS of separate books as they became known or were required for use. Obviously, the answer to such questions is of great importance, but definite answers can rarely be given.

---

[*] Many of these illustrations are taken from those collected by the writer for his Ellerton Essay, printed in part in *Studia Biblica*, ii. 195 ff., on 'The Evidence of the Early Versions and Patristic Quotations on the Text of the Books of the New Testament.'

[*] For a list of these see (1) *In our Tongues*: a popular handbook to the translation work of the British and Foreign Bible Society, by G. A. King; 2nd issue, comprising the work of the last quarter of a century, 1875–1899; also (2) *Bible House Papers*, i.–v.

[†] The use of *language* may be illustrated from the discussion of the African origin of the Old Latin; of *art*, from the use made of different kinds of decoration found in MSS, such as the Celtic, to identify the place of origin; of *palæography*, from the evidence based on different national hands, Irish, Lombardic, etc.; of *liturgical usage*, from the use made of the notes in Codex Bezæ (*JThSt*, i. 454), or in connexion with the Lindisfarne Gospels (Berger, *Histoire de la Vulgate*, p. 39); of *history*, from the article on Codex Amiatinus in *Studia Biblica*, ii.

There can be little doubt that the earlier the Version the more likely the second alternative is to be true. Thus Ridley says: *plures a pluribus interpretibus in vulgus effusæ sunt explicatius quæ tandem collectæ et nonnunquam refictæ in unum Codicem vel editionem relatæ sunt*;[*] and elsewhere,[†] in the same treatise, that the Versions were at first a sort of Targum, derived from copies *circumforaneis et vulgatioribus*, from which the glosses were gradually removed. Similarly Augustine, in a well-known passage,[‡] writes in regard to the Latin: *ut cuique primis fidei temporibus in manus venit Codex Græcus et aliquantulum facultatis sibi utriusque linguæ habere videbatur, ausus est interpretari.* This hypothesis, while it does not destroy the value of the Versions as evidence often older than our MSS of the Greek text of the NT, certainly lessens the authority we should, on the first hypothesis, have to give them as made from the best MSS of the time, and exhibiting *non unius alteriusve hominis sed totius ecclesiæ interpretationem et judicium*.[§]—In regard to some of the later Versions we are told, and may well believe, that they were made by carefully chosen persons from specially selected MSS. But even then the area of selection must have been limited by circumstances of place and time and opportunity. So that, in the last resort, our estimate of the critical value of a Version and its text must be formed entirely from that text as contained in the MSS of the Version, or rather as it can be restored to its original form by the removal of errors which have come in during the centuries. For it has to be remembered that in some cases a considerable interval has elapsed between the date at which the Version was first made and that of the earliest MS of it. It is true that in no case is the interval as great as the thousand years or more which separate the last Heb. book of the OT from the earliest MS in which it is preserved to us. Of the more important Versions the Bohairic may be taken as the most striking instance in which the MSS of the Version, with very few exceptions, belong to a date very much later than that of the Version itself.[‖] We nearly always have to measure the interval by centuries, and in that time much often happened[¶] to alter the original characteristics of the Versions, both in regard to the text which underlay them and the language in which that text was expressed, and so to obscure or distort the light thrown by the MSS of a Version on its origin. But, even when we have made all necessary allowances, much evidence remains which may be used to date and localize the origin of a Version. First and foremost comes a comparison with the quotations found in Patristic writers using the same language. Thus the value of the writings of Tatian, Ephraem, and Aphraates has been generally recognized in regard to the Syriac Versions and their relation to each other, though there is divergence of opinion as to the actual conclusions to be drawn. Again, a comparison of the Old Latin with the Latin Fathers, especially Cyprian and Tertullian, gave Wiseman the first clue, which has, however, to be used with caution,[**] to the grouping of the MSS of that Version into families. The Patristic quotations often help us to date, as well as to localize, the text found in a Version. Thus Robert[††] dates the Version contained in the Lyons Heptateuch by its agreement with the Quotations of Lucifer of Cagliari, and its differences from those of Ambrose and Augustine.—Another argument in regard to the date and origin of Versions is furnished by the order in which the books of the Bible are given, or the Canon of Scripture which is implied.[*] This argument has been used to refer the Peshiṭta to a date prior to that at which all the Catholic Epistles and the Apocalypse were included in the Canon.

Other arguments in regard to origin are derived from linguistic considerations, and from notes by scribes and others in the margin of the text or elsewhere in the MSS. At the same time, in regard to all these it has to be remembered that *data* which seem at first sight to be coeval with the Version, and to throw light on its origin, may have been either carried over from the text on which the Version was based, or introduced later by some scribe.[†] Instances of these possibilities are afforded by liturgical notes, text divisions, dialectical peculiarities of spelling, etc. etc.

2. *Revisions.*—The constant use of the Versions from the date at which they were made onwards required the multiplication of copies. This necessarily involved the introduction of numerous unintentional errors, and gave occasion for linguistic or grammatical changes, and led also to a comparison of the text contained in the Version with that of other authorities. The best-known instances are afforded by the work of Origen on the LXX, and Jerome on the Old Latin. As to such revisions we have the evidence of direct statements, and that of the MSS themselves. We have the well-known passage in Jerome's letter to Damasus, in which he refers to errors introduced not only by *vitiosi interpretes*, but also by *præsumtores imperiti* and *librarii dormitantes*. This led him to his work of revision, of which the Vulgate was the result. Later on in the history of the same Version, the recurrence of the same kind of corruptions, and growing uncertainty as to the right text, led to such revisions as those of Alcuin at the end of the 8th cent. and those of the *Biblia Correctoria* in the 13th. Such formal revisions as those mentioned in connexion with the Latin Version find parallels in many other languages.

They involved the removal of copyists' errors of various kinds, and also changes in the Version itself, such as the translation of words which had been in the first instance merely transliterated, the substitution of current and approved words for those which were obsolete or provincial, a greater consideration for grammar and usage, which had been perhaps sacrificed to secure greater fidelity, as it was thought, to the words and sense of the original.[‡]

Again, in the revisions, reference was sometimes made to the text contained in MSS on the authority of which the Version was based, and to other Versions. That this was so we know from definite statements such as that made by Thomas of Harkel, who tells us that in his revision of the Philoxenian Syriac, in A.D. 616, he used 'two or three accurate Greek MSS in the Enaton of Alexandria,' and the readings derived from that source make the marginal readings of the Version of great value. Similar statements as to the use of Greek MSS for revision are made in regard to several other Versions, and it would be an obvious thing for a critical reviser to do.

But the influence of other authorities besides the original text in these revisions has to be remembered. The influence of the Vulgate will be a case in point. And in dealing with *phenomena* which suggest such influence it must not be forgotten, as is sometimes done, that the true explanation of the resemblances of two Versions may often be, not that they are derived one from the other, but that both are independently traceable to MSS of the Greek, which have a similar type of text.

[*] See below, p. 854 f.

[†] Berger, *Histoire de la Vulgate*, p. 53.

[‡] In some cases the later Versions were more literal than the earlier, *e.g.* that of Aquila and the Philoxenian Syriac.

These revisions differed greatly both in extent and in character, and occasionally it is matter for argument which is the revised and which the unrevised text. Sometimes, as in the case of Origen's revision of the LXX, they have created a chasm in the history of the text which it is well-nigh impossible to bridge over. Sometimes—and in considering the temper in which these revisions would be conducted this is important—we meet with great reluctance to change what was old and familiar even though it was wrong.* The old was therefore retained in part. Thus, in the case of the Latin Version, the Old Latin renderings survived side by side with those of the Vulgate for some centuries. Berger † notices that the use of OL survived in Bohemia as late as the 15th cent. Gregory the Great in his Preface to Job says, *ut comprobationis causa exigit nunc novam nunc veterem per testimonia assumo.* Walafrid Strabo (*Pref. ad Gloss. Ord.*) speaks of it as something recent, that the Version of Jerome was in general use when he wrote in the 9th cent.—*Hieronymi translatione nunc ubique utitur tota Romana ecclesia licet non in omnibus libris.* It is clear from what has been said in regard to revisions which may have been made by private persons without any historical notice of the fact, that they constitute the main difficulty of the student in his attempt to recover the text of the Version in its original form. But it is obvious that the amount of success attained in surmounting this difficulty will be the measure of the certainty with which arguments may be built on the data afforded by the texts contained in the MSS of Versions. And it is to this end that these MSS have to be grouped as far as possible into families, which often indicate the nature and extent of the revision, and show that some MSS contain an unrevised, others a revised, form of the Version.‡

3. *Printed Editions.*—It is necessary to warn the student against the indiscriminate use of printed editions as evidence of the true text, and also against statements which rest only on such editions. In days gone by it was often accident rather than choice which determined what MS or MSS should be used; nor had the editor the ideas which prevail at present either as to the minute accuracy required for a critical edition, or as to the collection of material necessary for it. Thus Uscan, the first editor of the Armenian Version (1668), admits that he introduced several passages from the Latin without any MS authority. Again, in the Roman edition of the Ethiopic of 1548, the *lacunæ* in the Ethiopic MS used were translated from Greek MSS and the Vulgate. Similar unfavourable criticisms must be made of most of the older editions of the Versions as deficient in regard to the MSS used, or to the way in which they were used, or both. This makes it necessary to accept with caution the evidence of the Versions even as quoted by Tischendorf in the *apparatus criticus* of his *Novum Testamentum,* for he relied in many cases on such imperfect editions.* The more critical use, and the danger of quoting vaguely, may be seen from a reference to the second and third *appendices* to Lloyd's *Greek Testament,* edited by Dr. Sanday, and referred to in the note below. Much has been done, and is being done, in preparing adequate and accurate critical editions of the most important Versions such as the LXX, the Latin, the Syriac, the Egyptian, and others. When these are complete, the student will be able to handle the material with confidence. The editors will probably in no case formulate any text as that of the original Version, but will print the text of some one MS, and leave the student to draw his own conclusion from the *apparatus criticus.* They will, as a rule, not attempt to give the readings of all the known MSS, as Holmes and Parsons did in their monumental work on the Septuagint, but only the evidence of those MSS the texts of which are in any sense important for the reconstruction of the history of the Version.

ii. METHOD OF USE, AND PRECAUTIONS TO BE OBSERVED.—From what has been said as to the general characteristics of the history of Versions, and the state in which their evidence is available for the student, it is clear that their accurate use depends on the observance of certain critical rules, some of which (1) are common to all the authorities used for recovering an ancient text, while (2) others are peculiar to the use of Versions as evidence.

1. (*a*) Each MS of the Version has to be carefully examined with reference to its date, the care with which it has been copied, the text on which it seems to be based, and its relation to other MSS of the Version. Tertullian's canon, *id verius quod prius,* may be accepted as a starting-point. But it is often difficult, as we have seen, to determine the date from the evidence of the MS itself, which is often all that is available. Nor is age an invariable guide as to the value of the text contained in a MS, for some late MSS may be copied from good early ones. Thus *each* MS has to be weighed in reference to the degree of accuracy with which it seems to present the text as it left the hand of the translator, and in reference to other MSS containing texts which have been definitely identified with particular dates or localities. (*b*) It has further to be remembered that the different parts of the Bible, and in many cases even the separate books, though they have come to be united in one MS, may have had a different origin and textual history in the case of the Versions, just as in the case of Greek MSS of the NT. The earliest Versions were made when the books of the Bible circulated either separately or in small collections, and at no time till the 7th or 8th cent. do we meet with a complete MS of any Version of the whole Bible, and the text, even of such complete MSS, we should expect to have been derived from MSS which contained only parts of the Bible, and therefore had not an identical history. It is possible, to take one instance, that the difficulties in reducing Tertullian's quotations to a system may be in part due to his having used separate MSS, say, of St. Paul's Epistles. Again, within a group of books, such as the Pentateuch,

---

* Augustine (*Ep.* 71, ed. Benedict, vol. ii. p. 161) writes to Jerome as to the uproar caused by Jerome's Version reading *hedera* instead of the familiar *cucurbita* in Jon 4^6. Another case is that of the congregation which persisted in chanting *floriet* for *florebit.* This false conservatism in perpetuating mistakes is not obsolete, as may be seen by the refusal to correct the obvious mistakes (*e.g.* Is 9^3) of the English Bible of 1611.

† *Histoire de la Vulgate,* p. 74.

‡ This division of the MSS of a Version against each other may be seen in any critical edition of a Version, *e.g.* that of the Vulgate; and in regard to some of the less accessible, in Dr. Sanday's *Appendices ad Novum Test.* iii.

* Thus Lightfoot (*Colossians,* p. 246 n.) writes as follows:—'The readings of the Memphitic [or Bohairic] version are very incorrectly given even by the principal editors such as Tregelles and Tischendorf, the translation of Wilkins being commonly adopted though full of errors, and no attention being paid to the various readings of Boetticher's text'; and again (*ib.* p. 247), 'the true readings of the Syriac version are just the reverse of those assigned to them even by the chief critical editors, Tregelles and Tischendorf.' In *JThSt,* i. 611, it is noticed that Tischendorf often omits altogether the renderings of Philoxenian Syriac. The time has almost come for a new edition of Tischendorf, but this will not be possible till critical editions of the separate Versions and Fathers are available.

where we might have expected uniformity, we find that the Old Latin fragments at Lyons, Würzburg, and Munich stand in quite different relations to each other in the Books of Exodus, Leviticus, and Numbers—a fact which shows that the Old Latin text in those MSS had a separate history in these separate books.

2. (*a*) The two considerations just mentioned depend on the fortunes of the Version after it left the hand of the translator, and are not especially characteristic of Versions; but there are others which are peculiar to translations as such. Thus we have to ascertain whether a Version is *primary* or *secondary*, *i.e.* derived directly from the text which it is to be used to restore, or indirectly through the medium of another translation.

Perhaps the best-known illustration will be afforded by the Latin Psalter.[*] Of this book we have (i.) the text of the Old Latin Psalter as contained, for instance, in MS 11947 of the *Bibliothèque National*; (ii.) the *Roman* Psalter, the first revision of Jerome made in A.D. 383 with the help of the κοινή text of the LXX; (iii.) the *Gallican* Psalter, made in A.D. 385 according to the hexaplar text of the LXX, the present Vulgate Psalter; (iv.) the *Psalterium Hebraicum*, begun some years later, and based on a Heb. text. In the well-known *Codex Cavensis* of the Latin Bible we have the third and fourth, and on the margin extracts from the first. We also find quadruple Psalters.

One more illustration may be taken, and in this case not from a MS, but from an edition, of a Version, viz. Erpenius' edition of the Arabic of A.D. 1616. Here the Gospels preserve a translation from the Greek, and are therefore a primary Version; the Acts, Pauline Epistles, and three Catholic Epistles preserve a translation from the Peshiṭta; the other Catholic Epistles and the Apocalypse a Version from some other source. Sometimes one language preserves both primary and secondary Versions, as, for instance, the Armenian does. Sometimes it is a matter of argument whether a Version is primary or secondary.

It will be obvious that the chief value of secondary Versions is in regard to the primary from which they are taken; those derived from the LXX, for instance, are useful to determine the history of the Septuagint and only indirectly to restore a right Hebrew text, and the Armenian will help in restoring the original text of the Old Syriac from which it was in part translated.

(*b*) Another point which is of the first importance in drawing conclusions as to particular readings implied by a Version, is the capacity and intention of the translators in regard to literalness, accuracy of rendering, and doctrinal or other bias.

The Versions vary very much in their efforts to preserve the *letter* of the text they are translating.

As extreme instances of those which sacrifice language, and even clearness, to literalness, may be mentioned Aquila's version of the OT and the Harklean revision of the Philoxenian. These represent one extreme, and at the other we get paraphrastic renderings which are content with giving the general sense. As a rule, however, the mean is observed between undue literalness and undue laxity.

In regard to *accuracy of translation*, it may be said generally that the Versions were made by persons of competent knowledge in regard to both of the languages with which they were dealing.

Exception must be made in some parts or passages of a Version. Thus it is difficult to conceive that the Greek in some parts of the LXX can have conveyed any meaning to the translator, and the Ethiopic is a Version the value of which must be depreciated by such confusions as those between κατηχούμεθα and κατειχόμεθα (Ro 7^{6}) or ἐξεπάτησε and ἐξηπάτησε (Ro 7^{11}).[†] It should here be mentioned that accuracy of translation does not require that the same word should always have the same equivalent in the Version, and this possibility often causes uncertainty in the conclusions which may be drawn (see below). And it may be remembered that even mistaken renderings may be helpful: thus the rendering *neglexit* of *e* of the Old Latin at Mk 5^{36}, though wrong, supports παρακούσας as against ἀκούσας, and all attempts to translate δευτεροπρώτῳ at Lk 6^{1}, even if unsuccessful, witness to the existence of some epithet attached to σαββάτῳ.

Of any *doctrinal bias* the early Versions show little trace, though we often find in the Fathers complaints of falsification, which cannot, however, be maintained.

As possible instances of intentional alteration may be mentioned the Nestorian substitution of *leavened* for *unleavened* bread at 1 Co 5^{8}, a tendency towards Encratite views in the Syriac version of 1 Co $7^{2.6.7}$, and more clearly in reference to the virginity of Mary. Berger[*] traces the adaptation of various Latin MSS at 2 Mac 12^{46} in regard to a passage bearing on prayers for the dead. Ellicott finds 'a slightly Arian tinge' in the Gothic version of Ph 2^{6-8}. But these are isolated instances, which must not, however, be ignored.

When we come to compare Versions made by Roman Catholics with other Versions, there is more evidence of a preference for words which will support special ecclesiastical positions or views. Thus, in the French version of de Sacy, *elders* become *prêtres*, in Gn 3^{15} it is *la femme* who will bruise the serpent's head, St. Paul hopes to be delivered by *le mérite des prières*; and other instances might be given.[†]

(*c*) Again, it must be remembered that the power and intention of the best translator are limited by the material which he has to use, and that in two ways. In the first place, one language may be incapable of literally reproducing the *grammatical* idioms of another. Thus there are no distinctions of gender in Armenian, no neuter in Arabic, no passive voice in Bohairic, no article in Latin, and therefore these Versions afford no help where readings involving such points are being discussed. Again, words have to be supplied in a translation which were not required in the original.[‡] Such cases may be indicated in later times by the use of italics, but they are a more or less modern device and not always accurately employed. Somewhat akin to the point now being discussed is the ambiguity, which arises as to their evidence, in languages like the Syriac and Arabic, owing to the system of vowel points. Secondly, the translator was hampered not only by grammatical but also by *lexical* difficulties, as is the case with the missionary of to-day.[§] It is true that words could be coined, such as *seminiverbius*, to represent σπερμολόγος (Ac 17^{18}), *camum mittes* to translate κημώσεις (1 Co 9^{9}), or in more modern times (as in Sir John Cheke's version) *hundreder* for *centurion*. Transliteration offers another device, adopted frequently in the case of the oldest Versions, but the result is not an effective or an intelligible translation. Another and more important consideration, which affects, however, the exegetical rather than the critical use of Versions, is that the words used by the translator must often suggest either more or less than the expression translated. This is a difficulty which is felt, for example, in rendering the NT into Chinese.[||]

(*d*) It must be remembered in connexion with the literary side of translations that a translator will not always use one word or expression, and one only, to render any particular word or expression of the original. As instances where the English Bible shows this freedom in translation we may refer to the equivalents given for παρακύπτω in Lk 24^{12}, Jn $20^{5.11}$, or the various renderings of πραιτώριον: similarly, the word 'ἄνομος is translated in five different ways' in the NT.[¶] Other Versions will provide a number of instances of a like kind.[**] The point is important in connexion with the use of Versions for critical purposes, because it reminds us that we cannot argue from a variation in the translation to a similar variation in the original. Versions, therefore, often fail to give assistance where there is a doubt between two words of almost the same meaning, or between two words which the translators may possibly not have differentiated.*

[¶] Plummer's *St. Luke*, p. 506.

[**] Thus Westcott, *Epistles of St. John*, p. xxvii, notices that τηρεῖν in three successive verses of the Epistle is translated by *observare*, *custodire*, *servare*.

(*e*) It is perhaps hardly necessary, after what has been said as to necessary precautions, to give a reminder that the evidence of Versions can be used only at first hand, and not through the medium of a translation. Many of the scholars who first used the Oriental Versions for purposes of textual criticism had to rely on Latin translations of them, and many misstatements of the evidence have resulted, and may easily be perpetuated, even from the *apparatus criticus* of such an authority as Tischendorf's 8th ed. of his *Novum Testamentum*.†

iii. USES OF THE VERSIONS.—(*a*) It is only if we bear all these points in mind, as of possible importance in connexion with the evidence of a Version in a particular passage, that we are in a proper position to consider the most important of the uses which may be made, especially of the early translations, viz. their *use in textual criticism*. (1) We have three different classes of authorities for determining the text of the Bible, viz. MSS of the original Hebrew or Greek text, Versions, and Patristic Quotations. The importance of the last two is that they enable us to a great extent to date and localize particular readings found in the MSS, and thus provide us with the means by which to reconstruct the history of textual changes in a way which would be quite impossible from the MSS alone. An obvious instance of this may be found in the way in which Versions and Patristic Quotations enable us to trace back the readings of the so-called 'Western' text of the NT to the 2nd cent., a date nearly 200 years before that to which our oldest MSS of the Greek are assigned. Without their help we might well have said that readings of this kind belonged to a much later date, and might be dismissed as unimportant. From the Versions we also see not only the antiquity but the wide prevalence of this so-called 'Western' text, for its readings are found not only in properly called Western authorities, such as the MSS of the Old Latin Version, but also in the early Syriac Version. We see, therefore, how misleading this term 'Western' is. On the other hand, caution has to be observed in using Versions to localize a particular text, for the Sahidic and Bohairic, though both connected with Egypt, represent different Greek texts.

(2) In estimating the value of the evidence of Versions it may be assumed that they are based directly or indirectly on MSS of the original text, and therefore allowance has not to be made, as in the case of Patristic Quotations, for the possibility of quotations from memory. Further, if they preserve for us the readings of MSS of the original text, then those MSS in the case of the earliest and most important Versions are considerably older than any which have come down to us. Thus the MSS of the Hebrew on which the LXX was based must be about 1000 years older than any Hebrew MS which survives to the present day, and the MSS which were used by the earliest translators of the NT into Syriac, Latin, or Egyptian, if they are assigned to the 2nd cent., will be nearly 200 years older than ℵ or B. The primary Versions may therefore, with the limitations already noticed, be regarded as MSS of the original text, and used to correct the readings of those MSS of the original text which have come down to us.

(3) But, from what has been already said above, great caution has always to be used in estimating the value of their evidence and drawing conclusions, and in a large number of cases their evidence, without the corroboration of other authorities, has to be ignored or discounted, because the introduction of the readings they support can be sufficiently explained. Thus we may find in them additions to the original text, but these may be inserted for grammatical reasons,* or may be explanations necessary for the readers. On the other hand, we may find omissions; but these may be due to a desire for compression, or may have been left out because of their difficulty.† Again, in the case of synonyms, the evidence of Versions must be regarded and treated as ambiguous, unless an inductive examination has shown that the usage allows a positive conclusion.‡

The *history of the use of the Versions for critical purposes* goes back to the first great textual critic, Origen, who in his *Hexapla* compared the Heb. text with that of the LXX derived from it. Similarly, Jerome makes many references to the evidence to be drawn from Versions. One instance may suffice. He refuses to use a certain recension of text, *cum multarum gentium linguis Scriptura ante translata doceat falsa esse quæ addita sunt*.

After the invention of printing, the first Version to be used critically was the Latin Vulgate, from which the Complutensian edition derived the text 1 Jn $5^{7.8}$. Erasmus also used the same Version to make good the deficiencies of his Greek MS of the Apocalypse. A little later Beza (1519–1605) for his Geneva edition quoted Tremellius' edition of the Syriac of 1569, and for part of the NT (Acts, 1 2 Cor.) used also the readings of an Arabic Version. In the Polyglots of Antwerp (1569–72) and Paris (1630–33) we do not find more than the Versions already mentioned, the Antwerp edition having only the Latin and Syriac. Walton in the London Polyglot (1654-7) printed in the fifth volume, which contains the NT, the Ethiopic as well as the Syriac, Vulgate, and Arabic, and, for the Gospels, the Persian Version. A few years later Bishop Fell, in his edition of the NT of 1675, professes to give variants *ex plus centum MSS codicibus et antiquis versionibus*. Among the latter he quotes, and is the first to quote, the Bohairic and Gothic, but he uses them only here and there, and not systematically. The Versions were used more fully by Mill in his famous edition of 1707. He first 'accorded to the Vulgate and the Old Latin the importance they deserve,'§ and had a slight knowledge of Syriac, but for the other Versions had to be content to rely on Latin translations often inexact, and so his use of the Versions may well have been 'the weakest part' in his monumental contribution to biblical criticism. The name of Bentley (1662–1742) is important for our present purpose because of the attention he gave to a critical edition of the Latin Version.[*] The next critic who needs to be noticed in connexion with the use of the Versions is Wetstein (1693–1754), who in his *Prolegomena* (1730), besides giving us the ordinarily used notation for our MSS, 'bestowed great pains on the Versions.' Alter, in his edition of the Greek Testament of 1786–7, besides some readings from Wilkins' edition of the Bohairic, quotes also from four MSS of the Slavonic Version and *i* of the Old Latin. Before we leave the 18th cent., reference must be made to the laborious work of Holmes and Parsons on the LXX, for their edition of which they quoted the Old Latin, Syriac, Egyptian, Arabic, Georgian, Armenian, and Slavonic. In every case the help of experts in the several languages was procured, but the permanent value of the work bears no relation to the time and labour expended on it, because the time had not yet come when the material was adequately or scientifically collected, and the collators were not all equally trustworthy.

---

* See Westcott and Hort, *Notes on Select Readings*, Ac 11^{20}. As between Ἕλληνας and Ἑλληνιστάς, 'versions are ambiguous: they express only "Greeks," but would naturally be at a loss to provide a distinctive rendering for so rare and so peculiar a word as Ἑλληνιστάς.' See also Ac 6^{1} 9^{29}.

† See Gregory, *Prolegomena*, p. 805; *Studia Biblica*, ii. 212 f.; and what has been said above on 'Editions.'

* Thus Jerome, quoted by Alford at Eph 5^{22}, says, *hoc quod in lat. exemplis additum est* subditæ sint *in græcis editionibus non habetur sed hoc magis in græco intelligitur quam in latino.*

† So Jerome (quoted by Burgon) at 1 Co 7^{35} says, *in Latinis codicibus ob difficultatem translationis hoc penitus non invenitur.*

‡ Of this the index at the end of the fifth *fasciculus* to the *Oxford Vulgate* would give illustrations. Thus from two successive words we find that ἀγωνίζεσθαι is rendered by several Latin words, and, on the other hand, '*αἰών* semper redditur *sæculum*.'

§ Scrivener, ii. 201.

Griesbach, at the beginning of the 19th cent., is important in connexion with the use of Versions, not only because of his quotations of the Gothic, Armenian, and Philoxenian, but also, and more especially, because he was the first to assign them a place in the families of text which Bengel had introduced. Thus to the *Alexandrian* recension he assigned the Egyptian and some other Versions, to the *Western* the Old Latin and Vulgate, and to the *Byzantine* the vast majority of the Versions. Lachmann (1793–1851) 'restored the Latin Versions to their proper rank in the criticism of the NT,'[†] but did not use the Syrian and Egyptian Versions. In Westcott and Hort's summary of the history of the Greek text of the NT the Versions, of course, find a place. Thus the Bohairic and, with some exceptional readings, the Sahidic are included among authorities for the neutral text, the Old Latin and Old Syriac among those for the Western text, some readings of the Bohairic and Sahidic are Alexandrian, while the vast majority belong to the group of authorities which contain a 'Syrian' or revised text. But one of the important points which recent examination of the Egyptian Versions has tended to establish, is, that the Bohairic does not represent the primitive form of the Egyptian Version so well as the Sahidic. This would involve a weakening of their theory that the neutral text is invariably right.

At the present time it would be agreed by textual critics that *all* the Versions, just as even the latest cursive MSS, have to be examined at any rate to see whether they have any contribution to make to textual criticism; but the main energy of scholars is being devoted to the collection, and proper arrangement, of the materials available and necessary for a proper estimate of the history and text of each Version. When this has been satisfactorily done, and good critical editions are available, but not till then, it will be possible to give each Version its due weight in the scale of evidence, after making allowance for the changes it has undergone in the course of its history, and taking account of the disagreement between different MSS of the same Version.

The *notation adopted for the Versions*, as for the other authorities for the text of the NT, is that used by Tischendorf in the 8th ed. of his *Novum Testamentum*, and described fully by him, and by other authorities since. Some modifications have been made owing to further study, as, for example, in regard to the names now generally given to the Egyptian Versions, and some additions have to be made for reference to material which has become available since the publication of his edition, such as the Sinaitic MS of the Syriac. But the general outlines of the notation will probably remain the same. In the case of separate MSS of the Versions, that notation used by the editors of the standard editions which have already appeared or are in preparation—*e.g.* Wordsworth and White's *Vulgate*, Brooke and Maclean's *Septuagint*, Horner's *Bohairic*, Gwilliam's *Peshitta*, etc.—will, it is hoped, be adopted to prevent confusion and double nomenclature, such as is necessary in the cases of many cursive MSS of the Greek Testament owing to the different notation of Scrivener and Gregory.

(*b*) The most striking instance of the *exegetical* value of a Version is to be found in the LXX, and the light it throws on the NT. Bishop Pearson wrote as follows on this point:—

LXX viralis versio ad Novum Testamentum recte intelligendum et accurate explicandum perquam necessaria est. This judgment is quoted by Dr. Swete[*] as 'justified' by the facts.[†] In regard also to the meaning of the Hebrew, 'it is never safe to neglect their interpretations even if in the harder contexts it is seldom to be trusted. Indirectly, at least, much may be learned from them, and their wildest exegesis belongs to the history of hermeneutics and has influenced thought and language to a remarkable degree.' On the other hand, 'transliterations, doublets, confused and scarcely intelligible renderings reveal the fact that in difficult passages they were often reduced to mere conjecture.'

The Latin Version, again, has a very important place in the history of biblical exegesis in the West. The opinion of Dr. Routh, endorsed by Dean Burgon,[‡] that the Vulgate offers the best commentary on the NT, can hardly be justified. There are, indeed, many passages where the Vulgate has erred, and has influenced the English Bible of 1611 through the medium of earlier renderings, *e.g.* Lk 21^{19}, Mt $16^{22.23}$, Ro 2^{18} etc. It is not, however, possible to exaggerate its *general* influence on the formation of theological language, and indirectly on the exegesis of the many Versions which were made from it during the Middle Ages. These two Versions stand, however, in an exceptional position. Of most of the others the exegetical value is not great.[§] In the OT they were, for the most part, secondary, and derived from the LXX; while for the NT we are as well able as the translators to ascertain the meaning of the Greek. Nor do the Versions give much help in regard to difficult words or constructions, such as ἐπιούσιος, νάρδος πιστική, πυγμῇ, ἐπιβαλὼν ἔκλαιε, and the like; indeed they sometimes omit the difficulty altogether.[‖] They are, however, even in these cases interesting, because they preserve for us an early traditional rendering.

(*c*) The use which may be made of the Versions in regard to *the history of the Bible, the Canon*, etc., may be illustrated both from the Old and the New Testament. The importance of their evidence, as in the case of their use for textual criticism, consists in our being able by this means to localize the phenomena with which we meet.

The most obvious instance is the evidence which is afforded by the Versions in regard to the inclusion or exclusion of the Apocalypse. Both the Syriac and the Bohairic Versions indicate that that book was not included in the Canon of the NT when they were made. Another instance—and this affects the arrangement of the books of the Bible—may be found in the so-called Western order of the Gospels found in the MSS of the Latin

[†] Scrivener, ii. 235.

[*] *Introd. to the OT in Greek* (p. 457). Dr. Swete sums up the question as follows: 'On the one hand, the interpreter [*i.e.* of the NT] ought not to be led astray by visions of the solidarity of "Biblical Greek." . . . On the other hand, the student of the NT will make the LXX his starting-point in examining the sense of all words and phrases which . . . passed into Palestinian use through the Greek OT, and in their passage received the impress of Semitic thought and life.'

[†] Swete, *l.c.* p. 446.

[‡] *Lives of Twelve Good Men*, pp. 76, 77.

[§] Walton, however, in his *Prolegomena*, § 5. 3, says, *sensum clarius explicant ita ut pro pluribus commentariis versio unica inservire possit.*

[‖] See Pesh. (Ac 19^{28}) and Jerome's words, quoted above, p. 853^{b}, note †.

Version and elsewhere.[*] Again, the varying position of the Epistle to the Hebrews which is found in the Bohairic between 2 Thess. and 1 Tim., in the Sahidic between 2 Cor. and Gal., affords evidence as to early uncertainty about the Pauline authorship. From the OT, illustrations may be found in the variations between the Canon of the Hebrew, LXX, and Vulgate, and the light thrown on the history of the OT Canon.[†] While the order of books in 'the Law' was fixed at the time the LXX translation was made, that of the books contained in the groups of 'the Prophets' and 'the Writings' was not; and evidence of this is found in the variations in order between the LXX and Hebrew. Again, within certain books, such as Exodus and Jeremiah, we find a difference in the arrangement of material between the LXX and Hebrew, and in 1 Sam. a somewhat similar phenomenon meets us.

These facts take us back behind the formation of the Canon, on which the facts already mentioned afford evidence, and can be used for the light they throw on the composition of the separate books. Of course it is only in the very earliest Versions that such a use of the Versions as is here referred to can be made. And, conversely, these phenomena, as we have already noticed, are important in helping us to date those Versions in which they occur.

(*d*) It would be out of place in a Bible dictionary to go at any length into the *literary* and *philological* interest of the Versions, but this part of the subject cannot be wholly omitted. It will be obvious how great this interest must be when we call to mind that in nearly every language the earliest monuments preserved to us consist of translations of the Bible. In many cases (*e.g.* Gothic, Armenian, Slavonic, etc.) we are told that alphabets were devised for the express purpose of these translations. Translations of the Bible, then, take us to the cradle of nearly every written modern language, and they not only give us our earliest information as to written languages, but they have exercised an important influence on their subsequent history by fixing the dialect which was to prevail as the literary dialect. As instances of this, the influence of the translations of Wyclif and Luther on the literary development of English and German may be mentioned; and of a somewhat similar kind was the influence of Hus's Bible in fixing the orthography of Bohemian or Chekh.

Again, when we pass to the early history of printing in any language, the importance of the Versions as evidence is clearly seen from the fact that the earliest printed books were often translations of the Bible. Thus the earliest Russian printed book was the Psalter of 1564, and the first printed book in Hungarian was Komjathy's translation of St. Paul's Epistles of 1533.

In emphasizing the *philological* importance of Versions of the Bible, we may point to Gothic and Basque, in which almost the only monuments of the language consist of translations of the Bible. The first of these, scanty as its fragments are, is by some centuries the oldest monument of the Teutonic family. Again, the MSS of the Latin Bible illustrate many steps in the process by which Latin developed into the later Romance languages in their separate forms.

LITERATURE.—Besides the special literature mentioned in connexion with the separate Versions (which see), the following books dealing generally with the subject will be found indispensable:—*Urtext und Übersetzungen der Bibel* (Leipzig, 1897), a reprint of the art. 'Bibeltext' in *PRE*³, is indispensable both for its outline of the whole subject and its references to literature. For editions of the Bible in different translations the parts of the British Museum Catalogue on Bibles will give the titles and some idea of the size of the suhject.

(1) NT: Scrivener's *Introduction to the Criticism of the NT*, vol. ii. (London, 1894), gives the fullest account in English of the Versions of the NT; C. R. Gregory's *Prolegomena*, part iii. to Tischendorf's *Nov. Test.* (Leipzig, 1894), gives the fullest list of MSS of the Versions of NT; Eb. Nestle, *Einführung in das Gr NT*² (Göttingen, 1899, Eng. tr. 1901), is quite the best recent book.

(2) OT: The general subject of the Versions of the OT has not been so fully treated in English as that of the NT. Mention may be made of Wellhausen's edition of Bleek's *Einleit. in das AT*, and Buhl, *Text und Kanon des alten Testament* (Leipzig, 1891, Eng. tr. 1891), and Driver, *Notes on the Heb. Text of Sam.* 1890.

LL. J. M. BEBB.

VERSIONS, ENGLISH.—i. The history of the Versions of the English Bible may be said to begin with **John Wyclif.** Previous to his time there had been various attempts to render parts of the Scriptures into Anglo-Saxon and Anglo-Norman, or Middle-English. But these had not only been very fragmentary, but were for the most part paraphrases rather than literal translations. With Wyclif, however, a new era in Bible-translation began, and nothing that concerns him can fail to be of interest.[*] He was born about the year 1320 in the vicinity of Richmond in Yorkshire, and when he first comes publicly forward is found filling various important posts in the University of Oxford. The bold attitude with regard to the Papal Tribute which he took up in a Tract, led to his being selected as one of the Royal Commissioners sent to Bruges in 1374 to treat with the Papal Nuncio regarding the reservation of benefices, and from this time may be dated his appearance as an ardent ecclesiastical reformer—'the Morning Star of the Reformation.' For this end he instituted an order of 'poor priests' whose duty it was 'faithfully to scatter the seed of God's word,' and it was to aid them in this work that he set about providing them with the Bible in their native tongue. The first book translated was the Apocalypse, which was followed by a translation of the Gospels with a commentary, and soon after by versions of the remaining books of the NT, the whole being completed by 1380. To this was added a translation of the OT principally by one of his friends, Nicolas de Hereford, though Wyclif himself seems to have supplied the last books and about one-third of the Apocrypha, so that about the middle of the year 1382 the whole Bible was in the hands of the people 'in their mother tongue.' All this had not been accomplished without difficulty and even danger. Hereford had to flee the country, and Wyclif's own teaching was publicly condemned at a Synod in London in 1382. The hostility, however, would seem to have been confined to a few persons, notably Archbishop Arundel, for the new translation was generally tolerated, and the reformer himself, contrary to his own expectations, was eventually allowed to retire to his rectory of Lutterworth, where he passed quietly away on the last day of the year 1384.

But the good work was not allowed to stop, and in 1388 one of Wyclif's pupils, now generally identified with **John Purvey**, issued a careful revision of his translation, introduced by a most interesting Prologue, and accompanied by a number of short comments or notes. This version quickly took the place of the older one, and was largely circulated amongst all classes of the people notwithstanding its great cost.[†] Both versions were indeed admirably adapted for popular use, being characterized by great homeliness and directness of diction. And though many of the words and expressions used are now of course obsolete or inappropriate, it is wonderful, when the spelling is modernized, how little they differ as a whole from our AV. One great blemish they of necessity possess. They are only translations of a translation, being made from the Latin Vulgate; and it was left to another with improved facilities to carry on the work so auspiciously begun, and more than 'any other man to give its characteristic shape to our English Bible' (Westcott, *General View of the History of the English Bible*^{2}, 1872, p. 24).

---

[*] See Sanday in Smith's *DB*², p. 1240, art. 'Gospels.'

[†] This is worked out fully in the chapter in Swete's *Introduction to the OT in Greek* which deals with this part of the subject, and for the Vulgate in Berger's *Histoire de la Vulgate*, pp. 301 ff., 331 ff.

[*] See especially Lechler's *John Wycliffe and his English Precursors*, translated and edited by Lorimer; and cf. 'The Birth and Parentage of Wiclif' by L. Sergeant in the *Athenæum* for March 12th and 26th, 1892.

[†] Forshall and Madden, in the preparation of their great work on *The Wycliffite Versions*, 1850, were able to examine 'nearly 150 MSS containing the whole or parts of Purvey's Bible, the majority of which were written within the space of forty years from its being finished' (Preface, p. xxxii f.).

ii. That other was **William Tindale**, and, though there is still considerable uncertainty regarding many of the facts of his life, it is now generally agreed that he was born at Slymbridge in Gloucestershire about the year 1484,* and that after studying at Oxford he proceeded to Cambridge in 1515, where the fame of Erasmus' lectures still lingered. In 1521 he returned to his native county as chaplain and tutor in the family of Sir John Walsh of Little Sodbury, and while there is credited with the resolution to which his whole after-life was devoted, saying in controversy with a clerical opponent, 'If God spare my life, ere many years I will cause a boy that driveth the plough shall know more of the Scripture than thou doest.' In pursuance of this purpose he went up to London two years later, in the hope of executing his task under the patronage of Bishop Tunstall; but after a year of anxious waiting the conviction forced itself upon him, 'not only that there was no room in my lord of London's palace to translate the NT, but also that there was no place to do it in all England' (*Pref. to Pentateuch*).

Voluntarily, therefore, in May 1524, Tindale exiled himself, and after a short stay at Hamburg seems to have visited Luther at Wittenberg. In any case, there can be no doubt that in 1525 he was at Cologne, engaged in bringing out a complete edition of the NT. His plan was, however, discovered by a certain priest John Cochlæus, and he and his assistant Roye had barely time to secure the precious sheets already printed, and carry them off to Worms, where either in the same or the following year 3000 copies of the first printed English NT were issued from the press of P. Schoeffer the younger. The size of the book had been altered from *quarto* to *octavo*, probably to escape detection; but shortly afterwards the original *quarto* edition, whose printing had been interrupted in Cologne, was also completed. Copies of both editions were immediately despatched to England, where they were eagerly welcomed. But so vigorous were the steps taken against them that of the *octavo* edition only one complete copy (with the exception of the title-page) remains;† while the *quarto* is known to exist only in a single fragment (Mt 1^1–22^{12}).‡

After the issue of his Testaments, Tindale quietly continued his work abroad, publishing a translation of *The Five Books of Moses* at Marburg in 1530, and *The Book of Jonah* with an interesting Prologue in 1531.§ An edition of the *Book of Genesis* 'newly corrected and amended' appeared in 1534, and in the same year there was published at Antwerp, 'The Newe Testament dylygently corrected and compared with the Greek by Willyam Tindale,' in which were included certain 'Epistles,' or extracts, out of the OT, a Table of Epistles and Gospels for Sundays, and 'some things added' to fill up the blank pages at the end. The book was thus in some respects more like a modern Church Service Book than an ordinary Testament, while the improvements introduced into the text fully justified the translator's claim that he had 'weeded out of it many faults which lack of help at the beginning, and oversight, did sow therein.' This edition has well been described as Tindale's 'noblest monument'; but not even yet was his work of revision completed. In 1535 there appeared what is often known as 'the G. H. Testament' from the initials attached to the second title-page, and which were first interpreted by Mr. Bradshaw (1881) as denoting G. van der Haghen, the Antwerp publisher. In this edition the 1534 text was 'yet once agayne corrected by Willyam Tindale,' the corrections (there are said to be about four hundred of them) proving by their very minuteness the translator's fidelity and zeal. Another NT bearing the same date (1535) is remarkable for its peculiar orthography, sometimes thought to have been purposely adapted to the pronunciation of the peasantry (*e.g.* 'faether' for 'father,' 'hoeme' or 'hoome' for 'home'), but in all probability caused by the mistakes of some Flemish printer in setting up a foreign language. As further showing the rapid spread of Tindale's translations, it may be mentioned that in the following year (1536) seven, if not eight, editions of his NT appeared, one of which (in folio) is believed to have been the first portion of the Holy Scriptures *printed* in England.*

There was to be no return, however, for Tindale himself to what he pathetically calls 'mine natural country,' for, having been betrayed into the hands of his enemies and imprisoned for about a year at Vilvorde, near Brussels, he suffered martyrdom on Friday, 6th Oct. 1536. With his last words he prayed, 'Lord! open the king of England's eyes.'

It is impossible here to examine in detail Tindale's service to the cause of Bible translation, but one or two points may be indicated. (1) Foremost amongst these is the *independence* of his work. Attempts have been made to underestimate this, and more particularly to prove him on the one hand 'merely a full-grown Wycliffe,' and on the other to show how largely he borrowed from the German Testament of Luther. But while Purvey's revision undoubtedly influenced him indirectly by supplying many proverbial expressions and technical terms which through it had become current, and Luther's Testament, more especially in its Prefaces and marginal Notes, was freely consulted and used, Tindale was too good a scholar to be slavishly dependent on any one,† and can justly claim the honour of being the first in England at any rate (with the possible exception of Bede) to go straight to the Hebrew and Greek originals.‡ (2) If, however, in his own work he was largely independent of others, his influence on those who followed him was direct and unmistakable. Thus it is to him that we owe in great part our religious vocabulary,§ and, what is even more important, that freedom from dogmatic bias and scrupulous fidelity to the exact letter of Scripture which have been in general such happy features of our English Versions.* (3) It would be idle indeed to pretend that Tindale fell into no mistakes. Many of his renderings are incorrect, others are uncouth, others are paraphrases rather than translations. Serious blemishes, too, are his constant disregard of connecting particles, and his habit of translating the same word in different ways even in the same sentence. But, take it all in all, his translation is a noble one, and its very faults, as Fuller says, are 'to be scored on the account rather of that age, than of the author himself.'

* See *William Tyndale, a Biography*, by R. Demaus, new ed. by Lovett, 1886, p. 24.

† Now in the Library of the Baptist College at Bristol, and reproduced in facsimile in 1862 by Mr. F. Fry. It was previously reprinted with an introduction by G. Offor in 1836.

‡ Preserved in the Grenville Room of the British Museum, and photo-lithographed and published with a valuable introduction by E. Arber in 1871.

§ The former has been reprinted under the editorship of Dr. Mombert, and the latter in facsimile with an introduction by Mr. Fry.

* These and many other interesting details will be found in *A Bibliographical Description of the Editions of the NT, Tyndale's Version, in English*, by Francis Fry, 1878.

† According to an eminent German scholar, H. Buschius, who met him at Worms in 1526, Tindale was 'so skilled in seven languages, Hebrew, Greek, Latin, Italian, Spanish, English, French, that whichever he spoke you would suppose it his native tongue' (Schelhorn, *Amœnitates Literariæ*, iv. p. 431).

‡ The Greek Testament which he used was that published by Erasmus, edd. of 1519, 1522.

§ It has been calculated that in the whole of Tindale's NT the number of stranger words, or words that do not occur in the AV, is probably below 350, many of which are used once or twice only (Moulton, *The History of the English Bible*, pp. 70, 71). Of his work as a whole, our Bibles are said to retain at the present day about 80 % in the OT and 90 % in the NT.

iii. Nor had Tindale left himself without worthy successors. Amongst those who are stated by Foxe to have assisted him in translating the Pentateuch was one **Miles Coverdale** (b. 1488, d. 1569), who, urged on by Cromwell, now devoted himself so steadily to the work of Bible-translation that on Oct. 4th, 1535, the first complete printed English Bible was issued, the sheets of which are believed to have been printed by J. van Meteren of Antwerp, and then sold to Nicolson the Southwark printer. The original title ran as follows:—'**Biblia**, The Bible: that is, the Holy Scripture of the Olde and New Testament, faithfully and truly translated out of Douche and Latyn into Englishe, MDXXXV.' The English printer in substituting a new title-page of his own omitted for some reason the reference to 'Douche [German] and Latyn,' and added several preliminary pages containing a Dedication to king Henry VIII. and a Prologue to the Christian Reader, both signed by Coverdale. In this Dedication, Coverdale disclaims the position of an independent translator, and speaks of having 'with a clear conscience purely and faithfully translated this out of five sundry interpreters' (now generally identified with Luther, the Zürich Bible, the Vulgate, the Latin version of Pagninus, and in all probability Tindale), and to the same effect in the Prologue he specially acknowledges his indebtedness to 'the Dutch interpreters, whom (because of their singular gifts and special diligence in the Bible) I have been the more glad to follow for the most part, according as I was required.'

Notwithstanding these admissions, it would be wrong, however, to regard Coverdale as a mere 'proof-reader or corrector,' for, while making diligent and discriminating use of the different authorities within his reach, he supplied many of those happy turns of expression which lend so much of its charm to our English Bible. This is perhaps specially noticeable in the Psalter, of which Coverdale's version in the revised form in which it appeared in the Great Bible still retains its place in the English Book of Common Prayer. Two new editions of Coverdale's Bible were issued by Nicolson in 1537, on the title-page of which there now appeared for the first time the significant words, 'Set forth with the Kynges most gracious licence.' The following year found Coverdale engaged in biblical work in Paris, and the fruit was seen in a Latin-English Testament, of which in one year three editions were called for. New editions of the Bible appeared in 1550 and 1553.†

iv. Other translations now followed in rapid succession, one of which is generally known as **Matthew's Bible**. Its real editor, however, was a certain John Rogers, who adopted the *alias* of Thomas Matthew—perhaps, as Foxe suggests, to hide his connexion with Tindale. As to the closeness of this connexion there can at least be no doubt. The whole of the NT and about half the OT in the new edition are Tindale's, while the remainder is Coverdale's. Signs are not wanting, however, of critical editorship. Thus in the Psalter various readings are introduced in the margin, and many technical terms are carefully explained. Numerous notes have also been added, many of which breathe a spirit of ardent Protestantism, and there is a large amount of prefatory matter principally from Olivetan's French Bible (1535). Like the second edition of Coverdale's Bible, the new version bears to be 'set forth with the kinges most gracyous lycēce,' and Cromwell, instigated by Cranmer, further obtained Henry's permission that 'the same may be sold and read of every person, without danger of any act, proclamation, or ordinance heretofore granted to the contrary.' Hence it came about that 'by Cranmer's petition, by Crumwell's influence, and by Henry's authority, without any formal ecclesiastical decision, the book was given to the English people, which is the foundation of the text of our present Bible. From Matthew's Bible—itself a combination of the labours of Tyndale and Coverdale—all later revisions have been successively formed' (Westcott, *History*², p. 73). Its author did not, however, escape in the troublous times that followed on Mary's accession. Through the agency of Bonner he was imprisoned at Newgate, and on Feb. 4th, 1555, was burned at the stake, setting a second seal to the fourfold seal of martyrdom by which the history of our English Bible has been hallowed.

v. Closely allied to Matthew's Bible is a version bearing the name of **Richard Taverner**, which was published in 1539, and bore to be 'newly recognized with great diligence after most faythful exemplars.' But the changes introduced are not as a rule of any great importance, though in the NT there are occasional forcible renderings. In Mt 21. 22, for example, Dr. Moulton finds in all about 40 variations from Tindale, of which one-third are retained in the AV (*History*, p. 135). So far as we know, Taverner's Bible was only once reprinted, in 1549 (Cotton's *Editions of the Bible*², p. 21).

vi. We have seen already what a steady friend of Bible-translation Cromwell had proved himself. He was to render it yet another notable service. Not wholly satisfied with any version that had appeared, he applied to Coverdale early in 1538 to undertake a wholly new revision, using Matthew's Bible as his basis;* and as it was determined that the printing should be done in Paris, Coverdale, accompanied by one Grafton, at once repaired thither. Before, however, the work was completed, the Inquisition stepped in, and it was with great difficulty that the sheets were saved, and the presses sent over to England. There the work was soon finished, and in April 1539 the **Great Bible**, as being the Bible 'in the largest volume,' was issued from the press. It possessed a title-page of elaborate design, in which Henry was represented as handing 'the Word of God' to Cranmer and other clergy on his right hand, and to Cromwell and various lay-peers on his left; while the contents are described as 'truly translated after the veryte of the Hebrue and Greke textes, by ye dylygent studye of dyuerse excellent learned men expert in the forsayde tonges.' There can be no doubt, however, that the work was principally Coverdale's, and that in his revision of Matthew's text he made large use of Münster's Hebrew-Latin version in the OT, and of the Vulgate and Erasmus in the NT. From the Vulgate more especially he introduced a number of various readings, but 'certain godly annotations' which he promised in the Prologue to explain 'the dark places of the text' never appeared. In 1540 a new edition was called for, containing a long Preface by Archbishop Cranmer, which has led to its being known as **Cranmer's Bible.** Five other editions followed rapidly within the next eighteen months.* From their size and cost these were principally used as Church Bibles, and it must have been a pleasing sight to see in Old St. Paul's or in the aisle of some country church the little group round the Great Bible, from which some one more educated than the rest read aloud.

---

* 'I call God to record against the day we shall appear before our Lord Jesus, to give a reckoning of our doings, that I never altered one syllable of God's word against my conscience, nor would this day, if all that is in the earth, whether it be pleasure, honour, or riches, might be given me.'—Tindale in *Letter to Fryth*, 1533 (Demaus' *Tyndale*, p. 336).

† A convenient reprint of Coverdale's Bible of 1535 has within recent years been issued by Bagster.

* 'I am always willing and ready,' Coverdale had written in the Dedication to his Bible, 'to do my best as well in one translation as in another.'

vii. The people, however, were soon to have a Bible of their own, and for this we must turn again to the Continent. The accession of Mary had given a new turn to the ever-varying fortunes of our Bible's history. Cranmer had followed Rogers to the stake, and the public, though apparently not the private, use of the Scriptures was strictly forbidden. Foreseeing what was coming, a number of the leading Reformers had taken refuge at Geneva, the city of Calvin and Beza, and there, as they themselves tell us, 'we thought we could bestow our labours and study in nothing which could be more acceptable to God, and comfortable to His Church, than in the translating of the Scriptures into our native tongue.' The immediate result was the publication in 1557 of a translation of the NT alone by one of their number, **William Whittingham,** who, in his Address to the Reader, describes his work as specially intended for 'simple lambs.' And it was doubtless the thought of the same class of readers that led to the numerous 'annotations of all hard places,' and to the adoption for the first time in an English translation of the convenient but often misleading division into verses.†

This Testament was, however, soon cast into the shade by the publication in 1560 of a translation of the whole Bible, due in the main to the combined labours of William Whittingham, Thomas Sampson, and Anthony Gilby. In size this **Genevan Bible** is a moderate quarto, and it is often familiarly known as the *Breeches Bible* from its rendering of Gn 3^{7} ('They sewed fig-tree leaves together, and made themselves breeches'). The cost of its production was met by 'such as were of most ability' in the congregation at Geneva.

Regarded simply as a translation, the version deserves high praise, being based on a careful revision of the Great Bible in the OT, and, under the influence of Beza's Latin translation and Commentary, of Tindale's latest edition in the NT. The changes thus introduced were as a rule marked improvements, and many of them were subsequently adopted in the AV. The new version was also abundantly supplied with marginal notes principally of an explanatory character, and these, combined with the convenient size in which it appeared, did much to account for the popularity which for long it enjoyed,‡ passing as it did through 160 editions, 60 of them during the reign of Elizabeth alone,§ and continuing to be printed for some time even after the publication of the AV in 1611.‖

viii. It was not to be expected, however, that the successors of Cromwell and Cranmer could look with favour on a translation emanating from the school of Calvin, and containing so many 'prejudicial notes.' Accordingly, in 1563–64 Archbishop Parker set on foot a scheme for the revision of Coverdale's version by a number of learned men working separately; and in 1568 the **Bishops' Bible,** so called from the number of bishops engaged on it, was completed, and a copy presented to the queen. An effort was made at the same time to secure that it alone should be licensed 'to draw to one uniformity.' But, from whatever cause, this licence was never granted, and, although the version gained a considerable circulation, this was due rather to the support accorded to it by Convocation than to its own merits.*

The truth is that as a translation it was marked by the inequality inevitable to a work which had been sorted out into 'parcels' amongst a number of independent workers. In the OT the historical books as a rule followed the Great Bible very closely; but in the prophetical books greater variation was indulged in, many of the changes being distinctly traceable to the influence of the Genevan Bible. The Psalter was practically a new translation; and on this account failed to maintain its ground against the version in the Great Bible, already endeared by constant use. In the 2nd edition of 1587 the two versions were printed side by side, but in all later editions except one (1585) the old Psalter alone appeared. In the NT, on the other hand, more particularly in the 1572 edition, the bishops introduced many marked improvements, pointing to a careful study of the original text, though their renderings were occasionally marked by cumbrousness and a love of mouth-filling phrases. On the whole, however, the influence of the Bishops' Bible on succeeding versions cannot be said to have been very great, and, as has already been indicated, it failed to oust the Genevan Bible from its place as the favourite Bible for household use. The authority of the latter was now, however, to be subjected to a fresh challenge.

ix. This came from the Church of Rome, and it is again interesting to notice that the new version, like the Genevan and Tindale's, was produced in exile. At the beginning of queen Elizabeth's reign a number of English Romanists had taken refuge on the Continent, and in 1582 there was published a NT 'translated faithfvlly into English out of the authentical Latin, according to the best corrected copies of the same, diligently conferred with the Greeke and other editions in divers languages. . . . In the English College of Rhemes.' The translation of the OT had been previously completed, but 'for lack of good meanes' its publication was delayed until 1609–10, when it came out at Douai. The whole Bible thus issued is generally known as the **Rheims and Douai Bible,** and to three men, William Allen, Gregory Martin, and Richard Bristow, the credit of its production principally belongs. Prefixed to the Rhemish NT was an elaborate Preface, in which the translators warned readers against the then existing 'profane' translations, laid the odium on Protestants of casting 'the holy to dogges and pearles to hogges,' and claimed for themselves to have at least been 'very precise and religious' in following their copy, 'the old vulgar approved Latin.' The new version was thus, like the

---

* From the fact that several of these editions were printed by Whitchurch, the Great Bible is sometimes known as Whitchurch's.

† The scheme which Whittingham adopted was that prepared by R. Stephanus for the 4th ed. of his Greek NT, published in 1551. In the OT the division into verses was already in existence in the Hebrew Bible.

‡ In 1649 an edition of the AV itself was actually brought out with the Genevan notes, evidently for the purpose of commending it to public favour.

§ After 1587 a revised version of the NT made by Laurence Tomson in 1576 generally took the place of the earlier version.

‖ The Genevan was the first Bible printed in Scotland in an issue generally known as the *Bassandyne Bible,* from the printer's name Thomas Bassandyne (see *History of the Bassandyne Bible,* by W. T. Dobson, 1887); and so firm was the hold it obtained in the country, that so recently as towards the close of the 18th cent. a Bible of the Genevan translation was still in use in the church of Crail in Fifeshire.

* It passed through nineteen editions; the last bears the date 1606.

Wyclifite versions, only a secondary translation, and it was not to be wondered at that the extreme literalness at which the translators aimed 'word for word and point for point' led often to stilted and even unintelligible renderings, and also to the introduction of many Latinized terms, many of which were afterwards adopted in the AV. The charge of theological bias sometimes brought against the translators with regard to some of these terms is probably without foundation; but the same cannot be said of their notes, which are unmistakably and avowedly of a polemical character. It need only be further noted that in later editions the Douai version has been largely altered to bring it more into conformity with—

x. **The Authorized Version.**—To the history of this version we have now come, and, when we think of the influence it exerted and is still exerting, it is the more remarkable that its origin should have been of such an incidental, almost accidental, character. One of the first acts of king James on ascending the throne of England was to convene a Conference at Hampton Court Palace in January 1604, to hear and determine 'things pretended to be amiss in the Church,' and in the course of the second day's proceedings Dr. Reynolds, the Puritan leader, threw out the suggestion 'that there might be a new translation of the Bible, because those which were allowed in the reign of king Henry VIII. and Edward VI. were corrupt and not answerable to the truth of the original.' The suggestion commended itself to the king, who had at one time begun a translation of the Psalms himself, and he at once proposed that the new translation should be undertaken by 'the best learned in both the universities, after them to be reviewed by the bishops and chief learned of the Church; from them to be presented to the Privy Council; and lastly to be ratified by his royal authority; and so this whole Church to be bound unto it and none other.' He further ordered 'that no marginal notes should be added,' some of those in the Genevan Bible having recently attracted his attention as 'very partial, untrue, seditious, and savouring too much of dangerous and traitorous conceits.'

Notwithstanding, however, the royal favour bestowed upon it, the actual work of translation, or rather revision, was not commenced until 1607, when the forty-seven revisers (it had been originally intended that there should be fifty-four) were divided into six companies, of which two sat at Westminster, two at Oxford, and two at Cambridge. Each company was to busy itself in the first instance with the separate portion assigned to it, but provision was also made for the revision of each portion by the other five companies, and the whole version thus amended was then to be submitted to a select committee representative of all the companies for the harmonizing of details and final preparation for the press. How far these arrangements were rigidly adhered to we cannot now determine, for 'never,' says Dr. Scrivener, who is our principal authority on all that concerns this version, 'was a great enterprise like the production of our Authorized Version carried out with less knowledge handed down to posterity of the labourers, their method and order of working' (*The Authorized Edition of the English Bible*, p. 9). We know, however, that in two years and nine months the whole work of revision was carried through, and in 1611 the new version was published. Its full title ran as follows:—'The Holy Bible, conteyning the Old Testament and the New: Newly Translated out of the Originall tongues: with the former Translations diligently compared and reuised by his Maiesties Speciall Comandement. Appointed to be read in Churches. Imprinted at London by Robert Barker, Printer to the King's Most Excellent Majestie. Anno Dom. 1611.'[*] After the title-page came the fulsome Dedication to king James, and a most interesting Preface, generally understood to be the work of Dr. Miles Smith, afterwards Bishop of Gloucester, in which the main principles that had guided the translators were set forth.[†]

We cannot now attempt to detail these, or to examine the leading internal characteristics of the new version; but it is important to keep in mind that, in accordance with the rules that had been laid down for their guidance, what the translators aimed at was a revision rather than a new translation. The basis of their work was the Bishops' Bible; but the versions of Tindale, Matthew, Coverdale, Whitchurch (that is, the Great Bible), and Geneva were used whenever they were found to be more in accordance with the original, so as to make, in the translators' own words, 'out of many good ones one principal good one, not justly to be excepted against.' No marginal notes were permitted, 'but only for the explanation of the Hebrew or Greek words which cannot, without some circumlocution, so briefly and fitly be expressed in the text,'—an exception which was somewhat liberally interpreted;[‡] and 'such quotations of places' were 'set down as shall serve for the fit reference of one Scripture to another.'[§] A new set of headings of chapters and columns was also substituted for those that had existed in the Genevan, and in the Great and Bishops' Bibles; but the dates (mostly from Ussher) with which we are familiar in most modern editions were first inserted in 1701.

The immediate reception of the new version can hardly be said to have been altogether encouraging to its promoters, for though there was little active opposition extended to it, and it speedily superseded the Bishops' Bible as the official version, it was not until the middle of the century that it ousted the Genevan Bible from the place of popular favour.[‖] That it deserved the place which it then attained does not admit of a moment's dispute; and none have shown themselves more ready to admit its merits than those who in 1870 were appointed to revise it. 'We,' so they tell us, 'have had to study this great Version carefully and minutely, line by line; and the longer we have been engaged upon it the more we have learned to admire its simplicity, its dignity, its power, its happy turns of expression, its general accuracy, and, we must not fail to add, the music of its cadences, and the felicities of its rhythm' (*Pref. to RV of NT*, 1881).

At the same time, great as the excellences of the AV undoubtedly are, it would be absurd to contend that it is not capable of improvement, or that the work of constant revision out of which it has been evolved cannot be applied to it in its turn. And indeed, as a matter of fact, what we still know as king James's version has been subjected throughout the course of its long history to a larger amount of revision than many of its readers are aware of. For not merely have the typographical and other imperfections inevitable in so large an undertaking been corrected, but a large number of deliberate changes have from time to time been made in the text, 'introduced silently and without authority by men whose very names are often unknown.'[*] And, in addition to this unofficial and irresponsible work of revision, we have abundant evidence of more ambitious proposals for amending the new version. Thus, in 1645, Dr. John Lightfoot, preaching before the House of Commons, urged them 'to think of a review and survey of the translation of the Bible,' and pleaded for 'an exact, vigorous, and lively translation.' And a few years later (1653) the Long Parliament actually made an order that a Bill should be brought in for a new translation. Nothing, however, came of this and similar schemes which were proposed from time to time:[†] and it was left to the Southern Convocation of the Church of England to take the initial steps for providing us with what is now known as *par excellence*—

---

[*] A useful reprint of this original edition was issued from the Oxford Press in 1833.

[†] It has been reprinted in separate form by the S.P.C.K.

[‡] In the original edition of the AV, excluding the Apocrypha, over 7000 brief marginal notes were inserted, a number that has since been largely increased.

[§] The original 9000 references have, in some modern editions, reached the enormous total of 60,000.

[‖] From the words 'Appointed to be read in Churches' on the title-page, it has sometimes been thought that the use of the new version was at once formally enjoined by the king, and that from this it derived its name of *Authorized*. But 'no evidence has yet been produced to show that the version was ever publicly sanctioned by Convocation or by Parliament, or by the Privy Council, or by the king' (Westcott, *History*^{2}, p. 123). It became the '*authorized*' version simply because it was the best.

xi. The Revised Version.—The fact that it took its rise in Convocation marks off the RV from all other English versions. Tindale's Testament and Coverdale's Bible were the work of individuals; the Great Bible and the Bishops' were Episcopal in their origin; the Genevan and the Rheims and Douai Bibles were due to two bands of exiles, Protestant and Roman Catholic respectively; but the idea of the RV was matured by representatives of the Church of England, and carried through with the assistance of members of other Churches.[‡]

Over the steps leading up to the final decision we cannot linger. Enough that in May 1870 the report of a committee appointed in the preceding February was adopted, to the effect 'that Convocation should nominate a body of its own members to undertake the work of revision, who shall be at liberty to invite the co-operation of any eminent for scholarship to whatever nation or religious body they belong'; and that shortly afterwards, in terms of this resolution, two Companies for the revision of the Old and New Testaments respectively were appointed. Eight rules were laid down for the Revisers' guidance, the most important of which were to the following effect:—the alterations to be as few as possible consistently with faithfulness to the original, and to be made in the language of the Authorized and earlier English versions; each Company to go twice over the portion to be revised, once provisionally, the second time finally; the Text adopted to be that for which the evidence is decidedly preponderating; and no changes in the text to be retained on the second final revision, unless approved by *two-thirds* of those present.

It will be seen that every precaution was thus taken to ensure that no unnecessary changes should be introduced into a version already hallowed by so many and so varied associations; and probably the charge that is most frequently brought against the Revisers is that they were too apt to lose sight of this. At the same time, it is only fair to them to keep in view the varied causes that made many changes inevitable. Thus, in the matter of text alone, it has been estimated that the text underlying the revised NT of 1881 differed from that of 1611 in no less than 5788 readings;[*] while other variations were necessitated by obvious misunderstandings of the original, by the removal of archaisms, and by previous inconsistencies in the rendering of the same words and phrases. Numerous, however, as the differences between the Revised and Authorized versions thus came to be, it is reassuring to know that in no particular have they seriously affected any of the doctrines of our faith, though in not a few instances these doctrines are now presented in a fuller and more convincing light.[†]

The revision of the NT occupied about ten years and a half, and the result was published on May 17th, 1881. Four years later the Revised OT was ready, and thus on May 19th, 1885, the English reader had the whole Bible in his hands, 'being the version set forth A.D. 1611 compared with the most ancient authorities and revised.' Each Testament was furnished with a Preface detailing the principles on which the work had been carried through, and with an Appendix in which the American Companies, who had been associated in the work, placed on record certain points of translation in which they differed from the English Companies. A revised translation of the Apocrypha by various committees of the Revisers was published in 1895. And in 1898 the work of revision was completed by the issue of a new edition of the Revised Bible with a carefully emended set of marginal references.

LITERATURE.—The principal works dealing with the separate versions have already been referred to in the preceding pages. For the versions as a whole, Eadie, *The English Bible: an External and Critical History of the various English Translations of Scripture*, 2 vols. 1876, is the most complete account; but much that is very valuable, especially with relation to the internal history of the text, will be found in the well-known *Histories* of Westcott and Moulton. Of a more popular character are Stoughton, *Our English Bible: its Translations and Translators* (no date); Pattison, *The History of the English Bible*, 1894; and *The English Bible: a Sketch of its History*, 1895, by the present writer, from which the foregoing account with various corrections and additions has been principally drawn. In Kenyon, *Our Bible and the Ancient Manuscripts*, 1895, the history of the text underlying our various versions is clearly set forth for the benefit of the ordinary readers of the Bible in English; and in *The Evolution of the English Bible*, 1901, by H. W. Hoare, the successive versions are interestingly described in connexion with their general historical setting.

Other works connected with the subject which may be consulted with advantage are, Lewis, *History of the English Translations of the Bible*, 1818, and Anderson, *The Annals of the English Bible*, 2 vols. 1845, 1 vol. revised ed. 1862, both of which, however, require to be carefully verified in the light of later knowledge; Dore, *Old Bibles*^{2}, 1888; Edgar, *The Bibles of England*, 1889; Mombert, *English Versions of the Bible* (no date); and the historical account prefixed to Bagster's issue of *The English Hexapla* (no date).

The principal authority for the AV, as has been noted above, is Scrivener, *The Authorized Edition of the English Bible* (1611), 1884; while to the books already mentioned as dealing with the RV there may be added Newth, *Lectures on Bible Revision*, 1881 (with an Appendix containing the Prologues and Prefaces to the various versions); Kennedy, *Ely Lectures on the RV of the NT*, 1882; Humphry, *Commentary on the RV of the NT*; Westcott, *Some Lessons of the RV of the NT*, 1897; and Ellicott, *Addresses on the RV*, 1901. Reference may also be made to *Biblical Revision, its Necessity and Purpose*, 1879, the English republication of a series of Essays by members of the American Revision Committee; and to the *Documentary History of the American Committee on Revision*, 1885, prepared originally by order of that committee for the use of its members. For a vigorous but sometimes misleading criticism of the RV see Burgon, *The Revision Revised*, 1883.

[*] Scrivener, *The Authorized Edition*, p. 3. These changes may also be conveniently studied in *The Cambridge Paragraph Bible*, edited by Scrivener, 1873.

[†] See Plumptre, art. 'Version (Authorized)' in Smith's *DB* iii. 1678 ff.

[‡] The history of the RV still remains to be written, but amongst recent works which helped to prepare the way for it may be mentioned Trench, *On the AV of the NT in connexion with some recent proposals for its revision*^{2}, 1859; Ellicott, *Considerations on the Revision of the English Version of the NT*, 1870; Lightfoot, *On a Fresh Revision of the English NT*^{3}, 1891; the Revisions of the Gospel of St. John and of several of the Pauline Epistles by Five Clergymen, the first part of which appeared in 1857; and Dean Alford's *Revised NT*, 1869.

[*] See Kenyon, *Our Bible and the Ancient Manuscripts*, p. 239; and compare Bishop Westcott's weighty words, 'Whatever may be the merits of the revised version, it can be said confidently that in no parallel case have the readings of the original text to be translated been discussed and determined with equal care, thoroughness and candour' (*History*^{2}, p. viii, note).

[†] See 'The Doctrinal Significance of the RV,' three articles in *The Expository Times*, vii. 377, 452, viii. 171.

VERSIONS (GEORGIAN, GOTHIC, SLAVONIC).—

A. **The Georgian Version.**—This version is ascribed to the 5th or 6th cent., and, according to Armenian tradition, was the work of Mesrop, who also invented the Georgian alphabet. There are two characters in use—one for sacred writings called *Kuzuri*, and another, called *Mkedruli*, for civil purposes. By far the fullest account of this Version is found in Tsagareli's *Information about the Monuments of Georgian Literature* (in Russian), from which many of the facts which follow have been taken. The earliest period of literary activity lasted from the 5th to the 9th cent., and to it belong a papyrus Psalter assigned to the 7th or 8th cent., of which a facsimile is given in the work just mentioned, and a copy of the Gospels and a Psalter dated a century later. Both these are in the monastery on Mount Sinai. The next period, from the 10th to the 12th cent., Tsagareli calls the classical period. To this belong the oldest dated copy of the Gospels, assigned to A.D. 936, a MS—dated 974—of the Acts and Epistles of St. James and St. Peter, and the earliest MS of the whole Bible (now in part mutilated in the Pentateuch), dated 978, in two volumes. This last MS is preserved in the Iberian Monastery on Mount Athos. To the same period belongs an important MS of the Prophets at Jerusalem, assigned to the 11th cent. In this the Minor Prophets precede the Major, in the Athos MS the order is reversed. The chief centres of literary activity were the monastery on Mount Sinai, the monasteries of the Holy Cross and St. Sabbas near Jerusalem, and Mount Athos, each centre having a characteristic style of writing. The names of many of the scribes are preserved in the MSS. A chronological list of the MSS near Jerusalem and on Mount Sinai is given by Tsagareli in an appendix. This includes five Psalters, three MSS of other parts of the OT, fourteen of the whole or parts of the Gospels, eleven of the *Apostol*, and two of other parts of the NT.

Our information in regard to the text of the Version is derived mainly from the edition published at Moscow in 1743. This was used by F. C. Alter for the material he supplied to Holmes and Parsons for their edition of the LXX, and in his little monograph *Ueber Georgianische Litteratur* he gives a number of select readings throughout the Bible. Some doubt has been thrown on the value of the Moscow edition of the Georgian Bible because of a suggested corruption from the Slavonic. In regard to this point the Preface tells us that the edition was made for Archel, who, finding no complete Bible in Georgia, translated the gaps according to his powers, using the Slavonic for this purpose. We find passages (*e.g.* Ca 2^1) where misreading of the Slavonic has led to a mistaken rendering. When we go behind the edition to the MSS we find variations of text, as in the Athos and Jerusalem MSS of the Prophets; so again the Moscow edition differs from the Athos MS of the Song of Songs. In this as in the other Versions there seem to have been revisions and additions. Thus Tsagareli (*l.c.* 59) mentions two different translators, and adds, 'looking at the various readings of the Georgian NT and OT, we see there were several redactions of the Georgian Bible.' Mr. Conybeare also refers to the statement of Georgian writers, that 'before the tenth century a revision was made of their version.' Of the Gospels, Mr. Conybeare[*] from his own collations testifies that 'the printed text fairly represents the MSS,' though he adds that 'the most ancient MSS of the Version must be collated and a critical text of it prepared before it can be quite reliably used as an early witness to the Greek text in regard to any particular points.' Both in the OT and in the NT the Version was made from the Greek.

LITERATURE.—Besides the brief notices in Gregory's *Prolegomena*, p. 922, and Nestle's *Urtext*, reference may be made to F. C. Alter, *Ueber Georgianische Litteratur*, Wien, 1798, to Tsagareli's book already described, and to Mr. Conybeare's account in Scrivener's *Introduction*, ii. 156.

B. **The Gothic Version.**—i. ORIGIN OF THE VERSION.—The beginnings of this Version are associated with the name of **Ulfilas**, and our knowledge of him comes mainly from Philostorgius, who was a contemporary and a native of the district of Cappadocia, from which Ulfilas' parents had been carried away near the end of the 3rd cent. during an invasion of Goths who came from Dacia. In Dacia, Ulfilas was born of Christian parents, probably some time between A.D. 310 and A.D. 313; thirty years later, in 340 or 341, he was consecrated bishop either at Constantinople or, as Kauffmann asserts, at Antioch. After remaining in Dacia as bishop for some seven years, he was driven out by persecution to Moesia, and to the period of his stay there the translation of the Bible into Gothic is ascribed. The commencement of the Version therefore dates from about the middle of the 4th cent., and, if it was all the work of Ulfilas, was completed before the year 381, in which year or (according to Jostes) in 383 he died.

This is one of several Versions for which an alphabet is said to have been invented by the translator. Before this time the Goths, like the other Teutonic families, seem to have used runes, and some of these older characters are kept in the alphabet ascribed to Ulfilas. Luft in his *Studien zur den ältesten Germanischen Alfabeten* (quoted by Nestle), traces 18 of the letters used by Ulfilas to a Greek source, 9 to the Latin. As was to be expected, many words were also carried over into Gothic from Greek, Latin, and other languages.[*] The number of foreign words found in the fragments which have come down to us is put by Nestle at 116.

It will be natural to ask what was the extent of the Version made by Ulfilas. The authority already quoted, Philostorgius, says that Ulfilas translated 'all the books of the Scripture with the exception of the Books of Kings, which he omitted because they are a mere narrative of military exploits, and the Gothic tribes were especially fond of war.' This statement is entitled to serious consideration as that of a contemporary, and we must infer from it that at any rate by A.D. 400, or soon afterwards, there was a translation of the Bible into Gothic, complete save for the books named. On the other hand, Nestle argues from Jerome's language in his well-known letter to Sunnias and Fretella, that at the date of the letter, some 50 years after Ulfilas' translation was made, these two Gothic students were occupied with a translation of the Psalter into Gothic, as if one did not exist. Jerome's words may, however, be interpreted on the supposition that they were working at a translation already made and its relation to the *Hebraica veritas*. Another statement, made by Walafrid Strabo, a writer of the 9th cent., is not sufficient to prove that Ulfilas was aided by others, for it is vague, and the authority on which it rests is unnamed. 'The Goths,' he says (*de Rebus Eccl.* 7), 'had one language; and, as histories testify, they translated the sacred books into their language . . . and of these some monuments are still preserved.' An argument of a different kind is mentioned by Sievers (*Encyc. Brit.*^{9} *s.v.* 'Goths'), who says that 'certain differences in language and manner of translation make it doubtful even whether the fragments of the OT can be traced to the same origin as those of the New.'*

---

[*] Scrivener's *Introduction*, ii. p. 157.

[*] The word 'heathen,' as discussed in Murray's *English Dictionary*, gives an interesting illustration. It is traced there on the basis of investigations by Bugge through the Gothic to the Armenian.

ii. THE MANUSCRIPTS.—The history of the Version breaks off abruptly, for we know nothing more of it than can be gathered from the scanty remains which have come down to us in the MSS—remains which, scanty as they are, are of the greatest possible interest and value to the philologist, because they are 'by several centuries the oldest specimen of Teutonic speech.' How far they underwent any changes during the century and a half, or rather more, which intervened between the date of Ulfilas and that to which they are assigned, we cannot say. They all belong to the period of the East Gothic kingdom in Italy which began with Theodoric (493–526), and are all assigned to N. Italy.

The following† is a list of the MSS of the Bible in this Version:—

1. *Codex Argenteus.*—This MS is the most important. It is assigned to the 5th or early 6th cent., and is now at Upsala in Sweden. It is written in uncial, the letters being of gold or silver, on purple vellum. The MS now contains, on 187 leaves, large fragments of Matthew, John, Luke, Mark in that (the Western) order, beginning with Mt 5^{15}.
2. *Codex Carolinus.*—This and the following fragments are all palimpsest. It is bilingual (Goth. Lat.), and is now at Wolfenbüttel. The upper writing consists of works of Isidore of Seville. The MS is that usually referred to as P. Q. of the Gospels, and *gue* of the Old Latin (Epistles). It was discovered by Knittel, and edited by him in 1762. It contains on four leaves about 42 verses from Ro 11–15. It has been regarded (so Bernhardt) as corrected from the Latin in some places, *e.g.* $12^{2.3}$, and in places agrees very closely with the first fragment at Milan, even in orthographical peculiarities.
3. *Codices Ambrosiani.*—The following are now in the Ambrosian Library at Milan. These fragments, all in MSS which came from Bobbio, and originally belonged to two Gothic MSS, were discovered by Mai in 1817. Other fragments of the same MSS have been discovered at Turin and in the Vatican. Mai ascribes the writing in part to the early 5th, in part to the 6th, century:—
   (1) (S. 36) is a MS containing Gregory the Great's Commentary on Ezekiel. Of this 102 leaves (1 of which is illegible and 6 blank) belong to a Gothic MS (in which a note at 2 Co 4^{14} says, *liber sancti Columbani de bobio*) containing fragments of Rom., 1 and 2 Cor., Eph., Gal., Phil., Col., 1 and 2 Thess., 1 and 2 Tim., Titus, and Philem., in that order, and a fragment of a Gothic calendar.
   (2) (S. 45) is said to be written in an older character than (1), and contains on 78 leaves 2 Cor., and fragments of 1 Cor., Gal., Eph., Phil., Col., 1 and 2 Thess., 2 Tim., and Titus.
   (3) (I. 61 *sup.*) contains‡ on 2 leaves Mt 25^{38}–26^{3}, and 26^{65}–27^{1}.
   (4) (G. 82) contains on 3 leaves fragments of Ezra and Nehemiah.§
   (5) (G. 14) contains on 5 leaves fragments of a commentary on St. John.
4. *Codex Vaticanus* (MS 5750) contains on 3 leaves fragments of the same Commentary on St. John as the 5th Milan fragment.
5. *Codex Taurinensis* consists of 4 leaves belonging to the same MS as the first Milan fragment, found in the binding of a MS at Turin.‖ These leaves contain Gal 6^{14-18}, Col 2^{13-20} 4^{13-18}.
6. *Codex Vindobonensis.*—This MS, ascribed to the 9th cent., came from Salzburg (MS 140, olim 71), and contains, under runes, fragments of Gn 5, and, on the margin, two half-verses of Ps $52^{2.3}$.

In these MSS we have preserved to us the following passages of the OT:—Gn $5^{3-23.\ 25-28.\ 30.\ 32}$, Ps $52^{2.\ 3}$,¶ Neh 5^{12-18} 6^{14}–$7^{3.\ 13-47\text{ff.}}$, and fragments more or less extensive of all the books* of the NT except the Acts, Catholic Epistles, and Apocalypse of which we have nothing in this Version.

iii. CHARACTER OF THE TEXT.—The next point to determine in regard to the Version is the character of the text preserved in it.

For the OT the amount preserved is very scanty indeed, but the fragments consist largely of names (as in the lists from Nehemiah), or numbers (as in the Genesis passages), and therefore the nature of the materials is some slight compensation for the deficiency in quantity.

The most careful examination of the Version in its relation to the text from which it was translated is in an article by Kauffmann,† who points out the very close agreement with Lucian's recension of the LXX text. Thus in Neh $7^{24.\ 35}$ (to take two instances only) the Gothic Version agrees with two MSS (HP 93, 108) of this recension in the names Ἀσσομ, Ἡιραμ, and this form is found in no other MSS of the LXX. The same close relationship of the Gothic and Lucian meets us in the Genesis fragments, where we find agreement between the numerals of the Gothic Version and those found in HP 44, another MS of the Lucian recension. But there are differences as well as resemblances, and Kauffmann collects instances in which the Gothic departs from Lucian and agrees with the B-text of the LXX. The Gothic does not preserve 'the original Lucianic text, but one derived from it,' or perhaps we may rather say it preserves one of the strains incorporated in the Luc. text.

In regard to the NT, Kauffmann, in a later series of articles in the periodical quoted below, entitled 'Beiträge zur Quellenkritik der Gottischen Bibelübersetzung,' examines the Version in regard to the sources from which it is drawn. He comes to the conclusion (*ib.* xxxi. 180) that 'the Goth, to whom we owe Matthew, used the Greek text current in the diocese of Constantinople,' and that for St. John there is evidence of 'no other recension than that demonstrated for St. Matthew.' Whether the Version was made from MSS obtained in Moesia, or from MSS brought by Ulfilas' parents from Cappadocia, we should expect, *a priori*, that this would be the type of text used. Westcott and Hort (*New Testament*, i. p. 158) thus sum up the position: 'The Gothic has very much the same combination as the Italian revision of the Old Latin, being largely Syrian and largely Western, with a small admixture of non-Western readings.' A few instances of the readings of this Version in noteworthy passages from the first ten chapters of St. Luke may be given:—Lk 1^{28} *εὐλογημένη σὺ ἐν γυναιξίν*; 2^{14} *εὐδοκίας*; 4^{18} *ἰάσασθαι τ. σ. τὴν καρδίαν*; 4^{44} *Γαλιλαίας*; 6^{1} *δευτεροπρώτῳ*; 6^{48} *τεθεμελίωτο, κ.τ.λ.*; 8^{26} *Γαδαρηνῶν*; 9^{35} *ἀγαπητός*; 9^{54} *ὡς καὶ Ἡλίας ἐποίησε*; 9^{55} *καὶ εἶπεν οὐκ οἴδατε, κ.τ.λ.*; 10^{1} *ἑβδομήκοντα*. In all these passages save 2^{14} and 4^{44} it supports a reading rejected by Westcott and Hort. On the other hand, in Mk 1^{2}, Mt 7^{13} 11^{23} 27^{4} it has readings accepted by the same editors.

In these and many other passages the Version will be seen to have a close relation to the Latin. Various explanations of this resemblance are possible. It has been suggested that the Gothic has been influenced by the Latin between the date at which the Version was made and the date of the MSS of it which survive. Besides the resemblances of text, it is urged that the Gospels in the *Codex Argenteus* occur in the Western order, and that most, if not all, of the MSS are connected with N. Italy, and date from the time of the Lombardo-Gothic kingdom there; that (as has been mentioned above) many Latin words have been incorporated into the Version, and that there are traces of Latin influence in the spelling of proper names, *e.g.* *Scariotus*. This view has been upheld by Marold in articles in *Germania* for 1880, 1881, but is disputed by Kisch,[*] Kauffmann,[†] and others.

---

* See also Wright, *Primer*, etc. p. 144: 'The fragments of the New Testament all point to one and the same translator, but the two small fragments of the Books of Ezra and Nehemiah differ so much in style from those of the New Testament that scholars now regard them as being the work of a later translator.'

† This information is largely taken from Stamm-Heyne's *Ulfilas* (ed. 9), Paderborn, 1896. The figures enclosed in brackets give the press-mark of the MS in the library to which it belongs.

‡ See Berger, *Histoire de la Vulgate*, p. 58.

§ Kauffmann (*Z. f. d. Philol.*, 1896) says the supposed fragment of Ezr 2^{18-42} is really Neh 7^{13-47}.

‖ See *Germania*, xiii. 271 ff.

¶ See note §, above.

* Nestle, *Einführung in d. Griech. NT*, p. 111 (see also Gregory, *Prolegomena* to Tischendorf's *NT*, p. 1111), mentions quotations of the Ep. to the Hebrews as found in the Commentary on St. John, mentioned above. A complete list of fragments of the NT is given by Gregory.

† *Z. f. deutsche Philologie*, 1896.

A second explanation of the relationship is that some of the Latin MSS, at any rate, have been revised from the Gothic. This theory is stated by Burkitt (*JThSt*, i. 1) in regard to the Latin MS known as *Codex Brixianus* (*f*). He refers to the curious preface found in that manuscript,—which had before been noticed, in this regard, by Stamm —*ideo ne . . . legenti videatur aliud in Græca lingua, aliud in latina vel gotica designata esse conscribta*, etc., and supposes that it may be the preface of a bilingual Gotho-Lat. MS, of the Latin of which *f* is a transcript. Burkitt then collects a number of peculiar readings of *f*, in which it differs from the Vulg. and Old Latin, and agrees with the Gothic, *e.g.* Lk 14^{32} 6^{7} etc. In a note he makes the same assertion of Gothic influence in the OL fragment of the Ep. to the Romans (*gue*), mentioned above. Kauffmann has fully examined the relation of the Gothic to the Latin, in the light of Burkitt's suggestion, in the last of the series of articles referred to, and the conclusions to which he comes[‡] are the following:—(1) About the year 410 a 'critical' edition of Ulfilas' Bible was prepared by the two Gothic clergy, Sunnias and Fretella; (2) the preface to this edition is handed down to us (not quite complete) in the *Codex Brixianus*, and formed the introduction to a bilingual (or perhaps trilingual) MS, in which certain variants of the translations were traced to their origin; (3) a fragment of this edition probably lies before us in the *Codex Carolinus*; (4) from this bilingual edition the *Codex Brixianus* arose, the original text of which is demonstrably that of a Gotho-Latin MS, and to which the text of the Gothic Gospels of the *Codex Argenteus* corresponds fairly exactly; (5) the *Cod. Arg.* and the *Cod. Brix.* sprang from that critical edition; even their calligraphical presentation shows they are related; in the 6th cent., about the same time and in the same part of Upper Italy, the Gothic Gospels on the one hand and the Latin Gospels on the other were separately derived from that archetype; (6) on the basis of the recension of Jerome's translation, which had then attained supremacy in Upper Italy,—and this may have been the reason for the whole transaction,—a redactor worked afresh over the Latin Gospels.

A third possibility is that the resemblance is due to the fact of both the Latin and the Gothic being based on Greek MSS belonging to the same family, and preserving the same type of text. Such a hypothesis will leave room for the differences as well as the resemblances of the two Versions.

It has to be added in regard to the general character of the translation that it is a close and accurate rendering of the Greek, though Ellicott notices in regard to its rendering of Ph 2^{6-8} a trace of those Arian views which characterized the Goths, especially in Spain. The 'Arianism of Ulfilas' has been discussed by Kauffmann in the articles already mentioned.

LITERATURE.—On Ulfilas: art. in *Allgemeine deutsche Bibliothek*; *Dict. Christ. Biogr. s.v.*; Monograph by C. A. Scott (Cambridge, 1885); artt. by Eckstein in Westermann's *Illustr. Monatsheft*, 1892, and Jostes in *Beiträge zur Gesch. der d. Sprache*, xxii. On the Gothic Version: Scrivener's *Introduction*, ii. 145 ff.; Gregory's *Prolegomena* to Tischendorf's *NT*, p. 1108 ff.; Nestle, *Einführung in das Griech. NT*, p. 110 ff.: *Urtext und Übersetzungen*, p. 119 ff.; art. in *Z. f. deutsche Philologie*, 1896–1900, and in *Germania*. The most serviceable edition is perhaps that of Stamm, the latest editions of which have been revised by Heyne, 9th ed., Paderborn, 1896. The edition of Bernhardt, *Vulfila oder die Gotische Bibel*, Halle, 1875, is very full in regard to the relation of the Gothic to the Greek text. There are also serviceable editions of separate books by Prof. Skeat; and a useful *Primer of the Gothic Language*, Clar. Press, 1899, by Prof. Wright.

C. **The Slavonic Version.**[*]—i. ORIGIN.—Our information as to the origin of the Slavonic Version is fairly definite, and generally trustworthy, at any rate in its main points. The two men whose names are connected with the beginnings of a Slavonic Version are Cyril and Methodius. They were sons of a Greek nobleman of Thessalonica, round which place there were a number of Slavonic settlers. The elder, Methodius, died in 885; the year of his birth is unknown. The younger, Constantine, was born in 827, took the name of Cyril when he became a monk, and died at Rome in 869. It is probable that from childhood they were acquainted with the Slavonic of their native district of Thessalonica, and tradition ascribes to Cyril the invention of the characters which from him are called Cyrillic, assigning as the date of this the year 855. The object of Cyril was to give the Bulgarian Slavs such parts of the Bible as were used in Church services in their own language. A little later the two brothers were summoned to Moravia, and to the period following on this, *i.e.* after the year 864, the beginnings of the Version are by many assigned. But Leskien and Polevoi[†] urge, and with reason, that the work probably began earlier, and was spread over a longer time.

In one of the legendary lives of Cyril[‡] we are told that he began his translation with St. John's Gospel, and soon completed a translation of the 'whole ecclesiastical cycle,' *i.e.* he translated first those parts of the Bible which were used for the Church services, both of the OT and NT. It is stated also in the life of Methodius that a translation of these selected parts preceded the translation of the whole; and John, exarch of Bulgaria, who is almost a contemporary, makes a similar assertion that Cyril first translated a 'selection,' and that Methodius and his brother translated 'the whole 60 books.' This translation may well have been completed before the death of Methodius, who survived his brother some time, though not, we may hope, in the short time of six months, as one authority states.

A much disputed question connected with the origin of the Version concerns the dialect into which the translation was made, and names eminent in Slavonic studies may be quoted as disagreeing. Thus Schäfarik, Leskien, and others say that the original Version was most closely allied to Old Bulgarian, while Kopitar, Miklosich, and Jagič connect it with Old Slovenish. It is possible that the various families of Slavonic had not, at the date of which we are speaking, begun to show the marks of difference found in later documentary evidence.

Another interesting literary discussion gathers round the alphabets which are met with in the early MSS. These are of two kinds. The one is known as the Cyrillic, and consisted of 38 letters, derived mainly from Greek, but also, in part, from Hebrew and other languages, and in part invented to express the peculiar nasal sounds found in Slavonic. The other alphabet is known as Glagolitic, and this is probably the older.

[†] *Z. f. deutsche Philol.* xxxi. 182.

[‡] *Ib.* 1900, xxxii. p. 335.

[*] For a fuller account of the origin and later history of the Slavonic Version, and its relation to modern Russian, the writer must refer to an article of his on 'the Russian Bible' in the *Church Quarterly Review* for Oct. 1895. Little new work has been done in Russia or elsewhere on this subject since that date.

[†] *History of Russian Literature*, p. 7.

[‡] See Ginzel, *Geschichte der Slawenapostel, Cyrill und Method.*, for details as to the documents in regard to Cyril and Methodius.

ii. THE MSS.—A few of the MSS are ascribed to as early a date as the 10th or 11th cent. by Jagič and other scholars, but these contain only the Gospels, either as complete texts or as lectionaries. The oldest MS of the complete Bible is that called after Gennadius, archbishop of Novgorod, and dated 1499.[*] As will be seen later, this contains a composite text, of very varying value and importance. The comparative absence of early MSS is explained by the widespread devastation caused by the Mongol invasions of the 13th and 14th cents. The records of the period before these invasions tell us of schools in which the Bible was studied, of copies of MSS of the Bible made by monks and professional scribes, of *catenæ* on the Psalms, the Prophets, the Gospels, and some of the Epistles,[†] and every page of the chronicles and other writings shows us how inwoven the Bible was into the texture of the language, and what a part it played in Russia, as elsewhere, in fixing the literary style. We find actual quotations of many of the OT books, *e.g.* of the Book of Proverbs, in the Chronicle of Nestor, which dates from the 11th cent.

The oldest MSS of any part of the OT are those of the Psalter, some of which go back to the 11th or 12th cent. Many of the books of the OT have been made the subject of monographs, in which details are given. Besides the editions of the Psalter by Sreznefski and Amphilochius may be mentioned studies in the text of Joshua, the Books of Kings, several of the Minor Prophets, and Isaiah.

Passing to the NT we find the Gospels preserved to us in a large number of MSS, many of which are lectionaries. Among them may be mentioned the *Codex Zographensis* and *Codex Marianus*, both written in Glagolitic characters, and the *Ostromir Codex*, written in Cyrillic, and dated 1056–1057. A critical edition of St. Mark, based on 108 MSS, has been published by Professor Voskresenski. He groups the authorities for the text in four main classes. The history of the next division of the NT, the *Apostol*, has been also carefully studied by the same author. MSS either of the continuous text, or of the parts used in services, go back as far as the 12th cent., and on these he published an elaborate monograph in 1879, and in 1892 produced a critical edition of the Epistle to the Romans based on 51 manuscripts, many of which only give the Church lections. The only other part of the NT which has been examined is the Apocalypse. The MSS of this book are fewer and later, but the earliest is ascribed by Oblak to the 13th century.

iii. THE TEXT OF THE VERSION AND ITS VALUE.—For the OT the MSS do not show any great or important variations, but the characteristics of the translation they contain are different in different parts. 'The Pentateuch shows signs of very great antiquity, and probably embodies fragments of the original translation. The Books of Joshua, Judges, and Ruth also represent an old translation. The Books of Samuel and Kings are less old and less exact. The Psalter is of course very old. Ecclesiastes and Sirach show a later but accurate translation. The Book of Job, Song of Songs, and the Prophets . . . show signs of glosses. While all the above were translated from the Greek, and the Book of Esther from the Hebrew, the Books of Chronicles, Ezra, Nehemiah, and the other books of the Latin Bible were translated from the Vulgate towards the end of the 15th cent., and embodied in Gennadius' MS [*i.e.* of A.D. 1499]. This text was adopted for the edition of the Bible published at Ostrog in 1581.'[*]

It will be seen from the preceding words that the value and interest of the Version varies in different parts of the OT. The only part which is of real interest is that based on the Greek, and, in regard to this, its relation to Lucian's recension is the most important point. This has been variously described, Lagarde asserting that Lucian was the basis of the Slavonic; Buhl, that the Slavonic resembles the B text. The writer has examined this point, but only over a limited area, in reference to Lucian's recension.[†] The results seem to vary in different books. The Slavonic text of the OT, in the books derived from the Greek, deserves a fuller and wider examination than it has yet received.

In regard to the NT the MSS of the Version are more numerous, and contain a number of variations. These are, for the most part, of interest only in regard to the history of the Version itself, and consist of modifications in orthography, the removal of archaisms, and the translation of Greek words which in the earlier recensions had been simply transliterated. To the student of Slavonic these variants present innumerable points of interest. They also point to differences between the underlying Greek text, which are of wider interest, and it is well here to point out that the ordinary printed text of the Russian or of the Slavonic Bible often fails to indicate the important readings found in the older MSS. Among the passages where the oldest MSS differ as to the Greek on which they are based, the following may be noticed: Lk 2^{3} 6^{1} 14^{24}, Jn 9^{8} 19^{14} 21^{15}.

It cannot be said that the Version has any great value for textual criticism, nor should we expect, remembering its close connexion with south-eastern Europe, to find it preserving a text of any uniform or great importance. Its chief value and interest are in connexion with the history of the development of the Slavonic language, and in this department it is not easy to exaggerate its importance.

LITERATURE.—This is for the most part in Russian. See Scrivener's *Introduction*, ii. 157 ff.; *Church Quarterly Review*, Oct. 1895, and the literature there referred to. Nestle, *Urtext*, etc., p. 211 ff., should also be consulted. There are numerous articles dealing with details of this subject in the *Archiv für Slavische Philologie*.

LL. J. M. BEBB.

VERSIONS, GREEK (other than the LXX).—It would seem from what has come down to us that many persons took in hand to make translations, if not of the whole of the Hebrew Scriptures, yet certainly of some books, and, as was natural, particularly of the Psalms. But, unfortunately, little remains except detached fragments. The longest passages of a continuous text still extant and already published are two passages from 1, 2 (3, 4) Kings (21 $[23]^{7-17}$ 23^{11-27}) and one from 1 (3) Kings (14^{1-20}), all attributed to Aquila. The former have been edited by F. C. Burkitt, the latter is quoted in its due order in Field's *Hexapla*. Unfortunately, very few fragments of Origen's *Hexapla* in its original form have been found; a considerable portion of the Psalter is, however, shortly to be edited by Dr. Mercati of the Vatican from a palimpsest in the Ambrosian Library at Milan. It is much to be wished that, amongst the treasures still perhaps remaining to be unearthed in Egypt and elsewhere, a copy of at least some portions of Origen's work might be discovered. For the present we are indebted for the most part to the marginal notes of Septuagintal MSS for the fragments which we do possess, the chief editors of which have been Montfaucon and Field. Fresh fragments are, however, being con stantly brought to light. A number are to be found in the third volume of Pitra's *Analecta Sacra*, and also in the 3rd volume of Swete's *OT in Greek*. The last fragments which have been published are the greater part of two verses of Gn 1, which is to be found in part i. of Grenfell and Hunt's *Amherst Greek Papyri*, and a fragment of Ps 21 (22) in Dr. Taylor's *Cairo Genizah Palimpsests* (Cambridge Press).

---

[*] This MS is now in the Synodal Library at Moscow, and is fully described by Gorski and Nevostruief in their description of the MSS in that library.

[†] For details of these writings see Philaret's *Review of Spiritual Literature from 862 to 1720* (in Russian).

[*] *Church Quarterly Review*, *l.c.* pp. 219, 220.

[†] *Ib.* cii. p. 388 f.

Considerable difficulties beset the student in his consideration of those fragments that still remain. (1) In various MSS the same words are ascribed in one case to one translator, in another to another; whilst in other cases, and sometimes very questionably, the same translation is attributed to all in common. (2) Owing to Origen's well-meant but unfortunate editing of the text of the LXX, and the loss of or confusion in the diacritical marks which he inserted in his text; and owing also to the various other recensions and re-editings which the text of the Septuagint has suffered from, we are quite in the dark as to how much of these other Greek versions may be embedded in our present Greek texts of the LXX. To take an instance. If with our present limited sources of information we examine the two chapters of the Book of Judges which relate the history of Deborah, and compare the Vatican text of the Cambridge edition with the fragments printed by Field, we shall find at least thirteen expressions (4^{11} [two] $^{14.\,21}$ $5^{1.\,14.\,16.\,21.\,26}$ [three] ^{29} [two]) attributed to versions other than the Septuagint. This may perhaps be an extreme case, taken as it is from a book in which the forms of the text vary so much, and as to which questions may be raised concerning the date of the special text, but it will at any rate serve as an illustration of how complicated the phenomena of the present Greek texts of the OT are. In other cases, where a double or even triple rendering of the Hebrew occurs, we shall probably not go wrong in assigning, at least in some cases, one or more of these alternative translations to other versions than the LXX.

Origen's great work itself seems to have taken various forms besides the most prevalent Hexaplaric one. We find mention of (*a*) a *Tetrapla*, containing the four Greek versions; (*b*) a *Pentapla* of doubtful content; (*c*, *d*) a *Heptapla* and an *Octapla*, which apparently contained the fifth and sixth anonymous Greek versions. Specimens of the way in which these were respectively arranged are to be found in Field's *Prolegomena* (pp. xiv, xv); while Mercati gives an actual extract from a Hexapla MS in his 'Un palimpsesto Ambrosiano' in *Atti di R. Accademia di Scienza di Torino*, April 10, 1896 (see also Taylor's fragment of Ps 21 [22] from the Cairo Palimpsest, printed on p. 444 of the present volume).

We pass to the separate translations and their authors.

(1) *Aquila's Version.*—There seems to be no good reason for doubting that this was certainly the oldest of these Greek versions. It most probably had its origin in a desire for a faithful and literal translation of the OT by an orthodox person holding the Jewish faith. The name Aquila is one familiar to us in the pages of the NT. The Aquila of our present notice, like his Scripture namesake, was a native of Pontus, and is said to have belonged to Sinope. He is called a proselyte, and the story goes that he made his translation in the reign of Hadrian (*c.* 130 A.D.) after the return of the Christians from Pella to that city. He is said to have been a pupil of the famous Rabbi Akiba. Attempts have been made to identify him with the Onḳelos of the Targum of Onḳelos, but they have not at present met with general acceptance.

In translating the OT, Aquila seems to have approached his task from the point of view of an orthodox Jew holding the plenary inspiration of every 'jot and tittle.' Accordingly, his aim was so to translate that for every Hebrew word or particle there should always be an equivalent. The results of his method sometimes become grotesque. Thus having translated גַּם by the Greek *καίγε*, when the conjunction is prefixed to גַּם and the word becomes וְגַם, Aquila translates *καὶ καίγε*. The particle את being identical with the preposition את is also translated *σύν*, so that we have such an extraordinary solecism as *σύν* followed by the accusative case.

How far Aquila is controversial against the Christians in any of his renderings is a matter of dispute. Tregelles considers this to be proved against him, whilst Field absolves him. The only passage which really seems to support Tregelles' view is Aquila's translation of Is 7^{14}, where for the *παρθένος* of the LXX he substitutes *νεᾶνις*, a much less definite word than *παρθένος*—a translation which would have the support of many modern Christian critics.

His translation shows few traces of any readings differing from the unpointed Hebrew text now in existence. In a few cases his division of Hebrew words is not the same. His vocalization, however, differs in a considerable number of instances from the Massoretes. As between *Ḳĕrê* and *Kĕthîbh*, he more often follows *Ḳĕrê*. It is to be noted also that he, together with Symmachus, follows the euphemism of the Hebrew margin in Is 36^{12}. In his choice of words to represent the Hebrew, Aquila goes far afield. He attempts to indicate the literal meaning of words by corresponding Greek words, *e.g.* *ἐπιστημονίζειν*. He draws, as other Greek writers of the period do, a certain portion of his vocabulary from the old Greek epic poetry. He also uses Greek words of similar sound to the Hebrew, instead of actually transliterating. He transliterates the tetragrammaton by the archaic form of the four Hebrew letters, a form which appears in Hexaplaric Greek MSS as ΠΙΠΙ (*PIPI*).

There would seem to have been two editions of Aquila's translation. In a few cases he may have altered his mind about the true reading of the Hebrew. Thus in Ps 89^{10} he appears to have read at first איש, afterwards חיש.

Specimens of passages in which the Latin Bible has been influenced by Aquila's version are to be found in Field's *Introduction* (p. xxiv).

For the longer story told by Epiphanius concerning Aquila, his relationship to Hadrian, and his conversion to Christianity, which he afterwards exchanged for Judaism, Epiphanius is our authority (*de Mens. et Pond.* 14), but it seems a very improbable tale, due perhaps in part to the view taken by Epiphanius of his translation. It is also to be found in the new 'Dialogue between Timothy and Aquila,' edited by F. C. Conybeare in *Anecdota Oxoniensia* (Class. ser. pt. viii.).

(2) *Symmachus' Version.*—The tr. of Symmachus occupied in the *Hexapla* the next column to that of Aquila. According to Epiphanius (*de Mens. et Pond.* 16), he was a Samaritan who turned Jew and then translated the OT Scriptures into Greek as a means of refuting the Samaritan errors. According to Eusebius (*HE* vi. 17) he was an Ebionite, and wrote a commentary on St. Matthew's Gospel. It is worthy of note, however, that, in the early chapters of Genesis, Symmachus seems to have followed the Samaritan chronology. The chief object of his version is to give a readable tr. of the Hebrew. To effect this he paraphrases Hebrew with Greek idioms, *e.g.* he replaces the *ἄνδρες αἱμάτων* of the LXX by *ἄνδρες μιαιφόνοι* (Ps 25 $[26]^{9}$ 54 $[55]^{24}$ 138 $[139]^{19}$). He does not consider it necessary always to render the same Hebrew word by the same Greek word. In places his translation becomes more of a paraphrase. He constantly gives translations of proper names: thus Ararat becomes Armenia. The influence of Symmachus, as of Aquila, is to be found in the Vulgate. In a few places mention is made of a second edition of this translation, but they are so few that little certainty exists that there actually was one. Like Aquila, Symmachus oscillates between *Ḳĕrê* and *Kĕthîbh*, and very seldom deviates from the consonantal part of the MT. Like the LXX, he explains away the bare anthropomorphic statement of the Hebrew, see, *e.g.*, Ex 24^{10} Heb. 'they saw the God of Israel' (Aq. *εἶδον τὸν θεὸν Ἰσραήλ*), for which LXX substitutes *εἶδον τὸν τόπον οὗ εἱστήκει ὁ θεὸς τοῦ* 'I., and Symmachus *εἶδον ὁράματι τὸν θεὸν* 'I. There is no reason why this Symmachus should be identified with the one mentioned in the Talmud (Bab. *Erubin*, 13*b*). The date of the translation is quite uncertain, but it is

probably to be assigned to the latter half of the 2nd cent. A.D. It shows an acquaintance with Aquila, but is thoroughly independent of it.

(3) *Theodotion's Version.* — Theodotion was of Pontus, according to Epiphanius (*de Mens. et Pond.* 17), and a follower of Marcion of Sinope, and afterwards became a Jewish proselyte. Irenæus also calls him a proselyte (*adv. Hær.* iii. 24), but describes him as an Ephesian. Jerome says that some called him an Ebionite, others a Jew.

His version has more of the character of a revision of the LXX than of an independent translation. So valuable was it held that in some cases, notably in the Book of Daniel, of which we possess the LXX version in only one copy (cod. 87), Theodotion's version supplanted the LXX. He included in his work the apocryphal parts of Daniel, the addition at the end of Job, the Bk. of Baruch, and the sections of Jeremiah which the LXX omits. He indulges more freely in the transliteration of Hebrew words than the other translators, though occasionally he finds himself able to give translations where the others fail.

His translation was probably made about A.D. 185. Traces of a Greek version of Daniel very like that of Theodotion go back as far as the NT.[*] This would lead us to imagine that just as we still have traces in other books of the OT of two Greek versions existing side by side, *e.g.* in Judges and still more in the Books of Esdras, so it is quite possible that there may have been two versions of Daniel and of some other books—a literal translation, and one which had more of the nature of a paraphrastic commentary.

(4) In addition to these translations there were at least *three anonymous versions* of at any rate parts of the Scriptures, known respectively as the Fifth, Sixth, and Seventh. According to Eusebius (*HE* vi. 16), Origen obtained the Fifth from Nicopolis near Actium. Epiphanius (*de Mens. et Pond.* 18), however, says that it was found hidden away in jars at Jericho, and assigns the Sixth version to Nicopolis. If we can depend upon the quotation of the Sixth version of Hab 3^{13}, the tr. must have been paraphrastic and made by a Christian. As to the Seventh translation, and even the certainty of its existence at all, there is much doubt. These three versions are most frequently quoted in the Psalms.

(5) The *Græco-Venetan* tr., a very late Jewish production, of which only one MS exists, need only just be mentioned. It does not include the whole of the OT. The best edition is that of Gebhardt (Leipzig, 1875).

For further information concerning the *Hexapla* and these versions see art. SEPTUAGINT.

LITERATURE.—Montfaucon, *Origenis Hexaplorum quæ supersunt* (1723); Field, *Origenis Hexaplorum quæ supersunt* (1875); Salmon, *Introd. to NT* (last edition); Swete, *Introd. to OT in Greek* (1900). For Aquila (fragments), Anger, *de Onkelo Chaldaico*; Burkitt, *Fragments of Aquila*; Taylor, 'Fragments' in *Sayings of the Jewish Fathers* ^{2} (1897), and Fragments of Ps. xxii. (1900), art. 'Hexapla' in *Dict. of Christian Biography*. For Symmachus and Theodotion see artt. *s.vv.* in *Dict. of Christ. Biog.* by Dr. Gwynn.

H. A. REDPATH.

VERSIONS.—In addition to the Versions treated in the preceding three articles, the following are dealt with in the present work under their respective titles: ARABIC VERSIONS, ARMENIAN VERSION, EGYPTIAN VERSIONS, ETHIOPIC VERSION, LATIN VERSIONS (THE OLD), SEPTUAGINT, SYRIAC VERSIONS, VULGATE.

VERY is still used as an adj. freely enough, but either intensively or to mark identity. The sense of 'true' (Lat. *verax*, through late Lat. *veraeus* and Old Fr. *verai*), or 'real' is no longer in use. We find this sense in AV Gn $27^{21.24}$ 'Art thou my very son Esau?'; Ps 5^{9} 'Their inward part is very wickedness'; Pr 17^{9} 'He that repeateth a matter separateth very (RV 'chief') friends'; Jn 7^{26} 'Do the rulers know indeed that this is the very Christ?'; Ac 9^{22} 'proving that this is very Christ' (RV 'the Christ'). This use of 'very' is common in Wyclif, as Jn $6^{32.33.55}$ 'my fleisch is verri mete, and my blood is verri drynke'; 15^{1} 'I am a verri vyne'; 17^{3} 'This is everlastynge liif, that thei knowe thee verri God aloone'; so Tind. 'that they myght knowe the that only very God.' So Erasmus, *Crede*, 76, 'It was no very deathe'; Elyot, *Governour*, ii. 161, 'Seneca saieth that very friendship is induced neither with hope ne with rewarde.' Sometimes the adj. with this sense has to be carefully distinguished from the adverb. Thus Udall's *Erasmus' NT*, ii. 280, 'Jesus Christ . . . is now already come, having receyved a very humayne body'; and Tindale, *Expos.* 230, 'Where faith is, there must the very good works follow.' Hall (*Works*, ii. 151) uses the compar. in the same sense, 'Surely they were not veryer lepers than we?'

J. HASTINGS.

VEX, VEXATION.—These Eng. words, as used in AV, express much more than petty annoyance. The following quotations will illustrate their force: *Vex*—Lk 8^{45} Tind. 'Master, the people thrust the and vexe (ἀποθλίβουσι, Gen. 'tread on,' AV 'press') the, and sayest thou, who touched me?'; 1 S 28^{21} Cov. 'And the woman went in to Saul, and sawe that he was sore vexed' (AV 'sore troubled'); Mt 9^{36} Rhem. 'And seing the multitudes, he pitied them because they were vexed' (ἦσαν ἐκλελυμένοι, AV 'fainted'; edd. ἦσαν ἐσκυλμένοι, RV 'were distressed'); Elyot, *Governour*, ii. 95, 'The first or chiefe porcion of justice (as Tulli saieth) is to indomage no man, onelas thou be wrongfully vexed' (Lat. *nisi laeessitus injuria*); Shaks. *Lear*, III. iv. 62, 'Do poor Tom some charity, whom the foul fiend vexes.' *Vexation*—Shaks. *Mids. Night's Dream*, IV. i. 74—

> 'Think no more of this night's accidents
> But as the fierce vexation of a dream';

Webster, *White Devil*, v. 2—

> 'There's nothing of so infinite vexation
> As man's own thoughts.'

But the force of the words in AV can be best seen by examining the original words so translated. In OT sixteen verbs (and one subst.) are translated 'vex.' These are—1. [*Bāhal*] (Ps 2^{5} $6^{2.3.10}$), which in Piel (Ps 2^{5}) is usually translated in AV 'trouble,' but means 'dismay' or 'terrify'; in Niph. (Ps $6^{2.3.10}$) 'be disturbed,' 'dismayed.' In his *Par. Psalt.* Driver has uniformly 'dismay' or 'be dismayed.' 2. [*Dāḥaḳ*] (Jg 2^{18}), elsewhere only Jl 2^{8} of the crowding, thrusting of locusts, but common in Aramaic. 3. *Hāmam* (2 Ch 15^{6}), to make a noise, and so 'discomfit,' 'distress,' as in Ex 14^{24}, where 'the Lord troubled (RV 'discomfited') the host of the Egyptians.' 4. *Zûa'* (Hab 2^{7}), to tremble (as an old man shakes, Ec 12^{3}): here it is Pilp., and Davidson translates 'shall violently shake thee'; it is used figuratively of the foes of Babylon as the instruments of Jehovah's judgments. 5. [*Yāgah*] (Job 19^{2}) in Hiph. means to cause grief, Davidson 'afflict,' who adds, 'the words suggest the crushing effect which the friends' insinuations of wickedness had on Job's spirit.' 6. [*Yānāh*] (Ex 22^{21} RV 'wrong'; Lv 19^{33} RV 'do wrong'; Ezk 22^{7} RV 'wrong' ^{29}) = 'oppress,' 'maltreat,' esp. the stranger [see GER] or the poor by the wealthy and powerful. 7. *Ka'aṣ* (Ezk 32^{9}) in Hiph. = 'provoke,' as Peninnah provoked Hannah (1 S 1^{7}), but esp. used of provoking Jehovah to anger. 8. *Mārar* (Job 27^{2}) in Qal 'to be bitter,' as 2 K 4^{27} 'her soul, it is bitter to her': here Hiph. = 'embitter,' 'Shaddai who hath embittered my soul' (*Oxf. Heb. Lex.*). Cf. Ru 1^{20} 'The Almighty hath dealt very bitterly with me.' 9. [*'Āẓabh*] (Is 63^{10} RV 'grieve') in Piel = 'cause pain.' 10. *Ẓarar* (Lv 18^{18}, Nu $25^{17.18}$ 33^{55}, 2 S 13^{2}, Is 11^{13}, Neh 9^{27}). This verb is to press (perhaps lit. in Lv 18^{18} though RV 'to be a rival'), press together, then fig. to oppress, persecute. In Neh 9^{27} (Hiph.) to afflict (RV 'distress') on the part of enemies. 11. [*Ḳûẓ*] (Is 7^{6}) = fear, here in Hiph. = put in fear, of a city by besieging it. Cf. 1 Mac 15^{14}. 12. [*Ḳāẓēr*] (Jg 16^{16}), lit. 'be short,' here of one's spirit, *i.e.* to have one's patience exhausted, AV and RV 'His soul was vexed unto death,' Gen. 'His soul was peined unto the death.' 13. *Rā'a* (Nu 20^{15}) in Hiph. to 'do evil,' to 'evil entreat' (so RV here, as AV in Ex 5^{22}, Dt 26^{6}, Amer. RV 'deal ill with'). 14. עָשָׂה רַע *'āsah ra'* (2 S 12^{18})='do evil,' AVm 'do hurt,' here to oneself by grief. 15. *Rā'aẓ* (Jg 10^{8})—'They vexed and oppressed the children of Israel,' Moore 'they broke and crushed.' It is the same verb that in Jg 9^{53} is translated 'and *all to brake* his skull.' 16. *Rāsha'* (1 S 14^{47}), lit. 'be wicked'; here Hiph.='declare wicked,' 'condemn,' 'punish,' if the text is correct, which is doubtful, see Driver's note. Amer. RV 'put them to the worse.'

---

[*] For traces of a version of other books than Daniel similar to that of Theodotion see Swete's *Introd.* p. 48, n. 3.

The subst. *mĕhûmah*, 'vexation,' is translated by the verb in Ezk 22^{5} AV 'much vexed,' RV 'full of tumult.' Besides *mĕhûmah* (Dt 28^{20}, 2 Ch 15^{5}), 'vexation' is the tr. of (2) *zĕwā'āh* (Is 28^{19}); (3) *sheber* (Is 65^{14}); (4) *rĕ'uth* (Ec 1^{14} $2^{11.17.26}$ $4^{4.6}$ 6^{9}), and (5) *ra'yôn* (Ec 1^{17} 2^{22} 4^{16}). RV gives for (1) 'discomfiture' in Dt 28^{20}, retaining 'vexation' in 2 Ch 15^{5}; for (2) 'terror'; for (3) it retains 'vexation'; for (4) and (5) gives 'striving.'

In Apocr. and NT we find thirteen different Gr. words rendered in AV by the verb to vex ('vexation' does not occur). 1. βασανίζω (2 P 2^{8}), which is tr. 'torment' elsewhere except Mt 14^{24} ('tossed,' RV 'distressed'), Mk 6^{48} ('toiling,' RV 'distressed'), Rev 12^{2} ('pained,' RV 'in pain'). The verb means originally to test metals by the touchstone (βάσανος). 2. δαιμονίζομαι: Mt 15^{22} ἡ θυγάτηρ μου κακῶς δαιμονίζεται, 'my daughter is grievously vexed with a devil.' The verb means to be possessed by a demon. 3. ἐλαύνω: Wis 17^{15} τέρασιν ἠλαύνοντο φαντασμάτων, 'were vexed with monstrous apparitions,' RV 'haunted': in 16^{18} the same word is tr. 'persecuted,' RV 'chased.' 4. θλίβω: 1 Mac 15^{14} 'he vexed the city by land and by sea.' Cf. Mt 7^{14} τεθλιμμένη ἡ ὁδὸς ἡ ἀπάγουσα εἰς τὴν ζωήν, lit. 'a compressed (hemmed in, straitened) way is that which leads to life.' 5. κακόω: 2 Mac 5^{22}, Ac 12^{1} RV, in both 'afflict.' The word means to do harm (κακόν) to, as Ac 18^{10} 'No man shall set on thee to hurt (RV 'harm') thee.' 6. καταπονέω: 2 P 2^{7}, lit. 'to exhaust with labour' (πόνος). Found also in Ac 7^{24} EV 'oppress.' 7. λυπέω; Bar 2^{18} 'the soul that is greatly vexed,' λυπουμένη, lit. 'grieved,' 'made sorrowful.' 8. ὀχλέω: Lk 6^{18}, Ac 5^{16}, both 'vexed with evil spirits.' In Luke edd. read ἐνοχλούμενοι, RV 'troubled.' The word means lit. to rouse a mob (ὄχλος) against one. The same verb is used in To 6^{7} of 'a devil or evil spirit' troubling one. 9. παροργίζω: Sir 4^{3} καρδίαν παροργισμένην, 'a heart that is vexed' (RV 'provoked,' as AV in Ro 10^{19}, Eph 6^{4}). 10. πάσχω: Mt 17^{15} κακῶς πάσχει, 'he is sore vexed'; RV 'suffereth grievously.' 11. περισπάω: Sir 41^{2} Ὦ θάνατε, καλόν σου . . . τῷ περισπωμένῳ περὶ πάντων, 'to him that is vexed with (RV 'distracted about') all things.' In NT the verb occurs only Lk 10^{40} 'Martha was cumbered (RVm 'distracted') about much serving.' 12. ταράσσω: 1 Mac 3^{5}, RV 'trouble,' as the word is often tr. in AV in the Gospels and 1 P 3^{14}. In the identical phrase (οἱ ταράσσοντες τὸν λαόν) in 1 Mac 7^{22} the word is tr. 'troubled.' 13. τρύχομαι: Wis 11^{11}, RV 'distress'; elsewhere in Bibl. Greek only 14^{15}, AV 'afflicted,' RV 'worn.'

J. HASTINGS.

VILE.—'There are many places in the Bible in which *vile* is not meant to convey the idea which it now possesses of what is physically and morally detestable, but has simply the force of the Latin *vilis*, properly *cheap*, and then *common, lightly esteemed*, or at most *looked down upon*. This, no doubt, is the sense which the Translators of 1611 intended to express in Ph 3^{21}; for the Greek is ταπείνωσις, *lowliness, low estate*—as it is rendered in the *Magnificat*, "the lowliness, or low estate, of his handmaiden"; and the contrast is simply between the lowly earthly body which we at present bear, and the future glorified body which has been made like unto the risen body of Christ.'—Driver in *Expos. Times*, Jan. 1902, xiii. 167.

This earlier meaning of 'vile' is seen in Erasmus, *Crede*, 106, 'He whome thou despysest as vyle borne, is thy brother'; p. 137, 'Thou being proude of the palace, doste mocke and skorne the vyle and homelye cotage of the pore man'; Udall, *Erasmus' NT*, ii. 29, 'The heavenly father dooeth garnishe and clothe so freshely the vile grasse, which shortely shall perishe'; Ridley, *Brefe Declaration*, 122, 'The crafte either of fyshyng, whiche was Peter's; or of makynge of tentes, which was Paules, were more vile then the science of phisicke [which was Luke's].' But the word had already a stronger meaning than this. Thus *Preface to AV*, 'Ebionites, that is, most vile heretikes'; Golding, *Calvin's Job*, 582, 'Thou vile toade.'

The examples of 'vile' in AV may be classified thus—

1. *Common, paltry, of small account*, Ps 12^{8} (*zulluth*); Jer 15^{19}, La 1^{11} ([*zālal*]); Jer 29^{17} (*shō'ār*); Wis 11^{15} (εὐτελής, RV 'wretched'), 13^{14} (εὐτελής, RV 'paltry'); Ph 3^{21} (ταπείνωσις); Ja 2^{2} (ῥυπαρός).

2. *Despicable, contemptible* (with *moral* reprobation), Dt 25^{3} (*ḳālāh*); 1 S 3^{13}, 2 S 6^{22}, Job 40^{4} (RV correctly 'of small account'), Nah 1^{14} (all *ḳālal*); 1 S 15^{9} ([*nĕmibzāh*] *nibzāh*); Dn 11^{21} (*bāzāh*).

3. *Shameful, abominable* (with *religious* as well as moral reprobation, almost equivalent to *impious*, see FOOL), 2 S 1^{21} (*gā'al*); Job 18^{3} (*ṭāmāh*); Wis 4^{18} (ἄτιμος); 2 Mac 15^{32} (μιαρός); Ro 1^{26} (ἀτιμία).

AV mistranslates Job 30^{8}: render as RV 'They are scourged out of the land' (the verb is [*nāka'*], to smite).

J. HASTINGS.

VILLAGE.—The earliest Oriental village probably arose in the transition from nomadic to settled life. Interests centring in a particular locality called for more constant residence; and in course of time the tent, best suited to the moving life, would give place to the hut or house, the encampment to the village. The name חַוֹּת (ἐπαύλεις) in חַוֹּת יָאִיר (*Ḥavvoth-jair*, Nu 32^{41} etc.), applied to smaller towns or villages, agrees with this idea. Abulw. connects it with Arab. *ḥayy*, 'tents of a clan' (cf. Arab. *ḥiwā'*, 'group of tents'). The term, which formerly denoted the temporary dwellings, would naturally be applied to the more permanent settlements (Moore, *Judges*, p. 274; W. R. Smith, *RS*^{2} p. 281). The common word for village, חָצֵר (ἔπαυλις), primarily 'an enclosure,' is sometimes used for the open dwellings of the nomads (Gn 25^{16}, Is 42^{11}). כָּפָר (κώμη, Ca 7^{11}, 1 Ch 27^{25}, כְּפִיר Neh 6^{2}, כֹּפֶר 1 S 6^{18}), 'a hamlet' or 'village,' appeared in Palestine with the advent of Aramaic, and still persists in such place-names as *Kefr Kennah*, *Kefr Sabt*, etc. Other words are פְּרָזוֹ (δυνάστης, Hab 3^{14} RV 'warrior,' RVm 'hordes' or 'villages'); פְּרָזוֹן (δυνατός, Jg $5^{7.11}$ RV 'ruler,' RVm 'village'); פְּרָזוֹת (Est 9^{19} LXX ἐν πάσῃ χώρᾳ τῇ ἔξω, EV 'unwalled towns'; Ezk 38^{11} ἐπὶ γῆν ἀπερριμμένην, EV 'unwalled towns,' RVm 'an open country'; Zec $2^{4(8)}$ κατακάρπως, AV 'as villages without walls,' RV 'as towns without walls'), which seems to denote the places in open, level country, as distinguished from fortified cities (cf. Arab. *farz*, 'plain'); cf. פְּרָזִי=*peasantry*, 1 S 6^{18}, Dt 3^{5}, Est 9^{19}.

The distinction between *city* (עִיר or poet. קִרְיָה) and *village* is carefully observed throughout the OT. The city was an inhabited, walled place; the village, not so protected, was probably always subordinate to the city. This relation of dependence appears to be indicated by the term 'daughters,' *e.g.* אֶת־קְנָת וְאֶת־בְּנֹתֶיהָ (Nu 32^{42}, cf. Jos 17^{11} etc.), by the phrase 'the cities and their villages,' הֶעָרִים וְחַצְרֵיהֶן (Jos 13^{23} etc.), and is implied in the designation 'a mother in Israel,' applied to the chief town of a district (2 S 20^{19}). This subordination was maintained in later times (1 Mac 5^{8} τὴν Ἰαζὴρ καὶ τὰς θυγατέρας αὐτῆς, cf. 5^{65}). While the city was the chief seat of authority in a district, the smaller towns and villages seem to have been dependent on the larger. On the E. of Jordan, and especially in Trachonitis, μητροκωμίαι are frequently met with, that is, villages holding a position corresponding to that of a capital town. Thus Phæna, the modern *Musmîyeh*, is called μητροκωμία τοῦ Τράχωνος (*CIG* 4551). In NT and Josephus the ideas of πόλις and κώμη are uniformly distinguished; but in the Greek period the point of distinction came to be, not so much size or fortification as constitution and law, which differed in city and village. St. Mark, who notes the numerous towns and villages in fertile Galilee, mentions (1^{38}) κωμοπόλεις, a word used by Strabo and Byzantine writers, denoting towns which for size might be called πόλεις, but in constitution ranked only as κῶμαι. Jos. (*BJ* III. iii. 2) speaks of many villages in Galilee, the smallest of which contained 15,000 inhabitants. If we are to credit these figures, κώμη must be taken to include the surrounding district and suburbs. The Mishna distinguishes (1) כְּרַךְ 'a large city'; (2) עִיר 'a city'; and (3) כְּפָר 'a village' (*Megilla* i. 1, ii. 3; *Kethuboth* xiii. 10; *Kiddushin* ii. 3; *Baba meẓia* iv. 6, viii. 6; *Arachin* vi. 5). The first and second differed only in size. While כְּרַךְ='a fortified city,' small towns were often similarly protected (עִיר חוֹמָה, *Arachin*

ix. 3 ff.; *Kelim* i. 7), כְּפָר being the open village (Schürer, *HJP* II. i. 154 ff.).

Villages in Palestine to-day are related in the same way to the towns. Thus *el-Mejdel*, *Ḥaṭṭîn*, *el-Lubiyeh*, etc., are under the jurisdiction of Tiberias. All actions, civil and criminal, and all matters affecting taxation and military service, come before the authorities in that town. The sheikh, or chief man, exercises considerable influence among the inhabitants, and with him, in the first instance, the authorities treat in all that concerns his community.

The villages are the centres of agricultural industry. The surrounding land is frequently common property. All share in its cultivation. When deductions have been made for taxes, etc., the produce is divided according to local arrangement. In other cases the villagers till the soil for a landlord or company, and then a certain percentage of the crops is allowed them in payment.

Nearly all the villages in Palestine are of ancient date. They often stand on the sites, and are built from the ruins, of cities not seldom great and splendid in the past. There is something both grotesque and pathetic in the appearance of Corinthian capital and sculptured stone in the walls of mud-plastered huts. Positions difficult of access are much prized for defence against marauding bands. There are, of course, no scattered dwellings or solitary farm-steadings, which would be too easy a prey to plunderers.

The village life is mean and squalid. The houses as a rule are of but one apartment, in which, along with the family, their animals find nightly shelter. Sanitation is unknown, and the villages are hotbeds of fever. In some it is ascribed to an intervention of *Allah* when a child survives infancy. Oppressed by rapacious tax-gatherers backed by a brutal soldiery, often loaded with debt they can never hope to pay,—interest on which is a first charge upon their yearly pittance,—the spirit is crushed, and there is little inducement to work for improvements the fruits of which would infallibly be seized by others. They put little into the soil; their houses are frail; their furniture scanty; they live practically 'from hand to mouth,' and bear themselves like men who may at any moment receive notice to quit.

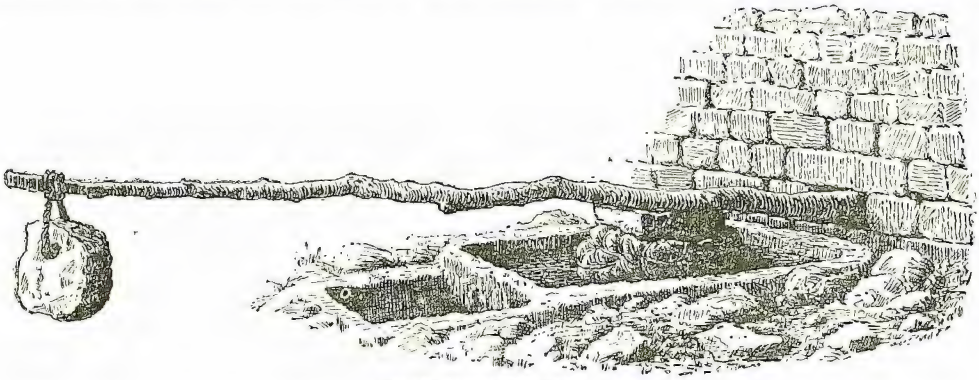
The villagers in Palestine mostly rank as Moslems, orthodox or heretical; but there is much obscurity as to their real religious sentiments and practices. Usually a *makâm*, the tomb or sanctuary of some saint or famous sheikh, stands near by or on a neighbouring hill. It serves as a kind of village strong-room. Although it is quite open, no one dreams of removing what has been placed there for safety. A common responsibility for hospitality is also recognized. In every village there is the *menzîl* or *meḍâfy*, 'village guest-house,' where all strangers are welcome. The sheikh acts as 'host,' but the villagers contribute each his share towards the entertainment of the guests. W. EWING.

VINE, VINEYARD.—Three Heb. words are tr. in EV 'vine.' 1. גֶּפֶן *gephen*, Arab. *jafn*. This always refers to grape-bearing vines, except 2 K 4^{39}, where גֶּפֶן שָׂדֶה the 'vine of the fields,' AV and RV 'wild-vine,' refers to a wild gourd-vine, prob. colocynth, and perhaps Dt 32^{32}, where גֶּפֶן סְדֹם 'the vine of Sodom' may denote a grape-vine, or some other plant (see 'vine of Sodom,' below). 2. שֹׂרֵק *sôrēḳ* (Is 5^{2} 'choicest vine'), שׂוֹרֵק (Jer 2^{21} 'noble vine'), שֹׂרֵקָה *sôrēḳah* (Gn 49^{11} 'choice vine'), used of a superior kind, producing dark-coloured grapes, with soft seeds or none. It is called in Arab. *ṣûrîḳ*. 3. נָזִיר *nāzîr* (Lv 25$^{5. 11}$ AV 'vine undressed,' m. 'separation,' RV 'undressed vine'), fig. for unpruned vine, named *nāzîr* from its resemblance to the Nazirite, whose hair was uncut and unshaven.

The vine is one of the most important plants mentioned in the Bible and cultivated in the East. Noah planted a vineyard (Gn 9^{20}). The chief butler saw a vine in his dream (Gn 40^{9}). Judah is represented as binding his ass to a vine (Gn 49^{11}), an allusion to the luxury in which he would live. Living under one's own vine and fig tree (1 K 4^{25}, Mic 4^{4}) was an emblem of peace. The languishing of the vine (Is 16^{8} etc.) was an emblem of destruction and desolation. Palestine was a land of vines (Dt 8^{8}). They were planted on mountains (Jer 31^{5}). They flourish best there at the present day. The NAZIRITE, as being under a religious vow, was to 'eat nothing that is made of the grape-vine, from the kernels even to the husk' (Nu 6^{4}). Manoah's wife, as the future mother of a Nazirite, was also forbidden for a time to eat or drink of the fruit of the vine (Jg 13^{14}). The vine is frequently associated with the fig (Ps 105^{33}, Jer 8^{13}, Hab 3^{17}, Ja 3^{12} etc.). Christ calls Himself the true vine (Jn 15$^{1-5}$). There are several other figurative allusions to the vine and vineyard. Israel was a vine brought out of Egypt (Ps 80$^{8-14}$, Is 5$^{1-5}$). The fruitful wife was compared to the vine (Ps 128^{3}). The remnant of Israel was to be gleaned as a vine (Jer 6^{9}). Samaria was to be as plantings of a vine (Mic 1^{6}). Beth-haccherem, 'the house of the vine' (Neh 3^{14}, Jer 6^{1}), Abel-cheramim, 'the meadow of vineyards' (Jg 11^{33}), were named from *kerem* = 'vine.'

The vine is cultivated in a variety of ways. Sometimes it is trained over a trellis, or made to climb a tree (Ezk 19^{11}). In this way a man sat under his vine (1 K 4^{25} etc.). Sometimes it is trained over props about the height of a man, or a little higher, and the branches spread laterally, often forming festoons from stake to stake. But the more usual method is to allow the stem to trail on the surface of the soil, and simply to prop up the cluster-bearing branches by forked sticks, sufficiently to keep them off the ground. The vines in both the latter methods of cultivation are planted far enough apart to allow the plough to pass between them. They are pruned at the end of the fruiting season (Jn 15^{2}), so that, during the winter, the vine is reduced to a trunk and a few principal branches. The shoots of the next spring are thus made more vigorous, and bear better fruit. Those branches which bear no fruit are diligently cut away (vv.$^{2. 6}$). A whitened branch is a sign of withering (Jl 1^{7}). The trunks of old vines often attain the thickness of a man's body or more. Vines are sometimes planted in irrigated ground (Ezk 19^{10}), but most of the vineyards are on dry hillsides, where, for 7 or 8 months they have no water except such as they can extract from the apparently arid soil. Notwithstanding this, they live (Ezk 19^{13}). In such situations as have a moist subsoil of clay or marl they flourish without irrigation, and produce large vintages. Whole mountain-sides are often green with vineyards, where one may search in vain for a spring or well. They are often not fenced off, so one can come with ease into a 'neighbour's vineyard' (Dt 23^{24}). To protect the vines from foxes, jackals (Ca 2^{15} etc.), and esp. from men, watchmen are stationed in commanding positions. In Judæa and some other parts of the country round towers are built for the watchmen (Is 5^{2}, Mt 21^{33} etc.). Generally a shelter of boughs and leaves (Is 1^{8} AV 'cottage,' RV 'booth'), similar to the 'lodge in a garden of cucumbers' (see illustration in vol. i. 532^{a}), is constructed in a prominent place, from which the watchman can overlook the vineyard. To frighten away animals, a single cylindrical stone is set up, or several stones are placed one above another, forming a pillar 3 to 4 ft. high. The top of this pillar is often whitewashed, so that it is conspicuous even at night. The large numbers of these pillars make a marked feature in the Oriental landscape. Vineyards are let out (Ca 8^{11}, Mt 21^{33}), or cultivated on the metairial principle on shares. The close association of vine and fig trees in the minds of the people of Palestine is shown by the fact that both a fig orchard and a vineyard are designated in Arab. by the term *karm* (the same as the Heb. כֶּרֶם), which primarily signifies a vine.

Grapes.—A great variety of grapes are cultivated in Palestine and Syria. There is one greenish-white, from ½ to ⅝ in. in diameter, with sweet juicy pulp; another, olive-shaped and white, resembling Malaga grapes; another, dark purple, of the size of a small prune; others similar to Black Hamburgs; others with a green rind, striped with red, and a pulp almost as firm as that of an apple; others nearly the same as the famous Zante currants; others closely resembling the Isabella grape; and many others of divers shapes, sizes, and flavours. Several Heb. words are used to designate them. **1.** אֶשְׁכּוֹל *'eshkôl*, which signifies a cluster, usually of grapes (Is 65^8, Mic 7^1), in which case greater precision is sometimes given by constructing it with עֲנָבִים (Nu 13^{23}), or associating it with the same (Gn 40^{10}), or constructing it with *gephen* (Ca 7^8 [Heb. ^{9}]). It is sometimes used of other things, as gall (*mĕrôrôth*, Dt 32^{33}), and *henna* (Ca 1^{14}). **2.** עֵנָב *'ēnāb*, Arab. *inab*. This is the true word for the berry, as distinguished from the cluster (Gn 40^{10}, Nu 13^{23}). Wine is דַּם־עֵנָב=blood of grapes. **3.** בֹּסֶר *bōṣer*= unripe grapes. The Arabs of Syria use the term *ḥuṣrum* for green grapes. *Bōṣer* is tr. in AV 'sour grapes' (Is 18^5 RV 'ripening grapes'), AV and RV 'unripe grapes' (Job 15^{33}), AV and RV 'sour grapes' (Jer 31^{29}, Ezk 18^2). The seed, 'kernel,' of the grape is mentioned, and its skin, 'husk' (Nu 6^4).



MODERN SYRIAN WINEPRESS.

Vintage.—The vintage is a season of great rejoicing in the East (Is 16^{10}). It begins in low-lying districts in July. The people eat the green grapes (*bōṣer*) even in June. They also express the acid juice of the same, and sweeten it, and add water, to make a cooling drink. The nearly ripe but still acid grapes are slightly laxative, and the grape cure is as well recognized here as a course of mineral waters in Europe or America. But when the grapes are quite ripe, in August or September, the rejoicing is complete. The people go in large numbers to gather the grapes, and eat them in the vineyards (Jg 9^{27}). The quantity which one person consumes is enormous. It is curious to see a man with a huge bunch of grapes in his hand, held a little above his head, with his neck bent backward, and his free hand plucking the grapes, singly or in pairs, and tossing them into his mouth as fast as his hand can move. The luscious fruit is crushed by the tongue and teeth, and swallowed with extraordinary rapidity. The peasants declare that, however many grapes they may have eaten in this way, in the vineyards, their appetite for their regular meals is in no way diminished. The grapes are carried home to serve as food, or spread out on mats to be dried into *raisins*, צִמּוּק *ẓimmûḳ* (1 S 25^{18} etc.), אֲשִׁישׁוֹת *'ăshîshôth* (RV Ca 2^5, AV wrongly 'flagons'), or the juice expressed to be converted into wine or dibs. The latter is the juice of the grape, boiled to the consistence of thick treacle, and set aside to cool into a mass resembling in appearance candied honey. It is not true that this substance is anywhere used or known as wine. In its commercial form it is no more a beverage than crystallized honey, and no one here ever saw or heard of any one diluting it and using it as a drink. Much less is any such dilution known as wine. Baskets (Jer 6^9) were, and are still, used to gather the grapes and transport them to the houses or presses. The juice is trodden out (Is 16^{10} 63^3, Jer 25^{30} etc.). The presses were often dug out in the marly soil (Mt 21^{33}), or excavated in the solid rock. Such rock vats are common throughout Palestine. The boiling of the *misṭâr* (fresh grape juice) is done in large caldrons. *Misṭâr* is sometimes drunk. The name, as applied to this fresh juice, is, however, a popular error, as that word signifies a true fermented wine. The grape juice is never called in Arab. by any of the other names for wine, these names being applied solely to the fermented juice of the grape, date, or other fruit.

Vine of Sodom (גֶּפֶן־סְדֹם *gephen Sĕdôm*) occurs once (Dt 32^{32}), 'their vine is as the vine of Sodom, and of the fields of Gomorrah; their grapes are grapes of gall (*rôsh*), their clusters are bitter' (*mĕrôrôth*). If real plants are intended here, these must have been familiar to the Hebrews, and, if not peculiar to the Dead Sea Valley, at least so abundant there as to be designated by the names of the accursed cities. We have, as a philological guide to the plant intended, the term *gephen*, which certainly refers to a vine. The second member of the parallelism speaks of the fruit as 'grapes of gall' (*'innebê-rôsh*), and its clusters as bitter (lit. bitternesses). We are therefore to look for a vine growing so abundantly in the Dead Sea basin as to be attributed to Sodom and Gomorrah, and producing a bitter but grape-like fruit. The first embarrassment in the determination of this plant is the assumption that it is the same as the fruit of which Josephus speaks, the so-called 'apples of Sodom' (*BJ* IV. viii. 4), 'the ashes growing in their fruits, which fruits have a colour as if they were fit to be eaten, but if you pluck them with your hands they dissolve into smoke and ashes.' This description would apply either to the fruit of the *ʿushr, Calotropis procera*, Willd., or to that of the colocynth, Arab. *ḥondol*. Both of these have fruits, about the size of a pippin, which, when ripe and dry, contain a dust, which would suggest the 'dust and ashes' of Josephus. The *ʿushr*, however, is not a vine, but a small shrub or tree, and its fruit has no resemblance to the grape. The colocynth is a vine, but it grows over a wide range in Palestine besides the Dead Sea Valley, and its fruit also has no resemblance to a grape. It is like a small water-melon when green. We therefore, while accepting one or both these plants as producing the fruit alluded to by Josephus, unconditionally reject them both as candidates for the 'vine of Sodom.' *Cucumis prophetarum*, L., a tendril-bearing vine, growing in the Dead Sea Valley and southward to Sinai, and having an ovoid, bitter fruit, ½ to ⅜ in. long, might be a candidate, were it not for the fact that its fruits do not grow in clusters. On the other hand, *Solanum nigrum*, L., and *S. miniatum*, Berb., and *S. villosum*, Lam., produce clusters of berries like very small grapes. These are called by the Arabs *ʿinab-edh-dhib*= wolf's grapes. But they are none of them vines, and none of them peculiar to the Dead Sea Valley. *S. coagulans*, Forsk., although peculiar to the Dead Sea and Jordan Valley, is not a vine, and has fruits like a small tomato, not like a grape. Oak galls cannot be intended. They are not produced in this valley, are not clustered, and bear no resemblance to a grape. We must conclude, therefore, that we have as yet no evidence on which to found a theory as to the plant intended by the *vine of Sodom*. We (with commentators generally) think that the allusion is figurative, and that the quality of bitterness is attributed to the grape-vine of the enemies of Israel, as their wine is said in the following verse to be 'the poison of dragons, and the cruel venom of asps.' The selection of the vine of Sodom and Gomorrah, of which their vine is said to be a shoot, was due to the proverbial bitterness of the Dead Sea, a quality which may have been supposed to be communicated to what grew on its shores. We have a similar instance (Ezk 17[3-10]) in the rhapsodical riddle of the great eagle, which plucked off a topmost shoot and twigs of the cedars of Lebanon, and set them in a city of merchants, and took of the seed of the land, and set it as a willow-tree, and it grew and became a vine of low stature, and shot forth branches towards the furrows, that it might bear fruit. And the roots were pulled up, and the fruit withered. Here we have a combination far more intricate and unreal than that of the 'vine of Sodom,' to which the bitterness of the Dead Sea water is attributed, and the wine from the same, which is said to be serpent's venom.

G. E. Post.

VINEGAR (חֹמֶץ *ḥōmez̦*; ὄξος, *acetum*).—A sour liquid, mentioned 5 times in OT and 5 times in NT. The vinegar of Scripture is wine which has undergone the acetous fermentation caused by the presence of a ferment plant (*Mycoderma aceti*), whereby its alcohol is converted into acetic acid. Besides this 'vinegar of wine' there is also mentioned 'vinegar of strong drink' (*shēkār*, Nu 6[3]), which is produced by the fermentation of palm juice or any other saccharine fluid. Both these forms of drink were forbidden to the Nazirite (Nu 6[3]).

This fluid was used as a relish, 'without which we should miss many of the comforts of civilized life' (Pliny, xiv. 25). Into it food was dipped before eating (Ru 2[14]). A diluted vinegar or sour wine was used as a drink by the poorer classes (Aristoph. *Acharnæ*, 35), and especially by soldiers. Pescennius Niger forbade his Ethiopian troops to drink anything else (Spartianus in *Hist. Aug. Script. minores*, ii. 180). The vessel of vinegar which the Roman soldiers had by them at the Crucifixion (Jn 19[29]) was probably filled with this drink, which was called *posca*. It was not regarded as intoxicating (Plautus, *Miles gloriosus*, iii. 836). The Greek medical writers, Oribasius and Aretæus, call it ὀξύκρατον. *Posca* and oil are recommended in veterinary medicine for wounds by Vegetius, iii. 48, vinegar being, as Plutarch says, the most cooling of fluids (*Quæst. conviv.* iii. 5). Cf. the use of wine (οἶνος) and oil by the good Samaritan (Lk 10[34]) to cleanse the wounds of the robbers' victim.

In the accounts of the Crucifixion given by the four Evangelists vinegar is mentioned, but in each case in a slightly different connotation. According to Mt 27[34] (AV), the soldiers offered our Lord vinegar mingled with gall (RV has 'wine,' following ℵBD). This was a different drink from the vinegar subsequently given Him on a sponge (v.[48]), which was probably *posca*. Mark mentions both, but describes the first wine as mingled with myrrh (15[23] ἐσμυρνισμένον οἶνον); Lk 23[36] relates that the soldiers after He was crucified offered Him vinegar in mockery. Jn 19[29] only mentions the vinegar given in response to His exclamation, 'I thirst.' The first 'wine' of Matt. and Mark was probably intended as a narcotic, the χολή being the equivalent of the Heb. word *rōsh*, also tr^{d} 'gall,' which was opium (see vol. ii. p. 104). This was given to those about to be executed, in accordance with the Talmudic interpretation of Pr 31[6], on which see *Sanhedrin*, 43. 1; Lightfoot, *Horæ Hebraicæ*, ii. 36; and Buxtorf's *Lex Talmudica*, 2131. Rosenmüller conjectures that it may have been given rather as a stimulant to keep Jesus alive during the torture (*Bib. Bot.* 163).

Vinegar by itself was too pungent to drink, hence to give vinegar to drink was part of the punishment of a victim, as in Ps 69[21]; cf. the ἔτι δ' ἐς τὰς ῥῖνας ὄξος in Aristoph. *Batrach.* 619. Its effects on the mouth are mentioned in Pr 10[26], reminding of the description of vinegar as ποτὸν στυφόν given by Nikander (*Alexipharm.* 375), or the *Acetum acerbum* of Plautus (*Truc.* i. 2. 83). For other figurative expressions of the irritation and acridity of vinegar see the same author in *Rudens*, iv. 2. 32; *Pseudolus*, ii. 4. 49; and *Bacchyl.* iii. 3. 1; cf. the *mordax acetum* of Persius, v. 86. In the passage in Proverbs the LXX renders the word by ὄμφαξ, unripe grapes, as though *ḥōmez̦* was here used in the sense of the Talmudic חוּמַּץ.

The effect of vinegar on nitre (נֶתֶר=natron or crude sodic carbonate) causing effervescence is mentioned in Pr 25[20] (sce vol. iii. p. 555).

A. Macalister.

VIOL.—Thus the Heb. *nēbhel* or *nebhel* is rendered in AV and RV Is 14[11], Am 5[23] 6[5], and in AV Is 5[12] (RV here 'lute'). See Music, vol. iii. p. 459^{b}, and Psaltery (the more usual tr. of the Heb.), above, p. 163^{b}. See also Driver, *Amos*, p. 234 ff., and Wellhausen, *Psalms* (*PB*), p. 222 ff. The 'viol' (from late Lat. *vidula*, *vitula*, through Fr. *viole*, *violle*; cf. Anglo-Sax. *fithele*, a fiddle) is described by Chappell as a six-stringed musical instrument, the position of the fingers being marked on the finger-board by frets, as in guitars of the present day. But it was played with a bow, not with the fingers as the guitar. Violin is a dim. of viol, as violoncello is of violin. The violin displaced the viol in England in the reign of Charles II.

J. Hastings.

VIPER.—See Serpent.

VIRGIN (בְּתוּלָה, עַלְמָה, παρθένος).—The word בְּתוּלָה is commonly used of a *virgo intacta*, as in Dt 22[23], 2 S 13^{2}. It is frequently applied metaphorically, often with the addition of בַּת 'a daughter,' to a people, especially to Israel, originally, it would seem, in the sense of not yet subdued by an enemy, as Is 37^{22}, Jer 14^{17}, La 1^{15}; but sometimes to other nations, as to Ẓidon (Is 23^{12}), Babylon (47^{1}), and sometimes even where the original intention of the metaphor is lost, as in Jer 31^{4}, where the restoration of captive Israel is promised. In Is 62^{5} there is a curious mixture of metaphor. 'For as a young man marrieth a virgin, so shall thy sons marry thee.' The word is, however, once used of a young *married* woman in Jl 1^{8}.

The meaning of עַלְמָה is from its comparatively rare use less easily determined. In Gn 24^{43} it is used with reference to Rebekah, apparently in the sense of a *virgo intacta*. In Ca 1^{3} the same meaning is perhaps probable, but hardly necessary. In Ca 6^{8} the meaning is quite uncertain. The women in the harem of Solomon, distinguished as they are from the wives and concubines, might or might not be virgins. We cannot, therefore, argue from the usage of the word the meaning intended in Is 7^{14}; but the whole context of the passage, as well as the analogy of 8$^{1-4}$, suggests that the sign intended did not consist in anything miraculous in the birth itself, but in the speedy coming of the event, and in the symbolical name to be given to the child. The LXX probably understood by παρθένος a virgin in its strict sense, understanding, it would seem, that the mother of Immanuel was *at the time* a virgin—a possible interpretation of the words, though RVm is probably right in rendering 'is with child and beareth.' St. Matthew, quoting from LXX, takes the passage as a direct prophecy of the birth of Christ from a virgin (see IMMANUEL). Such has till recent times been the practically universal interpretation of the passage by Christians. It has been very naturally disputed by the Jews from the time of Justin Martyr downwards, and is said to have been one of the chief reasons for the first Gr. tr. of OT by Aquila [? Onḳelos], (Eusebius, *HE* v. 8).

There is nothing remarkable about the usage of παρθένος in NT, except in Rev 14^{4}, where it is used of men who have kept themselves free from impurity. St. Paul's discussion of the topic of 'virgins' in 1 Co 7$^{25\text{ff.}}$ comes under MARRIAGE (see vol. iii. p. 266^{b}).

For the בְּתוּלִים of Dt 22$^{15.\,17}$ (EV 'tokens of virginity'), and the Oriental custom referred to in that passage, see art. SONG OF SONGS, pp. 595^{a}, 596^{b}, and cf. Driver, *Deut. ad loc.*

F. H. WOODS.

VIRTUE as the translation of δύναμις is used in AV in Mk 5^{30}, Lk 6^{19} 8^{46} in the sense of power (so RV) or influence. In earlier Eng. it was freely used (after Lat. *virtus*, from *vir*, a man, therefore 'what is manly,' 'courageous') in the sense of 'strength' or 'power.' Thus Chapman, *Odysseys*, xvii. 360—

> 'His double gates, and turrets, built too strong
> For force or virtue ever to expugn.'

It is Wyclif's usual word for δύναμις after the Vulg. *virtus*, as Ac 19^{11} 'And God dide vertues not smale bi the hoond of Poul'; He 1^{3} 'And berith alle thingis bi word of his vertu.' The same in the Rhem. version, as Lk 9^{1} 'He gave them vertue and power (δύναμιν καὶ ἐξουσίαν, Vulg. *virtutem et potestatem*) over al devils.' The modern meaning of 'virtue' was already in use in 1611, as in the *Preface to AV*, 'Solomon was greater than David, though not in vertue, yet in power'; and it is probable that in the above passages the word was retained from the earlier versions because it conveyed the sense of *influence* (supernatural influence) to the translators' minds. Cf. Adams, *2 Peter*, 17, 'It was the brazen serpent that healed, not the eye that looked on it; yet without a looking eye, there was no help to the wounded party by the promised virtue.' Though more generally, 'influence' is also the meaning in Melvill, *Diary*, 15, 'He was a man of rare wesdome, judgment, and discretion; and, therfor, mikle imployed in the trysts and effeares of the noble and gentle men of the countrey, whilk distracted him fra his calling, hinderit his vertew, and schortened his lyff.' Even Coverdale has the word in the sense of righteousness or goodness, Ezk 3^{30}.

J. HASTINGS.

VISION (usually חָזוֹן, ὅραμα). In early Heb. religion the vision had its closest affinity with the dream,—by which probably the conception of its character was determined,—and the two are usually coupled as the ordinary sources of prophetic oracles (Nu 12$^{6\text{f.}}$, Jer 23$^{25\text{ff.}}$). Its recognized psychological condition was an emotional excitement in which the person was no longer master of his own thoughts or will (Nu 24$^{2\text{ff.}}$, 1 S 19$^{20\text{ff.}}$). See TRANCE. In both dream and vision what carried religious significance was the fact that the presentation did not come through the ordinary sense channels, or as a product of the mind's conscious activity. On this account it was accepted as a revelation from God. When we come to the Prophets the conception of revelation has undergone a change in correspondence with religion in general. The dream disappears, together with the rapt utterance; and prophecy becomes an ethical intercourse of the mind of man with God (Is 8^{19}, Jer 23^{28}). But, while there is no trace of ecstasy in the strict sense or its accompaniments, there are frequent allusions to times of extraordinary elevation of thought and feeling, times therefore of illumination. At such moments an issue becomes clear, a truth breaks on the mind, a resolution is formed (Is 6, Jer 1^{5}). The result is sometimes presented as if it had come to the prophet in a manner analogous to sense experience,—the prophet sees, hears, questions, replies,—but the broad sense in which vision is used makes it clear that the pictorial image was not the source of his knowledge or resolution, but rather that the truth, having taken possession of his mind and heart, created the vision as its imaginative clothing. Even a verbal message, with no reference to a voice or appearance, is spoken of as a vision (Is 1^{1} 21^{2} 22^{1}, Mic 1^{1}, Hab 2^{2}). In Amos' vision of the basket of summer fruits the motive for using the visional form is evidently the play upon the word קַיִץ. Again, as in the intricate description of Ezk 1, the vision is sometimes of a kind that could hardly be pictorially realized. Although, in fact, the primitive phraseology is retained,—the prophet sees, hears, the hand of the Lord is upon him,—it is no longer used in the primitive sense. The vision has become a literary and poetical form consciously employed to embody and communicate truths that have become clear to the inner consciousness. The pre-exilic prophets make only sparing use of the direct visional form. In Ezekiel it is more common, but has lost its earlier imaginative spontaneity, and assumed more the character of an artificial construction (Ezk 1$^{4\text{ff.}}$). It is not found in Deutero-Isaiah or in Haggai; but it reappears in Zechariah, and continues, in its most artificial form, to be employed by apocalyptic writers. In the NT it finds a place only [but cf. the use of τὸ ὅραμα in Mt 17^{9}] in the apocalyptic book of Revelation, and in those narratives in Acts and the earlier part of Luke that bear the character of popular tradition. (See PROPHECY and the Literature there cited).

W. MORGAN.

VOPHSI (וָפְסִי [but text dub.]; B 'Ιαβεί, A 'Ιαβί).—The father of Nahbi, the Naphtalite spy, Nu 13^{14}.

VOW (נֵדֶר, נֶדֶר, *εὐχή*).—It was a universal custom in ancient religions, too natural to need explanation, for men to seek the help of the deity in times of peril or distress (Ps $66^{13.14}$), or to secure the fulfilment of some much cherished hope, by promising him some special gift that would enlist his own interest on their side. Or their vow might be less of the nature of a bargain, and more the expression of unselfish zeal and pious devotion. It might also be a promise to abstain from some comfort or even necessary of life. Among the Hebrews all these types of vow are to be found: for the last the term אִסָּר 'bond,' which occurs only in Nu 30, was used.

Although we have no legislation on the subject in JE, the practice was very ancient. Thus Jacob vows at Bethel that if Elohim will be with him and give him bread and raiment, so that he comes to his father's house in peace, he will make the pillar a sanctuary of God, and pay tithe of all that He gives him (Gn 28^{20-22} E). In the period of the Judges we have Jephthah's vow, that if J″ delivered the Ammonites into his hand, he would offer as a burnt-offering the person who first came from his house to meet him (Jg $11^{30.31}$). Though it was his own daughter, the inviolable character of the vow in that primitive age, which had learnt none of the slippery shifts of casuistry, forced him to sacrifice her. Hannah vowed that if J″ would give her a son she would dedicate him to His service all the days of his life, and no razor should come upon his head (1 S 1^{11}). It is interesting to notice that after the birth of Samuel, when Elkanah went for the yearly sacrifice to Shiloh, the writer speaks of him as going to offer the yearly sacrifice and his vow, as if the vow were as much a matter of course as the sacrifice (v.^{21}). (It seems unnecessary to suppose, with H. P. Smith, *ad loc.*, that the words 'and his vow' were added by a scribe). In the period of the early monarchy, Absalom secured permission to go to Hebron on pretext of a vow he had made, while in exile at Geshur, that he would worship J″ if He restored him to Jerusalem (2 S $15^{7.8}$). The meaning of the vow is that he would appear before J″ and, since none could appear before Him empty, would offer sacrifice to Him. Naturally, this would be offered not at Jerusalem, but at the Judæan sanctuary of Hebron. Each of these instances is a case of a vow intended to secure a favour, and in its essence is a commercial transaction.—A vow of unselfish devotion, which was also a vow of abstinence, is exemplified in the Psalmist's poetical description of David's vow that he would not enter his house, lie in his bed or suffer himself to sleep, till he had found a place for J″ to dwell in (Ps 132^{2-5}). Saul's taboo on eating before sundown (1 S 14^{24}) was a vow of abstinence, imposed on others as well as himself, in order to secure victory by the help of J″. An extreme form of vow is exemplified in the ban or vow of extermination on Arad (Nu 21^{1-3}): 'Israel vowed a vow unto the LORD, and said, If thou wilt indeed deliver this people into my hand, then I will devote their cities.' Both cities and people were in this case destroyed (see CURSE).

In Deuteronomy we have little legislation on vows. It is insisted that what has been thus dedicated must be eaten at the central sanctuary (Dt $12^{6.11.17.18.26}$). The hire of sacred prostitutes must not be brought into the sanctuary for any vow (Dt 23^{18}). There may have been a relaxation of sentiment as to the stringency of a vow, such as may be observed in the post-exilic period; for the legislator, while insisting that there is no religious obligation to make a vow, enjoins that, once made, the pledge must be honoured under pain of Divine displeasure.

In P we naturally have much fuller regulations. In Nu 30, which in its present form belongs to a late stratum, both vow and bond are declared to be binding when uttered by a man. But a woman who lives in her father's house or is married is in a different position. Her father or husband has a right of veto, provided that it is exercised at once. But otherwise silence gives consent, and the vow must be regarded as irrevocable. If at a later period her husband cancels it, he does so on peril of Divine punishment. A widow or a woman divorced from her husband, since she is not dependent on another, is bound by her vow. Vows and freewill-offerings must be without blemish (Lv $22^{18.19}$? H); but while a freewill-offering may be made from that which has something lacking or superfluous, this is forbidden in the case of a vow (v.^{23}). In this connexion it is interesting to notice that Malachi utters a curse on the deceiver who has a male in his flock and vows it and substitutes a blemished thing (1^{14}). The laws as to the discharge of vows are to be found in Lv 27, apparently a late section of P. Persons vowed to J″ could not be sacrificed as Jephthah's daughter had been; they must be redeemed. A fixed scale is laid down. Males between the ages of twenty and sixty were redeemed at 'fifty shekels of silver, after the shekel of the sanctuary' (see MONEY, vol. iii. p. 422), females at thirty shekels. From five to twenty years, males were redeemed at twenty and females at ten shekels; from a month to five years, males were redeemed at five and females at three shekels; while from sixty upwards the tariff was fixed at fifteen and ten shekels respectively. If, however, the person who made the vow was too poor to pay the redemption price, it was to be fixed according to his ability. In the case of animals no change could be made—the vow must stand as originally uttered. Not only was it forbidden to substitute a bad for a good, but also a good for a bad. If such change was made, both became holy to J″. If the animal was unclean, and therefore incapable of being used in sacrifice, it was sold at the priest's valuation, and the money given to the sanctuary. If the owner wished to redeem it, he might do so on payment of the valuation plus one-fifth. Firstlings, however, could not be vowed to J″, since, as such, they already belonged to Him. If devoted to J″ by the ban, they were too holy to be redeemed; and it is startling to read (Lv 27^{29}) that men so devoted must be put to death. The law for the dedication of a house is similar to that for the dedication of animals. It was sold at the priest's valuation, or redeemed by the addition of a fifth to that price. The law as to fields is more complex and obscure. If a man vows part of his hereditary possession, the valuation is to be fixed according to the quantity of seed required to sow it, at the rate of fifty shekels the homer. If the field is consecrated immediately after the year of jubilee, this estimate is to stand; but if some time after, then a reduction in price must be made proportionate to the time that has elapsed. The owner may redeem it by paying the priest's estimate plus one-fifth. If he does not redeem it, but sells it, the right of redemption is lost, and the field instead of returning to him at the jubilee becomes the property of the sanctuary. The law is far from clear. Apparently, when a field was dedicated, the owner commuted his obligation by a money payment according to a fixed scale of valuation. But this by itself does not constitute him absolute owner again: this he can become only by adding one-fifth to the valuation, as penalty for the privilege of redemption. If he pays the valuation without adding the fifth, and sells the field, he loses all claim on it, and it does not revert to him in the year of jubilee, as it would otherwise have done, but falls to the sanctuary. If the field dedicated is not a portion of the owner's hereditary possessions, then the money payment given in commutation is fixed by the time that has to elapse before the year of jubilee, and in that year it returns naturally to the hereditary owner. In this case the redemption penalty of an additional fifth is not required (see, further, SABBATICAL YEAR).

According to Nu $15^{3.8}$ (a late section of P), when an animal sacrifice was offered in fulfilment of a vow, a meal-offering had to be presented with it. Another late law (Lv $7^{16.17}$) prescribed that a peace-offering in discharge of a vow must be eaten on the day on which it was offered, and what was left on the second day. If any portion still remained to the third day, it had to be burnt. This law probably embodies the immemorial practice: a vow would, as a rule, involve a sacrificial meal, and the regulation that the flesh must not be eaten after the second day may even have been a relaxing of earlier usage. In Pr 7^{14} the woman who entices the simpleton to his ruin, has that day punctiliously performed her religious duties—she has paid her vows and come out to find a companion for the sacrificial feast.

The warning in Dt 23^{21-23}, that, while there is no sin in not vowing, when a vow has once been made it must be scrupulously fulfilled, finds an echo in the Wisdom literature. In Pr 20^{25} we apparently have a protest against hasty vows followed by repentance and attempts at evasion (the text and precise sense are alike uncertain; see Frankenberg and Toy, *ad loc.*). So also Koheleth advises his readers to make haste with the payment of their vows, and not trifle with God by delay, for He takes no pleasure in fools. Far better is it to refrain from vows than to make and fail to fulfil them. They must not be betrayed into a vow, which they will afterwards explain away to the priest's messenger as a mistake, lest God be angered with them and destroy the work of their hand (Ec 5^{4-6}, cf. Mal 1^{14}). But while on the one side the ancient sanctity of the vow was relaxed, the more spiritual, as we see from some of the Psalms, came to throw all the stress on the element of thanksgiving, and the material element sank into insignificance, as with other sacrifices (Ps 22^{25} 50^{14}).

Yet vows played a great part in later Judaism, and Jesus came into conflict with the religionists of His time on this question, singling out the law of *Corban* especially as an example of the nullifying of the Law by tradition (see CORBAN). St. Paul became a Jew to the Jews in this matter (Ac 18^{18}, if this refers to him and not to Aquila, and 21^{23-26}). On these cases, and also on the whole question of the Nazirite vow, nothing need be added to what has been said in the article NAZIRITE.

Literature.

i. LIFE OF JEROME, AND CIRCUMSTANCES UNDER WHICH HIS TRANSLATION WAS MADE.—Jerome, or to give him his full name, Eusebius Hieronymus, was born at Stridon, on the borders of Dalmatia and Pannonia, probably about A.D. 340–342.* His parents were Christian, and sufficiently wealthy to give him a good education and to send him early to Rome, to study under the celebrated grammarian Donatus. From the first, Latin literature attracted him, and he especially studied Vergil, Terence, and Cicero; he also worked at rhetoric under Caius Marius Victorinus,* laid the foundation of a good knowledge of Greek, and collected a considerable library. Thence he moved to Gaul, where, staying at Trier, he began serious theological study, which he prosecuted further, on settling in Aquileia in 370. Four years later he travelled with several friends in the East, and at Antioch was attacked by a fever, during which a dream made a deep impression on him, and resulted in his abandoning all secular studies. He dreamt that he was summoned to the judgment-seat of Christ; on being asked who he was he replied 'a Christian,' but received the stern answer, 'Mentiris, Ciceronianus es non Christianus; ubi enim thesaurus tuus, ibi et cor tuum' (*Ep.* xxii. *ad Eustochium*, 30). Yet this classical training and fondness for the best Latin literary models proved one of the greatest possible advantages to Jerome for the work of his life, and through him to the whole Christian Church; he had been preparing himself unconsciously for making that translation of the Bible which was to be the *Editio Vulgata*, the authorized version for the whole of Western Christendom during more than a thousand years.

In search of a life of solitude and asceticism he moved the same summer (374) to the desert of Chalcis, east of Antioch, where he passed five years in strict self-discipline and diligent study, a Rabbi who had been converted to Christianity teaching him Hebrew. But this period also saw the beginning of the correspondence and warm friendship with pope Damasus, which afterwards led to the request that Jerome would undertake to put forward an authoritative Latin version of the Scriptures. The correspondence began (*Epp.* xv., xvi., written about 376–378) on doctrinal, but was a few years after renewed on biblical questions (*Epp.* xviii., xix., xx., xxi., xxxv., xxxvi., written during the years 381–384), Jerome giving Damasus the information he had desired on such questions as the meaning of the word *Hosanna*, the interpretation of Gn 4^{15}, the reason why Abraham received circumcision as a sign of faith, etc.

In 379 Jerome moved to Antioch, where he was ordained presbyter, and then to Constantinople, where he listened to the expositions of Gregory Nazianzen (*Epp.* l. 1, lii. 8), and probably continued the systematic study of Greek; and in 382 he returned to Rome. Here he spent nearly three years in close connexion with Damasus (*Ep.* cxxvii. 7), whose confidence and affection he thoroughly enjoyed. He refers with naïve self-satisfaction to his popularity in Rome at this time: 'Totius in me urbis studia consonabant. Omnium pæne judicio dignus summo sacerdotio decernebar. Beatæ memoriæ Damasus meus sermo erat. Dicebar sanctus; dicebar humilis et disertus' (*Ep.* xlv. 3, written on leaving Rome, Aug. 385).

The inconveniences from which the Western Church suffered owing to the absence of one authorized Latin version of the Bible, had long been felt. 'Tot exemplaria pæne quot codices' was Jerome's description of the state of things; and the confusion caused by a number of independent and anonymous translations of the NT was worse confounded by the carelessness of scribes and copyists.† Whether in private study or in

---

[*] See the discussion on the question in Zöckler, *Hieronymus, sein Leben u. Wirken*, pp. 21–24.

[*] Victorinus was converted to Christianity in old age, and is known amongst Patristic writers as Victorinus Afer; Zöckler (p. 30) doubts whether Jerome studied under him.

[†] This is a point of which Jerome constantly complains; see *Ep.* lxxi. 5, *Comm. in Matt.* ii. 5, iii. 3, vi. 16, etc.; also in the books of the OT, *Præf. in libr. Chron. iuxta LXX.*

public preaching, in controversy with heretics or in liturgical use, this 'Latinorum interpretum infinita varietas'[*] must have been almost intolerably confusing to the more cultivated members of the Church, though the common folk felt it not, and were angered at any change. Damasus therefore initiated a valuable and much-needed reform when he commissioned Jerome to undertake the preparation of a revised and authoritative Latin version of the NT. He could not have placed the work in better hands. Jerome's qualifications were unique: he was fully sensible of the urgency and importance of such a revision; he was a good Latin scholar, writing a style that was both pure and vigorous; he had been studying Greek carefully, and had already a fair knowledge of Hebrew;[†] in later years, when he was translating the OT from the original, he had attained a thorough knowledge of that language, while long residence and travel in the East had given him that first-hand acquaintance with the country and its customs which must be invaluable to any one undertaking a task of this nature. His abilities also as a scholar and writer were well known; and Damasus must have argued that a version proceeding from an authority so eminent, and backed by the influence and power of the Roman see, could not fail to obtain a wide acceptance.

Jerome undertook the task proposed to him by Damasus, we may well believe somewhat gladly, though in the letter to the pope which forms his preface to the Gospels, he professed reluctance to face so great a task, with the odium and the opposition to which he would be exposed from those who were used to the older translations. His fears were well grounded. Even his very sparing emendations in the Gospels were attacked, and he was accused of tampering with our Lord's own words, and denying the inspiration of Scripture (*Ep.* xxvii. 1); though, in Africa, Augustine welcomed this part of Jerome's work.[‡] It was his translation of the OT, however, which brought on him the fiercer storm of indignation and opposition (see below, p. 876^{b}).

The exact date of the pope's commission to Jerome is not known; but the first instalment of the revised text, consisting of the four Gospels, appeared in 383; and this was apparently followed, either the same year, or shortly after, by the Acts and the rest of the NT. It has indeed been doubted whether Jerome ever did revise more than the Gospels; the Latin of the other books shows very few marks of having been emended by him, and there is a rather suspicious absence of the prefaces which usually accompany his emended translations of the books of the Bible;[§] while the preface he affixed to the Gospels promises 'quattuor tantum Evangelia,' and Augustine, in his well-known letter written in 403,[‖] speaks with favour of Jerome's translation of the *Gospel*, not of the *New Testament*. Against this, however, we must set the fact that Jerome more than once definitely asserts that he revised the whole New Testament,[¶] and even mentions passages in the Epistles where his own version differs from the Old Latin.[*] It seems hardly possible to doubt, therefore, that he did revise the whole of the New Testament, though no doubt the revision was much more hurried and perfunctory after the Gospels were off his hands;[†] such readings, however, in the Acts as 8^{2} *curaverunt* for *comportaverunt* of the OL, 11^{4} *ordinem* for *per ordinem*, 16^{25} *laudabant deum* for *hymnum dicebant* (*canebant*) *deo*, 16^{35} *dimittite* for *dimitte*, are obvious instances of Hieronymian correction, sometimes against all known Gr. MSS (see below, p. 882).

At the same time, apparently, Jerome made his first revision of the Old Latin Psalter; it was simply emended from the Greek of the LXX, and the translation was altered only where the sense absolutely demanded it.[‡] This revision was called the *Roman* Psalter, in opposition to the *Psalterium Vetus*, and was in use in the Churches in Rome and Italy till the pontificate of Pius V. (1566–1572), who introduced the *Gallican* Psalter (see below) generally, though the Roman was still retained in three Churches in Italy.[§] Towards the end of 384 pope Damasus died; and in the August of the following year (385) Jerome left Rome for Palestine. There he and his companions studied the topography, scenery, and cities of the Holy Land;[‖] and after a journey to Egypt returned thither again to settle at Bethlehem, where (389) the two conventual buildings were founded, over one of which—that for monks—Jerome was for so long to preside, while over the other—that for nuns—Paula, the devout widow who had been his companion in travel, ruled; and was succeeded, on her death, in 404, by her daughter Eustochium.

Meanwhile, Jerome's Biblical studies had not slackened. The *Roman* Psalter had been so rapidly multiplied and so carelessly copied, that its text was soon in as bad a state as the Old Latin;[¶] and in answer to the requests of Paula and Eustochium he undertook a second revision, correcting in addition the Greek text from the other Greek versions, and making use of Origen's critical signs: a passage between an *obelus* and two points was to be understood as present in the LXX but absent from the Hebrew; that between an *asterisk* and two points was lacking in the LXX, and had been supplied not directly from the Hebrew, but from the Greek version of Theodotion.[**] This version is known as the *Gallican* Psalter, as it early obtained wide popularity in Gaul, probably through the influence of Gregory of Tours,[††] and ultimately became the current version in the Latin Church; the exact date of its publication is not known, but it was probably about A.D. 387.

[‖] The advantages of such study for the purposes of translation he insists on in the *Præf. in libr. Paralip. iuxta LXX.*

[¶] *Præf. in libr. Psalm.* (x. 106), 'Quod quia rursum videtis . . . scriptorum vitio depravatum, plusque antiquum errorem, quam novam emendationem valere.'

[**] *Id.*, 'Ubicumque viderit virgulam præcedentem (÷), ab ea usque ad duo puncta (:) quæ impressimus, sciat in LXX translatoribus plus haberi. Ubi autem stellæ (*) similitudinem perspexerit, de Hebræis voluminibus additum noverit, æque usque ad duo puncta, juxta Theodotionis dumtaxat editionem, qui simplicitate sermonis a LXX interpretibus non discordat.' The *virgula* of course = the *obelus*, and the *stella* = the *asterisk*.

[††] *i.e.* at the end of the 6th cent.; see Walafrid Strabus in Hody, p. 382.

Jerome was also perfecting himself in the knowledge of Hebrew, and was studying under a Jew, who, in fear of being persecuted by his countrymen, used to visit him at night, like a second Nicodemus (*Ep.* lxxxiv. 4). He also published new translations of other books of the OT from the LXX, but as to both the extent and date of this revision there is a considerable amount of uncertainty. Job was certainly revised soon after the Psalter, and in the same way, and published with a preface to Paula and Eustochium;* and these two books alone of all Jerome's revisions *iuxta LXX* have come down to us. We also know that he similarly revised Proverbs, Ecclesiastes, Song of Songs, and Chronicles, for the prefaces to these books remain though the books themselves are lost.† Elsewhere he speaks generally of having revised 'the Septuagint' (*i.e.* the Latin translation of it), and 'the Canonical Books,' which certainly suggests that all the OT underwent this revision (*c. Ruf.* ii. 24, 'Egone contra LXX interpretes aliquid sum locutus, quos ante annos plurimos diligentissime emendatos meæ linguæ studiosis dedi?'; cf. iii. 25; *Ep.* lxxi. 5; *Ep.* cxii. 19, 'Quod autem in aliis quæris epistolis, cur prior mea in libris Canonicis interpretatio asteriscos habeat et virgulas prænotatas'). Two objections have been felt against this supposition. (1) The absence of prefaces to the other books, and of any reference to a previous translation in the prefaces which he affixed to those books when he translated them from the Hebrew; whereas rather pointed references occur in the case of Chronicles, Job, etc.‡ (2) The enormous amount of labour that such a work must have involved, when compressed into a very few years (for by 391 he was already engaged on the translation from the Hebrew),—years, too, that were deeply occupied with other business. The second objection need not detain us long. Jerome was an extraordinarily rapid worker: Proverbs, Ecclesiastes, and Song of Songs were translated from the Hebrew in three days, as he was recovering from a severe illness (*Præf. in libr. Salomonis*); Tobit was translated in a single day (*Præf. in Tobiam*); one 'lucubratiuncula' sufficed for Judith (*Præf. in libr. Judith*); when writing his commentary on the Ephesians he would sometimes finish a thousand lines in a day.§ The first objection is similar to that felt against the revision of the later books of the New Testament (see above, p. 874); and though there is again something suspicious in the absence of his wonted prefaces, we can hardly press such negative arguments against positive assertions, which, if they mean anything at all, mean that he revised the whole of the OT from the LXX: thus in the *Præf. in libr. Salomonis iuxta LXX* he states that he did not correct the books of Wisdom and Ecclesiasticus, 'tantummodo Canonicas scripturas vobis emendare desiderans'; which language certainly implies that he did correct all the other books. Their total disappearance is easily accounted for if the postscript to his *Ep.* cxxxiv. to Augustine‖ (written A.D. 416) be genuine; for there he complains that the greater part of this work had been stolen from him.

While engaged on this work, however, the bad state of the LXX text became more and more apparent to him, and he was convinced that for a satisfactory Latin version of the OT recourse must be had to the original Hebrew (*Præf. in libr. Paralip. ex Hebr.* vol. ix. 1405); the need of such a translation became additionally urgent in controversy with Jews, who, when confronted with texts from the LXX, would naturally refuse to acknowledge the accuracy of the quotation, and would assert that it did not represent the sense of the original,* while many of his friends, who felt the need of a new translation and knew that Jerome was the man best fitted for the task, urged him repeatedly to undertake it. It was indeed, as we learn from his prefaces, in answer to their requests, that he translated this or that book and sent them copies; and so the great work of his life was not prosecuted as a whole and according to a fixed plan, but bit by bit, and for the satisfaction of single and independent inquirers.

About 15 years—from 390 to 405†—were spent on the new translation. Jerome began his work with the books of Samuel and Kings, which he published with the famous *Prologus Galeatus* or 'preface with the helmet'—armed against opponents; this preface, however, is really an introduction to the whole OT, and shows that even thus early he must have conceived some idea of translating all the books. Next came Psalms, the Prophets, and Job; and in 394–396 the books of Esdras and Chronicles; then his work was interrupted by a long illness. In 398 he resumed his labours, and translated Proverbs, Ecclesiastes, and Song of Songs; and the Octateuch (in which Esther was included) now alone remained of the Canonical books. First the Pentateuch was published, though the precise date is uncertain; then soon after the death of Paula, in 404, Joshua, Judges, Ruth, and Esther; later, the apocryphal parts of Daniel and Esther, and the books of Tobit and Judith, which were translated from the Chaldee: and so at length the work was completed. Wisdom, Ecclesiasticus, and probably Maccabees were left unrevised, and Baruch he passed over.

Jerome's translation of the *Psalms* from the Hebrew never became popular, excellent though it is; the hold on the public mind of the more familiar version was too strong to be loosened, and it is the Gallican Psalter which appears in an ordinary Vulgate Bible. A convenient edition of the version from the Hebrew has been published by P. de Lagarde, *Psalterium juxta Hebræos Hieronymi*, Lipsiæ, 1874.

For the date at which *Job* and the *Prophets* were completed, see *Ep.* xlix. 4 *ad Pammachium*; this was written towards the end of 393; he writes, 'Libros sedecim Prophetarum, quos in Latinum de Hebræo sermone verti, si legeris et delectari te hoc opere comperero, provocabis nos etiam cætera clausa armario non tenere. Transtuli nuper Job in linguam nostram.'

The preface to the books of *Esdras* was probably written about 394, as in it he refers to the discussion of several points 'quæ latiori operi reservamus'; this larger work which he was about to publish is certainly the *Ep.* lvii. *ad Pammachium* (de optimo genere interpretandi), which appeared in the latter part of 395. The third and fourth books of Esdras he refused to edit: 'nec quemquam moveat quod unus a nobis editus liber

---

[*] See vol. x. 49-100 (the references are always to Vallarsi's ed. of Jerome's works); the passages added either from the LXX or from the Hebrew through Theodotion's version were marked in the same way as in the Psalms.

[†] *Præf. in libr. Salom. iuxta LXX* (x. 435 f.), 'Tres libros Salomonis, id est, Proverbia, Ecclesiasten, Canticum Canticorum, veteri LXX interpretum auctoritati reddidi'; see also *Præf. in libr. Paralip. iuxta LXX* (p. 431); the passages added from LXX or Heb. were also marked as in the Psalms.

[‡] *Præf. in libr. Paral.* (ix. 1408), 'Ceterum memini editionem LXX translatorum olim de Græco emendatam tribuisse me nostris'; *in Job*, 'Utraque editio, et LXX apud Græcos, et mea juxta Hebræos, in Latinum meo labore translata est' (ix. 1101); *in libros Salomonis*, 'Si cui sane LXX interpretum magis editio placet, habet eam a nobis olim emendatam' (ix. 1296).

[§] *Præf. ad libr. II. Comment. in Eph.* (vii. 586).

[‖] 'Grandem Latini sermonis in ista provincia notariorum patimur penuriam; et idcirco præceptis tuis parere non possumus, maxime in editione LXX, quæ asteriscis verubusque distincta est. Pleraque enim prioris laboris fraude cujusdam amisimus'; but this postscript is omitted by one MS and by several editors; see Vall. i. 1043–44.

[*] *Præf. in Psalterium ex Hebr.* (ix. 1155 f.), 'Quia igitur nuper cum Hebræo disputans, quædam pro Domino Salvatore de Psalmis testimonia protulisti volensque ille te illudere, per sermones pene singulos asserebat, non ita haberi in Hebræo'; see also *Præff. in libr. Paralip.*, *in Isaiam*, etc.; yet when in Africa they were appealed to as to whether Jerome's *hedera* or the traditional *cucurbita* was the right translation in Jon 4^6, they defended the translation of the LXX and Old Latin, see *Ep.* civ. 5 (*Augustini ad Hieron.*); later, the Jews bore witness to the accuracy of Jerome's work, see Aug. *De Civ. Dei*, lib. xviii. c. 43; van Ess, p. 117.

[†] See Kaulen, p. 168 f.; Westcott, art. 'Vulgate' in Smith's *DB*, p. 1700 f.; the latter's dating of the appearance of the several books seems preferable to Kaulen's.

est; nec apocryphorum tertü et quarti somniis delectetur; quia et apud Hebræos Ezrae Neemiæque sermones in unum volumen coarctantur; et quæ non habentur apud illos nec de viginti quattuor senibus sunt, procul abjicienda'; the 4th book is found only in the Latin version. In this same preface to Esdras, Jerome complains of his opponents for attacking his work while they secretly make use of his translation, and he begs his friends Domnio and Rogatianus not to let his translation be publicly known; they are to read it privately, or, at the most, only let a few friends see it. See vol. ix. 1524.

Chronicles was probably finished in 396, for in the preface he remarks, 'Scripsi *nuper* librum de optimo genere interpretandi.'

The *Præfatio in libros Salomonis* contains a reference to his illness: 'longa ægrotatione fractus, ne penitus hoc anno reticerem et apud vos mutus essem, tridui opus nomini vestro consecravi.' Cf. *Epp.* lxxi. 5, lxxiii. 10, both written in 398, in which he refers to the same illness apparently, and in almost the same terms—'longo tentus incommodo,' 'post longam ægrotationem.'

The *Octateuch* must have been in hand about the same time, for he refers to it in *Ep.* lxxi. 5, 'Canonem Hebraicæ veritatis, excepto Octateucho quem nunc in manibus habeo, pueris tuis et notariis dedi describendum.' *Genesis* at any rate was published before 402, as Jerome quotes the preface to it in his apology against Ruffinus (ii. 25), which cannot be later than that date. The other four books of the Pentateuch probably appeared later, as when Jerome wrote his preface to Genesis he had not finished them: 'nunc te precor, Desideri carissime, ut quia tantum opus (*i.e.* Pentateuchum) me subire fecisti, et a Genesi exordium capere, orationibus juves, quo possim eodem spiritu quo scripti sunt libri, in latinum eos transferre sermonem.'

Joshua, *Judges*, and *Ruth* are numbered with *Esther* as books he was just publishing, 'post sanctæ Paulæ dormitionem' in the *Præfatio in Josue.*

For *Tobit* and *Judith* see the prefaces to those books; Jerome was not himself acquainted with Chaldee, but he obtained the help of a scholar who translated the Chaldee into Hebrew, which Jerome in turn translated into Latin.

For his refusal to translate afresh *Wisdom* and *Ecclesiasticus* see the *Præf. in libr. Sal. iuxta LXX*: 'Porro in eo libro qui a plerisque Sapientia Salomonis inscribitur, et in Ecclesiastico, quem esse Jesu filii Sirach nullus ignorat, calamo temperavi, tantummodo Canonicas Scripturas vobis emendare desiderans'; though this was written before he began the translation of the OT from the Hebrew, he does not seem to have changed his mind afterwards. With regard to the *Maccabees*, however, the evidence is conflicting. He nowhere mentions translating the books himself, and his language quoted above certainly suggests that he had no intention of doing so in 387; in the *Prologus Galeatus* (390–91) he passes them by with a short notice: 'Machabæorum primum librum Hebraicum reperi; secundus Græcus est quod ex ipsa quoque phrasi probari potest.' Yet, as M. Berger pointed out to the present writer, there are fairly numerous remains of an Old Latin version of the Macc. other than that which appears in the Vulgate Bible; and these differ so much that the latter must be regarded as a new recension if not an independent translation; see the parallel versions in Sabatier (*Bibl. Sacr. Lat. versiones*, vol. ii.). Sabatier himself (pp. 1013, 1014) allows that Jerome may have corrected the older version, though he hardly thinks he actually retranslated it.

For his treatment of *Baruch* see the *Præf. in Jerem.*: 'Librum Baruch . . . qui apud Hebræos nec legitur nec habetur prætermisimus.'

It may be worth while to arrange the books of the Bible in the chronological order of their revision and retranslation, as given us in the above investigation.

New Testament.

383 A.D.	The four Gospels.
384–385.	Rest of the New Testament.

First revision of Psalter.

383–384.	Psalterium Romanum.

Revision of Old Testament from the Septuagint.

387 (probably).	Psalterium Gallicanum.
387 or somewhat later.	Job, followed by Proverbs, Ecclesiastes, Song of Songs, Chronicles.
388–391.	Rest of the Canonical books (probably).

Retranslation of Old Testament from the Hebrew.

390 or 391.	Books of Samuel and Kings.
392–393.	Psalms, Prophets, Job.
394.	Esdras.
396.	Chronicles.
398.	Proverbs, Ecclesiastes, Song of Songs.
401?	Genesis, followed by Exodus, Leviticus, Numbers, Deuteronomy.
405.	Joshua, Judges, Ruth, Esther.
	Tobit, Judith, and apocryphal parts of Daniel and Esther.

We have said that it was at the wish of friends that most of the translations were undertaken;[*] yet Jerome's friends, who could realize present needs and foresee future advantages, were a small circle; the vast body of clergy and laity were satisfied with the existing versions; and the mutterings of suspicion which were aroused by the emended version of the NT were as nothing compared with the storm of indignation and opposition which the translation of the OT from the Hebrew brought on Jerome's head.[*] No doubt several causes had to do with this result; Jerome's own hot temper, and the terribly ready and powerful tongue he could use whenever duty seemed to urge him to speak, had gained him many enemies; the fame of his learning may have made other scholars jealous and critical; but the great stumbling-block was that he should have gone behind the Septuagint version, and made a translation which took no account of it, and even set itself up as an independent rival. The popular legends as to the miraculous agreement of the seventy translators had no doubt surrounded the Greek version with a halo of sanctity, and its frequent use by the NT writers in quotation would help to place it, as regards inspiration, on a level with the original Hebrew; and no charge seems to have been more constantly hurled at Jerome than that of presumption, unlawful innovation, sacrilege, in daring to put aside the LXX version. Even Augustine held the LXX to be equally inspired with the original Hebrew,[†] and deprecated any new translation, though mainly from fear of the offence it would cause to the weaker brethren.[‡] A story became current that a certain African bishop had adopted the new version for public use in his Church; in the book of Jonah, Jerome had employed the word *hedera* for the gourd under which the prophet rested, instead of the *cucurbita* of the earlier Latin versions; the introduction of this new translation in a familiar passage of Scripture caused such excitement and tumult in the Church that the bishop was nearly left without a flock.[§] This incident, whether real or fictitious, would serve as a very fair specimen of the hostility which a new translation of Scripture was sure to encounter; and it would take several generations for such opposition to die out; and certainly Jerome's method of meeting it, as exemplified in his letters to Augustine, was the reverse of conciliatory. In the prefaces to the various books of the OT Jerome defended himself with great warmth from the charges brought against him. Over and over again he maintained that he did not intend to cast a slur upon the LXX translation,[‖] and that he was only endeavouring to render the Hebrew as faithfully as possible, and to make passages clear which in the LXX and the Old Latin were obscure. The objection that the LXX must be inspired and perfect because the apostles and NT writers quoted the OT in that version, he met by bringing forward five quotations (Mt $2^{15.23}$, Jn 19^{37}, 1 Co 2^{9}, Jn 7^{38}), which could not have been taken from the LXX, as the reading varied in every case; they must then have been taken direct from the Hebrew, and he was justified in giving this source of our Lord's, or the apostle's, words to the Church in an intelligible translation (*Præf. in l. Paral.* ix. 1408). Indeed he maintained against Ruffinus that the apostles used the LXX in quotation only where it agreed with the Hebrew, and that where the two varied they quoted from the original.[*] But in spite of this he always professed the highest respect for the Septuagint version.

---

[*] *e.g.* the Pentateuch was translated at the wish of Desiderius; Chronicles for Chromatius, the books of Esdras for Domnio and Rogatianus, Esther for Paula and Eustochium.

[*] Jerome's former friend Ruffinus was one of his fiercest opponents.

[†] Aug. *De Civ. Dei*, xviii. 43: 'Spiritus enim qui in prophetis erat, quando illa dixerunt, idem ipse erat in LXX viris, quando illa interpretati sunt'; see also the passages in van Ess, p. 91 f.

[‡] *Ep.* lvi. (*Augustini ad Hieronymum*) written in 394; this letter, however, never reached Jerome; *Ep.* civ. from Augustine, written 403; and *Ep.* cxvi. 35, written 405: in the last letter Aug. explains that he had refused to allow Jerome's version to be publicly read in Church—'ne . . . magno scandalo perturbemus plebes Christi.'

[§] See *Ep.* civ. (*Augustini ad Hieron.*) and cxii. 22 (*Hieronymi ad Aug.*); Thierry, *Saint Jérôme*, livre xi. (4th ed. pp. 447, 448) suggests that the incident never really occurred, but was invented probably to throw ridicule on Jerome's work; yet both Jerome and Augustine speak of it as if it were a fact.

[‖] His apology in the *Prologus Galeatus*—'obsecro te lector ne laborem meum reprehensionem existimes antiquorum . . . Quamquam mihi omnino conscius non sim mutasse me quidpiam de hebraica veritate'—is repeated in different words in almost every preface.

Gradually the conflict calmed down; the general acceptance of the new version could only be a matter of time; it was a clear case of the fittest surviving. Augustine was ultimately seen to praise it; in the Gospels he apparently used it;[†] the Spanish Church adopted it for public use; Sophronius, the friend and fellow-monk of Jerome, retranslated the Psalms and Prophets from Jerome's version into Greek; and when Jerome was ending his stormy life at Bethlehem in 420, the attacks or criticisms of his opponents were no longer heard, or, if heard, no longer attended to.[‡]

ii. History of the Translation after Jerome's Death.—The reception of the new translation was, however, uneven; some Churches clung more than others to the old version, and sometimes Jerome's version would be adopted in one part of the Bible, while the Old Latin would be retained in another. Thus the proceedings recorded in the *Acta contra Felicem* of Augustine show that at Hippo in the year A.D. 404 the Gospels were quoted in Jerome's version, the Acts of the Apostles in the Old Latin.[§]

Africa and Britain, both separated by the sea from the main body of the Western Church, clung more steadfastly to the older version, though even here the adhesion was a modified one, and the later African texts, such as *m*, and *h* of the Acts and Epistles (see Latin Versions), show the influence of the Vulgate upon them. In Italy and in other parts of the Western Church generations would soon arise to whom the Old Latin could not be bound by especial ties of use or affection, while by converts the best translation would naturally be that which was most welcomed and most used. The clergy and educated Christians in Rome would be likely to prefer a revision which was begun at the instigation of a pope, and the Latin of which would be more congenial than the ruder dialect of the earlier versions. Augustine's recommendation of the *versio Itala* (by which, Burkitt maintains, he meant Jerome's revision; see *The Old Latin and the Itala*, pp. 54, 60 f., and art. Latin Versions)—'est verborum tenacior cum perspicuitate sententiæ'—was quoted, apparently as a well-known formula, of the Vulgate; Isidore of Seville (6th cent.) uses almost the exact words; and Walafrid Strabus (1st half of 9th) follows Isidore, and says, 'hac translatione nunc ubique utitur tota Romana ecclesia, licet non in omnibus libris, et ipsius translatio merito ceteris antefertur, quia est verborum tenacior, et perspicuitate sententiæ clarior' (see Hody, p. 413).

In the 5th cent. the Vulgate was adopted by Vincent of Lerins, Faustus of Riez, and Prosper of Aquitaine; Eucherius of Lyons and Avitus of Vienne used it largely though not exclusively.[‖] In the 6th cent. its use seems becoming almost universal amongst scholars, except in Africa, where Facundus and Junilius still preserve many Old Latin readings; and towards the end of the century pope Gregory the Great (*Præf. in Job ad Leandrum* = Migne, *Pat. Lat.* lxxv. p. 516) could say, 'Novam vero translationem dissero, sed cum probationis causa exigit nunc novam nunc veterem per testimonia assumo; ut quia sedes apostolica, cui auctore Deo præsideo, utraque utitur, mei quoque labor studii ex utraque fulciatur'; compare *in Job*, l. xx. c. 32, where he declares his personal preference for the new translation. It does not, however, follow from this that this version now became the official version in Rome, but only that, in the judgment of the head of the Roman Church, it was raised to an equal rank with the old (see van Ess, p. 137).

Yet we should be mistaken if we measured the disappearance of the older versions simply by the quotations in ecclesiastical writers; the evidence of MSS of the Sacred Books, of Lectionaries, quotations and lessons in service books, etc., must also be taken into account; and these show us that these versions died very hard; sometimes in entire books of the Bible, sometimes in marginal notes, conflate readings, and 'mixed' texts, sometimes in short lections, in antiphons and responses, they lasted far on into the Middle Ages. Thus the St. Germain MS (see p. 888) of the 9th cent. has an Old Latin text in Tobit, Judith, and St. Matthew; in the other books of the Bible which survive it is Vulgate, though strongly mixed with Old Latin readings; the Codex Colbertinus (*c*) of the New Testament (12th or 13th cent., see p. 888) has the Gospels in an Old Latin text, the rest Vulgate; the interesting Perpignan MS (13th cent., see p. 888) has Ac 1^1–13^7 and 28^{15} *ad fin.* in an Old Latin text, the rest Vulgate with a very slight amount of mixture from the Old Latin; the North British and Irish MSS (such as those described p. 887) preserve a good Vulgate text interspersed with Old Latin interpolations and conflations, which with a little practice can be easily eliminated from the main body of the text. The NT suffered from this mixture far more than the OT; for, being a revision instead of a new translation, it resembled the earlier versions more closely; and it was more familiar to the members of the Church. 'L'Ancien Testament au contraire,' says M. Berger (p. 3), 'n'a réellement été révélé aux peuples latins que par Saint Jérôme': yet even the text of the OT would suffer from the very natural confusion that would come between his translation from the Hebrew and his earlier version from the LXX. In addition to this conscious preservation of the Old Latin in many Vulgate MSS, the text of Jerome's translation was exposed in after-years to the same dangers as existed in his own day, and which are inseparable from the transmission and multiplication of books by hand. The carelessness of copyists, their tendency to introduce matter from parallel passages, unconscious reminiscence of older renderings, occasional alteration for dogmatic purposes,—all these in the course of centuries tended to produce a style of text very far removed from the original purity in which it left its editor's hands.

---

[*] *Contra Ruf.* lib. ii. (Vall. ii. 529); cf. *Ep.* lvii. 11.

[†] *e.g.* in the *De consensu Evangelist.*; see Burkitt, *The Old Latin and the Itala*, p. 57 f.

[‡] Kaulen, p. 188.

[§] See Burkitt, *The Old Latin and the Itala*, p. 57 f.

[‖] See Westcott, p. 1702; Kaulen, p. 197 f.; Berger, pp. 2–4; in the 6th cent. in Gaul most of the books of the OT are quoted from Jerome, while for the NT the Old Latin holds its own.

On this point the writer ventures to quote from the preface (p. viii) of the late M. Berger's *Histoire de la Vulgate*, etc., a book to which he cannot sufficiently express his obligations—'Les doctrines les plus chères aux théologiens du moyen âge exercent toutes leur influence sur le texte de la Bible. Ici c'est le dogme de la Trinité, que l'on veut trouver formulé en toutes lettres dans la Bible, et que l'on affirme par la fameuse interpolation du passage "des trois témoins." C'est la foi en la divinité de Jésus-Christ qui s'exprime en un grand nombre de falsifications de détail, toujours au détriment de son humanité. C'est, dans le troisième chapitre de la Genèse, un changement d'une seule lettre qui met "la Femme" à la place de "la Postérité de la femme." Dans le second livre des Machabées, une série de modifications successives transforment insensiblement le passage classique de la doctrine de la prière pour les morts; louée simplement dans le texte original, la prière pour les morts arrive, dans les textes de basse époque, à être prêchée

Cassiodorius, indeed, is a witness that even by the middle of the 6th cent. the text of Jerome's version had become corrupted, and that he did his best to revise it; but as to the extent both of the corruption and of the revision we are in the dark. He speaks at some length on the subject in the *De institutione Divinarum litterarum* (Migne, *Pat. Lat.* lxx. p. 1105 f.), which he composed for the instruction of his younger brethren in the monastery at Vivarium, apparently about the year A.D. 544; he expresses himself anxious that they should study their Bibles *in codicibus emendatis*, tells them that his nine codices, containing all the books of the Old and New Testaments, were revised by him 'sub collatione priscorum codicum,' that Jerome's arrangement of the Prophets into cola and commata had been adopted by him for the rest of the Bible, and that he left them a Greek pandect, or whole Bible, by which, according to Jerome's example, they might correct the errors in their Latin translation. But he gives us no list of current errors or of his own corrections; and all trace of his carefully corrected codices has disappeared. With, however, perhaps one exception: the magnificent Codex Amiatinus of the Bible, though it is of the 8th cent., resembles Cassiodorius' Bible not only in being divided into cola and commata throughout, but also in possessing a quaternion of introductory matter (*possibly* of earlier date than the rest of the MS) which strongly resembles chs. xii.–xiv. of the *De institutione*; three lists of the books of Holy Scripture occur in each, and the resemblance is of that puzzling nature which stops well short of direct copying and yet suggests very close affinity; all the closer because Cassiodorius tells us that his third division of the books was written 'inter alias (divisiones) in codice grandiore.' It may be, therefore, that in the first eight leaves of the Codex Amiatinus we actually possess part of Cassiodorius' *codex grandior*; though it is more likely that we possess a not very faithful copy of it.[*]

Large numbers of Italian texts must have been brought to Britain in and after the mission of Augustine, if not earlier; and in the late 7th and 8th cents. the monasteries of Wearmouth and Jarrow were, we know, enriched with copies of the Bible (*Pandectes* or *Bibliothecæ* as they were called) and other MSS obtained from Italy by the exertions of Benedict Biscop and Ceolfrid; from them such MSS as the Codex Amiatinus and the Lindisfarne Gospels were copied. The type of text thus obtained would soon penetrate to Ireland, though as it was perpetuated in the local scriptoria it would gradually become tinged with some of the peculiarities of the traditional Old Latin versions.

But the Bible the Irish thus received from Rome their missionaries carried back in the following centuries to continental Europe, to Gaul, Switzerland, and Germany. The Codex Amiatinus was itself sent to Rome by Ceolfrid as an offering to the shrine of St. Peter. Irish and British monks again settled in foreign monasteries and copied the Scriptures there (cf. Bede, *Hist. Eccl.* iii. 8); and thus the text which had been first modified by British characteristics, was further modified by the texts of the countries into which it was now brought. We owe to this cause the large number of MSS, mainly of the 9th cent., which were copied in Gaul and Switzerland by Irish scribes, and present a strange mixture of Irish and Continental types, both in text and handwriting.

Meanwhile in Spain a different family of MSS was growing up. Separated off from the rest of Europe, Spain, like Ireland, clung to old traditions and habits; and the Old Latin text preserved in the quotations in Priscillian[*] lives on in the Spanish Vulgate Bibles. But the Spanish scribes were fonder of interpolations, and of enriching their MSS with marginal notes, and even legendary additions, than the Irish; with the consequence, that while the Irish scribes preserved on the whole a pure type of text—yet mainly in the Gospels, for they rarely copied whole Bibles—the Spanish perpetuated one which was corrupt, and of slight critical value. And as from the north and west the Irish texts moved into France with the missionaries, so from the south the Spanish texts gradually crept in over the Pyrenees, and thus France became the meeting ground of the two opposed types.

The close of the 8th cent. witnessed two recensions of the Vulgate, which, so far as we can see, were founded on these British and Spanish MSS respectively; and, as may be expected, France was the country in which these recensions were made.

Charles the Great took a keen interest in the sacred text and its purity; he was anxious to obtain a uniform standard Bible for Church use, in simple and intelligible Latin, without solecisms.[†] He accordingly, in the year 797, commissioned our own countryman Alcuin, who was then abbot of St. Martin at Tours, to prepare an emended edition of the Scriptures. Alcuin was familiar with Northumbrian MSS from his youth; he himself was of Northumbrian parentage, and had been educated at York, and it was to that city that he sent for MSS to help him in the performance of his task.[‡] As this task was simply to correct the Biblical text by the aid of the best Latin MSS available, without regard to the Greek, we may regard it as fortunate indeed that Alcuin's birth and education should have made him naturally consult just the libraries where the purest texts were preserved. By Christmas A.D. 801 the task was completed, and Alcuin was enabled to present Charles with a copy of the emended Bible. Of existing Vulgate MSS, the famous Codex Vallicellianus is supposed to most nearly represent Alcuin's text (see p. 889).

Simultaneously with this, Theodulf, bishop of Orleans (787–821), was undertaking a revision, though on different lines. Theodulf was a Visigoth, and was born near Narbonne, and the Spanish traditions would therefore be familiar and dear to him; yet he did not simply collect and register Spanish readings. He apparently knew and studied the MSS current in Languedoc and the south of France;[§] and, collecting together all the texts he knew of, he worked with a considerable amount of prudence, marking the passages he considered suspicious, and honestly endeavouring to arrive at a pure text. Yet his work was uneven; and his habit of inscribing in the margin of his Bible the variant readings he had collected, had the unfortunate result of introducing into

[§] Berger, pp. xiv and 145 f., to whom the present writer owes the greater part of this section.

France a whole congeries of corrupt readings from Spain. The best specimen of his revision is the exquisite Bible at Paris numbered Lat. 9380 in the Bibliothèque Nationale. Theodulf's work had a different fate from Alcuin's; it was the private enterprise of a scholar, not a public work undertaken for public utility at the instance of a monarch; and so its influence on the history of the text was (fortunately) slight, whereas Alcuin's was great.

The very favour and reputation which the Alcuinian recension enjoyed, proved indeed the cause of its speedy degeneracy. The demand for Bibles containing it became so large that the resources of the great writing school at Tours must have been severely strained; and the rapidity with which the MSS were copied and multiplied proved fatal to purity of text. They were transcribed hastily and from various exemplars, good and bad; and the large imposing volumes of 'Caroline' Bibles, specimens of which are to be found in almost all our principal libraries, vary indefinitely, from a nearly pure Alcuinian text to one almost worthless.

Very soon therefore after Alcuin's time complaints of the corruption of the text meet us again, the old cry is re-echoed, 'tot exemplaria pæne quot codices.' Yet effort after effort was made to arrest the decay. Lanfranc, archbishop of Canterbury, 1069–89, is related by his biographer[*] to have worked at correcting all the books of the OT and NT, and also the writings of the Fathers, 'ad orthodoxam fidem'; and to have encouraged this study among his pupils: none of his corrected MSS, however, are known to survive. We are more fortunate in possessing the results of the labour of other critics. Stephen Harding, third abbot of Citeaux (about the middle of the 12th cent.), made a similar revision; and his corrected Bible, in four volumes, is still preserved in the public library at Dijon (MS No. 9 *bis*). He purged the text of a large number of interpolations, partly by collating good Latin and Greek MSS, partly with the aid of some Jewish scholars, whom he consulted as to the suspected passages in the OT; it was in the books of Samuel and Kings that the 'major pars erroris inveniebatur.'[†] His example was very soon followed by the Cardinal Nicolaus Maniacoria, whose criticisms are preserved in a MS at Venice.[‡]

With the latter part of the 12th and the 13th cents., however, we are introduced to a new and more organized system of correction. The number of Bibles belonging to these centuries, especially the 13th, testifies to the very large scale on which they must have been copied.[§]

Almost every library possesses some of these small manuscript Bibles, written in double columns on thin vellum, generally with wonderful regularity and beauty. Paris, according to Roger Bacon (Hody, p. 420 f.), was the city where the greatest business in the copying and selling of these Bibles was carried on, the theologians and booksellers combining to produce a regular and fixed type of text, which he calls the *Exemplar Parisiense*; the demand was large in consequence of the fame of the Paris University in the 13th cent., and the numbers of students who flocked to it. The *Exemplar Parisiense*, however, being hastily and unscientifically prepared, furnished a degenerate type of text, and Bacon complains bitterly of it.[*] Efforts were now made to emend it by societies of scholars, who united their labours and researches in the *Correctoria Bibliorum*, as they were called. Here the authority of Latin and Greek MSS was registered in cases of doubtful reading, the testimony of Fathers was quoted, even variants of punctuation were taken account of, and short critical notes were added stating which reading was to be preferred.

The principal *correctoria* are (1) The *Correctorium Parisiense*, prepared probably about A.D. 1226 by the Paris Theologians:[†] this was in the course of the next twenty years adopted and enlarged by the Dominicans residing at Sens, and possibly authorized by the bishop of that diocese; and it is sometimes called the *Correctorium Senonense* in consequence (possibly to be found in the Paris MS, B.N. 17). Roger Bacon had a poor opinion of the Paris correctors and their work; whether Franciscans or Dominicans, he speaks of them with contempt; the carelessness of the scribes at Paris was bad enough, but the ignorant correctors made things worse; 'quilibet lector in ordine minorum corrigit ut vult, et similiter apud prædicatores, et eodem modo scolares (*or* seculares?), et quilibet mutat quod non intelligit.'

(2) The *Correctorium Sorbonicum*, so called because it is preserved in a Sorbonne MS,[‡] varies little from the text of the *Senonense*, and is a sort of collection of more important readings from the earlier *correctoria*.

(3) The *Correctorium of the Dominicans*, prepared under the auspices of Hugo of St. Caro, about 1240, the final corrected form of which is now preserved in the Bibl. Nat. at Paris (*Lat.* 16,719–16,722): this, like the emendation of Stephen Harding, was an endeavour not so much to recover Jerome's actual text, as to obtain a good working text of the Bible, by the use of Greek or Hebrew MSS.[§] The Dominicans thought as little of the *Correctorium Parisiense* as did Roger Bacon, and they discouraged the members of their order from using it.[‖]

(4) The *Correctorium Vaticanum*, a good MS of which is preserved in the Vatican Library (Lat. 3466): this *correctorium* was the work of the Franciscans, and its author has been very reasonably identified by Vercellone with a 'Sapientissimus homo,' praised by Bacon, who he says had spent nearly forty years in the correction and exposition of the text; Denifle concludes that he was Willermus de Mara.[¶] This is the best of the *correctoria*, and has been cited by Bp. J. Wordsworth in his edition of the Vulgate New Testament as *cor. uat.*; the author is not only a good Greek and Hebrew scholar, but has seriously set himself to restore the Hieronymian text.

These remedies were all that could be applied to the Vulgate text before the invention of printing; and, by an unfortunate chance, it was the worst of these *correctoria*, the *Parisiense*, that was made use of by Robertus Stephanus.

With the literary revival of the 15th cent., a natural desire was felt for a more satisfactory text of the Bible, as well as for a multiplication of copies of the sacred book; the great humanist pope, Nicholas V., gave a commission to the scholar Manetti, to translate the NT into Latin; the same pope offered a reward of 5000 crowns for a copy of St. Matthew's Gospel in its original Hebrew.[**] Naturally, some of the first and principal productions of the printing-press were Latin Bibles. But the Bibles that were taken into the printer's workshops, and from which the early editions were printed, would be the small and handy mediæval MSS described above, like the MSS from which Henricus Stephanus printed the Greek NT, and which are still preserved in the library at Basel; there would be a larger supply of such texts, they would be easier to print from, and if they were spoilt the loss was slight, while few people would have cared to entrust one of the great Alcuinian Bibles, or still earlier pandects like the *Codex Amiatinus*, to the rough usage of the printing-office. Thus the early printed editions of the Vulgate did little more than perpetuate the current and corrupt form of text; though the copies printed by Froben at Basel seem to have been made with care, and to have enjoyed a European reputation for accuracy;[*] the present writer has found his Bible of 1502, with the *glossa ordinaria*, preserve a number of good readings, against almost all other early editions.

Space forbids our enumerating the early editions of the Vulgate or examining their history; the student who wishes to do tbis, may be referred to the sections on the subject in van Ess, Kaulen, Westcott, to Mr. Copinger's work, to E. Nestle's 'Lateinische Bibelübersetzungen' in *PRE*³, to Le Long, *Bibliotheca Sacra* (ed. Masch, 1778–90), vol. ii., to Vercellone, *Var. Lect.* i. pp. xcvi–civ, ii. pp. xxi–xxvi; and, last, not least, to the British Museum 'Catalogue of printed books; Bible, part i.'

The following editions at any rate should be borne in mind:—

1. The 'Mazarin' Bible, so called because the copy which first attracted the notice of Bibliographers was found in the library of Cardinal Mazarin; otherwise known as the '42 line' Bible; issued at Mentz between 1452 and 1456, in two vols.; the printing is ascribed to Gutenberg, or to Peter Schoeffer, or to Johann Fust. Its rarity and beauty combine to make it one of the most valuable books in the world.
2. The first Bible published at *Rome* is dated 1471, and was printed by Sweynheym and Pannartz, 2 vols. fol.; reproduced by Andr. Frisner and Sensenschmit at Nuremberg, 1475.
3. The important Venice edition by Fr. de Hailbrun and Nic. de Frankfordia, 1475, fol.; the text is based largely on the Mazarin Bible, while in turn many of the later editions are copied from this.
4. The famous Complutensian Polyglot in six vols. fol., 1514 and following years; undertaken by Cardinal Ximenes, and printed at his expense.[†] A definite revision of the Vulgate text was undertaken in this edition, partly with the aid of ancient MSS, still more from the Greek; but with only moderate success.
5. The Vulgate Bible of Robertus Stephanus, Paris, 1528, tbe first genuine attempt at a critical edition: three good MSS were collated for it. This was followed by a larger edition on the same lines, for which seventeen MSS were collated, four of which can be still identified; printed 1538–40, reprinted 1546. *This edition is practically the foundation of the official Roman Vulgate*; it is cited as ϛ in Wordsworth's edition.
6. Parallel attempts at producing a critical text by the aid of MSS and earlier printed Bibles were being made by the Catholic Theologians at Louvain; and John Hentenius in his fine folio edition (Louvain, 1547, and often reprinted) used about thirty-one MSS and two printed copies; it is impossible to identify them now. This edition is cited as 𝕳 by Wordsworth.
7. The small and rare octavo edition of Robertus Stephanus, dated 1555, should be noticed, as it is the first *Latin* Bible with the modern verse divisions.

The Sixtine and Clementine editions are noticed below.

The output of printed Bibles was very large; during the first half century of printing some 124 editions were published; Vercellone enumerates 179 editions again between the years 1471 and 1599; and, in addition to these, numerous scholars, both Rom. Cath. and Protestant, undertook independent translations of the Bible into Latin, as well as revisions of the Vulgate text. Remembering this, we may be able to realize what a bewildering amount of differing versions were now current, all or any of which might appear to the ordinary reader as the *Editio Vulgata*. Such new translations were made on the Rom. Cath. side by Erasmus, Johannes Rudelius, Aug. Steuchus of Gubbio, Isidore Clarius, Sanctes Pagninus, Cardinal Caietan, and Joh. Benedictus; on the Protestant side by Andr. Osiander, Conr. Pellicanus, Sebastian Münster, Leo Judas (the Zürich version), and Seb. Castellio.[‡]

All these editions, however, even on the Catholic side, were the undertakings of private individuals; and neither Church nor pope had given to any one the full sanction of their authority. Yet the Council of Trent, in its fourth sitting (8th April 1546), had already taken care to pronounce on the Canon of Scripture, and to enumerate a list of the books it held as canonical (see below, p. 885). Then, in the 'Decretum de editione et usu sacrorum librorum,' pleading the advantage that would accrue to the Church if, out of the many current Latin editions, one should be held as 'authentica,' it proceeded to declare and resolve, 'ut hæc ipsa vetus et vulgata editio quæ longo tot sæculorum usu in ipsa ecclesia probata est, in publicis lectionibus, etc., pro *authentica* habeatur, et ut nemo illam rejicere quovis prætextu audeat vel præsumat.' It also ordered that 'hæc ipsa vetus et vulgata editio quam emendatissime imprimatur.' Two questions naturally suggest themselves as to this decree: what is the real meaning of 'authentica'? and what was the exact type of text, the 'vetus et vulgata editio,' which was thus designated?

The word 'authentica' seems to have been used and understood not only in the sense of *official*,[*] but also in the sense of *accurate*—at any rate to the extent that there were no mistakes in it which might lead to false doctrine in faith or morals; it was in this sense that scholars like Andreas Vega and Bellarmine understood the word.[†] No verbal inspiration or infallible accuracy was claimed for it. Scholars might read their Bibles in the original tongues if they wished; but for ordinary use it was advisable to have one standard edition ('authenticam hac mente ut cujus fas sit eam legere sine periculo') instead of a number of independent and unauthorized translations.

In regard to the second question, it is difficult to believe that the Fathers of the Council had in their minds any one particular printed or manuscript copy as the edition 'longo tot sæculorum usu in ecclesia probata';[‡] probably they were speaking quite generally, and meant by this expression the Hieronymian text, which they believed to have been fairly transmitted through the Middle Ages, and to have been recognized by the Church and used in her services—as against the bewildering amount of new translations and arbitrarily corrected texts.

Though the Council thus ordered the preparation of an official Vulgate, no immediate action was taken by the Church. John Hentenius, however, a professor at Louvain, undertook the preparation of an edition: this is the edition mentioned above (preced. col., No. 6), and often reprinted. The various Hentenian editions remained for some years as the standard text of the Roman Church, but were still private publications.

Yet the task of preparing an official text occupied the minds of several popes, and under Pius IV. and Pius V. efforts were made at Rome to collect some of the oldest and most valuable MSS obtainable, and a commission was appointed to carry on the work. It was not, however, continuously pursued till the pontificate of Sixtus V. (1585–1590), who pushed forward the revision of the text with great zeal. He summoned afresh the committee of cardinals and scholars under the presidency of Cardinal Caraffa, entrusted them with the task, but worked himself with unwearied diligence at examining the readings and correcting the proofs.[§] Old MSS and printed editions were consulted, and, where the authorities were divided, those readings were favoured which agreed with the original Greek or Hebrew. The result was the handsome *Sixtine Edition* of the Vulgate, which appeared in 1590, printed at the Vatican press, and bearing the following title—on the first page: *Biblia* | *Sacra* | *Vulgatæ* | *Editionis* | *tribus tomis* | *distincta* | *Romæ* | *ex Typographia Apostolica Vaticana*, | M·D·XC |; on the second page: *Biblia* *Sacra* | *Vulgatæ editionis* | *ad* | *concilii Tridentini* |

præscriptum emendata | et | a Sixto ·V·P·M· | recognita et approbata.[*]

This edition, though nominally *tribus tomis distincta*, is really in one volume, and the paging is continuous throughout; it is cited by Wordsworth as 𝕾. In text it resembles the Stephens edition of 1540 more than the Hentenian Bibles; but a new system of verse-enumeration was introduced. The inconvenience, however, of a system which differed from one which was almost universal in current Latin Bibles no doubt led to this being dropped in the Clementine edition.

The Sixtine edition was prefaced by the famous Bull beginning with the words: 'Aeternus ille.' This Bull recounted the care with which the pope, and the scholars and divines assisting him, had worked at the preparation of the book—'ita tamen ut Veterem multis in Ecclesia abhinc seculis receptam lectionem omnino retinuerimus'; it was decreed, therefore, that this edition was to be considered as the actual Vulgate, prescribed and pronounced authentic by the Council of Trent, and was to be used in all the Churches of the Christian world, 'pro vera, legitima, authentica, et indubitata, in omnibus publicis privatisque disputationibus, lectionibus, prædicationibus, et explanationibus' (here the Bull goes beyond the decree of Trent, which only asserted that the Vulgate was to be considered authentic 'in publicis lectionibus, disputationibus, prædicationibus et expositionibus'). No future edition was to be published without the express permission of the Apostolic See; nor was any one to print a private or independent edition himself; nor was the Sixtine edition, for the next ten years, to be reprinted in any other place than the Vatican; after that time editions might be printed elsewhere, but must always be carefully collated with the Sixtine edition, 'ne minima quidem particula mutata, addita, vel detracta,' and must be accompanied with the official attestation of the inquisitor of the province, or bishop of the diocese, that this was the case; no variant readings, scholia, or glosses were to be printed in the margin. Persons disobeying these orders, whether editors, printers, or booksellers, were, besides the loss of all the books and other temporal punishments, to suffer the penalty of the 'greater excommunication,' from which they could not be relieved, 'nisi in articulo mortis,' save by the pope himself.[†]

The Sixtine edition, however, met the fate of most revised versions,—unpopularity amongst the clergy and laity who were used to unrevised texts,—and an order in the Bull that the missals, breviaries, etc., were to be corrected from the Sixtine text, was especially distasteful. Sixtus, too, had offended the Jesuits by placing one of Bellarmine's books[‡] on the *Index Librorum prohibitorum*; and Bellarmine, in a letter to Clement VIII., spoke very strongly in condemnation of the Sixtine edition.[§] The brief popularity, therefore, that attended it is easily intelligible. Sixtus died in August 1590. A number of short-lived popes succeeded him; and in January 1592 Clement VIII. ascended the throne. In the same year all copies of the Sixtine edition were called in, and another official edition of the Vulgate was published from the Vatican press, which has ever since been known as the *Clementine* edition (Wordsworth's 𝕮). This edition was accompanied by a preface, written by Bellarmine,[*] which asserted that while the former edition was being printed Sixtus V. had himself noticed many inaccuracies in the printing, and had consequently resolved to recall it and bring out a new edition: he had been prevented by death, but his design was now at length carried out by his successor, Clement VIII.

Yet this attempt to shift the blame from the editors to the printers cannot be justified. The number of misprints in the Sixtine edition is extraordinarily small for a book of such size, and many of them were corrected, either with the pen or by pasting a small slip of paper with the right reading over the misprint, before the book was published.[†] The real reasons for the recall of the edition must have been partly personal hostility to Sixtus, and partly a conviction that the book was not quite a worthy representative of the Vulgate text. The Clementine text, indeed, differs from it in some 3000 places, and is a return to the type of text found in the Hentenian Bibles. In the critical notes to the Oxford Vulgate the reader will constantly see ϛ 𝕾 witnessing for one reading, while 𝕳 𝕮 witness for another; and on the whole we willingly admit that the Clementine text is critically an improvement upon the Sixtine.

The difficulty of escaping the penalties, so freely denounced by Sixtus on any who should change the least particle in his text, was surmounted by the bold device of printing his name instead of Clement's on the title-page, and so presenting the edition to the world as a *Sixtine* edition.[‡] The title is—on the first page: *Biblia | Sacra | Vulgatæ | Editionis | Romæ | Ex Typographia Apostolica Vaticana* | M.D.XCII | ; on the second: *Biblia Sacra | Vulgatæ Editionis | Sixti Quinti | Pont. Max. | jussu | recognita atque edita* | ; the engraved border in the second page is the same as in the Sixtine edition.[§]

A Bull attached to the Clementine edition forbade any copy of the Vulgate to be printed in future without being first collated with the Vatican copy, 'cujus exemplaris forma, ne minima quidem particula de textu mutata, addita, vel ab eo detracta, nisi aliquod occurrat, quod Typographicæ incuriæ manifeste adscribendum sit, inviolabiliter observetur'; nor were even variant readings to be printed in the margin.

A longer life has been granted to the Clementine Vulgate than was the fate of the Sixtine, and to the present day the edition of 1592 remains the standard edition of the Roman Church.[*] The stern prohibitions of the Papal Bull have succeeded in providing members of the Roman Church throughout the whole world with a fixed and unalterable text of the Sacred Scriptures, but at the cost of suppressing any attempts at a systematic revision in the light of fuller critical knowledge; and by a strange paradox the attempts that have been made in later years to emend the Vulgate text have come mainly from students outside the communion of the Roman Church. Vallarsi, indeed, in 1734, printed an emended text with such MS help as he was able to obtain, not, however, as the Bible, but as the *Divina Bibliotheca* in his edition of the works of St. Jerome. To Bentley's proposed critical edition of the New Testament[†] the Latin Vulgate was to be a most important help; it being his firm conviction that the earliest MSS of the Vulgate would be found to agree so closely with the earliest Greek MSS that it would be possible 'to give an edition of the Greek Testament exactly as it was in the best exemplars at the time of the Council of Nice, so that there shall not be twenty words, nor even particles difference.' Bentley himself collated a number of English Vulgate MSS for this purpose; his friend John Walker collated still more at Paris in 1719 and the following years, and obtained collations of several Oxford MSS from David Casley. The projected edition, however, came to nought, partly perhaps in consequence of Bentley's advancing years, partly because a more extended and thorough collation of Vulgate MSS did not show that exact agreement with the earliest Greek which he had expected. Bentley died in 1742, and John Walker in November 1741; their collations, however, were preserved, and have proved of considerable value to the Bishop of Salisbury (Dr. J. Wordsworth) in his critical edition. The German scholar, Dr. P. Corssen, of Berlin, has been for some time engaged in research with a view to a critical edition of the Vulgate NT, though hitherto only the Epistle to the Galatians has been published.[‡] The Bishop of Salisbury in conjunction with the present writer is also engaged on the same task, and has published the four Gospels with prolegomena; the work is still in progress.

---

[*] So the British Museum and Bodleian copies. See van Ess, pp. 265, 266 n., also Nestle, p. 20; but the Göttingen copy of the Bible, according to van Ess (whose statement Prof. Nestle confirms), has: *Biblia | Sacra | Vulgatæ | editionis | Tribus Tomis | distincta | Romæ | Ex Typographia Apostolica Vaticana* | MDXC | , on the second page; while the first page has: *Biblia | Sacra | vulgatæ editionis | Sixti quinti | Pont. Max. | Jussu recognita atque edita.* There may then have been more than one edition of the Sixtine Bible; it looks, however, as if the first title had been lost, and then filled up by the binder from the Clementine edition.

A reduced facsimile of the Sixtine title-page is given by P. Fabre, *La Bibl. Vaticane*, p. 59.

[†] This Bull is printed at length in Thos. James, *Bellum Papale*, London, 1600, and in van Ess, p. 269 f.; the most important parts of it are given in Kaulen, pp. 449-457.

[‡] *De dominio Papæ directo*, in which Bellarmine maintained not the direct, but only the indirect, dominion of the pope over the whole world; see *The Pope and the Council*, by 'Janus,' 1869, p. 63.

[§] 'Novit beatitudo vestra, cui se totamque ecclesiam discrimini commiserit Sixtus V., dum juxta propriæ doctrinæ sensus, sacrorum bibliorum emendationem aggressus est; nec satis scio, an gravius unquam periculum occurrerit'; see van Ess, p. 290.

[*] Reprinted in James, *Bellum Papale*, and in van Ess, p. 355 f.

[†] The number of words thus pasted over is not above forty in the whole Bible; see James, *Bellum Papale*, and van Ess, pp. 331–333. The present writer has discovered only two uncorrected misprints in the Four Gospels; and, indeed, the Sixtine edition was much more carefully printed than the Clementine.

[‡] The regular form of title in a modern Vulgate Bible—'Biblia Sacra Vulgatæ Editionis Sixti V. Pont. Max. jussu recognita et Clementis VIII. auctoritate edita'—cannot be traced at present earlier than 1604; up to that time Sixtus seems to have appeared alone upon the title-page; later, Clement occasionally figures by himself.

[§] James (*Bellum Papale*) not unnaturally makes capital out of the differences between the two papal editions; cf. Sixtus Amama, *Anti-Barbarus Biblicus*, lib. i. c. lxx., Amstelod., 1628. Lists of the variations can be found in James, Amama, Bukentop, *Lux de Luce*, p. 319 f., and Vercellone.

iii. THE NATURE AND METHOD OF JEROME'S REVISION.—The work before Jerome in his edition of the two Testaments varied so widely that we must treat them apart; and, as the NT was published first, it may be advisable to consider it before the OT.

In his letter to Damasus, Jerome describes plainly enough the nature of his revision of the four Gospels. He revised the existing Latin versions by the aid of the oldest Greek MSS he could have access to, making alterations only where the sense of the passage required it.[§]

Such a revision was no new thing in the history of the Latin versions. We may put aside the question whether what is called the *European* family of the Old Latin texts be an independent version from the *African* family, or an early revision of it [see LATIN VERSIONS]. But there can be no doubt that the *Italian* family, represented in the Gospels by the Codices Brixianus (*f*) and Monacensis (*q*), though principally by the former, is a revision of the *European* family, partly in accordance with a different and somewhat later type of Greek MSS, partly in order to give the Latinity a smoother and more even appearance (Westcott and Hort, *Introduction*, p. 79). There can be equally little doubt that Jerome knew of, and valued, this revision, and made it the base of his own: a short examination of a few pages of the Vulgate with the main Old Latin MSS will convince any reader that Jerome's text is in Latinity much closer to the Codex Brixianus than to any other Old Latin MS; Mr. Burkitt, indeed, maintains that *f* is really a Vulgate MS with Old Latin elements that have come in through the Gothic (see *JThSt*, i. 129; and Kaufmann in *Ztschr. f. deutsche Philologie*, xxxii. 305–335).

If, however, we compare the Greek text underlying the Vulgate with that represented by *f q*, we shall see that for the Gospels at any rate it is a return to the older type of MS, especially ℵ and B; the tables of readings which, as the present writer believes, demonstrate this, may be studied in the *Epilogus* to the Oxford edition of the Vulgate;[*] but if the student will examine the *apparatus criticus* of Tischendorf's Greek Testament the same fact will be disclosed to him; time after time[†] the Vulgate follows the older Latin and older Greek MSS, while *f* and *q* agree with the later. Jerome, indeed, twice in his commentaries quotes with respect the readings of the Greek MSS belonging to Origen;[‡] but the readings in one case agree with and in the other case differ from ℵB, so that we cannot conclude much as to the nature of their text. Other points have been noticed by scholars, connecting Jerome with the Sinaitic and Vatican texts; in the OT, Mr. Burkitt[§] says that Jerome 'in his translations from the LXX in the prophets is generally very faithful to the Vatican text'; and in the Acts the Codex Amiatinus has 70 capitula with corresponding section-numerals in the text, an enumeration which is marked in the margins of both ℵ and B, but is otherwise, according to Hort, unknown in Greek MSS and literature;[||] so that there is a cumulative argument of considerable weight on behalf of Jerome's having made use of manuscripts of this type.

At the same time it is clear that he must have consulted MSS of a type different from anything we now possess. There are instances in the Gospels, few but clear, where he has apparently corrected the reading against all known Greek authorities, as well as against the Old Latin;[¶] and in some of his commentaries he expressly mentions and discusses readings which are otherwise unknown to us. The most striking instances of these latter are, (1) the clause at the end of St. Mark's Gospel (16^{14}) quoted in the *contra Pelag.* ii.

---

[*] Naturally enough, the various modern editions do not all represent the Clementine text with absolute or with equal accuracy; the student who wishes to possess an accurate text is advised to obtain the very careful edition published by Vercellone at Rome in 1861, and to note what the editor says in his preface as to the few occasions on which he has deviated from the Clementine edition of 1592: for the NT the edition of Hetzenauer (Oeniponte 1899) is convenient and, so far as we have tested it, accurate.

[†] His letter to Abp. Wake is dated April 1716, the proposals for printing were issued in 1720; see A. A. Ellis, *Bentleii critica sacra* (Cambr. 1862), p. xii f.

[¶] *e.g.* Mt 27^{55} omission of *videntes* or *aspicientes*=θεωροῦσαι (ὁρῶσαι 300); *ff*$_1$ *g*$_1$ *l*, who join in the omission, are mixed texts with a large Vulgate element in them; cf. Mk 6^{27} omission of *abiens* (ἀπελθών) with *l*; 10^{43} om. *in vobis* with *l*; Lk 9^{44} *in cordibus vestris* against the Gr. εἰς τὰ ὦτα ὑμῶν and the Old Lat.; 22^{55} *erat petrus* against the Gr. ἐκάθητο ὁ π. and the Old Lat. *sedebat*; Jn 7^{25} *ex hierosolymis* with *c ff*$_2$ against the Gr. ἐκ τῶν Ἱεροσολυμειτῶν and the Old Lat.; 8^{37} *filii* against the Gr. σπέρμα and the Old Lat. *semen*; 21^{16} *agnos meos* against the Gr. τὰ πρόβατά μου and the Old. Lat. *oves meas*.

15, as occurring 'in quibusdam exemplaribus et maxime in græcis codicibus';[*] (2) the discussion on Jn 10^{16} in the Commentary on Ezk 46, where Jerome says, '*et fiet unum atrium et unus pastor*: hoc enim græce *αὐλή* significat, quod latina simplicitas in *ovile* transtulit'; all existing Greek MSS read not *αὐλή* but *ποίμνη* here, and the Old Latin have *unus* (or *una*) *grex*. The careful student will detect other cases; but enough has been given, we believe, to make it clear that Jerome's Greek MSS were partly of the type so highly esteemed by Hort, partly of a type which has since disappeared.

The other books of the NT may be more summarily considered. In the Acts of the Apostles, the oldest MSS, such as Amiatinus and (less frequently) Fuldensis, agree in text with ℵB and AC;[†] in the Epistles, the revision was much more hasty, and very possibly was made with but slight, though with some, regard to the Greek;[‡] such is also the opinion of Dr. C. R. Gregory,[§] who says of the work outside the Gospels, 'Ceteri vero Novi Testamenti libri annis ut videtur proximis vel etiam proximo anno recensiti non tam diligenter emendati sunt; recensio horum textus nova vix præbet novas lectiones e Græco ductas sed solas elocutiones politiores atque cultiores Latinas.'

The textual criticism of the Vulgate NT is one of the most complicated problems facing modern scholars. The reader will, however, have gained from the section above on the history of Jerome's translation after his own death, a fair amount of information as to the relative value of different groups of MSS. The vast majority of 13th and 14th cent. MSS may be put aside as comparatively worthless, and it would be easy enough for any student to compile—say from the Oxford edition of the Gospels—a list of readings the presence of which in a late MS would be quite sufficient evidence that it was only reproducing the current and valueless mediæval type of text. He will also have learnt the interest of the MSS containing the Theodulfian recension, the very varied types of text presented by the Alcuinian Bibles, and the mixture of French and Irish elements in the 8th and 9th cent. MSS, written in France by Irish or Northumbrian scribes. It is not very hard, therefore, to arrange our MSS in *groups*, as has been done in the lists at the end of this article; but to go further and apply to them a genealogical as well as a geographical classification is what the present writer at any rate has not yet found himself able to do. The grounds on which in the Gospels the early Northumbrian MSS such as AΔSY, the 6th cent. Fuldensis (F), and Ambrosianus (M), and the first hand of the Hubertianus (H*), have been preferred to other MSS, have been set forth at some length in the *Epilogus* to the Oxford edition of the Gospels (pp. 708–732). F and M are two of the earliest existing Vulgate MSS; and the whole group seems to offer strong internal evidence of preserving a pure type of text. The MSS forming it show less trace than others of mixture from Old Latin sources; they agree more closely with the Greek text of ℵBL, and we have seen it to be probable that Jerome partly modelled his revision on MSS of this type; they are free from the numerous small additions, amplifications, conflations, etc. which are commonly found in later MSS, and may fairly be regarded as the marks of a degenerate text even when they are found in an early MS, such as the Harley Gospels (Z). Yet *all* the MSS of the Vulgate NT are so spoiled by mixture, that it is impossible to select one MS or group and follow its readings throughout. There are cases both in the Gospels and in the Acts where one group must be clearly followed in one verse and as clearly rejected in the next, there are others where an obvious clerical error, or a conflate reading, has been perpetuated in every known Vulgate MS; no MS or group seems to preserve a consistent type of text. Still there is here an excellent opportunity for the student; and it may be possible in time to do for the MSS of the Vulgate something analogous to what Westcott and Hort have done for the MSS of the Greek text.

Jerome's work on the OT stands on different ground from his work on the NT; here it was not an emended translation in the light of better MS authority, but a completely new version made direct from the Hebrew, where the text was, as he thought, in a fairly even and satisfactory condition, compared with the confusion shown by the LXX. Jerome does not seem to have imagined the possibility of variation to any serious extent in the Hebrew MSS, though he tried to procure the best that were attainable (*Ep.* xxxvi. 1, *ad Damasum; Præf. in Paralip. iuxta LXX*). He talks in general terms of the 'Hebrew,' the 'Hebraica veritas,' etc.; nor does the text used by him seem to differ largely from the Massoretic text which has been handed down to the present day.[*] Yet it is not quite identical;[†] and as it is practically certain that the copies he used did not possess the vowel points, it is but natural that his interpretation of the consonants should occasionally differ from that adopted by the Massoretes.

Jerome's version, again, was not the first that had been made direct from the Hebrew; he could consult not only the LXX, but also the independent translations of Aquila, Symmachus, and Theodotion; and indeed in the Bk. of Daniel the version of Theodotion was that generally used in the Church.[‡]

His method of translating the OT he describes to us in the preface to his *Comment. in Ecclesiasten*: though he is only referring to that book in his preface, there is no doubt that he is describing his general practice. He worked with the Hebrew text, translating it directly, according to the best of his power and knowledge, with such help as he could obtain from the Jewish Rabbis and their traditional methods of interpretation; he tried to be conservative, and to keep to the lines marked out by the LXX ('de Hebræo transferens magis me LXX interpretum consuetudini coaptavi, in his dumtaxat quæ non multum ab Hebraicis discrepabant'); he did not disdain to incorporate parts of the Old Lat. versions,[*] and he also made use of the translations of Aquila, Symmachus, and Theodotion, so as to observe the mean between excessive novelty and slavish adherence to ancient errors;[†] and his aim in translating was to represent the sense of the original rather than strain after literal exactness (*Ep.* lvii. *ad Pammachium*; cvi. *ad Suniam et Fretelam*). Such, at least, was his general practice: 'non verbum e verbo, sed sensum exprimere de sensu.' He professes to be more careful in the Holy Scriptures 'ubi et verborum ordo mysterium est,' and where 'in verbis singulis multiplices latent intelligentiæ' (*Ep.* liii. *ad Paulinum*); yet he shows with such obvious satisfaction that the apostles and evangelists in their interpretation of the OT sought after 'sensum . . . non verba, nec magnopere de ordine sermonibusque curasse dum intellectui res pateret,' that we may well imagine that in his own translation, even of the Bible, he would be much less literal than he thought he was.[‡] An examination of his translation, such as has been made by Kaulen (p. 169 f.) and Nowack, verifies this expectation. It is the work of a good, though by no means immaculate or scientific Hebrew scholar, aiming at the sense rather than at the words of the original. Occasionally in translating he shows traces of the influence of Rabbinical tradition;[§] occasionally, on the other hand, he inserts a Messianic meaning in the translation where the original does not bear it;[‖] and he is fond of *interpreting* Hebrew proper names, thereby reversing the practice of the LXX translators, who frequently solve the difficulty of a hard Hebrew word by simply transliterating it in Greek characters; a few amplifications are found where the verse seems to need them;[¶] in other cases the pleonastic Hebrew is compressed in the Latin.[**]

---

[*] It runs: 'Postea quum accubuissent undecim apparuit eis iesus et exprobravit incredulitatem et duritiam cordis eorum quia his qui viderant eum resurgentem non crediderunt. Et illi satisfaciebant dicentes sæculum istud iniquitatis et incredulitatis substantia (*Cod. Vat.* sub satana) est quæ non sinit per immundos spiritus veram dei apprehendi virtutem. Idcirco jam nunc revela justitiam tuam'; cf. Resch, *Agrapha*, p. 456 (*TU* v. 4).

[‡] For the Romans see Sanday-Headlam (*International Critical Commentary*), p. lxvi

[§] In the third volume (Prolegomena) to Tischendorf's *Novum Test. Græce*, ed. 8, Leipz. 1894, p. 971.

[*] Kaulen, p. 166; Westcott, p. 1714; the latter says of Jerome's work that it is 'a remarkable monument of the substantial identity of the Hebrew text of the 4th cent. with the present Masoretic text'; and with regard to the Bks. of Samuel, Wellhausen speaks even more strongly in the same direction, *Der Text d. Bücher Samuelis*, Göttingen, 1872, p. 3, Anm. 2.

[†] Nowack, *Die Bedeutung des Hier. für die alttest. Kritik*, Göttingen, 1875, asserts that the identity is not complete, and that in many cases Jerome follows the Greek translators, or Chaldee, or Syriac, whilst in some variant readings he stands quite alone; similarly H. P. Smith, 'The Value of the Vulgate Old Test. for Textual Criticism,' in the *Presbyterian and Reformed Review*, April 1891, notes that in a number of cases Jerome's text varies from that of the Massoretes, and even where it simply shows agreement with the Greek it is not always dependent upon it; again, 'it has in a number of cases readings agreeing with the Syriac where the derivation of one from the other is unlikely; it shows besides a number of variants in which it stands alone.'

[‡] *Præf. in Dan.*: 'Danielem prophetam juxta LXX interpretes Domini Salvatoris ecclesiæ non legunt, utentes Theodotionis editione; et cur hoc acciderit nescio.'

The translation, too, varies in the different books; some were translated with the utmost care, some were finished in extraordinarily short time. In the *Prologus Galeatus* Jerome speaks of the diligence he had bestowed on the Bks. of Samuel and Kings,[††] and Kaulen ranks his translation of the historical books as his best work,[‡‡] and after them Job and the prophetic books. Proverbs, Ecclesiastes, and Song of Songs are carefully rendered, notwithstanding the short time that was directly spent on them; but Judith and Tobit, which were translated in great haste, show more dependence on the Old Latin version. In spite of this occasional unevenness, then, we may confidently assert that the general standard of the translation is a very high one; and we may gladly echo the words of the 'translators to the reader' in our own AV, that Jerome performed his task 'with that evidence of great learning, judgment, industry, and faithfulness, that he hath for ever bound the Church unto him in a debt of special remembrance and thankfulness.'

It must be remembered that the Latinity of the Vulgate is thus partly that of the Old Latin; and, even where Jerome was translating anew, he probably modelled his style, perhaps unconsciously, on that of the older versions. The Latin of those versions was the Latin of ordinary popular conversation, the old 'lingua rustica' with all its archaic characteristics, spoken not simply by the lower classes, but generally, even in Rome and amongst the higher classes; different, of course, from the classical Latin of literature, but at the same time not simply confined to Africa in its popular use, as some writers seem to imagine. Nor, again, do we get this Latin in its natural form; anxiety to reproduce the original as accurately as possible has led to the introduction and preservation of numerous Græcisms and Hebraisms in the translation; and we hardly ought to deplore this when we reflect how this literalism has revealed to the Western world the matchless beauty and power of Hebrew. The Latin of the Vulgate is therefore at once artificial and archaic, and yet forcible, clear, and majestic.[*]

The textual criticism of the Vulgate OT is, alas! still in its infancy. Heyse and Tischendorf published in 1873 a collation of the Codex Amiatinus throughout the OT;[†] and Vercellone has furnished valuable material for the Pentateuch and historical books in the mass of variant readings collected and arranged in his two volumes of 'Variæ lectiones.'[‡] H. P. Smith[§] has devoted some attention to examining and classifying the MSS whose readings are there quoted, with the result of awarding a higher place to the Codex Amiatinus in the OT than even in the NT: he maintains that for a recovery of Jerome's original it is of the first importance, and that any critical edition would have to be constructed on the basis of the Amiatine MS and other MSS belonging to the same group; P. Thielmann has collected a useful amount of material for Wisdom, Sirach, etc. (see Literature, p. 890), and is preparing a critical edition of those books.

iv. HISTORY OF THE NAME.[‖]—For us, as to the Fathers at the Council of Trent, the term *vulgata*—properly *vulgata bibliorum editio, vulgata bibliorum interpretatio, biblia vulgata*—has one meaning, and one meaning only; it means the common authorized Latin version of the Holy Scriptures, translated or edited by Jerome. Yet the expression is older than Jerome's time, and he himself frequently employs it of an edition already in use. It is used primarily in early Latin writers not of a Latin version at all, but of the *Greek* version of the Septuagint,[¶] and so is equivalent to the term *κοινὴ ἔκδοσις*, by which that translation was known;[**] as, however, the LXX was already familiar to Western Europe in the various Old Latin translations which had been made from it, the term *editio vulgata* would naturally be applied to these; though, as Westcott says, there does not seem to be any instance in the age of Jerome of the application of the term to the Latin version without regard to its derivation from the Greek.[*]

[§] 'The Value of the Vulg. Old Test. for Textual Criticism,' in *Pres. and Ref. Rev.*, April 1891, p. 224 f.

[‖] All that can be said on this question seems to be collected in van Ess, p. 24 f.; Kaulen, p. 17 f.; and Westcott, p. 1689.

[¶] See the passages in van Ess, Kaulen, and Westcott; especially Jerome, *Comm. in Isa.* lxv. 20, 'Hoc juxta LXX interpretes diximus, quorum editio toto orbe vulgata est'; and, in any Vulgate Bible, the notes after Est 10^{3} 11^{1} 12^{6} 14^{19}; also Augustine, *De Civ. Dei*, l. xvi. c. 10, 'Fiunt anni a diluvio usque ad Abraham MLXXII. secundum vulgatam editionem hoc est interpretum Septuaginta.'

[**] See the quotations from Origen and Basil in van Ess, p. 25.

From being applied to the *current* version of the LXX, *vulgata editio* would be opposed to the emended text of Origen's *Hexapla*,[†] and so the term acquires the meaning of a corrupt as opposed to an emended text; and in this sense Jerome uses the term interchangeably with *vetus, antiqua editio*,[‡] the very term with which it is now so sharply contrasted.

When Jerome is referring to Latin versions of the Scriptures, he rather uses the terms *in latino, latinus interpres, apud latinos*; and, when speaking of his own, *nos, nostra interpretatio.* As his translation gradually superseded the earlier versions made from the LXX, it was inevitable that the expression which had been applied to them would ultimately pass over to him; but the process was a slow one. The instances given in van Ess, and more fully in Hody,[§] show that even down to the Middle Ages *vulgata editio* was at any rate occasionally used to designate the LXX; while the usual terms by which Jerome's translation was known were *translatio emendatior* [*recens, nova, posterior, Hebraica*], *translatio quam tenet* [*quam recipit*], *Romana Ecclesia*, etc., and most of all, from Bede's time onward, *editio nostra, codices nostri.* Roger Bacon[||] seems to be the first scholar who uses the term *Vulgata* in its modern sense, though he also applies it frequently to the Septuagint.

v. Main Differences between the Latin and the English Bible.—It may be asked, in what way does the Vulgate Bible differ from our own Authorized Version? Putting aside variations of rendering and reading, the differences are in the number of books or portions of books received into the Canon, the order of books, and the numbering and division of the chapters. These differences are entirely in the OT; in the NT the order of books is the same (though the Council of Trent[¶] in its list of books places the Ep. of James *after* those of John), and the 'Ep. to the Laodiceans,'[**] though found in many Vulgate MSS, is absent from the best, and from the official printed text. Many MSS indeed vary in the order of the books, and the Cath. Epp. often immediately succeed the Acts; but this order has not been adopted in the Clementine text.

The books in the OT are: Genesis, Exodus, Leviticus, Numeri, Deuteronomium, Josuae, Judicum, Ruth, Quatuor Regum, Duo Paralipomenon (*i.e.* Chronicles), Esdræ primus et secundus, qui dicitur Nehemias, *Tobias, Judith*, Esther, Job, Psalterium Davidicum centum quinquaginta Psalmorum, Parabolæ, Ecclesiastes, Canticum Canticorum, *Sapientia, Ecclesiasticus*, Isaias, Jeremias *cum Baruch* (Lamentations is included under Jeremiah in the Tridentine list, though printed separately as 'Threni' in the Bible), Ezechiel, Daniel; duodecim Prophetæ minores, *id est*: Osea, Joel, Amos, Abdias (*i.e.* Obadiah), Jonas, Michæas, Nahum, Habacuc, Sophonias (*i.e.* Zephaniah), Aggæus (*i.e.* Haggai), Zacharias, Malachias; *Duo Machabæorum, primus et secundus.* The order of books, it will be seen, is the same as in an English Bible, except that the books which we count apocryphal (and which are printed in the above list in italics) are with us placed at the end; the sequence of books, however, is the same in our 'Apocrypha,' save that we insert the two additional books of Esdras and the Prayer of Manasses, which are not mentioned in the Trent list, but form in the Clementine Vulgate an appendix to the Bible, headed by the note 'Oratio Manassæ, necnon libri duo, qui sub libri tertii et quarti Esdræ nomine circumferuntur hoc in loco, extra scilicet seriem canonicorum librorum, quos sancta Tridentina synodus suscepit, et pro canonicis suscipiendos decrevit, sepositi sunt, ne prorsus interirent, quippe qui a nonnullis sanctis Patribus, et in aliquibus Bibliis latinis tam manuscriptis quam impressis reperiuntur.' See also art. Apocrypha in vol. i. esp. p. 115 f.

With regard to differences of *amount* contained under the title of this or that book, or the *arrangement* of matter in it, the following should be noticed. In most of the books of the OT the only difference found is an occasional variation in the versing, the last verse in a chapter being split up into two, and so on; these are too unimportant to notice. It should be remembered that in its numeration of the Commandments the Vulgate Bible includes our second commandment in the first, and divides up the tenth into two, thereby preserving the full number of ten; this division is also employed by the Lutherans: see Decalogue.

The Bk. of Esther in the Vulgate contains the additional chapters, which with us are printed separately in the Apocrypha after Judith. The later chapters of Job are arranged differently from the Authorized Version, though the amount contained is the same: ch. 39 contains 35 verses against 30 of AV, and consequently finishes at 40^5 of AV, and 40^1 = our 40^6; and as this contains 28 verses against our 24, the chapter finishes at 41^9 of AV, and 41^1 = our 41^{10}; but as 41 in the Vulgate has only 25 verses against our 34, the difference ends there, and 42 begins in the Vulgate in the same place as in the AV.

The variation in the Psalms is perhaps the most puzzling. The Vulgate follows the Hebrew in counting the title, where there is one, as the first verse of the Psalms, so that the versing is in these Psalms one verse ahead of AV. Pss. 9 and 10 form one Psalm in Vulgate, so that AV is one Psalm in front of the Vulgate for nearly all the rest of the Psalter, *e.g.* 11 AV = 10 Vulg. etc.; Pss. 114 and 115 forming also one Psalm in Vulgate (*i.e.* 113), the AV is now *two* in front of the Vulgate; but as 116 AV consists of two Psalms in Vulgate, 114 and 115 (which begins at v.^{10} 'I believed, therefore have I spoken'), it does not keep so for long; finally, 147 AV also consists of two Vulgate Psalms, 146 and 147 (which begins at v.^{12} 'Praise the Lord, O Jerusalem'), so that 148, 149, 150 are the same in each.

In Lamentations ch. 5 of AV appears in the Vulgate as a separate book, under the title of 'Oratio Jeremiæ prophetæ.'

In Daniel at 3^{23} follow the additions which are printed in our Apocrypha after Baruch as 'the Song of the three Holy Children'; the versing is different, being $^{24\text{-}90}$ instead of $^{1\text{-}68}$, so that 3^{24} AV $=3^{91}$ Vulgate, which numbers in all 100 verses to the chapter, and runs into 4^{3}, chapter 4^{1} Vulgate beginning at 4^{4} AV but finishing at the same verse (^{34} Vulg. $={}^{37}$ AV); the other apocryphal additions are found at the end of the book, the story of Susanna forming ch. 13, and Bel and the Dragon ch. 14.

---

[*] Jerome, for instance, in quoting the text of the LXX, occasionally translates its reading into Latin instead of writing it down in the Greek, and here too speaks of it as *editio vulgata*; but it is the Greek reading, not the Latin translation of it, which he is referring to: see especially *Comm. in Matt.* xiii. 35, 'Legi in nonnullis codicibus . . . in eo loco ubi nos posuimus et vulgata habet editio *ut impleretur quod dictum est per prophetam dicentem*, ibi scriptum, *per Isaiam prophetam dicentem*; and *Comm. in Gal.* v. 24, 'Et hoc ita admonitum sit, si vulgatam editionem sequimur legentes: *Qui autem sunt Christi carnem crucifixerunt cum vitiis et concupiscentiis*,' but see the whole passage. Van Ess (p. 41) seems to be quite right in maintaining that even here Jerome means the Greek by the *editio vulgata.*

[†] Jerome, *Ep.* cvi. 2.

[‡] *Comm. in Osee* xiii. 4, 'Quæ . . . in antiqua quoque editione LXX non leguntur'; *Ep.* xlix. (*ad Pammach.*) 'Veterem editionem (libri Job) nostræ translationi compara'; *Comm. in Isa. præf. ad cap.* liv.; *præf. in Josue*, etc.

[§] P. 402 f.

[||] See Hody, pp. 420, 429, 'Textus est pro majori parte corruptus horribiliter in exemplari vulgato, hoc est *Parisiensi*; by this he seems to mean the type of text which was produced and sold in Paris; elsewhere (p. 425) he uses *vulgata* of the LXX, or its Latin representative, as opposed to Jerome's translation, 'Quare cum translatio Ieronymi evacuavit translationem vulgatam LXX et similiter Theodotionis, ut certum est omnibus, oportet quod Biblia qua utimur sit translatio Ieronymi,' etc.

[¶] Sess. iv. *Decretum de Canonicis Scripturis.*

[**] For this apocryphal letter see Lightfoot, *Colossians*, pp. 274–300; also Westcott, *Canon of the NT*, App. E, p. 580.

vi. MANUSCRIPTS OF THE VULGATE.—Anything like a complete enumeration of the Vulgate MSS in Europe would be out of the question; there are thousands, not only in the public libraries, but in private libraries and collections. Berger has examined more than 800 in the libraries of Paris alone; and it is estimated that the total number cannot be less than 8000. Nor would a complete enumeration, even if possible, be of much use to the student; the majority are late 13th and 14th cent. MSS, of very slight critical value, and probably all presenting the corrupt type of text about which Roger Bacon used such strong language.

The lists may be consulted which have been drawn up by Le Long, *Bibliotheca Sacra*, ed. 1723, vol. i. p. 234 f.; Vercellone, *Variæ lectiones*, Romæ, 1860, vol. i. p. lxxxiii f., ii. p. xvii f.; in the fourth edition of Scrivener's *Introduction*, vol. ii. p. 67 f., the present writer has drawn out a selected list of 181 manuscripts, mainly of the NT; Berger (*Histoire de la Vulg.* etc. pp. 374–422) gives a good list of 253 MSS; and the largest list yet published is that of Dr. Gregory in the third volume of Tischendorf's *Novum Testamentum Græce*, ed. viii. pp. 983–1108, where some 2270 MSS are enumerated; they are not, however, described with the detail that characterizes M. Berger's list. We have endeavoured here to draw up a list of the more important Vulgate MSS, arranged, according to the type of their text, as sketched out in the history given above. The student can thus, if he wishes, test our theory of the transmission and modification of the text by his own collations; and if he examines other MSS not mentioned in the list, he can determine more easily in which class to place them.

Our list is based mainly on the materials supplied by Berger. The reader will bear in mind that the classification can be only approximate, and that there are MSS which it will be difficult to assign exclusively to this or that group; and indeed the earliest MSS on the list are among those which it is difficult to class, though we may venture to describe them as *early Italian texts*; after them we may place the early *Spanish* texts, and then the other families in due course. The Roman numerals in square brackets signify the centuries to which the MSS are usually assigned.

I. EARLY ITALIAN TEXTS.—*Codex Fuldensis* of the NT, at the Abbey of Fulda in Prussia [vi]; written for Bp. Victor of Capua, and corrected by him A.D. 541–546. The Gospels are arranged in one narrative, based on the order of Tatian's Diatessaron, but the text has been altered to the Vulgate throughout; in the Epp. Laodiceans follows Colossians. Published by E. Ranke (Marburg, 1868). Cited by Tischendorf as *fuld*, by Wordsworth as F.

The *Milan Gospels*; Ambrosian Library, C. 39 inf. [vi]; uncials; the sections and canons in the margin are written in Greek characters, while certain peculiarities of spelling and of reading also suggest that the scribe had a Græco-Latin MS before him. Defective in parts. Wordsworth's M in Gospels.

Codex Forojuliensis, at Cividale, Friuli: Gospels [vi or vii], Matt., Luke, and John are at Cividale in Friuli; these were published by Bianchini, *Evangeliarium Quadruplex*, etc., tom. ii. app. p. 473 f. (Romæ, 1749). The latter part of Mark (12^{21}–16^{20}) is at Prague, and was edited by J. Dobrowsky, *Fragmentum Pragense* (Pragæ, 1778); the earlier part is at Venice, but in a wretched condition, and illegible. Tischendorf's *for* and *prag*, Wordsworth's J.

Codex Perusinus; part of Lk (1^{1}–12^{7}, much mutilated), in a purple MS, Chapter Library, Perugia [vi or more probably vii]. Published by Bianchini, *Evan. Quadr.* tom. ii. app. p. 562; Tischendorf's *pe*, Wordsworth's P.

The *Harley Gospels*, Brit. Mus. Harl. 1775 [vi or vii], in a small but beautiful uncial hand, written probably in Italy: the first hand omits the text Jn 5^{4}. Tischendorf's *harl*, Wordsworth's and Bentley's Z.

II. EARLY SPANISH TEXTS.—Leon, Cathedral Archives 15 [vii]; a palimpsest MS, containing 40 leaves of a Bible in 7th cent. hand, *i.e.* portions of Ch, Jer, Ezk, 1 Mac, Ac, 2 Co, Col, 1 Jn. The text is Vulgate at base, especially in Jer, Ac, and Pauline Epp.; in other portions mingled with Old Lat. elements and characteristic Spanish interpolations; the 'three heavenly witnesses' occurs 1 Jn 5^{7}. See Berger, pp. 8 f., 384.

The *Ashburnham Pentateuch*, or, more strictly speaking, the Pentateuch of St. Gatien of Tours: now at Paris, Bibl. Nat., *Nouv. acq. Lat.* 2334. A splendid MS, with interesting pictorial illustrations [vii or beginning of viii]; uncial writing; a good Vulgate text. The Palæographical Soc. (i. pl. 234) ascribe the MS to North Italy, but Berger (pp. 11, 12, 410) makes out a strong case, mainly from the nature of the illustrations, for Spain.

Codex Cavensis; Bible [ix probably] written in Spain, probably in Castile or Leon, in small, round, and beautiful Visigothic minuscules, by a scribe Danila; now in the Benedictine Abbey of Corpo di Cava, near Salerno: a copy of it was made early in this century by the Abbate de Rossi, and is in the Vatican (Lat. 8484). The text is Spanish, and in the Gospels shows signs of being a revision; occasionally it is mingled with Old Latin elements; it contains 1 Jn 5^{7} *after* 5^{8}. Before the Pauline Epp. there is the '*Proœmium sancti Peregrini œpiscopi*,' and the canons of Priscillian; after the Apocalypse there is an incomplete *Psalterium ex Hebrœo*; the Psalter in the body of the MS is Gallican, but with numerous Old Latin marginal variants; see Berger, pp. 14, 15, 379. Tischendorf's *cav*, Wordsworth's C.

Codex Toletanus; Bible, Visigothic writing [probably viii], in the Nat. Libr. at Madrid. Characteristic Spanish text, with numerous interpolations; has the text 1 Jn 5^{7} in same place as *Cavensis*, but in the Gospels does not present such a good text as that MS. Collated for the Sixtine revision by Chr. Palomares, whose work is preserved in the Vatican (Lat. 9508); the collation, however, was not used in that revision, as it reached Card. Caraffa too late. It has been published by Bianchini, *Vindiciæ Can. Scr.* pp. xlvii–ccxvi (Romæ, 1740), and reprinted by Migne, *Pat. Lat.* tom. xxix. p. 875 f. Tischendorf's *tol*, Wordsworth's T; see Berger, p. 12.

Madrid, University Library, No. 32; second volume of a magnificent Bible, in Visigothic hand [ix or x], containing Proverbs-Apocalypse. The ornamentation occasionally resembles the *Codex Cavensis*; the Pauline Epp. are headed by the Canons of Priscillian and the *proœmium Peregrini*; see Berger, p. 15.

Codex Æmilianeus, at Madrid, Royal Academy of History, F. 186. Bible [x], incomplete, and commencing in the middle of the Psalter; in the NT Laod. is written by the second hand, in the margin. The first hand resembles *Cavensis*, though it is somewhat larger; the writer's name is given as Quisius. The MS formerly belonged to the Abbey of St. Æmilianus (St. Millan de la Cogolla), between Burgos and Logroño; see Berger, p. 16.

Leon, Cathedral Archives, 6; second volume of a Bible [x], beginning at Isaiah; the NT has the Canons of Priscillian and the *proœmium Peregrini* after the Acts, and contains Laod. The writing resembles *Cavensis*, but is somewhat larger; the names of two scribes—Vimara, a presbyter, and John, a deacon—are given; see Berger, p. 17.

Codex Gothicus Legionensis, preserved in the Church of San Isidro at Leon; Bible [x], folio, dated A.D. 960, and written by the notarius Sanctio. The MS has belonged to the Church of San Isidro since the 12th cent., and was collated for Cardinal Caraffa by Fr. Trugillo, bp. of Leon, for the Sixtine revision, and by him called the *Codex Gothicus*. The collation is preserved in the Vatican (Lat. 4859). There are a large number of Old Latin variants in the margin, especially in the OT; and Tobit and Judith are in the Old Latin throughout; see Berger, p. 18; he has printed the Old Latin variants in the Bk. of Job in *Notices et extraits des MS de la B. N.* etc., tome xxxiv. 2e partie, p. 20 f. (Paris, 1893).

Codex Complutensis (*i.e.* belonging to Complutum = Alcalá), Madrid, University Library, 31. Bible [ix or x], interesting text; Ruth is Old Latin, agreeing closely with quotations in Ambrose; the 4th book of Esdras is also preserved in an interesting text, with variant readings in the margin; Esther, Tobit, Judith, 1 and 2 Mac, are also in an Old Latin version. In the NT the text is Vulgate, but with Spanish characteristics; Laodiceans follows *Hebrews*. Ruth and parts of Maccabees have been published by Berger in the *Notices et extraits*, mentioned above, pp. 8–12, 33–38; see also his *Histoire*, p. 22.

Paris, Bibl. Nat., Lat. 6. Bible in four vols. folio [x.], from the Abbey of Rosas in Catalonia. Tobit and Judith are preserved not only in the Vulgate, but also in the Old Latin; and there are interesting Old Latin and other variants in the margins of the Acts, while Ac 11^{1}–12^{8} is entirely Old Latin; see Berger, p. 24. Wordsworth's R in Acts.

III. ITALIAN TEXTS TRANSCRIBED IN BRITAIN.—(*a*) *Northumbrian MSS.*—*Codex Amiatinus* of the whole Bible, in the Laurentian Library at Florence [beginning of viii]. One of the three *Pandects* written, either at Wearmouth or Jarrow, by order of the Abbot Ceolfrid. He took it as a present to the pope on his last journey to Rome in A.D. 715, but died before he reached the Holy City, and his followers carried on the volume and offered it to the chair of St. Peter. The date and origin of the MS have been thus fixed by the successful deciphering of an erased inscription on the first leaf; see the Palæographical Society's *Facsimiles*, ii. pls. 65, 66, and *Studia Biblica*, ii. p. 273

(Oxford, 1890). Later, the MS was placed in the Monastic Library at Monte Amiata, whence it was sent to Rome for use in the Sixtine revision. Finally, it was placed in the Mediceo-Laurentian Library at Florence. The NT was published in full by Tischendorf (Leipzig, 1850; second ed. with a few emendations, 1854); and in 1873 Heyse and Tischendorf edited the *Biblia Sacra Lat. Veteris Test. Hieronymo interprete*, printing the *Clementine* text of the OT, but dividing it according to the 'cola and commata' of *am*, giving a collation of its variant readings, and printing in full the *capitula* to the various books, which are found in Amiatinus, but not in the Clementine Vulgate; Lagarde has published Wisdom and Sirach, see vol. iii. p. 51.

The text of the MS in the NT, and especially in the Gospels, is a very pure Vulgate type on the whole, though with the characteristics of British MSS in it; see the Oxford *Vulgate*, i. pp. 709, 726–732. In the OT it is also good, but in Ecclesiastes and Ecclesiasticus Old Latin elements have crept in; see Berger, p. 38. Tischendorf's *am*, Wordsworth's A.

Durham Cathedral Library, A. ii. 16; Gospels [vii or viii], said to have been written by Bede, and may very possibly have come from Jarrow. The text is very close to that of Amiatinus, but where it varies Amiatinus is usually the better. Bentley's K, Wordsworth's Δ (in St. John only; in the other Gospels it is not cited).

Do., A. ii. 17; St. John, St. Mark, and St. Luke, incomplete [viii], with another fragment of St. Luke, 21^{33}–23^{34}; large uncial hand, and both text and handwriting closely resemble Amiatinus, though the orthography is occasionally different; see Berger, p. 38.

Stonyhurst St. John. The minute but exquisitely written MS of St. John, now in the possession of the Jesuit College at Stonyhurst [vii or viii]; originally, according to a legend as old as the 13th cent., the property of St. Cuthbert, in whose coffin it was found. The text closely resembles Amiatinus, but is on the whole not quite so good. Wordsworth's S in St. John.

British Museum, Cotton Nero D. iv. The superb *Lindisfarne Gospels* [vii or viii], written by Eadfrith, bp. of Lindisfarne, A.D. 698–721, and other scribes. The Latin is accompanied by an interlinear version in the Northumbrian dialect. The text very closely resembles that of Amiatinus, agreeing with it sometimes even in errors; but, as with the MSS mentioned immediately above, where the two differ, Amiatinus usually has the better text. The MS from which these Gospels were copied must have come from Naples; Dom G. Morin (*Revue Bénédictine*, 1891, t. viii. p. 481) has pointed out that at the beginning of the Gospels there are lists of festivals and saints' days, among which appear names peculiar to Naples; and the book may well have been brought to Lindisfarne by the Adrian who was abbot of a monastery near Naples, and who accompanied Abp. Theodore on his journey to England in 668; see Berger, p. 39 f. Bentley's and Wordsworth's Y.

Fragments of Matthew (1^{1}–3^{4}) and John (1^{1-21}) bound up at the end of the famous 'Utrecht Psalter.' The handwriting and text both strongly resemble the Codex Amiatinus, and are about the same dates (vii–viii). Wordsworth's U in Gospels.

For the Psalter itself the reader should consult W. de Gray Birch, *The History, Art, and Palæography of the MS, styled the Utrecht Psalter*, London, 1876; and the later treatise by Count P. Durrieu, *L'origine du MS célèbre dit le Psautier d'Utrecht*, Paris, 1895 (extrait des 'Melanges Julien Havet'); Count Durrieu supposes it to have been written at or near Rheims in the earlier part of the 9th cent. The text is the *Gallican* Psalter.

(*b*) *Canterbury MSS* (traditionally connected with Augustine and with Gregory the Great).—Oxford, Bodley 857, and Auct. D. 2. 14: Gospels formerly belonging to St. Augustine's Library at Canterbury and generally known as 'St. Augustine's Gospels' [vii]. From the point of view of *age*, the MS might well have been brought to Canterbury by some of the later followers of Augustine, but the *text* shows it to be of native origin; it is fairly near to Amiatinus, but has a large number of characteristics partly Irish, partly early Anglo-Saxon; as Berger says (p. 36), it may be placed at the base of the Anglo-Saxon type of text, and must owe its name not to being the personal property of Augustine, but to belonging to the abbey at Canterbury, which was consecrated to his memory. Tischendorf's *bodl*, Wordsworth's O in Gospels.

Cambridge, Corpus Christi Coll. cclxxxvi. Evan.; Gospels [vii], formerly belonging to St. Augustine's at Canterbury, and, according to tradition, sent by Pope Gregory to Augustine; but the text does not bear out this supposition; it closely resembles that of the preceding MS, and is really Anglo-Saxon, though it has been corrected throughout in accordance with a MS of the Amiatinus type. Bentley's B, Wordsworth's X.

British Museum, Cotton Vesp. A. 1. 'Roman' Psalter [ix], known as the 'Psalter of St. Augustine': Anglo-Saxon type of text.

Brit. Mus., Reg. 1. E. vi.; Gospels, imperfect [end of viii]; written in England, and formerly belonging to St. Augustine's, Canterbury; in all probability the second volume of the famous 'Biblia Gregoriana,' mentioned by Elmham ('Hist. Monasterii S. Aug. Cantuar.,' ed. C. Hardwick, Rolls Series 8, London, 1858). Text somewhat similar to those above; Vulgate, mixed with Irish readings; Bentley's P.

(*c*) *Irish and Anglo-Saxon MSS.*—*Book of Armagh*; Library, Trinity Coll., Dublin. New Testament written in a small and beautiful Irish hand, by the scribe Ferdomnach [ix]; it has the *prologus Pilagii in omnes æpistolas*, Laod. occurs after Col., and Acts after Apoc. The late Dr. Reeves, bp. of Down, intended to edit it, and his work has been finished and published by Drs. Gwynn and Bernard of Dublin. The text of the MS is at bottom good and closely allied to Amiatinus; it displays many of the national characteristics, however, small interpolations, explicative additions, and relics of Old Latin readings (thus its *omission* of Jn 5^{4} is all the more remarkable), etc., while the present writer cannot help thinking that it has been to a certain extent corrected from the Greek; see the Oxford *Vulgate*, pp. 714, 715; Berger, pp. 31–33. Wordsworth's D.

The Book of Kells: Trin. Coll., Dublin, A. 1. 6; Gospels [vii or viii], given to Trinity College by Abp. Ussher; named from Kells or Kenanna, a monastery in County Meath. It is famous for being perhaps the most perfect existing specimen of Irish handwriting, as the *Lindisfarne Gospels* are of English; see Thompson, *Greek and Lat. Palæography*, pp. 239, 245, 246. But the text is also valuable, much resembling the *Book of Armagh*, with the usual Irish characteristics, and a great fondness for conflate readings. A collation has been given by Dr. Abbott in his edition of the Codex Usserianus (Dublin, 1884); see also Berger, p. 41. Wordsworth's Q.

Book of Durrow: Trin. Coll., Dublin, A. 4. 5. Gospels [vi–vii]; according to an inscription on what was the last page, the book was written by St. Columba in twelve days, but, as with the Echternach Gospels (see below in this column), this, with the rest of the book, must have been copied from an earlier exemplar; Durrow or Dearmag was a monastery in King's County, founded by Columba. Irish text, *i.e.* good Vulgate at bottom, but with some of the characteristic national interpolations; collation given by Dr. Abbott in his edition of the Codex Usserianus; see also Berger, p. 41. Wordsworth's *durmach*.

The Book of Moling or *Mulling:* Trin. Coll., Dublin. Gospels [viii or ix], apparently never bound, but preserved in a case. An inscription gives the name of the scribe as Mulling, *i.e.* probably St. Mulling, bp. of Ferns, at the end of the 7th cent.; but, as with the Book of Durrow, the inscription must have been copied from an earlier MS. Characteristic Irish text, sometimes with interesting variant readings; see Berger, p. 33, and H. J. Lawlor, *Chapters on the Book of Mulling*, Edinburgh, 1897. The MS is disfigured by damp, and is illegible in parts.

The Stowe St. John: bound up with the famous *Stowe Missal*, Royal Irish Academy, Dublin. Written in pointed Irish minuscules [viii or ix]; portions of the Gospel only. Good Vulgate text with the usual traces of Old Latin mixture; see J. H. Bernard in *Transactions of the Royal Irish Academy*, vol. xxx. pt. viii. (Dublin, 1893), who gives a description and collation of the MS; also Berger, p. 42.

Gospels of Macdurnan: Lambeth Palace Library. Written by the scribe Mæielbrith Mac-Durnain [ix–x], delicate and rather cramped Irish writing; Irish text.

Lichfield, Chapter Library. Gospels [vii–viii], traditionally ascribed to St. Chad, bp. of Lichfield. The MS was perhaps written in Wales, but is in an Irish hand; it belonged to the Church of St. Teliau at Llandaff, but was brought to Lichfield towards the end of the 10th cent. The writing and ornamentation are very beautiful, and resemble the Book of Kells; Irish text, possibly corrected occasionally from the Greek. Contains Mt 1^{1}–Lk 3^{9}; collation of the MS, with introduction, etc., by Scrivener, *Codex S. Ceaddæ Latinus*, Cambridge, 1887; see also Bradshaw, *Collected Papers*, pp. 458–461 (Cambr. 1889). Wordsworth's L in Gospels.

Cambridge, University Library, Kk i. 24; Luke and John, nearly complete [vii–viii], half uncial Irish hand, somewhat resembling the Book of Kells or the Gospels of St. Chad. In the first 8 chs. of St. Luke the text is a strange medley of Vulgate and Old Latin; for the rest, the text is Vulgate with occasional Old Lat. readings.

Selden Acts: Oxford, Bodl. 3418 (Seld. 30). Saxon MS [viii], valuable text. Wordsworth's O in Acts.

Rushworth Gospels or *Gospels of MacRegol:* Oxford, Bodl. Auct. D. 2. 19 [ix], written by an Irish scribe, who died A.D. 820; has an interlinear Anglo-Saxon version. Irish text, with constant inversions of order in words, especially in St. Matthew; possibly, too, corrected from the Greek. Collation given by W. W. Skeat in *The Gospel of St. Matthew; A.-S. and Northumbrian versions*, Cambr. 1887. Wordsworth's R in Gospels.

Brit. Mus., Egerton 609. Gospels [ix], formerly belonging to the monastery of Marmoutier (Majus Monasterium), near Tours. It is an interesting specimen, however, of a MS, written abroad in ordinary Caroline minuscule, but with *Irish* ornamentation, and with a regular Irish type of text; see Berger, p. 47. It contains a number of variant readings which seem peculiar to the MS. Tischendorf's *mm*; Wordsworth's E.

This MS serves as an introduction to our next class of MSS.

IV. Continental MSS, written by Irish or Saxon Scribes, and showing a Mixture of the two Types of Text.—*Gospels of St. Gatien*, Paris, Bibl. Nat., *Nouv. acq. Lat.* 1587 [viii], Anglo-Saxon hand, but probably written on the Continent; belonged to St. Gatien's at Tours. The text contains a number of Old Lat. readings; in other respects resembles the Egerton MS. Usually cited as *gat*; Berger, p. 46.

The *Echternach Gospels:* Paris, Bibl. Nat. 9389 [probably viii], written in an Irish hand, and belonging formerly to the Benedictine Abbey of St. Willibrord at Echternach; yet an interesting inscription, obviously taken from the exemplar from which the MS was copied, asserts that the scribe corrected the text from a MS, 'de bibliotheca Eugipi præspiteri quem ferunt fuisse sancti Hieronimi.' The Eugippius here referred to was almost certainly the Abbot of Lucullanum, near Naples, in the early part of the 6th cent. The text, however, which has a series of variant readings noted in the margin, is disappointing; neither the first hand nor the corrector seems to display a consistent text; and we have a strange mixture of good Vulgate, Continental, and Irish types; see Berger, p. 52. Wordsworth quotes it regularly.

Codex Bigotianus: Paris, Bibl. Nat., Lat. 281 and 298. Gospels [viii], formerly at Fécamp, just above Havre, and therefore directly facing the English coast. The text and the handwriting are what might be expected from its position; it is written in a fine uncial hand, but the ornamentation shows traces of British influence; and the text is a good example of the mixture of Continental and British types that would be produced by an Irish scribe writing in a French monastery; see Berger, p. 50. Wordsworth's B in Gospels.

Brit. Mus., Add. 5463. Gospels from the monastery of St. Peter at Beneventum [viii or ix], written in a fine revived uncial hand; usually supposed, on the strength of an inscription, to have been written for Ato, abbot of St. Vincent de Volterno, near Beneventum, about the middle of the 8th cent. Berger would, however, place it in the 9th cent. The text is a combination of British and Continental types; see Berger, p. 92. Wordsworth quotes its readings.

Angers: Public Library No. 20. Gospels [ix or x], written in a French hand, but with traces of Irish influence in the ornamentation; and the text is Irish: see Berger, p. 48.

Brit. Mus., Reg. I. A. xviii. Gospels [ix or x], known as the Gospels of Æthelstan, and according to tradition presented by him to St. Augustine's, Canterbury. Written on the Continent, but with a good many Irish characteristics in the text; see Berger, p. 49.

Brit. Mus., Harley 1772. Epp. and Apoc. (viii or ix), in a French hand, but with a good deal of Irish work in the initials and ornamentation; written, therefore, apparently in France, but partly by an Irish scribe. The text has been carefully corrected, and the readings of the first hand are often quite illegible; it contains a good many Old Latin and some Spanish readings; Col. is placed *after* Thess., and Jude and Laod. are both wanting; see Berger, p. 50. Wordsworth's Z_2.

Paris, Bibl. Nat., Lat. 9382: Prophets (Jerem.–Daniel), Saxon handwriting [ix], and a good text. Berger (p. 51) remarks that it is perhaps the only MS of the Prophets we possess that comes from the British Isles.

Do., Lat. 11,553. The second half of a Bible [ix], apparently written in the district round Lyons: the *S. Germani exemplar latum* of R. Stephanus (not *Germanum latum*, as he is sometimes made to call it); it was a St. Germain MS. The text is strangely mixed; in the OT, Spanish elements predominate, but the text is good, especially in Pr, Ec, Song of Songs; in the NT, Mt is Old Lat., and cited among the OL MSS as g_1 (see vol. iii. p. 51); in the other Gospels there are many OL readings, but the text at bottom is of the class copied in France by Irish scribes; Acts, good text, though showing Spanish influence; Cath. Epp., poor Spanish text; Apoc., good; Pauline Epp., fairly good, but with some OL readings. See Berger, pp. 65–72. Wordsworth's g_1 in Mt, G in rest of NT.

Würzburg University Library, Mp. th. f. 61. St. Matthew [viii], written in an Anglo-Saxon hand, with interlinear glosses; mixed text.

Do., Mp. th. f. 12. Epp. of St. Paul [ix], with Irish glosses; a well-known MS. The glosses have been often published, see Zimmer, *Glossæ Hibern.*, Berlin, 1881; Whitley Stokes, *Old Irish Glosses of Würzburg and Carlsruhe*, Austin, Hertford, 1887; Olden, *Holy Scr. in Ireland a thousand years ago*, Dublin, 1888.

Do., Mp. th. f. 69. Epp. of St. Paul [viii], with Irish initials; Col. after Thess.

Oxford, Bod. Laud. Lat. 102. Gospels, Saxon hand [early x]; it formerly belonged to Würzburg, and is among the MSS which were bought there at the instance of Abp. Laud, after the sack of the city in 1631; mixed text.

Other Würzburg MSS worthy of notice, though not possessing Irish characteristics, are:—Mp. th. q. 1 *a*. Gospels [vii], fine uncial hand; belonged, according to tradition, to St. Kilian, in whose tomb it is said to have been found. Mp. th. q. 1. Gospels [x]; q. 4 Gospels [xi]; f. 65 Gospels [viii or ix]; f. 66 Gospels [viii or ix]; f. 67 Gospels [vii or viii]; semi-uncial, and with a good many Old Lat. readings in the first hand; f. 68 Gospels [vi or vii]; good text in the first hand, resembling Amiatinus. And lastly, Mp. th. f. max. 1 Bible [xi]; the Pauline Epp., Laod., and the book of Baruch have been abstracted.

For the Würzburg MSS see Schepps, *Die ältesten Evang. Handschriften der Univ. bibliothek*, Würzburg, 1887, and Köberlin, *Eine Würzb. Evang. Handschr.* (Program d. Studienanstalt bei S. Anna in Augsburg, 1891).

V. TYPE OF TEXT CURRENT IN LANGUEDOC (Berger, pp. 73–82).—Paris, Bibl. Nat., Lat. 4 and 4^2; *Codex Aniciensis*, Bible [ix or x]. The text of the first hand somewhat resembles that of the Vallicellian Bible (see below, p. 889), but a contemporary hand has added a number of corrections (amongst others the 'three heavenly witnesses,' 1 Jn 5^7), and these often show traces of Spanish influence in the Acts.

Do., Lat. 7. Bible [xi], with fine illuminations; text coloured by Spanish influence, and in the Acts resembling the corrector of the Cod. *Aniciensis*.

Do., Lat. 254; *Codex Colbertinus* of the New Testament [xii or xiii], written in S. of France. The text is Old Latin in the Gospels, and is cited among Old Latin MSS as *c* (see vol. iii. p. 51); in the rest of the NT the text is Vulgate, and in a later hand, with all the characteristics of the S. of France about it.

Brit. Mus., Harley 4772, 4773: Bible in two fine volumes [early xiii], the second probably of later date than the first; written in S. of France, and with text belonging to that region.

Paris, Bibl. Nat., Lat. 321: New Testament [early xiii], belonging to Perpignan. Ordinary text in Gospels, but parts of the Acts (1^1–13^7 28^{16} *ad fin.*) are Old Latin and allied to the text of the Codex Laudianus (E *e*) and the Gigas (*gig*); Catholic Epp. have a Spanish text, resembling the *Codex Toletanus*. The Old Latin portions of the Acts have been published by Berger, *Un ancien texte Lat. des Actes des Apôtres retrouvé dans un MS provenant de Perpignan (Notices et extraits des MSS de la Bibl. Nat. et autres Bibliothèques, tome* xxxv. 1^{re} *partie)*, Paris, 1895. Wordsworth's *p* in Acts.

Codex Demidovianus. Bible [xiii], but copied from an earlier exemplar; it belonged in the last century to a Paul Demidov Gregorovitch, but its present position is unknown. The text was published in Acts, Epp., and Apoc. by Matthæi in his New Testament (1782–8); and Tischendorf has quoted it from his edition (under the sign *demid*). Wordsworth's *dem.* in Acts.

VI. OTHER FRENCH TEXTS.—For other types of French texts anterior to the Theodulfian and Alcuinian recensions the reader must study M. Berger's book, p. 83 ff. All that we can do here is to enumerate some of the MSS he quotes, and the centres around which he has grouped them; *e.g.*—

MSS from Limoges: Paris, Bibl. Nat. 5 and 5^2 [ix]; 8 and 8^2 [xi]; 315 [xii or xiii]; 2328 [viii or ix]; 315 [xii–xiii].
  from Tours: Paris, Bibl. Nat. 112 [x], 113.
  from Fleury: Orleans, Public Library 16, portions of 5 MSS of different dates.
  from Chartres: St. John, Paris, Bibl. Nat. 10,439 [viii].

Other MSS from the N. of France: Autun, Grand Séminaire 3 [viii], Paris, Bibl. Nat. 17,226 [vii]; 256 [vii]; 14,407 [ix].

Bibles from St. Riquier: Paris, Bibl. Nat. 11,504–5 [ix], the *S. Germani longum exemplar* of R. Stephanus; interesting text; Bibl. Nat. 45 and 93 [ix or x], the *Codex Regius*; mixed text. Allied in text to these are the MSS Bibl. Nat. 309 [xi] and 305 [xi], both New Test. without Gospels.

The Metz MS (Public Library 7) preserves an interesting specimen of the mixed texts current at the time [ix]; see p. 546^a.

MSS from Corbie on the Somme, near Amiens:—

Amiens, Public Library 6, 7, 11, 12, portions of a Bible in several volumes [viii or ix].
  18, the famous *Corbie Psalter* [viii–ix].
  10, The four books of Esdras [ix]: one of the few MSS containing the whole book; see R. L. Bensly, *The Missing Fragment of the 4th Book of Ezra*, Cambridge, 1875.

Paris, Bibl. Nat., Lat. 13,174; Acts, Cath. Epp., and Apoc. [ix].

Do., Lat. 11,532–3: Bible [ix]; contains the *Psalterium ex Hebræo*; text interesting but mixed; slight Spanish elements in it.

Bible from the Abbey of St. Vedast at Arras: Vienna, Imperial Library 1190 [ix].

VII. SWISS MSS (especially St. Gall).—Irish monks and scribes penetrated through France, and right down into Switzerland and Italy; it is thus that we get Vulgate MSS written often in Irish hands, and containing the same mixture of Irish and Continental types of text, not only in France, but in such centres of monastic life as St. Gall, Reichenau, Einsiedeln.

Of these the *Codices Sangallensis* and *Boernerianus* (Δδ and *Gg*), which are really different parts of the same interlinear Græco-Latin MS, belong rather to Old Latin than to Vulgate MSS, and are described above (see LATIN VERSIONS); though the base of δ in the Gospels is perhaps more Vulgate than Old Latin: possibly the Græco-Latin Psalter now preserved in the Basle Library (A. vii. 3) may also be part of this same MS.

The same may be said of the *Codex Augiensis*, now at Trin. Coll., Cambr. (B. 17. 1.).

Early types of such mixed Irish and Continental texts are found in the St. Gall MSS No. 10. Job, Prov., Eccl., Canticles, Wisdom, Ecclesiasticus [x], Irish hand; No. 51, Gospels [viii], Irish hand, mixed text; No. 60, St. John [viii or ix], Irish hand, mixed text. Grandducal Library, Karlsruhe; the Reichenau *Codex Augiensis* 211; Gospels [late ix], with a number of Irish readings. Berne, University Library 671; Gospels [ix or x], fine Irish hand, mixed text. Milan, Ambrosian Library I. 61 sup.; Gospels [viii ?], in semi-uncial Irish hand; formerly at Bobbio. The text has a good many Irish readings in it, and the readings of the corrector or correctors are extremely interesting and valuable; see Berger, pp. 55–59.

We are able to fix some of the St. Gall MSS to the middle of the 8th cent., and to one scribe, Winithar, who was a monk in the monastery—

No. 2, Pentateuch, Acts, and Apoc.; mixed text, in the Acts close to Br. Mus. Add. 11,852; Wordsworth's S in Acts.

No. 70, Epp. of St. Paul; Pastoral Epp. placed after Heb.; the text is very corrupt.

No. 907, Catholic Epp. and Apoc. with interesting prefatory matter; the text is very corrupt, resembling the *Codex Lemovicensis* (Paris, Bibl. Nat. Lat. 2328, noted above).

More important, perhaps, than the work of Winithar was that of a slightly later scribe, Hartmut, who was abbot of St. Gall, 872–883; the following MSS were written either by him or under his direction: Nos. 7, Chron. and Sapiential books; 81, Sapiential books, Job, Tobit; 46, Ezek., Minor Prophets, and Dan.; 45, the same; 77, 78, 82, 79, 83, portions of a Bible; 75, Bible. To them must be added—

Brit. Mus., Add. 11,852, Pauline Epp. (including Laod.), Acts, Cath. Epp., Apoc. [ix], interesting text. See E. Nestle, *Bengel als Gelehrter*, pp. 58–60, Tübingen, 1892; Wordsworth's U in Acts; text agrees closely with the St. Gall MS 2.

St. Gall, however, was connected with other main lines of MS transmission, such as those which ran through Chur, Milan, Bobbio, and Vercelli; and these in turn were in communication through the S. of France with the N.E. frontier of Spain, so that we find the Southern type of text again creeping up and showing traces in the Swiss and N. Italian MSS. Examples of this are—

The Bobbio MS now at Milan (Ambrosian Libr. E. 26 inf.), containing Chron.-Pauline Epp. [ix-x]; mixed text, with Spanish, Old Latin, and Irish elements in it; Berger, p. 138.

Monza, Collegiate Archives 1$\frac{2}{9}$: fragments of Bible [x], text somewhat similar to the previous MS; these two MSS agree with the Codd. *Boernerianus* and *Augiensis* in omitting the last 3 verses of the Ep. to the Romans; Berger, p. 139.

VIII. ALCUINIAN RECENSION.—Rome, Vallicellian Library B. 6. Bible [ix], considered to be the best MS of the Alcuinian Recension; Wordsworth's V; see Berger, pp. 197-203.

The Tours Octateuch; Tours, Public Library 10 [commencement of ix], text related to the Vallicellian Bible, though not exactly the same.

Bamberg, Royal Library A. I. 5. Bible [ix], a handsome example of this recension; written at Tours. Wordsworth's B in Acts, etc.; see Berger, p. 206, and Leitschuh, *Führer durch d. kgl. Bibl. zu Bamberg*, 1889, p. 82.

Zürich, Cantonal Library C. 1; text resembling the Bamberg MS on the whole, but differing in Pauline Epp.; Berger, p. 207.

Brit. Mus., Add. 10,546. Bible [ix] known as the Codex Carolinus, or the Bible of Grandval (near Basle). Wordsworth's K; see Berger, pp. 209-212.

Paris, Bibl. Nat., Lat. 250. New Testament [ix], probably written at Tours; text closely resembling the last MS; Berger, p. 243.

Cologne, Chapter Library No. 1. Bible [ix] written at Tours with interesting marginal corrections, made by a contemporary hand also probably at Tours.

Paris, Bibl. Nat., Lat. 1. Bible [ix], a splendid MS, presented to Charles the Bald by Vivian, abbot of St. Martin of Tours.

Do., Lat. 2. Bible [ix] known as the Bible of St. Denis or of Charles the Bald; in the NT the Apoc. is wanting. Used by R. Stephens in his Bible of 1528.

Do., Lat. 3. Bible [ix], belonging originally to the monastery of Glanfeuil; parts of the Apoc. supplied by a later hand; see Berger, p. 213.

Monza, Collegiate Archives, G. 1. Bible [ix], written at Tours by the scribe Amalricus, who was afterwards archbishop of Tours: valuable text; Berger, p. 221.

Paris, Bibl. Nat., Lat. 17,227. Gospels written by Adalbaldus [early ix] at Tours; good Alcuinian text, closely resembling the Bamberg and Zürich Bibles; Berger, pp. 243-247.

Nancy, Cathedral Library. Gospels [early ix], written at Tours; a splendid copy. Text resembling the Monza Bible and the Brit. Mus. Gospels below (Add. 11,848); Berger, p. 247.

Brit. Mus., Add. 11,848. Gospels [ix], probably written at Tours.

Paris, Bibl. Nat., Lat. 266. Gospels [middle of ix], written at Tours, and presented by the emperor Lothaire to the Church of St. Martin.

Rome, Church of St. Paul without the walls. Fine Bible [ix], belonged to Charles the Bald, was written probably in the N. of France, and shows Saxon influence in its ornamentation. Mixed Alcuinian text, with a good deal of resemblance to the *Codex Vallicellianus*, still more perhaps to the first Bible of Charles the Bald (Paris, Bibl. Nat., Lat. 1); Berger, p. 292.

MSS (of Caroline school) written in gold (see Berger, pp. 259-277). In *text* these MSS belong rather to the type of the continental Saxon MSS (above, p. 887) than to the somewhat later Tours school.

The famous *Hamilton Gospels* [viii-ix], now in the library of Th. Irwin, Esq., of Oswego, New York; very early Caroline text, with occasional Spanish and Anglo-Saxon elements; Berger, p. 259.

The *Codex Adæ*, of Trier (Stadtbibliothek, No. xxii.), a splendid MS. Gospels [end of viii], written by two hands, the scribe who has written the latter part of the MS having also added a large number of marginal corrections to the former. The first hand shows connexion with the oldest Tours MSS, and especially the *Codices aurei*; the second hand, with the more ordinary Tours type; Berger, pp. 262-267; see also the monograph *Die Trierer Ada-Handschrift*, Leipzig, 1889; the article on the text of the Alcuinian Bibles by Dr. P. Corssen, is most valuable.

Brit. Mus., Harl. 2788. Gospels [viii-ix], written in golden uncials; an extremely fine MS; illuminations of the same school as those of the *Codex Adæ*.

Abbeville, Public Lib. No. 1. Gospels [viii-ix] written in gold, and strongly resembling Harl. 2788; Berger, p. 267.

Paris, Bibl. Nat., Lat. 8850. The Gospels of St. Medard [early ix]; a fine MS; Berger, p. 268.

Do., Lat. 11,955. Portions of Matt. and Mark [viii ?].

Do., Lat. 9383. Gospels [end of viii].

Tours, Public Library 22; formerly at St. Martin's. Gospels [viii-ix], interesting text, on the whole belonging to Alcuinian revision, but with Irish and Old Latin elements in it; Berger, pp. 47, 202, 272, and the Oxford *Vulgate, Epilogus*, p. 720, Tischendorf's *mt*; Wordsworth quotes its readings.

Vienna, Schatzkammer. The famous Gospels [end of viii ?], supposed to have been found in the tomb of Charles the Great; written in gold on purple vellum; Berger, p. 275.

Do., Imperial Library, 652. Psalter [end of viii].

Munich, Royal Library, Lat. 14,000 (=Cim. 55). The splendid Gospels of St. Emmeran [ix, dated 870]. Mixed text, with Anglo-Saxon elements in it; probably written in the N. of France; Berger, p. 295.

IX. THEODULFIAN RECENSION.—Paris, Bibl. Nat., Lat. 9380. The famous Theodulfian Bible [ix], written in beautiful and minute hand. Wordsworth's Θ; see Berger, p. 149 f., and Delisle, *Les Bibles de Théodulfe*, Paris, 1879; sometimes known as the *Codex Memmianus*.

Puy, Cathedral Library. Bible [ix], written under the direction of Theodulf, and so closely resembling the Paris Bible that Delisle asserts that many pages look almost like proofs struck from the same type. The text, however, is not so good: see Delisle, as above; also Berger, p. 171 ff.

Brit. Mus., Add. 24,142. Bible [ix], formerly belonging to the monastery of St. Hubert in the Ardennes; written in a small minuscule hand, strongly resembling that of the Theodulfian Bible. The text is extremely interesting, the first hand allied to the Northumbrian family, while the marginal corrections present a Theodulfian type. Wordsworth's H.

Orleans, Public Libr. 14. Book of the Prophets [ix], from Fleury. Text shows traces of Theodulfian influence, though the order of the books differs from that of Theodulf. Berger, p. 177.

Do., 11 and 13. Two volumes of a Bible [x], containing Kings, Proverbs, Song of Songs, Job, Macc., and Tobit; from Fleury. Theodulfian Text, but following sometimes the first hand, sometimes the marginal readings. Berger, p. 177.

Paris, Bibl. Nat., Lat. 11,937. Bible [ix-x], the *St. Germani exemplar parvum* of Robertus Stephanus, for the MS was formerly at St. Germain-des-Prés; the hand resembles that of the Theodulfian Bible, and the text also; the latter follows sometimes the first hand, sometimes the margin. Berger, p. 178.

Copenhagen, Royal Libr., nouv. fonds Royal 1. Parts of a Bible, *i.e.* Psalms-Daniel [ix]; handwriting resembles that of the St. Germain MS above, and the text is Theodulfian. Delisle, *Bibl. de l'École des Chartes*, xlvi. p. 321; Berger, p. 181.

X. MEDIÆVAL TEXTS.—Out of the thousands of such MSS we can but select three, which for various reasons are interesting.

Brit. Mus., Reg. I. B. xii. Bible [xiii], written in 1254 by William of Hales for Thomas de la Wile, 'Magister Scolarum Sarum'; fair specimen of ordinary mediæval text. Wordsworth's W.

Dijon, Publ. Libr. 9 *bis*. Bible, 4 vols. [xii], containing the corrections of Stephen Harding, abbot of Citeaux.

Paris, Bibl. Nat., Lat. 16,719-16,722. Bible, 4 vols. [xiii], containing the corrections of the Dominicans, under the auspices of Hugo de S. Caro.

LITERATURE.—Full lists of works will be found in S. Berger, *Histoire de la Vulg. pendant les premiers siècles du moyen âge*, Paris, 1893, pp. xxii-xxiv; and in E. Nestle (to whom the present writer owes many valuable suggestions), *Urtext u. Uebersetzungen der Bibel*, Leipzig, 1897, pp. 96, 102 (=*PRE*³, Bd. iii. pp. 36, 42). We give here a somewhat compressed list of the works likely to be useful to the ordinary student.

A. For the life of Jerome:—The *Vita S. Hieronymi* in Vallarsi's edition of his works, tom. xi. pp. 1-280. For the works of Jerome the student should use by preference the editions of Vallarsi, 11 vols. folio, Verona, 1734-1742, do. quarto, Venice, 1766-1772; the quarto edition is handier, and has been reprinted by Migne (but with different paging), *Pat. Lat.* xxii.-xxx.; von Cölln, 'Hieronymus' in Ersch and Gruber's *Encyclopädie* (ii. Section, 8 Theil, p. 72 f.), 1831; F. X. Collombet, *Histoire de Saint Jérôme*, 2 vols., Paris, 1844; O. Zöckler, *Hieronymus; sein Leben und Wirken aus seinen Schriften dargestellt*, Gotha, 1865; A. Thierry, *Saint Jérôme*, 2 vols., Paris, 1867; E. L. Cutts, 'Saint Jerome' in *the Fathers for English Readers* (S.P.C.K.), 1877; Zöckler, 'Hieronymus' in *PRE*³ (Bd. viii. p. 42 f.), 1900; Fremantle, 'Hieronymus' in Smith and Wace's *Dict. of Christian Biography*, vol. iii. p. 29 f., 1882; the same, 'Life of Jerome' in Wace and Schaff's *Select Library of Nicene and Post-Nicene Fathers*, vol. vi. pp. xvi-xxv, 1893; G. Grützmacher, *Hieronymus; eine biographische Studie*, etc., i. Leipz. 1901.

B. For the history of the text, both manuscript and printed:—R. Simon, *Histoire critique des Versions du NT*, Rotterdam, 1690; J. Mill, *Novum Testamentum cum lectionibus variantibus, etc., Præmittitur dissertatio*, Oxonii, 1707; see especially p. lxxxi f.; H. Hody, *De Bibliorum Textibus*, etc., Oxon., 1705, pp. 342-569; L. van Ess, *Pragmatica doctt. Cath. Trid. circa Vulg. decreti sensum*, Sulzbach, 1816, *Pragmatisch-Kritische Gesch. der Vulg.*, Tübingen, 1824; G. Riegler, *Kritische Gesch. der Vulg.*, Sulzbach, 1820; Bp. Westcott, 'Vulgate' in Smith's *DB*, vol. iii., 1863; C. Vercellone, *Variæ lectiones vulg. Latinæ Bibliorum editionis*, 2 tom., Romæ, 1861-1864; F. Kaulen, *Geschichte der Vulg.*, Mainz, 1868; S. Berger, 'Des Essais qui ont été faits à Paris au xiiiᵉ siècle pour corriger le texte de la Vulg.' (*Rev. de Théologie et de Philosophie*, t. xvi.), Lausanne, 1883, *De l'Histoire de la Vulg. en France*, Paris, 1887, *Quam notitiam linguæ hebraicæ habuerint christiani medii ævi temporibus in Gallia*, Paris, 1893, *Histoire de la Vulg. pendant les premiers siècles du moyen âge*, Paris, 1893; G. B. de Rossi, 'La Bibbia offerta da Ceolfrido' (from the *Ommagio giubilare della Bibl. Vat. al S. P. Leone* xiii.), Rome, 1888; H. Denifle, 'Die Handschriften der Bibel-Correctorien des 13 Jahrhunderts' (*Archiv f. Literatur- u. Kirchengesch.* t. iv. pp. 263, 471), 1888; P. Martin, 'La Vulg. latine au xiiiᵉ siècle d'après R. Bacon' (in *Le Muséon* vii., Louvain, 1888), 'la texte Parisien de la Vulg. Lat.' (*Le Muséon* viii., 1889); *Die Trierer Ada-Handschrift . . . von* K. Menzel, P. Corssen, etc., Leipzig, 1889; H. J. White, 'The Codex Amiatinus and its Birthplace,' in *Studia Biblica et Ecclesiastica*, vol. ii., Oxford, 1890; W. A. Copinger, *Incunabula Biblica, or the first half-century of the Latin Bible*, London, 1892; E. Nestle, *Ein Jubiläum der Lateinischen Bibel*, Tübingen, 1892; H. J. White, 'The Latin Versions,' in Scrivener-Miller, *Introduction to the Criticism of the* NT^4, 1894, vol. ii. pp. 56-90; E. von Dobschütz, *Studien zur Textkritik der Vulg.*, Leipzig, 1894; C. R. Gregory: Prolegomena to Tischendorf's *Novum Testamentum Græce*, etc., *editio octava critica maior*, vol. iii., Lips. 1894, pp. 971-1108; F. G. Kenyon, *Handb. to Text. Crit. of NT*, 1901, pp. 184-203; E. Nestle, *Lateinische Bibelübersetzungen* (revision of Fritzsche) in PRE^3, Bd. iii., also published separately in *Urtext u. Uebersetzungen der Bibel*, Leipzig, 1897; P. Corssen, 'Bericht über die latein. Bibelübersetzungen' ('Sonderabdruck,' from the *Jahresbericht über die Fortschritte der classischen Altertumswissenschaft*, 1899); P. Thielmann, 'Bericht ü. d. gesammelte handschr. Material zu einer kr. Ausgabe,' etc. (from the Munich *Sitzungsberichten*, 1899).

C. For the grammar, Latinity, etc., of the Vulgate:—J. A. Hagen, *Sprachliche Erörterungen zur Vulg.*, Freiburg in Br. 1863; F. Kaulen, *Handbuch zur Vulg.*, Mainz, 1870; P. Hake, *Sprachliche Erlaüterungen zu dem lat. Psalmentexte*, Arnsberg, 1872; W. Nowack, *Die Bedeutung des Hieron. für die alttest. Kritik*, Göttingen, 1875; H. Roensch, *Itala u. Vulg.*, Marburg, 1875; H. Goelzer, *Latinité de Saint Jérôme*, Paris, 1884; H. P. Smith, 'The Value of the Vulg. OT for Textual Criticism' (*Presbyterian and Reformed Rev.*, April 1891); A. Hartl, *Sprachliche Eigenthümlichkeiten der Vulg.*, Ried, 1894.

D. Critical Editions:—C. Vercellone, *Biblia Sacra Vulgatæ Editionis Sixti V. et Clementis VIII. Pontt. Maxx. jussu recognita atque edita. Romæ, Typis S. Congregationis de propaganda fide*, 1861. This is the best reprint of the Clementine Vulgate Bible, and Vercellone's preface should be carefully read; C. Tischendorf, *Nov. Test. Latine; textum Hieronymi . . . restituit C. T.*, Lipsiæ, 1864; P. M. Hetzenauer, *Nov. Test. Vulgatæ Editionis: ex Vaticanis editionibus earumque correctorio critice edidit P. M. H.*, Oeniponte, 1899; Corssen, *Epistula ad Galatas*, Berlin, 1885; Bp. J. Wordsworth, *Novum Testamentum . . . Latine sec. edit. S. Hieronymi . . . recensuit J. Wordsworth, S.T.P., in operis societatem adsumto H. J. White*, Oxon., 1889-1898. (The four Gospels are published; the rest of the NT is in preparation).

H. J. WHITE.

VULTURE.—דָּאָה *dā'āh* and דַּיָּה *dayyāh* are tr. AV 'vulture' (Lv 11[14], Dt 14[13], Is 34[15]), RV 'kite'; אַיָּה *'ayyāh* is tr. AV 'vulture' (Job 28[7]), RV 'falcon.' רָחָם or רָחָמָה *rāḥām* or *rāḥāmāh* is tr. RV 'vulture' (Lv 11[18], Dt 14[17]), AV 'gier eagle.' Of these four, only the last refers to the vulture. It is doubtless *Neophron percnopterus*, Sav., Pharaoh's Hen, which is still called *rakham* in Arabic. On the other hand, נֶשֶׁר *nesher*, which is always rendered 'eagle,' undoubtedly includes a number of the vultures, esp. the lämmergeier and the griffon. For the habits of the vulture and for Scripture allusions to them, see EAGLE, GIER EAGLE, OSPRAY, and OSSIFRAGE. G. E. POST.

W

WAFER.—See art. BREAD, vol. i. p. 318.

WAGES.—See SERVANT.

WAGGON.—See CART.

WAIT (from the same root as 'wake' and 'watch') is used in AV both as subst. and verb. **1.** As subst. the meaning is a watch, plot, esp. an ambush. The phrases are (*a*) *Lie in wait*, as Dt 19[11] 'But if any man hate his neighbour, and lie in wait for him, and rise up against him and smite him mortally that he die'; Jos 8[4] 'Behold, ye shall lie in wait against the city, even behind the city.' So 'liers in wait,' as Jg 9[25] 'And the men of Shechem set liers in wait for him in the top of the mountains.' (*b*) *Lay wait*, as Jg 16[2] 'They compassed him in, and laid wait for him all night in the gate of the city'; Jer 9[8] 'One speaketh peaceably to his neighbour with his mouth, but in heart he layeth his wait' (RV as AVm 'layeth wait for him'). (*c*) *Laying of wait*, as Nu 35[20] 'But if he thrust him of hatred, or hurl at him by laying of wait.' Udall has 'lay a wait' (*Erasmus' Paraph.* i. 87), 'And in the meane tyme he touched secretelye the conscience of certayne Phariseis, whiche layed deadly a wayte for Jesus.' And Fuller has 'lay at wait' (*Holy State*, 316), 'An adversary who lay at wait for all advantages.'

2. As verb we find 'wait' in the phrases 'wait for' and 'wait on' or 'upon.' (1) 'Wait for' has three meanings: (*a*) *Watch for*, equivalent to 'lay wait for,' Job 15[22] 'He is waited for of the sword' (וְצָפוּי הוּא אֱלֵי־חָרֶב; LXX ἐντέταλται [A ἐντέτακται] γὰρ ἤδη εἰς χεῖρας σιδήρου; Vulg. 'circumspectans undique gladium'; Cov. 'the swearde is allwaye before his eyes'; Kautzsch, 'für das Schwert ist er ausersehen'); Ps 56[6] 'They mark my steps, when they wait for my soul' (כַּאֲשֶׁר קִוּוּ נַפְשִׁי); cf. Ps 71[10] 'And they that lay wait for my soul' (וְשֹׁמְרֵי נַפְשִׁי). (*b*) *Expect*, the modern use, Lk 12[36] 'Like unto men that wait for their lord, when he will return from the wedding' (προσδεχομένοις τὸν κύριον ἑαυτῶν, RV 'looking for'); Ac 10[24] 'Cornelius waited for them' (ἦν προσδοκῶν αὐτούς, RV 'was waiting for them'); 17[16] 'Now while Paul waited for them at Athens' (ἐκδεχομένου αὐτοὺς τοῦ Παύλου); 2 Th 3[5] 'the patient waiting for Christ' (ὑπομονή, RV as AVm 'patience'). (*c*) The most important use of this phrase is when it refers to the attitude towards God of the patient believer, who is confident that God will yet show Himself to be the enemy of evildoers and the praise of them that do well; it is then almost equivalent to *believe in* or *worship*. Thus 2 K 6[33] 'Behold, this evil is of the Lord; what (RV 'why') should I wait for the Lord any longer?' (מָה־אוֹחִיל לַיהוָה עוֹד, LXX τί ὑπομείνω τῷ κυρίῳ ἔτι;); Ps 37[7] 'Rest in the Lord, and wait patiently for him'; 39[7] 'And now, Lord, what wait I for? my hope is in thee'; 65[1] 'Praise waiteth for thee, O God, in Sion.' See also Driver, *Par. Psal.* p. 465.

(2) 'Wait on' or 'upon' means: (*a*) *attend to*, as Nu 3[10] 'And thou shalt appoint Aaron and his sons, and they shall wait on their priest's office'; 8[24]; 1 Ch 23[28] 'Their office was to wait on the sons of Aaron for the service of the house of the Lord'; 2 Ch 13[10] 'the Levites wait upon their business'; Mk 3[9] 'He spake unto his disciples that a small ship should wait on him' (προσκαρτερῇ αὐτῷ); Ro 12[7]. So Adams, *2 Peter*, 35, 'Life . . . which is obnoxious to sin, and waited on with misery.' In this sense 'wait at' is used in 1 Co 9[13] 'They which wait at the altar' (RV 'wait upon'). (*b*) The other use is the same as the special biblical sense of 'wait for,' viz. *look for*, *trust to*, nearly *worship*, as Ps 25[3] 'Let none that wait on thee be ashamed'; 25[5. 21] 27[14] 104[27].

The simple verb is used twice of God's long-suffering towards men, Is 30[18] 'And therefore will the Lord wait, that he may be gracious unto you'; 1 P 3[20] 'the long-suffering of God waited in the days of Noah.' J. HASTINGS.

WALLS.—All over the East, where wood is not plentiful, walls of houses and even palaces have been built from the earliest times of crude or sunburnt brick. It is only in certain localities, where stone was plentiful, and in later ages, that stone has been used. Strabo (xvii. 2. 3) tells us that the houses in the cities of Ethiopia were formed by interweaving split pieces of palm wood or of crude bricks, and says (xvi. 1. 5) of Seleucia (Assyria, near Babylon) that on account of the scarcity of timber the beams and pillars of the houses were made of palm wood: they wound ropes of twisted reeds round the pillars, painted them over with colour and drew designs on them; they covered the doors with asphalt. All the houses were vaulted on account of the scarcity of timber. The earliest efforts of construction in Egypt were made in wood, probably like the dwellings now found in Nubia—palm branches interlaced, plastered over with clay and straw, roofs of branches or planks, or faggots of wood. Bricks were an advance upon this. The palaces of Egypt were of very slight construction, stuccoed walls and planks of acacia. In Assyria stone was so scarce that it was only used as an accessory; the bodies of the structures were never composed of it: it was mainly confined to plinths, pavements, and the internal linings of walls. In Chaldæa stone was entirely absent. The mountains which run parallel to the left bank of the Tigris were bare of trees, and the palm and poplar alone yielded wood of any length: the one soft and fibrous, the other brittle and light. Nineveh, Babylon, Egypt, and Jerusalem all drew their timber from the forest of Lebanon. The employment, however, of this excellent wood must always have been rare and exceptional (Lenormant, *Histoire Ancienne*, ii. 298; Perrot and Chipiez, i. 124; Layard, *Discoveries*, 356).

'In Chaldæa the architect was condemned by the *force majeure* of circumstances to employ little more than crude or burnt brick and bad timber; in Assyria he voluntarily condemned himself to the limitations they imposed' (Perrot and Chipiez, i. 125). The Chaldæans could employ neither pier or column, nor bearers or lintels of stone; they were thus debarred from constructing spacious galleries and chambers, and 'consequently their towns were artificial mountains, as solid and massive from base to summit as the natural hills' (*ib.* 133). The few long and narrow apartments contrived within them could be compared only to caves hollowed out in the face of a cliff. When the arch was discovered it was made frequent use of. A bas-relief recovered by Layard, showing a group of buildings at Kouyunjik erected by Sennacherib in his palace at Nineveh, depicts them as having not only flat roofs, but hemispherical cupolas, and tall conical domes: the same forms are still in use all over that country, the flat roofs usually for dwelling-houses, but yet the peasants' houses as well as the store-houses have often domed roofs of brick.

In building the tower of Babel we are told 'they had brick for stone, and bitumen had they for mortar' (Gn 11^3). Herodotus says (i. 179), in regard to the walls of Babylon, 'As they dug the ditches they converted the excavated earth into bricks, and when they had enough they burnt them in the kilns. Finally, for mortar they used hot bitumen, and at every thirty courses of bricks they put a layer of reeds interlaced.' There are many bituminous fountains still to be found springing through the soil between Mosul and Baghdad (Layard, *Nineveh*, ii. 46). See BITUMEN. In spite of the abundance of stone in Egypt, crude brick was extensively used, and the captives taken in war were forced to undertake the erection of public granaries and other buildings in that material for the Egyptian monarch. Wilkinson (i. 50) refers to the buildings of great size and solidity, found in various parts of the country, of crude brick. At Thebes these buildings consist of walls enclosing sacred monuments and tombs, and some are made with and others without straw.

In Palestine all the earliest remains that have been recovered are of crude brick; and even in the ruins in the mountains, where stone was plentiful, there are no stone remains attributed to an earlier time than that of king Solomon. At *Tell el-Hesy* (Lachish) at least eight ruined cities have been brought to light, one lying over the other, the earliest being attributed to 1700 years B.C., the latest to 500 years B.C. The houses are of crude brick, similar to those of the country at the present day. No indications were obtained whether the roofs were vaulted or supported by beams; probably the latter, judging by the thickness of the walls (Bliss, *Mound of Many Cities*). At *Tell es-Sâfi* recent excavations of *PEF* have exposed a wall of defence of stone earlier than the times of the Crusades, but the date is not yet approximated to. The stones are roughly squared rubble, laid in mud and straw, and the interstices filled with mud and small stones from the fields: height of courses 1′ 5″ to 2′. A few drafted stones occur. Part of the wall is plastered with dark mud and straw, over which is a layer of white mud and straw, made by mixing a powder of unburnt limestone with water. This kind of plaster is used in the Lebanon to-day (*PEFSt*, 1899, 195).

Foundations of a city in Egypt.—When a new district was to be added to a city, the ground was prepared by building with crude brick a number of long and thick walls parallel to one another; then cross walls at right angles with the first, chess-board fashion. The square pits thus constructed were filled with earth, broken stone, or anything else within reach. The foundations of the future city were laid upon the mass thus obtained, and they profited by the operation both in health and amenity. The cities of Memphis and Thebes both seem to have been built in this manner (Edouard Mariette, p. 139). Diodorus (i. 45. 4) says there were houses of four and five storeys at Thebes, and attributes them to the time of the fabulous monarch Busires. As a rule we find a ground floor, one floor above that, and a covered flat roof on the top.

Egyptian houses were built of crude brick made of loam mixed with chopped straw. These bricks are usually a foot long and 6 inches wide. The ceilings of the larger rooms were of indigenous or foreign wood, the smaller rooms were often vaulted: the walls of the houses were coated with stucco, and painted with religious and domestic scenes. The galleries and columns of the porch were coloured in imitation of stone, or painted. The ceilings were covered with arabesques and interlacing ornaments of all kinds, while the floors were strewn with nets woven of many coloured reeds (M. Gailhabaud's *Monuments anciens et moderns*).

Wilkinson (*Anc. Egyp.* iii. 316) states that the brick arch was used 1540 years B.C., and the stone arch 600 B.C. in Egypt, and suggests that it came into use owing to the small quantity of wood in Egypt, and considers that the invention of the arch there may date as far back as 2020 years B.C.* He gives instances of stone monoliths of over 290 tons weight being dragged by manual labour over 500 miles from the quarries: the power to move the mass was the same, whatever might be the distance. They simply put on a sufficient number of men to move the stone by hauling it along on a sledge. One case he mentions of a single block, 587 tons weight, being transported 138 miles.

---

* In all probability this date should be carried much further back, for recent excavations at Nippur have shown that in Babylonia the arch of burnt brick was employed prior to B.C. 4000. See BABYLONIA in vol. i. p. 219^b.

The walls of temples and the fortifications of cities required to be of a very solid description, on account of the battering-ram (which see); and as the latter became more scientifically constructed, and other arts of war came into existence, the walls had to be made more and more solid, and the foundations extended deep into the soil or to the solid rock (Lk 6[48]).

There exist a number of instances at the present day of the magnificent walls of cut stone built in early days from the time of Solomon to Herod, at Jerusalem, Hebron, Arak el-Emir, Baalbek, Tyre and Zidon, and Egypt.

At Jerusalem some of the stones in the wall of the temple enclosure, still existing, are over 30 feet long, 8 feet wide, and 3½ feet high, weighing over 80 tons. The ancient walls are in places still over 150 feet in height, and were originally at the corners at least 250 feet in height. The stones are of hard mountain limestone, approximating to marble, and are carefully chiselled, with a sunken draft of about 3 to 5 inches width all round. The stones of the wall surrounding the cave of Machpelah at Hebron are very little inferior in size to those at Jerusalem.

At Baalbek the stones of the wall of the temple are not quite equal in size to those of Jerusalem, and the stone is much softer; but this wall is protected by another one in front built of exceedingly large stones, 3 of which weigh each about 800 tons, and are over 60 feet in length, 17 feet in breadth, and 14 feet in height. The manner in which these stones were cut and brought down from the quarry can be seen in the quarry itself. When a large stone was ready to be brought away, it could be brought down by gravity with not a very great expenditure of labour.

Josephus (*Ant.* XX. x. 7) speaks of square and very white stones used in the temple, the work of king Solomon, 20 cubits long and 6 cubits high; he also speaks (*BJ* V. v. 1) of stones in the temple itself 40 cubits in length. These great stone walls are taken down to the rock for their foundations, while the buildings of Babylon had their foundations usually on the sand near the surface (Perrot and Chipiez, i. 157). The Pharaonic temples were also rather laid on the surface than solidly placed in the ground.

The gardens in Syria formerly, as at present, had stone walls as boundaries (*BJ* V. iii. 2), and narrow paths traversed the gardens of the suburbs (Nu 22[24]). The bare hillsides were terraced with stone walls and soil brought up from the bottom, so that the bare hills became fertile fields, as is the case at the present day in Spain, Northern India, Java, Japan. This also is carried out at the present day in many parts of Palestine (*BRP* ii. 493, iii. 14).

For other points connected with the subject of this art. see BRICK, GATE, HOUSE, MORTAR, PAVEMENT, ROOF.

For details regarding the walls of Jerusalem, Babylon, Nineveh, etc., see the articles under these titles. C. WARREN.

WAR.—

i. The Terrain of Palestine.
ii. The Method of War.
iii. The Conduct of War.
iv. Treaties.
v. The Outlook of the Prophets on War.
vi. Allusions to War in the NT.

i. THE TERRAIN OF PALESTINE.—The first requisite for understanding the wars of the Bible is a knowledge of the geography of Palestine. We need to know something about the routes which so unwieldy a traveller as an army can use, the physical and artificial obstacles which hinder it in its march, the places which allow it room for fighting or for encamping, and other similar geographical details. (In reading this article the reader should have open before him the large map of Palestine prefixed to vol. i. of this Dictionary).

The great strategic routes are three in number. There is the important road which, coming from the north and skirting the coast of the Mediterranean, passes Tyre, Mount Carmel, and Gaza, and finally reaches the border of Egypt. Then there is the scarcely less important route, now followed by the railway from Damascus to Haifa, which takes a S.W. direction to the Jordan, and then crosses the whole length of the fertile plain of Esdraelon in a N.W. direction to the neighbourhood of Mount Carmel. The meeting of this road with the first-mentioned in the plain of Esdraelon confers great strategic importance on the plain. There armies could meet, victual themselves, and find room to manœuvre both with footmen and with chariots. There, too, in ancient times stood four of the chief fortresses of Palestine, put there to hinder the free use of the great plain by an enemy (cf. G. A. Smith, *HGHL*^{3} ch. xix. pp. 387–390). The third great strategic route lies east of the Jordan and runs from Damascus through Sela (Petra) to the port of Elath at the head of the Gulf of Akabah.

Besides these three great routes, none of which touched the heart of the land of Israel, some others must be mentioned which gave access to the central range. Two of these are mentioned below as giving strategic importance to Gilgal. A third, starting from the modern Jenin, crosses several small plains and easy passes (cf. *HGHL*^{3} ch. xvi. p. 327), and gives access from the north to the city of Samaria. It is a route which must often have been followed by Syrian invaders. On the west, the hill-country of Judæa was pierced by several rugged and winding passes, the best known being that which is marked by the Upper and Lower Beth-horon. These passes were the scene of much of the irregular fighting which went on between the Philistines and Israel.

Before leaving this subject one possible strategic line, lying for the most part outside Palestine, must be mentioned, *i.e.* the sea route from the Egyptian Delta to the coast of Palestine. The possession of this line gave the king of Egypt an advantage over the rival power (Assyrian or Babylonian) in the Euphrates Valley, in that it enabled him to threaten his enemy's line of communications by landing troops in his rear. It has been suggested that Pharaoh-neco reached Megiddo partly by the sea route in the reign of Josiah (but cf. *HGHL*^{3} p. 405, note 2), and it is possible that there is an allusion in Dt 28[68] to the possession of such a route by Egypt (but cf. Driver, *in loco*).

Of localities of strategic importance the plain of Esdraelon has already been noticed. A second spot of similar interest is the plain of Gilgal, the S.W. part of the Arabah or 'plains of Jericho.' Here Israel encamped after crossing the Jordan (Jos 4[19] 10[6]; cf. Jg 2[1]), and here the headquarters remained, until a more central place, either Shiloh (Jos 18[1] 22[12] 24[1] [LXX]), or Shechem (Jos 24[1] [MT]), was secured to Israel. From Gilgal a pass leads westwards over the great central ridge by Bethel and the two Beth-horons down to the maritime plain. Some distance north of Gilgal another pass leads up the Wady Farah (*Fâri'ah*), sometimes identified with the Brook Cherith, in a N.W. direction to Shechem. The first of these routes was probably followed by Joshua in his marches on Ai (Jos 8[3]) and on Gibeon (Jos 10[6. 7]); the second is probably referred to in Jg 1^{22-25}, where the conquest of Bethel by the house of Joseph is recorded.

In this enumeration of routes and localities no reference has been made to Jerusalem. Indeed its strategic importance was not great. Neither Alexander of Macedon (*pace* Jos. *Ant.* XI. viii.; cf. Piepenbring, *Histoire*, pp. 590–592), nor Napoleon Bonaparte when on the march to Egypt, deigned to turn aside to Jerusalem. To an Assyrian king engaged in a similar expedition, Lachish and Libnah (2 K 19^{8}), both on the edge of the Shephēlah (see Map), were each of more importance than the comparatively remote Jewish capital. It was the political influence of Ḥezeḳiah over the Philistine malcontents which caused Sennacherib to detach a strong force (2 K 18^{17}) against Jerusalem. Isaiah was right in holding that it was possible for Judah to maintain a policy of isolation in the face of the clash of the great powers of western Asia. These powers seldom desired to encumber themselves with such 'a burdensome stone' (Zec 12^{3}) as Jerusalem. Shishak, king of Egypt, did indeed capture the city in the reign of Rehoboam, but only because Solomon had made it a city worth plundering (1 K $14^{25.26}$). Hazael, king of Syria, 'set his face to go up against Jerusalem,' but commuted his hostility for a payment in money (2 K $12^{17.18}$). Similarly was Sennacherib bought off once at least (2 K 18^{13-16}). Pharaoh-neco, king of Egypt, slew Josiah at Megiddo and deposed Jehoahaz at Riblah 'in the land of Hamath,' but does not seem to have turned aside to Jerusalem (2 K 23^{29-35}). Nebuchadrezzar was at least equally contemptuous. Jehoiaḳim was in a state of rebellion against Babylon for eight years, but the great king contented himself with sending marauding bands against his vassal. Jerusalem was outside the sphere within which great captains contended with great armies.

Samaria, on the other hand, was comparatively of great strategic importance. It stands on a commanding hill (well shown in Sir R. Temple's *Palestine Illustrated*, p. 180) where the important road from Jenin meets at right angles the broad, 'fat valley' (Is 28^{1}) which slopes westward towards the plain of Sharon and the Mediterranean. Eastward, passes of no great difficulty lead to the fords of the Jordan. Thus Samaria was strategically as well as politically 'the head of Ephraim' (Is 7^{9}).

We have now had occasion to mention representatives of three classes of fortresses in Palestine. On the south-west, Libnah, Lachish, Gezer, and Beth-horon guarded Judah against Egypt, the Philistines, and the inhabitants of the Sinaitic Peninsula. On the edge of the plain of Esdraelon stood Megiddo, Jezreel, and other fortresses closing the different approaches. On the central ridge, Jerusalem and Samaria were strongly fortified. Two classes of fortresses remain to be mentioned. On the border between the northern and southern kingdom Geba and Mizpah and other cities were built to stop the passage of possible fugitives and deserters and to watch the frontier (1 K 15^{16-22}). Lastly, the great fortresses east of Jordan, of which perhaps Ramoth-gilead was the most important (1 K 22^{3}, 2 K 8^{28} 9^{1}), must be mentioned; nor must the watch-towers, built to protect the roads and watch over the pastures, be forgotten (see TOWER).

The geographical conditions of Palestine were such that the kind of warfare best known to the Hebrews must have been the foray. The south of Judah lay open to the Amaleḳites and other predatory tribes (1 S 30). On the east were the Midianite freebooters (Jg $6^{3.4}$). Against these the Jordan was an ambiguous defence, for, if the invaders could seize one of the fords by surprise, they could hold it with a rearguard against pursuers while the booty was being safely carried off into the desert. The Philistines (1 S 13^{17}), the Moabites (2 K 13^{20}), and the Hebrews themselves (David, 1 S 27^{8}; Joab, 2 S 3^{22}; and Gad, Gn 49^{19}) were much given to making raids ('roads,' AV).

ii. THE METHOD OF WAR.—(*a*) *The Preliminaries.*—Wars were regularly begun in the spring, in order that if possible operations might be concluded before the beginning of winter (cf. 2 S 11^{1}). Yet winter did not always bring relief from the pressure of war (Jer 8^{20}), and sieges were sometimes prolonged over twelve months, *e.g.* that of Samaria (*three years*, 2 K 17^{5}) and Jerusalem (*eighteen months*, 2 K 25^{1-3}).

Something approaching to a *declaration of war* was sometimes given, *e.g.* by Amaziah of Judah to Jehoash of Israel (2 K 14^{8}), and negotiation was sometimes tried, *e.g.* by Jephthah with the king of Ammon (Jg 11^{12}), in order to avert war; but such instances are not common.

Before beginning a war, efforts were generally made to gain religious sanction for the step. Inquiry of God was made before the ark (Jg $20^{27.28}$ [Heb. and LXX] and 1 S 14^{18} [Heb. only]), or before a priest wearing the ephod with Urim and Thummim (1 S 14^{18} [LXX only], 1 S 28^{6} [Heb. and LXX], and 1 S 30^{7} [Heb. and LXX]), or through a prophet (Micaiah, 1 K 22^{15}), or by means of dreams (Gideon, Jg 7^{13}), or even through a familiar spirit (the witch of Endor, 1 S 28^{7}). Hence the phrase 'to consecrate' a war or warriors; Jl 3^{9}, Mic 3^{5}, Jer 6^{4}; Is 13^{3}, Jer 22^{7} $51^{27.28}$. Moreover, the ark was sometimes carried by Israel into the field (1 S 4^{3-11}, 2 S 11^{11}), and, on the other hand, the Philistines took 'their images' with them (2 S 5^{21}). When there was no ark to go forth, individual Israelites were found who carried into battle 'consecrated tokens of the idols of Jamnia' concealed under their garments (2 Mac 12^{40}).

The people in general were warned of the approach of an enemy or summoned to war (1) by the blowing of trumpets (1 S 13^{3}, Ezk 33^{1-6}, Am 3^{6}); (2) by putting up ensigns on bare heights to mark rallying places (Is 13^{2}), or by kindling fires on suitable hill summits (Jer 6^{1} [AV]); (3) by sending messengers throughout the land (Jg 7^{24}, 1 S 11^{7}). It was sometimes necessary to rouse a warlike feeling by unwonted appeals to indignation or to fear; in Jg 19^{29} the Levite sends the pieces of his divided concubine into every part of Israel, and in 1 S 11^{7} Saul sends the hewn pieces of a yoke of oxen throughout Israel with the threat of so destroying the cattle of any who should be slack to obey his call.

In advancing to attack, a leader gave his troops a watchword ('for Jehovah and for Gideon,' Jg 7^{18}; cf. 2 Mac 8^{23} *δοὺς σύνθημα θεοῦ βοηθείας*, also 13^{15} *θεοῦ νίκην*); and sometimes a 'pæan' was sung (2 Ch 20^{21}, 2 Mac 12^{37} *καταρξάμενος τὴν μεθ' ὕμνων κραυγήν*).

(*b*) *Strategy as illustrated by campaigns conducted in Palestine.*—Strategy is the art of choosing the right route by which to attack or await the enemy. For an instance of consummate strategy we may take the Philistines' conduct of the campaign of Gilboa (1 S 28–31). Instead of attacking Israel by the direct route through the defensible valleys of the south-west, where chariots could hardly pass, much less manœuvre, the army of Achish, with its chariots and horsemen, struck northward, aiming at the fertile plain of Esdraelon, and drawing Saul away from his Benjamite strongholds. The Israelites failed to close the passes over the eastern end of Mount Carmel, and the Philistines poured into the plain, where they could victual their large army and use their chariots with effect. Saul's hillmen could not meet the enemy in such a place with much hope of success.

Their king was outmarched and outmanœuvred. No wonder that his stout heart trembled when he saw the Philistines in force on this vantage-ground (1 S $28^{4.5}$). The battle of Gilboa was from the first only a forlorn hope for Israel. On the other hand, when the Philistines 'came up to seek David' (2 S 5^{17-25}), their strategy was faulty. Despising the enemy, they twice came up the Judæan (or possibly the Benjamite) valleys into the small plain of Rephaim (between Jerusalem and Bethlehem). Twice did David await his opportunity in the hold (v.^{17}) hard by, and twice did he inflict a severe defeat upon the Philistines. They failed because through over-confidence they chose a route more favourable to the enemy than to themselves.

(*c*) *Tactics.*—The tactics of the Israelites in the earliest days were very simple, but often very effective. First a surprise gained by stratagem, and then a sudden rush of men in which personal prowess had its full opportunity. For such warfare the strong individuality of the Hebrew race fitted them in a very high degree. The stratagems described in the historical books belong to all periods and are of various kinds.

(1) *Night marches* and *night attacks* were frequent. Joshua marched all night to the relief of Gibeon, and, it seems, surprised the Amorites at dawn (Jos 10^{9}). Mesha (Moabite Stone, line 15) captured Nebo from Israel by similar tactics. Gideon assailed the Midianite camp 'at the beginning of the middle watch' (Jg 7^{19}), *i.e.* about midnight. Saul attacked the Ammonites in the morning watch, *i.e.* shortly before dawn (1 S 11^{11}). Joram, king of Judah, when surrounded by the Edomites, cut his way through them *with his chariots* by night—a great feat, needing a clear night and able leading (2 K 8^{21}). (2) An *ambush* was a favourite stratagem. By this Ai was captured (Jos 8^{10-28}), and Gibeah (Jg 20^{30-44}). The Syrians tried it against Israel without success (2 K $6^{8.9}$). With the ambush a pretended flight of the main body was often combined. (3) Similar to the ambush was the device of *giving a deserted appearance to a camp*, in the hope of taking the enemy at a disadvantage when he came to spoil it (2 K 3^{24}, cf. 7^{12}). (4) A well-organized *force could be divided* just before an engagement, and the enemy put at a disadvantage by attack from more than one direction (Gn 14^{15}, 2 S 18^{2}, cf. v.^{8}).

The usual defensive tactics of the Hebrews consisted of standing in close order, shield touching shield, with spears carried at the charge, and of awaiting the attack of the enemy on higher ground and with the front protected by a wâdy or other obstacle. Such probably was the array (מַעֲרָכָה *ma'ărākhāh*) with which they fronted the Philistines in the valley of Elah (1 S 17^{21}). In such a position they were unassailable, and things might well remain at a standstill for *forty days* (v.^{16} [not in LXX B]). Unless the position could be turned by a flank movement, the only resource left to an assailant was to seek to shake the steadiness of the array by enticing the prominent warriors to leave their posts to engage in single combats. This resource the Philistines in the valley of Elah tried in vain. 'The men of Israel [when they saw Goliath] fled from him [back to their places in the array]' (v.^{24}).

Israel's simple tactics were really adapted only to broken country, such as the hill-country of Judah, with its caves and deep rugged wâdis. The enemy when defeated said, not without truth (1 K 20^{23}), 'Their god is a god of the hills; therefore they were stronger than we.' For more scientific tactics we have to look to Israel's foes. We see such in use at the battle of Gilboa. Saul, like Harold at Hastings, had formed his army probably in close order on a hillside up which the enemy must advance to attack. But the Philistines, like the Normans towards the close of the battle of Hastings, prepared the way for the decisive attack by flights of arrows. Saul fell like Harold, pierced through by the archers (1 S 31^{3}). Then, and not till then, the Philistines could trust their chariots and horsemen to make a successful charge up the slope (2 S 1^{6}), and a decisive victory was won.

Another good though unsuccessful piece of tactical skill was shown by the Syrians at the battle of Ramoth-gilead. The Syrian king massed his chariots (1 K 22^{31}), and endeavoured to obtain a decisive effect by employing them at a decisive point, viz. the person of Ahab. Ahab escaped this danger through his disguise, and was thus able to encourage his army by his presence 'until the going down of the sun.' Thus Israel was repulsed but not routed at Ramoth-gilead.

(*d*) **Fortresses** played an important part in the wars of Palestine. In the days of the Judges Israel had no fortresses, but had to take refuge from Midianite (Jg 6^{2}) and Philistine oppression (1 S 13^{6}) in cave districts and among the mountains. But the land is studded with heights suitable for fortified posts, and under the kings these were crowned with walled cities.

Fortresses (cities 'having gates and bars,' 1 S 23^{7}) were surrounded by walls of stone or of sun-dried bricks, built often close to the precipitous sides of a hill or mound.* If there were no precipice near to defend the wall, then a trench (חֵל *ḥēl*) was added. Samaria had such a trench (1 K 21^{23} ['wall' AV, 'rampart' RV]); and Jerusalem, though none was needed on the E., where ran the deep valley of Jehoshaphat, probably had one elsewhere (La 2^{8}).

The walls of Jerusalem were strengthened with towers and furnished with battlements (Jer 5^{10} 'thy branches' [RV, prob. a poetical term for 'battlements' AV], cf. Zeph 1^{16} and 2 Ch 26^{15}). On the walls were placed engines for throwing arrows and great stones (2 Ch 26^{15}).

Of the attack of strong places by the Israelites we have many notices. Jericho was captured by *coup de main* with an ease in which Israel rightly saw the hand of God; the *falling of the walls* seems to be a metaphor describing the failing of the hearts of the defenders (Jos 6^{20}, cf. 2^{11}). Similarly, Judas Maccabæus is said to have captured a strong city by 'rushing wildly against the wall' (ἐνέσεισαν θηριωδῶς τῷ τείχει, 2 Mac 12^{15}). Sometimes fire was applied to burn the gates or to set fire to a wooden defence (Jg 9^{48-52}); this device is also pictured on the Assyrian reliefs. As early as the time of David the 'mount' or 'bank' (סֹלְלָה *ṣōlĕlāh*, see below) was employed (2 S 20^{15}). If these means of attack failed, the besiegers were obliged to maintain a wearisome blockade, until surrender was brought about by famine or treachery. The fall of Rabbah was perhaps hastened by threatened water-famine (2 S 12^{27}). The Syrians (Aramæans) probably used engines (1 K 20^{12} [RVm]); and the Assyrians, as masters of the art of war, practised regular siege operations. Great shields or screens were raised against the wall (Is 37^{33}), behind which archers were set to keep under the 'fire' of the defenders. Under cover of this bombardment a causeway was built (perhaps by captives) from the Assyrian camp to the city to be attacked. Rising gradually in height, it was pushed nearer and nearer the city. Such a mound, when it touched the wall, might be used to facilitate an escalade or to bring the battering-ram on a level with the upper part of the wall. Another instrument of attack used by the Assyrians was a movable tower occupied by archers. If these archers succeeded in clearing the wall of its defenders, the tower could then be pushed up to the wall and the place taken by storm (cf. 1 Mac 13[43-45]). The steps in a siege are enumerated in Ezk 26[8. 9].

---

* Compare Flinders Petrie (*Tell el-Hesy*, 1891) and F. J. Bliss (*A Mound of many Cities*, 1894).

(*e*) *Payment* to warriors on service was apparently made chiefly in the form of booty. There are, however, some allusions to pay of an ordinary kind. Amaziah is said to have hired 100,000 men from Israel for his expedition against Edom for 100 talents of silver (2 Ch 25[6]). The Assyrian warrior from the time of Sargon was a paid foreigner, not an Assyrian peasant (*KAT*^{3} p. 64). The Chaldæan armies of Nebuchadrezzar were also mercenary (*ib.* p. 109). Antiochus Epiphanes opened his treasury, and gave his forces pay (*ὀψώνια*, cf. Ro 6[23], 1 Co 9[7]) for a year (1 Mac 3[28]). But booty meant more to a warrior than pay, as the disappointment of the Israelite mercenaries shows (2 Ch 25[10. 13], cf. Jg 5[19]). Booty was to be divided in equal shares between those who went into the battle and those who guarded the camp (1 S 30[24. 25]). A chosen part was sometimes dedicated to the Lord (silver and gold, 2 S 8[11]; sheep and oxen, 1 S 15[21]), or reserved for a leader (1 S 30[20]).

iii. THE CONDUCT OF WAR.—The treatment of conquered enemies was often very severe. David removed the Ammonites from Rabbah and the other cities of Ammon which he captured, and put them to the hardest task-work in the form of hewing stone and making brick (2 S 12[31]). The allied armies of Israel, Judah, and Edom deliberately made a desert of Moab, filling the good land with stones, stopping the wells, and cutting down the good trees (2 K 3[25]). Joab slew every male whom he found in Edom (1 K 11[18]). The still more horrible cruelty of massacring women with child is more often ascribed to the enemy than to Israel itself (the Syrians in 2 K 8[12], Menaḥem of Israel in 2 K 15[16], Ammon in Am 1[13]).

More reasonable severity was shown by expatriating the flower of an enemy's army (the first Chaldæan captivity, 2 K 24[14]), breaking down part of the wall of an enemy's city (2 K 14[13] and 25[10]), and taking hostages (2 K 14[14]).

Two instances of mildness are worthy of note. Ahab let Ben-hadad of Syria go free on his consenting to a treaty (1 K 20[34]); 'the king of Israel,' on Elisha's advice, fed and dismissed in safety a detachment of Syrians whom the prophet had taken by stratagem (2 K 6[23]).

There is some uncertainty as to the treatment of the Canaanites by Israel at the conquest. It is true that, according to the earliest document (JE), only one family, that of Rahab, was saved alive at Jericho (Jos 6[21-25]); that at Ai all persons were put to the sword (8[24-29]); and that at Maḳkedah five kings were slain in cold blood (10[16-27]). On the other hand, the passages (Jos 10[28-43] 11[14-23]) which represent the extermination of the Canaanites as carried out by the Israelites from one end of Palestine to the other are usually referred to a later document (D^2, the work of the redactor of Deuteronomy), and, moreover, these passages cannot be reconciled with the very early document from which Jg 1 is taken, nor again with Jos 15[63] 17[11-18]. It is clear from many precise statements in Joshua and Judges that Israel was not able to carry on a war to the knife; the conquerors were obliged to grant terms to the conquered. It may indeed be objected that Dt 20 (which belongs to the kernel of the book) enjoins the massacre of the Canaanites. But (1) D no less than D^2 is a later document than JE; (2) it is far from improbable that Dt 20[10-14] contains the earlier law (applicable even to war with the Canaanites), and that the exclusion of the Canaanites from the benefits of this law (vv.[15-18]) is due to the author himself, who wrote under the influence of the spirit which was soon to manifest itself in the violent reformation of Josiah (2 K 23[1-20]). We conclude that the Canaanites were in part massacred, in part reduced to task-work, in part borne with on sufferance, in part taken into Israel by intermarriage.

iv. TREATIES.—Treaties of peace were granted to a beaten foe, the most common condition being the payment of an indemnity (Sennacherib to Ḥezeḳiah in 2 K 18[14]). A modern-sounding treaty is that made by Ahab with Ben-hadad (1 K 20[34]): cities captured from Israel were to be restored and the right to trade in Damascus was to be conceded. An instance of a barbarian's treaty is that offered by Nahash of Ammon to Jabesh-gilead (1 S 11[2]) on the condition that the right eye of every male defender (? or of every inhabitant) of Jabesh-gilead should be put out. Savage as the offer is, it was probably seriously meant.

v. THE OUTLOOK OF THE PROPHETS ON WAR.—The earliest prophets show no horror of war as war, but lead or encourage their own people to resist the enemy. Deborah the prophetess rouses her countrymen against Sisera (Jg 4[4-9]) and gives the signal for the battle (v.[14]). Samuel is at the head of the rising against the Philistines (1 S 7[3-12], perhaps a late passage, but of importance in this connexion). An unnamed prophet encourages Ahab against Ben-hadad (1 K 20[13. 14]). Elisha's prophetic activity is the turning-point in the campaign against Moab (2 K 3[11-20]); and the same prophet, on his deathbed, heartens Joash of Israel in the contest with Syria (2 K 13[14-19]). An interesting touch of mercy or of good policy appears in Elisha's treatment of the Syrian prisoners in 2 K 6[21-23]. In the writing prophets, however, from Amos onwards we have a wider outlook upon war. War is no longer a mere event; it has become a symbol. The coming Day of the LORD is associated with terrible wars (Am 5–7, Is 13[6-18], Jl 3 [4][9-17]). On the other hand, the Latter Days are to be marked by universal peace, between nation and nation and even between man and beast (Is 2[1-4] 9[2-7 [1-6]] 11[6-9], Mic 4[1-4]; cf. Zec 14[9-11. 16-19]).

vi. ALLUSIONS TO WAR IN THE NT.—In the Gospels three references to war, all in Luke, call for notice. In 3[14] *στρατευόμενοι* ('soldiers on service,' RVm) ask for and receive counsel from John the Baptist. In 14[31] our Lord takes a lesson from the action of a king in calling a council of war, and in 19[43] He prophesies that the enemy will cast up a *bank* (*χάρακα*) against Jerusalem. On these passages cf. Plummer's *St. Luke*. In the Epistles, St. Paul shows in a dozen references to a soldier's career that he looked at it with interest and even with sympathy. He calls the Christian life 'the good warfare' (1 Ti 1[18]), refers to the soldier's *ὀψώνια* (1 Co 9[7]), holds up the soldier's ideal of service for imitation (2 Ti 2[3. 4]), praises the Colossians as an inspecting officer might praise a legion (Col 2[5]), and compares the recovery of the erring for Christ to the taking of captives alive in battle (2 Ti 2[26]). The apostle, moreover, describes himself in words of startling sternness as waging a warfare *οὐ κατὰ σάρκα* against pride and disobedience in his converts (2 Co 10[3-6]). In the Apocalypse there are several references to the great struggle between the saints and the powers of evil. There is 'war in heaven,' which results in the dragon and his angels being cast down to earth (Rev 12[7-12]). The Beast (*τὸ θηρίον*) makes war with the saints by commission from the Dragon (13[7a], omitted by AC, etc., has the support of the Syriac text—Philoxenian ?—published by Gwynn, 1897). The kings of the whole world (*τῆς οἰκουμένης ὅλης*) are gathered together to Har-magedon for 'the war of the great day of God the Almighty' (16[12-16]). The Word (*ὁ Λόγος*) of God, who 'in righteousness doth judge and make war,' leads the armies which are in heaven to final victory over the Beast (19[11-21]).

The general teaching of the NT on war can hardly be better given than in the following words: 'We have seen then so far that war is sanctioned by the law of nature—the constitution of man and the constitution of society; and by the teaching and practice of Christ and of His immediate disciples. Certain limitations are imposed, on the ground of expediency, by society; and, in the ideal brotherhood of men to which the Christian gospel teaches all men to aspire, war would be impossible. But, with a view to the necessary process of the attainment of this ideal, war in the abstract is not condemned. Here as always the Christianity of Christ looks to the motive' (Bethune-Baker, *Influence of Christianity on War*, 1888, p. 18).

LITERATURE.—Benzinger (1894), *Heb. Archäologie*, p. 360 ff.; Nowack (1894), *Heb. Archäologie*, i. pp. 357–375 (very full); G. A. Smith, *HGHL* (*passim*). See also ARMOUR, CAMP, ENGINE, FENCED CITIES. W. EMERY BARNES.

WARD.—The Eng. word 'ward' is another spelling of 'guard.' 'Ward' is the older Teut. form (Anglo-Sax. *weard*), 'guard' came in through the Old Fr. *garder*: cf. wage-gauge, warrant-guarantee. Both forms are used in AV, though, with one exception,* the same words are not translated by both. The form 'guard' had not then been very long in use, but was already freely used synonymously with 'ward.' The Anglo-Sax. *weard* is the same in the masc. = 'a guard,' 'defender,' and in the fem. = 'guarding,' 'defence'; hence 'ward' is used in both these senses, as well as for a body of men on guard and the place in which one is guarded, a prison. Bunyan makes a distinction between 'ward' and 'guard': *Holy War*, p. 94, 'He sent special orders to Captain Boanerges . . . to put them all three in ward, and that they should set a strong guard upon them.'

'Ward' in AV means: (1) A body of men on guard; Jer 37^{13} (*pĕḳîduth*, only occurrence; lit. 'oversight,' OHL tr. 'בַּעַל פּ' 'sentinel'); Ac 12^{10} (φυλακή). (2) The office of guarding, the defence: 1 Ch 12^{29} (*mishmereth*, RV 'allegiance'); Neh 12^{45} *bis* (*mishmereth*). (3) The position of the guard, post: 1 Ch 25^{8} *bis* 'ward against ward' (RV 'for their charges,' Heb. *mishmereth*); 26^{16}, Neh $12^{24.25}$ (all *mishmār*); Is 21^{8} (*mishmereth*); Jth 8^{36} (διάταξις, RV 'station'). (4) The place for guarding, prison, cell: Gn $40^{3.4.7}$ 41^{10} 42^{17}, Lv 24^{12}, Nu 15^{34} (all *mishmār*); 2 S 20^{3} (*mishmereth*); Ezk 19^{9} (*ṣûgar*, only occurrence; RV 'cage'); 1 Mac 14^{3} (φυλακή).

The adverbial suffix 'ward,' expressing direction towards a place, was formerly used with great freedom. In AV we find 'to Godward' Ex 18^{19}, 2 Co 3^{4}, 1 Th 1^{8}; 'to theeward' 1 S 19^{4}; 'to usward' Ps 40^{5}, Eph 1^{19}, 2 P 3^{9}; 'to youward' 2 Co 1^{12} 13^{3}, Eph 3^{2}; and 'to the mercy-seatward' Ex 37^{9}, besides the adverbs northward, rereward, thitherward, and the like. Cf. 'To himward' Dt 32^{5} Tind.; 'to themward,' Berners, *Froissart*, 16; 'to Israel warde' Nu 32^{14} Tind.; 'to the city-ward,' Berners, *Froissart*, 16; 'whiche waye soo ever warde,' Erasmus, *Crede*, 46. J. HASTINGS.

WARE (Anglo-Sax. *warn*; Skeat thinks the orig. sense was 'valuables') is used in AV (in both sing. and plu.) for merchandise. The sing. occurs Neh 10^{31} (מַקָּחוֹת), 13^{16} (מֶכֶר), 13^{20} (מִמְכָּר); and the plu. in Jer 10^{17} (כִּנְעָה), Ezk 27^{16} (מַעֲשֶׂה, AV 'the wares of thy making,' RV 'thy handiworks'), 27^{33} (עִזְבוֹן), Jon 1^{5} (כֵּלִים). We still retain 'warehouse,' which Coverdale gives as two words, Jer 40^{10} 'Therefore gather you wyne, corne and oyle, and kepe them in youre ware houses.'—See FAIRS. J. HASTINGS.

WARE.—'Ware,' 'aware,' and 'wary' are forms of the same adj., the *a* in 'aware' representing the Anglo-Sax. *ge* (*gewaer*, Middle Eng. *iwar*, *ywar*), and the *y* in 'wary' being an addition. 'Ware' occurs in Mt 24^{50} (1611, mod. edd. 'aware'), Ac 14^{6}, 2 Ti 4^{15}. So Lv 5^{2-18} Tind. (5^{18} 'And the preast shall make an attonement for him for the ignoraunce whiche he dyd and was not ware'); Lk 11^{44} Rhem. 'Woe to you, because you are as monuments that appeare not, and men walking over, are not ware.' Udall (in *Erasmus' Paraph.* ii. 278) uses 'ware' for modern 'wary'; so Erasmus, *Crede*, 127, 'ware and wyse circumspection.' 'Wary' occurs in AV in 2 Es 7^{52}, and 'wariness' in Sir 11^{18}. J. HASTINGS.

WARS OF THE LORD, BOOK OF THE (סֵפֶר מִלְחֲמֹת יהוה; LXX B ἐν βιβλίῳ [A βίβλῳ] Πόλεμος τοῦ κυρίου).—An authority quoted in Nu 21^{14} to settle a question about the boundary between Moab and the Amorites. In all probability, the other two citations in the above chapter are from the same source. The last of these is indeed referred (v.^{27}) to a poem circulating amongst the *môshĕlîm* or reciters of sarcastic verses, but this does not prove that it was not incorporated also in the 'Wars of J″.' The book in question is mentioned nowhere else in the OT, for its identity with the 'Book of Jashar,' although contended for by some, cannot be established. From the title we can readily infer the contents of the book. It was doubtless a collection of songs which celebrated the victories gained by Israel in its religious wars from the Mosaic age downwards. The title was chosen by men who delighted to think of J″ as Israel's commander-in-chief (יהוה צְבָאוֹת '*J″ of the hosts* [*of Israel*]'). Cf. the words in the Song of Moses in Ex 15^{3} 'The LORD is a man of war.'

The meaning of all the three citations in Nu 21 is more or less obscure. The purity of the text is not beyond suspicion, and it may be also, as several critics hold, that some of the extracts refer to events which happened later than the Mosaic age, and that the narrator has only partially succeeded in accommodating the original language to the new context. Stade, for instance, believes that the third quotation has in view incidents that occurred during the wars between Israel and Moab under the dynasty of Omri. The argument of Wellhausen, that the Well-song (vv.$^{17.18}$) should be metaphorically interpreted of the conquest of the Moabite city Beer (well), is plausible but not convincing. If Cornill is right in assigning the whole passage in which the citations occur to E, there is probability also in his conjecture that 'the book of the Wars of the LORD' originated in the N. kingdom. Its composition will in any case hardly be later than B.C. 750.

It is only fair to mention that some deny that Nu 21^{14} furnishes any evidence whatever for the existence of a book called 'the Wars of J″.' Sayce (*Academy*, 22nd Oct. 1892) would render the passage thus: 'Wherefore it is said in a (the) book, The wars of J″ were at Zahab in Suph,' etc. It may, however, be safely predicted that few will agree to follow this line of interpretation.

LITERATURE.—Ryle, *Canon of OT*, 19; W. R. Smith, *OTJC*^{2} 327; Delitzsch, *Genesis*, new ed. i. 7; Reuss, *AT* iii. 463; Cornill, *Einleitung*^{2}, 69 f.; Wellhausen, *Comp.* 343; Wildeboer, *Lit. d. AT*, 22 f.; Kittel, *Hist. of Heb.* i. 90; Kautzsch, *Heil. Schr. d. AT*, Beilagen, 136; Budde, 'The Well-song' in *New World*, March 1895; Driver, *LOT*^{6} 121.

J. A. SELBIE.

WASHINGS.—See UNCLEAN.

WASHPOT (סִיר רַחַץ).—Only fig.: 'Moab is my washpot,' Ps 60^{8} = 108^{9} (LXX Μωὰβ λέβης τῆς ἐλπίδος μου, Vulg. *Moab olla spei meæ*, taking רחץ in its Aram. [cf. Dn 3^{28}] sense of 'trust'). Like the parallel 'Upon (*or* unto) Edom will I cast my shoe,' the expression appears to combine the ideas of ownership and of contempt. Cf. art. SHOE.

WASP (σφήξ, Wis 12^{8} AV and RVm; RV 'hornet,' see HORNET).—The common wasp, *Vespa vulgaris*, is very abundant in the East. The general colour of its body is yellow, variegated by a longitudinal black line. Its nest is composed of a papery substance, made by chewing up the wood and bark of trees, and is formed of hexagonal cells, like those of the bee. Wasps swarm in the neighbourhood of houses in the summer, and boldly enter them to feed on the meats, sweets, and fruits on the table. They also frequent the vineyards, esp. where grapes are spread out to dry into raisins. They invade the caldron in which grape juice is boiled down to *dibs*, and shops where sweets and fruits are sold. Other *Vespidæ* are also included under the general title wasp. The hornet belongs to the same tribe, and both of these hymenopterous insects are closely related to the bee.

---

* The exception is *mishmār*, which is usually trd 'ward,' but in Ezk 38^{7} Neh $4^{22.23}$ is rendered 'guard'; RV makes no changes.

G. E. POST.

WATCH.—A division of the night. See TIME, p. 766^b.

WATCHER (Aram. עִיר, Theod. *εἴρ*).—A title applied to angels in Dn $4^{13.\ 17.\ 23\ [10.\ 14.\ 20]}$. It means 'wakeful one' (Aq. Symm. *ἐγρήγορος*), and occurs with great frequency in the (Ethiopic) Book of Enoch (see vol. i. p. 707), as well as in Jubilees (4^{15} 8^3 10^5) and the Syriac Fathers. It is hardly likely that in Daniel it has already acquired the restricted sense of *ἐγρήγοροι* in these later writings; more probably it is a designation of angels in general. See the Comm., esp. Driver, *ad loc.*

WATER in EV is usually the equivalent of מַיִם or *ὕδωρ*.

In 2 K 18^{27}, Is 36^{12} RV 'water' represents שֵׁינַיִם and *Ḳĕrê* has מֵי רַגְלַיִם. In 2 Co 11^{26} 'waters' stands for *ποταμοί* (RV 'rivers'). 'Watercourse' is the tr. of תְּעָלָה (Job 38^{25} RV 'waterflood'), of יִבְלֵי מַיִם (Is 44^4), and of מוֹצָא מַיִם (2 Ch 32^{30} RV 'spring of waters'). The last phrase is also rendered 'waterspring' (Ps $107^{33.\ 35}$), and 'spring of water' (Is 41^{18} 58^{11}). 'Waterspout' is the tr. of צִנּוֹר (Ps 42^7 RVm 'cataract'), and 'waterflood' of שִׁבֹּלֶת מַיִם (Ps 69^{15}).

The verb 'to water' represents various Heb. expressions. It stands in Pr 11^{25} for the Hiph. of יָרָא ('to throw [rain]'); in Ps 6^6 for the Hiph. of מָסָה ('to melt'); in Ps 65^9 for the Pilel of שׁוּק ('to run over'); in Ps $36^{8\mathrm{mg.}}$ for the Qal, in Ps 65^{10}, Is 16^9 for the Piel, and in Pr 11^{25}, Is 55^{10} for the Hiph., of רָוָה ('to be saturated'); and in Gn $2^{6.\ 10}$ $29^{2.\ 3.\ 7\mathrm{ff.}}$, Ex $2^{16\mathrm{ff.}}$, Dt 11^{10}, Ps 104^{13}, Ec 2^6, Is 27^3, Ezk 17^7 32^6, Jl 3^{18} for הִשְׁקָה ('to give to drink'). מַשְׁקֶה is tr. 'well watered' in Gn 13^{10}, and רָוֶה 'watered' in Is 58^{11}, Jer 31^{12}. In Ps 72^6 'showers that water' stands for the apposition רְבִיבִים זַרְזִיף ('showers—a down-pour'). 'Watering' in Job 37^{11} is for רִי (RV 'moisture'). 'Watering' in Lk 13^{15} and 'to water' in 1 Co $3^{6\mathrm{ff.}}$ represent *ποτίζειν*. 'To drink water' (1 Ti 5^{23}) is the tr. of *ὑδροποτεῖν*. 'Waterpot' (Jn $2^{6.\ 7}$ 4^{28}) is for *ὑδρία*, and 'without water' (2 P 2^{17}, Jude ^{12}) for *ἄνυδρος*. 'To have (*i.e.* to be supplied with) water' (Jth 7^{13}) is for *ὑδρεύεσθαι*. *Ὑδραγωγός* (Sir 24^{30}) is tr. 'conduit.'

מַיִם is once rendered by 'washing' (Neh 4^{23} RV 'water'). In Jos 11^8 13^6 the word is retained as part of a proper name (מִשְׂרְפוֹת מַיִם).

Water is among the commonest and most widely diffused of natural substances, and the Scripture allusions to it are consequently both numerous and varied. At ordinary temperatures it is a liquid, transparent, yet capable of reflecting light from its surface (Pr 27^{19}). When heated to the boiling point it is converted into invisible vapour (Is 64^2), and the same process of evaporation takes place gradually at lower temperatures (Job 24^{19}). When cooled below the freezing point it solidifies into hard, transparent, brittle ice, which is compared to a stone (Job 38^{30}), and to a breastplate (Sir 43^{20}). The water vapour in the air may be condensed by cooling into the small drops of cloud or mist, or the larger drops of rain (Job 36^{27}), or it may be deposited on the surface of objects as dew. If the cold in the atmosphere is sufficiently great, the moisture may fall in frozen drops as hail, or in feathery ice-crystals as snow (see CLOUD, DEW, HAIL, RAIN, SNOW). Among the most characteristic physical properties of water is that of quenching fire. The antagonism of these two 'elements' appears in 1 K $18^{33\mathrm{ff.}}$, Wis 19^{20}.

The water which the earth receives partly flows along the surface in the form of brooks, streams, and rivers, or gathers in ponds, lakes, and seas; and partly sinks beneath the ground, from which it may flow forth again in springs and fountains (Gn 16^7, Dt 8^7 etc.), or be recovered by sinking pits and wells (see WELL).

Water plays an important part in changing the earth's surface (Job 14^{19}), but the process is so slow that the streams, etc., which effect it seem to be among the most permanent features of the landscape, and acquire a geographical significance. Thus we have the 'water' of Nephtoah (Jos 15^9 18^{15}), of Jericho (Jos 16^1), of 'the pool Asphar' (1 Mac 9^{33}), of Jordan (1 Mac 9^{45}), and of Gennesar (1 Mac 11^{67}); the 'waters' of Merom (Jos $11^{5.\ 7}$), of En-shemesh (Jos 15^7), of Megiddo (Jg 5^{19}), of Nimrim (Is 15^6), and of Dibon (Is 15^9); the 'great waters that are in Gibeon' (Jer 41^{12}).

A situation on a navigable river or by the sea gave a city great commercial and other advantages; *e.g.* Babylon (Jer 51^{13}) and No (Nah 3^8, here esp. as *a defence*, cf. Is 33^{21}).

The waters, like the earth and the air, have their population of living creatures (Gn $1^{20.\ 21.\ 22}$), among which only those with fins and scales (*i.e.* fish) were recognized as clean by the Mosaic law (Lv $11^{9.\ 10.\ 12.\ 46}$, Dt $14^{9.\ 10}$). Images of fishes (Dt 4^{18}), and of anything living in the water (Ex 20^4, Dt 5^8), were forbidden. The 'dragons in the waters' (Ps 74^{13}) appear to have been mythical sea-monsters symb. of Egypt; see SEA-MONSTER.

Water is indispensable to all forms of life on the earth, whether animal or vegetable. Vegetation is refreshed by rain, dew, etc., and is specially luxuriant where there are streams or springs to moisten the soil. We read of the effect which the presence of water has on trees (Job 14^9 29^{19}, Ps 1^3, Jer 17^8), cedars (Nu 24^6, Ezk 31^4), vines (Ezk 17^5), willows (Is 44^4), flags or sedges (Job 8^{11}, Sir 40^{16} RV), and lilies (Sir 50^8). One of these passages (Ezk 31^4) shows how irrigation was practised in order to convey water from a river to all the parts of the ground under cultivation. Seed was sown beside the waters (Is 32^{20}), and even cast into them, as in Egypt when the Nile is in flood (Ec 11^1). The verdure of river-sides made them a favourite haunt of birds (Ca 5^{12}).

Essential to vegetable life, water is equally essential to animals and man. It is enumerated among the necessaries of life in Is 33^{16}, Sir 29^{21} 39^{26}. Among its uses may be noticed—

(*a*) **Drinking.** Here particular references are unnecessary, except to the water which flowed from the rock in Horeb (Ex $17^{5.\ 6}$) and Kadesh (Nu 20^{11}). Next to the absence of water, the greatest of evils was water which for any reason had become undrinkable. This was one of the PLAGUES OF EGYPT (vol. iii. p. 889), and similar calamities appear in the Apocalypse (8^{11} 11^6). Israel had an experience of bitter water at Marah (Ex 15^{23}).

The explanation of the remedy used by Moses on this occasion is uncertain. The tree may have had the natural property of purifying the water (see Sir 38^5). Various plants are used in different parts of the world for a similar purpose. Rosenmüller (*A. u. n. Morgenl.* ii. 28 ff.) mentions Nellimaran in Coromandel, Sassafras in Florida, and Yerva Caniani in Peru. It seems doubtful, however, whether any plant now growing in the Sinaitic desert has such an effect, though Lesseps (*L'isthme de Suez*, p. 10) says he has been told by Arab chiefs that a certain bitter thorn, growing in the desert, is used by them in this way. Burckhardt (*Travels in Syria*, 474) suggests that the berries of the plant called Gharkad (*Peganum retusum*) might have been employed, but other travellers have not found them effectual (Robinson, *BRP* i. 98 f.; Ebers, *Durch Gosen zum Sinai*, 116 f.).

The waters of Jericho were bad in Elisha's day (2 K 2$^{19.22}$), but no explanation save a miraculous one can be given of the remedy used in this case.

Drinking water might be fouled by the feet of animals (Ezk 32$^{2-13}$ 34^{18}). Certain bitter potions receive special mention, such as 'water of gall' (Jer 8^{14} 9^{15} 23^{15}), and the water mixed with the ashes of the golden calf (Ex 32^{20}). Water mixed with dust from the floor of the tabernacle was used in the ordeal of chastity described in Nu 5.

Water was not only drunk alone, but also mixed with wine (Ps 75^{8}, Pr 9^{2}, 2 Mac 15^{39}). The incident of the making of water into wine at Cana is given as the earliest of the miracles of Jesus (Jn 2$^{6ff.}$ 4^{46}). Water for domestic purposes was usually drawn by women (Gn 24^{13}, Ex 2^{16}, 1 S 9^{11}, Jn 4^{7}) or by servants (Dt 29^{11}). The Gibeonites were reduced to this menial office (Jos 9$^{21ff.}$). In Mk 14^{13} ‖ the unusual circumstance of a *man* bearing a pitcher of water enables the two disciples to recognize their guide. Supplies of drinking water were carried in skins, larger or smaller (see BOTTLE), and we hear also of vessels of earthenware and stone.

(*b*) **Washing** of clothes (Jer 13^{1}), of the hands (Job 9^{30}, Mt 27^{24}), the feet (Gn 24^{32} 43^{24}, Lk 7^{44}, Jn 13^{5}), and the whole person (Jth 10^{3} 12^{7}). To 'pour water upon the hands' is synonymous with being a servant (2 K 3^{11}). In the ceremonial system of the OT, washings occupied a prominent place. The priests were washed at their consecration (Ex 29^{4}), and the Levites were sprinkled when they were set apart to their special duties (Nu 8^{7}). There was a laver before the tabernacle, in which the priests washed their hands and feet before offering sacrifices (Ex 30$^{18-21}$ 40$^{7.30-32}$). Special ablutions were required on particular occasions, such as the Day of Atonement (Lv 16$^{4.24.28}$). The sacrificial flesh was washed before it was burnt (Lv 1$^{9.13}$ 8^{21}). Washing was a frequent process for removing ceremonial defilement (Lv 11^{32} 15$^{5ff.}$ 17^{15}, Dt 23^{11}). A specially interesting case is that of recovery from leprosy (Lv 14$^{8.9}$). In connexion with leprosy and certain other forms of uncleanness *running* water required to be used (Lv 14$^{5.6.50.51.52}$ 15^{13}, Nu 19^{17}). The 'water of separation' used for sprinkling the unclean (Nu 19, He 9^{13}) consisted of running water mixed with the ashes of a heifer that had been burnt along with cedar wood and hyssop.

(*c*) **Cooking**, as in Ezk 24^{3}.

(*d*) **Medicinal Bathing** (Jn 5$^{3.4}$).

In Eastern lands, where so much depends on the presence of water, the distress caused by drought is very great, and is often vividly described in Scripture (Is 19^{5}, Jer 14^{3}, Jl 1^{20}). The same result follows when a water-supply is cut off, which was a common operation of warfare and siege. Jehoshaphat and his allies stopped the wells of Moab (2 K 3$^{19.25}$). Holofernes did the same for Bethulia (Jth 7$^{7ff.}$ 8^{9} 11^{12}). Hezekiah, when besieged by Sennacherib, succeeded in reversing this proceeding, and in securing water for the besieged while the besiegers were deprived of it (2 Ch 32$^{3.4}$, Sir 48^{17}). When water is scarce from such causes, it has to be doled out carefully (La 5^{4}, Ezk 4$^{11.16}$). 'Water of affliction' seems to mean a supply that is limited either from scarcity (Is 30^{20}) or as a punishment (1 K 22^{27}, 2 Ch 18^{26}).

Water, though so necessary, is also a source of danger. It may cause death by suffocation (2 K 8^{15}) or by ordinary drowning. Of the latter the Flood and the overthrow of the Egyptians at the Red Sea are the most notable Scripture instances. In the miracle of Christ's walking on the water (Mt 14^{25}‖) we see this natural property for once overcome. Water may be destructive from its force when agitated by storms (Ezk 27$^{26.34}$, Wis 5^{22}, Lk 8$^{23-25}$), or when rushing along in a torrent (2 S 5^{20}, Rev 12^{15}), or from its simply submerging the works of man (Ezk 26$^{12.19}$).

'Water' is used for tears (Ps 119^{136}, Jer 9$^{1.18}$, La 1^{16} 3^{48}), and for the liquid that flowed along with the blood from the pierced side of Christ (Jn 19^{34}). The nature of the latter has been much discussed, and all attempts at ordinary physiological explanation seem doubtful. The commentaries must be consulted for the various views that have been suggested. See also MEDICINE (vol. iii. p. 326^{a}). The substance NEPHTHAR (which see) is called 'thick water' (2 Mac 1$^{20.21.31.33}$).

In the *biblical cosmogony* water held an important place. There was a primitive waste of waters, which was divided into two portions by the firmament. The upper portion was the source of rain. The dry land rose out of the lower portion and was founded upon it. The FLOOD, in which both the waters above and those beneath were let loose (Gn 7^{11}), was a catastrophe provided for by the very structure of the universe (2 P 3$^{5.6}$). These and similar cosmological ideas appear in Job 26$^{8.10}$, Ps 33^{7} 104$^{3.6f.}$ 148^{4}, Pr 30^{4}, Is 40^{12}, Jth 9^{12} 16^{15}. While the heathen deified the waters as well as the other forces of nature (Wis 13^{2}), the biblical conception consistently subordinates them to God. He controls the waters of the thunderstorm (2 S 22^{12}, Ps 18^{11} 29^{3} 77$^{16.17}$, Jer 10^{13} 51^{16}). The division of the Red Sea is His work (Ps 78^{13}, Is 43^{16} 51^{10}). It is in obedience to Him that the water flows from the rock (Ps 114^{8}). It is He who moves the sea (Am 5^{8} 9^{6}). The voice of God is compared to the sound of many waters (Ps 93^{4}, Ezk 43^{2}. Cf. Rev 1^{15} 14^{2} 19^{6}).

The metaphorical usages of water are numerous. The want of it is an emblem of spiritual need (Ps 42^{1} 63^{1}; Am 8^{11}), and its presence becomes, in some of the most beautiful poetry of Scripture, a figure for *spiritual refreshment* and blessing (Ps 23^{2}, Is 30^{25} 32^{2} 35$^{6.7}$ 41^{18} 43^{20} 44^{3} 49^{10} 55^{1} 58^{11}, Jer 31^{9}, Ezk 47$^{1-11}$, Jl 3^{18}, Zec 14^{8}, Jn 7^{38}, Rev 7^{16} 21^{6} 22$^{1.17}$). It represents a blessing which may be neglected (Jer 2^{13} 17^{13} 18^{14}). It suggests the gratefulness of *good news* (Pr 25^{25}); and *wisdom*, as the drink of the soul, is compared to it (Sir 15^{3}). Water symbolizes the means of *moral cleansing* (Ezk 16$^{4.9}$ 36^{25}, Eph 5^{26}, He 10^{22}), with which we may connect the whole subject of BAPTISM, and also the conception of Christians as 'born of water' (Jn 3^{5}, 1 Jn 5$^{6.8}$). Bitter drink is a metaphor for *trouble* (Ps 73^{10}), and water in its dangerous aspect is still more extensively so (Ps 18^{16} 32^{6} 46^{3} 66^{12} 69$^{1.2.14}$ 88^{17}, Is 43^{2}, La 3^{54}, Jon 2^{5}). *Enemies* are spoken of under a similar figure (Ps 124^{4} 144^{7}, Is 8^{7} [Assyria] 17$^{12.13}$ [the nations] 28$^{2.17}$, Jer 47^{2}).

Various subordinate metaphors are deserving of notice. Water becomes a figure for *instability* of character (Gn 49^{4}), *for weakness and dissolution* (Ps 22^{14} 58^{7} 109^{18}, Ezk 7^{17}), and for *worthlessness* (Wis 16^{29}). *Pride* passes like a ship that leaves no track on the waters (Wis 5^{10}). The foam of water [or, perhaps better, a chip on a stream, cf. RVm] is an emblem of extreme *transiency* (Hos 10^{7}). To give earth and water is a token of *submission* (Jth 2^{7}). In Sir 15$^{16.17}$ *the choice between life and death* is compared to that between fire and water. The *wickedness of Jerusalem* is likened to the water of a fountain (Jer 6^{7}). Stolen water is an emblem for *secret sin* (Pr 9^{17}), and the drinking of water is a figure for *unlawful love* (Sir 26^{12}). To drink the waters of a country is *to conquer* it (2 K 19^{24}, Is 37^{25}), or *to seek alliance* with it (Jer 2^{18}). The letting out of water has as its counterparts *the beginning of strife* (Pr 17^{14}), or the giving of *liberty to a wicked woman* (Sir 25^{25}). *Apostate disciples* are compared to waterless wells (2 P 2^{17}), or clouds (Jude ^{12}). *The inconsistency of blessing and cursing* is suggested by the impossibility of fresh and salt water coming from a fountain together (Ja 3^{10-12}). The salt in the sea corresponds to *God's wrath against the heathen* (Sir 39^{23}). The smallness of a waterdrop compared with the sea is an image of *the relation of time to eternity* (Sir 18^{10}). Deep water is a figure for *wise counsel* (Pr 18^{4} 20^{5}). *Judgment* and righteousuess are likened to the waters of a mighty stream (Am 5^{24}). The extent of the sea is made to suggest the universal spread of *God's glory* (Is 11^{9}, Hab 2^{14}).

JAMES PATRICK.

WATERSPOUTS.—Only Ps 42^{7} 'Deep calleth unto deep at the noise of thy waterspouts' (RVm 'cataracts'); Heb. תְּהוֹם אֶל־תְּהוֹם קוֹרֵא לְקוֹל צִנּוֹרֶיךָ; LXX *ἄβυσσος ἄβυσσον ἐπικαλεῖται εἰς φωνὴν τῶν καταρακτῶν σου.* The only other occurrence of the word צנור is in the very obscure passage 2 S 5^{8}, so that its meaning is somewhat uncertain, although in late Hebrew it means a *spout* or *pipe* (cf. Job 38^{25} 'Who hath cleft a channel for the waterflood?' מִי־פִלַּג לַשֶּׁטֶף תְּעָלָה). The reference in Ps 42^{7} is prob. to the numerous noisy waterfalls in a stream swollen by the melting of the snow (see Duhm, *ad loc.*).

WAVE-BREAST, WAVE-OFFERING.—See SACRIFICE.

WAW (letter).—See VAU.

WAX.—See WRITING, p. 945ª.

WAX.—This verb, which means to *grow* (Middle Eng. *waxen*, Anglo-Sax. *weaxan*, allied to αὐξάνειν), is frequently used in AV, and gives another syn. for 'grow,' as in Lk 1^{80} 'And the child grew, and waxed strong (ἐκραταιοῦτο) in spirit,' 13^{19} 'And it grew, and waxed a great tree' (*ἐγένετο εἰς δένδρον μέγα*, RV 'became a tree,' omitting *μέγα* with edd.). Cf. Maundeville, *Travels*, 105, 'In Ethiopia, when the children be young and little, they be all yellow; and when that they wax of age, that yellowness turneth to be all black.' The word is sometimes used with scarcely more meaning than 'become,' as Nu 11^{23} 'Is the Lord's hand waxed short?' So Mt 26^{37} Tind. 'And he toke with him Peter and the two sonnes of Zebede, and began to wexe sorowfull and to be in an agonye'; Lk 11^{53} Tind. 'The Pharises began to wexe busye aboute him.' It was, however, formerly used in the sense of *grow* or *increase*, without an adjective (it is never so used in AV), as Ac 6^{7} Wyc. 'The word of the lord wexed'; Gn 9^{7} Tind. 'See that ye encrease, and waxe.'

J. HASTINGS.

WAY (דֶּרֶךְ, אֹרַח, ὁδός), meaning literally either road* or journey, is used by a natural figure for course or manner in a great variety of applications. It is used for God's purpose or action (Ex 33^{13}, Job 21^{31} 36^{23}, Ps 67^{2} 77^{13}, Pr 8^{22}, Is 26^{8} 40^{3}, Job 21^{14} 34^{27}), described by varied epithets of excellence (Ps 25^{10}, 2 S 22^{31}, Ps 18^{30}, Dt 32^{4}, Rev 15^{3}, Dn 4^{37}, Hos 14^{9}, Job 26^{14}, Ro 11^{33}), defended against doubt (Ezk $18^{25.\,29}$), and contrasted with man's plans and doings (Is 55^{8}); also of His commandments (Gn 18^{19}, Ex 18^{20} 32^{8}, Dt 9^{12} 11^{28} 31^{29} Jg 2^{22}, Job 23^{11}, Ps 37^{34} 119^{14}, Jer $5^{4.\,5}$, Mal 2^{8}, Mt 22^{16}, Mk 12^{14}, Lk 20^{21}, Dt 5^{33} 8^{6} 10^{12} 11^{22} 19^{9} 26^{17} 28^{9} 30^{16}, Jos 22^{5}, Ps 18^{21} 25^{4} 51^{13} 81^{13} 95^{10} 103^{7} 119^{3} 128^{1} 138^{5}, 2 S 22^{22}, 1 K 2^{3} 3^{14} 8^{58} 11^{33-38}, Is 2^{3} 42^{24} 58^{2} 63^{17} 64^{5}, Jer 7^{23}), which He is ready to teach men (Ps $25^{8.\,9.\,12}$ 27^{11} 32^{8} 86^{11} $119^{27.\,29.\,33.\,37}$ 139^{24} 143^{8}, Is 30^{21} 35^{8}, Jer 32^{39} 42^{3}, Mic 4^{2}, Ps 16^{11} $119^{35.\,105}$ 23^{3}), and in obedience to which there is reward (Pr 8^{32}, Zec 3^{7}, Mal 2^{9}). Man's conduct generally is spoken of as a 'way' (1 K 2^{4} 8^{25}, 2 Ch 6^{16}, Ps $119^{1.\,9}$, Ja 5^{20}) or 'ways' (1 S 18^{14}, Job 4^{6} 13^{15} 22^{3}, Ps 39^{1} $119^{5.\,26}$, Ezk 16^{47}, Ac 14^{16}, 1 Co 4^{17}, Ja 1^{8}, cf. Pr 6^{6}), morally contrasted as good (1 S 12^{23}, 1 K 8^{36}, 2 Ch 6^{27}, Job 31^{7}, Ps 1^{6} $101^{2.\,6}$, Pr 2^{20} 29^{27}, Is 26^{7}, Mt 21^{32}, Ro 3^{17}, 1 Co 12^{31}, 2 P $2^{15.\,21}$) and bad (Gn 6^{12}, Nu 22^{32}, Jg 2^{19}, 1 K 13^{33}, Job 8^{19} 22^{15}, Ps $1^{1.\,6}$ 36^{4} 49^{13}, Pr $4^{14.\,19}$ 19^{3}, Ezk 3^{18}, Hos 10^{13}, Ps 10^{5} 125^{5}, Pr 1^{19} $2^{13.\,15}$ 3^{31} 10^{9} 14^{2} 22^{25} $28^{6.\,18}$, Jer 15^{7}). Although man is free to choose his own 'way' (Ps 119^{59}, Pr 7^{25} 21^{29} 23^{19}), hating the evil 'way' (Ps $119^{101.\,104.\,128}$), or choosing it (Is 53^{6} 57^{17} 59^{8} 65^{2}, Jer 3^{21}, Is 66^{3}), yet training is important (Pr 22^{6}), and example, whether for good (Jg 2^{17} 2 Ch 20^{32}, 1 K 22^{43}), as David's (2 K 22^{2}, 2 Ch 11^{17} 17^{3}), or for evil (1 K 15^{26}, 2 K 21^{21}, Pr 1^{15} 16^{29} 28^{10}, Is 3^{12}, Jer 2^{18} 10^{2} 18^{15}, Ezk $23^{13.\,31}$), as of the kings of Israel (2 K 8^{18} 16^{3}, 2 Ch $21^{6.\,13}$ 28^{2}), of the house of Ahab (2 K 8^{27}, 2 Ch 22^{3}), of Jeroboam (1 K 15^{34} $16^{2.\,19.\,26}$ 22^{52}), of Balaam (2 P 2^{15}), and of Cain (Jude ^{11}); but example is not always followed (1 S $8^{3.\,5}$, 2 Ch 21^{12}). As a man's course is well known to God (Job 24^{23} 31^{4} 34^{21}, Ps 119^{168} 139^{3}, Pr 5^{21}, Jer 16^{17}), He deals with him according to his deserts (1 K 8^{32}, 2 Ch 6^{23}, Ps 146^{9}, Jer 4^{18}, Ezk 7^{27} 11^{21} 16^{43} 22^{31} 36^{19}, 1 K 8^{39}, 2 Ch 6^{30}, Job 34^{11}, Pr 14^{14}, Jer 17^{10} 32^{19}, Ezk 7^{3} 18^{30} 24^{14} 33^{20}, Hos 4^{9}, Zec 1^{6}) in spite of occasional appearances to the contrary (Ps 37^{7}). But God desires men to consider their 'ways' (Ezk 20^{43} 16^{61} $36^{31.\,32}$, Hag 1^{5}) and turn from the evil (2 K 17^{13}, 2 Ch 7^{14}, Pr 5^{8}, Is 55^{7}, Jer $7^{3.\,5}$ 18^{11} 25^{5} $26^{3.\,13}$ 35^{15} $36^{3.\,7}$, Ezk 18^{23} $33^{8.\,11}$, Jon $3^{8.\,10}$, Zec 1^{4}), which He hates (Pr 8^{13} 15^{9}); and He promises to guide them into the good (Pr 4^{11} 8^{20}), which He loves (Pr 11^{20}). There are two 'ways' before man (Jer 21^{8}, Mt $7^{13.\,14}$, cf. Lk $13^{24.\,25}$, also *Didaché*, i. 1, and *Ep. of Barnabas*, xviii.), one of which leads to life, peace, and happiness (Pr 6^{23} $10^{17.\,29}$ 11^{5} 12^{28} 13^{6} 15^{24} 16^{17}, Ac 2^{28}, Ro 3^{17}, Pr 3^{17} 16^{7} 4^{18}), and the other to death, trouble, and misery (Pr 7^{27} 13^{15} 14^{12} 16^{25} 21^{16} 22^{5} 22^{25}, Is 59^{7}), in spite of man's illusions (Pr $12^{15.\,26}$ 21^{2}). This close connexion between conduct and condition is shown in the use of 'way' or 'ways' for man's lot as well as his deeds (Gn 28^{20}, Ex 23^{20}, Dt 1^{31}, Jos 1^{8}, Jg $18^{5.\,6}$, Dt 28^{29}; the literal sense is in these six passages passing over to the figurative, which appears clearly in 2 S 22^{33}, Ps 18^{32}, Job 3^{23} 19^{8} 23^{10} 22^{28} Ps 35^{6}). A man may think of ordering his lot after his own wishes (Pr 16^{9}, Jer 10^{23}), but God disposes it according to His own will (Ps 37^{23} 85^{13}, Pr $2^{8.\,12}$, Ps 91^{11}, Dn 5^{23}), to which it is well for man to commit himself (Ps 37^{5}, Pr 3^{6}). One lot none can escape, for death is 'the way of all the earth' (Jos 23^{14}, 1 K 2^{2}, cf. Job 16^{22}).

The purpose of God, foretold by the prophets (Is 40^{3}, Mal 3^{1}) and fulfilled in Christ, is described as the 'way of the LORD' (Mt 3^{3}, Mk $1^{2.\,3}$, Lk 3^{4} 7^{27}, Jn 1^{23}, Ac $18^{25.\,26}$, cf. Ac 13^{10}), of peace (Lk 1^{79}), of truth (2 P 2^{2}), and of salvation (Ac 16^{17}). Christ Himself is (Jn $14^{4.\,5.\,6}$), or has opened up, the way for man to God (Heb 9^{8} 10^{20}); and, accordingly, the Christian religion is spoken of simply as 'the Way' (Ac 9^{2} $19^{9.\,23}$ 22^{4} $24^{14.\,22}$), either because Christ claimed to be the Way (Jn 14^{6}), or because He had spoken of the narrow way unto life (Mt 7^{14}); or, lastly, because in Him was fulfilled the prophetic saying regarding the way (Is 40^{3}, Mal 3^{1}).

A. E. GARVIE.

WAYMARK.—In Jer $31^{21\,(20)}$ 'the virgin of Israel' is called on to set up waymarks and make guide-posts to mark the way for the returning exiles. The Heb. word trᵈ 'waymark' is צִיּוּן, which apparently means here a small stone pillar, similar to our milestones, with an indication of routes and distances. The only other occurrences of the Heb. term are 2 K 23^{17} (of the tombstone of the man of God from Judah; AV wrongly 'title,' RV 'monument') and Ezk 39^{15} (of the stone to be set up to guide the burying party to a corpse; AV and RV 'sign'). In Jer 31 [Gr. 38]^{21} the LXX, confusing with צִיּוֹן (Zion), reads *στῆσον σεαυτήν*, Σ(ε)ιών; in 2 K 23^{17} it has *σκόπελον*, and in Ezk 39^{15} *σημεῖον*.

---

* For an account of the main roadways of Palestine see articles TRADE AND COMMERCE, p. 805ᵇ, and WAR, p. 892ᵇ.

WEALTH.—i. *Terms.*—In OT 'wealth' is tr^{n} of הוֹן *hôn*, *πλοῦτος*, etc., *divitiæ*; חַיִל *ḥayil*, *πλοῦτος*, *divitiæ* [but also, as its proper meaning is 'strength,' 'resources,' *δύναμις*, etc.]; טוֹב *ṭôbh*, properly 'good,' 'prosperity,' an Elizabethan sense of 'wealth'; כֹּחַ *kôaḥ*, properly 'strength'; נְכָסִים *nᵉkhāṣîm*, *τὰ ὑπάρχοντα*, *χρήματα*, *substantia* [only in post-exilic literature; the corresponding Aram. נִכְסִין in Ezra is tr^{d} 'expenses,' 'goods']; and in NT of *εὐπορία*, *acquisitio*. 'Wealthy' tr. in AV שְׁלֵיו, Jer 49^{31} ('quiet,' 'ease'), but RV (from AVm) 'that is at ease'; 'wealthy place' stands in Ps 16^{12} for רְוָיָה ('saturation'), prob. error for רְוָחָה 'a spacious place.' The common term for 'riches' is עֹשֶׁר.

ii. *National wealth* would consist in the fertility, etc., of the soil, the minerals, streams, pasturage, population, cattle, etc.; in the neighbourhood of the country to trade-routes, and in natural facilities of intercourse with other nations; cf. PALESTINE, TRADE. Dt 8$^{7-9}$ describes the land as well-watered, rich in cereals, grapes, olives, figs, iron, and brass. It is possible, however, that these verses come from an exilic editor, and that the colouring is heightened by an exile's fond recollections of the ancient home of his people. The older description 'flowing with milk and honey,' Nu 13^{27} (JE), suggests that the wealth of the land was chiefly pastoral. Naturally, the settled government of the monarchy fostered trade, and promoted a certain accumulation of wealth, especially in the days when the Israelite States were independent and powerful, and were receiving, and not paying, tribute, *e.g.* in the days of Solomon (1 K 10$^{14-29}$) and in the early days of Isaiah (Is 2^{7}). Dt 8$^{12.\ 13}$ looks back to prosperous periods such as these. Nevertheless, in view of the uncommercial character of the people, and the barrenness of large portions of the country, especially in Judæa, Israel can hardly have been wealthy, even in proportion to its population, as compared with great commercial and conquering nations. We gather from the prophets of the 8th cent. that in Israel, as elsewhere, the material well-being of the people generally was greater in the earlier stages of the history, before the development of civilization led to the accumulation of land in large properties.

The Jewish community in Palestine after the Exile was poor, and burdened with tribute to Persia; and, as it seems, with wealthy nobles who preyed upon the necessities of their brethren (Neh 1^{3} 5, Hag 1$^{6-11}$ 2$^{16.\ 17}$, Zec 8^{10}, Mal 3^{14}). Time, no doubt, brought some improvement; and a measure of prosperity resulted from the work of Nehemiah; but the tone of the Psalms and other literature of the Persian and earlier Greek period suggests that the people generally, at any rate, were poor. There was, however, some revival of national wealth under the later Maccabæan kings, and still more under the Herods: witness the splendid buildings of Herod the Great. In addition to a settled government, two other causes contributed to produce this result. First, Palestine could not fail to profit in some measure by the growing prosperity of the Roman empire. Secondly, the Jews of the Dispersion often engaged in commerce and became wealthy; the sanctity of the temple brought vast crowds of pilgrims to Jerusalem for the great feasts, and increased the trade of the city; also, devout Jews and proselytes sent costly offerings to the temple. In the thirty or forty years, however, before the fall of Jerusalem, Palestine suffered severely from misgovernment and disorder.

iii. *Individual wealth.*—In the outlying pastoral districts we meet with men like Nabal in southern Judah (1 S 25) and Barzillai in Gilead (2 S 17$^{27-29}$), rich in flocks and herds and slaves; and their circumstances suggested the terms in which the wealth of the patriarchs is described, *e.g.* Gn 24^{35}. The chief use which such men had for their possessions was to maintain a great retinue, which gave them power and distinction. Another class of rich men consisted of chiefs, kings, priests, and other great officials, like Gideon, Abimelech, Jephthah, Eli, and the kings of Israel and Judah. Their authority brought them wealth (1 S 8$^{11-17}$). We learn from the prophets of the 8th cent. (Is 5$^{8-10}$ etc.), that towards the end of the monarchy there grew up a class of great landowners; and Neh 5 illustrates the process. In bad times the 'nobles and rulers' lent money, probably at exorbitant rates, on the security of the land, which became forfeit to them when the borrowers failed to fulfil their obligations. The allusions in the Prophets show that wealth had now become an instrument of luxury and display. Apart from Solomon, we have no instance in the OT of the successful Israelite merchant, of wealth gained by trade.

In the NT wealthy men like Joseph of Arimathæa and the young ruler appear upon the scene; such, too, figure in parables (*e.g.* Lk 16$^{19ff.}$), and in the teaching; but none of them play any important part in the history of our Lord or the early Church. Both in the Gospels (Mk 10$^{23-27}$) and elsewhere (*e.g.* Ja 5$^{1-6}$) wealth is represented as involving spiritual disadvantages, and as accompanied by high-handed injustice, and by persecution of the Church.

W. H. BENNETT.

WEAN (גָּמַל).—For the Eastern usages connected with weaning see art. BIRTH, vol. i. p. 301^{b}. The meaning of Ps 131^{2} ('Surely I have stilled and quieted my soul; like a weaned child upon his mother, my soul is upon me like a weaned child') is that the Psalmist has learned to renounce lofty aspirations, as the weaned child has learned to dispense with its mother's breast.

WEAPONS.—See ARMOUR.

WEASEL (חֹלֶד *ḥōled*).—The authority of the LXX *γαλῆ* and Vulg. *mustela* (Lv 11^{29}) is in favour of the EV 'weasel,' and others of the *Mustelidæ*, as the marten and civet. The authority of the Arab. *khuld*, the cognate of *ḥōled*, which signifies the *spalax* or mole-rat of the East, would be against the rendering 'weasel,' were it not that cognates often have widely different meanings. In the articles CHAMELEON and MOLE we have given all the evidence that bears on the question. It is perhaps best to follow the LXX and Vulg., and render 'weasel,' which must be held, however, to include other *Mustelidæ* in Palestine, as the marten, *Mustela foina*, L. (Arab. *nims*), the ichneumon, *Herpestes Ichneumon*, Fisch. (Arab. *nims* and *zerdî*), and the genet, *Genetta vulgaris*, C. A. Gray (Arab. *nisnâs* and *sammûr*), and others.

G. E. POST.

WEAVING (אָרַג 'weave,' אֶרֶג 'web' or 'shuttle.' Besides AV occurrences, RV gives 'weave in chequer work' for AV 'embroider' [שִׁבֵּץ] in Ex 28^{39}, and 'weave together' for AV 'wrap up' in Mic 7^{3}, where MT יְעַבְּתוּהָ is prob. corrupt).—Weaving is closely connected with spinning, as the materials for the loom were, for the most part, products of the spindle. Weaving, like spinning, is a very ancient art, one of the first invented by civilized man, being necessary for the preparation of his clothing, and we find abundant evidence of it upon the monuments. The early proficiency of Egyptian weavers is established by the remains of their textile fabrics, some of their linen products being like silk to the touch, and equal to our finest cambric in texture (Wilkinson, *Anc. Egyp.* ii. 161, ed. 1878); and vestures of fine linen are mentioned in the story of Joseph (Gn 41[42]). The goodly Bab. garment found at Jericho indicates the skill of the Chaldæan weavers; and the 'fine linen,' the 'finely wrought garments' (Ex 31[10] RV), and other articles of similar character mentioned in Ex. by P, as prepared for the tabernacle, and the garments of the priests, make it evident that the Hebrews had attained proficiency in the art. Weaving was generally carried on by men in Egypt, but women sometimes engaged in it (Herod. ii. 35; Wilkinson, i. 316, 317), and this seems to have been true of the Hebrews also (2 K 23[7], Pr 31[24]). The loom was of various kinds, upright and horizontal, and the woof was pushed both upwards and downwards (Wilkinson, ii. 170, 171). The Hebrews after arriving in Palestine would have a similar variety, but in the desert they might use simpler forms, such as are still found there. Burckhardt (*Bed. and Wah.* i. 67) describes a loom which consists of two short sticks driven into the ground at such distance apart as the width of the piece to be woven requires, and upon these a cross-piece, two other similar stakes with cross-piece being placed at a convenient distance from the first. Upon these cross-pieces the threads of the warp are stretched, the upper and under threads being kept apart by a flat stick. The common loom of the country today is quite simple, and has no doubt been used for centuries without much change. Two upright posts are fixed in the ground, which hold the roller to which the threads of the warp are fastened, and upon which the cloth is wound as it is woven. The threads of the warp are carried upward towards the ceiling at the other end of the room, and pass over rollers, and are gathered in hanks and weighted to keep them taut. The different sets are kept apart by reeds. The weaver sits at the cloth-roller and works the shuttle, while the healds are worked by treadles. We have no mention of the loom as a whole in the Bible, but from the incidental notices of various parts we infer that it did not differ greatly from that now in use. Thus we have the *beam*, with which a great spear or its staff is compared (1 S 17[7], 2 S 21[19], 1 Ch 11[23] 20[5]), from which we should infer that the cloth-roller is intended. In Jg 16[14] the loom itself may be meant, the word in Heb. (אֶרֶג) being derived from the verb *to weave*, while the word in the other passages (מָנוֹר) is from quite a different root. The *pin* (יָתֵד) in the above passage seems to be that which holds the web, *i.e.* the cloth-roller, for Samson carried it all away attached to his hair. The *shuttle* (אֶרֶג) is the emblem of the swift passing of human life (Job 7[6]), and the *thread work* (דַּלָּה) or *thrum* (Is 38[12]) which fastens the web, furnishes, by its being cut off at the hands of the weaver, a striking simile for sudden death. These and other notices indicate that weaving was a household word with the Hebrews, and it is quite probable that many families produced their own wearing apparel, as did that of the virtuous woman (Pr 31). The products of weaving were various: fine linen, purple and scarlet, woollen, goats'-hair cloth, tent-cloth, sack-cloth, etc., were produced in abundance. Garments of flax and wool together were forbidden (Lv 19[19], Dt 22[11]), but stuffs of variegated patterns worked in the loom, perhaps by gold thread, were produced as we know they were in Egypt (Wilkinson, ii. 166). This work may be that of the 'cunning workman,' and of those who 'devise cunning works' (Ex 35[35]) [see, on these expressions, EMBROIDERY (3)], and certainly it is the clothing 'inwrought with gold' (Ps 45[13] RV). The high priest's garments seem to have been of this character, woven in one piece (Jos. *Ant.* III. vii. 4), as we know Christ's coat (χιτών) was (Jn 19[23]). H. PORTER.

WEDDING.—See MARRIAGE.

WEEDS, as tr. of סוּף *ṣuph*, Jon 2[6 (5)], refers to sea weeds. The Red Sea was called יַם־סוּף, because of the numbers of them in its waters (see SUPH). The weeds (χόρτος) of Sir 40[16] mean the same as our indefinite English term *weeds*.

WEEK.—See TIME.

WEEKS (FEAST OF).—See PENTECOST.

Literature.

i. *Introductory. The Sources, monumental and literary.*—The system of weights and measures adopted by a particular nation of antiquity is not merely a subject of interest to the metrologist, but is of importance to every student of the history and development of the human race. In its metrology we have a clue, frequently older than anything to be found in its literature, to the forces at work in shaping the social and economic development of this particular nation, and to the influence, it may be, which it was able to exercise in its turn. The early economic history of a nation or country, in particular, is a subject of which in many cases the student of metrology holds the key. This is to some extent true even of the economic history of the Hebrews, notwithstanding the comparative antiquity of their literature, and the almost entire absence of monumental evidence in the shape of actual weights and measures.

An outline of our still imperfect knowledge of Hebrew weights and measures may be expected to include the following topics:—(1) A presentation of the various systems—weight, measures of length, and measures of capacity—and of the mutual relation of the various denominations within each system; (2) an attempt to determine the absolute value or values of each individual weight and measure in terms of the British imperial system; and (3) the relation of the Hebrew system in its various divisions to the older metrological systems of antiquity. Reference will be made only incidentally to the question of the origin of weights and measures in general, and to the inter-relation of the various systems,—of the weight standards to those of length, and of both to the standards of volume,—subjects of equal interest and complexity, which belong rather to a scientific treatise on metrology. It must suffice at this stage to record the fact that most Continental metrologists are now agreed as regards the most elaborate of the ancient systems, and, it would appear, the source of all or almost all existing systems, namely the Babylonian, that it was constructed with rigid scientific accuracy upon the basis, astronomically ascertained, of the unit of length. A cubic vessel, a fraction of this unit in the side, furnished the unit of volume; the weight of water contained in this unit was the unit of weight (see below, §§ vi. ix.).

The sources from which are derived the materials for such an outline as has just been sketched are of two kinds—monumental and literary. The former, unfortunately of the most meagre amount, consist of actual measures and weights, including coins, that have come down to us from the various periods of the national life of the Hebrews. The literary sources are, first of all, the books of the Bible, to which the works of Josephus, despite numerous inaccuracies, form an invaluable addition, owing to the frequent valuation of Jewish measures in terms of the contemporary Græco-Roman system. The treatises of the Mishna also contain valuable material for the first two centuries of our era. Finally, we have the late Greek writers on metrology, one or two fragments, in particular, showing accurate knowledge of the later Jewish system (see Hultsch's *Metrologicorum Scriptorum Reliquiæ*, 1864). Under both heads, monumental and literary, may be classed the metrological data furnished by the two great centres of early civilization, Babylonia and Egypt, on the one hand, and on the other by the better-known systems of Greece and Rome.

At every period of their history the Hebrews were alive to the necessity of an accurate system of weights and measures, and of an honest handling of the same. The earliest literary prophets are already found inveighing against the too pliant conscience of their contemporaries who made the ephah small and the shekel great (Am 8^{5}); in other words, gave short measure in selling the necessaries of life, while weighing the price to be paid against a weight that was unduly heavy. Amos' successors, Hosea (12^{7}) and Micah (6$^{10\text{f.}}$), were also led to denounce the 'balance of deceit' with its 'bag of deceitful weights,' and the 'scant ephah which is abominable.' Centuries later there is a sad monotony in the complaints of the religious teachers regarding the prevalent tampering with the 'just' weights and measures (Pr 11^{1} 16^{11} 20^{10}). The first legislative action in the interests of economic righteousness in our extant records is found in the Deuteronomic legislation (Dt 25$^{13-16}$). Here the practice of employing a double set of weights and measures—one above the normal for buying with, and another below it for selling with—is condemned, and 'whole and just,' *i.e.* accurately adjusted, weights and measures expressly enforced under promise of the Divine blessing. A similar demand for 'a just balance, just weights, a just ephah, and a just hin,' is emphasized in the Law of Holiness (Lv 19$^{35\text{f.}}$) and in an important passage of Ezekiel's ideal constitution, to which attention will afterwards be called (Ezk 45$^{9-12}$). The latest legislation even went so far as to order the periodical cleaning of the weights, scales, and measures, lest their true value and capacity should be impaired by the adhesion of foreign substances (*Baba bathra*, v. 10 f.).

THE HEBREW WEIGHT-SYSTEM.—ii. (*a*) *The Babylonian or 252-grain unit.*—Just as the natural proportions of the human body furnished the earliest measures of length (see below, § vi.), so man in all probability 'made his earliest essays in weighing by means of the seeds of plants, which nature had placed ready to his hand as counters and weights' (Ridgeway, *Origin of Metallic Currency and Weight Standards*, 387). By the beginning of the third millennium B.C., however, both the Babylonians and the Egyptians had left this primitive system far behind them. The former, in particular, as early as B.C. 3000, and probably long before, had elaborated a metrological system which, in its scientific basis and inter-relation of standards, bears a striking resemblance to the metric system of the Continent (see art. BABYLONIA, vol. i. p. 218 f.). The importance of the Babylonian system for our present study is due to the fact, first clearly revealed in the Tel el-Amarna correspondence, that the early civilization of Canaan was, in all essentials, of Babylonian origin. The grounds on which the older metrologists, such as Boeckh and Brandis, had long before inferred that the Babylonian weight-system had penetrated to Syria and Palestine, and the conclusive proof of the accuracy of this inference afforded by the Amarna tablets, have been given in the opening section of the article MONEY (vol. iii. p. 418), and need not be repeated here. It is essential, therefore, to understand the principle upon which this system was constructed. This was the now familiar sexagesimal principle, characteristic of the Babylonian scheme of numeration, the number 60 holding in this scheme the place of 10 in our decimal system. Thus 111 is not, as with us, 10^2+10+1, but 60^2+60+1, or 3661. Our division of the hour into 60 minutes, each of 60 seconds, it need hardly be said, is a direct legacy from the banks of the Euphrates. The unit of weight in the developed system was the mina (written ideographically MA.NA, and therefore presumably of Sumerian origin, though possibly Semitic), the Heb. מָנֶה *maneh* (so AV Ezk 45^{12}, elsewhere 'pound') and the Gr. *μνᾶ*. The next higher denomination, its sixty-fold, was the talent (Heb. כִּכָּר, apparently the *gaggaru* of the Amarna letters, in Greek *τάλαντον*), while below the mina was its $\frac{1}{60}$th, the shekel (*shiḳlu*, Heb. שֶׁקֶל, from *shaḳalu*, 'to weigh,' hence rendered in Greek by *στατήρ* from *ἵστημι* in the same sense, and transliterated by *σίγλος*). The scale may be graphically represented thus—

1 talent = 60 minas = 3600 shekels.
1 mina = 60 „

In the early temple-accounts, dating from B.C. 2000, recently recovered from Telloh in Southern Babylonia, there occurs a subdivision of the shekel into 180 *shé* or grains of wheat, which was afterwards discarded. This subdivision into 60 × 3 parts is of course an adaptation to the sexagesimal system; but it is worth noting that the prehistorical or natural Babylonian shekel, as it may be called, cannot have been far off the weight of 180 wheat-grains. If the weight of a grain of wheat be taken at the usual estimate of ·70–·72 of a grain Troy (originally a grain of barley, according to Ridgeway, *op. cit.* 180 ff.), 180 such grains come to 126–130 Troy grains, which is precisely the weight of the shekel as given by the existing stone weights (see below). As there can be little doubt that the use of the balance was first employed for the precious metals, the shekel, as its name denotes, was almost certainly the earliest unit of weight, as it continued to be, to the exclusion of the mina, in the earlier Hebrew literature (cf. MONEY, vol. iii. p. 420^{b} for illustrations).

When we pass to the determination of the value of the shekel and the higher denominations in the Babylonian system, we find that this branch of metrology has been almost revolutionized by the discovery in recent years of a few very ancient inscribed stone weights from the earliest centres of civilization in Southern Babylonia. The evidence of these weights may best be represented in tabular form. For full description (with illustrations) reference must be made to the numerous essays of the discoverer, Dr. C. F. Lehmann (see Literature at end of article), esp. to *Das altbabylonische Mass- und Gewichtssystem*, etc., Leiden, 1893.

Here we have unexpected evidence that the double standard, familiar enough in the weights of the Assyrian period, in which each denomination (mina, shekel, etc.) of the one set weighed was *twice* the weight of the same denomination of the other set, was in existence at a very early period, for the weights in question date from B.C. 3000–2500. Weights of the former class are said to be on the *heavy* standard, those of the latter on the *light* standard. Weight B, it will be found, represents the average mina of the light standard, viz. 491·2 grammes=7580 grains. The corresponding mina of the heavy standard is therefore 982·4 grammes = 15,160 grains. The following table gives the values of the complete scale :—

	Description of Weight.	Actual weight in grammes.	Weight of resultant mina in grammes.
A	Oval stone, about 4 in. long, with inscription in Sumerian, '½ mina, true weight,' etc.	244·8	489·6
B	Similar to A in form and material. Inscription uncertain. Clearly ⅓ of the foregoing, or ⅙ mina . . .	81·87	491·22
C	Longish harrel-shaped stone of same hard greenstone as A and B. '⅓ mina, true weight; palace of Nabusumesir, priest of Marduk' .	164·3	492·9
D	Cone-shaped stone, with long inscription in Babylonian. '1 mina, true weight—copy of weight or standard of Dungi . . . by Nebuchadnezzar . . . king of Babylon' [about 18 grains lost hy fracture of the stone, originally 15,105 grains =979·5 grammes] . .	978·3	979·5

VALUES OF THE EARLIEST BABYLONIAN WEIGHTS.

	HEAVY.	LIGHT.
Shekel . .	252⅔ grains	126⅓ grains *
Mina=60 shekels	15,160 ,,	7580 ,,
	circa 2⅛ lb. avoir.	*cir.* $1\frac{1}{12}$ lb. avoir.
Talent=60 minas=3600 shekels,	*circa* 130 lb. avoir.	,, 65 ,, ,,

These new values are considerably less in the higher denominations than those previously adopted in metrological studies, which were based on the evidence of numerous lion and duck weights of a much later period from the ruins of Babylon and Nineveh, yielding minas of 15,600 (heavy) and 7800 grains (light standard), and shekels of 260 and 130 grains respectively. From the fact that several of the bronze lion weights bear inscriptions containing, *inter alia*, the phrase '1 mina, ⅔ mina, etc., *of the king*,' it has become customary to describe these as belonging to the *royal standard*, to distinguish them from the earlier or *common standard*. In addition to these two standards, Dr. Lehmann has brought forward evidence, to which we propose to add presently, to show that the common standard at some early period received an increase of 5 per cent., yielding minas of *circa* 16,000 and 8000 grains respectively. Whether or not this increase was intended to be confined to payments made to the royal treasury cannot be ascertained, but there is monumental evidence that Darius Hystaspis added just this percentage to the weights of his time (see the inscribed weight published by Budge, *PSBA* (1888), pp. 464–466; Lehmann, *Verhandlungen d. berliner Gesell. f. Anthropologie*, etc. 1889, p. 273).

Returning now to the original mina of 15,160 (7580) grains, and shekel of 252 (126) grains, we find from a comparative study of the weight-systems of antiquity that the advancing tide of Babylonian civilization carried them to the shores of the Mediterranean, from whence they passed, in a bewildering variety of forms, to almost every civilized country. Thus, when the first Ptolemy reorganized the metric system of his new kingdom, he introduced the light mina of 7580 grains as the standard trade weight of Egypt. This mina, again, is exactly 1½ times the Roman pound, or *libra*, of 5053 grains, which is one-third of the corresponding heavy mina. The available evidence, further, goes to show that the shekel of 252 grains was the unit for the weighing of gold adopted by the Hebrews, as it was the gold as well as the trade unit of Babylonia—as has been assumed in the article MONEY (see table, vol. iii. p. 419^{b}), although, in the light of recent discoveries, to be related in the sequel, and of the preference of the priestly legislation of the Pentateuch for the Phœnician or silver standard of the same table, the assumption of that article requires to be somewhat qualified. Still, when we compare the statement of the Hebrew historian as to the amount of Ḥezekiah's indemnity imposed by Sennacherib, so far as the amount of gold is concerned, viz. 30 talents (2 K 18^{14}), with the latter's official account (see Schrader, *KIB* ii. p. 95), where precisely the same amount is recorded, we are bound to infer the identity of the Hebrew and Babylonian talent of gold. Then there is the statement of Josephus with reference to the weight (300 minas) of the beam of solid gold taken by Crassus from the temple treasury: *ἡ δὲ μνᾶ παρ' ἡμῖν ἰσχύει λίτρας δύο ἥμισυ* (*Ant.* XIV. vii. 1 [Niese, § 106]). This gives a weight of 2½ Roman libras, or 12,630 grains, for the mina of 50 shekels, and 252⅔ grains for the shekel, or alternatively 126⅓ grains for the mina of 100 shekels (for this division see below). In either case, the result is the familiar shekel of the early Babylonian system. This yields a Hebrew gold monetary talent of 60 minas or 758,000 grains (*c.* 108 lb. avoir.). But another statement of Josephus shows that at least an article made of gold might have its weight stated in other terms; for he gives the weight of the golden candlestick, which was a talent according to Ex 25^{39}, as 100 minas (*μνᾶς ἑκατόν*), adding: *Ἑβραῖοι μὲν καλοῦσι κίγχαρες* [*i.e.* כִּכָּר], *εἰς δὲ τὴν Ἑλληνικὴν μεταβαλλόμενον γλῶτταν σημαίνει τάλαντον* (*Ant.* III. vi. 7 [§ 144]). The mina of this passage is clearly distinct from the mina of the passage just cited, viz. $\frac{1}{100}$ of 758,000 grains, or 7580, which is the light Babylonian trade mina of 60 shekels of 126⅓ grains, as shown in the table, § ii. above. This explanation, suggested for the first time, has the merit of preserving the consistency of Josephus as regards the weight of the Hebrew gold talent. On the other hand, inasmuch as the weights of gold and silver in the Priests' Code are expressly stated to have been on the standard of the so-called 'shekel of the sanctuary' (see next §, and MONEY, vol. iii. p. 422), or Phœnician shekel of 224½ grains, 3000 of which yield a talent of 673,500 grains, the explanation of the passage adopted in the previous article (*l.c.*), that the 100 minas are Attic minas of 6735 grains, is perhaps to be preferred, even at the expense of the Jewish historian's consistency, and despite the fact that the Roman-Attic mina in his day weighed considerably less (see § v. below). These considerations, at least, show the difficulty of arriving at definite results in the absence of monumental data.

The persistence, side by side, of the two standards, the heavy and the light, explains how the heavy mina might by one writer be taken as containing 50 heavy shekels, by another as containing 100 light shekels. Thus it is that the weight of Solomon's smaller shields is given in 1 K 10^{17} as three (heavy) minas,* but in the parallel passage

---

* This is only 3 grains heavier than the English sovereign, 123·274 grains.

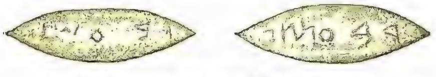
* The mina (מָנֶה) is here first met with in OT. Elsewhere only Ezr 2^{69}, Neh 7$^{71f.}$ (in all three passages rendered 'pound' in EV), Ezk 45^{12} where it is transliterated 'maneh,' and Dn 5$^{25\cdot27}$.

(2 Ch 9^{16}) as 300 (light) shekels, assuming, that is, that the text of both passages is intact. If the explanation given elsewhere (MONEY, vol. iii. p. 421^{b}) of the new denomination, *darkemōn*, found only in the historical work, Chronicles - Ezra - Nehemiah, is correct, that we have here a Hebraized form of the Greek δραχμή, we have further confirmation of the prevalence in the Persian and early Greek periods of the light, in preference to the heavy, shekel. The weight of 1000 drachms (AV 'drams,' RV 'darics,' Ezr 8^{27}), for example, is undoubtedly 1000 of the light Perso-Babylonian shekel on the royal standard, viz. 130 grains (see above), the theoretical value of the Persian daric.

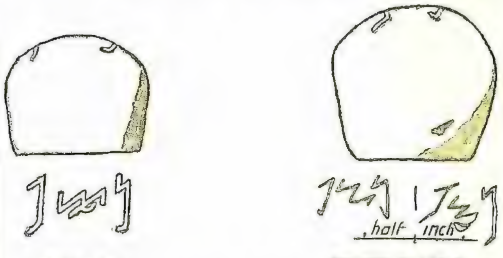
The same weight is most probably intended by the unique expression employed to indicate the weight of Absalom's hair, viz. '200 shekels after the king's weight' (בְּאֶבֶן הַמֶּלֶךְ * 2 S 14^{26}). The context of this verse is now regarded as a post-exilic addition to the original narrative (Budde, Thenius-Löhr, H. P. Smith); and, since the phrase is parallel to the legends on the lion weights of Nineveh, we may safely understand the shekel in question to be the light Persian unit of 130 grains, giving a total weight of 26,000 grains, or $3\frac{5}{7}$ lb. avoirdupois.

If the legend of Bel and the Dragon, as is possible, had its home in Egypt, the '30 minas of pitch' in this curious story (v.^{27} LXX) are the Ptolemaic trade minas, which we have seen to be identical with the light mina of the earliest Babylonian weights; and thus we return at the close of this section to the point from which we set out.

iii. (*b*) *The new Syrian or 320-grain unit.*—Reference has already been made to the interesting fact that the tribute of the vassal-states of Syria and Palestine in the reign of Thothmes III. (*c.* 1500 B.C.) when expressed in terms of the Egyptian weight-system, based on the *ket* with its decimal multiple, the *deben* or *uten*, runs to irregular numbers and even fractions of the *ket*, whereas its original weight must have been hundreds and thousands of shekels. Various attempts have been made recently (see Brugsch, *Z. f. Aegypt. Sprache*, 1889, 22 ff., 87 ff., *Z. f. Ethnologie*, 1889, 36 ff.; Lehmann, *Verhandl. d. berl. Ges. f. Anthropologie*, 1889, 272 f.; Hultsch, *Gewichte d. Altertums*, 25 f., 119 f.) to determine the value of the shekel or shekels by which this tribute was weighed. These attempts, however, can yield but doubtful results, owing, for one thing, to the considerable range in the value of the *ket*, as shown by actual weights. Thus, to take a simple illustration, in Thothmes' 34th year 'the tribute of the provinces of the land of Retennu [Syria]' was in 'gold 55 *deben* 8 *ket*' (Petrie, *Hist. of Egypt*, ii. 118). Now, if we take the *ket* as fixed by Lepsius, Hultsch, and others at 140 grains, it will be found that 558 *ket* represent 620 shekels of 126 grains, or 600 shekels of 130·2 grains, on the 'royal' or later daric standard, without a remainder in either case. On the other hand, we have only to take 143·35 grains as a mean value of actual *ket* weights to get 558 *ket* = 80,000 grains, or 10 light minas of the common norm, raised 5 per cent. as explained above. We have been led to this result by fresh evidence, unknown to the writers just cited, to which we now turn. In the spring of 1890 Dr. Chaplin purchased at Nablus a small shuttle-shaped stone weight, here reproduced, on either side of which were engraved a number of early Heb. characters. The correct decipherment and interpretation of these gave rise to a somewhat heated controversy in various periodicals, in which Professors Robertson Smith, Sayce, Driver, and others took part (see *PEFSt*, 1890, 267; 1891, 69; 1893, 22; 1894, 220, 284 ff.; 1895, 187 ff.). With the help of other inscribed weights still more recently discovered by Dr. Bliss in Southern Palestine, one of the two doubtful words on the Chaplin weight is now made out with tolerable certainty to be נֶצֶף, a Heb. word from the same root as the Arabic *nusf*, meaning 'half,' first suggested by Professor Euting in 1890 (in König's *Einleit. in d. AT*, 425). The second doubtful word (של), on which the controversy mainly turned, is apparently an abbreviation of the familiar שֶׁקֶל (Conder, *PEFSt*, 1891, 69; Clermont-Ganneau, *ib.* 1899, 208, and, more decidedly, *Recueil d'archéol. orientale*, iv. (1900) 24 ff., where a full discussion of these early weights will be found), the limited space available perhaps causing the omission of the ק. The evidence of the Chaplin and other weights, five in all, may best be presented in tabular form thus—



ANCIENT HEBREW WEIGHT (A) FROM SAMARIA.



WEIGHT C. WEIGHTS D AND E.

ANCIENT HEBREW WEIGHTS FROM SOUTHERN PALESTINE.

EARLY INSCRIBED HEBREW WEIGHTS.

	Description of Weight.	Actual weight in grains.	Weight of resultant heavy shekel in grains.
A	Small shuttle-shaped weight of hæmatite from Samaria, with inscriptions רבע נצף רבע ש[ק]ל [$\frac{1}{4}$ *neẓeph*—$\frac{1}{4}$ shekel]. Illustr. *PEFSt*, 1890, 267; 1894, 287.	39·2	313·6 156·8
B	A perforated 'bead' of reddish-yellow stone from Anathoth inscribed נצף. Actual weight 134 grains; before perforation approximately 156 grains (*ib.* 1893, 32 f., 257; illust. Clermont-Ganneau, *op. cit.* 26).	156	312
C	Small dome-shaped weight of reddish stone from Tell Zakariya, inscribed נצף (Bliss, *PEFSt*, 1899, 107 f.; illust. *ib.* plate 7).	157·5	315
D E	Two similar weights; one of white limestone, the other of 'light reddish' stone, with the same legend as B and C. Same provenance as C (Bliss, *ib.* 183, with illust.).	146·7 139	293 278

The last two, of soft limestone, are evidently much worn, and may be neglected in favour of the better preserved specimens in our determination of the unit here disclosed. Starting from the more extended inscription of the Chaplin weight, the characters of which point to an 8th cent. date, we note, first of all, the influence of the Babylonian double standard. This alone explains how this tiny weight can be at once the fourth of a whole shekel and the same fraction of a half-shekel, assuming that this is the true sense of *neẓeph* (see Clermont-Ganneau, *op. cit.* 30 f.). Further, although of hard hæmatite, the condition of the inscription shows that it has lost a trifle of its original value, which must have been not less than 40 grains. As it represents a quarter (cf. the רְבַע שֶׁקֶל or quarter-shekel of Saul's servant, 1 S 9^{8}), this gives 160 grains for the light shekel, the half or *neẓeph* of the corresponding heavy shekel of 320 grains—a result entirely in harmony with the original values of weights B and C. The great importance of these new discoveries lies in the fact that we have here a shekel hitherto unknown in Palestine. Indeed it appears to have been unknown to metrologists until discovered in numerous examples by Flinders Petrie in Naukratis and neighbourhood (Petrie, *Naukratis*, pt. i. 78, 85 f.; *Tanis*, pt. ii. 84, 91 f.; cf. his art. 'Weights and Measures' in *Encyc. Brit.*^{9} xxiv. 487 f.). The standard of these weights is named the '80-grain standard' by Petrie, who regards it as derived from 'the Assyrian 5 or 10 shekel weight, binarily divided and used as an independent unit,' since 128 grains × 10 ÷ 4 gives 320 grains. While differing with reluctance from so distinguished a metrologist, the writer still adheres to the conclusion he had come to before having an opportunity of consulting the Naukratis and Tanis volumes, viz. that the new Palestinian weights are derived directly from the Babylonian mina of 16,000–8000 grains, the origin of which has already been fully explained. The shekels of these minas, of course, yield 266–133 grains, on the sexagesimal system; but in the West this system never supplanted what must be regarded as the earlier decimal system. Hitherto it has been usual, it is true, to assume that the Hebrews in early times adopted the sexagesimal system in its entirety—the talent containing 60 minas of 60 shekels each (so even by our most recent authority on Hebrew archæology, Nowack, *Heb. Arch.* i. 208); but proof of this view is entirely wanting. For the attempt to obtain it from the corrupt MT and the EV rendering of Ezk 45^{12} 'twenty shekels, five and twenty shekels, fifteen shekels [= 60 shekels] shall be your maneh,' is grammatically and otherwise inadmissible. The only possible remedy for this passage is, with all recent critics, to accept the reading of the codex A of the LXX, and render: 'five (shekels) shall be five, and ten shekels ten, and fifty shekels shall be your mina'; *i.e.* the weights in everyday use, like the measures referred to in the verses preceding and following, shall be neither more nor less than the standard value.

---

* Literally, 'after (the standard of) the king's *stone*.' That the Hebrew, like the early Babylonian, weights were of stone, is shown by the fact that אֶבֶן is elsewhere frequently used in OT in the sense of 'a weight'; cf. Lv 19^{36}, Dt 25^{13}, Pr 16^{11} etc.

In the West, then, we hold that from the first a compromise was effected between the decimal and sexagesimal systems, and that, while the less frequently used talent of 60 minas was retained, the 'raised' minas of 16,000 and 8000 grains were divided by 50 to yield shekels of 320 and 160 grains. The fact to which Petrie calls attention (*Naukratis*, i. 85 f.), that the Egyptian weights of this standard are of large size, averaging 2000 grains, — Petrie's weights, Nos. 483, 486, 1282, 1286, the largest found, are all *c.* 8000 grains,—seems to tell in favour of the derivation here proposed and against the derivation from a smaller unit. Petrie, however, is of the opinion, to which we were led independently after repeated attempts to find the shekel of the Syrian tribute lists, that the shekel in question is to be found in this new 80-grain unit, which he therefore proposes 'to call in future the Hittite standard' (*Tanis*, ii. 92). On the whole, however, a safer nomenclature would be the Syrian standard; and certainly the unit must be raised, in deference to the unequivocal testimony of the Chaplin weight, to 160 or 320 grains. The result, then, of the recent discoveries is to show that from the 16th to the 6th cent. B.C. a light shekel was in use in Syria and Egypt of the value of 160 grains, which was at the same time the half of a corresponding heavy shekel of 320 grains, each being $\frac{1}{50}$ of minas of 8000 grains ($1\frac{1}{7}$ lb. avoir.) and 16,000 grains ($2\frac{2}{7}$ lb.) respectively. Further, this mina of the 320-grain or Syrian standard continued in use in Syria down to the Christian era: witness the inscribed weights from Antioch and neighbourhood, described by Brandis (*Das Münz-, Maas- und Gewichtssystem Vorderasiens*, 156 ff.), one of which bears the interesting legend ΒΑΣΙΛΕΩΣ ΑΝΤΙΟΧΟΥ ΘΕΟΥ ΕΠΙΦΑΝΟΥ ΜΝΑ, and weighs 7960 grains. The smallness of the Palestine weights points, like the tribute lists, to the use of this unit for weighing the precious metals; while the large size of the Naukratis weights shows that in Egypt it was rather used 'for domestic and common purposes' (Petrie). So far, then, as our present evidence goes, we may conclude that this ancient unit was in use for all transactions alongside of the Phœnician unit, next to be discussed, until displaced by the latter after the Exile, largely, no doubt, owing to the influence of Ezekiel and the Priests' Code, both these authorities contemplating the latter as the only official unit. It is worth noting, finally, as a notable example of the trustworthiness of tradition, that Maimonides in his הלכות שקלים, a commentary on the Mishna treatise *Sheḳalim*, records that the early Heb. shekel weighed 320 grains of barley (*i.e.* Troy grains), and was supplanted in the time of the second temple by the *ṣela'* (סֶלַע), the Heb. equivalent of the tetradrachm or heavy Phœn. shekel (see Surenhusius' summary in his preface to the treatise in question, *Mishna*, ii. 177).

iv. (*c*) *The Phœnician or 224-grain unit.*—Previous to the discovery of the weights described in the foregoing section, the only Heb. unit monumentally attested was the shekel of the coins of the revolts, generally but wrongly known as the Maccabæan shekel. The usual explanation of the origin of this widely-spread unit (the theoretical value of which may be put at $224\frac{1}{2}$ grains, with effective weight averaging 218–220 grains) as a silver unit from the Babylonian gold shekel of 252 grains, on the ratio of gold to silver as $13\frac{1}{3} : 1$, has been given under MONEY (iii. 419^{a}). Hultsch, on the other hand (*Gewichte d. Altertums*, 7, *et passim*), finds its origin in Egypt, the shekel of 224 grains being $\frac{1}{50}$ of a mina of 60 shekels, each of the value $\frac{4}{3}$ *ket* ($140 \text{ grains} \times \frac{4}{3} \times 60 \div 50 = 224$). It is possible, however, that the Phœnician 224-grain shekel is to be derived from the Syrian 160-grain shekel described in the previous section. We have only to assume that in the West gold stood to silver in the more convenient ratio of 14 : 1; the gold shekel of 160 grains would then be worth ten silver shekels of 224 grains each, since $160 \times 14 = 224 \times 10$. This is at least preferable to Ridgeway's theory based on an assumed ratio between the metals of 17 : 1 (*Origin of Currency*, 287).

In any case we have to deal with an exceedingly ancient unit, for an Egyptian weight inscribed with the name of Ampi, a priest of the 10th dynasty (*c.* 2300 B.C.), and marked as 10 units, weighs 2188 grains (Griffith, *PSBA* xiv. 445), yielding a unit of 218·8 grains, which can scarcely be other than the Phœn. shekel of 218–224 grains. Its prevalence in Palestine from the earliest historical period need not be doubted, as it may be confidently assumed to have been the silver, if not, also, the trade shekel of the Phœnician traders in Canaan, whose name Canaanite (כְּנַעֲנִי) came latterly to signify 'merchant' in general (Zec 11^{7. 11} [LXX], Pr 31^{24} etc.). It must therefore have existed side by side with the 320 (160)-grain shekel above described. Like the other units of Western Asia, the Phœn. unit had its heavy and light shekels of 224½ and 112¼ grains respectively. Fifty of the former or 100 of the latter went to the heavy mina of 11,225 grains (*c.* 1⅗ lb. avoir.), and 60 minas, as elsewhere, to the talent (see table, vol. iii. p. 419^{b}). It is manifestly the shekel intended by Ezekiel (45^{12}), who first mentions the subdivision into 20 *gerahs*—a term apparently adopted from the Babylonian, *giru* being the name of a small silver coin (?) of Nebuchadnezzar's time, and identified by the Alexandrian translators with the Greek *ὀβολός* (see, further, MONEY, vol. iii. p. 422). The Priests' Code likewise seems to contemplate its adoption for every transaction with the balance, certainly for silver and gold (Ex 38^{24ff.}), spices (30^{23f.}), and copper (cf. 38^{29} with Lv 27^{25}). This is confirmed by the evidence of the Mishna to the weights of the first two centuries of our era (see next §). That the heavy shekel of 220–224 grains, and no other, can be the 'shekel of the sanctuary,' or 'sacred shekel,' we have endeavoured to prove elsewhere (*l.c.*). The '20 shekels of bread' of Ezk 4^{10} are doubtless of this standard, probably also the talents of iron of 1 Ch 29^{7}; while for the brass and iron of Goliath's armour (1 S 17^{5. 7}) we have the choice of the Phœn. and of the new Syrian shekel.

v. (*d*) *The syncretic weight-system of the Mishna.*—It has been sufficiently explained elsewhere (MONEY, iii. 426 ff.) how, after the Roman conquest of the East, the drachm of the Greek monetary system became interchangeable with the Roman denarius, reduced in weight, first to 60, and then by Nero to 52½ grains, when it differed but little from the quarter-shekel of 54½ grains, effective weight. Now, since the denarius was a fixed fractional part of the Roman pound, being $\frac{1}{96}$ of the libra and therefore ⅛ of the uncia, the denarius-drachm was found to be not only useful as money, but exceedingly convenient as a weight. Thus it came to form the unit of the latest Jewish weight-system as reflected in the Mishna. Its divisions and multiples are a tribute to the adaptive genius of the Jewish people, combining, as they do, elements from the systems of Phœnicia, Greece, and Rome, which all had their meeting-ground in the Palestine of the first century. The denarius-drachm itself was named the *zûz* (זוז), and retained the division into six obols (מָעָה). Two denarii made a (light) shekel, four a tetradrachm (סֶלַע), the ancient Heb. (heavy) shekel, of which 25, or 100 *zûz*, went to the mina. For the last the old Heb. term מָנֶה was retained, *e.g.* a mina of flesh (*Sanhed.* viii. 2), of figs (*Peah* viii. 5), of wool (*Khullin* xi. 2). In the two passages last cited, and elsewhere, we meet with the *pĕrâs* (פְּרָס) or half-mina. This term most scholars now agree in finding—as first suggested by M. Clermont-Ganneau—in the PERES and U-PHARSIN of Dn 5^{28. 25}, the mysterious writing on the wall signifying, not as in RVm 'numbered, numbered, weighed, and divisions,' but 'a mina, a mina, a shekel, and half-minas.' The system above sketched may be presented thus, omitting the lowest denomination—

THE LATEST JEWISH WEIGHT-SYSTEM.

זוז	Denarius-drachm	1					52½	grs.
שֶׁקֶל	Shekel *	2	1				105	,,
סֶלַע	Tetradrachm	4	2	1			210	,,
מָנֶה	Mina	100	50	25	1		5250^{1}	,,
כִּכָּר	Talent	6000	3000	1500	60	1	315,000^{2}	,,

Notes.—^{1} *i.e.* 12 oz. avoir. ^{2} *i.e.* 45 lb.

The importance of this late Jewish system for our previous investigations lies in the fact that it supplies the evidence, for which one looks in vain in the older Heb. literature, that the Phœn. weight-system has the best claim to be regarded as that on which Jewish trade was conducted not only in the first two centuries of our era, but for several centuries before. It was natural that the mina of this system should be identified with the libra or pound of the Roman weight-system. The latter occurs in the NT only in Jn 12^{3} 19^{39} (EV 'pound,' *λίτρα*, whence the לִיטְרָא of the Mishna, also occasionally מָנָה אִיטַלִּיקִי). The talent (Rev 16^{21}, cf. Josephus, *BJ* v. vi. 3 [§ 270] *ταλανταῖοι πέτραι*) of 315,000 grains when doubled, *i.e.* when taken not as 3000 light but as 3000 heavy shekels or tetradrachms, was tariffed on the Roman system as 125 libras, as is testified by a weight with the inscription PONDO CXXV TALENTVM SICLORVM III (3000 shekels, the M for 1000 being omitted), and confirmed by Epiphanius. A large stone weight found at Jerusalem in 1891 (*PEFSt*, 1892, 289 f.), said to weigh 41,900 grammes (*c.* 646,000 grains), is evidently a heavy talent on this system.

To sum up the result of the foregoing sections, evidence has been adduced for the existence, side by side, in the earlier period of Heb. history of three distinct units of weight—the Babylonian 252-grain unit, the new Syrian 320-grain unit, and, the best attested of all, the Phœnician 224-grain unit, each with its corresponding light unit of 126, 160, and 112 grains respectively. The second probably did not survive the Exile; while the last, in the end, gained the day over both its competitors.

HEBREW MEASURES OF LENGTH.—vi. *Approximate value of the Hebrew cubit.*—The most widespread of all metrical denominations are those measures of length which have been derived from certain parts of the human body—the fingerbreadth or digit, the handbreadth or palm, the cubit (*κύβιτον*, *cubitum*, the elbow), or the length of the forearm from the elbow to the tip of the middle finger. The equally convenient 'foot,' however, is foreign to the Heb. system. By the Gr. metrologists of the empire the digit was regarded as the unit: *ὁ δάκτυλος πρῶτός ἐστιν ὥσπερ καὶ ἡ μονὰς ἐπὶ τῶν ἀριθμῶν*, so writes Julian of Ascalon (*ap.* Hultsch, *Metrol. Script. Reliquiæ*, i. 200), who proceeds to give the usual denominations of the system in use in his time in Palestine, disclosing the well-nigh universal division of the cubit into 6 palms, each of 4 digits (for exceptions to this division see below). The comparative frequency of the references to the cubit in the OT, however, warrant us in regarding it as the unit of the Heb. system. Before proceeding to the investigation of the length of the cubit, it may be noted at this stage that the Hebrews in their measurements employed both the measuring-rod (קְנֵה הַמִּדָּה Ezk 40^{3} etc., LXX and NT *κάλαμος*, Rev 11^{1} 21^{15f.}) and the measuring-line (קַו הַמִּדָּה Jer 31^{39}; also חוּט 1 K 7^{15}, Jer 52^{21} [AV wrongly 'fillet']). The latter was probably used for the larger measurements, one such being mentioned in the Mishna as of 50 cubits in length (*Erubin* v. 4).

The evidence of the OT goes to show that the Hebrews, before and after the Exile, were familiar with two cubits of different lengths. First of all, we find the bed or sarcophagus of Og, the king of Bashan, measured according to 'the cubit of a man' (בְּאַמַּת אִישׁ Dt 3^{11}, cf. Rev 21^{17}); in other words, according to the then customary, everyday cubit (cf. the similar expressions in the original of 2 S 7^{14},

---

* The old term 'shekel' was henceforth confined to the true half-shekel, formerly 112 grains; cf. the name of the treatise *Shekalim*, dealing with the payment of the temple tax of half a shekel. In Galilee, however, the term סֶלַע was applied to the latter, hence in the Mishna the Galilæan *ṣela'* is always said to be equal to ½ the *ṣela'* of Judæa.

Is 8^1, Rev 13^{18} etc.). When we consider, in the second place, that the early chapters of Deuteronomy are almost certainly later than the eighteenth year of Josiah, and therefore within the period embraced by the lifetime of Ezekiel, we are led to identify the 'cubit of a man' of the passage cited with the cubit in everyday use among Ezekiel's contemporaries. This prophet, in a passage of the first importance for our investigation, informs us that the measurements of the temple of his vision are not on the standard of the then generally used cubit, but after a cubit longer than the latter by a handbreadth (Ezk 40^5, cf. 43^{13}).* Now, since the proportions and arrangements of Ezekiel's temple are in all essential particulars identical with those of the temple of Solomon, the prophet's aim in the use of this longer cubit can hardly be other than to ensure that his temple shall be a replica of the older Solomonic temple. That this, rather than the possible alternative that Ezekiel is here introducing a new cubit on the Babylonian standard (so Haupt in *SBOT*, 'Ezekiel,' 179 f.), is the correct inference from the passage before us, is confirmed by the remark of the Chronicler that the dimensions of Solomon's temple were determined by cubits 'after the *former* measure' (2 Ch 3^3). Ezekiel and the Chronicler, then, are our authorities for the conclusion that the cubit in ordinary use, both before and after the Exile, was shorter by a handbreadth than the cubit employed, for building purposes at least, in the reign of Solomon. In view, further, of the all but unvarying tradition, confirmed by the practice elsewhere, as shown above, that the ordinary cubit contained six palms or handbreadths, we are left to infer that the Solomonic building cubit *was a cubit of seven handbreadths.*

When we look for further light on this point to the ancient home of all scientific metrology, the result is disappointing. As early as B.C. 3000, the era of Gudea, the Babylonians had discarded the more primitive or natural system of lineal measures for a rigidly scientific system, constructed, like the rest of their metrology, on a sexagesimal basis. On this system fresh light has recently been thrown by the recovery of two early scales of linear measurement, engraved upon statues of Gudea, from Telloh in Southern Babylonia (see details by C. F. Lehmann in *Verhandl. d. berliner Gesell. f. Anthropologie*, 1889, 288 ff.; 1896, 453 ff.; *Das altbabyl. Maas- und Gewichtssystem*, 52 ff. A short summary with illustration is given by Haupt in Toy's 'Ezekiel' [*SBOT* 179 f.]; cf. art. BABYLONIA, vol. i. p. 218^b). The more perfect of the two scales is divided by transverse lines into sixteen subdivisions, each a trifle over ⅝ in. in length, fifteen of which are considered to represent a quarter of the double cubit, which, as we know from the tablet of Senkereh (*IVAI* iv.^{2} 37), constituted the unit of the linear system. This double cubit, then, contained 60 of the *ubānu* or fingerbreadths of Gudea's scale, or about 39¼ in., which gives a single cubit of 30 digits, or 19⅝ in. Five digits on this system are supposed to have gone to the handbreadth, of which 6 formed the cubit. In addition to this cubit there appears to have been a so-called royal cubit of 33 digits (Herod. i. 178), or 21⅝ in. In all periods of Babylonian history the size of the square bricks for building purposes remained constant at 13 in., which is ⅔ of Gudea's cubit or ⅗ of the royal cubit, and is termed by Continental metrologists the Babylonian foot.† The primitive Hebrew measures appear to have remained uninfluenced by this more artificial system.

On the other hand, when we turn to the other centre of early civilization in the East, we find in Egypt a system presenting an exact correspondence with what we have so far learned of the chief Hebrew measure of length (see esp. F. L. Griffith, 'Notes on Egyptian Weights and Measures' in *PSBA* xiv. [1892] p. 403 ff.). Here two cubits were in use from the earliest times—the 'short' cubit of 6 and the 'royal' cubit of 7 handbreadths. Happily, the survival of actual cubit-rods and the measurements of the pyramids and other ancient monuments have made it possible to determine the length of the royal cubit with sufficient accuracy for ordinary purposes as 20·63 in. (Petrie, *Encyc. Brit.*^{9} xxiv. 483^a; cf. Watson, *PEFSt*, 1897, 203; Griffith, *l.c.*). The short cubit, as $\frac{6}{7}$ of the other, contained 17·68 in., 6 palms of 2·95 in., or 24 digits or fingerbreadths of ·74 in. We have here, then, the same ratio between the cubits, and the same subdivisions as we found in the case of the Hebrew cubits—facts which render it impossible to avoid bringing the two systems, Egyptian and Hebrew, into more intimate connexion. It would be rash at this stage, however, to propose their original identity until we have had some evidence as to the probable length of the early Hebrew cubit.

Innumerable attempts have been made in the course of the last two centuries to determine the absolute length or lengths of the OT cubit. One of the most eminent of living metrologists is reduced to finding 'the sole reliable determination of the Hebrew measures of length' in a metrological table which in its present form is scarcely older than the 14th cent. of our era! From this document, with doubtful cogency, he argues for the identity of the ordinary Heb. cubit with the royal Egyp. cubit (Hultsch, *Metrol.*^{2} 437 ff.). In our own country a few of the more noteworthy values proposed in recent years are as follows:—

Conder (*Handbook of the Bible*, and elsewhere) . . .	16 inches.
Beswick (*PEFSt*, 1879, 182 ff.) .	17·72 ,,
Watson (,, 1897, 203 ff.) .	17·70 ,,
Warren (,, 1899, 229 ff.) .	17·75 ,,
Petrie (,, 1892, 31) .	22·6 ,,
Petrie (*Encyc. Brit.*^{9} xxiv. 484) .	25·2 ,,

To these may be added the estimates adopted in Smith's *DB*, from Thenius, of 19·5 in. From these widely-varying results it will be clear to every reader that *reliable data for the exact evaluation of the Hebrew cubit do not exist.* The following is merely a fresh attempt to reach an approximate value.

(*a*) *The evidence of the Siloam inscription.*—In lines 4 and 5 of this famous inscription may be read: 'and the waters flowed from the outlet [of the spring] to the Pool [of Siloam] one thousand and two hundred cubits.' Now the total distance from the spring to the pool, according to Conder's careful measurements (*PEFSt*, 1882, 122), is 1758 ft., which yields a cubit of 17·58 in. Unfortunately, the number 1200, like the other specification of 100 cubits as the height of the rock above the tunnel, is evidently a round number, so that the value of the cubit as *c.* 17·6 in. here disclosed is only approximate. The measured length, 1758 ft., yields 1193 short Egyp. cubits of 17·68 in. and 1206 of the Gr. cubit of 17½ in. Both the cubits proposed by Flinders Petrie are evidently out of the question (see, further, below).

---

* This longer cubit, however, is not, as our EV would lead one to suppose, called by the prophet a 'great cubit' (see 41^8 RVm). But the original is here confessedly uuintelligible.

† The whole system of Babylonian weights and measures is based, according to Lehmann, who has made this subject specially his own, on the double cubit (39¼ in.) of Gudea's scale, which he holds to be identical with the length of the seconds pendulum in the latitude of the astronomer priests of Babylonia! The unit of volume was a cubic vessel, the side of which was a handbreadth, or $\frac{1}{10}$ of the double cubit (*c.* 3·9 in.); the weight of water it contained constituted the unit of weight, viz. the heavy mina of 15,160 grains (see § ii. above). For a thoroughgoing criticism of Lehmann's views, and of the earlier researches of Oppert in this field, see Johns, *Assyrian Deeds and Documents* (1901), ch. iii. 'Metrology,' pp. 184-273.

(*b*) *The evidence of Josephus.*—All attempts to solve our problem from a comparison of the measurements of the temple area as given by Josephus and in the Mishna treatise *Middoth* ('measurements') with those of the Ḥaram of to-day, are unsatisfactory, for the double reason that the data of the two authorities named are frequently in conflict,—and, at the best, have no claim to be more than roughly estimated, and, in the case of the Mishna, traditional figures,—and that the Ḥaram area has undergone many changes since the 1st cent. of our era. But there is an argument from Josephus which has not hitherto been pressed, viz. the *argumentum e silentio.* It is generally admitted (see W. R. Smith, *Encyc. Brit.*^{9} xxiii. 166) that Josephus makes use of the Roman-Attic cubit (πῆχυς) throughout his historical writings. Thus the side of the square, within which stood the temple of Herod, is given now as a stadium, or 600 Gr. ft. (*Ant.* XV. xi. 3 [§ 400, cf. 415]), now as 400 cubits (*ib.* XX. ix. 7 [§ 221]), which assumes the ratio (3 : 2) between the cubit and the foot adopted by the nations of classical antiquity. Now Josephus, as we shall see in a subsequent section, frequently gives equations of the Jewish measures of capacity with those of his Græco-Roman readers, and less frequently compares the respective weights and coins; but nowhere, apparently, does he give *a single indication of the Heb. cubit differing materially from the Roman-Attic cubit of the 1st cent.* Hence, in giving the dimensions of objects described in the OT,—such as Solomon's temple, the tabernacle, etc.,—Josephus renders the numbers of the Heb. cubit by the same numbers of the Gr. cubit. In one case at least he even gives the dimensions of 2½ by 1½ cubits of the original (Ex 25^{10}) as 5 by 3 spans (σπιθαμή), the *spithamé* being the half of the Gr. cubit. Again, the distance of the Mount of Olives from Jerusalem is given by the author of the Acts (1^{12}) as 'a Sabbath-day's journey,' which was a very familiar measure of 2000 Heb. cubits (see next §). But Josephus gives the same distance as five stadia (*Ant.* XX. viii. 6 [169]), which are 3000 Gr. feet or 2000 Gr. cubits. These data, then, all go to show that, in Josephus' day at least, the Jewish and Gr. cubits were for practical purposes identical in value. Taking the Roman-Attic foot, as finally determined by Dörpfeld's elaborate researches, as 296 millimetres = 11·65 in. (art. 'Mensura' in Smith's *Dict. of Antiq.*^{3}; Nissen, *Metrologie*^{2}), we obtain 17·47, say 17½ in., as a second approximation to the length of the Jewish cubit in the 1st cent. of our era.

(*c*) *The evidence of the Mishna.*—Nothing is to be gained from the oft-quoted but purely academic discussion regarding the two cubit-rods, said to have been preserved in chambers over the Shushan gate of the temple (*Kelim* xvii. 9, 10), beyond confirmation of the uniform tradition that the 'cubit of Moses,' *i.e.* of the Priests' Code, contained 6 palms or 24 digits (*ib.* 10). The true explanation of the cubit-rods of 24½ and 25 digits respectively may be that we have here a confused recollection that the Heb. cubit was originally longer by a fraction of an inch than the Roman-Attic cubit. Rabbi Judah's cubit of 5 palms 'for vessels' (*l.c.*) may be the *gōmed* or short cubit of Ehud's dagger (see next §). A more definite datum for the approximate value of the Mishna cubit is found in *Baba bathra*, vi. 8, where the law prescribes the following as the dimensions of the *hûkim* (הוּכִים) or *loculi* in the case of a Jew taking a contract for the construction of a rock-cut tomb, viz. height 7 palms, width 6 palms, *length 4 cubits.* The last of these dimensions recalls the ὀργυιά (from ὀρέγω, 'to stretch'), or the 4-cubit fathom of the Greeks, it having been early observed that the 'stretch' of a well-proportioned man, from tip to tip of his outstretched arms, was equal to his height. Since the Jews were buried without coffins, if we knew their average height, we should have a fair approach to the length of their cubit. They were certainly not a tall people, and in modern times, in the most favourable circumstances, are said to average 5 ft. 6 in. to 5 ft. 8 in. (Jacobs quoted by Warren, *PEFSt*, 1899, 228 f.)[*] Allowing a margin for the bier, we cannot be far wrong in taking 5 ft. 10 in. as the probable length of the *loculi* contemplated by the later Jewish law, which yields a cubit of 17½ in. as our third approximation. In any case, this passage disposes finally of Conder's cubit of 16 in., which would reduce the average height of the Jews to less than 5 ft. 4 in. !

The latest valuation of the cubit by the distinguished metrologist Flinders Petrie (*PEFSt*, 1892, 28 ff., the tomb-cutters' cubit at Jerusalem) cannot be so easily disposed of. The dimensions contemplated in the Mishna are evidently the use-and-wont dimensions that would satisfy a contract in which no more precise specifications were entered, hence they do not preclude the possibility of larger dimensions being used on occasion. Now Petrie, on the strength of many hundred measurements of the dimensions of actual tombs, contends that the great majority disclose a cubit of 22·6 in., which he maintains (*loc. cit.*) 'should be taken as the standard in future.' This is not the place either to expound or to criticise the methods employed by Petrie here and elsewhere in his metrological works, beyond saying that a considerable element of uncertainty must always attach to them where the results cannot be controlled by literary evidence (cf. Ridgeway's criticism of this method of determining the value of ancient standards of length by measurement alone, in Smith, *Dict. of Antiq.*^{3} ii. 166), a statement of which an illustration may now be given. In the case of the tombs in question, Petrie finds recurring lengths of about

88·1, 113·0, 132·0, 159·7, 171·9, and 226 in.,

all pretty certainly even numbers of the same cubit. And it is therefore seen that the multiples

4, 5, 6, 7, 7½, and 10 cubits

are the numbers in question, as we thus reach

22·0, 22·6, 22·0, 22·8, 22·9, 22·6 in.

for the cubit, yielding an average of 22·61 ± ·03 in. (*loc. cit.* 29). But suppose, taking the first row of figures, we were to say that the multiples

5, 6½, 7½, 9, 10, and 13 cubits

are the numbers in question, we should obtain

17·6, 17·4, 17·6, 17·7, 17·2, 17·4 in.

for the cubit actually a smaller range of variation than is shown by Petrie's own results,—or an average of 17½ in., which is in remarkable agreement with the approximations already obtained. There is therefore a clear alternative before us. Either we must bring down the Siloam inscription to the Roman age, as has indeed been recently proposed, and say that the Jews of that period had finally discarded their native cubit, *of which, in that case, we remain in absolute ignorance*, in favour of the Græco-Roman cubit, or—which is the preferable alternative—we must hold to the Egyptian origin of both the historically attested cubits of 7 and 6 handbreadths, the latter, originally 17⅔ in. in length, having been gradually reduced, until in

---

[*] Warren here gives some interesting statistics as to the height of the modern Jew; and, although not aware of the above passage of the Mishna, conducts the same argument and decides for a cubit of 17·75 in.

NT times it was equated with the Greek cubit of 17½ in. This Egyptian, as opposed to an alternative Babylonian, derivation is further confirmed by the following considerations: (1) the existence, just referred to, at one period among the Hebrews of two cubits of 7 and 6 handbreadths respectively; (2) the subdivisions (see table) are parallel in both systems, and bear no trace of sexagesimal or Babylonian influence; (3) the smallest unit, the digit, bears a cognate designation in both, *'ezba'* in Hebrew, *t'ba* in Egyptian, while the corresponding Hebrew unit was named *ubânu* in Babylonian, probably the Heb. בֹּהֶן; (4) the Heb. *zereth* or span finds its nearest congener in the Egyptian *drt* (Ges.-Buhl, *Lex. s.v.*; cf. similar affinities below, under measures of capacity). The following table shows the values of the Heb. cubits and subdivisions on the basis of the Siloam cubit of 17·58 in., which proves to be the mean between the original Egyp. short cubit of 17·68 and the Gr. cubit of 17·47 in., and is probably the nearest value attainable until further monumental evidence is forthcoming:—

Table of the Hebrew Measures of Length.

No reference has yet been made to the determination of the value of the cubit from the statement of the mediæval Rabbis that the smallest unit, the fingerbreadth, was equal to 6 medium-sized grains of barley laid side by side, partly because the tradition is of late origin, and partly on account of the widely diverging results that this method has produced.[*] Maimonides, writing in Egypt, seems to have been the first to give currency to this mode. He assigned 7 barleycorns to the digit, or 168 to the cubit, apparently identifying it with the royal Egyptian cubit (see Zuckermann, *D. jüd. Maassystem*, 20; Boeckh, *Metrolog. Untersuchungen*, 268 ff., which see also for further details of this method). It is, however, a striking coincidence, to say the least, that the latest and most scientific attempt to determine the Jewish cubit on the basis of the usual Rabbinic valuation of 144 barleycorns yields a cubit of 17·7 in. (Col. Watson, *PEFSt*, 1897, 201 ff.), which is practically the short cubit of Egypt.

vii. *Subdivisions and multiples of the cubit in OT and NT.*—It now remains to glance briefly at the subdivisions and multiples of the cubit to be found in the canonical literature. At the bottom of the scale stands the *μονάς* or *μέτρον σμικρότατον* of the Gr. metrologists, the digit or **fingerbreadth** (אֶצְבַּע only Jer 52^{21}; cf. Joseph. *Ant.* VIII. iii. 4, *δάκτυλος*, and Mishna, *passim*). Four digits naturally went to the palm or **handbreadth** (טֶפַח 1 K 7^{26}=2 Ch 4^{5}; טֹפַח in Ezk 40$^{5. 43}$ 43^{13} and P), the *παλαιστή* of the LXX and Gr. writers generally. The cubit and the palm were the most frequently used denominations in later times. Bricks for building purposes, for example, are said to have been '3 palms square' (*c.* 9 in.), not a square span (*Erubin* i. 3).[†] The **span** (זֶרֶת, *σπιθαμή*, Ex 28^{16} 39^{9}, 1 S 17^{4} etc.) was always half the cubit. Thus a comparison of Ezk 43^{13} with v.^{17} shows that the span might be taken as half the royal cubit of 3½ palms. Josephus, we have seen, renders the dimension of the ark of the covenant, in the original 2½ by 1½ by 1½ cubits (Ex 25^{10}), by twice the number of spans (*Ant.* III. vi. 5 [135]).

In Jg 3^{16} the short two-edged sword of Ehud is said to have been a *gōmed* in length (גֹּמֶד, EV 'cubit'). This measure, occurring only in this passage, is explained by the Jewish commentators as a short cubit, the length of the forearm from the elbow to the knuckles or to the second joint of the fingers (see Moore, *in loc.*, and more fully *JBL* xii. 104). It was thus the equivalent of the Gr. *πυγών* or *πυγμή*, and may have been the cubit of 5 palms mentioned in the Mishna (see above).

The **cubit** itself has been fully discussed in the preceding section, where its apparent Egyptian origin and value have been set forth. At first, naturally, of the same value as the short cubit of Egypt, 17·68 in., it appears to have gradually shrunk, until in the 1st cent. of our era it was practically identical with the Roman-Attic cubit of 17·47 in. By this latter measure, say 17½ in., we may safely estimate the only NT references to the cubit in the literal sense (Jn 21^{8}, Rev 21^{17}). In Mt 6^{27}, Lk 12^{25} the cubit is best taken metaphorically, 'which of you can add a "span" to his age?' (cf. RVm).

The only multiple of the cubit mentioned in the OT, and that only by Ezekiel, is the **reed** (קָנֶה, *ḳaneh*, the Bab. *ḳanû*, Ezk 40$^{5ff.}$ 42$^{17ff.}$ etc.) of 6 cubits,—in this case the 'royal' cubit of 7 palms. It does not appear to have come into common use. In the Græco-Roman age we find instead the **fathom** (*ὀργυιά*, Ac 27^{28}) of 4 cubits, approximately 6 ft., and the favourite Gr. measure of distance the stadium (*στάδιον*, 2 Mac 12$^{9ff.}$, Lk 24^{13}, Jn 6^{19} etc.). The latter contained 600 Gr. ft. or 400 cubits, about 194 yds.; it was thus considerably less than the **furlong** (220 yds.), by which it is rendered in our versions. The **mile** (*μίλιον*, Mt 5^{41}; מִיל, in Hebrew, *Yôma* vi. 4, 8), as its name reveals, was a Roman measure, containing 1000 double paces (*mille passus*), or 5000 Roman ft., equal to 1618 yds. The Romans reckoned their mile as roundly equivalent to 8 stadia. The Jews, on the other hand, reckoned only 7½ stadia or *rîs* to the mile (*Yôma* vi. 4), and so obtained a convenient division of the parasang of 30 stadia—another example of the syncretism that pervades the later Jewish metrology.

The largest measure of distance of native Jewish origin was the **Sabbath day's journey** (*σαββάτου ὁδός*, Ac 1^{12}). Its origin was on this wise. Combining the injunction of Ex 16^{29} with the fact recorded in Jos 3^{4}, that the ark preceded the main body of the host by 2000 cubits (*c.* 1000 yds.), the inference was drawn that the tents of the Israelites in the wilderness were this distance from the ark; and, further, that the said distance might lawfully be traversed on the Sabbath, since the injunction of Exodus (*l.c.*) could not have been meant to exclude the privilege of worship on that day. A square of 2000 cubits in the side was also the prescribed 'suburbs' of a Levitical city (Nu 35^{5}). The Jews of later times, as is well known, were able ingeniously to free themselves from the restriction of a single 2000-cubit limit, by depositing at its furthest boundary, before the entry of the Sabbath, sufficient food for two meals. This spot, by a legal fiction, was considered to be the traveller's 'place' in the sense of Ex 16^{29}; he was then able to proceed with immunity for another distance of 2000 cubits. The technical name for this process was the 'mixture of limits' (עֵרוּב תְּחוּמוֹת), to the regulation and enforcement of which the treatise *Erubin* (mixtures) is devoted. In certain cases the legal distance might be increased to 2800 cubits, which was the estimated diagonal of a square 2000 cubits in the side. A number of boundary-stones, two of which bear the legend תחום גזר, have been discovered in such relative positions near Gezer (which see) as to suggest that they probably served to mark the Sabbath 'limit' for that city (*PEFSt*, 1899, 118 ff.). (For details as to the mathematical precision with which the Sabbath day's journey was calculated for each town, see Baneth's edition of *Erubin*, also Surenhusius' edition with plates. An English translation is given in Sola and Raphall's selections).

---

[*] Thenius' cubit of 19·05 in., adopted in Smith's *DB* (art. 'Weights and Measures'), was obtained by this method.

[†] The Babylonians regularly built with a brick 13 in. square.

As vaguer measurements of length and distance, finally, may be mentioned the pace (2 S 6[13]) and the 'little way' (כִּבְרַת אֶרֶץ Gn 35[16] 48[7], 2 K 5[19]), also a day's journey (Nu 11[31], 1 K 19[4], Jon 3[4], Lk 2[44]) and three days' journey (Gn 30[36], Nu 10[33]), distances which naturally varied according to circumstances (see DAY'S JOURNEY, vol. i. p. 573[b]).

viii. *Surface measure.*—In OT the idca of 'square' is generally expressed by the passive participle רָבוּעַ (a denom. verb from אַרְבַּע 'four'), rendered 'four square' (Ex 27[1] 28[16] etc.), the dimensions, however, being given as *x* cubits long and *x* cubits broad. In later Hebrew we find the more compendious expression '*x* cubits by (עַל) *x*,' as in the Mishna *passim*.* The diagonal of a square was estimated by the Talmudic authorities as $\frac{7}{5}$ of its side (Baneth, preface to *Erubin*, p. 52; see preceding §). The ratio of the circumference (הֶקֵּף) of a circle to its diameter (רֹחַב) was taken as 3 to 1 (*Erub.* i. 5).

With regard to the measuring of land, two methods were in vogue in ancient times before and after the application of more scientific methods. The one attested by the consensus of East and West consisted in taking as the standard of measurement the extent of ground which a yoke of oxen could plough in a given time. In Syria at the present day the unit of land measure is the *feddân*, the ground which a yoke of oxen can plough in a day (Post, *PEFSt*, 1891, 110), which is variously estimated in different parts of the country (see Schumacher, *Across the Jordan*, 22, and more fully Bergheim, 'Land Tenure in Palestine,' *PEFSt*, 1894, 192 ff.). The corresponding Roman measure 'jugerum vocabatur quod uno jugo boum in uno die exarari posset' (Pliny, *Hist. Nat.* xviii. 9), and was legally fixed at *cir.* 3016 sq. yards. The second method was by estimating the size of a field by the amount of seed required to sow it. Both methods were known and practised by the Hebrews. Passing by 1 S 14[14] as almost certainly corrupt, we find a reference in Isaiah to '10 acres of vineyard' (5[10], lit. 10 yoke [צֶמֶד],† *i.e.* of oxen; cf. *jugum* and *jugerum*), which at once suggests the modern *feddân*. Since the Egyp. unit of surface measure was a square 100 royal cubits in the side, called by the Greeks ἄρουρα (Griffith, *PSBA*, 1892, 410 ff.), we shall not be far wrong if we estimate the Heb. *ẓemed* as a square of 100 ordinary cubits in the side, and thus the equivalent of a measure of surface presently to be considered; in other words, at about half an acre.‡

On the other hand, the priestly legislation introduces us to a mode of computing the size of a field 'according to the seed thereof' (Lv 27[16]), 50 shekels being fixed as commutation-money for a field requiring 'a homer of barley seed.' But there is almost certainly an earlier reference to this method of mensuration in a hitherto misunderstood passage of 1 Kings. The trench which Elijah is said to have dug round about his altar on Mt. Carmel is described as כְּבֵית סָאתַיִם זֶרַע, lit. 'like a house of two seahs of seed' (1 K 18[32]). What does this mean? The AV and RV rendering is impossible, while RVm suggests that the trench had the breadth and depth of a two-seah measure. In reality the writer is here employing a familiar land measure, and indicating the length—not the depth and breadth—of the trench by the amount of surface which it enclosed. It is true there is no further illustration of this mode of expression in our older extant literature, but the evidence of the Mishna, considered in the light of the immemorial practice in Babylonia and Assyria, shows that its absence is accidental (see the Mishna, *passim*, esp. the agricultural treatises and those dealing with contracts). Here the size of a field is uniformly denoted by the amount of seed required to sow it. The standard of measurement was indeed the very expression under consideration, 'the house,' *i.e.* the field 'of two seahs,' which was fixed as equal in extent to the court of the tabernacle, viz. 100 cubits by 50, *c.* 1195 sq. yards (under $\frac{1}{4}$ acre). The half of this surface, 2500 sq. cubits (*c.* $\frac{1}{8}$ acre), was the *beth-ṣeah* (בֵּית סְאָה), its double 'a four-seah field' or square of 100 cubits in the side. A field of this size is in one place (*Ohaloth* xvii. 1) identified with the obscure מַעֲנָה* of 1 S 14[14], which would thus be a later equivalent of the *ẓemed* considered above.

The whole series of dry measures, to be discussed in the following sections, were used by the Jews of NT times in this way, from the frequently mentioned *beth-rôba* or $\frac{1}{4}$ *ḳab* plot (104 sq. cubits, *Peah* i. 6, *Baba bathra* ii. 5, etc.) up to the *beth-kôr* (*B. bathra*, vii. 1) of 75,000 sq. cubits, and its multiples. The dimension last given is that of the field of Lv 27[16], mentioned above (for the identity of the *kor* and the *ḥomer* see next §), which was therefore about $3\frac{3}{4}$ acres in extent. This system of field measurement, although it may be traced in parts of the Roman empire, as, *e.g.*, in the σπόριμος μόδιος, which was a third of the *jugerum* (Hultsch, *Metrol.*² 616 f.), had its home in Babylonia, where the field last mentioned would have been described as in Hebrew (*bîtu 1 imêr ekli*, a one-homer field; see Johns, *Assyrian Deeds*, 219 ff.)—a fact which seems conclusive in favour of the explanation of Elijah's trench given above.

HEBREW MEASURES OF CAPACITY.—ix. *The scales of wet and dry measure. The value of the ephah-bath.*—While familiar with such rough-and-ready measures of capacity as the *ḳōmeẓ* or handful (Lv 2[2] 5[12] 6[15]) and the *ḥōphen* (dual, 'two-hands full,' Ex 9[8], Lv 16[12], Ezk 10[2]), the Hebrews from early times had a carefully graduated system both for wet and dry measures, the names and values of which have too frequently been obliterated in our English versions by an indiscriminating fondness for the rendering 'measure.'† The relation of the various denominations to each other are happily amply attested, and may be represented in tabular form, by anticipation, thus—

SCALE OF MEASURES OF VOLUME.

Homer-Kor.		Ephah-Bath.		Seab.		Hin.		Kab.		Log.
1	=	10	=	30	=	60	=	180	=	720
		1		3		6		18		72
				1		..		6		24
						1		..		12
								1		4

Of these the *homer*, *ephah*, *ṣeah*, and *ḳab* are mentioned in OT as dry measures, the first named being supplanted in later times by the *kor*; the *bath*, *hin*, and *log* only as liquid measures. The proportions in the table show the influence of the sexagesimal system, while the *'omer* or *'issaron*, $\frac{1}{10}$ of the *ephah*, represents a parallel decimal subdivision (see below). It will be noted, further, that the two sets are essentially identical. In the case of the *ḥomer* and the *kor*, also of the *ephah* and the *bath*, this identity is indeed expressly attested by Ezekiel in an important context, where also the latter pair are stated to be a tenth part of the former pair (Ezk 45$^{11ff.}$).

---

* The MT of Ex 27[18b] 'fifty by fifty' cannot be defended. The LXX goes still further astray. The second 'fifty' is corrupted from באמה, which the Samaritan still has (see the writer's forthcoming commentary on *Exodus*, *in loc.*).

† Winckler, *KAT*³ (1902) 339, finds in צֶמֶד a weight, connecting it with the Assyr. *ṣamâdu*, to weigh.

‡ Strictly 2390 sq. yards with the cubit of 17·6 in.; an acre is 4840 sq. yards.

* It is tempting to compare this expression with the *actus*, originally the headland where the plough was turned (Heb. מַעֲנָה), which ultimately became the Roman unit of land measure (120×120 ft., *c.* 1500 sq. yards).

† As illustrations of confusion thus caused—a baneful legacy from the LXX—Lk 13[21] compared with 16[6. 7] may be consulted, where three denominations, standing to each other in the ratios 1 : 3 : 30, are rendered indiscriminately by 'measure' (see next §).

Of the absolute values of the various denominations in terms of other and better-known systems, we have no reliable evidence older than the 1st cent. of our era, by which time, as the latest Jewish weight-system so strikingly illustrated, Palestine had become the meeting-place of several systems of metrology, leading to an unavoidable syncretism, and to the identification of native weights and measures with the nearest approximations in foreign systems. Bearing this in mind, we shall now adduce a few of the more useful equations to be found in the *Antiquities* of Josephus.

(*a*) VIII. ii. 9 (Niese, § 57), the *bath* (βάτος) is equivalent to 72 *sextarii* (ξέσται).

(*b*) IX. iv. 5 (§ 85), the *ṣeah* (σάτον = $\frac{1}{3}$ ephah or bath) = 1$\frac{1}{2}$ Roman *modii*, *i.e.* 24 *sextarii*.

(*c*) III. viii. 3 (§ 30), the *hin* (εἶν = $\frac{1}{6}$ *bath*) = 2 Attic *choes*, *i.e.* 12 *sextarii*. Cf. III. ix. 4 (§ 234).

(*d*) XV. ix. 2 (§ 314), the *kor* (κόρος = 10 *ephah-baths*) is equivalent to 10 Attic *metretai*, *i.e.* 720 *sextarii* (μεδίμνους [read μετρητὰς] Ἀττικοὺς δέκα).

Earlier possibly in date than these equations is the evidence of the anonymous fragment περὶ μέτρων (Hultsch, *Metrol. Script.* i. 258), where after the definition of the Phœn. *kor* as containing 30 *ṣeahs* it is added: 'the seah is 1$\frac{1}{2}$ modius,' a definition identical with that of Jerome commenting on Mt 13^{33}. Now, the basis of all these equations is the identification, as a glance at our table will show, of the Hebrew *log* with the Græco-Roman *sextarius*, as is done by the anonymous translator of Lv 14^{10} cited *apud* Field, *Origenis Hexapla, in loc.* (cf. *Antiq.* IX. iv. 4 [§ 62], where the quarter *ḳab* of 2 K 6^{25}, *i.e.* the *log*, is also rendered by ξέστης). Evidence to the same effect might be produced from the Mishna, where it is said of the offerings prescribed in the Pentateuch that 'their measure is on the Roman standard' (*Kelim* xvii. 11). The determination of the value of the *sextarius-xestes*, the common unit of the Greek and Roman systems, in terms of our imperial system is therefore an indispensable preliminary to further progress. Two methods are open to us. We may, with Hultsch, start from the theoretical and legal determination of the Roman quadrantal as 80 Roman pounds weight of wine, and the similar determination of our imperial gallon as 10 lb. of water, and so reach a value for the *sextarius* of ·96 imperial pint, the value adopted in the tables in Smith's *Dict. of Antiq.*^{3} from Hultsch, *Metrol.*^{2} (*passim*). Or we may prefer the determination given by the best of the extant Roman measures, the Farnese congius in Dresden, which yields a *sextarius* equal to ·99 of a pint. This latter method has the advantage of allowing the *sextarius-log* of the Jewish system to be taken, for the smaller determinations, as the equivalent of our pint, and will be followed in this and the subsequent section. This gives for the *ephah-bath* of 72 *logs*, which is the most convenient measure for detailed examination, the value of 71·28 pints, or approximately 9 gallons (see table below).

It is scarcely to be expected, however, that the measures of OT times can have been so precisely the equivalent of the Græco-Roman denominations as this identification presupposes, and there are not wanting indications of this in Josephus' own writings and in those of later authors, especially as regards the larger denominations. Are there, then, sufficient data available for reaching a closer approximation of the original values of the Heb. measures? Perhaps the most unsatisfactory of all methods of solving this problem is that frequently attempted, down even to our own day (see Watson, *PEFSt*, 1898), on the basis of the dimensions of Solomon's brazen sea and the lavers of the temple (1 K 7$^{23f.\ 38}$ with paralls. in Chron., LXX, and Joseph.)—a solution which the conflicting dimensions in the literary sources named, and our ignorance of the shape of the vessels in question, render only less futile than the converse attempt to deduce from the same conflicting and insufficient data the length of the Heb. cubit! But little more satisfaction is obtained by starting from the Rabbinic theory, that the *log* was equal in cubic content to six medium-sized eggs, as may be seen from the widely divergent results in the writings of previous investigators. The Alexandrian translators (LXX), finally, to whom one naturally turns for the equivalents of the Hebrew measures in the Græco-Egyp. system, are disappointing in the extreme. Here transliterating, there paraphrasing, now omitting and now making a random guess, these translators betray a remarkable ignorance of the contemporary Jewish measures (see next § for ample illustration).

(*a*) Two features of the system under investigation seem to warrant us in looking once more to Babylonia as its original home, namely the number of *logs* in the *kor* (720 = 360 × 2), as if the *log* were the half of a unit that has now disappeared, and the apparent identity of the *kor* with the Babylonian ideogram *gur* (cf. *kikkar*, talent, with Bab. *gaggaru*). Unfortunately, it must be admitted that, notwithstanding the brilliant researches of Oppert and his fellow-workers, the measures of volume are still the least satisfactory department of Bab. metrology (see esp. the elaborate exposition and criticism in Johns' *Assyrian Deeds*, etc. [1901]). Adopting, however, with due reserve the view of Lehmann and others (cf. above § vi., also Hommel's art. BABYLONIA, vol. i. p. 219) that the unit of volume was the *ka*—which Hommel (*l.c.*) would identify with the Heb. *ḳab*—equal to an original heavy mina's weight of water (15,160 grains, see § ii. above), we get 1·73 imperial pints as the value of this unit,* 624 pints for a *gur* of 360 *ka*, and 62·4 pints for the assumed original of the Heb. *ephah-bath*. On the other hand, if the measures of volume increased *pari passu* with the weights, the mina of 16,000 grains which has been conclusively proved to have been adopted in the West (§ ii.) would yield a *kor* of 658 pints and an *ephah-bath* of 65·8 pints.

(*b*) Again, if we follow the clue suggested by the Egyptian affinity in the department of the linear measures, we find an interesting parallel to the treatment of the Heb. measures in the Græco-Roman period. A working equivalent of the *ephah-bath*, we have seen, was obtained by identifying it with the Attic *metretes* of 72 *sextarii*. Now, precisely this same equation was adopted in Egypt under the Ptolemies for a measure with a long pedigree, known in the Ptolemaic ages as the *artabe* (ἀρτάβη).† That this equation of the *artabe* with the *metretes* was a working and not a scientifically exact equation, is evident from the fact that by the native authorities (Griffith, *PSBA* xiv. 435) the *artabe* was defined as containing 80 Egyptian *hin*, the *hin* being a volume of water 5 *deben* in weight (7020–7170 grains, according to the valuation of the *kct*, see § ii.), which works out at a little less or more than 65 pints for the *artabe*. Now, the *artabe* was the lineal descendant of an ancient measure derived from a fraction of the cubit cubed (Griffith, *l.c.*); and since the Egyp. cubits passed to Palestine, there is a *prima facie* case for suggesting, as an alternative to the Babylonian origin of the *ephah-bath*, its derivation from the Egyptian system, with a value of 65 pints.

---

* The imperial gallon contains 10 lb. (70,000 grains) of distilled water at a temperature of 60° Fahr.

† Wilcken, however, has found no fewer than five different *artabes* in use in Egypt in the Ptolemaic period (*Griech. Ostraka*, i. 740 ff.).

(*c*) But there is more reliable evidence than these somewhat hypothetical deductions as to the actual capacity of the Heb. measures, the most trustworthy in the opinion of such metrological authorities as Hultsch and Petrie being a statement in an unfortunately corrupt passage of Josephus. This author, writing of the famine in the time of Claudius (cf. Ac 11^{28}), tells of 70 *kor* of wheat being brought into the temple, and adds—adopting Hultsch's emendation, *Metrol.*^{2} 455—*μόδιοι δὲ Σικελοὶ μέν εἰσιν εἷς κόρος τριάκοντα, Ἀττικοὶ δὲ τεσσαράκοντα εἷς* (*Ant.* III. xv. 3 [321]). In view of the connexion of Sicily with Phœnicia through Carthage, the '30 Sicilian modii' are most probably 30 Heb. *ṣeahs*,—this rendering of the *ṣeah* by *modius* is found in Epiphanius and other writers; cf. Mt 5^{15} *μόδιος* for the seah-measure,—while the very precise statement that the *kor* contained 41 Græco-Roman *modii* seems, as Hultsch says, to rest upon actual measurement. Now, 41 *modii* or 656 *sextarii* yield as nearly as possible 650 pints for the *kor*, or 65 for the *ephah-bath*.

(*d*) In several later Gr. writers (see Hultsch, *Mctrol. Script.*, Index under *σάτον*) the *ṣeah* is given as $1\frac{1}{4}$ *modii* instead of, as by Josephus and Jerome, $1\frac{1}{2}$ *modii*, that is, at 20 instead of 24 *sextarii*. Now, in the Mishna there are frequent references to local varieties in the size of the *ṣeah*, *ḳab*, etc., the Jerus. measures, for example, standing to those of Galilee in the ratio of 5 : 6,† which is precisely the proportion disclosed by the variant valuations of the *ṣeah* just cited. It is allowable, in the light of these divergent equations, to hold that different authorities made different attempts to establish a convenient equation of the two systems, Jewish and Greek, and that the true value of the *ephah-bath* lay between the two equations of 60 and 72 *sextarii* respectively, which is quite in harmony with the more positive results already obtained. The same conclusion is established by a study of the conflicting data of Epiphanius in his work on weights and measures (edited by Hultsch, *op. cit.*, and by Lagarde in his *Symmicta*), which give to the *ephah* a value ranging from 64 to 66 *sextarii*. For other, mainly speculative, methods of calculation see Watson, *PEFSt*, 1898, 109 ff. (7·85 galls.), and Warren, *ib.* 1899, 252 ff. (8·42 galls.).

The result of our investigation, then, is to point to an approximate value for the *ephah-bath* in OT times of 65 imperial pints (36·92 litres). From the necessity of establishing a more convenient working equation in later times, it was regarded in most cases as the equivalent of the Attic *metretes* of 72 Roman *sextarii*, or 9 galls. nearly, on the basis of the identification of the *log* with the *sextarius*. Both these values are given in the following tables:—

TABLE OF HEBREW DRY MEASURES.

X. *The measures of Scripture.*—It only remains to make a short reference to the individual measures in the canonical and deutero-canonical writings. The log, the lowest denomination in both the wet and dry scales, occurs in OT only in the ritual for the purification of the leper (Lv $14^{10.24}$ LXX *κοτύλη* $=\frac{1}{2}$ *sextarius*) as a measure of oil. Originally about $\frac{9}{10}$ pint, it was in NT times identified with the *sextarius* (or pint), by which it is rendered by a Gr. translator cited by Origen (Field, *Hexapla*, *in loc.*), and was then used as a dry measure as well, subdivided binarily down to $\frac{1}{64}$ *log*, the $\frac{1}{4}$ *log* being specially frequent in the Mishna. The $\frac{1}{32}$ *log* was also known as the large spoonful (מְלֹא תַּרְוָד), the $\frac{1}{64}$ as the small spoonful (Herzfeld, *Handelsgesch. d. Juden*, 184). Four *logs* went to the kab, which in OT is found only in the corrupt passage 2 K 6^{25}, which speaks of 'the fourth part of a kab' (so RV, AV 'cab').* At the date when this reading arose the log was probably still confined to liquids. The LXX render by *τέταρτον τοῦ κάβου*, while Josephus gives the equivalent *ξέστης* or *sextarius*. Peculiar to the Priests' Code is the next highest dry measure, the *'issaron* (עִשָּׂרוֹן Ex 29^{40}, Lv 14^{10} etc.), the **tenth deal** of our AV, *i.e.* as RV 'the tenth *part* of an ephah,' as already once correctly rendered by LXX *τὸ δέκατον τοῦ οἰφί* (Nu 15^{4}). The loaves of the shewbread contained each two *'issarons* (Lv 24^{5}), transliterated *ἀσσαρών* by Josephus, who wrongly gives its value as '7 Attic cotylæ,' or only $3\frac{1}{2}$ *sextarii* ($3\frac{1}{2}$ instead of 6–7 pints). A special name for this measure is found in the story of the manna (Ex $16^{16ff.}$), viz. the **omer** (עֹמֶר, LXX γόμορ), defined in v.^{36} as 'the tenth part of the ephah,' the same expression as is found in Lv 5^{11} 6^{20} etc. In Ex $16^{32f.}$ the term is used of the *'omer*-measure. This decimal division of the *ephah* is another indication of the conflict between the decimal and duodecimal or sexagesimal systems, which met us in connexion with the Heb. weight-system. It was probably confined to priestly circles, as it does not fit into the rest of the system below the *ephah*.

---

* The *'omer* is here inserted for comparison, though an intruder, as the fractional proportions show; see next §.

† These variations in quantity may also have been due to some extent to the difference between heaped and straked measure; cf. *Baba bathra* v. 11.

* Cheyne, however, would read 'a quarter of a kor of carob pods,' etc. (*Expos.*, July 1899).

The sixth part of the *ephah-bath* for liquids was the **hin** (הִין, LXX ἴν or εἴν [B], but χοῦς, Lv 19^{36}), a term apparently of Egyp. origin, the *henu* (Coptic *eine*) of Egypt, however, being a much smaller measure (see preceding §). With the exception of Ezk 4^{11} ($\frac{1}{6}$ *hin* of water), the *hin* occurs exclusively in the Priests' Code in connexion with the offerings of wine and oil that accompanied the meal-offering. Thus we have $\frac{1}{2}$ *hin*, $\frac{1}{3}$ *hin*, $\frac{1}{4}$ *hin*, all in Nu 28^{14}. The value of the *hin* was $1\frac{1}{4}$–$1\frac{1}{2}$ galls. The double of the *hin*, the **seah** (סְאָה, σάτον), was used exclusively as a dry measure, containing 6 *ḳabs* (see Mishna, *Menaḥoth* vii. 1; *Para* i. 1, and oft.). It was the third of the *ephah*, and is therefore to be identified with the *shālîsh* (Is 40^{12}, lit. 'third,' hence AVm 'tierce'). The *ṣeah* is variously rendered by the LXX; but where not given by the general term μέτρον, whence our AV 'measure,' it is wrongly identified with the *ephah* (1 S 25^{18}) or with the *metretes* (1 K 18^{32}). The correct σάτον is found in the later translations of Aquila and Symmachus, but in LXX only in Hag $2^{16(17)}$, where no measure is named in the original. In the NT also it appears as σάτον (Mt 13^{33}, Lk 13^{21} 'three measures of meal'), where it is equal in value to $1\frac{1}{2}$ *modii* (Jerome) or 24 pints, the 'three measures' being, of course, an *ephah* or $1\frac{1}{8}$ bushels of flour.[*] We have seen in a former section that a seah of seed was calculated to sow a surface of 2500 sq. cubits, which thus became the common unit of surface measure.

The most common of the large measures was the *ephah-bath*, originally in all probability equal to 65–66 pints, but in NT times identified with the *metretes* of nearly 72 pints. The **ephah** was used exclusively for measuring grain and other dry substances, the *bath* exclusively for liquids. The former term appears to be of Egyp. origin, and is given as *οἰφί* by the LXX (cf. Coptic *oipi*) when not rendered by μέτρον (both in Ezk 45^{13}). On the other hand, they render the *ephah* of Is 5^{10} by τρία μέτρα, evidently 3 *ṣeahs*, and so expressly in the Targum of this passage (cf. *Menaḥoth* vii. 1). The $\frac{1}{6}$ *ephah* of Ezk 45^{13} 46^{14} is accordingly $\frac{1}{2}$ *ṣeah*. For the **bath** the LXX again use their favourite μέτρον, or the absurd χοῖνιξ (only 2 pints! Ezk 45^{10}), only once the correct βάτος (Ezr 7^{22}). The 'hundred measures of oil' (Lk 16^{6}) in the unjust steward's accounts were 100 *baths*, or close on 900 gallons. The highest denomination in the system was the **homer** (חֹמֶר) or **kor** (כֹּר, EV 'cor' in Ezk 45^{14}, but generally 'measure'), both used with considerable frequency in OT as a measure of barley (Lv 27^{16} etc.), wheat (Ezk 45^{13}), and cereals generally. The identity of the *kor* and the *ḥomer*, as each containing 10 *ephah-baths*, with the information that the *kor* was also used for liquids, is given by Ezekiel ($45^{11ff.}$). The latter came in time to be the name in ordinary use for both wet and dry measure, and passed to the Greeks as the κόρος (1 Es 8^{20}). The 'hundred measures of wheat' of Lk 16^{7} are 100 *kors*, at this period equal to more than 1110 bushels. Hosea tells us that part of the price he paid for the recovery of his unfaithful wife was a homer of barley and a *lethekh* (לֶתֶךְ), which our EV, following Jewish tradition, render as 'half a homer' (Hos 3^{2}), a value which it certainly has in the Mishna.

In the NT we find the names of Græco-Roman measures, although in some cases the terms are not used as measures, but as the names of household utensils. Thus the *xestes* of Mk $7^{4.8}$, properly the *sextarius* or pint measure, is here used generally of a cup or other small domestic vessel. The *modius* (μόδιος) of Mt 5^{15} and parallels, however, is a classical loan-word for the housewife's *ṣeah*-measure required for the daily provision of the household bread. On the other hand, the '**firkins**' of Jn 2^{6} are the Gr. *metretes* of *c.* 72 pints, which we have seen to be the working equivalent of the *bath*. Apart from its careless use by the LXX, now for *ṣeah*, now for *bath*, it is found 1 Es 8^{20} (AV 'pieces of wine,' RV 'firkins') and Bel ^{3} (AV 'vessels of oil,' RV 'firkins'). We have seen above that the *metretes* was also the working equivalent in Egypt of the *artabe* (ἀρτάβη, Bel ^{3} AV and RV 'great measures'; also Is 5^{10} LXX, another gross miscalculation), which was originally of the same cubic capacity as the *ephah-bath*, *i.e.* *c.* 65 pints. The author of the Fourth Gospel represents Mary of Bethany as taking a λίτρα (EV 'pound') of ointment of spikenard to anoint our Saviour's feet (Jn 12^{3}). This has usually been understood of the Roman pound, as in Jn 19^{39}; and probably with justice. Hultsch, however (*Metrol.*^{2} 720 f., 602), understands by the former *litra* the vessel of horn, in which such unguents were kept by the Roman physicians, with measuring lines on the outside like our modern medicine glasses, and which certainly bore this name. Mention is made, last of all, in Scripture of the small Gr. measure the *chœnix* (χοῖνιξ, Rev 6^{6}) of two *sextarii* or pints as a 'measure' (AV) of wheat.[*]

Metrological.

A. R. S. KENNEDY.

WELL.—A distinction is now made in Eng. between the words 'fountain' and 'well' which did not exist when the AV was made. According to its etymology (Anglo-Sax. *wylla* or *wella*, a spring, from *weallan* to surge, boil, and akin to Sansk. *val* to move to and fro), 'well' was used of springing water, and not confined as now to water standing in a hole or stored up in a pit. Thus Chaucer, *Death of Blaunche*, 160—

---

[*] The same quantity in Sarah's hands (Gn 18^{6}) was nearer a bushel.

[*] The vague 'measure,' it may be useful to state here, stands in AV for *ephah* Dt $25^{14f.}$, Pr 20^{10}, Mic 6^{10}; *kor* 1 K 4^{22} *bis* 5^{11} *bis*, 2 Ch 2^{10} *bis* 27^{5}, Ezr 7^{22}; *ṣeah* Gn 18^{6}, 1 S 25^{18}, 1 K 18^{32}, 2 K $7^{1\,bis.\,16\,bis.\,18\,bis}$, Is 27^{8} [but see RV and *Comm.*]; *shālîsh* Ps 80^{5}, Is 40^{12}; βάτος (=*bath*) Lk 16^{6}; κόρος (=*kor*) Lk 16^{7}; σάτον (=*ṣeah*) Mt 13^{33}=Lk 13^{21}; χοῖνιξ Rev 6^{6}.

> 'Ther were a fewe welles
> Came renning fro the cliffes adoun ;

Milton, *Lycidas*, 15—

> 'Begin then, sisters of the sacred well
> That from beneath the seat of Jove doth spring.

In AV 'well' is therefore an accurate rendering of such words as *'ayin* and *πηγή*. In RV the attempt has been made here and there, but not consistently, to bring out the modern distinction. See next article. J. HASTINGS.

WELL (בְּאֵר, בֹּר [properly 'cistern'], עַיִן, מַעְיָן [both ='fountain'], *πηγή*, *φρέαρ*).—The art of sinking wells for supply of water in the absence of springs or brooks comes down from very early times. Three wells of special interest are noted in the Bible: (1) Abraham's well at Beersheba; (2) Jacob's well near the village of Sychar (*'Askar*) in Samaria; and (3) the well at the gate of Bethlehem. All these are in existence at the present day. For the first see BEERSHEBA and SHIBAH. (2) The digging of Jacob's well is not recorded in the OT, but in the NT we have the interesting account of the conversation between our Lord and the woman of Samaria (Jn $4^{5.6}$) which took place at this spot. The village of 'Askar, which, according to Conder, is the modern representative of Sychar, stands on the slope of Mount Ebal within sight of Jacob's well.* See further under JACOB'S WELL. (3) The well of Bethlehem, for whose water David thirsted (1 Ch 11^{17}), is shown to travellers by the roadside on approaching Bethlehem from Jerusalem. There is no reason to doubt that it is the same which existed in the days of David.

Wells in Eastern countries have always been of the highest importance as objects of possession and as historical landmarks. It was one of the special privileges accorded to the Israelites that they should come into possession of wells which they themselves had not digged (Dt 6^{11}),† and they sometimes became objects of strife (Gn 21^{25}). This is not to be wondered at, considering the difficulty of sinking wells into the rock in these early times, and the great value of the water when it had been reached. E. HULL.

WENCH.—The translators of AV accepted this word from the Bishops' Bible as the tr. of *shiphhah* in 2 S 17^{17}. Wyclif has (1382) 'bondwomman' and (1388) 'handmaide,' Cov. 'damsell,' Geneva Bible 'maid.' The oldest form of the word is *wenchel* (from Anglo-Sax. *wenclo*, plu. 'children'), which signified a child of either sex, as *Ancren Riwle*, 334, 'Were and wif and wenchel.' Afterwards in the contracted form 'wenche' it was restricted to a female child, a girl, or young woman. Thus Mt 9^{24} Wyc. 'Go ye away, for the wenche is not dead, but slepith'; Mk 5^{41} Rhem. 'And holding the wenches hand, he saith to her, *Talitha cumi*, which is being interpreted, *wenche* (I say to thee) *arise*'; Elyot, *Governour*, ii. 324, 'Achilles . . . for a lytle wenche contended with Agamemnon.' By 1611 the most frequent use of the word was to denote a servant maid, its meaning (as above) in AV. So Mt 26^{71} Tind. 'When he was goone out into the poorche, a nother wenche saw him'; Jn 18^{17} Rhem. 'The wench therfore that was portresse saith to Peter.' But the word was already used in a sense that opened the way to its present deterioration, as Bar 6^{9} Cov. 'Like as a wench that loveth peramours is trymly deckte.' J. HASTINGS.

WHALE.—The EV tr^{n} of two words. **1.** תַּן *tan*, and its derivatives (see DRAGON and SEA-MONSTER). **2.** *κῆτος* (Mt 12^{40}). The latter is the LXX and NT rendering of דָּג גָּדוֹל *dāgh gādhôl*, 'a great fish' (Jon 1^{17}). There is no doubt of the existence of whales in the Mediterranean. Large parts of the skeletons of two specimens of the right whale are preserved in the museum of the Syrian Protestant College at Beirût. One of these animals was cast up on the shore near Tyre, not far from the traditional site of the ejection of Jonah, which is at Nebi-Yunûs, near Zidon. The other was drifted ashore at Beirût itself. But the gullet of this species would not admit a man. The sperm whale has a gullet quite large enough to enable him to swallow a man. It is probable that one of these monsters occasionally wanders into the Levant. *Κῆτος*, however, includes marine monsters other than the whale, as the *shark*. Sharks exist in the Mediterranean large enough to swallow a man whole. The writer has seen one at Beirût 20 ft. long. They sometimes attain a length of 30 ft. There are abundant testimonies in books of travel and works of natural history to the fact that sharks have swallowed men, and even horses and other large animals, whole (see Pusey). The preservation of Jonah alive in the belly of the fish seems to be intended by the writer to be considered part of a continued miracle. 'The Lord prepared a great fish to swallow up Jonah' (1^{17}). The Lord heard Jonah's prayer (2^{2}). 'The Lord spake unto the fish, and it vomited out Jonah upon the dry land' (2^{10}). But see art. JONAH.

G. E. POST.

WHEAT.—The following Heb. words are used for 'wheat.' **1.** בַּר *bar*, בָּר *bâr* (Arab. *burr*), is most frequently tr. 'corn' (Gn $41^{35.49}$ $42^{3.25}$, Ps $65^{9.13}$ $72^{11.16}$, Pr 11^{26}). In four places (Jer 23^{28}, Jl 2^{24}, Am 5^{11} 8^{6}) 'wheat' is the more correct rendering. **2.** דָּגָן *dāghān*. This is generic for cereals (see CORN). It is, however, twice tr. in AV 'wheat' (Nu 18^{12}, Jer 31^{12}; RV 'corn'). 'Corn' (generic) is undoubtedly correct. **3.** רִיפוֹת *rîphôth*. Once (2 S 17^{19}) tr. in AV 'ground corn,' RV 'bruised corn,' and once (Pr 27^{22}) AV 'wheat,' RV 'bruised corn.' The Arabs have two ways of preparing this substance. (*a*) The wheat is boiled, dried in the sun, and then cracked under a wheel or in a mortar. So prepared it is called *burghul*. The fragments are exceedingly hard, and resist the action of weevils and other insects. (*b*) The wheat is cracked under a hand millstone, without previous boiling. This preparation is called *jerîsh*. It is quite similar in appearance and properties to our wheaten grits. 'Though thou shouldest bray a fool in a mortar among wheat with a pestle' (Pr 27^{22}), may refer to the preparation of these grits with a hand mortar, or to the process of pounding grits in a stone mortar with a wooden pestle, with meat, onions, and spices, in making *kibbeh*, the favourite national dish of Bible lands. **4.** חִטָּה *ḥiṭṭāh* (Arab. *ḥinṭah*). This is the specific word for wheat, as distinguished from other cereals.

Grains of wheat have been found in very ancient tombs in Egypt, and in the ruins at Tell el-Ḥesy in Palestine. Wheat is first mentioned in Gn 30^{14}, where its harvest season is designated (cf. Ex 34^{22}, Jg 15^{1}, Ru 2^{23}, 1 S 6^{13}), as also the barley harvest (Ru 1^{22} 2^{23}). The wheat harvest commences in the lowlands of the Jordan Valley in April, and ends on subalpine Lebanon in August. Wheat was an article of export from Judæa (Ezk 27^{17}). It was offered in sacrifice (Ex 34[22]), as were all cereals (Nu 18[12] *dāghān* = ‘*corn*,’ as in RV, not ‘wheat,’ as in AV). It was of different qualities (Ps 81[16] 147[14]). Some produced 100 grains (Mt 13[8]). This is not an exaggeration in the case of the Egyptian wheat (Gn 41[22]), the panicle of which is compound. ‘Kidneys of wheat’ (Dt 32[14]) doubtless refers to the fat grains of the best qualities. It is usual at the present day to cut off bunches of the fattest wheat ears while still green, and toast them in the fire. Other cereals are treated in the same way. Thus cooked, they are the ‘green ears of corn dried by the fire, even corn beaten out of the full ears’ (AV Lv 2[14], RV ‘corn in the ear parched with fire, bruised corn of the fresh ear’), and ‘parched corn,’ Heb. ‘*parched*’ (1 S 17[17] 25[18], 2 S 17[28]). They are a favourite food of the people a month or so before the harvest. The Arabs call them *ferîk*. Nearly ripe ears are rubbed out in the hands, and the grains eaten raw (Lk 6[1] etc.). An ear of corn was called *shibboleth*, which the Ephraimites pronounced *ṣibboleth* (Jg 12[6]). See SHIBBOLETH.

---

* *Tent-Work*, 40. Conder says: 'The tradition of Jacob's well is one in which the Jews, Samaritans, Moslems, and Christians alike agree.' *Ib.* 38.

† RV 'Cisterns hewn out which thou hewedst not,' probably both wells and cisterns were intended.

The wild original of wheat is unknown. Some have suggested that it is derived from *Ægilops ovata*, L. Only one species of wild wheat, *Triticum monococcum*, L., is found in Palestine, and that only in northernmost Syria. G. E. POST.

WHEEL.—Various Heb. words are so translated. **1.** אָבְנַיִם turnings, wheels. In Jer 18[3] this word (used elsewhere only Ex 1[16], where prob. = *sella parturientis*) refers to the potter’s wheel. In Syria this is commonly two horizontal discs of wood joined together by an upright pillar or axle. On the upper disc the clay is put which is to be formed into a vessel, while the lower one is turned by the feet of the potter. **2.** אוֹפָן refers to chariot wheels in Ex 14[25], Nah 3[2], Ezk 1[15ff.]; in 1 K 7[30. 32f.] to the wheels of the bases of the lavers of the temple; in Pr 20[26], Is 28[27], to the rollers of a threshing-waggon. **3.** גַּלְגַּל, a rolling thing, a wheel. In Ps 83[13] it is applied to the dust raised by a whirlwind, ‘whirling dust.’ In Ec 12[6] it refers to the wheel of a cistern or well; to chariot wheels in Is 5[28], Jer 47[3], Ezk 10[2. 13] 23[24] 26[10]; and in Dn 7[9] to wheels of throne of burning fire. Another form גִּלְגָּל is found in Is 28[28], and is applied to the rollers of a threshing-waggon. **4.** פַּעַם beat, step, in Jg 5[28] probably refers to the noise made by chariots, or to the step of the horses drawing them. It is evident from Scripture that chariots were frequently used in Syria and Palestine, and the wheels must have been very strongly made to withstand the rocky roads over which they were driven. On the old road near the mouth of the Nahr el-Kelb, or Dog River, a few miles north of Beirût, along which both Assyrian and Egyptian armies passed, the marks of the chariot wheels are still to be seen, deeply engraved in the rock. After the Mohammedan invasion, wheeled carriages ceased to be used, and it was only about the middle of this century that they were reintroduced by Europeans. The wheels of the ancient Egyptian chariots had six spokes (חִשֻּׁקִים), which connected the nave (חִשֻּׁר) with the felloes or rim (גַּב). Slits were made in the tyre, through which bands were passed and fastened round the rim. The axle-tree (יָד) was fixed to the body of the chariot, and its extremities were rounded where they passed through the wheels. The wheels were secured by pins. The wheel evidently had its origin in the roller, then discs of wood were used, and in India wheels are often made of planks of wood nailed together and then cut into a circular shape.

On the ‘wheel of nature,’ Ja 3[6] RV, see esp. Mayor, *in loc.* W. CARSLAW.

WHELP.—בֵּן, lit. ‘son’ (Job 4[11] 28[8]), גּוּר (Jer 51[38], Ezk 19[2. 3. 5], Nah 2[11. 12]), *σκύμνος* (1 Mac 3[4] used of the young of the lion (see LION)); in 2 S 17[8], Pr 17[12], Hos 13[8], of bears’ cubs (see BEAR). In the last three passages the Heb. is simply שַׁכּוּל ‘bereaved,’ the words ‘of her whelps’ being supplied in EV.

WHIRLWIND (סַעַר *ṣa‘ar*, סְעָרָה *ṣĕ‘ārāh*, סוּפָה *ṣûphāh*).—The term is applied generally to any violent destructive wind. The same words are often translated in other passages by ‘storm’ or ‘tempest,’ *e.g.* Ps 55[8] 83[15] (both *ṣa‘ar*); Is 29[6] (*ṣĕ‘ārāh*); Am 1[14], Jon 1[4. 12] (all three *ṣa‘ar*). The ‘whirlwind’ of AV is rendered ‘tempest’ by RV in Jer 23[19] 25[32] 30[23] (all *ṣĕ‘ārāh*); ‘stormy wind’ in Ezk 1[4] (*rûaḥ ṣĕ‘ārāh*); ‘storm’ in Job 37[9] and Is 17[13] (both *ṣûphāh*). The term ‘whirlwind’ is used both in a physical and a symbolical sense. In the former we may take the passage descriptive of the rapture of Elijah in 2 K 2[1], as also that in Job 21[18] 37[9], Is 17[13] 21[1], Ezk 1[4], Am 1[14], Nah 1[3], Ps 107[25] 148[8]; but in the remaining passages the term is used figuratively: of chariots (Is 5[28] 66[15], Jer 4[13], Dn 11[40]), the passionate acts of man (Ps 55[8]), the ruin brought upon man by his sin (Hos 8[7] and oft.), or the anger of God against the wicked (Pr 1[27] and oft.); nor can the term be considered inapt from what we know of the destructive effect of rotatory storms in some countries. To such storms the references in the Bible must be considered to refer; but, strictly speaking, whirlwinds differ essentially from cyclones, which arise from unequal distribution of atmospheric pressure over *horizontal* areas; whereas whirlwinds, tornadoes, dust-storms, and waterspouts are different forms of atmospheric movement consequent on a *vertical* disturbance of the equilibrium of the air. When occurring over the sea or inland lakes the rotatory movement gives rise to waterspouts; when over the land, and especially over a sandy desert, a dust-storm, a cause of terror to caravans and wandering Arabs, is the result. As this is the form which is most usual in Bible lands, it may be referred to in a little further detail. When a dust-storm is about to commence, the air is unusually stagnant and sultry; presently a tall column of sand approaches, moving in a certain direction, and drawing into itself as it moves along sand, dust, and light bodies whirling around the centre of the column. Sometimes several of these columns move over the surface, each gyrating independently round its own axis. Observations made on such phenomena appear to show that the air of the surface is strongly drawn in towards the base of each column, and that it ascends along the central axis of the whirlwind. The only course of safety for the traveller over the desert, on the approach of a dust-storm, is to descend from his camel, throw himself on the ground, and completely cover his head with his mantle, till the storm passes away. In the tales of the *Arabian Nights*, and generally in the folk-lore of the East, the travelling dust-pillar is regarded as a favourite abode of the *‘afrît* or *genius loci.*

During the storms that precede the rain at the end of summer (September and October), the wind hustles along in front of it, to the depth of some three feet above the ground, a vast collection of thistle-tops and various seed-vessels. They hasten along so that before the rain comes they may find each in its little hollow or crevice a resting-place in which to die and become fruitful. In places where the wild artichoke abounds, as in the great open plain between the two Lebanons, the rushing wind snaps off the dry, globular, dahlia-like tops, and urges them along, like the jumping chariots (Nah 3[2]) of the Assyrian king. They move with military precision, now charging at the double-quick, and then wheeling to right or left, as if imitating some phantom fugleman, or obeying some ghostly word of command. Thomson is of opinion that this must be the 'wheel' of Ps 83^{13}, *rolling thing* of Is 17^{13} (גַּלְגַּל); in both instances RV 'whirling dust' (*Land and Book*, S. Pal. 212). The driving power of the storm is exemplified in Ex 10$^{13-19}$, Nu 11^{31}, 1 K 19^{11}.

Very often the whirlwind or tempest is accompanied by rain and dark clouds. The wind whistles and moans, and seems to come from all directions at once, flinging out scuds of fine spray and discharging torrents of rain. The cold is often such as to cause loss of life to men and animals. Tents and booths are wrecked, and the 'overflowing shower' (Ezk 38^{22}) created by it undermines houses and tears down vineyard walls. It is a sort of cloud-burst, and is called by the Arabs a *seil*, that is, a *flood*. Like the suddenness of its onslaught (Pr 1^{27}) is the rapidity of its disappearance (Pr 10^{25}, Is 5^{28}). It is referred to in Ps 18$^{7-16}$, Jer 23^{19}, and its leading features are given in the parable illustration with which Christ closed His Sermon on the Mount (Mt 7$^{25-27}$).

G. M. MACKIE and E. HULL.

WHITE.—See COLOURS, vol. i. p. 458^{a}.

WHITE OF AN EGG (רִיר חַלָּמוּת, EV Job 6^{6}, RVm 'juice of purslain').—The allusion should perhaps be understood to be to the juice of some insipid plant, probably *Portulaca oleracea*, L., the common purslane. 'White of an egg' (lit., on this view, 'slime of the yolk') is a Rabbinic interpretation, and is still accepted by A. B. Davidson, Duhm, *et al*. The comparison in the other member of the parallelism is with 'unsavoury,' which would be better rendered 'insipid.' G. E. POST.

WHOLE, WHOLESOME.—The Anglo-Sax. *hāl* became in Middle Eng. *hole*; the spelling *whole* is due to a dialectic pronun. (as in whoop, whore *) and obscures the connexion of the word with hale, heal, holy. 'Hole' as well as 'whole' is used by Tindale, as Ex 5^{18} 'see that ye delyver the hole tale of brycke.'

1. The earliest meaning is *healthy*, as in Mt 9^{12} 'They that be whole need not a physician, but they that are sick' (οἱ ἰσχύοντες). So Udall, *Erasmus' Paraph.* i. 28, 'Yf thine iye bee clere and wholle, it geveth sight to all the membres'; Hall, *Works*, iii. 461, 'We are not the same men sick and whole'; Calderwood, *History*, 140, 'Mr. Patrick Adamsone, called commonly Bishop of St. Andrews, had keeped his Castle, like a fox in a hole, a long time, diseased of a great seditie, as he himself called his disease. . . . When the King cometh to St. Andrews, he becometh a whole man.'

2. Next, *made healthy, healed*, as in Mk 5^{34} 'Go in peace, and be whole of thy plague' (ἴσθι ὑγιής); so Tennyson, *Lancelot and Elaine*—

> 'He called his wound a little hurt,
> Whereof he would be quickly whole.'

3. Then, *unbroken, entire*, as in Dt 27^{6} 'Thou shalt build the altar of the Lord thy God of whole stones' (RV 'unhewn'); 2 S 1^{9} 'my life is yet whole in me'; Pr 1^{12} 'Let us swallow them up alive as the grave; and whole, as those that go down into the pit'; Is 14$^{29, 31}$ 'Rejoice not thou, whole Palestina' (RV 'O Philistia, all of thee'). Cf. Erasmus, *Crede*, 139, 'with pure and whole faith.'

Wholesome occurs in AV but twice, Pr 15^{4} 'a wholesome tongue' (מַרְפֵּא לָשׁוֹן, LXX ἴασις γλώσσης, RVm 'the healing of the tongue'), and 1 Ti 6^{3} 'and consent not to wholesome words' (ὑγιαίνουσι λόγοις, RV 'sound words,' RVm 'healthful'). In both places the word means health-giving, healing. In the latter place there is at least a hint of that moral meaning which 'wholesome' had in older English = soul-healing, *saving* ('heilsam'). This meaning is found in the Pr. Bk. Psalter, Ps 20^{6} 28^{9}. See Driver's *Par. Psalt.* p. 485, and the quotations there. See also art. HEALTH.

J. HASTINGS.

WHORE.—See HARLOT.

WIDOW * (אַלְמָנָה *'almānā*; χήρα; *vidua*. The absence of any term for 'widower' shows that the wife was considered of less importance to the husband than *vice versa*).

i. OT AND APOCRYPHA.—The position of the widow varied according to her family. A young, childless widow might return to her father's house and remarry after an interval (Tamar, Gn 38^{11}; Ruth and Orpah, Ru 1$^{8, 9}$). She might also be claimed in marriage by her late husband's brother (Gn 38^{8}, Mk 12$^{19ff.}$, Ru 1$^{12f.}$) or nearest kinsman (Dt 25^{5}, Ru 3$^{12, 13}$). In many instances this arrangement would cause serious inconvenience, and provision is made by which the kinsman might be released from his obligation, or might transfer it to some one else (Dt 25$^{7, 10}$, Ru 4$^{4-10}$). The passages cited show that this Levirate marriage was an actual custom, which, however, was often neglected. A widow with a grown-up son would usually live with him, *e.g.* Micah's mother (Jg 17$^{1-6}$), apparently a widow in possession of property of her own (cf. 2 S 14$^{5ff.}$, 1 K 7^{14}, Jth 8$^{1-8}$). The honourable and influential position of the queen-mother, *e.g.* Bathsheba (1 K 2^{19}, cf. QUEEN), illustrates the status of such widows. But there was evidently a large class of widows who were in very poor circumstances. The widow and the fatherless (cf. ORPHAN) are constantly spoken of as suitable objects of charity and special consideration (Dt 14^{29} 16$^{11, 14}$ 26$^{12f.}$, Job 22^{9} 24^{21} 29^{13} 31^{16}, Ps 146^{9}, Pr 15^{25}, Jer 49^{11}), or as liable to suffer injustice (Ex 22^{22}, Dt 10^{18} 27^{19}, Job 24^{3}, Ps 68^{5} 94^{6}, Is 1$^{17, 23}$ 10^{2}, Jer 7^{6} 22^{3}, Ezk 22^{7}, Zec 7^{10}, Mal 3^{5}, Sir 4^{10} 35$^{14f.}$). Deut. makes special provisions in favour of widows: their clothing was not to be taken as a pledge (24^{17}), and the forgotten sheaf of the harvest, and the gleanings of the olive trees and the vintage, were to be left for the stranger, the fatherless, and the widow (24$^{19ff.}$).

These needy widows must have belonged to the poorer classes, and have had families of young children; but even the widows and orphans of well-to-do men might be robbed of their property by some kinsman or powerful neighbour, often on some legal pretext (cf. 2 S 14^{7}). The widow ranks with the divorced woman as being her own mistress, and therefore capable of taking a binding vow without obtaining the consent of father or husband (Nu 30^{9}). A high priest is not allowed to marry a widow (Lv 21^{14}), nor is any ordinary priest (Ezk 44^{22}); the latter passage, however, permits a priest to marry the widow of a priest. In 2 Mac 3^{10} we read of deposits for widows and orphans in the temple treasury.

ii. NEW TESTAMENT.—Here, too, the widow is spoken of as poor and an object for charity and special consideration (Mk 12$^{41-43}$, Lk 20^{47} 21$^{2, 3}$, Ja 1^{27} etc.; cf. Barn. xx. 2; Herm. *Sim.* i. 8, etc.; Ign. *ad Smyrn.* 6, etc.; Just. *1 Apol.* 67; Polyc. iv.). The marriage of widows generally is sanctioned (Ro 7^{3}, 1 Co 7$^{8, 39}$), and, according to RV, the marriage of younger widows is enjoined in 1 Ti 5^{14}. RVm, however, makes the injunction refer to younger women.

---

* Hot is spelt 'whot' in Dt 9^{19} AV 1611.

* See also FAMILY, ii. *a*, vol. i. p. 847; MARRIAGE, ii. 2, vol. iii. p. 269; POVERTY, p. 27 ff.; WOMAN (Deaconess, etc.), p. 936^{b}.

The charge against the Pharisees, that they devoured widows' houses (Mk 12^{40}), is sometimes explained of spoliation under legal forms (Gould), but more commonly, and probably, of sponging on the generosity of foolish women through an ostentatious display of unctuous piety (Holtzmann, Swete, etc.). Thus Swete, 'Schöttgen on Mt 23^{14} . . . shows that such a course was familiarly known as מכת פירושין, *plaga Pharisæorum.*'

The care of widows was one of the special ministries of the early Church (Ac 6^1 9^{39}). Weizsäcker, however (*Apostolic Age*, i. 56), considers that widows cannot have formed a separate class so soon, and that the language of Acts reflects the conditions of a later time. From 1 Ti 5^{16} we gather that the relations of widows tried to shift their responsibility on to the shoulders of the Church; and any woman that has 'widows' is told that she must bear her own burden in this matter; further, the duty of supporting widows is specially urged upon children, grandchildren (5^4), and other relatives (5^8). The somewhat lavish charity of the Church at Jerusalem in the days after Pentecost would be a special attraction to the needy, and may account for the apparently large proportion of widows. In considering 1 Ti 5^{16} we must remember the large households of the East, comprising relations of various degrees to three or four generations. The 'woman's' 'widows' might be daughters, daughters-in-law, etc. We further gather from 1 Ti 5 that the Church sought to limit its alms to widows of good repute, exemplary piety and beneficence, over the age of sixty; and, from the similarity of this description to those of presbyters and deacons, it seems that the Church required service from these widows in return for maintenance, and that they constituted an order of church officers; and, according to some, corresponded to the deaconesses, of whom we have an example in Ro 16^1 (cf. WOMAN (Deaconess)), and who are described in 1 Ti 3^{11}. It should be noticed, however, that in 1 Ti 5 the writer is chiefly occupied with the burden which the relief of widows imposed upon the Church, and anxious to reduce it in every possible way. Hence the age limit, the exacting conditions as to character, and the repeated urgent appeals to relatives to maintain widows. The character qualification suggests Christian service, otherwise this function of the widows is not referred to. In Tit 2^3 the 'aged women' are to be 'teachers of that which is good,' and to train the younger women; but the terms 'aged women,' and, in the previous verse, 'aged men,' are perfectly general.

1 Ti 5, mainly occupied as it is with the subject of poor relief, makes us wonder what was to become of destitute, friendless widows who were under sixty, or who had not reached the requisite standard of piety and beneficence. Did the Church leave them to starve, or allow them to be dependent on casual almsgiving, instead of making regular provision for them? It is sometimes supposed that the roll in 5^9, on which only those widows were to be entered who possessed the qualifications specified in v.$^{9\text{ff.}}$, was a register of church officers; and that these 'widows' were distinct from the widows generally whose relief is discussed in the rest of the section. Some such view is supported by v.^{11}, which objects to the enrolment of young widows because it is likely that they will marry again. If the enrolment simply entitled to relief, this would be no objection; it seems to imply that a woman entering the order of widows pledged herself to remain unmarried in order to serve the Church. Cf. Anna (Lk 2^{37}), a widow who devoted her life to religious exercises.

There are two main questions as to the 'widows' of the NT. (i.) Whether they were merely a class of the poor, specially cared for in the distribution of alms, or whether they were an order of church officials. Such an order existed in later times, and continued into the Middle Ages. Polyc. iv. 3 is as ambiguous as 1 Timothy; the terms used of widows, *e.g.* 'altar of God,' seems to imply an ecclesiastical order; and yet from the context the passage seems to refer to widows generally as distinguished from married women. But from the close of the 2nd cent. the existence of the order is vouched for by a succession of references in Tertullian, Origen, *Apostolical Constitutions*, etc. It is therefore natural to understand 1 Ti 5 of such an order, but not necessarily Ac 6^1 $9^{39.41}$. We cannot carry back to the 1st cent. the exact organization and regulation of the order in later times, but no doubt its duties consisted in devotional exercises, the instruction of women, nursing, and other works of charity.

(ii.) The second question as to NT widows is—assuming that they constituted an order, what was its relation to that of deaconesses? They have sometimes been supposed to be identical; but if 1 Ti 3^{11} refers to deaconesses, they are probably different from the widows of 1 Ti 5; and widows and deaconesses appear as distinct orders in the early Church, although they seem to be often confused one with the other. The most probable conclusion is that of Sanday-Headlam on Ro 16^1: 'Of the exact relation of the "deaconess" to the "widows" (1 Ti 5^3) it is not necessary to speak, as we have no sufficient evidence for so early a date; it is quite clear that later they were distinct as bodies, and that the widows were considered inferior to the deaconesses (*Apost. Const.* iii. 7); it is probable, however, that the deaconesses were for the most part chosen from the widows.'

For an account of widows in the early Church see art. 'Widow' in Smith's *Dict. of Christ. Antiquities.* W. H. BENNETT.

WIFE.—See FAMILY and MARRIAGE.

WILDERNESS or **DESERT.**—Both these terms, especially the latter of them, suggest to the English ear ideas which are foreign to the Heb. words which are so rendered in EV. In particular, the popular notion of a *sandy* waste must be banished from the mind if one is to understand the meaning of 'desert' in the Bible.

1. מִדְבָּר *midbār* (LXX usually ἔρημος) occurs about 280 times in the OT, and is tr^{d} 'wilderness' by AV except in 12 passages (Ex 3^1 5^3 19^2 23^{31}, Nu 20^1 27^{14} 33^{16}, Dt 32^{10}, 2 Ch 26^{10}, Job 24^5, Is 21^1, Jer 25^{24}), where the tr. is 'desert.' RV renders by 'wilderness' except in Dt 32^{10} and Job 24^5, where it retains AV 'desert,' and Pr 21^{19}, where it substitutes 'a desert land' for AV 'the wilderness' as tr. of אֶרֶץ־מִדְבָּר. *Midbār* is properly a tract to which herds are driven (from דבר 'to drive [herds]'; cf. the Germ. *Trift* and *treiben*), an uncultivated region, but one where pasturage, however scanty, may be found (Ps $65^{13\,(12)}$, Jl 2^{22}, Jer 23^{10}; cf. Jl $1^{19.20}$, Jer 9^{10}); usually without a settled population (Nu 14^{33}, Dt 32^{10}, Job 38^{26}, Pr 21^{19}, Jer 9^2; the abode of pelicans Ps 10^{26}, wild asses Job 24^5, Jer 2^{24}, jackals Mal 1^3, ostriches La 4^3), although in certain districts there might be towns and cities (Jos $15^{61.62}$, Is 42^{11}) occupied by nomads. The term *midbār* is usually applied to the Wilderness of the Wanderings (Gn 14^6, Nu $14^{16.29.33}$ *et al.*), or the great Arabian desert (Jg 11^{22} *et al.*), but may refer also to any other (Ca 3^6 8^5). In the Wilderness of the Wanderings the following special tracts are distinguished: the Wilderness of SHUR, Ex 15^{22}; ṢIN, Ex 16^1 17^1, Nu $33^{11.12}$; ṢINAI, Ex $19^{1.2}$, Lv 7^{38}, Nu $1^{1.19}$ $3^{4.14}$ $9^{1.5}$ 10^{12} 26^{64} $33^{15.16}$; PARAN, Gn 21^{21}, Nu 10^{12} 12^{16} $13^{3.26}$, 1 S 25^1; ẒIN, Nu 13^{21} 20^1 27^{14} 33^{36} 34^3, Dt 32^{51}, Jos 15^1; ḲADESH, Ps 29^8; ETHAM, Nu 33^8. In W. Palestine there are: the Wilderness of JUDAH, Jg 1^{16}, Ps 63^{title} (cf. Jos 15^{61}); MAON, 1 S $23^{24.25}$; ZIPH, 1 S $23^{14.15}$ 26^2; BEER-SHEBA, Gn 21^{14}; EN-GEDI, 1 S $24^{1\,(2)}$; TEḲOA, 2 Ch 20^{20}; JERUEL, 2 Ch 20^{16}; GIBEON, 2 S 2^{24}. In E. Palestine: the Wilderness of MOAB, Dt 2^8; EDOM, 2 K 3^8; ḲEDEMOTH, Dt 2^{26}.

Midbār is used figuratively in Hos 2^3 ('lest I make her [Israel] as a wilderness' ‖ 'a dry land' אֶרֶץ צִיָּה), and Jer 2^{31} ('Have I [Jahweh] been a wilderness to Israel?').

2. עֲרָבָה *'ărābāh* (prob. from a root meaning *to be arid*; LXX often ἔρημος, but also such renderings as ἀγρός, ἕλος, γῆ διψῶσα) stands for a tract of country whose soil is bare, desolate, unfertile. Its nearest equivalent is 'steppe' or 'desert-plain.' Apart from its application to *the* 'Arabah, the great depression which includes the Jordan Valley, and extends southwards to the Gulf of 'Aḳabah (see art. ARABAH, and PLAIN in vol. iii. p. 893^b), the term *'ărābāh* is applied to steppes in general. Its renderings in EV are as follows: Job 24^5 (‖ מִדְבָּר) 39^6 (‖ מְלֵחָה 'salt land'), AV and RV 'wilderness'; Is 33^9, Jer 51^{43} (in latter ‖ אֶרֶץ צִיָּה) AV 'wilderness,' RV 'desert'; Am 6^{14} AV 'wilderness,' RV 'Arabah'; Is 35^6 (‖ מִדְבָּר and צִיָּה) 40^3 41^{19} (in both ‖ מִדְבָּר) 51^3 (‖ חָרְבָּה and מִדְבָּר), Jer 2^6 (‖ מִדְבָּר and אֶרֶץ צִיָּה) 17^6 (‖ מִדְבָּר and אֶרֶץ מְלֵחָה) 50^{12} (‖ מִדְבָּר and צִיָּה) AV and RV 'desert.' In the plur. *'arbôth* the word is used of the 'plains' (AV and RV; better 'steppes' or 'desert-plains') of Moab (Nu 22^1 $26^{3.63}$ 31^{12} $33^{48.49.50}$ 35^1 36^{13}, Dt 34^1) and of Jericho (Jos 4^{13} 5^{10}, 2 K 25^5 [Jer 39^5 52^8]). See art. PLAIN, *l.c.*

3. חָרְבָה (in plur. חֳרָבוֹת), from a root meaning *to be waste* or *desolate*, is 3 times tr^d 'desert(s)' in AV: Ps 102^6 (‖ מִדְבָּר; LXX οἰκόπεδον; RV 'waste places'), Is 48^{21} (so also RV; LXX ἔρημος), Ezk 13^4 (RV 'waste places'; LXX ἔρημοι). Elsewhere EV offers such renderings as 'waste(s),' 'desolation(s),' 'waste places,' 'desolate places': Lv $26^{31.33}$, Ezr 9^9, Is 5^{17} 44^{26} 49^{19} 51^3 52^9 58^{12} 61^4 64^{10}, Jer 7^{34} 22^5 $25^{9.11.18}$ 27^{17} $44^{2.6.22}$ 49^{13}, Ezk 5^{14} 25^{13} 26^{20} $29^{9.10}$ $33^{24.27}$ 35^4 $36^{4.10.33}$ 38^8, Dn 9^2, Mal 1^4, Ps 9^6 109^{10}, Job 3^{14}. The proper application of this Heb. term is to cities or districts *once inhabited, but now lying waste* (cf. the use of שַׁמָּה 'devastation' and its cognates in Is 1^7 5^9 6^{11}, Jer 42^{18}, Ezk 35^7), although it is once (Is 48^{21}) used of the Wilderness of the Wanderings. Its nearest Eng. equivalents are 'waste(s)' and 'ruin(s).'

4. יְשִׁימוֹן.—See JESHIMON. 5. צִיָּה *ẓîyyāh* is twice tr^d 'wilderness' in AV: Job 30^3 (RV 'dry ground'; LXX ἄνυδρος), Ps 78^{17} (RV 'desert,' RVm 'a dry land'; LXX ἄνυδρος; here used of the Wilderness of the Wanderings). Its proper meaning is 'dry ground' (cf. אֶרֶץ־צִיָּה of Ps $63^{2\,(1)}$, צָיוֹן of Is 25^5 32^2, and שָׁרָב [AV 'parched ground,' RV 'glowing sand,' RVm 'mirage'] of Is 35^7). In Is 13^{21} 34^{14}, Jer 50^{39}, Ps 74^{14}, צִיִּים is used of wild beasts of the desert; in Is 23^{13} [unless we emend, with Ols., to עִיִּים, or take the word, with Marti, to mean 'seamen'] and Ps 72^9 [but prob. read, with Ols., Duhm, *ct al.*, צָרִים] of human inhabitants of these arid tracts.

6. תֹּהוּ *tōhû* occurs in the collocation בְּתֹהוּ יְלֵל יְשִׁמֹן (LXX ἐν δίψει καύματος, ἐν γῇ ἀνύδρῳ), lit. 'in the waste of the howling of a desert' = 'in the howling (adj.) waste of a desert' [on the construction see Driver, *ad loc.*], Dt 32^{10}, where it refers to the Wilderness of the Wanderings. It is tr^d 'wilderness' by AV and RV in Job 12^{24}, and by AV (RV 'waste') in Ps 107^{40} (LXX ἐν ἀβάτῳ). The special sense of this word is that of a wild desolate expanse (Job 6^{18} 'they [the caravans] go up into the waste and perish'). It is the term applied to the chaotic confusion that preceded the creation (Gn 1^2; cf. Jer 4^{23}, where the prophet beholds the earth returned to the primeval *tōhû wābōhû*; and contrast Is 45^{18} 'He created it not a waste' [but perhaps here the word = 'in vain,' RVm]).

7. The NT terms are ἐρημία and ἔρημος (the latter used either as adj. with τόπος or the like, or alone, in the fem., with χώρα understood). As a rule AV tr. the substantives by 'wilderness' and the adjective by 'desert.' RV changes 'desert' of AV into 'wilderness' in Mt 24^{26} and Jn 6^{31} as tr. of ἔρημος. Conversely, it changes 'wilderness' of Lk 5^{16} 8^{29} into 'deserts' as tr. of αἱ ἔρημοι, and into 'a desert place' in Mt 15^{33} and Mk 8^4 as tr. of ἐρημία. It also reads 'a desert place' for 'a solitary place' in Mk 1^{35} as tr. of ἔρημος τόπος.

The wilderness of JUDÆA witnessed the commencement of John the Baptist's ministry (Mt 3^1 ‖). An unnamed wilderness, probably the *Quarantania* of tradition, was the scene of our Lord's temptation (Mt 4^1 ‖). The words of Ac 8^{26} 'Arise and go toward the south unto the way that goeth down from Jerusalem unto Gaza: *the same is desert*' (αὕτη ἐστὶν ἔρημος), have occasioned a good deal of difficulty. If αὕτη could be taken as referring to ὁδός, the statement might be justified, for the road that is probably in view actually passes through the desert (so Robinson, *BRP*² ii. 514). But it is more natural to refer αὕτη to *Gaza*, and this city was, in Philip's time, quite a flourishing one. G. A. Smith (*HGHL* 187) seeks to evade this difficulty by supposing the allusion to be to Old Gaza, by which the road ran, and to which the title ἔρημος may have clung, even if it were not actually deserted. Upon the whole, however, it appears preferable to regard the words 'the same is desert' as a late marginal gloss which has found its way into the text.

On Oriental superstitions about the wilderness as the haunt of demons see art. DEMON, vol. i. p. 590.

J. A. SELBIE.

WILDERNESS OF JUDÆA. — See JUDÆA (WILDERNESS OF).

WILDERNESS OF THE WANDERINGS. — See EXODUS AND JOURNEY TO CANAAN.

WILL, WOULD.—1. These Eng. words are often used in AV with a significance that is hidden from the reader who does not consult the Heb. or Greek. RV has done much, esp. in the NT, to show their force, but much has yet to be done.

Will was originally an independent verb (Anglo-Sax. *willan* or *wyllan*, Middle Eng. *willen*), and expressed, either transitively or intrans., a wish or resolve, as Bacon, *Essays*, p. 77, 'It is common with Princes (saith Tacitus) to will contradictories'; p. 40, 'In evill, the best condition is not to will; the second, not to can.' As an indep. verb 'will' was often followed by an infin., with or without a direct object. Thus Bacon, *Essays*, p. 255, 'The French king willed his Chauncellor or other minister to repeate and say over Fraunce as many times as the other had recited the severall dominions'; Knox, *Hist.* p. 317, 'Thinke not (said hee), Madame, that wrong was done unto you, when you are willed to be subject unto God.'

But as the Eng. verb lost its inflexions, certain verbs, themselves originally independent, were used to form its tenses, etc. One of these was *will*, though in this case it was rather to supply a defect than to replace a lost inflexion, there being no future inflexion in the Eng. verb.[*] 'Will' did not cease to be an indep. verb when it became an auxiliary; it was used sometimes in the one way, sometimes in the other. And as Elizabethan writers felt at liberty to insert or omit the 'to' before an infin. as they pleased,[†] it has now become very difficult to distinguish 'will' as an auxiliary expressing the future tense, from 'will' as an indep. verb followed by an infin. without 'to.' Cf. Mt 10^{26} 'There is nothing covered that shall not be revealed,' with 11^{27} 'Neither knoweth any man the Father save the Son, and he to whomsoever the Son will reveal him.' The former is a simple future (ὃ οὐκ ἀποκαλυφθήσεται, Vulg. *quod non revelabitur*), the other is the verb *to will* with an infin. of the following verb, the 'to' being omitted (ᾧ ἐὰν βούληται ὁ υἱὸς ἀποκαλύψαι, Vulg. *cui voluerit filius revelare*, Rhem. 'to whom it shal please the Sonne to reveale,' RV 'to whomsoever the Son willeth to reveal him').

---

[*] 'Shall' was used as the auxiliary of the future before 'will, and, as Earle says (*Philology*, § 304), 'will has carved all the area it occupies out of the domain of shall.' In the Introd. to *The Psalter of 1539* (Murray, 1894), Earle points out that *will* as an auxiliary 'is hardly to be found in Saxon times, it is even strange to Wyclif in the 14th cent., it is not firmly established in the Bible of 1539. It is encroaching upon *shall* and driving it back, but its limits are not yet determined. And this aggressiveness of *will*, which has long ceased in the central places of the language, is still moving at the extremities, like the flapping of the waves on the shore after the subsiding of a storm at sea.'

[†] Shakespeare uses great freedom with this 'to,' frequently

The attempt has sometimes been made to distinguish the indep. verb 'to will' from the auxil. verb 'will' by their inflexions, 'to will' when indep. being often inflected *will*, *willest*, *willeth* or *wills*; past *willed*; and the aux. *will*, *wilt*, *will*, past *would*. But this distinction cannot be maintained, the indep. verb being often inflected as the auxiliary. Thus Jg 1^{14} 'What wilt thou?' (מַה־לָּךְ, RV 'What wouldest thou?'); Mt 13^{28} 'wilt thou then that we go and gather them up?' (θέλεις οὖν, RV as AV); Jn 1^{43} 'Jesus would go forth into Galilee' (ἠθέλησεν ἐξελθεῖν; Vulg. *voluit exire*, RV 'was minded to go forth'); so *Article*, x. (1553) 'Those that have no will to good things, He maketh them to will, and those that would evil things, He maketh them not to will the same'; *Piers Plowman*, vi. 213—

> 'And now wolde I witen [='know,' inf.] of the what were the best.'

The earlier versions are often a guide to the use of 'will,' 'would,' in AV. But it is often necessary to consult the Heb. or Greek, when it may be considered probable that at least when representing an original indep. verb 'will' and 'would' are themselves independent. The verbs most frequently represented are in OT *'ābah*, and in NT θέλω and βούλομαι,* all meaning to will, purpose, desire. Clapperton (*Pitfalls in Bible English*, p. 90) gives the foll. list of passages which demand special attention: Mt 11^{27} 15^{32} 16^{24}, Mk $6^{19.25}$, Lk 11^{31}, Jn 1^{43} 5^{40} 7^{17}, Col 1^{27}, 1 Ti 5^{11}, Tit 3^{8}.

2. Occasionally the following verb is omitted after 'will' and 'would,' as Ps 81^{11} 'Israel would none of me'; Pr 1^{25} 'Ye . . . would none of my reproof'; 1^{30} 'They would none of my counsel'; Sir 13^{heading} 'Like will to like.' So Jn $19^{\text{head.}}$ Rhem. 'Professing that themselves will no king but Cæsar, he yeldeth unto them.' Especially is this so with verbs of motion, as Tindale, *Works*, i. 147, 'The wind bloweth where it listeth, and thou hearest his voice, and wottest not whence he cometh, nor whither he will'; Tindale, *Expos.* 23, 'Whosoever will to heaven, must buy it of them'; Ezk 28^{22} Cov. 'Beholde o Sidon, I wil upon the, and get me honoure in the.'

3. There are passages in AV in which 'will' would now be considered redundant, as Gn 32^{11} 'I fear him, lest he will come, and smite me' (RV 'lest he come'); Lv 2^{1} 'When any will offer a meat offering unto the Lord' (RV 'when any one offereth'); Mt 9^{38} 'Pray ye therefore the Lord of the harvest, that he will send forth labourers into his harvest' (RV 'that he send'); Mk 3^{27} 'No man can enter into a strong man's house, and spoil his goods, except he will first bind the strong man' (RV 'except he first bind').

J. HASTINGS.

WILL.—In this art. the consideration of the teaching of the Bible regarding both the Divine and the human Will is to be included. These may seem at first sight to be subjects of very different kinds; nevertheless, an adequate treatment of either must clearly be impossible if the other is not taken into account. The light of revelation falls upon both the human and the Divine will in the sphere of their relations to one another. We derive our idea of the Divine will in Scripture chiefly, if not entirely, from what we are told of God's mind towards and purpose for man, which have led and lead to action on His part, whereby the action of the human will must necessarily be conditioned. And, further, Scripture is no exception to the rule that the ideas which men can frame or receive about God are affected by their knowledge of themselves. The conceptions commonly formed of the mind and soul of man have ever been transferred to the Divine nature, with more or with less qualification and extension; and this has especially been the case in the absence of philosophical thought, and particularly so in primitive times.

i. *Biblical terms for the act of willing*.—The psychological and metaphysical, and to some extent also the theological, ideas of early ages, and of the majority of men at all times, are to be studied in language. It is, then, first to be observed that there is no word either in OT or NT for the will, as a faculty; and even the act of willing is not contemplated in an abstract manner. As a point of some psychological interest we may also note, that of the two Heb. words in frequent use which seem to describe an act of the will most purely as such (מאן in Pi. and אָבָה), one has a negative signification, and the other is almost invariably joined with a negative. (The exceptions are Is 1^{19}, Job 39^{9}). It is in the absence of apparent reason, and in the resistance offered to a pressure from without, that the power of will is most barely presented, and therefore most readily apprehended. We may compare our term 'wilfulness.' The latter of the two Heb. words just named is often used of the wrongful assertion of the human will in opposition to the Divine will (*e.g.* Ps $81^{12\,(11)}$, Pr 1^{30}). See also, as regards the former word, Ex 7^{14}. The notion of an exertion of the will, not for resistance but for the achievement of something, appears to be most distinctly conveyed by יאל, in Hiph., but it is not so common as either of the words above mentioned. Lit. it means *to set oneself*, *determine*, *undertake*, *to do something*; a sense which we can trace in the LXX rendering ἄρχεσθαι.

We need also to consider the whole group of words signifying to *desire* (אוה, in Pi. and Hithp., and חָמַד), to *take pleasure in* (חָפֵץ), to *favour* (חָנַן and רָצָה), to *love* (אָהַב and חָשַׁק), to *choose* (בָּחַר). Where there has as yet been little or no psychological reflexion, such words may, and commonly do, involve the notion of willing. The mind has not become accustomed to distinguish between the motive—whether this consists in some purpose which commends itself to the reason, or a physical want, or external attraction acting upon the senses—and its adoption by the will; nor, again, between the act of the will and the feeling which accompanies its exercise. This is eminently true of the language of OT. In the case of men, indeed,

---

omitting where we should now insert, and sometimes inserting where we should omit. Cf. *Othello*, II. iii. 190, 'You were wont be civil,' with IV. ii. 12, 'I durst, my Lord, to wager she is honest.' The omission is found also in Milton, *Sonnet to Mr. Lawrence*—

> 'Where shall we sometimes meet, and by the fire
> Help waste a sullen day?'

And Guest quotes two consecutive lines from the *Mirror for Magistrates*, one of which omits, the other inserts this 'to'—

> 'And though we owe [=ought] the fall of Troy requite,
> Yet let revenge thereof from gods to light.'

* For the distinction between θέλω and βούλομαι consult Ellicott on 1 Ti 5^{14}, Lightfoot on Philem ^{13}, Mayor on Ja 3^{4}, Sanday-Headlam on Ro 7^{16}, and esp. 'the full and excellent note' [Sanday-Headlam] in Thayer, *N.T. Lex. s.v.* θέλω

there is the beginning of a distinction in the prominence given to the phenomena of temptation, but it is not followed out philosophically; while in regard to God, who can effect what He pleases, the distinction naturally does not suggest itself in the same way.

The fact, however, which is perhaps of most significance for us is that all words of this class, without material exception, even those which have the most decidedly physical associations, or which are used frequently in a bad sense, are applied to God no less than to men in the Hebrew OT. Thus חָשַׁק *to cleave in love to* (used of sexual passion, Gn 34^{8}), though also more generally for what the mind desires (1 K 9^{19}), is used of God's love to Israel (Dt 7^{7} 10^{15}), and also of man's love to God (Ps 91^{14}); while חָמַד to *covet* (Ex 20^{17}, and Mic 2^{2}) describes God's feeling for Zion, Ps 68$^{17\,(16)}$. It is used also of a spiritual desire in man, Ps 19$^{10\,[11]}$. Some words, such as חָנַן to *favour*, and its subst. חֵן *favour*, *grace*, רָצָה and רָצוֹן, with much the same meaning, and בָּחַר to *choose*, have, esp. through their Greek representatives, come to be more particularly connected in our minds with the mysteries of saving grace; but their early history was not dissimilar to the rest, *i.e.* their transference to God was at first somewhat crudely anthropomorphic. The instance of אָהַב to *love*, to which further reference will be made, should especially bring this home to us.

In the LXX several of these Heb. words are most commonly rendered by *βούλεσθαι*, *θέλειν*, and *εὐδοκεῖν*, which more simply express the act of willing:—all three are used for אָבָה and חָפֵץ, *οὐ βούλεσθαι* and *οὐ θέλειν* for מֵאֵן, *θέλειν* and *εὐδοκεῖν* for רָצָה; for אִוָּה, *θέλειν*, and also *ἐπιθυμεῖν*; for חָמַד, *βούλεσθαι*, *εὐδοκεῖν*, and *ἐπιθυμεῖν*. A feeling is, however, manifested in the LXX that some difference of language is advisable in speaking of God; *ἐπιθυμεῖν* is avoided in connexion with Him. אָהַב also, in the case both of God's love for men and men's love for God, is translated not by *φιλεῖν* but by *ἀγαπᾶν*, though it is to be added that this is, on the whole, the commoner rendering of the word in all contexts, and that *φιλεῖν* is used for the love of wisdom (Pr 8^{17} 29^{3}, Wis 8^{2}).

The non-classical word *θέλημα* is many times used both for חֵפֶץ and רָצוֹן, and for the latter sometimes also *εὐδοκία*.

The usage of NT is based upon, and in the main conforms to, that of LXX. In regard to *θέλημα*, in particular, we may observe that alike in LXX and NT it frequently denotes an individual wish or desire, and hence is used in pl. (Ps 102 (103) $^{7.\,21}$, Ac 13^{22}, Eph 2^{3}). But it may also describe such a permanent inclination as shows the bent of the character (Sir 32^{17}, cf. *θέλησις* in 2 Ch 15^{15}, and *βούλημα* in 1 P 4^{3}). Other noteworthy uses are to be found in Jn 1^{13}, 2 P 1^{21}. In Rev 4^{11} the created universe is said to proceed from an act of the Divine will, for in accordance with biblical usage we must understand *θέλημα* to denote an act here rather than a faculty.

ii. *The human will.*—In considering the conception of the human will and its present condition, as well as of the Divine will, to be derived from the Bible, grave subjects which have been treated in other articles (FALL, GRACE, PREDESTINATION, and ELECTION) come before us again; but they are to be regarded here, as it were, on their psychological, moral, and metaphysical side, and such a view of them may assist us in rightly apprehending them. At the same time, we may expect that some light will be thrown by the study in which we are engaged on questions which have been debated in the philosophical schools. It is true that little, if any, trace is to be found in any part of the Bible of direct speculation on the nature and prerogatives either of the human or the Divine will. Nevertheless, through the vivid presentation in Scripture of moral and spiritual truth in its practical bearing on man, important elements in the problems relating both to the will in man and to God's will are brought into relief, and this may contribute to the right solution of those problems.

1. The proposition that the will is free is commonly understood, alike by those who assert and those who deny it, to mean that man has, at least within certain limits, the power of self-determination, of yielding to or resisting motives,—those which arise within him as well as those which plainly have their origin without him,—and of modifying his own character in some degree. The notion of moral freedom, however, which meets us in Scripture is something different from this. It appears there simply as the opposite of the bondage of sin. From this point of view, 'to be free' is to have the power of acting according to one's true nature as God designed it; and those whom we cannot imagine to be any longer capable of doing wrong, like the perfected saints, because no tendency to evil remains in them and they are thoroughly established in holiness, would yet in this sense be free, indeed the only true freemen (Jn 8$^{32-36}$, Ro 6$^{17-22}$ 8$^{18-21}$; cf. also Ja 1^{25} 2^{12}). There is evidently profound truth in this conception: such must be the freedom of God Himself.

2. Nevertheless, Christian theologians of all schools have ever deduced from Scripture that man, originally at least, possessed free will in the common sense of the term, whether they admit that he still retains it to any extent or not. And, indeed, even apart from what is implied in the narrative of the Fall and all subsequent express statements (*e.g.* Ec 7^{29}, Ro 1$^{21-32}$), this alone is compatible with the Scripture doctrine of God as at once the all-powerful and all-wise and the perfectly good Creator. Man's fallen condition must be due to his own fault. For some good reason God suffered man to be tempted, but He intended that the temptation should be, as it might have been, withstood. Sufficient light had been granted to man to enable him to discern the true good, and power to choose it; yet he chose evil.

It is worthy of note that even those who have been most ready to silence criticism of the morality of the action which is attributed to God in theories of the method and scope of redemption, by alleging that these are matter of Divine revelation, and by declaring that God's ways are not to be submitted to a human tribunal, have yet themselves asserted, and sought to convince men of, the justice of man's punishment on the ground that in Adam he brought it upon himself.

But we must go a step further. The attempt to satisfy the sense of human justice, significant as it is when made in the quarters just indicated, must break down so long as it is supposed that men lost their moral freedom *totally* by the first fall, and therewith all hope of salvation except in so far as they should be visited by irresistible grace, which to some, and even the majority of the race, would never come at all. The Bible, we are bold to affirm, does not support such a position. It is true that it speaks of man as enslaved by sin, as unable to accomplish his own deliverance, as dependent upon God at every step for salvation, and even for the first motions towards good (Eph 2$^{1.\,5.\,8}$, Ro 3^{24}, Tit 3$^{4-6}$, Jn 6$^{44.\,65}$). But the strongest statements to this effect, even if they stood alone, could not fairly be made to mean that nothing depends on the consent, or resistance, of man's own will to the work of God in and upon him. And by the sacred writers who insist most emphatically on man's helplessness by himself, as well as in other parts of Scripture, it is plainly declared, or assumed, that he is responsible for being compliant (Jn $1^{9ff.}$ 5^{40} and 6^{45}, Ph 2^{12}), and in more general terms for his temper of mind and conduct, and that he will be punished or rewarded on ordinary principles of justice (Ro 2^{1-16} 3^{19-21}, Jn 7^{17}); in short, that each man born into the world is put to a probation still, however the conditions of his trial may be affected by the failures and successes of all who have gone before. So that the tragic interest and solemnity of the story of Adam's fall lies not only in the thought of what was lost for the human race from the beginning of its history, but also in its being the type of a conflict between good and evil which is perpetually renewed in the soul of every man.

It is less than the truth to say, as many do, that the recognition accorded in Scripture to the principle of man's moral freedom on the one hand, and its doctrine of grace on the other, present an insoluble antinomy, and that those who accept the authority of the Bible must accept both, though with a sense that they cannot be reconciled. This is certainly a wiser attitude than that of those who virtually deny the one in the interests of the other. It must, however, be admitted on reflexion that the sacred writers themselves do not seem to be conscious of any contradiction; and we cannot but infer that if to us there seems to be one it is largely of our own making, through the effect upon our minds of later controversies and the traditions they have left. The real difficulties in connexion with the conception of the freedom of the will are not, in point of fact, raised through the endeavour to combine in one view those moral and spiritual truths regarding Divine grace and human responsibility to which the Bible bears testimony, nor could they naturally have been indicated there. We gather from its teaching that the Spirit of God is the source of all moral and spiritual good, that Divine grace must be present with and must precede all rightful action of the human will, that this grace is bestowed in some measure upon all, and always with the design of leading on to salvation; but that it rests with man to respond to the Divine love, to yield to the Divine promptings.

Confusion and error have probably been introduced into the subjects disputed by Augustinians, Calvinists, and Pelagians, more through the too narrow notion of Divine grace in which all alike shared—as though it were to be traced only in definite Christian faith and its special fruits, and in the godly of Israel under the Old Dispensation—than from any other cause. Hence the Calvinist has been led to make a distinction between an 'effectual' grace granted in certain cases, and an operation of God's Spirit in other cases which has no saving purpose, and to regard the signs of moral and spiritual life in a multitude of instances as wholly illusory. Hence also, on the other hand, the Pelagian has supposed man to be capable of many kinds of good apart from God. Nowhere does the mistake to which reference has been made appear more clearly as the initial source of error than in the doctrine of certain schoolmen that grace was to be deserved *de congruo*, the authors of which theory evidently aimed at presenting that which they regarded as the truth in Pelagianism in the form in which it would be least open to attack. For here it was supposed that though man could not be finally saved without grace, yet by a character and a course of conduct, in shaping and inspiring which grace had had no part, he could win it. The different opinions here referred to are unscriptural, baseless, and profoundly irreligious. In contrast with all alike we would place the belief—justified, as we contend, by particular declarations of Scripture, and still more by a comprehensive view of the Divine training of man, which finds its clearest interpretation in the Bible—that no human spirit is left destitute of the life-giving visitations of the Divine Spirit, and that, rudimentary as that moral and spiritual life may be which at first He has sought or seeks to create and to foster, *e.g.* in the savage or in many even of those who live in Christian lands, no bounds can be set to the growth which may, and which He intends should, result in this world or another, wherever the human will is consentient. This is consistent with our ideas of justice, while at the same time it recognizes man's absolute dependence always upon God's grace, and can afford man no ground for claiming merit in the sight of God; for there can be no merit in his allowing himself to be saved, though he may justly expose himself to blame and loss if he frustrates God's merciful design. Further, it does not lower the supernatural to the level of the natural, though it treats that which is often called mere natural goodness as itself the outflow of a supernatural life, and as one of the lower stages, it may be, in an ascent to the highest saintliness.

3. To the extent, then, at least of giving or withholding that response to the leading of the Divine Spirit of which we have spoken, man is, according to the teaching of Scripture, free. It will, however, be said on behalf of Necessitarianism by adherents of the so-called Experience Philosophy, or Naturalism, that this response itself, and with it every feeling, thought, purpose, so far as they are not determined by causes now external to the individual, are the result of character, which has been itself completely determined and could be fully accounted for, and its products also predicted, if we knew fully the human being's parentage and life-history, as well as his present circumstances, and if the whole combination were not too complex for us to deal with by the aid of any science which we possess or are likely to possess. The force of this reasoning—and it cannot be denied that it has force—lies in the fact that to a very large extent mental phenomena are, or may with a high degree of probability be held to be, subject to Natural Law, and that the rapid and vast extension in our conception of its domain which has in recent times taken place, predisposes us to believe that all our experience may in reality come under it. On the other side, however, it may be urged that the consciousness in man of a power of choice, of a sense of responsibility for his conduct, his conviction often that he might have done better or acted in some way otherwise than he has, and the remorse which he feels, in spite of his readiness to complain of the action of an adverse fate, the blame which he imputes to himself or to others for any lack of loyalty to truth and right, of firmness and of courage, are facts which cannot be satisfactorily explained on the principles of Naturalism. We seem here to be brought face to face with an element in the sources of human character and action which, whatever its laws may be, is not subject merely to laws analogous to those which we can trace in the physical order,—a power of self-determination, a force which within a limited—in each individual a very limited—range is truly creative, a causation which is not merely phenomenal but real. As believers in the biblical revelation, we can suppose only that the all-wise and loving Creator, without diminishing aught from the fulness of His own power, has yet, in making man a spiritual being, imparted to him a certain—by comparison infinitesimal—amount of power like His own, and left him to make an independent use of it with a

view to the discipline and training which he would thus receive, and also to the response which the creature might then render to the Creator, and which would be otherwise impossible (cf. R. Browning, *Christmas Eve and Easter Day*, § 5). On the philosophical side we derive support for this view from many of the ablest thinkers of the past 150 years, from Kant and Hegel onwards, though it is necessary that we should emphasize the separation between the human and the Divine will more decidedly than some of the transcendental school do, in order to guard against Pantheism and against falling again virtually into Necessitarianism, though one of a different kind from that before spoken of.

Before passing on, it may be well to point out to what a small extent there can be any alliance between those theologians who hold that man altogether lost freedom of the will by the Fall, and philosophical Necessitarians of any school. The latter build upon their conception of what has ever been the constitution of man, of nature, and of the universe; whereas the theologians to whom we have referred regard, and must regard, man as, according to his original and true constitution, free. It is only in attempts to prove that man's belief in his own freedom is wholly illusory that they can make common ground; but this is the weakest part of the philosophers' case.

On the other hand, men in general, and that common-sense philosophy which has aimed only at formulating common opinion and at making it self-consistent, show far too little sense of the mystery attaching to the freedom of the will, or of the binding power of character, which, though not so fixed as to be beyond all possibility of being modified even by the action of the will itself, can, in general, only be altered slowly. But Holy Scripture, which lays so much stress on the bondage of sin, the operation of Divine grace, and the appointment of the circumstances of human lives by Divine Providence, cannot be said to ignore the limitations to human freedom. In this connexion it is important to observe that man's responsibility for the use of any freedom that he possesses is not diminished in proportion to the smallness of its amount. He is as much bound to turn to good account what he has if it be but a very little, as if its stock were practically unlimited. So at least he must be on the Scriptural view of his hopes and opportunities. The effort to strive against strongly riveted habits of evil might not seem worth while on the supposition that the time for seeking to undo them was very brief, and that he was left solely to what he could accomplish for himself and to human assistance; but it is otherwise if the influences of the Divine Spirit are at his disposal, and there is a prospect of infinite time in which a change in his nature may be effected. Thus it is that the Bible can give such prominence to the necessities affecting our human condition, and yet inspire and stimulate human endeavour to the utmost.

iii. *The Divine will.*—The created universe is said to proceed from an act of God's will (Rev 4^{11}, and cf. Sir 43^{16}; this is, of course, also implied in the language used in Gn $1^{3.6}$ etc., Ps 33^{9} etc.; as regards the creation of man see Ja 1^{18}). His will furnishes the true end and rule for human action. Very broadly, Jn 7^{17}, Ro 12^{2}, Col 4^{12}, and in the Lord's Prayer, Mt 6^{10}; with a more special reference, 1 Th 4^{3}. The Law of the Old Dispensation is not anywhere directly called 'the will' of God, but that it is a principal expression of God's will is plainly suggested in Ro 2^{17-20}. With this passage Jn 9^{31} may be compared, both being put into the mouth of Jews. 'The will of God' is also used specifically of God's purpose of redemption through Christ, as by our Lord Himself in speaking of His mission, Jn 4^{34} etc., and also in Ac 22^{14}, Eph 1^{9}. St. Paul and others look for indications of God's will to direct their missionary course (*θέλημα* without art. in 1 Co 16^{12} may probably mean *God's* will, cf. RVm). It is to be recognized in the ordering of events and the variety of human lots (1 P 3^{17}).

This last point brings us to the manifestation of God's will in the choice of some for special destinies or for temporal, moral, and spiritual advantages—a subject which, on account both of its peculiar difficulty and its connexion with that of human responsibility, needs particular consideration. We have seen that words used in the case of men to describe preferences of a kind for which we do not ordinarily seek to discover rational motives, and which we are content to treat as matters of individual idiosyncrasy, are applied to God, especially in OT. Such language may serve to teach in a simple way the lesson of the *absoluteness* of the Divine will. It may impress upon our minds the practical truth that when God wills this or that, man's duty lies in submission and obedience, or in humble thankfulness for His unmerited favour, on the part of those whom He exalts and blesses. But it must not be assumed that, when no motive is assigned for God's action, therefore it has not a moral and rational motive. It has to be remembered that if words descriptive of simple desire and attraction and the mere exercise of will are applied to God, so also are those which imply planning and taking counsel with oneself (Is 19^{17}, Jer 51^{29}, 2 Ch 25^{16}, Ps 33^{11}, Job 12^{13} etc.). There are, besides, passages in which we are expressly told what the Lord delights in (1 S 15^{22}, Jer 9^{24}, Is 1^{11} 65^{12} 66^{4}, Pr 11^{20} 12^{22} 15^{8}, Ec 5^{4}). Indeed all those many declarations in OT, that purity and righteousness of heart and life are required in those who would please God, are here in point; and it is to the principle thus laid down that the elevating effect of the religion of Israel was largely due.

The chief objects, however, of God's favour mentioned in OT are the Israelite nation and David with his royal house. And, in the case of the former at least, it may be said, the freedom of God's election is insisted on. But the language used can scarcely form a basis for a formal doctrine on this subject, and certainly not for a view of it which conveys the notion of arbitrariness. Later generations of Israelites were indeed taught that God's goodness to them was not due to any merit of theirs. But other reasons for it are given: it was part of the purpose which He had been pursuing from the days of their fathers, men of very different worth from themselves, and which He, in whom constancy is so notable a characteristic, could not abandon, and it was connected also with the punishment of other nations for their exceptional wickedness (Dt 9^{4-6} 8^{18}).

Special acts of Divine favour are seen in their true place in the light of the revelation of God's character as a whole. There could be no more instructive study in the history of the progress of the knowledge of God than that which is supplied by following out the conception of the love of God in the Bible. We have already touched upon the gradual refinement of the idea as shown in the use of language. But we have to observe also that the love of God spoken of in OT is always a distinguishing love for particular individuals and a particular race. The earliest lesson to be learnt by men, and all that they were capable of understanding, was that the good which happened to themselves was the result, not of chance or fate but of God's appointment, and the proof of His merciful regard. As we pass on to the NT the image is presented by Christ Himself of the Universal Father who loves impartially all His human children. It is evident that this revelation ought to control all more partial views.

Those who at first were made the recipients of special privileges could not fully enter into the largeness of the Divine intention in their bestowal. But this became apparent when the Church of Christ became the heir of the truth communicated to Israel. The principle of special grace and vocation was not then abandoned. It is indeed written large in human experience, and in the days of the first preaching of the gospel it was manifested in a new and deeper manner than ever before. Its application to individuals took the place of that to a nation, while spiritual blessings absorbed the attention which had been largely occupied by such as were material. But God's purpose in conferring such favours, viz., that those whom He chooses and calls to receive special knowledge, or upon whom any gift is conferred, should be ministers of it to others, is plainly set forth (Gal 1^{16}, Ro 1^{1}, 1 P $4^{10.\ 11}$, Ro $11^{15.\ 29\text{-}32}$).

V. H. STANTON.

WILL.—See TESTAMENT.

WILL-WORSHIP is the tr. in AV (1611 'will-worship,' mod. edd. two words 'will worship,' RV restores 'will-worship') of *ἐθελοθρησκία* in its only occurrence, Col 2^{23}. The tr. is probably suggested by the Gen. NT (1557) 'voluntarie worshipping,' where the Geneva translator seems to use the adj. 'voluntary' in the unusual sense of 'arbitrary.' The Gen. Bible (1560) has 'voluntarie religion,' and explains in the marg. 'Suche as men have chosen according to their own fantasie.'

Cran. and Rhem. have 'superstition' after Vulg. *superstitio*. Fuller adopts the word 'will-worship' in *Holy State*, p. 70, 'One Ceremony begat another, there being no bounds in will-worship, wherewith one may sooner be wearied than satisfied.' And Jer. Taylor uses 'will-worshipper,' *Rule of Conscience*, II. iii. 13, 'He that says, God is rightly worshipped by an act or ceremony concerning which himself hath no way expressed his pleasure, is superstitious or a will-worshipper.' These quotations probably explain the Gr. word aright.

J. HASTINGS.

WILLOW TREE (צַפְצָפָה *ẓaphẓāphāh* ; **WILLOWS**, עֲרָבִים *'ărābîm* [only in pl.]).—Both these Heb. words appear to be used for the willow, although some consider the latter to be the poplar (see *Oxf. Heb. Lex.* and authorities cited *s.v.*). The former is the cognate of the Arab. *ṣafṣâf*, which is generic for willow. The latter is the cognate of the Arab. *gharab*, which signifies a willow, more particularly the weeping willow, *Salix Babylonica*, L. *Ẓaphẓāphāh* occurs but once (Ezk 17^{5}), in a poetical rhapsody concerning the transplanting of a cedar top, contrary to its nature, apparently to the waterside, where a plant from the seed of the land is set out as a willow, and spreads as a vine. *'Ărābîm* occurs in five places. In all of them the fact that willow trees grow by the watercourses is alluded to. 'Willows of the wādy' (Lv 23^{40}) were taken for booths during the Feast of Tabernacles. The lair of Behemoth was among the 'willows of the wādy' (Job 40^{22}). 'By the rivers of Babylon . . . upon the willows . . . we hanged our harps' (Ps 137^{2}). Moab carried 'riches . . . to the wādy of the willows' (Is 15^{7} AVm 'valleys of the Arabians'). Israel is to 'spring up among the grass as willows by the watercourses' (Is 44^{4}). Eight species of willow grow in the Holy Land—*Salix Safsaf*, Forsk., *S. fragilis*, L., the brittle willow, *S. alba*, L., the white willow, *S. Babylonica*, L., the weeping willow, *S. triandra*, L., *S. Capræa*, L., the Capræan willow, *S. pedicellata*, Desf., the stalked willow, and *S. nigricans*, Fres., the blackish willow (Arab. *bân*). The first four are far more abundant than the latter. One of the peaks of Jebel Mûsa, in Sinai, is called *Râs eṣ-Ṣafṣâfeh*, from some willow trees at its base. No allusion is made in Scripture to the economic uses of the willow. Its branches are much used at the present day for basket-work. Willows are planted or grow spontaneously by all watercourses, and are characteristic trees of the landscape. The 'wādy of the willows' (Is 15^{7}), LXX *φάραγγα Ἄραβας*, Vulg. *torrens salicum*, is probably a wādy at one of the boundaries of Moab, with willows by its watercourses. If it be the southern boundary, it may be the same as נַחַל הָעֲרָבָה 'the wādy of the 'Arabah (*or* of the Willow),' which was the southern border in the days of Amos (6^{14}), about 70 years earlier. What this was is uncertain. Wādy Kerak, a part of this valley, is said by Irby to be called *Wādy eṣ-Ṣafṣâf*=Valley of the Willow.

G. E. POST.

WIMPLES is AV tr. in Is 3^{22} (only) of מִטְפָּחוֹת (RV 'shawls'). See art. DRESS, vol. i. p. 627^{b}, and MANTLE, vol. iii. p. 240^{a}. The word 'wimple' means a covering for the neck (Anglo-Sax. *winpel*, Old High Ger. *wimpal*). Skeat guesses 'a covering from the wind,' taking Anglo-Sax. *win-pel* as from 'wind' and *pell* (Lat. *pallium*) a covering.

WIND (רוּחַ *rûaḥ* ; *ἄνεμος*).—In Palestine the life of man and beast during the rainless summer depends upon the supply of water in the fountains for drinking, and in the brooks and streams for purposes of irrigation. This supply is in proportion to the amount of rain and snow deposited upon the mountains during the previous winter. As the rain is borne inland by the wind, the winds become of the highest importance, and are characterized by their power to produce or prevent rain. Hence the wonderfulness of water supplied independently of both wind and rain (2 K 3^{17}), and the unnaturalness of wind and clouds that do not produce rain (Pr 25^{14}, Jude ^{12}).

i. THE FOUR WINDS.—Winds claim attention by the periodicity that rules amid continual change, as well as on account of the heat and cold, dryness and moisture, connected with them. The Bible frequently refers to the four winds (Ezk 37^{9}, Dn 8^{8}, Zec 2^{6}, Mt 24^{31}, Rev 7^{1}), and the diversity of specific influence gives individuality to each, and prepares the way for the figurative use of their leading characteristics.

(1) *North wind* (רוּחַ־צָפוֹן *rûaḥ ẓāphôn*).—This is distinguished by its coldness and its power of dispersing rain. 'Fair weather (RV 'golden splendour') cometh out of the north' (Job 37^{22}). In Job 37^{9} ('cold out of the north') the literal meaning, unless a special constellation be referred to, is *out of the scattering winds* (RVm). In Pr 25^{23} 'The north wind driveth away (תְּחוֹלֵל) rain,' RV gives 'bringeth forth rain,' the testimony of the climate, however, being with the former [although the context demands the latter. Perhaps the text is corrupt; cf. Targ. *ad loc.*]. In a day of gloom and persistent rain, if one cloud can be seen moving from the north it is known that in less than an hour the clouds will break up and the sunshine will return.

(2) *South wind* (ר׳ דָּרוֹם *rûaḥ dārôm*).—This wind, whether tempestuous (Is 21^{1}, Zec 9^{14}) or gentle (Ac 27^{13}), is always warm, dry if inclined to S.E., and moist if from S.W. Under the S. wind everything is warm to the touch, and, if it prevails for a day or two, all living things become silent under its oppressive heat (Job 37^{17}). In Lk 12^{55} it is referred to as a sure sign of heat.

(3) *East wind* (ר׳ קָדִים *rûaḥ ḳādîm*).—This is

sometimes called a *wind from the wilderness* (Job 1^{19}, Jer 4^{11} 13^{24}) ; it is described as strong and gusty (Ex 14^{21}, Job 27^{21} 38^{24}, Is 27^{8}, Jer 18^{17}), and its destructive power was felt at sea (Ps 48^{7}, Ezk 27^{26}). It is referred to in Ja 1^{11}, where the expression 'with a burning heat' (*σὺν τῷ καύσωνι*) is correctly rendered by RV 'with the scorching wind' (see Driver on Am 4^{9} and Hos 13^{15}, with references). During summer a light land-breeze usually prevails from sunrise to 9 A.M., and rapidly grows hot under the increasing power of the sun.

(4) *West wind* (ר׳ יָם *rûaḥ yām*).—This is a moist and refreshingly cool breeze. The W. and S.W. winds are the bringers of rain (1 K $18^{44.\,45}$, Lk 12^{54}). If blowing freshly for several days in succession, they will cause a shower to fall even during the dry summer months.

In NT various terms are used to describe the violence of the wind; *e.g.* 'a great wind' (*ἄνεμος μέγας*, Jn 6^{18}); 'a storm of wind' (*λαῖλαψ ἀνέμου*, Lk 8^{23}); 'a great storm of wind' (*λαῖλαψ ἀνέμου μεγάλη*, Mk 4^{37}); 'a great tempest' (*σεισμὸς μέγας*, Mt 8^{24}). 'Tempest' is the translation also of *χειμών* (Ac 27^{20}), *θύελλα* (He 12^{18}). The 'tempestuous wind' (*ἄνεμος τυφωνικός*, Ac 27^{14}), called Euroclydon, RV 'Euraquilo,' is the E.N.E. gale now called *levanter*, which prevails over the eastern half of the Mediterranean. In ancient times it troubled the ships of Tarshish (Ps 48^{7}) when returning deeply laden to Tyre. See EURAQUILO.

ii. FIGURATIVE SUGGESTIONS. — Wind is the symbol of (1) *vacuity and nothingness:* Job 6^{26} 15^{2}, Pr 11^{29}, Is 41^{29}, Jer 5^{13}, Hos 8^{7} 12^{1}.

(2) *Brevity:* Job 7^{7}, Ps 78^{39} 103^{16} 104^{4}.

(3) *Freedom:* Pr 27^{16} 30^{4}, Ec 1^{6}, Eph 4^{14}.

(4) *Power:* Job 21^{18} 27^{21}, Ps 1^{4} 35^{5} 83^{13}, Is 41^{16} 57^{13} 64^{6}, Jer $49^{32.\,36}$ 51^{1}, Ezk $13^{11.\,13}$; Dn 2^{35}, Ja 1^{6} 3^{4}.

(5) *The will of God:* Ps $18^{10.\,15}$; 104^{3} 148^{8}.

WINDOW.—See art. HOUSE, vol. ii. p. 435^{b}, and TEMPLE, p. 700^{a}.

WINE.—See art. FOOD, vol. ii. p. 33 f., and VINE, p. 868.

WINEBIBBER (Pr 23^{20} in plu. סֹבְאֵי־יָיִן ; Mt 11^{19}, Lk 7^{34}, *οἰνοπότης*). — The Eng. word comes from Coverdale at Pr 23^{20}; AV is the first to use it in NT. The verb 'to bib' (perhaps from Lat. *bibere*, to drink) is still in use, signifying to keep on drinking, tipple. North (*Plutarch*, 847) speaks of 'Orators that did nothing but bib all the day long'; and Drant, *Horace Sat.* VII. E iv, 'Thou thinkes by sleepe and bibbinge wyne, to banishe out all woes.' The Eng. is a lit. tr. of the Heb. and Greek.

WINEFAT (*i.e.* Winevat).—See FAT.

WINE-PRESS.—See VINE, p. 868.

WINK.—In Ac 17^{30} the verb to 'wink at' is used figuratively of God's longsuffering, 'The times of this ignorance God winked at' (*ὑπεριδών*, RV 'overlooked'). The same use (also of God) occurs in Wis 11^{23} 'Thou . . . winkest at the sins of men' (*παρορᾷς*, RV 'overlookest'); and (of parents) in Sir 30^{11} 'Wink not at his follies' (*μὴ παρίδῃς*). So Golding, *Calvin's Job*, 559—'Some times God spareth the wicked and wincketh at their misdedes, and that is to their sorer damnation'; and Udall, *Erasmus' Paraph.* ii. 284, 'Suche maner of faultes of children, those that be gentil parentes doe for the most part winke at, which would not suffre greater offences.'

WINNOW.—See AGRICULTURE, FAN, SHOVEL.

WISDOM.—1. *In the age of the Prophets.*—The Wisdom (חָכְמָה *ḥokhma*) of the Hebrews developed itself originally as an independent intellectual movement, side by side with the religious one, in the form of a half-poetical, half-philosophical * observation of nature. We have the earliest reminiscences of this in the Fable poetry of the OT (Jg 9^{7-15}, 2 K 14^{9}), and in the traditions which attach to the name of Solomon (1 K 5^{10-14} [Eng. 4^{30-34}]). The comparison between the latter and the allied creations of Arabia (v.$^{11\,(31)}$), and the description of the material of Solomon's sayings (v.$^{13\,(33)}$), show that we have to do here with products not of religious but of secular poetry. This Wisdom was thought of as specially naturalized in Edom (Jer 49^{7}, Ob ^{8}). — The great prophets are upon the whole not favourable to this Wisdom, Is 5^{21} 29^{14}, Jer 4^{22} $8^{8.\,9}$ 9^{23}: they reproach 'the Wise' with conceit and immorality. In the technical language of the prophets, תּוֹרָה, *i.e.* decision by oracle, is attributed to the priests (Jer 18^{18}, Ezk 7^{26}); דָּבָר, 'the word of Jahweh' (=דבר י״י Jer. *l.c.*), to the prophets; עֵצָה, the faculty of self-determination or devising of measures, to 'the Wise' (Jer. *l.c.*). Even before the Exile the need made itself felt of fixing the teaching of Jahweh and establishing firmly its contents. It was this that led to the composition of the Book of Deuteronomy. The fierce conflicts with false prophets which had to be waged by Jeremiah and Ezekiel (Jer 28. $29^{24\text{ff.}}$, Ezk 13) tended further in the direction of limiting the influence of prophecy (Dt 18^{18-22}). The latter decayed to such an extent that in the post-exilic period its silence was painfully felt (Ps 74^{9}, 1 Mac 9^{27}). Yet it proved impossible to cause this dry branch on the tree of Israel to put forth shoots afresh.

2. *Post-exilic development of the Wisdom teaching.*—The priests and 'the Wise,' unlike the prophets, found a new sphere for their activity after the Exile; the former in the re-established cultus of the temple, the latter in the carrying forward of the legal religious system which Ezra the scribe took in hand after the Return (Ezr $7^{6.\,10}$). Yet it was a considerable time before the effort to confine the whole intellectual life of post-exilic Judaism within the limits of rigid law succeeded. The wave which stirred the nations in consequence of the establishment of the world-empire of Alexander the Great, overflowed the Holy Land as well, and on the other hand carried Judaism far beyond the borders of that land to the interior of Asia and all the coasts of the Mediterranean. Israel came thus everywhere into contact with Greek civilization, for the Greeks were from the earliest times a race of colonists.

3. *The earliest traces of Greek influence.*—The traces of the influence of Greek Wisdom meet us for the first time in the Book of *Proverbs* (2nd cent. B.C.), which, in addition to the practical wisdom of life which it preaches (hence the name ספר חכמה applied to it in Tos. to *Baba bathra*, 14*b*), is acquainted also with a special artificial form of gnomic wisdom. On מָשָׁל 'likeness,' 'parable,' attached at first to an object borrowed from the world of nature, or מְלִיצָה (LXX *σκοτεινὸς λόγος*) 'hidden allusion' (Pr 1^{6}; cf. חִידָה, *ib.* and Ezk 17^{2}), cf. Cheyne, *Job and Solomon*, London, 1887, p. 215.

Wisdom is conceived of in Pr $8^{22\text{ff.}}$ as a separate

---

* Philosophy proper had no existence, and could have none, among the Hebrews. A process of thought free from presuppositions was unknown to them. God and Divine revelation were accepted as fixed points. Accordingly, all that was aimed at was merely to penetrate deeper into the contents of what was given and to define it more precisely. Nor is the form of the *Ḥokhma* that of the school speech; it is popular. Its problems are not theoretical, but concern questions dealing with the practical wisdom of life or with godliness.

Existence whom Jahweh formed as the first of His works prior to the creation of earthly things (vv.$^{23-26}$, cf. v.^{22} קנני; see also Ps 139^{13}). The *Ḥokhma* did not co-operate in the creating of the heavens and the earth, for, according to vv.$^{26-30a}$, Jahweh Himself made all things. Hence אָמוֹן of v.^{30} cannot be rendered 'master workman' (RV), but, upon the analogy of אֹמֵן of Nu 11^{12} ('guardian of children'), ought to be tr^{d} 'foster-child' (cf. AV, Aquila τιθηνουμένη, Gunkel [*Schöpfung*, 1895, p. 94] 'Hätschelkind'). The *Ḥokhma* poet's thought is that Jahweh, after the toils of creation (which, according even to Gn 2^{3}, rendered rest necessary), found a diversion, as it were, in this His firstborn before the world, as the child played before His eyes (Pr 8^{30b}). Wisdom is thus, in the mind of our poet, not a principle at work in the forming of the world, since she was only an onlooker at this and at the fashioning of individual objects. She has, according to Pr 8^{31b}, to do with men alone. In these she finds her delight, to them alone she turns with her call to hear instruction (מוּסָר Pr 8^{33}). It is thus purely ethical aims to which she seeks to lead men, by whom, of course, from the Judaistic standpoint, are meant simply Israelites.

The notion of the Divine *Ḥokhma* as a separate Existence outside of and over against Jahweh, is, however, as un-Israelitish as possible and absolutely opposed to the monotheism of the יהוה אחד (Dt 6^{4}) that had become firmly established since the time of Deuteronomy. It can be explained only as due to the influence of Greek philosophy, according to which the archetypes of things (ἀρχέτυποι ἰδέαι, Plato, *Timæus*, p. 29) or the powers of the Divine essence diffused throughout the world (the κοιναὶ ἔννοιαι of the Stoics; cf. C. Wachsmuth, *Die Ansichten der Stoiker über Mantik*, etc. p. 21) are regarded as having a separate existence of their own, although in their relation to the world they are otherwise conceived of than in the Book of Proverbs.

4. *The Jewish doctrine of retribution and the struggles of faith to which it gave rise.*—In other parts of the Book of Proverbs the questions of wisdom in the ordering of the life of a Jew are discussed. Piety appears here as the successful and most advantageous course ($2^{7f.\ 11f.\ 20-22}$). Virtue is never unrewarded ($3^{1ff.\ 8-10.\ 16}$ $10^{27ff.}$ 16^{20}). Misfortune befalls only the ungodly (11^{31}), for the pious it is only a passing chastisement ($3^{11f.}$).—The actual experiences, which were diametrically opposed to such doctrines, led to a period of struggles of faith (Farrar in *Speaker's Apocr.* vol. i., London, 1877, 'The era of difficulties,' p. 416), whose deposit we have in several of the Psalms, in Job, and in Ecclesiastes.

(*a*) *The Psalms.*—Ps 37 proceeds upon the idea that the good fortune of the wicked has no continuance (vv.$^{2.\ 9f.\ 17.\ 20.\ 35f.\ 38}$). In brilliant poetic language the sudden end of their prosperity is described, and this has the counter-description opposed to it of the exaltation and happiness of the godly which always comes to pass after a transient period of woe (vv.$^{5f.\ 17b-19.\ 24f.\ 33.\ 39f.}$). Since, however, this was contradicted by other experiences which told of wicked men who were prosperous down to the end of their life (Job $21^{7-15.\ 23.\ 29-33}$), the difficulty was not solved. The expedient of declaring that in such cases the punishment overtakes the children of the ungodly (Job 21^{19}) was nothing more than a palliative, for this punishment extended, according to Ex 20^{5}, only to the third or fourth generation; and it gave no satisfaction at all to the later prophets (cf. Jer $31^{29f.}$, Ezk 18^{2-32}), who insisted upon the personal responsibility of the transgressor.—Ps 49 accordingly grappled with the problem afresh and offered the solution that death at all events brings punishment to the wrong-doer whom continued prosperity has made defiant (v.^{7}). Then can none deliver him (vv.$^{8-11}$), he must leave behind him his ill-gotten wealth (vv.$^{12.\ 17-20}$), and he himself becomes a prey to corruption (v.^{14}). The godly man, on the other hand, has the sure hope that God will deliver him from death (v.^{15}, cf. Ps 16^{10}), and he can enjoy his prosperity, while the wicked die away (v.^{15b}). But, seeing that the stroke of death falls in any case at last upon the righteous as well, neither could this solution of the problem be regarded as satisfactory.—Ps 73, in which we can still detect the scars of the fierce conflict which faith had to sustain with doubt (vv.$^{2-16}$), followed to some extent the same path, arguing that the prosperity of the ungodly is but fleeting, whereas that of the godly is at last permanent (vv.$^{17-24.\ 27}$). Along with this, it points to a solution which, from the Christian standpoint, indeed, would be perfectly satisfying, namely, that the happiness of the righteous is purely inward, and that this, or in other words the blessedness produced by the fellowship of the heart with God, cannot be torn from them by any suffering of an earthly kind (v.$^{25f.}$). But this solution was inadequate from the standpoint of the OT, for the latter demanded outward prosperity for the righteous by way of reward, and outward suffering for the wicked by way of punishment. Equally unsatisfactory as a full answer was the declaration that, in the case of the righteous, suffering is chastening, and, as such, an evidence of Divine love (Pr 3^{11}, He 12^{5-9}), intended to warn them against going on further in sin (Job $33^{10f.\ 17-30}$), and, on the other hand, purifies them from stains and in this way perfects them (He $12^{10f.}$). However correct and beautiful all this is, one does not see why in that case the ungodly, who surely in any case also deserve punishment, receive none. Again, from the OT point of view, the use of such a purifying of the godly could not be apprehended; for if, as frequently happened, the suffering continued till the death of the sufferer, the whole fruit of such purification was lost in Sheol, where godly and ungodly lead the same dreamy existence (Ps $49^{11.\ 15}$, Job 3^{11-19} 7^{7-10} 14^{22}, Ezk 32^{18-32}). There even the righteous have no more hope (Ps 6^{5} 30^{9}, Is $38^{10.\ 18f.}$, Job $7^{9f.}$ 14^{10-12}; cf. esp. W. Schwally, *Leben nach dem Tode nach den Vorstellungen des alten Israels*, Giessen, 1892, pp. 59–74). Nor could doubts be solved by the expedient of declaring that in the last resort all are sinners, that none is good but God alone (Job 4^{17-19} 14^{4} 15^{14-16} 25^{4-6}, Mk 10^{18}), for this supplied no answer to the question why it is, under these circumstances, that the notoriously ungodly so often remain unpunished. But, above all, these attempts at solving the problem all left the main question untouched, how the circumstance is to be explained that God does not fulfil His solemn promise to reward the righteous and to punish the wicked (Dt 28), but almost consistently does the opposite. With loud complaints the godly addressed to God the bitter question why He looks so calmly on this course of things (Jer $12^{1.\ 2}$); and a kind of despair took possession of them (Jer 20^{14-18}, Job 3^{1-12}). It appeared as if God were asleep (Ps 44^{23}). The prosperous transgressor asked mockingly, 'Where is now thy God?' (Ps $42^{3.\ 10}$) and triumphantly denied the alleged principle of a Divine government of the world (Ps 10^{13} 14^{1} 73^{11}).

(*b*) *The Book of Job.*—The finest exhibition of the problem of the doctrine of retribution on all its sides and in all its depth is afforded by the poem of Job. We have here three [or four] speakers, who state their case from the standpoint of the traditional doctrine; and also in the speeches of their opponent, Job, a large space is devoted to a description of the doctrine he combats. The fundamental dogma of the old doctrine of retribution is that all suffering is punishment inflicted by an angry God. God turns away offended from man (Job 13^{24} 19^{7} $23^{8f.}$ $30^{20f.}$); or turns the glance of His anger upon him (7^{19a} 14^{6a} 16^{9}), meets him as an enemy (19^{11} 13^{24}), smites him with the stroke of His hand (13^{21} 30^{21}). The storms of trial appear like the attack of an adversary (10^{17} $16^{13f.}$ 19^{12}) or the threatened onslaught of wild beasts (10^{16}, cf. Ps $22^{13f.\ 17}$, Is 38^{13}). Side by side with this we find the figures of the net (Job 19^{6}), the prison (7^{12} 13^{27}), darkness (19^{8b}), the closed-up way (3^{23} 19^{8a} *et al.*). The sufferings are described at one time as outward (9^{23}), and again as inward (30^{27} pains of the entrails). Finally, they carry the man off ($9^{17f.}$ 14^{18-20}). This hostile attitude on the part of God awakens in the mind of the sufferer the fear of further misfortunes (Job 9^{28} $10^{14f.}$ $30^{23f.}$), and therewith a feeling of despair and hopelessness ($3^{25f.}$ $9^{11ff.}$ $23^{14ff.}$), so that he prays merely for a brief respite (7^{19} 10^{20} 14^{6}), or even for death ($6^{9ff.}$ 7^{15}). — The further result of this view of the causes of suffering is that the sufferer torments himself continually with the question why he has incurred this mysterious and, to him, inexplicable anger of God ($10^{2ff.}$ $13^{23ff.}$ $23^{3ff.}$), for it appears to him as if he were continually watched by God, who seeks for occasions to punish him for possible transgressions ($7^{20f.}$ $13^{26f.}$).—To the sufferer it is peculiarly painful that his associates, friend and foe alike, take the same view of the cause of his woes. They regard him as one thus marked out by God. His enemies with malicious joy seize the opportunity to inveigh against him ($16^{10ff.}$ $30^{1ff.}$); his slaves and domestics refuse him obedience ($19^{15f.}$); wife and children and friends shrink from him ($19^{13f.\ 21f.}$ 12^{4}); all regard him as a reprobate (17^{6}). Whoever should doubt this would call the Divine justice in question, charge God with unrighteousness and untruth, and thus commit the most heinous blasphemy (8^{3} 34^{7-12}), and he would load himself with new and heavier guilt (11^{4} 15^{13} $33^{9ff.}$ $34^{5ff.}$). The whole duty of the sufferer is, accordingly, by honest self-examination to discover his offence. Such must be *a priori* assumed, for otherwise there would be no suffering, *i.e.* no punishment, to explain (8^{11}); and, as no one is perfect (4^{17-19} 15^{14-16} 25^{4-25}), some kind of guilt will not be difficult to discover. [It might be that the offence was trifling: in that case it was God's aim to deter the man from something worse, 33^{27-30}]. Hence the man who denies his guilt reveals a hardened disposition, which will not confess what is certainly there all the same, and which justifies, according to the notions of the time, the heaping of all conceivable evil charges upon his head (ch. 22).—To this doctrine Job objects: in the first place, that at all events the sufferer has a right to complain; in $6^{4ff.}$ that it is harsh when, instead of offering to the sufferer comfort in his affliction, people upbraid him with the sins they impose upon him (v.$^{14ff.}$), repeat with all kinds of variations the familiar theory of the Divine punitive justice and apply this to the unfortunate being before them (12^{2-4} 13^{2} $16^{2ff.}$ 19^{2-5}). Again, it is an easy matter on the ground of pure theory to heap all kinds of charges upon a sufferer's head, charges to which the latter can oppose the partly notorious facts of his blameless life (ch. 31). No doubt, the omnipotence of God makes rebellion on man's part against the strokes of His hand useless, but this does not prove that these sufferings are just ($9^{2ff.\ 29ff.}$ 10^{15-17} $12^{14ff.}$ 13^{19-21} $19^{6ff.}$). Although it is not to be denied that there are terrible instances of Divine judgment upon wrong-doers (19^{29} $13^{10.\ 16}$), on the other hand experience shows that good and bad alike are the victims of God's stroke ($9^{22f.}$ $12^{23ff.}$), and that it goes well with the one and ill with the other, without any merit on the part of the one or blame on the part of the other ($21^{23.\ 25}$). It often happens even that wicked men enjoy undisturbed prosperity down to their death (12^{6} $21^{7-15.\ 30-33}$ $24^{1ff.}$).—On the other hand, no power in the world, and no alleged doctrine of Divine Providence, however hallowed by time, can tear from the soul of an innocent sufferer the consciousness of his innocence, and compel him, in opposition to the acquitting voice of conscience, to confess himself guilty (10^{7} 13^{18} 16^{17} $23^{6f.}$ $27^{5f.}$ 31). Such a man is entitled to appeal to the better judgment of God Himself, which does not agree with the verdict which men think to discover in the strokes of misfortune that have fallen upon the sufferer (10^{7} 12^{4} $13^{7-11.\ 22f.}$ 16^{19-21} 17^{3} $19^{23ff.}$). The very assertion that there is not a single righteous man shows how utterly untenable is the old doctrine of retribution, for in that case it is quite incomprehensible why it often happens that it is just those who are relatively least stained with guilt that are most severely punished, whereas gross offenders go free ($8^{12.\ 20f.}$ $13^{23ff.}$ $14^{4.\ 17}$). The negative result of these observations is briefly this: What hitherto it has been the custom to call the exercise of Divine justice in the fortunes of men is nothing more than the exercise of Divine omnipotence, whose resolutions are without any moral quality. These take their place, undistinguished, amongst natural occurrences, be these beneficial or destructive, and affect all men alike. In like manner, individuals are prosperous or the reverse in the affairs of their natural life, without regard to whether they are good or bad. The gifts of prosperity and the blows of adversity, in so far as by these are understood material well-being or suffering, do not depend at all on the moral character of the man, and have no relation at all to the moral nature (the righteousness) of God. Such is the result of an unprejudiced examination of things. The old doctrine of Divine retribution is completely shattered against it. Cf. Goethe's *Faust*, i.—

> Fluch sei der Hoffnung! Fluch dem Glauben!
> Und Fluch vor allen der Geduld!
> *Geister-Chor:* Weh! Weh!
> Du hast sie zerstört,
> Die schöne Welt,
> Mit mächtiger Faust;
> Sie stürzt, sie zerfällt:
> Ein Halbgott hat sie zerschlagen!
> Wir tragen
> Die Trümmern ins Nichts hinüber,
> Und klagen
> Über die verlorne Schöne.
> Mächtiger
> Der Erdensöhne,
> Prächtiger
> Baue sie wieder,
> In deinem Busen baue sie auf!

Over against this the following positive structure is reared by one who supplemented the poem (cf. C. Siegfried, 'Job' in Haupt's *SBOT*). He insists that, while Nature, especially in her terrible catastrophes, exhibits merely the working of Almighty power whose immensity overwhelms man (ch. 26), yet in her positive operations, in the variety of her creatures and their mode of life, she reveals an admirable law and order; from which it follows that not merely brute force but also hidden wisdom interpenetrates and controls the life of nature (chs. 38–41). The depths of this wisdom are indeed beyond man's understanding (28^{1-27}), but the analogy of the life of nature leads us to postulate a similar order for the moral world, although it is not in man's power to state its laws. Man has left to him the essence of all wisdom in the practical maxim of life—the fear of Jahweh and the avoiding of evil (26^{28}). The theoretical solution of the problem is thus given up in the Book of Job. Yet the standpoint of faith and of religion is maintained, as in Ec $12^{13f.}$.—Another solution is proposed in the Elihu speeches, but it is opposed to the whole tendency of the poem. These speeches trace the sufferings of the righteous to an aim on God's part to purify them morally, and to keep them from sin ($33^{17f. 27-30}$ 36). The object of suffering, that is to say, is here a pædagogic one.

(*c*) *Ecclesiastes.*—A complete breach with the position of Jewish orthodoxy was reached in the 'Grundschrift' of this book (Q^1; cf. C. Siegfried in Nowack's *Hdkom. z. AT*, 'Prediger und Hoheslied,' Göttingen, 1898), embracing the following passages: 1^3–$2^{12. 14b-24a}$ $3^{1-10. 12. 15f. 18-21}$ $4^{1-4. 6-8. 13-16}$ $5^{9f. 12-16}$ 6^{1-7} $7^{1b-4. 15. 26-28}$ $8^{9f. 14. 16f.}$ $9^{2f. 5f.}$ 10^{5-7} (cf. *l.c.* p. 6 ff.). We find here a pessimist philosophy radically divorced from Judaism and influenced mainly by Stoicism (cf. *l.c.* pp. 6–10). The book was glossed by an Epicurean Sadducee (Q^2), to whom belong 3^{22} 5^{17-19} $7^{14. 16}$ 8^{15} $9^{4. 7-10. 12}$ 10^{19} $11^{7-8a. 9a. 10}$ 12^{1b-7a} (*l.c.* p. 10 f.); further, by a *ḥākhām* (Q^3), who defends Wisdom against its disparagement by Q^1, and to whom are attributed $2^{13. 14a}$ 4^5 $6^{8. 9a}$ $7^{11f. 29}$ 8^1 9^{13-18} $10^{1-3. 12-15}$ (*l.c.* p. 11); and, most notably, by a Jewish *ḥāsîd* (Q^4; *l.c.* p. 11 f.), who corrected the anti-Jewish views of Q^1. To his hand we owe the passages: $2^{24b-26a}$ $3^{11. 13f. 17}$ 4^{17}–$5^{1. 3-5. 6b f.}$ 6^{10-21} $7^{13. 17. 23-25. 29}$ $8^{2-8. 11-13}$ 9^1 $11^{5. 8b. 9b}$ $12^{1a. 7b}$. On the other hand, scattered interpolations (Q^5; *l.c.* p. 12), in the spirit of the old gnomic Wisdom, contain exhortations to a prudent conduct of life: 4^{9-12} $5^{2. 6a. 8. 11}$ $7^{1a. 5. 6a. 7-10. 18. 20-22}$ 9^{11} $10^{4. 8-11. 16-18}$ $11^{1-4. 6}$. A redactor (R^1) put together 1^2–12^7, and supplied this whole with the closing formula 12^8. Then came particular additions: first epilogue $12^{9f.}$, which informs the reader as to the personality of Qoheleth and removes the mask of king Solomon; second epilogue $12^{11f.}$, which assumes an opposite attitude, one opposed to this Wisdom literature; and $12^{13f.}$, the work of a final redactor (R^2), who from the Pharisaic standpoint alludes to a final future judgment, a doctrine with which Q^4 (3^{17} 11^{9b}) is not yet acquainted (*l.c.* p. 12).

In the genuine parts of the poem the theme 'All is vanity' is treated by Q^1 in a series of parallel arguments. In the first of these it is established that all that happens on earth exhibits an iron law of cycle, in which certain passing phenomena regularly recur (1^{3-11}). All man's efforts to discover a reasonable ground for this arrangement come to nought (vv.$^{12-18}$). Qoheleth assures us that he has tried all kinds of expedients to banish the pessimistic disposition produced by the above observation; he has revelled in every species of enjoyment; he has given himself to the most laborious inventions. But all in vain (2^{1-11}). The attempt to find consolation in the pursuit of Wisdom ($2^{12. 14b. 15f.}$) has likewise been a complete failure, so that he has ended in blank despair (vv.$^{17-24a}$).—The second argument on the theme of 1^2 shows how the contraries, which characterize all that happens on earth, prove all labour on man's part to be vain. Birth is followed by death, planting by rooting up, etc. (3^{1-9}). This law of nature, which always destroys again what it has made (vv.$^{10. 12. 15}$), shows that there is no moral principle in the ordering of the world. Consequently there can be none in the case of men either, for, as their existence is not essentially different from that of the beast, no more can their fate be different ($3^{16. 18-21}$). Special arrangements for the good of man are impossible in the plan of the universe.—The third argument (chs. 4. 5) is already interrupted by a number of interpolations. But the hand of Q^1 may still be recognized in $4^{1-4. 6-8. 13-16}$ $5^{9f. 12-16}$ in the complaint about human suffering, from which there is no escape, and which is yet so useless, and about the restless and yet fruitless labours of men. Isolated fragments of the following chapters (Siegfried, *l.c.* p. 22) contain complaints of similar experiences, and wage a special conflict with the Deuteronomic doctrine of retribution. Laws of nature, according to Q^1, not moral laws, rule everything. There is no Divine government of the world. This is proved by the world's course. Man's lot is a continual vain struggle. Pleasures cannot compensate him for this, for they rest upon an illusion. Nor does Wisdom bring any real satisfaction, for the pursuit of her is fruitless.—Amongst the glossators, Q^2 occupies a purely Epicurean standpoint. Eating and drinking and other sensual indulgences he considers of very real value, and counsels participating in these before the coming of old age when the capacity for enjoying them ceases. Labour, again, is, according to him, not without result, for by it man gains something which procures enjoyment. Hence man is to note the good days and accommodate himself to the evil ones.—The glossator, the *ḥākhām* Q^3, as was already remarked, defends Wisdom against the disparagement of its value by Q^1.—The Pharisee Q^4 maintains the positions of Judaism against Q^1, namely the Divine causality in the creation and government of the world: the Divine justice, which calls even the exalted to account and protects the law-abiding; the view of premature death, which overtakes the wicked, whereas it is escaped by the godly (Siegfried, *l.c.* p. 11 f.).

5. *The Wisdom teaching in the Apocrypha.*—In the apocryphal literature the Wisdom teaching received abundant attention. (*a*) *Sirach.*—The standpoint of the sayings of Ben Sira has points of contact with that of Q^4 just described. His 'Wisdom' is out and out Jewish-religious. 'All wisdom is from the Lord, and is with him for ever' (1^1); hence it is unfathomable in its nature, for God alone comprehends it (v.^{6}). God created it (v.^{9}), and poured it out on all His works, but in a special manner upon the godly (v.^{10}), who recognize that the fear of the Lord is the beginning of wisdom (vv.$^{14-20}$). From this source flow all ethical rules, which are specialized in rich variety, a course which gives the author occasion for a number of separate expositions (1^{21}–16^{23}). Once more he turns to the contemplation of the nature of wisdom in 24^1–30^{27}, a section which opens with a call to Wisdom to raise a hymn in praise of herself, to which she responds in 24^{3-12}. She glorifies herself as having proceeded out of the mouth of the Highest, and relates how at the Creation she lay upon the earth like a mist (cf. Gn 1^2 2^6). Then she took her seat upon a pillar of cloud (cf. Ex 14^{19}) and spread her flight through the heights of heaven. But she likewise walked through the depths of the abyss. Sea and dry land have been taken possession of by her, and she has sought a dwelling-place among all nations. But 'the Creator of all things' commanded her: 'In Jacob take up thy dwelling.' Then she received her place in Zion, and flourished there like a fine tree. And so she calls all who long for Wisdom to come and enjoy her fruits. But Wisdom has found its fullest expression in the Book of the Law (24^{23-29}), whose full stream is compared with that of the four rivers of Paradise. With Sirach thus as in Pr 8 (see above, p. 925^a) Wisdom is not God's intermediary in the creation of the world, but has to do only with men. She seeks a dwelling-place with them upon the already created earth, and finds it in Israel, partly in the Temple worship ($24^{10f.}$), partly in the Book of the Law (24^{23}).

(*b*) *Baruch.*—In this book Wisdom appears simply as attached to the book of the commands of God (ch. 4): Israel's misfortunes, which came upon her with the Exile, are due solely to her having forsaken these commandments of life ($3^{9ff.}$; cf. Ryssel in Kautzsch's *Apokr. u. Pseudepigr. d. AT*, i. 230–475).

(*c*) *4 Maccabees.*—Here the Jewish philosopher of religion starts with the principle that the natural reason (*ὁ νοῦς*) of man is intended to rule the passions (*τὰ πάθη*). This is accomplished when the *νοῦς* chooses a life in Wisdom and thus becomes *λογισμός*. Only thus can it arrive at the *σοφία*, which consists in possession of a knowledge of things Divine and human and of their causes (*σοφία δὴ τοίνυν ἐστὶν γνῶσις θείων καὶ ἀνθρωπίνων πραγμάτων καὶ τῶν τούτων αἰτίων*, 1^{16}). But the Wisdom that is recognized must also be desired, the *λογισμός* must be *εὐσεβὴς λογισμός*, thought determining itself to a virtuous life. The best aid to the leading of such a life is the ancestral Law, which teaches us Divine and human things in the worthiest and most suitable manner (*ἡ τοῦ νόμου παιδεία, δι᾽ ἧς τὰ θεῖα σεμνῶς καὶ τὰ ἀνθρώπινα συμφερόντως μανθάνομεν*, 1^{17}). By the help of the prescriptions of the Jewish Law a man will be best able to check perturbations of spirit, for from it we derive trust in God, and the conviction that the enduring of any suffering for virtue's sake brings blessedness. True philosophy thus coincides with *εὐσέβεια*, and is of value simply as laying a scientific foundation for Judaism (cf. J. Freudenthal, *Die Flavius Josephus beigelegte Schrift über die Herrschaft der Vernunft*, Breslau, 1869; A. Deissmann, 'Das sogenannte vierte Buch der Maccabäer' in Kautzsch's *Apokr. u. Pseudepigr. d. AT*, ii. 177; and, in general, Farrar in *Speaker's Apocrypha*, 415^{b}–420^{a}; and art. Maccabees in vol. iii. p. 194).

In this intellectual movement which defended the Jewish religion with the weapons of Greek philosophy, and embellished it with the grace acquired from Greek education, the Book of Wisdom took its place as an important factor. See the following article. C. Siegfried.

WISDOM, BOOK OF.—i. Title.—The title *σοφία Σαλωμῶνος* rests upon the circumstance that the book in several passages, particularly chs. 7–9 (cf. esp. $9^{7f.}$) claims to be the words of king Solomon, who passed in general for the patron of didactic composition, as David did of lyric. In like manner the canonical Book of Proverbs received the title 'Proverbs of Solomon' (מִשְׁלֵי שְׁלֹמֹה), although in 30, 31^{1} other composers of oracles are also introduced as authors. Of Solomon's kingly wisdom we hear in 1 K 3^{7-14}. In Sir $47^{12-18\,(14-19)}$ he is celebrated as one who filled the earth with dark sayings, songs, parables, and apophthegms, as well as with interpretations which evoked the admiration of all lands. Also in Qoheleth he is regarded as the real founder of the schools of wisdom (Ec 1^{12}), and even the sayings of this book are in a way attributed to him as their legendary author (see Siegfried, *Prediger*, p. 1 f.). The author of the Book of Wisdom appears to have been moved by a definite polemical aim in opposition to the Book of Qoheleth, when he chose Solomon as the representative of his views. In 1^{10}–2^{20} he assails with remarkable vehemence the opinions of unorthodox Jews, who incline partly to Stoicism, partly to Epicureanism. These opinions correspond exactly to those put forward in the Book of Ecclesiastes. He reproaches these men with their pessimism, in which they in a manner 'called death unto them by their hands and their words' (Wis 1^{16}), consumed themselves with longing after this friend, and made a covenant with him (*ib.*). According to their perverted judgment, life is short and sorrowful (2^{1a}; cf. Ec 6^{12} $2^{22f.}$ 3^{10} $4^{1ff.}$). Man has no remedy against death, and none can release from Hades (2^{1b}; cf. Kautzsch, *Apokr.* i. 482). The breath of our nostrils (cf. Gn 2^{7}) is but as a smoke that ascendeth; thought (*ὁ λόγος*) is a spark kindled by the beating of the heart [the ancients had no idea of the functions of the brain], and, when this is extinguished, the body is turned into ashes, and the animating breath is dissipated in the air. Then even the recollection of us fades quickly (2^{4-6}; cf. Ec 2^{16} 9^{5b}). Our life is like the passing of a shadow (2^{5}; cf. Ec 6^{12}). Hence from these circles of thought comes the Epicurean call to enjoy the good things of this life as long as they are within our reach.—Further, there are expressions here and there in Wisdom which recall the late Hebraisms peculiar to Ecclesiastes: *e.g. μερίς*, Wis 2^{9c}=חֵלֶק of Ec 2^{10} 3^{22} in the sense of 'fruit of toil,' 'reward'; *καταδυναστεύειν*, Wis 2^{10}, cf. עָשַׁק בְּ Ec 4^{1}, שָׁלַט בְּ 8^{9} (cf. Farrar, *Apocr.* i. 404^{b}). To this unbelieving Solomon our author opposes a genuinely Jewish, pious, orthodox Solomon.—That the words of the book are those of the historical king Solomon, our author does not mean to assert, nor could the readers of his time have supposed this to be the case. The Muratorian canon pronounces the Book of Wisdom to be 'a work composed in his honour by friends of Solomon' (*ab amicis Salomonis in honorem ipsius scripta*); Clement of Alexandria, it is true, cites sayings from our book as words of Solomon, but also as those of *σοφία*; Origen and Cyprian use the book as canonical, but Origen is doubtful of its authenticity (*ἡ ἐπιγεγραμμένη Σολομῶντος σοφία, adv. Cels.* v. 29). Jerome and Augustine give up the Solomonic authorship (see Schürer, *GJV*^{3} iii. 381 f.).
